HOW MANY BONES HAVE YOU IN YOUR FEET?

Most likely you do not know, few people do, and it is usually a surprise to learn that there are so many, and that the foot is about the most complicated and delicately constructed part of the body.

In order that you may get full information as to the many foot troubles which the people of today are suffering, there is to be a free lecture given to the public on Thursday evening in the Germain Street Institute, corner of Germain and Queen streets, at 8 p. m.

Waterbury & Rising have here during this week a foot specialist who has very high qualifications in his profession, and who, it is claimed, has relieved more people from suffering than any other man alive. This lecture is entirely free and will be illustrated by over 100 slides of a most interesting nature, and no doubt it will be a great privilege for the people of this city to get such direct information of just how to take care of their feet and avoid the intense suffering which many have gone through in the past.

The three things which you do not want to forget are, the place, Germain Street Institute; the time, Thursday night at 8 p. m.; the fact that admission is entirely free to the public. 6-26

THE FOOD REGULATIONS. W. S. Potts, inspector of the Canada Food Board, said today that it is not necessary to obtain a license to serve refreshments at lawn socials, bazaars, tea meetings, public or private luncheons, dinners, picnics, fairs, lodge, club and fraternal society meetings and such functions even where fifteen or more persons are present, but it is imperative that the Canada Food Board orders dealing with these entertainments be strictly observed. He said he looks to such organizations to set an example in patriotism by going even further than the requirements of the board in conservation of foods most required to be exported to the army and allies, such as wheat products, beef, veal, pork, cheese and butter, by using substitutes whenever possible.

Grand Duke Michael Alexandrovitch, a younger brother of the former Czar, is reported at the head of a movement in Turkestan favoring the separation of that territory from Russia.

LOCAL NEWS

NEW YORK, June 26—Specialties were the prominent feature at the firm opening of today's stock market, the automobile group taking precedence over more seasoned shares. General Motors gained 2 1/2 and Buick 1 1/2. Other equipments made fractional gains with steel and copper. Reading was extremely active, soon reaching 1/2 points. Secondary western and southern rails were in demand. Liberty bonds held steady.

Noon Report. The trend of the market after the first half hour indicated a further divergence of professional sentiment and an extension of trading for the short accounts. Reversals of one to three points were made by specific issues such as motors, tobacco and shippings. Representative stocks also yielded to pressure, United States Steel being freely offered on its early fractional rise. Prices improved irregularly in the second hour, with fresh sellings at noon.

CORN AND OATS. Chicago, June 26—"Calendar buying" led to a decided upturn today in the price of corn. It has been a tradition for some time that the price of corn in anticipation of wet weather and consequent scares in regard to crop damage. Day's trading was accordingly multiplied and to such an extent that the time being little notice was taken of recent factors. Opening prices, which varied from unchanged figures to 3-cent higher, followed by a sharp general advance.

Lack of offerings allowed oats to rise with corn. After opening unchanged to 1-1/8 higher at 57-5/8 to 57-1/2, the market sought a material gain. Provisional strength in the hog market. Ribs especially went up grade.

THE WAR SITUATION.

The Associated Press, which is usually accurate, says it is estimated the Austrians lost more than 200,000 men in the battle which has not yet ended. Today's report is a grim story of panic and defeat, in which the enemy vainly sought to escape the vengeance of the Italian guns on the Piave. One correspondent in half a mile counted 600 bodies floating down the river. Of one Austrian regiment only eighty-eight men to a company survived and these were prisoners. The terrific loss sustained by the enemy makes it clear that Italy has no intention of fear unless heavy German reinforcements are sent to that front. Even in that event, the old lines on the Piave have been completely restored, the Italians, flushed with success, would probably give the Germans as hot a reception as they gave the Austrians whom they are apparently still pressing hard.

THE NEXT STEP.

It is very gratifying to learn that the school boards in St. John, Fredericton, St. Stephen, Campbellton, Sussex, Newcastle and other towns in the province are seeking information concerning the new act relating to vocational training and desire to make it of service to their communities. In view of this fact, and of the appointment of committees by the Manufacturers' Association, the request for the appointment of the vocational education board should meet with a prompt and hearty response. Nothing can be done as it should be done until that board is appointed. It is not to be expected that the whole province will take immediate advantage of the act. There is need of a well-directed propaganda to arouse the people everywhere to a full consciousness of what is to be gained by a proper vocational training system, and this can only be done by a well organized vocational training department. The province is being readjusted on the adoption of a progressive measure providing for vocational training, and should now develop a well organized system. The first step is to be taken by the provincial board of education in the appointment of the vocational education board.

THE IRISH PROBLEM.

When one reads of some of the things that are being said and done by persons of more or less influence in Ireland, and especially of the German plot and its Irish sympathizers, the very feeling is one of keen resentment, in view of the fact that for many years past Ireland had had no cause to hate England, and has now every reason for uniting with England, France and the United States in meeting the worst menace that has ever threatened their common civilization. Despite this feeling, however, one cannot read the very temperate speech of Premier Lloyd George in parliament yesterday without realizing its reasonableness and force. There are three factions in Ireland, the Nationalists, the Unionists and the Sinn Fein. They are at the moment hopelessly at odds. Left entirely to themselves today, they would make Ireland a smaller Russia, filled with discord and disorder. But, as the premier points out, a government with a colossal war on its hands does not seek to add to its troubles by provocative action in Ireland, if it can be avoided. Moreover, there is hope that Ireland, which is now so divided, may presently change and become less quarrelsome. That, indeed, is the only ground for hope of a lasting settlement of the Irish question. Those who seek to keep any portion of Ireland out of the war with Germany are enemies of the country, and are doing their country the greatest possible injury. When Mr. John Dillon asserts that neither the Nationalist party nor the Catholic church will support recruiting until the government of Ireland is handed over to Irishmen, he conveniently omits to say which Irishmen. It is true he unsparingly denounces the Sinn Fein, but there is a suspicion that the Sinn Fein wield more influence in parts of Ireland today than does Mr. Dillon himself. Ireland's worst enemies today are its own warring factions.

VON KUEHLMANN'S SPEECH.

