Board of Control to Consult City Solicitor As to Whether Bonds For Hydro Radial Can Be Withheld-Likelihood of Early Operation Disappearing.

. The despatch published below will have considerable interest to the St. Catharines public in view of the railway developments in the City Council toward the end of last year, and in view also of the statements made by those who sought to prejudice opinion to the effect that the railway improvements wanted by St. Catharines could be secured at a very early date without entering into any arrangement with the N. S. and T Railway as a part of the national system of railways. It has another important feature, namely, that St. Cat harines is in the same position as Hamilton with regard to debentures for the Hydro radial line between here and Port Credit... If there is not going to be any power available for five years, as Hon. Mr. Biggs stated in H amilton a few days ago, then should the municipalities be called upon to deposit their bonds with the Provincial Commission at once as they are asked to do? This is what is taking

HAMILTON, Jan. 27 .- This city's Board of Control has much doub as to the ability of the Hydro-Elect ric Commission to supply power for Hydro-radials for a long time. Because of this it decided today to ask City Solicitor Waddell if it had the right to withhold the debentures it was authorized to deposit with the Commission in connection with the

Mayor Booker and Controller Da vis both expressed themselves as doubtful of the ability of the Commis sion to furnish power for radials for several years, because of the power situation at Niagara Falls. The Mayor stated that he thought the Hydro situation was precar-

ious. Controller Aitcheson would not go all the way with his colleagues. but thought it was a mateer in which the city should go cautiously. The bylaw authorizing the deposi tinging of debentures was to be read a third time by the council this evening, but the controllers recow-

. CANADA AND LABOR

Canada will occupy a peculiarly interesting and important position at the forthcoming Labor Conference in Paris, says the Christian Science Monitor. Owing to the failure of the United States to ratify the Peace Treaty, the Dominion delegates will be the only representatives o fNorth America. Stricely speaking, of course as was explained to a representative of the Monitor by the Canadian Labor delegate, Mr. Tom Moore, President of the Trades and Labor Congress of Canada, just prior to his departure for Europe, the Canadian delegate will not represent Canada in the governing body of the International Labor office, but the Labor movement of the world. The governing body, which is now meeting in Paris, is composed of twenty-four persons and six, elected by the delegates to the international conference, repre senting the employees. Mr. Tom Moore, therefore, represents a much larger constituency than the Domin ion of Canada. Nevertheless, that Canadian should be chosen as one the world representatives of Labor in the governing body shows that, in the opinion of the International Conference, a representative from Canada is specially qualified to do useful work.

Does this mean that Canadan La bor will hold a subordinate position in the eague of Nations Labor Confer ences? We know that our represent privilege. The Canadian delegates of the League are merely rembers of what is called the Assembly, which is not a legislative body.

Mr. Henry Ford is so certain of his new internal combustion engine-driven interurban car that his company is going ahead with plans for quantity production in a plant two miles long. If this car comes into general use for interurban service there will be an increased drain on the supply of gasolene, and if it is also used for urban purposes the drain will be much more severe. Its success will have a direct bearnig on the price of gasoline, will hasten the day when gasoline must become exhausted, and will at once turn the attention of inventors to some substitute for it.

The Industrial Research Council of Canada pointed out in a report to the Government a few months ago that the use of denatured alcohol as motor fuel to replace gasoline is not a remote possibility, and that if industrial alcohol could be produced cheaply it would quickly replace gasoline, for it could be used as effectively with slight changes in the motor engine. The Council were of the opinion that industrial alcohol at 30 to 35 cents a gallon, a not impossible price in the near future, should compete successfully with gasoline at

FROM OTHER PENS

WHAT WILL HAPPEN ? Calgary Albertan: There is nothing

any of the Canadian laws which avs that any action which leads to he suspension of a newspaper is a rime which should be punished by by a term in prison. But in the one case a Labor man who organized the strike that paralized business is in jail. In the other case the paper manufacturer looked the Government calmive in the eyes and declined to bey the orders. The situation is not parallel in many respects, but it parallel in at least one respect, viz., that Capital and Labor have been equally guilty of disregarding the orders of the Government, and their has had precisely the same result on ne industry and upon the public which depends upon that industry. It will be interesting to compare the treatment given to and the nunishment of the paper manufacturer with that of the laborers who struck.

