KENSIT'S CHARGES .- No man has a greater horror of Rome than Mr. Kensit, who is taking the very called for circulation of such absurdities. Serious men smile at them best means to send a host of Angliand pass on; but, unhappily, there cans over to the Catholic Church. It would seem that the Anglican are people who are prepared to place trust in the most outlandish statebishops are not sufficiently alive to ments, who find it hard to put faith the dangers their church incurs, and in that which the world for long that they are too slow of action against the copyists of Roman cere-

No one who had the honor and is a species of self-constituted infalhappiness to meet Mgr. Bruchesi, lible authority, a kind of Anglican Archbishop of Montreal, during his Pope-minus the election-who wishes visit to Laredo last year will be to exercise in the Anglican Church surprised at any act of kindness or prerogatives which he denies to the charity coming from his gentle Pope in the Catholic Church. Of the evils, cropping up on all sides, of an eminent degree all that is kind, which he complains the following noble and sincere. He is the type of are a few :the true bishop. Some days ago he went himself to celebrate Holy Mass

"Masses for the dead; children's Masses, a Mass at which the churchwarden acknowledged there was 'the elevation of the Host;' also gross illeg 1 practices in connection with these Masses, such as bowings and prostrations, continued use of inense, wearing of Romish vestments, use of wafers, lighting of candles, non-communicating attendance open ly encouraged, the confessional forced as a preparation for receiving

In the diocese of Cincinnati, like in all other dioceses, they had Christmas collections this year. We ministry of the Church.'

It is altogether too bad that these Anglican clergymen should persist in giving mortal offense to Mr. Kensit After all, they gain but little in following such a course. These Masses, so-called, might be accompanied with every ceremonial known to the Catholic Church, and yet. they would remain mere pantomimes as far as the essence of the Mass is concerned. It is a pity that men, like Mr. Kensit, cannot grasp the real spirit and meaning of Catholic services; such a knowledge would probably save them from making an exhibition of themselves.

THE RELIGIOUS CENSUS. - A correspondent in one of the secular organs complains about the Government making a religious census; that is to say the "showing of how

#### how few they are. On the other hand, we have been hammering away for several years back to induce our representatives to have a careful analysis of the Irish Catholic population inserted in the census. Yet no heed was paid to our request, and our representations went for nothing. The Protestant sects have a detailed census, and they object to other hand a union based on reason, it; while we want a detailed census, and cannot get it. Not for the purpose of creating divisions in the community do we ask for such figures, but rather to constitute them a basis of calculation whereon to gauge our rights and privileges in the community. It is now too late for us to obtain anything of the kind, and we have ten years more to wait before another opportunity arises. The census may not individually trouble us at that time; but we hope that whoever may be here will insist with greater success than has attended our requests, upon such a method being applied to our co-religionists and fellow-country-

men. It is a request born of sincere

confidence in the degree of importance our people would derive therefrom. ISLAND FOR ANARCHISTS. Senator Hoar, of the United States Congress, has proposed that all anarchists be banished to some far off island, where they might make or break all the laws they wished, and practise their own theories upor each other. A New Orleans organ claims that this proposal demon strates that the Senator is "'in intellectual insight and in moral height, equalled by few members of the higher branch of the national legislature." If such be the case we are forced to form a very low estimate of the "intellectual insight and moral height," of these great legislators As an idea any ordinary joker, an after-dinner speaker, or a professional comedian, might easily have conceived and expressed this project. It needs no very brilliant intellect to suggest the banishment of any person, or any set of persons, to some lone island in the sea. But from the point of morality we believe that the conception could not be more false or anti-Christian. The moral teachings of Christianity do not propose the herding of criminals any more than the herding of wild animals, for the purpose of allowing them to kill each other. Our idea would be to isolate them from each other, and then convert them if possible, and if not possible, let each remain isolated from the society that he would destroy. The comment of the New Orleans editor seems to us as lacking in principle as the suggestion that called it forth.

"LOVE AND REASON."-It is amusing to note the ideas that some people form ol love and of reason It is claimed that people do not marry as frequently and as early in our times as did those of the generations that have gone before us. One writer pretends that this is the result of an age of reason. He says :

"Men do not marry so recklessly, without prospects of being able to howing of how many adherents there are in each of the religious sects." This writer than was that of their mothers; they are more independent, and have alwould like to know what odds it so, more tendencies toward cool reamakes how many members there are oning. They are not, perhaps, so in each church or denomination. He much governed by their emotions, alfinds that harm must result from though quite as capable of true af this method of classifying, accordfection. They are just as womanly, ing to creeds, the different inhabitjust as human, but the old proverh ants of our large centres. He finds of 'All for love, and the world well lost,' has lost a grain of its meaning for the twentieth century girl Love is not dead, but it has clasped hands with reason, which tends to regulate its pace to desirable moder Without entering into the details of what constitutes true love, and what reason consists of, we might ay that this is a very materialistic view of a most important subject. What the writer of the foregoing wishes to convey is that there is tess heart and more calculation in the marriages of the present; while the marriages of the present: while fifty years ago the fires of affection and not the ices of speculation con-stituted the power that drew souls to the altar. The grand question, to our mind, is to know whether the change in non-Catholic society has been for the greater happiness of mankind or not. If marriages were formerly more<sup>®</sup> frequent, certainly divorces were less numerous. The

MONTREAL, SATURDAY, JANUARY 11, 1902. union based upon true Christian love is one that cannot be broken save by death; it is in conformity with the law of God; it is in accord with the direct teachings of Christ; it is sacred, for it is the sacrament of love-sacrament as far as the church is concerned, sought for in love, as far as regards the faithful. On the on calculation, on speculation can in no way be stable. If that reasoning be upset by future and unforeseen events, if that calculation results in error; if that speculation be a failure, there remains nothing to hold together those whom death alone should sever. The love that comes after reason is not calculated to survive the first shock of disappointment, nor is it of a nature to survive death. Many years ago a famous Dominican, in a sermon upon love that is wedded to human reason, instead of springing from the eternal source of all love, made use of a comparison that we might hore consider timely. A traveller starts for the woods, with his pack on his back. Night comes on and he stops to rest. He gathers some fagots, makes a fire, warms himself, and rolls in h s blanket to sleep. In the night time the fire dwindles: he arises, puts on more fagots, and goes back to rest. In the morning he builds a huge fire, warms himself well, and proceeds on his journey For a time the fire burns lively, but gradually it dies out. That evening another traveller comes along and finds only ashes where the flames burned in the morning. That night the snow falls, and next day a third traveller passes, only to find that no trace of those who had gone before him are to be seen. Such is love of the earthly, reasoning class. In life it burns warmly. A separation, a hard word, and the flame dwirdles; but a tear, a kind act, like the fagots added to the fire, and it burns up again. Then comes the general and last parting. At the thr mold of another life we vow

eternal romembrance, and we heap on fagots to the flames. One remains behind, the other proceeds on the journey that ends not. For a time memory keeps the flame of love aglow; but, by degrees, it dwindles. Soon another passes by that heart and finds only cinders. Then the snows of oblivion fall, and finally a traveller comes who can find neither the ashes of love's fire, nor the footprints of the one that has gone for-

"STERLING CATHOLIC GIRL." -The American Catholic press has handed around a story concerning a young Catholic girl, who recently astorished a bigotted professor by openly, in class, correcting him regarding the question of indulgences. At last the Michigan Catholic informed the public that this young girl is "Miss Kathleen A. Sullivan who, although one of the youngest, is one of the most efficient and successful teachers in the public schools of Chicago. Miss Sullivan is a sister of Miss Josephine Byrne Sullivan, of the Michigan Catholic's staff." It is a satisfaction to know take care of a family properly. The environment of women is different story of this kind, that has its moral, and that might serve as a lesson to thousands of other Catholics in life, loses much of its authoritativeness when the name and identity of the hero or heroine is unknown What took place was this: at the University of Chicago Miss Sullivan heard a professor break into a tirade against the Catholic Church and its tenets, saying, among other things, that "indulgences, pardons for sins (!) were bought and sold ' The girl calmly rose and asked in open class: "What is the Catholic doctrine on indulgences?" a question which the amazed professor was simply unable to answer correctly; whereupon she proceeded to say that he had recommended seven works to the class, not one of which was Catholic. When he afterwards apol-

ogized, saying that it was a slip of

to some timely facts regarding the important work which they have

began to trickle down his cheeks. continent. In our city and in this province we have reason to be proud of the endeavors of our fraternal or ganization. Our contemporary says During the past year thousands of dollars have been paid out by Cath olic fraternal orders to the widows of deceased members. In many instances, such insurance money, re ceived at a time when its need was greatest, has saved a home from dis ruption. The bereaved mother has been enabled to retain her children from the charity of the orphan asy lum or the state.

The fraternal order, too, saves the Catholic public from the burden of not a few orphans ho would otherwise claim the shelter of the Catholic asylums. In this way it is not only doing a great private good, but also a great public good.