The German foreign secretary, Von Kuehlmann, said yesterday: "Once the moment arrives—when I care not to prophesy—that the nations which are at present locked in battle will exchange peace views, one of the preliminary conditions must be certain degrees of mutual confidence in each other's honesty and chivalry." The war will last a long time if it must go on until the Allies feel that they can place any confidence whatever in Germany's honesty and chivalry. They know that only when that country is rendered incapable of doing further mischief can there be any hope of permanent peace. They did not begin the war, but they propose to end it, and prevent its recurrence. Von Kuehlmann, however, sounds a new note when he says that the war can hardly be expected to end through purely military decisions. Hitherto the German boast has been that a military decision in their favor would bring the end, and that they would dictate the terms of peace. Failure to break the western front, and the more recent defeat of the Austrians, joined to a knowledge of the internal conditions in both Germany and Austria, seem to have convinced at least the foreign secretary that the possibilities of peace by negotiation may now be worth thinking about. And yet there is nothing whatever in his speech to encourage the hope that Germany has abandoned any of her ambitions, or is willing to restore Belgium, or make restitution in any way. And while Von Kuehlmann prates of honor and chivalry his armies are bombing hospitals, killing doctors, nurses and wounded soldiers. If there were any feeling among the Allied nations that

Bangor Commercial.

The Filipinos are manifesting their complete accord with the United States and have offered to furnish 27,000 men for military service, a testimonial to the wisdom that this country has shown in its treatment of the Filipinos since it released them from the bondage of Spain. In the first years thereafter, there was considerable trouble in the islands, because the Filipinos wished to walk before they had learned to creep, but they gradually became convinced of the concentration and fairness of the United States and are now showing their complete loyalty to the Stars and Stripes. Porto Rico, too, is anxious to do its full part in the war. So many approving comments have been made on the article in this paper yesterday on high school entrance examinations that it is clear there is in this province as well as in Ontario a strong feeling that such examinations are not the most satisfactory test of the fitness of pupils to be admitted to the high school. There is, therefore, the more reason for looking further into the matter. The educational authorities may have already done so, but that is the case the reasons which appealed to them are either unknown or are not deemed sufficient by many people.

THE STANDARD APPEARS TO OBJECT.

The Standard appears to object to the St. John school board making any recommendations to the board of education. The Standard is a very silly newspaper. Surely if the St. John board does not believe in high school examinations it has a right to say so. That is the way to let the board of education know what people are thinking. "After six attacks, which continued Saturday night and Sunday morning, there remained at one o'clock Monday afternoon only ninety men of this (Austrian) brigade. The commanding officer then committed suicide and the ninety men surrendered." These two sentences reveal the extent and character of the Italian victory on the Piave. Mr. Asquith wants the Irish question referred to the Dominions Conference. That conference would doubtless counsel conciliation, but it would also urge the Irish people to get into the fight against Germany as a guarantee of good faith. Another warning comes from Ottawa that wheat must be conserved for export to the Allies in Europe. Too many people are still paying very little attention to this matter which is of such vital importance to the winning of the war. The south end playground has taken another leap into the future. As the school holidays begin this week there should be as little delay as possible in having the ground put in condition for play. Germany is not pleased with the new Bulgarian cabinet. The Austrian defeat is certain to influence sentiment in Bulgaria. Germany is also ill-pleased with Austria. Toronto Globe: There were a hundred and forty-eight advertisements for teachers in Saturday's Globe. The war shortage is fully as marked as it was a year ago. The people of Sussex do right in suppressing boot-leggers. Those gentry should be interned or given a year at hard labor. If there is a German raider in West Indian waters its career will be short.

IN FRANCE'S FLOWERED FIELDS.

In France's flowered fields they lie,
And she will hold them close and dear,
Above their graves her trees will sigh,
Her grasses cover them year by year.

On summer noons the sun will stream
In cheerful warmth across their beds,
By night the moon's slant, silvery beam
Build aureoles about their heads.

The fitful winds will make them moan
In soft and plaintive melodies,
And they shall lie apart, alone,
Through all the coming centuries.

O France, when coming springs shall break,
In foam of bloom to hide thy scars,
And flowers of human kindness make
An end of agonies and wars.

Forget not these our sons who came
At that first wild, bewildered cry,
With their young "ish hearts aflame
Upon thy tragic hills to die.

Still have them in thy guarding care,
A holy and a cherished trust;
And let thy children come with prayer
To dream awhile beside their dust:

To dream of tender love and ruth,
Who tried the star-tit ways of truth,
Bondsman of British loyalties.

Be thou our Irish forever more,
In ties of common English bond,
That we may know the sons we bore
Lie not in unregarded ground.

Not to settle it was merely increasing the government's difficulties in conducting the war, but it was also increasing the difficulties of the United States government in conducting the war.

Lloyd George On Irish Problem

First Duty To Give Ireland Opportunity to Enter War

Whole Problem Baffling

Speaks of Catholic Church in Matter—Sinn Fein Activity Deadly—Effect in the United States—Still Hopeful for Settlement During War

London, June 26.—In his speech in the House of Commons yesterday on the Irish situation, Lloyd George said that the Irish problem was the most baffling that had ever come under the consideration of the government or parliament. It had baffled many governments that had more time to consider it than the present one. It was causing much difficulty and perplexity to a government charged with the most tremendous responsibility ever imposed on any government. The problem was how to govern the country without having the full assent of its people.

The premier said he did not believe it beyond the capacity of parliament to carry through a measure of home rule for Ireland which would deal justly and equitably with the legitimate objections of a large part of the Irish community. Dealing with the evidence on the conspiracy he said it was the same evidence that was adduced in 1916. It was lost for some time and then recovered. The government realized the significance of what was going on. It would be quite impossible to publish the character of the evidence, but there was no doubt in the mind of any one who had examined it that there existed a conspiracy which powerful people in Ireland were engaged in an effort to subvert British rule in Ireland. The difference this time was that the atmosphere of assent which was growing inside Ireland and in parliament was disturbed, and in Ireland was positively antagonistic.

The Catholic Church.

In the second place, he said, there was the attitude of the Catholic Church, which animated itself with a challenge to imperial supremacy. He thought that was one of the most fatal factors in the Church had committed and believed every member of the Church outside Ireland, and a great many in Ireland, who were going to happen to be at a moment of great peril by challenging the whole supremacy of the British parliament as the dearest blow to the liberties of Ireland that had been dealt in his time. Whatever folly there might be in attempting to press through means of self-government until the emotion had subsided, the folly of abandoning every attempt to secure Ireland's status to imperial rule would be still greater every day.