USTICE FOR THE ARMENIANS. St. John Globe: Justice is the foundation on which all human society rests, said the Sultan of Turkey in an address opening the Turkish pariament a few days ago. The kind of ustice the Turk meted out to the poor Armenian was massacre, aimed at the extermination of the race. The mnant today appeal to the world for ssistance, and their succor should be he object of widespread effort.

y the Mayor of hat period, as e one rgument in favor of getting railway extensions and improvements here htrough the N.S. and T., the view vas scoffed at by the editor of Queen street, who preferred rather to scatter seeds of prejudice than to face the facts and discuss them. He endeavored to create a sentiment against negotiating any arrangement with the N.S. and T., even though it is a government owned system, and fort was futive because certain mewbers of that Council apparently did not want to be accused of an anti-Hydro attitude just before an election. The ruse succeeded for the time being, but facts always come out and less a responsible person than Hon. the mits a ringing sound, the plant The light of truth with respect Mr. Biggs, Minister in the Drury o lack of power for some years for Cabinet, who states that it will be the operation of the Hydro-radials five years before power will be avail-

THE STABLE IN WINTER

Spray the Place With Whitewash-Add Some Germ-killer - Fill In All Broken Window Panes, and Provide Other Ventilation-Card of Plants In Winter.

(Contributed by Ontario Department of Agriculture, Toronto.)

THE period of long, cold winter is here. Of necessity, our milking cows must have special protection from the cold, and at the same time must be nade as comfortable as possible.

The whole of the inside of the stable should have a thorough clean ing. The dust and cobwebs should be swept from the walls, ceiling and windows; the windows should be thoroughly cleaned, also the mangers and stalls. Then spray whitewash all over the inside, except the windows. To the whitewash add some disinfectant such as a carbolic acid preparation, or a chloride germkiller. This will kill disease germs lurking in dark, damp places and maintain the health of the animals, which is at the foundation of profitable milk production.

The next step is to put in all brok-

window lights, but where the owner thinks he cannot afford to buy glass at the present high prices, piece of coarse cloth, such as an old sack, may be tacked over the window space. This will provide some

Cow stables need ventilation in winter by having the foul air removthem to open inward, so as to shoot the air toward the ceiling. There should be a V-shaped board at each side or end of the window, to pre-vent the side-draft. Foul air outlets hould extend below the ceiling of the stable, and preferably have two inlets for foul air-one near the floor and one at the ceiling, as in this way the foul air is removed without cool closing the top outlet. No system of chean ventilation works automatically. They all require some attention

Other points in stable preparation are to have all ties secure so that a ow may not get loose; repairs to mangers and gutters should be made ultary without too much labor. Litter and feed carriers are great savers of labor in looking after a herd milkers during the winter.

stabling cows by having them sanitary and convenient, with as many helps as possible in the nery.-Prof. H. H. Dean, O. A. College, Guelph.

Care of Plants In Winter. Water growing not plants only when they need it, then water them thoroughly. When the soil hegins to get dry and powdery on the surrequires water. Give sufficient water so that it runs out through the bottom of the pot. Water plants in the morning in cold weather, not at night. Use tepid rain water, or water

one of the main requirements to be successful with plants indoors. Place pans or saucers of water on the heaters or registers. A steaming kettle or pot of water on the stove is a

great help in this respect.