No man who pays his dues into the fraternal order misses the money. His insurance dues are, in no instance, so heavy as to prevent his keeping an account in the savings bank, or building for himself a modest home. The feeling of fraternity engendered and the social life of the order alone are worth the insurance dues collected by any Catholic fra ternity from the individual member. For these reasons, all our Catho lic fraternities deserve a good word They deserve cordial recognition by the clergy and the Catholic press They deserve increase of membership. It is to be hoped that the will reach out for new members, and that their number will swell. Undoubtedly they bring a knowledge of the benefits of insurance to thousands of people who otherwise would never think of taking a policy in an old line insurance company. They educate in providence and economy And everywhere they cultivate ta Catholic community spirit.

MR. WILLIAM J. COOK, an able and regular contributor to the Am-erican Catholic press, in his weekly contribution to the New York "Free man's Journal" thus eulogizes the Catholic pioneer priests and laymen and dwells upon the fruits of their spirit of zeal and self-sacrifice.

Scarce a hundred years have elapsed in these United States since the Church was firmly planted here. There is no institution, political or religious, that has kept pace with it In this great nation of 80,000,000 people in less than one hundred years more than one-sixth of its population are Catholics. Less than one hundred years ago there was not a college, a school, or a university designated by a Catholic name. Cathedrals, churches and chapels were comparatively unknown. It was the missionaries in all directions in the few colonies of the creed who held to the faith; the many who came from distant lands to offer the sacrifice and preach the truth; of the many who went beyond the rivers and the mountains, through the wilderness and over the plains, who sought the salvation of the plate grew in this country of ours. GOLDEN JUBILEE OF LAVAL .--Laval University officials have decided to celebrate the golden jubilee of the foundation of the university in June next. A general meeting of the old students was held on Wednesday evening, and the committees of organization were formed. Theological College of the Sulpicians, which has for a number of years past been affiliated with the university, will also take part in the festivities. Large numbers of priests, who have since settled in the New England district and other parts of the States, have already signified their intention of being present. It is proposed to make the celebration one of the most elaborate of its kind ever held in Montreal. It will last three days.

## VICTORY FOR THE NUNS.

A decision was filed by Justice Dunwell, of the Supreme Court, Rochester, N.Y., recently, which is a signal defeat for James Sargent, the lock manufacturer, and the Ameri-can Protective A')sociation, who brought an action in equity to obtain a permanent injunction, denying to the nuns who teach at St. Mary's Catholic Orphan Boys' Asy-lum their salaries from the city. The decision is a complete victory for the city and for the teachers at the asylum, as Justice Dunwell di-rects judgment in their favor, denies an injunction and dismisses Sar-gent's complaint. Sargent has all along announced his intention of ap-pealing the case to the Court of Ap-peals, so it is assumed that he will do as he has threatened. The action was brought by Mr. Sargent under Section 4 of Article IX. of the St&te Constitution, and he argued that under that provision no city money could be diverted for religious purposes. His lawyer offer-ed proof along this line. Corporation ing to the nuns who teach at St.

Corporation Counsel French, for the city, con-troverted this position by showing that no funds were being used ille-gally, as the institution was en-titled to receive money for the care and education of orphans. Former Speaker of the Assembly James M. E. O'Grady, who represented the or-phan asylum, argued that under Sec-tion 14, Article VIII., of the State Constitution an orphan asylum is entitled to State and city aid, ex-press provision for which is made in the Constitution. Justice Dunwell held that all theso questions were passed upon by Jus-tice Rich when he denied a tempor-ary injunction, and he suggested that the only question left open was whether the money paid to the nuns was used for maintenance of the asylum. In his decision filed to-day Justice Dunwell holds that the St. Mary Orphan Boys' Asylum and other institutions controlled by reounsel French, for the city cor

He had displayed military talent and daring during the civil war, but the event that most markof Guam, died on the 27th Decemb up divisions that should not exist. from catechism class, and he was exhibiting to a companion a very unique card. On one side was a holy picture, on the other were printed the rules for altar boys to observe hours of the Masses, regulations concerning surplices and soutanes, the names of those whose turn it might te to serve in one .capacity or another in the sanctuary. I was not able to examine the card carefully, but I gleaned enough to teach me the nature and purpose of it As I passed on I found that this simple certificate or souvenir sug-gested a long series of reflections. My mind went back to a little framed picture that hung for years in the nursery of my father's house; it was my First Communion card. How there are to-day who have many once taken the pledge, and have no certificate to that effect; how many who would be glad to possess some reminder of events in their lives, such as Gaptism, First Communion, Confirmation, and even marriage. Confirmation, and even marriage. For one reason or another they have no relics of the kind, and their children have nothing whereby to re-call these periods of special import-ance in their parents' lives. Most of us have served Mass in our day, have been altar boys, have belonged to choirs; but few of us can furn up souvenirs such as the card that I saw in the hands of that young boy.

<text> Dages

T knew a lady once who had a mania-as some foolish people call-ed it-for having portraits of her children. She had them taken every three months, during their first year, every six months during the second and third years, and every year after that until the age of twelve was reached. She presented each child on its twelfth birthday e was reached. She presented child on its twelfth birthday twelve was reached. Sine presented each child on its twelfth birthday with a handsome abum containing the whole series of its own photo-graphs, ;rom ore month old up to twelve years. This may seem a pedu-liar idea, but I could folly appre-ciate the wisdom of it. In years to come, away down in the future, amidst changed scenes and new faces, the boy, grown old, could take up that volume and trace every little care that hands now dust had bestowed upon his tender years. I can imagine no more delightful sou-venir of one's childhood than such an album. But few mothers think so much of the future.

The other day I met a boy coming rom catechism class, and he was publiciting to a companion a very mique card. On one side was a holy olcture, on the other were printed he rules for altar boys to observe,

the domestic hearth. Another practice, in this connec-tion, that seems to be falling into disuse, is that of keeping the birth, marriage and death notices that ap-peared in the press. In fact, some reople are not at all too anxious to have such notices published. Above all, do T remark the lack of them in the Catholic organ. As a rule the daily secular press is used for such purposes; but no person seems to ever think of inserting these most useful, and often very neces-sary notices in the columns of the Catholic newspaper. Yet that is ex-actly where they should be. Possibly people fear that they might be caught encouraging a Catholic or-gan by such mens. Yet upon that same organ do they depend when-ever their interests are at stake, their rights assailed, or their privi-leges curtailed. In all this there is a great lack of consistency. But I am not now dealing with this par-ticular subject, which would admit of an endless development; I am simply referring to the utility of family records. The record of a fam-i,y is the history of that particular perion of the community; and it is hy is the history of that particular pertion of the community; and it is the aggregate of such historics that constitutes the history of a coun-try. Consequently the one who fills in a family recard is actually add-ing to the annals of the nation.

There is no end to the reflections that the simple card to which I re-ferred in the beginning inspires. It would need many a colume to hold all the thoughts that spring from all the thoughts that spring from that very insignificant source. But there is one phase of the guestion which I cannot omit. There is no end to the disputes, law-suits, fam-ling disunions, domestic antagon-isms, and like unhappy troubles that varise in consequence of a lack of properly kept records. Sometimes a baptismal or a marriage certificate may mean a fortune, or else a re-verse, for the one who either pos-sesses, or doces not hold the same. Chance, accident, uncontrolable sesses, or does not hold the same. Chance, accident, uncontrolable events, frequently cause the loss of these precious pieces of family evi-dence; but more often are they lack-ing on account of negligence. Peo-ple do not take the trouble to pro-vide for future contingencies, and the result is that they only feel and recognize the effects of their apathy, when it is too late to supply the remedy. when i remedy.

Examples of losses, in many ways, on account of the destruction or the none existence of records, might be multiplied to an endless extent. But I will simply tell of one case. I once knew a man who had been for long years a practising barrister. When I knew him he was an old man and I was only a boy; but I still renember hearing him tell of the trouble he had to be ad-mitted to the Bar. In the first place he could not produce his own baptismal certificate. His father was a factor of the Hudson Bay Complace he could not produce his own baptismal certificate. His father was a factor of the Hudson Bay Com-pany, and he was born at a post near Fort Garry-mow Winnipeg— and had been baptized by a mission-ary who gave a certificate of the bajtism to his parents. But that do-cument had teen lost years before. He was able, however, to procure a certificate of Confirmation. The name he had taken on that occasion was Ronald, while the certificate contained the name Donald. Evi-dently an error on the part of who-ever made out the certificate. At all events it would not be accepted by the Council of the Bar. To get the certificates of bith and marilage of his parents was out, of the ques-tion-for his father's birth he would have had to go to Scotland, for his mother's to Ireland, and for their marinage to the private records of a missioner that had hear long morinary to the private records of a missionary that had been long since dead and the whereabouts of whose notes could not be ascertain-ed. The only evidence he had as to who he was consisted of a record who he was consisted of a record kept by his father in an old prayer book. This record was very com-plete, very detailed, very exact. The Council accepted the notes in that Council accepted the notes in that old, time-worn prayer-book as the best available evidence as to the candidate's idenity. And it was on the faith of that record that he got his diploma of barrister. It seems to me that this case needs no extensive comment to show its ap-plicability, and the wisdom of fam-ilies having their own records. as the to the

Another Italian name is handed down in the annals of Ireland's story to be remembered wherever the events and men of the early and mid-nineteenth century are re-called. Charles Bianconi, the foundand mid-nineteenth century are re-called. Charles Bianconi, the found-er of the great lines of stage-coaches in Ireland, was of Italian origin, but nome would ever know that aught but Celtic blood flowed in the veins of his gifted daughter, the talented Kate Bianconi-and his grand-chil-dren bear only the name that tells of their remote foreign origin. In like manner the name of the great inventor who is at present the ob-ject of so many honors and such special attention from the press in Canada, gives no indication of his Irish parentage and the Celtic na-ture that he possesses. It is no small satisfaction for us to feel that while Signer Marconi is being praised on all sides and that his inventive genius is receiving well-merited rec-ognition, the larger share of that genius is receiving weinherteed rec-ognition, the larger share of that genius is Irish, and by education, sentiment, and blood, he is one of that unending phalanx of Irishmen that has shed lustre upon the two last centuries in almost every department.