He added that he still was hopeful of some means of concision in Ireland which would recreate the conciliatory spirit which at one time dominated all parties in England and Ireland, and which should be able to secure a settlement of the problem during the war.

Effect in United States.

Nobody could imagine, the premier continued, that any one charged with the tremendous problems committed to the government's care was going to be troubled by trying to effect a settlement in Ireland, or of any domestic problem unless it was forced upon them as a war problem. Not to settle it was merely increasing the government's difficulties in conducting the war, but it was also increasing the difficulties of the United States government in conducting the war.

An Important Discovery

Swollen Veins Relieved

That Absorbine, Jr., would relieve varicose veins was discovered by an old doctor who had suffered from swollen veins for nearly fifty years. He had made many unsuccessful efforts to get relief and finally tried Absorbine, Jr., knowing its value in reducing swellings, aches, pains and soreness. Absorbine, Jr., relieved him and after he had applied it regularly for a few weeks he told us that his legs were as smooth as when he was a boy and all the pain and soreness had ceased. Thousands have since used this simple liniment for this purpose with remarkably good results. Absorbine, Jr., is made of oils and extracts from pure herbs and when rubbed upon the skin is quickly taken up by the pores; the blood circulation in surrounding parts is thereby stimulated and healing helped. \$1.25 a bottle at druggists or postpaid. Canada Has Abundant Supply of Timber in British Columbia

Ottawa, June 26.—Referring to the statement of Johnson-Hicks, chairman of the British Parliamentary Air Commission, that England was preparing to launch into a tremendous campaign of airplane building and fighting, the Imperial Munitions Board has announced that the organization for the production of airplane timber was complete except in one particular.

"The production of airplanes depends as much upon the supply of suitable timber as upon any other one thing," said an officer of the board. "The best timber so far discovered for airplane construction is Sitka spruce, which grows exclusively on the Pacific coast, and then only in favored localities. Washington and Oregon States have a fair area of this timber, but Queen Charlotte Island and the deeply indented bays and inlets of the mainland and Vancouver Island, on the British Columbia coast, have the greatest areas in the world, the trees in some districts breaking eight feet in diameter and running as high as twelve feet. Shortage of Labor.

"Italy and France are securing their supplies in the United States, while England also is buying part of her needs there. It is stated that 70,000 men are engaged in the woods and mills of Oregon and Washington. In British Columbia, however, the supply of labor is very limited, and only 3,200 men are now employed, though thousands more could be used.

"There is practically no limit to the necessities of England and the allies for airplane lumber. While the actual footage required for an airplane is not great, in order to secure the quantity of the proper specifications from ten to fifteen times as much lumber must be cut. This will give some idea of the labor involved in producing the lumber for one airplane. Yet to win victory, Mr. Johnson-Hicks says, many thousands will be needed.

"The Imperial Munitions Board has a fine organization for cutting, shipping, and handling the logs and timber, and although our output is now four times what it was last January, we could enormously increase our present production had we the increased labor necessary to fully operate the logging camps and saw-mills," was the conclusion of the board official.

Will Launch 89 Ships on July 4

Tonnage 439,886, Exceeding Entire Output and Record of Any Pre-War Year

Washington, June 26.—As evidence of the part they are playing in winning the war, workers at the shipyards of the nation under control of the Emergency Fleet Corporation will launch eighty-nine ships, aggregating 439,886 tons of deadweight, on the Fourth of July. Thirty-seven of the ships will be of steel.

The total of eighty-nine ships is the minimum assured, and is exclusive of launchings of destroyers and other warships promised in the drive to make the day historic. An indication of the might of the fleet is given by the fact that the eighty-nine ships will exceed by eighteen the number of hulls and by 16,548 tons the amount of tonnage launched during May, when a new record for the yards of the nation was established.

It is possible that five additional ships, steel cargo carriers, aggregating 25,000 tons, will be ready for launching on July 4. These are not included officially in the grand total. Word has been sent to the Shipping Board from the yards where these ships are being built that shifts of men are working twenty-four hours a day when possible in the effort to get the vessels ready.

The Farmerettes

Whether from city or country find themselves living under an unusual strain. The usual work necessitates the use of different muscles and this development demands a good supply of pure, rich blood.

Because it goes directly to the formation of new blood, Dr. Chase's Nerve Food is of the greatest assistance in building up new cells and tissues and strengthening the muscles.

You Feel Fine

Fatigue is the result of poisons in the system, the waste matter resulting from the activities of life. The kidneys have failed to filter these poisons from the blood and you are tired.

But awaken the kidneys and liver by using Dr. Chase's Kidney-Liver Pills and you soon feel fine. The poisons are swept from the system, the pains and aches are gone and you are ready for work and for play.

GET EXTRA DIVIDENDS.
June is the month to make each square foot of ground in the garden yield extra dividends by intensive utilization of space between rows and plants. For instance, tomatoes set out late in May, do not begin to spread much before July. Even then, their spreading tendency should be checked by providing supports of some sort. Lettuce, radishes and other crops that mature quickly may be grown between tomatoes, peppers and eggplants. Extra sowings of cucumbers should be made at this time to help you out with your pickle supply. The plants and fruits develop very quickly at this season. By pinching out the tendrils of the cucumber vines can be restricted to surprisingly limited space without seriously limiting the number of "cukes" you are going to have.

Clothed In Paper She Left Germany

Miss Olga Wurzberg, Returning To America, Says Tensons Suffer Severely—People Abandoning Hope

An Atlantic Port, June 26—Among the passengers arriving here on a Norwegian-American liner was Fredrick William Wurzberg, eighty-four years old, proprietor of a department store at Grand Rapids, Mich., with his wife, Theresa and his three daughters, Olga, Elsie and Dorothy. The daughters went to Germany six years ago to be educated, and were caught by the war. Mr. and Mrs. Wurzberg were born in Westphalia and came to America when they were children. The daughters were born in Grand Rapids. They made several attempts to get back after the war began, but were unable to obtain the necessary papers until May 8, Mrs. Wurzberg said. The family were living at Godesberg, near Bonn, on the Rhine, and left for home by Berlin and Copenhagen, where they were detained two weeks until their passports arrived. Olga Wurzberg, the eldest daughter, who spoke for the party, said that they had been forced to leave Germany because the food was so bad. "You should have seen us when we reached Norway in our paper clothes before we were fattened up with human food," she said. "We looked very different then. The clothes began to be dry cleaned and all fell apart, so we had to buy a new outfit in Norway. The only souvenir we have of that time in Germany is a pair of wooden shoes which we had to wear because leather shoes could not be obtained. I was reduced twenty-four pounds, and my sister, Elsie, suffered from malnutrition so that her face became partly paralyzed. Germans' Morale Low.