When the pots become full of roots, or where the soil is poor, worn out or exhausted. Equid fertilizers can be given plants. The soil should be moist, not dry, or very wet, when the fertilizer is applied. There are several good plant foods sold at seed stores. "Starling Worth Blant Tab. stores. "Sterling Worth Plant Tab-lets" or "Bonora" are both good. St. Catharines is in the sawe pos- Half an ounce of nitrate of soda distilizer for pot plants. Apply once

plant is necessary to be effective. Plants having very rough hirsute fol-iage, should not be sprayed or spong-ed, especially in winter, only the plants having glossy, glabrous follage. Insect pests increase and thrive best in a dry, warm atmosphere. For aphis or green lice, white fly, red spider and thrip, "Sulpho-Tobacco Soap" is a good remdy. Black Leaf 40 is also a good remedy for most insect pests on house plants. Soapy water of a solution of whole oil soap and tobacco water are beneficial for

scale insects on plants.

Slake about one-half pound of fresh lime in a pail of water, allow it to settle. Give about a teacupful Main street. Moyer Bldg., Niagara plant suffering from earth worms. Put frozen plants in a dark place at once, temperature about 45 degrees F. Do not touch the leaves. Sprinkling with ice cold water is beneficial.-W. Hunt, O. A. College,

In very cold weather to make the hen comfortable and to keep her in good condition feed (a little at a time, but often, in dry straw or other litter) some kind of mixed grain. Milk to drink, or about a pound of meat or its equivalent in beef scrap each day, is required to supply material for the building of the egg white for twenty hens.

James Prentice formerly a prominent Minto farmer, and a Queen's Bush pioneer, died at Harriston, in

Canada at the National Chemical Exposition, Chicago.

The importance and magnitude of our Chemical Industries form a hard as at first, it has not the fluctuational chapter in the Industrial history of Canada, that has become known the world over. Development followed development during the war with amazing rapidity and still continues. Some idea of the progress known the world over. Development followed development during the war with amazing rapidity and still continues. Some idea of the progress made, may be gathered from the fact that up to a few months prior to the end of the war all synthetic nitrates for explosives produced on this continuent, were of Canadian origin. Our production of acetona was equally phenomenal. It is no wonder, therefore, that Canado occupied such an important position at the National Chemical Exposition recently held at Chicago, admitted to be the greatest industrial event in the history of that city.

In addition to the large attendance from Chicago, over twenty thousand members of various scientific societies, Universities, manufacturing concerns and others interested in commercial and scientific development, attended the exposition. These included, The American Institute, Mining and Metallurgical Engineers, American Electro-Chemical Society, Technical Association of Pulp and Paper Industry and others.

The Government of Canada and the Province of Ontario, realizing the importance of this opportunity of telling abroad the story of our resources were represented by exhibits, and by some of their best men. The Canadian National Railways had an exhibit illustrating the mineral forest wealth, water powers and raw materials of the country.

During the Exposition two addresses were delivered by C. Price Green, Commissioner, Industrial & Resources Depti, Canadian National Railways, and investment of Capital, which were widely reported in the American Press and many scientific publications.

TILL-FITTING COLLARS RUB NEURALGIA

The Cause of Sore Shoulders in Farm Horses

The Skin Scalds and the Hair Falls Out - Abscesses or Tumors May Form - Treatment Suggested - Planting Pield Beans.

(Contributed by Ontario Department of

perly fitted for hard work, the collar fits properly and the driver obreasonable precautions to horse has not been prepared for work, or the collar does not fit properly, or the driver is careless, trou-ble is very liable to occur. When the horse has a long coat of hair in the spring it is good practice to clip the parts with which the collar comes in contact, as a preventive measure In fact, in many cases it is wise to clip the whole horse. Shoulder troubles are usually caus-

ed by ill-fitting collars, but in horses not accustomed to work, may occur even when the collar fits properly. The most common shoulder trouble

is practically a form of scalding. The becomes inflamed and tender. the hair drops out and if work be continued the parts become raw. This is often due to neglect in cleaning the face of the collar regularly, also thoroughly cleaning the shoulders regularly, and failure to remove the collar at meal times to allow the shoulders and collar face to become dry, and then clean them before putting the collar on again. For treatment, a lotton made of one ounce each of acetate of lead and sulphate of zinc in a pint of cold water, is probably the best application. This should be applied three or four times daily, and, if possible, the animal should be given rest or worked in a