LEO XIII. AND DIVORCE. - We have filled many a column of the "True Witness" with the evidences of the Church's abhorrence of divorce, and of all that might tend to lower the high standard of Christian marriage. Pope after Pope has fulminated against the abuse of that sacrament, and council after council has upheld the sanctity and inviola-bility of that holy state. At pre-sent a new divorce bill is before the sent a new divorce bil is before the Italian Parliament, and the subject was selected by the Holy Father for one of the most important of this re-cent allocutions. According to the reports received by "Reuter's Tele-gram," the Sovereign Pontifi began by saying that, although he should have liked to greak of more joyous have liked to speak of more joyous things, he was obliged to speak of the sorrows which had marked the the sorrows which had marked the last few years. The causes which troubled Catholicism were of vari-ous kinds, and they were not small ones. He did not propose to touch upon all of them, but would confine himself to speaking of a matter which tended to the ditriment of morals and faith, and which ought not to be passed over in silence.

He said that if old age gave au-He said that if old age gave au-thority, if faith in a common fa-therland was worth anything, he addressed not only a warning, but an appeal to those who proposed to vote in favor of the Bill now drawn, up, to desist from their intention in the name of all that they held sacred and dear. He exhorted them not to refuse to consider the conjugat bonds of Christians as bonds holy, indissoluble, and eternal in virtue of refuse to consider the conjugal bonds of Christians as bonds holy, indissoluble, and eternal in virtue of Divine right. No human law could ever abrogate such a right His Holiness went on to expound at some length his ideas of the sancti-ty and indissolubility of religious mariage, and, after a details: con-sideration of its relation with the evil results, so far as the family and vorce involved. The power of a State being closely allied with its morals and its uws. corruction meant its ruin, and the laxity it en-cultaged was not only a private calamity, for it contributed to the preversion of the people. His Holi-ness expressed the hore that those ergaged in politics would not for-get the lessons of their ancestors, that they would keep an upright judgment, and would not relinquish that prudence that nature had given to Italians. Concluding, the Pope exhorted the Cardinals to prays to cod to protect Italy in the present difficult times.

gree. It is also apparent, of late years, that treating is going out of tashion in the world. It might dis a natural douth if sufficient time ware given, and a generation r two allowed to pass away. But we do not believe that you can coerce peo-ple into any such a restriction of their olden custons. In fact, we know of only two ways to prevent drinking - one is by free r. m. all and religious persuasion; the other is by men, of thur we accord, coming to the determination to re-sist all temptations, and to not drink. As long as a man plays with the reptile he is certain, sconer or later, to be bitten -- and the bits means moral death. Some can re-sist, on account of special physical powers, longer than others; but eventually all have to succumb. Of the two means the higher and the surer one is religion. Without that men cannot be expected to overcome their passions.

CIVIC AFFATRS -- While the dinary e'ector is indifferent to the fact that within the short space of three weeks the day of nomination of candidates for representation in the City Council, for the next two years, will be at hand; the busy company and franchise promoter, the brokers in our miniature "Wall Street," the big trusts and compan-ies who now hold impotant fra-chies, the speculator, capitalist and a host of others associated with them, are maturing their plans to ensure the election of their friends so that when the time co.as around to secure further concessions from the city in connection with their en-terprises they will have their voice in the Council Chamber. of candidates for representation in

A QUEER POLICY .-- We have no ticed during years past that many of our Irish national societies, mubenefit organizations, some of tual our parishes, and our educational institutions, freely use the Protest ant daily press whenever they wish to advertise any particular under-taking and for which service they pay rates varying from 19 to 12 cents per line, less a discourt for cash; while on the other hund, those societies, parishes or institutions expect the "True Witness" to per-form a like service for then free. This is not reasonable, much less just. From week to week we are re-quested to publish all kinds of no-tices which are of no general public interest and which the Protestant daily press have refused publication time and again, unless the money was forthcoming. "We claim that the "True Witness" institutions, freely use the Protest

Was forthcoming. "True Wilness" was forthcoming. "True Wilness" in as far as Irish, English and Scotch Catholics are concerned, is equal, if not superior as an advertising me-dium, to the most widely circulated Protestant daily newsparer in Mont-real and in this province, because it reaches every Catholic family whose members are the moving force in Catholic ranks to-day; thet sup-port the Church that, subscribe to in Catholic ranks to-day; that sup-port the Church, that subscribe to charity, that patronize the public celebrations of our societies and are their live and active members, that make our benevolent and mutual in-surance organizations a success, that are the mainstay of our schools and convents. These are the men and women who read the "True Wit-ness," and welcome it to their fire-side every week and read it, not in the perfunctory manner in which they read the daily press, but in a studied and careful way.

OUR SUBSCRIBERS. - The firs letter we received for the year 1902 was from one of our esteemed French-Canadian subscribers in Dorchester County. It contained the sum of one dollar, in payment of

chester County. It contained the sum of one dollar, in payment of one year's subscription in advance. This is an example for our fel-low-countrymen, many of whom are very slow in their payments. On the following day we received several remittances from other parts of this province and from Ontario and New Brunswick, of two dollars, accompanied by letters of approval and encouragement, in payment of subscriptions until 1903. Those subscribers in our estima-tion are the eilent herces that work in a practical and loyal manner for the cause of religion. Were we to follow these co-religionists, French-Canadian, Irish, Scotch and Eng-lish, through life we have no hesit-ation in saying that their actions would prove them to be the main-stay in every good work associated with the temporal welfare of the Church. I felt, indeed, that it was too soon to expect that any such results could have been realized, but as I was coming here to-day I thought it only right to ascretain the facts of the case. I do not know that I need add anything to what I have now said, beyond expressing the hope, the very confident hope which I enter tain, that when I next have the opportunity of addressing you—and I trust it may not be so leng as it has been since I last met you here. I shall have the plensure of congratulating you upon a large increase in the number of your col-lege conference, and upon its sure and necessary result of that in-crease, a porportionately large in-crease in the number of your active members, not only in this diocese of bublin, but throughout all Ire-land. British Empire. And there is good reason to believe that it will in due time regain the German Empire, from which the grent heresy came to Great Britain. The following are the official figures of the census of December 1, 1900, for the Kingdom of Prussia, according to religious denominations: - Protestant State Church, 21,817,577 (1895: 20,351,-448); Catholics, 12,113,670 (1895: 10,999,505); other Christians, 139,-125 (1895: 119,245); Jews, 392,-322 (1895: 379,716); religion un-known, 9,813 (1895: 5,209). The Protestant (State Church) increase during the five years is 7.7 for cent, the Catholic 10 per cent, fund to the Jews only 3.6 per cent. In what may be termed the home par escel-lence of Protestantism the Catholic Church is making rapid strides. --Catholic Times.

#### FIVE MINUTES SERMON.

For centuries the children of Isael had suffered the bondage of Egypt, and our Divine Saviour also assed several years of His childhood in exile in the same country when the impious Herod sought His life. At last, however, God had compassion on His people, and they received the consoling manda a to received the consoling manda.a to go into the land of Canaan, which is the land of Israel, that gloricus land which flows with milk and honey. The same cherring command was given to St. Joseph, the foster-father of Jesus, by the angel in the gospel teaching: "Go into the land of Israel."