"The morale of the German people is very low on account of their suffering through the long war, and they are becoming hopeless regarding the victories they have been promised so repeatedly by the war party. In my opinion they are nearly in a state of revolt, and something will happen if the people do not get better food before long. "When I was ill in a hospital at Godesberg a number of wounded soldiers were there, who took me for a German woman because I speak the language so well, and they talked to me freely of their grievances. They said the food given to the men in the hospital was of the poorest quality, without any nutriment in it, while the officers were fed on the fat of the land. The men's food prevents them from recovering quickly, and reacts on their systems to such an extent that many of the soldiers never recover their health. "One soldier said to me shortly before we left Godesberg: 'Some day we are going to lay down our arms. Why should we fight? Our officers used to lead us into battle, but now they follow in the rear because the government wishes to preserve them from danger.' "A Major, who was sitting in an arm-chair on the porch of the hospital said to me: 'You see that I wear the coat of the Kaiser. I only wish that you could know the feeling that lies beneath it. We are not going to stand this terrible war forever. I have seen soldiers leave the hospitals to return to the trenches with only one arm. "Now that the German people have learned that America has sent more than half a million troops to France they are beginning to worry about the war and express their regret that this country should have been forced into the struggle."

Exchange of Prisoners.
Germany has been asked through Spanish diplomatic channels to send representatives to Bern, Switzerland, to meet American representatives there on August 5 to discuss maintenance, treatment and exchange of prisoners. Germany as yet has not replied.

Japan Won't Intervene.

LEMON JUICE TAKES OFF TAN
Girls! Make bleaching lotion if skin is sunburned, tanned or freckled
Squeeze the juice of two lemons into a bottle containing a quart of water. Add a quarter pint of the best freckle, sunburn and tan lotion, and complexion beautifier, at very, very small cost. Your grocer has the lemons and any drug store or toilet counter will supply three ounces of Orchard White for a few cents. Massage this sweetly fragrant lotion into the face, neck, arms and hands each day and see how freckles, sunburn, windburn and tan disappear and how clear, soft and white the skin becomes. Yes! It is harmless.

AUSTRIA'S FINANCIAL SITUATION APPALLING.

\$1,000,000,000 Required Annually to Meet Interest on Outstanding Notes. Washington, June 26.—The reports that reach Washington of the economic stress in Austria are associated with the rapidly-increased debt of the empire and the fast-rising volume of outstanding notes.

Exchange has fallen to a discount of 60 per cent. There has never been any success in efforts to sustain the crown, as the removal of practically all the gold to Germany in the early part of the war cut away the basis of credit. At that time the notes outstanding were 2,100,000,000 crowns. By the end of 1918 the amount had reached about 11,000,000,000 crowns, an increase of 18,400,000,000. It has been growing at the rate of 800,000,000 a month, and is now said to be 22,500,000,000 crowns. The ratio of gold to note circulation is, therefore, a fraction of 1 per cent.

The total war debt of Austria-Hungary is estimated at between \$17,000,000,000 and \$18,000,000,000. At the average rate of interest this exacts an annual payment of over \$1,000,000,000.

Keep the chicks growing! If there are any with drooping wings, and sitting around, they are usually troubled with lice. Equal parts of sulphur and lard mixed well and a very little rubbed on the back of the head and the vent under each wing will do the business.

NEWS OF SOLDIERS

Just three years from the day on which he sailed from St. John with the 26th Battalion, of which he was a member, Private Daniel Emley Oram, was killed in action on the western front. The news was received yesterday in an official despatch from Ottawa by his wife, Private by young Oram, and by his son, also his mother, Mrs. Mary E. Oram, one brother, John Oram, and two sisters, Mrs. Delahoy and Mrs. James McEachern, all of this city. Before going overseas, Private Oram had been employed with the Vulcan Foundry and with the Thompson Manufacturing Company at Grand Bay. Earlier in the war, he had been wounded and sent to hospital, but returned to the firing line. Only a few days ago, his wife received several letters from him. In one, dated May 19, he told of his return from the front line trenches and in another, dated June 8, he said he was going back to the firing line. That trip was his last. He was thirty-four years of age.

The names of J. H. Bloomfield, of Hampton, appeared in yesterday's official list of casualties as having been killed in action. He was a native of England, but the family has been in the Dominion since 1848, and he had been in the 140th Battalion, which was transferred to another battalion while on active service.

Lieutenant-Colonel W. J. Osborne, officer commanding the district depot, has received the colonial auxiliary force's long service decoration.

A party of recruits for the Jewish Legion arrived in the city yesterday at the city placed their cars yesterday at the disposal of the returned men in a grateful manner. The men were given a delightful outing.

Captain S. S. King of Hampton was welcomed home from the front on Monday. He is a brother of Lt. A. M. King, proprietor of the Lansdowne Hotel. He went overseas in the 118th Battalion. The Social Service Council represents all the churches of the Dominion as well as other organizations which are concerned for social betterment, including temperance and other similar societies. It is thought that the unifying of all these bodies into one great organization on behalf of social welfare will give a force to the work which will tell upon the whole of the Dominion. All who are anxious to see the very best social life realized in Canada will wish and pray for every possible blessing on Dr. Shearer in his new and important sphere of Social Service and Evangelism of the Presbyterian Church, and his acceptance of the wider position of General Secretary of the Social Council of Canada, is an event of real importance.

Mrs. John McFeters of New Mills has been advised that her nephew, Private C. S. Roy, was killed in action. A memorial service was held in the Roman Catholic church in New Mills on Sunday for him.

TRIBUTE TO DR. SHEARER.