Abscesses or tumors may form on the shoulder as a result of pressure of the collar. One form of this trouble appears suddenly. A swelling of considerable size is noticed. It is not very tender or sore to pressure, and is found to be soft and fluctuating when handled. This is called a 'serous abscess. It contains a thin fluid, about the consistency of water called "serum" which is situated just

Another form appears more slowly. The horse evinces pain when pressure is put upon the shoulder, and examion reveals a swelling. The animal can work and evinces little pain except for a short time after he is put to work, until after he is allowed to stand for a few minutes. The soreness and enlargement gradually increase, and while the swelling may not appeal to the touch, as solid and

even a very little pus be present it will yield to the treatment for an abscess, but if no pus be present the only treatment is dissection. The whole fibrous growth must be carefully dissected out, the wound stitched, except a portion at the bottom to allow escape of pus which forms during the healing process, and treated as an abscess. — Dr. J. H. Reed, O. A. College, Guelph.

Planting Field Beans. Of the various kinds of field beans the greatest demand is for the Common White, of which there are several named varieties such as Early Wonder, Scholfield, Elliott, etc. It is important to secure an early strain,

to test the germination, and to plant early in the month of June. Field beans are grown successfully on a great variety of soils. They do particularly well on fertile land which may be classed as loam, sandy loam, gravelly loam, or gravelly clay. All soils for bean production should be well underdrained either naturally or artificially. With proper drainage even clay soils have produced beans satisfactorily in regard to both yield and quality. Beans do particularly well after clover or grass sod and are frequently followed by winter wheat in some localities and by spring grains in other sections. It s of great importance to have the land thoroughly cultivated and a

seed bed which is both moist and In those sections where field beans are grown extensively, bean planters are sometimes employed. On the majority of farms, however, the beans are planted with an ordinary grain drill by using every fourth tube. Three pecks per acre of the pea beans are usually planted on average soil. If the soil is particularly rich, however, the quantity might be reduced slightly. When the tops of the growing crop are dry the beans should be cultivated occasionally throughout the season to destroy the weeds and to form a fine surface mulch.—Dr. C. A. Zavitz, O. A. College, Guelph.

Roots, cabbage, fine alfalfa hay, or even a little silage, will be relished very much by sows, and will keep them in good health.

Agricultural Training For Soldier Settlers

SOLDIER is entitled to the benefits of the Soldier Settlement Act if he can satisfy the Agricultural Qualification Committee in his district that-

(a). He has performed the required military

(b) He is sincere in his intention to make farming his permanent occupation;

(c) He is physically capable and is fitted in general to make a success of the farming business.

If he is otherwise qualified, but has not had sufficient practical agricultural experience, the Committee may recommend that he be given agricultural training. A generous scale of allowances for soldiers in training has been adopted.

Training Centres For Soldier Settlers

The applicant who is recommended for instruction in agriculture may first be sent to a Training Centre, specially operated for the purpose, where he will learn, by practical experience, how to handle and feed horses and other live stock; milking; the operation of farm machinery, ploughing, etc.; general farm building work; farm blacksmithing; the different kinds of soil and rotation of crops; the selection and judging of live stock and the marketing of farm products. Short lectures on the business management of a farm will be given.

With A Selected Farmer

After the course at the Training Centre, the length of which depends on the progress of the individual but will not exceed three months, the man is placed with a carefully selected farmer in the district in which he intends to settle, to complete his training. During this period (not exceeding one year), the soldier is visited from time to time by representatives of the Soldier Settlement Board, who check his progress and recommend when he is considered qualified to take up & farm of his own.