still to regret—and allow me to say that for my part I regret it deeply, and for their own sake even more than for the sake of the Society— the comparative failure of every ef-fort that has as yet been made by the Society to recruit its ranks from the more youthful section of our Catholic population. As to this, however, I should wish to mave one remark. Whilst the passage of the report dealing with this one draw-back was being read, it struck me that the way in which the subject was dealt with was more creditable to the honesty than to the ingenui-ty of whoever drew it up (laughter and applause). The report gives the figures for 1896 and the figures for 1900, and shows an increase of only 29 While the fources were bedre To-day a similar command is giv-en to you by the angel's voice through my mouth: Go ye into the glorious land of Israel! By that glo-

through my mouth : Go ye into the glorious land of Israell By that glu-rious land, however, I mean the kingdom of ,God, the Catholic Church. You will perhaps exclaim: What a singular exhortation, as if we had not entered that Church and long since become her children by the sacrament of baptismi I know that you consider yourselves born children of the holy Church, but are you true, living members? Are you, according to the Apostle St. Faol, "fellow-citizers with the saints, and domestics of God?" This is an im-portant question, the answer of which will one day decide our eter-nal salvation. Let us answer it to-day before Him, who will then be our Judge. The true Christian does not make himself known, merely by his fidelity in keeping its faith. With unshaken loyalty he adheres to the doctrines of the Church, and courageously professes his faith by word and deed before God and men. Well, then, my dear Christians, do you cling stead-fastly to the faith of the Church? The Catholic Church, as you know, is the teacher of mankind, appointed by God. "She is guided by the Holy Ghost, founded upon a rock, against which the gates of hell shall never prevail. The Church is, according to St. Faul, the pilar and ground of truth. She is the beacon on the sea of life, to show us through mist and darkness the way to the haven of and applause). The report gives the figures for 1896 and the figures for 1900, and shows an increase of only 32. Whilst the figures were being read I was reminded of what is told of a schoolmaster in a certain part of this country. He published an ad-vertisement glorylying his school, and claimed that it had a great suc-cess at the intermediate examina-tions, saying that it was enough to mention the striking fact that in the previous year he had increased by 100 per cent. the successes of the year before. Well, on inquiry it came out that in the first of the two years, only one of his boys had passed (laughter), so that what it all came to was that in the next year a second boy had succeeded in passing, two boys instead of one (laughter and applause). Yes, that made an increase of 100 per tent., and I think that if I had had the drawing up of this report Y might have put the case precisely in that way, for that is what it comes to. There were 32 new members of the more youthful class in the year way, for that is what it comes to. There were 32 new members of the more youthful class in the year 1896, and 64 in the year 1900, just twice the number, an increase of 100 per cent, (applause and laughter). Now, looked at in that way, the in-crease, I think, is not one that we should regard as not giving some ground for satisfaction. truth. She is the beacon on the sea of life, to show us through mist and darkness the way to the haven of eternal happiness. Examine well, my dear Christifans, if you are at-tached to this Church, to her doc-trine, with unswerving fidelity? Do you believe in her mysterrics with entire submission of the intellect, because God has revealed them, and because they are taught by the Church? Do you believe the Catholic faith But, as you know, I have always

But, as you know, I have always proclaimed it here, and-what, I think, was more to the purpose at the time-I took the opportunity of saying it to the public from the platform of your meeting at Glasne-vin Orphange, that the one chance of success in this vitally important matter lies in the work being taken up by the heads of our Catholic col-leges. It is no harm to ask the question, are they doing their duty in this respect? I should te slow to say that they are not. But, with the exception of two of them-the two that you have already heard men-tioned here to-day-I cannot take the responsibility of saying that they are. You know the two excep-tions to which I refer -- Blackrock College-where a conference has al-ready been established, and Univer-sity College here, where, as we have heard to-day, a conference is to be established without delay. A person very near and dear to me, one whose years of activity were consocrated to my happiness, once wrote some verses suggested by the famine years in Ireland. This was half a century or more ago; the lines were entitled the 'Old Man,' and the reflections I have just made bring back one stanza :--

"I must be very old, I keep repeating o'er and o'er; Yet on the old Bible page, Where my good father wrote my age, My years are twenty-four."

Then we are told why the writer feels so old.

"Have I not seen death strike so fast." That church-yards could not hold. Though torn into one yawning grave The remnant of the young, the brave. The bright-eyed and the bold? At no. I feel my heart is cold. I must be very, very old. An old, old man!"

An old, old mn!" The father writing the name on the old Bible page, and the sense of imany years coming, through a rush of circumstances, to one so young, would frequently awaken in me re-flections that always fed with de-light upon the vanished things of the past. But in our day young men do not grow suddenly old on account of deep-stirring sentiments they have another, and far less praiseworthy method of growing prematurely old. Nor do fathers now

SEES FOR AMERICA .-- The "In ter-Ocean" has a Roman corres-pondent who dispatches items of pe-

pondent who dispatches items of pe-culiar interest from time to time. His message of the 28th December last contains a number of exceed-ingly important statements—all giv-en within a very narrow space. The only trouble is that we are at a loss to know how much of these small doses can be taken with sufe-ty; nor do we know whether they are all equally harmless or not. In that despatch we are told that the Pope expressed his intention of can-onizing Joan of Are during the year 1902, and that His Holliness is to issue an encyclical on Christian de-mocracy, designed to check the dis-putes arisen lately in the Italian Catholic party. These may be some ground work for these pieces of in-formation—and these may not. But the most important item is that in which it is stated that "Cardinal

We have grave doubts as to the results of which that gentleman appears to be so sanguine. It is quite possible that intemperance might be reduced somewhat by the effacing of the "treating" hahl; but as long as the open saloon exists we 4.5 rot see how it is to be accomplished. There may be methods of which we are not aware, and that the invent-or of the new system has in his mind: but we cannot be made be-lieve that any number of reformers are able to prevent drinkers from "treating." We admit that if the treating could be done away with the intemperance that now prevails would be reduced by no small deperance. His idea seems to be the

TRISH PIONEERS .- Within recent years terrible has been the price which our race and creed has had to which our race and creed has had to pay for their indifference in all pub-lic matters which concern them as citizens of Montreal. As we>-recall the memory of the public-spirited deta of the Irish pioneers of three decades ago, their courage, self-sa-crifice and unfinching demands for equal rights whenever their pivi-leges as citizens were in question, and draw a comparison with that period and the present, the full sig-nificance of the price of our lack of public spirit and manly courage of conviction dawns upon us.

#### CATHOLIC PROGRESS

We learn from the "Daily News" that the "Almanack" which forms part of the "Kalendar of the Eng-lish Church" sets down the number of Catholics amongst the Anglo-Saxons — by which, we suppose, is meant the British Empire-at fi-teen million. We do not know how the compiler has secured his figures, but the estimate of Catholic su-thorities is about twelve millions —

sity College here, where, as we have heard to-day, a conference is to be established without delay. All this is very gratifying to me. As to the Fioneer College in this matter, Blackrock, well, the college itself is not a member of the Society of St. Vincent de Paul, so I am breaking no rule of the society in mentioning its name. I have made some in-quiries as to how far the good work that has already been begun there may have led to the one practical result that I, for my part, have had in view from the first-that is, the bringing in a practical form before the mind of a Catholic young man on his leaving his school or college, and entering upon his work in the world, that it would be but natural for him, as a Catholic to become a member of the local conference of the Society of St. Vincent de Paul. I have had, as you know, some-thing to do with the pressing for-ward of this ideen of the establish-ment of conferences, organized on suitable lines-in our Catholic col-leges in this diocese, in so far as this may be found practicable. So I have naturally been ender I think it may be no harm to have it made known to the students who have formed that Blackrock College Con-ference, that so much interest is taken in the progress and results of their good work by some of us who are outside their college walls. However, there was one point in the sermon, as we glean it from the published report in the London press, which seems to us of such importance, and so unfrequently explained to the world at large, that we deem it well to allude to it in a special manner. The Rey. Dean said : "Men outside the Catholic Church were apt to look upon the profession, but the priesthood is not a profession. It is a tocation, a divine vocation. Our Lords aid to His Apoetles, and He said to the subcatter of selection, guided to a profession. It is a tocation, a to a certain extent the solution is not a calling, a divine vocation our Lords aid to His Apoetles, and He said to the subcatter of selection, guided to a previous and appointed you to go and bring forth fruit." to impress every person present with a sublime idea of the word; us preso that the others, for the diffusion of truch, and for the glory of God. To a certain extent the Catholic, who feels that his place is in the se-fession, has a vocation. He is called by Cod to live in the world, to per-tect himself and sanctify himself in the body of the Church Militant as a private. But his vocation is not his profession, the profession is a metar of selection, guided to a great extent by tastes, adaptabil-ties, talents, inclinations, and a score of other considerations, while the vocation to walk the ways of the layman was a secret and inner only at the hour when he was oblig-ed to decide upon the route that he would follow through life. multitude of other ways, all of which indicate infallibly a natural drifting of the soul towards God. This is really a subject that per-mits of endless development. It must be remembered that while the priest is actually a minister, a pracher, a teacher, a guide, he is yet some-thing more than all these. The unique percogative which distin-guishes him from other men is that of the sacerdotal character imparted to him through ordination. Above all is it his mission to stand be-tween God and man, to renew upon the sacerd altar the sacrifice of Cal-vary, to fulfil the dread command-ment of Christ that enjoined upon this Aposties and their successes the performing in commemoration of Him of that great miracle of Tran-substantiation. When we contem-plate the awe-inspiring import of the prices's power it not longer is difficult to understand that it could be no mere profession that he had selected to exercise, but that he ne-cessarily must have had a special call from God-a divine vocation -that carries with it the necessary graces for such an exalted state.