(Tertius in Toronto Globe.) Social service is so prominent in the life and work of the various churches of Canada that the resignation of Rev. Dr. J. G. Shearer of his post of superintendent of the Department of Social Service and Evangelism of the Presbyterian Church in Austria, and his acceptance of the wider position of General Secretary of the Social Council of Canada, is an event of real importance.

SWEETNESS FOR ALLIES

FROM CUBA'S SUGAR BOWL

Record Production in Fertile Southern Isle Will Ease Burden of Allied Nations' Consumers

(Toronto Globe.)

As the preserving season approaches it is good news that Cuba has been harvesting and grinding the greatest crop of sugar cane in her history. This island "sugar bowl" for of the sixteen million tons of sugar annually produced in the world, Cuba will supply this year some 8,500,000 tons. Her nearest competitors are British India, with 2,500,000 tons, and Java, where sugar is also a drug on the market, owing to lack of shipping facilities. There are also large crops in Hawaii, Japan, Peru and other tropical regions. The continent of Europe, which formerly produced 5,000,000 tons of beet sugar, mainly in Russia and Germany, is scarcely a factor now, at least outside the Central Powers, for war has upset the industry.

Some years ago Canada laid the foundation for a beet sugar industry, mainly in Ontario, but the production of beets has not been maintained up to expectations. The volume of labor required has been an obstacle.

At present there are several large refineries in Ontario, in Montreal and the maritime provinces, and a few in the United States. The largest of these is the imported raw sugar, in which Cuba's product will play its part. For some years, the volume of raw sugar imported on the British West Indies and British Guiana, from which importations have been reduced, has been increasing.

Every ton of sugar produced in Cuba this year is expected to be in advance of the International Sugar Committee, representing all the Allies. Prices are expected to be as high as in advance of the consumer. The producer will get \$4.00 per hundred for raw sugar on the docks of the Cuban ports, which means that 800,000,000 will be sent to Cuba for this year's crop. The island as a result will be a net exporter of sugar, and the due reward for Cuba's prompt action in lining up with her allies immediately after her big sister, the United States, decided to help.

At that time there was a condition of chaos in Cuba which promised a revolution. But President Mario Garrayua Menocal, being an intelligent man of vision, asked what Cuba might best do to help, and he was told that his country's best stroke was to grow sugar. The present crop, as William Atherton Du Puy points out in *Munsey's Magazine*, is her answer. Last summer a steady stream of new machinery went to Cuba, and \$1,000,000 worth was installed in a single season. All was ready for the grinding season to begin in the autumn and to continue through the winter to complete this stage of the work in the five dry months before the spring rains came and rendered useless the cane not yet ground. The grinding season opened on November 16, earlier than usual, and has been kept going at his tented in Cuba, and its population of 2,627,000 is approximately that of this province. The area under cane is 1,000,000 acres, and it is planted with cane and contributes many laborers for the plantations.

Easy to Grow Sugar Cane.

It is not difficult to grow sugar cane in Cuba, Mr. Du Puy points out. "The trees on the tract of land to be cultivated are cut down, and the valuable timber is taken out, and the trench is swept clean. Then the colonos, or planters, goes forth with a crowbar, which he repeatedly thrusts into the ground, making rows of holes. Into each hole he pushes a joint of sugar cane and tramps the soil around it. There is no plowing, no harrowing, no further preparation of any sort.

"A year later the planter comes back

A WASTE OF LABOR

(Toronto Star.)

A Philadelphia girl who inherited a million dollars, and whose affairs are under control of a judge, recently exhibited to him her budget for the year, as follows:

Clothing, manuring, (shampoo, and hairdressing) \$8,000
Household bills \$4,000
Education and church contributions \$2,000
Entertainment, dinner & dances \$2,000
Physicians, opticians, dentists, 1,000
Upkeep of automobiles, insurance and clubs \$5,000
Bonds, etc. \$800
Total \$20,800

A nation which is being urged to cut down its allowance of beef, pork, and wheat will probably read these items with some irritation. The amount measured merely by the amount of the misdirection and waste of energy through employment that serves no useful purpose. The people who are making needless articles of luxury for this child, or dancing attendance upon her, are not producing food, clothing, and other necessities for the masses of the people and for the allies and their armies.

FOUR CHAIRS ARE PLANNED

New Endowment for the University of Toronto May Reach \$3,000,000

Further information has been received regarding the large endowment that has been offered to the University of Toronto by a prominent citizen. It is understood that the amount is not two million dollars as has been stated, but may range from half a million to three million dollars, the offer being to provide an ample sum to carry on the desired work.

The plan, it is stated, is to endow four special chairs in the Faculty of Medicine, which shall be held by specially qualified medical men, who shall not engage in private practice, but devote their whole time to the work.

One of these chairs will be in pediatrics, for the special study of children's diseases, as it has been felt for some time that there should be a closer connection between the splendid work in the Hospital for Sick Children and the University. The second chair is said to be in gynecology, for advanced work in reference to the surgical diseases of women.

The third chair is probably for special orthopedic work, in which great strides have been made recently. The other chair is in a special branch of medicine.

An American potato-grower says that, according to his observations, blight on potatoes appears only in moist, moderate weather, 65 to 77 degrees being the most favorable temperature. At temperatures lower than 50 degrees and higher than 78 degrees it does not seem to develop.

DON'T DIET YOURSELF TO CURE DYSPEPSIA

IT ISN'T NECESSARY

The sufferer from dyspepsia and indigestion who has to pick and choose his food, is the most miserable of all mankind.

Even the little he does eat causes such torture, and is digested so imperfectly that it does him little good.

What dyspepsia need is not dieting, or artificial digestants, but something that will regulate the thought, will manufacture its own digestive ferment, and curing severe cases of dyspepsia and indigestion that other remedies were powerless to reach.

It restores the stomach to a normal healthy condition so that the food no longer causes distress, but is thoroughly digested and assimilated, and goes on its way making rich, red blood.

For forty years now Burdock Blood Bitters has been making weak stomachs strong, and curing severe cases of dyspepsia and indigestion that other remedies were powerless to reach.

It restores the stomach to a normal healthy condition so that the food no longer causes distress, but is thoroughly digested and assimilated, and goes on its way making rich, red blood.