It will be evident that by this system of preliminary training the soldier settler will gain a thorough practical knowledge of farming without expense; will learn to appreciate the responsibility involved in the venture, and at the same time gain a clear conception of just what farm

On His Own Farm

When a settler is deemed qualified by the Agricultural Qualification Committee, the Board will assist him to become established on a farm of his own, and will, t rough its Agricultural Advisers, continue to co-operate withim in his work, thereby ensuring his success and conserient ability to discharge his obligations and become permanently established.

Fair To Both

The proces and and not only gives the soldier an opportunity of I. . pecoming familiar with his environment and of acquiring the experience requisite to success, but ensures adding to the nation's fundamental industry only competent and satisfied producers.

Detailed information regarding the provisions of the Soldier Settlement Act and further particulars regarding agricultural training may be obtained from the Provincial Superintendent, 32 Adelaide Street East, Toronto, Ont.

Soldier Settlement Board

"What Shall I Do Then With Jesus, Who Is Called Christ?

Pilate's Question Is Yours To-day

THE Church is not impersonal. It is a company of individuals, each of whom has expressed determination to acknowledge Jesus as Lord and God, to accept His teachings and follow His example.

The Active Christians

Those who persist in the Way find their lives radiant with hope. They have an object in living. They are not plunged into hopeless misery by beneavement. They develop character. They learn con-

tentment. Being themselves men of hope and good-will, they are centres of hope and good-will in the world.

The Inactive Christians

Not all continue faithful. Many neglect to keep the Pattern before them. They cease to pray. They forego public worship. They become only nominal Christians.

Their sympathies are on the side of Right, but they miss the full-orbed peace that comes from being obedient to the Heavenly vision.

Aiding the Enemy

Apart from their own loss, lukewarm Christians do positive harm to the Faith. Enemies never cite the lives of notable Christians as a proof of the inefficiency of the Church, or of the Gospel it proclaims. If, therefore, all lukewarmness should disappear the critics of Christianity would be confounded.

Where Do You Stand?

You are a Christian. Are you ardent or careless? Are you whole-hearted or halfhearted? Do you realize that the Church in Canada faces unprecedented responsibilities?

You believe that the Gospel

of Christ is a perfect solvent of selfishness and class-hostility. Will you do your part to give it free course?

A Great Possibility

"Righteousness exalteth a nation, but sin is the reproach of any people." If all the Church Members of Canada would begin today to follow earnestly the prin-

ciples enunciated by their Divine Master; if they would acknowledge their stewardship in full measure, the name of Canada would ring around the world. Therefore, the Question is

"What shall I do then with Jesus, who is called Christ?"

A United Appeal

National Peace

Thank-Offering

Simultaneous Every-Person

Canvass by Each Communion

February 9 to 14

FIVE Christian Communions—Anglican, Baptist, Congregational, Methodist and Presbyterian—have in Canada ten thousand million communicants, and represent more than half of the population of the Dominion. Under the stimulus of five great Forward Movements, it is in the power of these people to root out the evils of materialism in Canada, and to conserve the spiritual values revealed by the chastisement of War. Are you ready for active service?

The Decision Is Yours

TET Christianity have a fair trial in your own life. Make Jesus Christ master in your home. Test the reality of prayer. It will give your life direction, purpose and power.

You can help to cure the ills of Canada and the world. Be prepared to serve. Begin NOW.

The United National Campaign

BACKACHE, LUMBAGO, RHEUMMATISM, STOMACH AND LIVER TROUBLES, ACNE, SKIN DI EASES, CATARRH, ASTHMA, RECTAL TROUBLES, PILES, FISTULA AND BLOOD CONDITIONS The knowledge gained from many years' experience in treating diseases just like yours is of much benefit to you and assures the ailing man of prompt relief. When a man knows that he is again feeling well-that he is rid of his ailment-he feels that a heavy load has been lifted from his shoulders; I give every pati ent the benefit of the knowledge acquired through the long experience of a graduated, licensed and register ed specialist, in order to bring about the most satisfactory results in the shortest possible time.