KNIGHTED BY THE POPE. -In recognition of distinguished services to the Church, His Holiness Leo XIII. has conferred upon John D. Crimmins, of New York, the title of Crimmins, of New York, the title of Knight Commander of the Order of St. Gregory the Great of the Civil Class. This is one of the highest titles which can be given to a lay-man. The apostolic brief by which it was conferred was on October 11 last signed by the Pope at the Va-tican

INTOLERANCE .- The Catholia parish priest of Rostock in Meck-lenburg, the Rev. Ludwig Brinckwirth, died last November in that enlightened university town, says the "Germania," after a long mar-tyrdom of twenty-five years. He was pastor of the civil and military Catholics of the town and as such-according to the laws of Mecklenaccording to the laws of Mecklen-burg-belonged to the Protestant parish, and a fee of eighty marks had to be paid to the Lutheran pas-tor for the funeral with which the latter had nothing whatever to do. For years he had been petitioning for permission to build a church. To his first petition the answer was negative, and the reason eight that for permission to build a church. To his first petition the answer was negative, and the reason given, that Catholics did not enjoy the rights of public worship. To his further petitions no answer was vouchanded. An anti-Catholic Berlin paper ex-claims: "One is ashamed to be a German on reading such stories." Last September a South German paper announced that Professor Hoffmeister of Tubingen had receiv-ed a call to the medical faculty of the University of Rostock. It was at once denied by a Rostock paper in this wise: "Why, that's out of the guestion; he cannot be appoint-ed, as he is a Catholic." True enough, Hoffmeister's appointment would have been contrary to law. And that same Mecklengurg Govern-ment authorized a house-to-house collection in furtherance of the Los-von-Rom movement in Austria. — The Messenger, N.Y.

Out of pure fun he commenced the same game again when they were in fifteen feet of water, and the hady who was drewn-ed had already declined to enter the boat unless Rinchart promised not to rock it. It is a good ching that fools of his class should be taught in a practical manner, that, such-like practical jokes ary out of sea-son at all times, and that no degree of high spirits, of frolic can excuss a person for endangering the lives of others. Too many accidents ac-bur every year that are due to sheer carelessness or to isomether stupidity. People who cannot re-strain their inclinations for what they call fun should not be 1 learted wherever others are enjoying them-selves, espec ally when thirse is any they call fun should not be there of wherever others are enjoying them-selves, especially when there is any risk to be run. We hope the exam-ple set by the Maryland authorities will prove salutary.

CLERGY AND PRESS .- Rev. C. F. McElroy, pastor of the Church at Derby, Ct., recently announced from the pulpit that he would appoint a certain day on which to receive sub-scriptions for a certain Catholic pa-per. This is certainly the most efper. This is certainly the most effectual way in which to propagate the "perpetual mission" in every parish.

Boys discovered the man entering St. Joseph's Church, and told the Sisters in the convent ad-joining. The title of the article and the of religion and against scientific name of the writer arrested my at-tention; 4 am always interested in with the following admirable passbught that refers to the col-lapse of Atheism, and I am in-variably delighted to meet with any-in the chain of his close reasoning. thing, no matter how short, or in It runs thus :- "As we grow older what form, from the pen of Marion Crawford. It is now about sixteen for a principle, without hope of preyears since I first made the acquain-tance of the now famous Catholic novelist, not a personal acquaintnce, but a literary one. He was introduced to me by "The Witch of Prague;" and from the hour that I first read the scene, at the Mass, in that quaint old Cathedral of Bohemia, down to the last few | reach, they planned and built moments when I perused Crawford's latest essay on the "Collapse of Atheism," I have felt a special pleasure in observing the trend of the great author's ideas, sentiments and principles. That Marion Crawford has been the author of very much good in the domain of letters and in that of morals no person can hesitate to assert-provided he has studied as well as read those mirable works. I do not wish it to be understood that I am a hero-worshipper, or that I see only perjection in a favorite writer, or that I agree with all that Crawford has written In fact, I have mentally found fault with many a passage in his works, and I have discovered that he is but another illustration of the saying that "who writes much must some times make a mistake." But taken as a whole, omitting all petty details that are the coveted bits that the critic enjoys, it seems to me that his works are calculated leave impressions both healthy and Catholic. I have rarely ever closed the covers of one of his works with out exper encing within myself a something that served to strengthen my faith-not only in God, but also in man.

JUSTICE AN ARGUMENT. - A abuse of an opponent is, invariably as evidence of a weal regarded use, so justice rendered to the character or talents of an antagonist is always a powerful argument in support of a contention. It is onthe man who has no thought to et against thought, no reasoning to oppose to reasoning, no facts whereith to confront alleged facts, who has recourse to a system of belit tling those whose views do not har monize with his own. In his splendic faculty of according fair and just credit to everyone whose princip'es he repudiates or assails, appears to lie the secret of Crawford's effective-He takes nothing from an op ness ponent that telongs to him, nor does he permit any prejudice agains person to become associated the with his denunciation of the princi It is thus he shields himself gainst the shafts of individual retort, and forces others to fight out the contest with equal arms in the same arena, and upon the sole merits of their theories.

SCIENTIFIC TITANS. - What I have thus sought to accentuate as a special characteristic of Marion Crawford's work I find illustrated in the very article before me. It is this spirit of "fair-play"-a spirit emiently characteristic of the Catholic Church-that dictated such a pass-age as the following : "There was something very heroic about the on of science of the nineteenth cen tury. As the Titans fought against Olympus, they arranged themselves in battle against all religious belief armed with such weapons of argu ent as the human intellect had no seen since Socrates and Plato rea soned on the other side to prove the immortality of the soul." Here is an unselfish, a charitable and in cases a merited tribute to the mental greatness of men who sought substitute science for religion writer has paved his road well The has removed many obstacle and that, otherwise, would have delayed by their obstruction and time him needed to overcome them. Having given the great men of science du credit for loftiness of purpose and sincerity of spirit, he is justified in "They failed to change or destroy the religions of the world, but they accomplished much." That is to say, they uncarthed many a hidden say, they uncarthed many a hidden scientific fact that might have re-mained buried beneath the reach of human knowledge for centuries to come. And in so doing they fabri-cated, all unknowingly, mightler weapons for the hand and the use of that very religion which they had expected to overthrow. cation. I will not tell you the most judicious minds in world, and those most zealous for the futore of the race and republic, say that we are right. It is enough for you and me to know that the Catholic Church has decided that its children shall be educated in a religious atmosphere, and that the Catholic Church in America on this uestion has nailed its colors to the mast! It. therefore, means to win what justice and experience demand, and win it surely shall, even though we find out what it means to fight its struggle may be prolonged and arddous." sent advantage, and we learn to re-spect the dead Titans who gave their lives for an impossibility, and ARCHBISHOP BRUCHESI whose failures to destroy the inde structible were marked by the steps they added to the Giant's Causewa Makes His Annual Visit to the High of learning. GOD : THE ALPHA AND OMEGA -In order to fully appreciate the uccessful manner in which Crawford guides his reader through all the passages of scientific discovery, and through the throngs of scientis ts up to God-as the source and the ultim ate end of all being-I will quote the passage in full. I hope that it will be carefully noted, for it is a striking illustration of the truth of what I advanced in the opening, regarding Marion Crawford's methods of inculcating great truths. The passage, with which the article closes, reads "Darwin, the greatest thinkthus : er, the greatest logician, the greatest discoverer of the last generation, was already beyond the limitations of 'Scientific Atheism' when he wrote his 'Earthworms.' So was Helmholz in his later days. A man who is now a leader of scientific discovery, and who was once his as-

sistant, told me many years ago of something he said that showed the bent of his thoughts. He was much given to explaining a vast number of phenomena by the theory of the 'vortex.' 'But,' the assistant asked one day, 'what made the vortex?' The man of genius looked at his young companion for a moment.

IRISH CATHOLICS IN CIVIC AFFAIRS.

The "True Witness," as its col-umns will amply prove, has always been opposed to sectionalism, reli-gious or national, in the matter of epresentation in public affairs. we also made it quite plain to our people that in every office from that of a police constable up to the highest civic official the sway of sectionalism is dominant, and that so long as other sections of the community are using it as a means to secure place and power it is their manifest duty to assert them-selves and demand, as an important and numerous body of citizens and taxpayers, that representation in important civic offices which is constable.

press we find that much space is dened against society, but now they had the advantage of preparing for laudatory nature, upon two persons who have surpassed all others in who have surpassed all others in the gifts they have made to the cause of education. One of these is Mrs. Jane L. Stanford, the other is Andrew Carnegie. Mrs. Stanford gave thirty million dollars to the richest seat of learning in the Unit-distant of the standard the the standard states, or probably in the world. Mr. Ournegie donates ten million dollars-ayart from all his other donations for libraries and such-like -for th founding of a new univer-sity at Washington. It is claimed that this proposed institution is not intended to compete with other un-versities or colleges, but merely to be a post-graduate establishment, where men who have already com-pleted their courses in other col-eges may come to pursue original investigation. The Chicago "Tribune" has kept a record of the donations, in the cause of education, during the year 1901, given in sums ranging from \$5,000 to millions. The total sum thus be towed amounts to eighty-one mil-in and a half of dollars. We can fully suppose that at least eighty-one million, if not the entre sum, went to Proceson miletions of such facts it is a matter of surprise that our unendowei Cathelic universities should be able to hold their own, as show do in the streat world-wide the gifts they have made to the

orting and guiding the Church that an, in poverty and self-depen lenks, seep pace with such a flood of mo-ey, and often outsurip, in the race, he most richly andowed institu-ions of the non-Catholic world. Prejudice, that will not down, and hat will not learn, seems ever to arp upon the lack of educational dvancement in Catholic countries, orgetful that these very countries that will pot learn, seems ever to have upon the lack of educational advancement in Catholic countrus, forgetful that these very countries have been through long ages the conservatories of all learning and science. It is equally contended that Catholic institutions are not as ad-vanced as those belonging to the va-rious sections of the non-Catholic world. While we not only cannot admit the truth of such contention, but rather feel capable of proving its falseness, we must draw the at-tention of the great critics to the actual condition of educational af-fairs both on this and on the other side of the Atlantic. Wealth, espe-cially wealth that has come by jits and not as the result of labor, does not constitute a standard of educa-tional worth. Ten million dollars may construct a palace outrivalling the splendors of the famed goiden house of Nero; it may furnish it with luxuries that Sardanapulas never dreamed of; it may endow it with chairs and professors out of number; but it cannot infuse into the institution that spirit which alone constitute the guarantee of a positively Christian education. The Greek was taught in the Attic groves those immortal principles that have come down through the ages as the fundamental basis of all scular education-meither Socrate, nor Plato taught in marble hais, nor were their schools endowed with means that might have built stu-pendous edifices for their habita-tion, but could never have added to or taken from their philosophy. Had it been otherwise that philosophy, those teachings, might have perished with the runs of their institutions; as it is their procents have survived