Mrs. Henry Shaw, Campbellton (N. B.), writes: "I was for five years, troubled with a weak stomach, and could not eat any food that would agree with me. I tried different medicines, but could not get cured. A friend advised me to take Burdock Blood Bitters. I took four bottles, and now I am in perfect health." B.B.B. is manufactured by T. T. Millers Co., Limited, Toronto, Ont.

CLOTHING IN GERMANY.

(Toronto Star.)

Much is said of scarcity of food in Germany; little about scarcity of materials for clothing. Yet Germany is even worse off in the latter respect than in the former. The chief sources of the world's cotton supply are the United States and India; of wool, Australia, New Zealand and Argentina. From all these Germany is cut off.

Neither Germany nor any of its allies is a great sheep-raising country, nor produces large quantities of wool. Before the war Germany produced 25,000,000 pounds of wool and imported 480,000,000 pounds. Austria-Hungary produced 41,000,000 pounds, and imported 22,900,000. Russia, however, produces more than one-third of the European supply for clothing.

Of cotton Germany and its allies control practically none, the exception being a little produced in Turkey. The report that clothing was being made of paper in Germany is quite credible when the scarcity of wool and cotton is considered.

SUFFERED TERRIBLY WITH HER HEART

Would Wake Up Smothering

The terrible smothering and choking up sensations and stinking spells, the feelings of dizziness and faintness that come over those whose heart and arteries are clogged causes the greatest distress of both mind and body.

Milburn's Heart and Nerve Pills give prompt relief and effect a complete cure in cases of such severity.

Mrs. A. M. Powell, of Maple Station, Ont., writes: "I cannot speak too highly of Milburn's Heart and Nerve Pills. I suffered for years with my heart and nerves, but the last two years I have suffered terribly. If I went to bed I could not get up as if I were smothering. I got so very weak that the doctor was called in, and he said it was my heart, and that I must take care of myself. I saw your advertisement in your magazine for Milburn's Heart and Nerve Pills, and said I would try them. I have only taken two boxes of them and I feel a new woman. I will recommend them to anyone afflicted with heart trouble."

Milburn's Heart and Nerve Pills are a box of all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

HILYARD WANTS A BOND ISSUE

Interim Report on Water and Sewerage Shows Shortage of Funds for Work

A report on the activities of the water and sewerage department has just been prepared by Commissioner Hilyard and will be presented to the council at an early date.

The water assessment for 1918 is now nearly ready for filing and amounts to \$185,000 which with arrears and receipts from other sources will give us an income of not more than \$200,000 provided no cash discount is allowed.

The estimate for expenditure at the first of the year was placed at \$200,000 for water purposes. Without making any provision for increased revenue the appropriations at \$17,000 for sewerage maintenance and \$10,000 for fire hydrants were made charges on the water maintenance account.

This report points out leaves a deficit of \$27,000 provided no discount is allowed, \$37,000, if ten per cent, and \$52,000 if five per cent is allowed.

The increase in prices and the enhanced price of all supplies will amount to between \$5,000 and \$10,000.

Last year the water assessment was reduced about \$17,000 and at the time of filing a cash discount of ten per cent was allowed, which amounted to about \$15,000, a total of \$30,000.

The commissioner then makes the following recommendations in his report: "That the expenditures on account of water maintenance, sewerage maintenance and fire hydrants be limited to the income of the water department by reducing the renewal of water mains, main sewers and hydrants."

"That bonds be issued to the amount of \$80,000 for the payment of excavating, providing and laying lock joint cement water main at Lake Fitzgerald."

"That a reduction of five per cent be allowed on all water rates assessed in the present year under schedules B and C and paid in at the office of the receiver of taxes on or before the first day of October next."

"That a similar reduction be made each year hereafter paid in on or before a date to be set when rates are fixed, not later than the first day of October in each year."

"That hereafter all unexpended balances of water revenue be set aside at the close of each year and placed in an account to be known as water reserve to be used for the renewal of water mains."

URGE ACTION ON VOCATIONAL EDUCATION

At a meeting of the provincial committee on vocational education held at the Royal Hotel last evening a resolution was adopted urging the board of education to appoint at once the vocational education board, in order that the various school boards may take advantage of the provisions of the new law.

Those present were Fred Magee, M. P. P., chairman; Dr. J. Roy Campbell, M. P. P.; Rev. Fr. Tessler, of St. Joseph's; J. T. Jennings, of Fredericton; A. M. Belding, and the secretary, Fletcher Peacock.

Mr. Peacock reported that enquiries had been received from the school boards in towns in all parts of the province relative to the act, and various boards had appointed committees to arrange for having the act applied next winter. In view of the fact and the action of the Manufacturers' Association in appointing committees in the various towns to aid in making the act effective, the committee felt that no time should be lost in constituting the vocational board for the province and giving a head to the whole movement.

Dr. Campbell very strongly expressed the view that some of the outstanding leaders in vocational training such as he met when visiting Massachusetts should be brought here to arouse the interest of our people.

Mr. Magee expressed the hope that this might be done during the next session of the legislature, and an education day observed by the members; and in this Dr. Campbell heartily concurred.

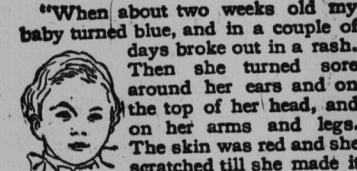

There was a general discussion of the best means of arousing interest and getting results, and some discussion also of the situation which has compelled the board of education to reduce the age limit for student-teachers at the Normal school.

Communications received from other provinces and states show that the action of New Brunswick in making provision for vocational training is regarded as a progressive and important step. The following letter from R. O. Small, deputy commissioner of education in Massachusetts, is a sample of a number received by Secretary Peacock on receipt of copies of the report and the bill: "I want to congratulate you upon the thoroughness of your piece of work and the scope of your act. It is very heartening to us to know that the province of New Brunswick has such a progressive attitude toward the matter of vocational education."

It is charged that \$600,000 frauds were committed at a single shipyard engaged on U. S. repair work.

LAST AUSTRAINS CROSS PLAVE

Italians in Possession of Entire Plateau—German Bid for Peace

The Italians at last have cleared the remaining Austrian rear guard from the west bank of the Piave River and now are in possession of the entire river front from the Montello Plateau to the sea.