NERVE EXHAUSTION A CONDITION AFFECTING MANY MEN-THE GREAT AM-ERICAN. DISEASE - IT IS BROUGHT ON BY OUR MAN-NER OF LIVING-OUR WORRY AND HURRY - AMERI-CANS EXHAUST MORE NERVOUS ENERGY THAN ANY

OTHER RACE OF PEOPLE.

There are a great many men who need treatment for their nervous system. These men do not know what is the reason they don't feel right-why they can't work like they used to-why they tire so easily and why they are irritable, nervous, despondent, weak, pale and lack ambition. These conditions require the expert knowledge and treatment of a specialist who has had many years' experience in just such ailments. A specialist learns by experience to know just the right treatment at the right time so that the patient can be dismissed at the earliest possible time. Men affected with nervous exhausion have no endurance-no ambition -everything they attempt is an effort. Life to them appears as a long, gloomy future. Their appetite is poor and variable-they become irritable, cross and discouraged. They have pains and aches in various parts of the body and there is often indigestion and pains in the stomach. Sleepless, wakeful and restless nights fol-

RHEUMATIC AILMENTS SCIATICA AND OTHER FORMS OF RHEUMATISM, LUMBA-GO, PAINS IN BACK, SWELLING, ACHING, PAINFUL CONDITIONS IN ANY PART OF THE BODY-INFLAMED AND SWOLLEN JOINTS OF LEGS AND ARMS - MANY

OTHER SYMPTOMS.

Hundreds of men are suffering with some form of Rheumatism. Many of these men go from day to day suffering untold agonies thinking they cannot be cured. They have tried liniments, rubbing, massage, salts and other treatments without experiencing any relief, and they are now going through life thinking they are martyrs to that burden called Rheumatism. If these men could only know how easy it is to get rid of many rheumatic conditions I know they would not suffer another single day. Then all sufferers of rheumatism would be strong and healthy if they could get rid of the condition. Rheumatic patients are nearly all strong and robust before being attached by this ailment, and therefore it is so hard for the man to understand why he should suffer the agonies of such a condition. When a man gets rid of such a condition he feels that a heavy burden has been lifted from his life, and he starts right out to make up for lost time both in money and pleasure. When a man comes to my office suffering with the above condition he is given a most careful examination, and he is given treatment that he feels is giving him great benefit.

Religion Is Patriotism

It is the Root of Personal Righteousness, the Mainstay of Social Order, the Bulwark of International Peace

The Makers

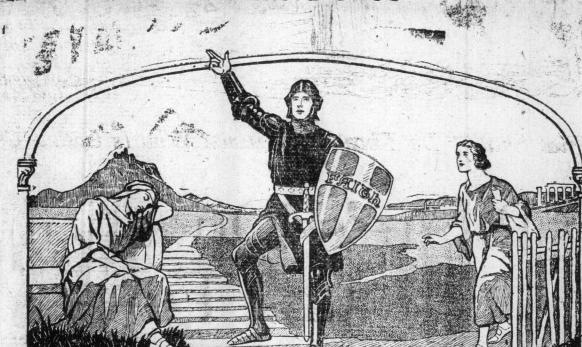

The earliest settlers in Canada were roused by the Call of the Church to develop a noble and

of Canada useful citizenship. Young and old were invited to turn their eyes from material things, and to regard the splendor of unseen realities. Knowing that Religion is the only true safeguard of stability in the State, they built Churches, Schools and Colleges, to train men for the Christian Ministry, and to spread abroad in the land the benefits of education. This they did in their poverty, and thus directed the course of history in Canada to this day.

The Testing of Canada

Because of such sacrifices, there arose in Canada a public spirit hostile towards all injustice, dishonesty and cruelty. The War tested the moral fibre of the Canadians of a later day. Would they choose material ease and wealth, or would they risk all in defence of freedom and the rights of the weak?