It been otherwise that philosophy, those teachings, might have perished with the ruins of their institutions; as it is their precepts have survived the changes of centuries. Hyspatia lectured under the porticos of Alex-andria and in the public squares. There stands to-day no ruins of any edifice to recall the wonderful learn-ing of that ancient educator. Look over the English-speaking world, and what do we find? In England, as well as in America, the Catholic is handicapped from the very pri-mary department up to the higher summits of education. In the eleis handicapped from the very pri-mary department up to the higher summits of education. In the ele-mentary stages, and even in the in-termediate, the Catholic parent is hampered with laws that impose a double burden upon his shoulders. If he is to follow the dictates of his conscience he must pay for the state schools which his child cannot fre-quent, whi e supporting the separ-ate schools to which he may send the young student. When it comes to university education he finds to university education he finds that he is obliged to maintain the that he is obliged to maintain the highe, institutions in a degree of ef-fective strength that will make them the peers of like educational houses that are built up, sustained, and secured by the millions that flow from the coffers of the wealth-possessing Protestant world. And despite all this unequalness of con-ditions, we find that our Catholic colleges and universitics-all due propertions of advantages being considered—surpass everything that the world has yet produced in the perfection of the training and the stability of the principles that they impart, and the securities they af-ford the future generations that pure Christianity will yet prevail.

THE CONCLUSION .- It is not my purpose to enter into detai's: I am not going to question whether Darwin was the greatest logician of the century now gone, or whether he was a logician at all. I merely wish to indicate by this one example the general method followed by Marion Crawford and the aim evidently of his different literary productions — as well as the aim of his own life. He disarms all prejudice by accord-ing his opponent all that he deserves and giving him the benefit of every rensonable doubt. He then proceeds to separate the good from the bad done by the man of science or of letters. He gives him credit for the good, and points out its every result; and he proves the failure of the bad, consequently the failure of the an's entire work, and of his own ife. He makes even the scientific Atheist eventually acknowledge God, and thereby shatter to ruins the shole fabric of Atheism.

Proof that the public schools are used in the interest of Protestant-ism now comes from Wisconsin. The State superintendent of public in-struction has discovered that for many years a number of school dis-tricts in Frankenmuth and Birch Rud townshins. Suginaw County, where there is a large German Poid-lation, have been using public mo-ney to conduct sectarian schools, in violation of the laws of the state. It has been the practice to teach the Garman language, to give instruc-tion in the Bible and catechism of the German Latheran Church. Sev-eral of the schools were held in church buildings. The State super-intendent has notified the district of-foers that hereafter they will not be entitled to primary school mo-ney, or to the mill tax set apart for the support of the common schools. --Home Journal and News.

# CHURCHYARDS

In Ireland, it is not customa least with the simple country ry, at folk, to give the name of cemetery to their burial places. They call them churcyards or graveyards - churchyards, because, as a rule, they are adjacent to a church; graveyards, for a still more obvious reason. Neither name, perhaps, is as elegant or euphonious as that of cemetery; but, for the Irish ear, either of them has a sound that is particularly dear, solemn and significant, for it re minds them not only of friends recently deceased, but of many van-ished generations of their kith and kin.

The Irish are very particular as to where they will be buried. It

goes without saying that they want to be interred in consecrated ground; but they also wish to be laid with their own in the ancient hallowed spot where their ancestors for many generation have been to rest Each family has its burying place, and whenever a member dies-unles it be beyond the seas or at some insuperable distance-he is brought to be buried with his sires. Hence it is that funeral processions are oftentimes seen to wend their slow way past many a wayside churchyard, to some far-off burial ground, because it is there that for man and many a generation the fore-fathers of the deceased have laid themselves down for their last long sleep.

Travellers visiting Ireland must find it strange and even paradoxical that, in the majority of cases, the Catholic rural graveyards adjoin the Protestant temple. But this only shows that where now stand these heretical fanes, Catholic churches once raised their hallowed walls; and that, even in pre-reformation and that, even in pre-eformation times, it was here that the faithful were laid to rest. And with what pathetic tenacity the Irish have maintained the solidarity of their kindred in the sleep of death! See how even after the church had been razed and a temple of det sted here-sy erected upon its ruins, they still clung fonely and faithfully to the city of their dead, confident that the proximity of the intruded edifice proximity of the intruded edifice could neither disturb their last sleep nor rob their final resting place of its sacredness

its sacredness. How old they look those Irish graveyards! Their walls are ivy-grown and crumbling. The trees that encircle them bear all the evidences of age, whilst those that stand here and there within are stunted and bare and well-nigh saplas. The head-stones are, for the most part, simple in design and uniform in character. On many of them, time in its wearing and corroding pass-age has effaced the epitaph; the stone has become discolored, and a coating as of withered moss ad-heres tenaciously to its surface. Most of them stand with a fair de gree of erectnes; but there ar, many that are slanting, as if too old or weary to do further duty above the graves. The surface of the churchyard is uneven, so many lie buried there and so crowded and un-equal are the mounds above them. How old they look those Irish

Strange to say, although a tender Strange to say, although a tender and enduring remembrance of their departed is characteristic of the Irish peasantry, they very rarely embellish the silent, say detices of their dead. The grass interspersed with occa-sional wild-flowers grows groen and thick and high above and between the graves, covering them as with a veidant pail. It is as if the place were too unworldly for worldly ad-ornment, and the sleep of the dead too solemnly still and sacred to be distated by noise of rake or hoc. It is not for a pastime or to gra-tify an idle carlosity that the dving go there. There is no listless saunt-ering among the graves, no curious wandering from stone to stone, no buzz of convesation. They go there but to enter into closest congunion of remembrance with their dadd, and to pray for their eternal re.t. They kneel motionless and absorbed above their crumbling remains, and while tears bedew the hallowed sward, memory reverts to days that are gone, and hearts send upwards unto God a piercing cry of supplication. Nor does the sound of their foot-fall often break the si ence of the churchyard. It is only rarely that they visit it outside of the coali iney make there on their way to Mass or from it. And when they go, they prefer to be alone, so that their commine with the dead may be undivided and the prayers they pour forth for them less subject to inter-ruption. #### CHARITABLE WORK IN MAN CHESTER.

A meeting representative of all classes in Manchester was held recently in the Town Hall, under the chairmanship of the Lord Mayor, to inally form a new police-aided association for clothing the destitute children of the city, says the Liverpool "Catholic Limes." The Rev M. J. O'Callaghan represented the Catholic body. The scheme took its rise at a meeting held in July 1900, when it was decided to undertake the work on lines similar those which have been found to work so successfully in Birmingham, Edinburgh, and Liverpool. The coma scheme which has been sanc-tioned by the Watch Committee of the Corporation. It is that the po-lice will undertake to ascertain the lice will undertake to ascertain the homes of any insufficiently clothed children they may see in the streets, to find out the causes which have led to their destitute condition, and to communicate this information to the association. Further investiga-tions into each case will be carried out by the visitors of the associa-tion, and in the cases recommended tion, and in the cases recommended both by the police and the association's visitors the children will at once be supplied with suitable gar-ments. The clothes thus supplied are only lent, and the barents and guar-dians will be required to sign a de-claration to the effect that they un-derstand that any attempt to pawn or sell them is ilegal. The clothes will be so marked that it will be difficult for them to be disposed of to pawnbrokers or second-hand tion's visitors the children will at to pawnbrokers or scond-hand clothes dealers, who will be warned of the illegality of buying them. The scheme has the hearty co-oper-ation of the Chief Constable of Manation of the Chief Constable of Man-chester, who, referring to the expe-rience of police-aided association elsewhere, says: "The police action-ities speak in the highest terms of the good accomplished, and also of the improved relations that exist, as a consequence, between the police and the poorer portions of the popu-lation." By enlishing the 'services lation.' By enlisting the services and sympathy of the police in the work it is hoped that the danger of relieving idle and thriftlese people from their natural responsibilities will be avoided and the full benefit of the public benevolence secured to the children. Another good result, it is thought, will be that cruelty and neglect by parents will be discover-ed, and the efforts of the National Society for the Prevention of Cruel-ty to Children, the Boys' and Gi k? work it is hoped that the danger of ty to Ch.ldren, the Boys' and Gi ls Refuges, and similar institutions for providing homes for waifs and st ay will be assisted. Annual subs.rip tions to the amount of at least tions to the amount of at least £1,000 will be required. The forma-tion of the association has enabled the Corporation to fulfil a condition imposed by the Fome Office in giv-ing permission to license children trading in the streets-that an or-ganization should be started for clothing destitute children. A reso-lution, expressing sympathy with the objects of the association and the objects of the association and recommending it to the pe sonal and recommending it to the pe sonal and financial support of the public, was move by a Non-co-dormist min ster, and was duly seconded by Father M. J. O'Callaghan. After further speeches by distinguished speakers, the resolution was carried. The usual votes of thanks concluded the meeting.