At last accounts their forces which crossed the stream in pursuit of the retreating Austrians were still harassing them, inflicting heavy casualties and forcing the enemy to continue his disorderly retreat.

Fate, has turned somewhat its balance in favor of the Austrians for the Piave river again has risen and some of the pontoon bridges the Italians had thrown across the stream have been carried away, making quick pursuit and the crushing of the Austrians, which General Diaz had counted upon, impossible.

The Austrians are declared to be rushing up reserves from the east in an endeavor to partly retrieve the situation.

Synchronously with the defeat of the Austrians in Italy and the spirit of unrest prevalent in the dual monarchy comes another acknowledgment from Germany that that country is desirous of peace.

Washington, June 25.—Germany is preparing her people for failure to win the war this year by an extensive propaganda setting forth that in the event German armies are not able to overrun France this year, the situation next year will still be better for Germany than it was at the beginning of the present offensive, and that a movement will be made then to put France entirely out of the war.

POLICE SCANDAL IN HALIFAX

Further Details of the Occurrences At Blind Man's Place (Halifax Herald.)

Will Mayor Hawkins order an absolutely impartial investigation into the alleged police scandal or will he "trim" and use the whitewash brush like his predecessor? The people are waiting to see which course his worship will pursue.

It is common knowledge that someone in the police department and some one in a responsible position, has tipped off blind piggers and bootleggers. It is also common knowledge that liquor seized by Inspector Tracey and stored in the city hall had been stolen by members of the force. These deplorable undermining influences were allowed to pass without punishment, and the result is that some members of the force can do just about as they please—in fact, it is a case of the public be damned.

The latest sensational occurrence in connection with police force inefficiency and police force law-breaking and criminal conduct occurred on Friday afternoon. It has been common knowledge for some time that a blind man named Sullivan, living in Kempt road, was selling liquor. In fact, any one who passed along that way must have been amazed at the "popularity" of the pretty little bungalow as scores of people could be seen almost any afternoon "lined up" towards the door—and it was a regular "park" for automobiles.

Friday afternoon Inspector Tracey and Sergeant Palmer visited the place. They found twenty-five or thirty men gathered in a room drinking. Among the number was Police Officer McAdam. The inspector and Sergeant Palmer located several barrels of ale. During the investigation the news of a drowning accident at Bedford Basin reached the Sullivan resort, and the two officers proceeded to the scene of the accident. Before leaving, they placed the barrels in Sullivan's wagon house, locked the door and took the key, and told Sullivan that they would hold him responsible for its safety. After assisting in the rescue work, the officers returned about 6 o'clock with a truck to take the liquor away, and were amazed to find that the wagon house had been broken into and the liquor consumed. Sullivan was questioned and was reluctant, but after a sensational grilling gave information to the effect that the place had been entered and the liquor taken by Police Officer McAdam, and others, who were in the room when the raid was made. It was reported that another member of the force was implicated in the affair, but this McAdam denies.

Cost Area Dispute. Fredericton, N. B., June 25.—Hon. E. A. Smith, minister of lands and mines, arrived here tonight from Moncton and held at his office an inquiry into the claim of the Northfield Coal Company to an area of six acres now under license to the Minto Coal Company. James Barnes, ex-M. P. P. of Buctouche, representing the Northfield Coal Company, was present.

MORE MONEY FOR FERRY FLOATS

Repairs Will Cost \$3,000 — Returned Soldier Appointed — Houses to be Sold

An additional expenditure upon the south side of the west end ferry floats was authorized by council yesterday. Commissioner Bullock said that the work there had been placed in the estimates at \$2,000 by his predecessor, but he had found that it would require at least an additional \$1,000 to complete the work according to the plans that had been laid. The total expenditure on this job now reaches \$3,000, and the additional amount authorized by the council will be assessed for next year if the finance department cannot find sufficient money to take care of it out of this year's revenue.

Commissioner Bullock was also authorized to purchase thirty pieces of merchantable birch timber for wharf fenders at \$40 per thousand. He said that the total expenditure in this matter would be about \$480 and that it was extremely difficult at this time to secure merchantable birch timber.

Murray Latham, who has been on trial in the chamberlain's office for the last month, was appointed permanently to the position at a salary of \$1,000 per year. Mr. Latham is a returned man and has given excellent satisfaction during his period of probation.

The council gave the New Brunswick Telephone Company permission to erect four poles and one guy wire in Barker street, and two poles and one guy wire in Somerset street.

Miss Cliff of the water works department office staff, and Miss Wetmore, of the mayor's clerical staff, were each granted an increase in salary of \$100. Commissioner Fisher promised a report on the south end playgrounds at the next meeting.

The matter of water and sewerage cesses and discount on water rates was laid over until the next meeting.

The committee of the whole, as already dealt with in committee, was adopted. Authority was given for the purchase for a new boiler for Nos. 3 and 4 shed, W. E., for the erection of poles and guy wires by the N. B. Telephone Company; for renewal of water mains under No. 6 shed, W. E., for increase of 25 cents per day for harbor watchmen and sweepers; for lease of eight lots in Gurdy ward to W. M. Mackay at \$600 a year; for increase in rental of D. A. R. wharf; for extra inspector on Lake Fitzgerald work and for further correspondence with the E. R. on the Germain street trucks.

Authority was given also for the sale by auction of the following city properties in Lunenburg: Kane house (so-called) on the Milford road, 100x65 ft. Present tenant, Margaret Logue and Alexander McCaughan.

Butler house (so-called) on the Milford road, 100x60 ft. Present tenant, Mrs. Butler.

THREE CHARGES.
Nelson Nichols was taken into custody yesterday on charges of drunkenness and having a bottle of liquor in his possession. An additional charge is alleged, stealing of a horse and buggy the property of Thomas Short and valued at \$150. The defendant acknowledged that he was drunk and that he had a bottle in his possession. He said he did not know what were the contents of the bottle. A policeman who made the arrest testified that the bottle contained whiskey. The defendant was then remanded to jail. No evidence as to the last charge was given.