At the dawn of the twentieth centu y when almost the entire world boasts of high civilization, culture, refinement, etc., and when, especially, Prussia delights to pose as the standard bearer of this "high culture," says the "Southern Messenger one of the most atrocious deeds has been recently perpetrated by officers of the Prussian Govern-ment in Posen, the Polish province in Prussia. The Prussian teachers in a Catholic Polish school in Wizesnia (in German, Wreschen) had persecuted the Polish school children for some time past. No Polish, of course, was taught, yet catechisr was allowed to be taught in that language. The teachers all at once came to the conclusion that the children knew sufficient German to receive religious instructions in that language, and, notwithstanding the protests of Polish parents, such a rule was adopted and enforced by means of cruel and barbarous corporal punishment. The children, sincerely devoted to their prayers and catechism in Polish, unanimously refused to study German catechisms and, when questioned by the teachers, they answered that they would learn only out of a Pol-ish catechism. This was repeated and the teachers introduced a new System of Normalian personalized

and the toachers introduced a new system of Neronian persecutions. Day after day punishments were inflicted, for instance, "so many lines," so many hours to remain in school after class hours, or to have no dinner and, finally, "ut patet per se," the whip, that medium for sub-jecting by force, was applied to all the dilines," so many hours to remain in school after class hours, or to have no dinner and, finally, "ut patet per se," the whip, that medium for sub-jecting by force, was applied to all the "obstinat?" children regardless of age, sex or bodily development. Such outrages, repeated quite fre-quently, naturally provoked the pa-rents. One day, about the 20th of May, when this atrocious treatment had reached its climax, mothers gnd fathers of the children thus mal-treated entered the school-house in a crowd and demanded an explana-tion from the teachers. No explan-ation was given, but the school in-spector, Mr. Winter, a typical Prus-sian officer, told the indignant pai-ents that the "Amtshandlung" must-be finished, that no obstinate child should go without whipping. The brutal application was continued and completed in spite of the crices of the mothers and fathers present. Only one boy who showed great ner-vousness was spared. In the mean-time police officers were called who sent the crowds home. Note well, dear reader, that no assault was made upon the teachers or inspector, but only a few harsh words (of course) were exchanged. The chil-dren thus tyrannically abused were brought to a doctor who said that four of them could not return to school on account of most serious higures to their bodies, while others were also in a critical condition. One boy was the Prussian "cul-ture" instilled, not indeed into the hearts, but into the poor, innocent and helpless bodies of Polish chil-dren-martyrs for the Polish cause and victims of Prussian prescutiont The tragedy did not, however, end there. The police officers were care-ful to take down the names of all the participants in the tumultuous gathering around the school on that menterable day, and twenty-six per-sons, among them several women, were arre-sted, tried before the court in Guesen, convicted of " rebellion to inprisenment for periods Tanging

He is supposed to have done many things, but no one is very clear what they are; and it is not likely that much informa-tion on the point will be obtained from him, for he seldom talks much, and never speaks of himself. Tyrawley smiled. "But whatever you do," he said, "mind and let me have plenty of rope. Now out of the way, my friends, and let me have a clear start." He touch-ed the water full five-and-twenty fect from the edge of the cliff. Down into its dark depth he went, like a plummet, but soon to rise again. As he reached the surface he saw the crest of a mighty wave a few yards in front of him-the wave that he had been told was to dash him life-fless against the cliff. than above it. We must now turn to the ship. The waves have made a clean breach over her bows. The crew are crowd-ed upon the stern. They hold on to the bulwarks, and await the end, for no boat can live in such a sea. Sud-denly she is hailed from the waters. "Shim-about" shouts a loud, clear denly she is hailed from the waters. "Ship-a-hoy!" shouts a loud, clear voice, which makes itself heard above the storm. "Throw me a rope or a buoy!" The life-buoy was still hanging in its accustomed place by the mainmast. The captain almost mechanically takes it down, and with well-directed aim throws it within a yard or two of the swim-mer. In a moment it is under his mer. In a moment it is under his arms, and in half a minute he is on

board. "Come on board, sir," he says to "Come on board, sir," he says to the captain, pulling one of his wet curls professionally. The captain ap-peared to be regarding him as a visitor from the lower would; so, turning to the crew he lifted up the rope he had brought from the shore. Then for the first time the object of his mission flashed upon their minds, and a desperate cheer broke forth from all hands, instant-ly re-echoed from the shore. Then a strong cable is attached to the small rope and drawn on board, then a second, and the communica-tion is complete. But no time is to be lost, for the stern shows signs tion is complete. But no time is to be lost, for the stern shows signs of breaking up, and there is a lady passenger. Whilst the captain is planniog, a sort of chair in which she night be moved, Tyrawley lifts her up on his left arm, steadies himself with his right by the upper rope, and walks along the lower as if he had been a dancer. He is the

first on shore, for no sallor would leave till the lady was safe. But they soon follow, and in five min-utes the ship is clear, five minutes more and no trace of her is left. Him Tyrawley avoids, and thinking he can be of no turther use, he betales hims if across the country once more, and by the aid of the friendly elm regains his chamber without observation. The lady, whom Tyrawley had de-posited in a cottage, with a strong recommendation that she should go to sleep immediately, was soon car-ried off in triumph by Mr. Ravel-stoke to the Hall, and welcomed by Lady Grace at half-past three in the morning. There were very few of the guests who slept undisturbed that night. The unusual noise in the house aroused everybody, and many excursions were made in unfinished costume to endeavor to ascertain what was going on. The excite-ment culminated when the miscella-netris assemblage who had conducted the caliab and some of the creater irst on sl

Tyrawley made no observation up-on her recital, but took a third egg. "Well, Mr. Tyrawley," said she at, last, "what do you think of the man who swam out to the wreck?" "Why, I think, Miss Baynton — I think," said he, hesitating, "that he must have got very wet; and I sin-cerely hope he won't cathe cold." There was a general laugh at this, in which the captain joined; but it is to be feared that Miss Constance the table. Tyrawley turned and began to talk to Miss Mellish, who was sit-ting on his right. As he was speaking the door on his, left opened, and Lady Grace Ravelstorke entered with the lady passenger. the singular coincidence which fav-ors lovers or historians, she sat alone. Now Constance had made up her mind that she was bound to apolog-ize to Mr. Tyrawley for her rude speeches of yesterday; she had also decided that she would compliment him on his gailant conduct. She had, in fact, arranged a neat, quiet, cold, formal, appropriate form of words in which she would give her views expression. And how do you think she delivered them? She got up, sid "Oh, Mr. Tyraw-ley," and burst into tears. If a proud woman's pride is a shield to thee, O man, as well as to her, against the arrows of love, re-member that if ever she throws it away, after she has compelled you to acknowledge its value, you are both loft uttorly defenceles. Trederick Tyrawley capitulated at once. They are to be married this month. #### CHICAGO FIREMEN WANT MORE PAY.

The Chicago firemen are out for an increase of salary. According to their statement, they receive much smaller pay than the firemen of all the other large cities of the country, and think they deserve an increase. They say the city is better able, from a financial point of view, to stand the extra expense than has been the case for several years. The policemen are also after an increase of pay, and the firemen are of the opinion that they are as de-serving of more money as the po-lite.

The following figures, prepared by weveral members of the fire depart-ment, present their side of the case: When a new member is added to the department he receives \$66 per month, and it is four years before he reaches the first grade and re-ceives the pay of a first-class fire-man, \$93.50 per month. Under the present rules, it takes four years-for the men to pass through the sev-eral grades before they reach the

Boston receives \$1,400 per year, to S1,134 for the same class in this-city. Then, again, the firemen say that the police do not have to be pur-chasing equipment, or, in fact, any-thing outside of their uniforms, while they are obliged to pay out of their own pockets for not only uni-forms, but rubber coats and boots, for hats, etc., which the city does not furnish. They also object to the statement made by some mem-bers of the police force that they, the firemen, receive 12 per cent. more per year than do the police. While the actual salary paid is 12 per cont. greater, yet is not nount is much less. They simply wish to be put on a par with their co-workars in the other large cities. The firemen have another griv-mace, which is that they have to work longer hours that do the po-lice. ST. AGNES, MARTYR. - Of all the skints in the Calendar, there are very few lovelier and better known among Catholics, than St. Agnes. From the earliest times of Christianity up to the present day, she is held up as a model of purity and fortitude, seldom witnessed in a child so young as she was. Agnes was a charming, beautiful girl, just budding into womanhood. Her charms fascinated the son of the Roman Prefect, and he asked her hand in marriage. In this he, how-ever, made a mistake, for Agnes was a Christian and had consecrated her heart and soul to a far nobler tride-groom, to our Lord Jesus Christ. Although she fully realized what the consequences would be, she did not hesitate to let her would-be suitor know the resolution of her heart. In vain did he try to persuade her that such a thing as her profilies to God was foolishness from hor part, that never would she have a better chance of marrying than now. But in vain, his entreaties, his plead-ings, fell upon deaf ears. ST. AGNES, MARTYR. - Of all

After three years of work in the Various hospitals in France, with funds provided by the Municipal Council of Paris, the distinguished savant adduces facts and figures to prove that the method has been most efficacious and that his treat-ment is of great importance. At the Bastion Hospital, out of twenty-nine cases treated by his system, all twenty-nine cases were successful. At Tenon a mortality of fourteen successful. At Tenon a mortality of fourteen out of forty-four was reduced to four. In another group of sixty cases privately treated the remedy proved a complete success. Another group of one hundred hos-pital cases was inoculated, and in every case where the treatment was

WITH THE SCIENTISTS.

every case where the treatment was resorted to early in the disease not a case was lost. The resulting mortality in the groups using Dr. Chantemesse's treatment is shown to be only 6 per cent. as against 38 per cent. shown in official typhoid statistics. Typhoid has made fearful ravages in France. The statistics collected by M. Roux, Minister of the Inte-rior, show that out of 12,848,235 inhabitants there have been 55,623 deaths by this scourge. It has made alarming inroads on the French army and navy. It made disastrous havoc in the English forces in the Boer war and it became distressing in the American camps in the short war against Spain. Dr. Chantemesse firmly believes that he has discovered a scrum that not only actually will cure typhoid, but will te a preventive against this dread cisease as well. in vain, his entreaties, his plead-ings, fell upon deaf ears. Enraged at this the Prefect order-ed Agnes ta be cast into prison. Agnes rejoiced to suffer for Christ, and even the promise of her liberty could not shake her in her resolu-tion to remain true to her heavenly bridgroom. She sternly refused to strew incense to the gods-she made the sign of the cross instead to show her contempt for the idols of the heatens.

you, then, continues His Lordship, to endeavor to realise the deep re-sponsiti ity which resis upon par-ents with regard to the bringing up of their children. It should not be necessary to insist upon the obliga-tion Catholic parents are under of schools, where alone they can learn the necessary truths of their Faith and receive that thorough grounding in their religion which will protect them against the "pestilence of er-ror and corruption" amidst which so much of they" lives must after-words be spart. It is just on this point that Catholics have now, as in the past, to sacrifice worldly ad-vantages here for gain in the world to come. The teaching of the Church senter caused to raise her voice and condam those purents as guilty in God's sight who send their children to non-Catholic schools, except it be here and there in some extrame cases for very grave reasons. The grounds for the Church's teaching such schools the positive instruction in the Catholic religion which every child needs; that there are dangers to a child's Faith, at an impression-able time of life, from the ridicule of companions, or the covert smers teresting to all human persons, says an exchange. Dr. Braithwaite argues in "The Lancet' that an undue con-sumption of sait is a leading factor. He has ascortained that in all dis-tricts where the malay is provalent beyond the average the inhabitants are great eaters of meat, especially ham and bacon, whilst Jóws rarely suffer. But for numberless genera-tions, until quite modern times in-deed, the peoples of Northern Eu-roje lived upon sait meat exclusive-ly during six months of the year at least, unless, perchance, they could catch game or fish. And the quan-tities they consumed astonished for-eigners, as is shown by many fam-iar allusions. Moreover, common folks had no vegetables except wild species, until the fifteenth crytury. But was cancer a notable disease among them? There are medical an-tiquaries who could answer the question, perhaps, and decidely it is pertinent. Dr. Braithwaite points out that savages are exempt, and they get no sait. This is certainly is pertinent. Dr. Braithwaite points out that savages are exempt, and they get no sail. This is certainly an error. Some very low races might be found, perhaps, which have net discovered any means of making sail. But the curious processes used by a great majority, and the quan-tities manufactured, prove their craving for it. able time of life, from the ridicule of companions, or the covert sneers of masters, or to its morals from the low standard that too fre-quently prevails; that encourage-nent is given in a child's mind to a sinful telerance of heresy, or a spir-it of religious indifferentism; and finally, that parents who thus dis-obey the Churcff are guilty too of-teen of scandal, by inducing others by their example to follow in their footsteps. But, when parents have

I am just twenty-four years of age, and I think I started busiress too young and the fear of falling spurred me to greater efforts perhaps than was good for my con-stitution, and the consequence was that I became subject to those at-tacks which came without any warn-ing whatsoever, leaving me teribly sick and weak after they had pass-ed. Their usefulness as trackers of criminals was thus suggested, and they have since proved themselves invaluable to the police. So implicit is the confidence felt in them that when a black starts out on a man is the confidence felt in them that when a black starts out on a man hunt the officer who accompanies him merely follows in his wake, leading his own horse, and does not question him or, in any way inter-fere with him, no matter in what di-rection the guide may go, or how apparently reasonless or futile his method. The most expert trackers are found in the State of Queensland, near the borders of New South Wales. They are animated by no feeling of ven-geance toward their quarry, and will travel faithfully for any number of miles, intent upon their task and unmindful of an obstacles or danger, seeming to take delight in the ac-complishment of their object and asking a reward ridiculously out of proportion to their labor — a few shillings, some tobacco or gewgaws sufficing them. Of the value of mo-hey they have no conception. Rum is their weakness. I have known of a tracker employed to locate cer-tain valuable trees for a timber man, traveling forty miles through a forest so dense that he had to cut his way with a tomahawk (a neces-The most expert trackers are found a forest so dense that he had to cut his way with a tomahawk (a neces-sary weapon down there for explor-ers), and being content with a re-ward of a botle of rum, while the timber man realized \$450 from the sale of the tree. I had business that took me to the Queensiand border, en route through the Nightcap Mountains, and was looking forward with little pleasure to the loneliness of the trip w'rn I was overtaken by an officer and Charlie, like myself on horseback, the officer having some wrist jewelry and a warrant for the apprehension of a cattle stealer. Now, cattle stealing in Australia is a scrious offense, the cattle laws there being most strict. The offender had two days' start of his pursuers, and was known to be a well season-ad bushman, who would resort to precidentia start of his offender to make the season of the season-de bushman, who would resort to

At no time could we ride, and with great difficulty got our horses to a clearing, where we made camp and rested. Tearing three huge strips or barks from the trees, Char-lie wrapped a blanket around him and lay on the concave surface of one for a bed and we did likewise. At daylight we took up the march, and by noon reached a bush-man's cabin. Here we had a meal, and tethered our horses, proceeding, by Charlie's advice, on foot.

by Charlie's advice, on foot. That night we again camped in the forest, making a slim breakfast on the provisions brought with us. The fourth day found us hacking our way through underbrush peculiar to Australia, called "lawyers and bar-risters," because its thorns and brambles catch one at every turn. Once Charlie hesitated, turned back and struck off in another direction down an embankment, we plugging after him. after him.

What a wild chase that was ! What a wild chase that was! Two white men blindly following the apparently crazy course of a black fellow into places so remote that it would be impossible to find our way out of them alone. Such is the confidence in that country in the ability of a tracker. Charlie now crawled the greater part of the way on his hands and branches for signs of a freshly brok-en passage way for the fugitive.

Here we noted that the nain trunk of the tree had been proken off years before, forming a rotch for the new branches that ad sprung up on either side. Then a most astonishing thing inppend.

Then a most astonishing thing happened. Reaching down into the hoflow of the half dead tree trunk, the track-er seized something, at the same time shouting to the officer below : "Bose! bose! I catch white fellow! He play 'possum!" Out of the opening appeared a man's bead, and a more miseralle object I have never seen. He was trousled, dirty, gaunt, hall starved. I have said that a tracker always runs down his game. This time he certainly ran it up. Charlie's skill at ringtailed 'possum hunting help-ed him out, for very often when a mative has killed his game with a boomerang the animal is caught in a tree branch and the hunter has to climh for it in the manner I have described. described

He said that, knowing a tracker would be put upon his trail, he had hoped to give him the im-pression that he had drowned while swimming the river.—San Francisco Examiner. Examiner.

RISKS OF LABOR,

Much has been written of the risks of capital and its timidity in seekng investment; and workingmen are often warned not to do this thing or that, as it might cause capital to flee away, leaving the laborer to starve for lack of employment. In talking of the risks of capital, it is well to also keep in mind the risks of labor. No occupation is without its special danger, and sometimes behind the most innocent looking employment there lurks a deadly en-emy to the worker's heafth. The life insurance companies of the world recognize these facts, and they have at great expense collected facts showing the fatality of all oc-cupations. And this labor is not yet completed. The actuaries of Am-erica are now, it is said, engaged in often warned not to do this thing