WOOL CASE GOING ON.
The trial of the case King vs. Hartin, charged with the theft of wool belonging to the Colonial Hide Company, was taken up in the court this morning before Mr. Justice Chandler and the following jury: John Armstrong, Christopher Spilane, Charles Berry, T. At the two former trials when he and others were tried jointly, the jury disagreed. J. W. Willis was the only witness examined this morning. W. M. Ryan prosecuted and Daniel Mullin, K. C., and E. J. Henneberry appeared for the defendant.

REV. W. F. PARKER WRITES OF ATTACK ON HOSPITAL AREA

How St. John's Hospital Was Wounded—Lay for Hour on Floor of Hut While Missiles of Death Rained Around

Rev. Mr. Cobbits of the Maritime Baptist publishes in the current issue of his paper, the "New Brunswick Patriot," an account of the attack on the hospital area. He was in his tent at the time, preparing to retire. "It was fortunate," he writes, "that I instantly protruded myself upon the floor of my canvas hut, as immediately it was pierced by flying shrapnel that would have caught me had I been standing or sitting. Several succeeding attempts to rise and dress had to be abandoned for the same reason. About twenty minutes after the bombardment began, I was plipped in the right eye by a low-flying piece of shrapnel, the only one, so far as I know, of the many that shattered my hut that struck me. For over an hour I lay helpless on the floor with the missiles of death raining around me.

"How any of us in the whole area escaped death or wounds is remarkable for Fritz did his best, under the most favorable circumstances for his purpose, to exterminate us, and only left us when he had apparently emptied his magazines. "After the raid I was taken by our faithful stretcher-bearers to the operating theatre of our hospital and skillfully attended to. As we have no officers' ward in our hospital, they were brought with the other two officers of our unit, who were wounded in the raid, to this very general expression of the 'Liverpool Merchants' goodwill towards our army.

"My case is progressing very favorably, and I am being well cared for. Provisionally not one of our nursing sisters was hit. They all stood bravely by their posts, performing their duties most faithfully towards their helpless charges. Many a wounded soldier was comforted and delivered from overwhelming fear as he lay powerless in his bed, by the courage and fidelity of our noble 'Sisters, God bless them!' We never could win this war (as far as I am concerned) without them. "As writing while lying on the back in my cot, I beg to let you to let my friends in the dear home churches know that I am getting on nicely, with good prospect of full recovery."

ARREST NOW IN SPEED CASES

Police Receive Orders to Deal With Swift Drivers of Autos in City

In order to secure some recognition of the speed laws and prevent citizens being killed by motorists who have no regard for the rights of others to use the street, it has been found necessary to issue orders to the police to arrest anyone exceeding the speed limit of twelve miles an hour in the city limits, and six miles turning corners. This order will also apply to those using cut-outs.

HENRY A. ESTABROOKS OF UPPER GAGETOWN DEAD; SON LIVES HERE

The death of Henry A. Estabrooks occurred this morning at his home in Upper Gagetown. Death came suddenly to Mr. Estabrooks, who, although seventy-six years of age, had enjoyed good health until he was stricken this morning.

HAS GIVEN LIFE

This is a picture of Private Daniel E. Gram of 40 Millidge avenue, killed in the war on June 13, the third anniversary of the day in which his regiment sailed from St. John. Private Gram was one of the original members of the 26th battalion. He had been wounded and shell-shocked, but had recovered and for a time had been on duty behind the lines. More recently he had been transferred to the firing line again. In letters received from him a day or two ago, he wrote, on May 28, that he had just come back to rest billets, and on June 5 he wrote that he was going up to the firing line again. Apparently he never returned from that trip. Before going overseas he was employed with the Thompson Manufacturing Company at Grand Bay. Besides his wife, he is survived by one child, also his mother, Mrs. Mary J. Gram of 56 Metcalf street, one brother, John, and two sisters, Mrs. Samuel Deahoy and Mrs. J. McEachern, all of this city.

The Man In The Street

The janitor, still shovelling coal into the furnace says the outlook for summer holidays is on a par with the German prospects for victory.

The office boy is inclined to blame the cold weather on the daylight saving plan. "This is what comes of getting the sun and the calendar and things all mixed up," he sagely opines.

Judging from the size of the tax bills, daylight is all that most of us will save this year.

In our effort to be moderately consistent we try to avoid demanding increased car expenditures on the same day we register a kick about the size of our tax bill.

But of course the city ought to be able to find the money for the expenditures in which each of us is particularly interested.

Meanwhile, if you want to know where the money went last year, full details are contained in a tidy sized volume which is supplied free of charge at city hall.

We might suggest a few pictures which would add interest to that volume, but for the present we will leave them to the imagination of the citizens.

With regard to June weddings, the parsons report "Business as usual."

If the groomsmen is the best man why didn't the bride marry him?

Minister of lands and mines says the stampage collections will be nearly one hundred per cent complete; which may be business, but certainly is not according to the traditions of the trade.

The Sky's The Limit. Germany is announcing what she will do to Egypt and India after "the next war." Well, you remember the story of the semi-intoxicated individual who announced that he could lick any person in that bar room. When there were no takers he announced that he could lick any one in the country and then challenged any person in the Dominion of Canada. When he recovered from the encounter which followed, he explained matters with the remark: "Frouble with me was, I took in too much territory."

His Disability. When he came to the question "Physical disability, if any?" the applicant for registration was nonplussed.

"What's that mean?" he demanded. "You must tell if there is anything wrong with you, if you have any weaknesses," the deputy explained.

Leaving over the desk, in a hoarse whisper the registrant confided: "Well, I have a weakness for the booze."

Not So Precocious. A married woman was filling in her card. Her age was given as twenty-four; the number of children as four, and the number under sixteen was reported as none.

The registrar was puzzled. "You have four children all over sixteen and you are only twenty-four years old?" he asked.

"Oh, no; I am really forty-two," was the frank answer. "But I would not have any one know for worlds," she explained.

Retired Early. Then there was the youth whose card bore the information: "Are you a retired farmer?" "Yes."

"That chap must have retired before he got up."

A tiny little miss who felt the legging of a dress to adjust and locate herself, asked this question: "Do I live in England?"

"No, dear, you live in New Brunswick."

There was a pause and then the unexpected query: "Is old Brunswick dead?"

Another little miss had been promised a kitten, and frequently journeyed to see it. Once on her return she was asked: "Did you bring it with you?"

"No," she replied, "It isn't ripe yet."