Over 400,000 men voluntarily offered their lives, and endured hardness as good soldiers for the defence of equity and fair dealing in all human relationships, and for the vindication of public right. Nor were the people at home less steadfast. Besides bearing the national cost of the War, they gave voluntarily for the help of the soldiers more than \$90,000,000. Canada nobly stood the great trial

Fight the Good Fight

The Menace of To-day

That conflict is ended. Now comes another test. Not only in Canada, but all over the world, sectional and

class struggles for material rewards and for mastery threaten the present basis of Society. The vision of spiritual values gained in the War is in peril of being forgotten. The supremacy of sacrifice, the nobility of service, the reality and glory of the Unseen and Eternal, the promises of Christ; these were the things by which we lived during the War. Now there is

great danger that they may fade from view, giving place to selfishness and the

The great non-Christian peoples of the world comprise two-thirds of the human race. They are mastering our modern scientific knowledge, and if they remain Pagan may yet turn it to our destruction. Paganism stands for the supremacy of Might, the very ideal we fought and conquered in more than four years of war.

Victory only

How can we retain the heavenly vision? How through Christ can the world be guarded against an-

other attempt to establish the Pagan ideal? Only through the Church of Jesus Christ. There is no other agency or society that has any possibility or hope of bringing about a full

want anomove2000 years has been inspired, directly or indirectly, by the Gospel of Jesus Christ. It has ended slavery,

dren and safeguarded their lives, sanctified the home, established schools, missions and charities.

and the reign of the Prince of Peace.

What the Church

Victory places upon the shoulders of the The Coming Allied Nations the responsibility for directing new conditions to

protected life, ennobled women, educated the chil-

realization of the brotherhood of all mankind,

All the progress of

humanity in Civil-

ization for the last

right ends. Canada must do her share. The Church must prepare to meet the needs of the new day. Old standards of life with old habits of thinking and of giving will be wholly inadequate. We must do in our day what our fathers did in theirs. The hope of the world is bound up with the strengthening

and extension of the Church of Jesus Christ.

The World's Need is Spiritual

I speak as one standing upon the watch-tower, and know what the need of the land is. It is not material, it is spiritual. Get the spiritual, and the material will follow. The wounds of the world are bleeding, and material things will never heal them. And that is why I hail any movement which brings the great spirit of brotherhood. The one need of England and France today is the healing and the brotherhood of the Cross of Christ.

-Rt. Hon. David Lloyd-George, Before the Brotherhood Convention, London, September, 1919.

The Forward Movements

LIVE Christian Communions, Anglican, Baptist, Congregational, Methodist, and Presbyterian, are con-

vinced that the time has come to rouse all Christians to a clearer understanding of their calling and stewardship in Christ, their King. They believe that the Church should be equipped adequately with men and money to enable it to meet the needs and opportunities of the New Day.

These five separate Communions are of one mind as to their belief in God, the Father Almighty, Maker of Heaven and Earth, and in Jesus Christ, His Son, Our Lord. They now

EACH of the Communions named is in the midst of a Forward Movement. Each is seeking by prayer and by earnest effort to accept all its responsibilities. Each is striving to extend its activities in Canada and in Foreign Lands.

Your Church needs your help, but, far more, you need the help of your Church to learn the difficult art of living wisely and well.

Consult your Clergyman. He serves you and your children. Ask him how and when you can serve in this day of national emergency. Give yourself to the task. Say: "Here am I, send ree."

declare to their respective constituencies, and also unitedly, to the Canadian

people, that the only effective method of making good citizens is by urging men to a more faithful practice of Christianity, by inculcating personal faith in Jesus Christ. They insist that there is no other dependable way of correcting evil tendencies in individual and national life. They call the people to repentance. To all Christians their message is, "Awake, Arise. Fight the Good Fight, For Canada and For the World."

The United National Campaign

Coming Events Cast Their Shadows Before

Not since the pre-Confederation days has the political life of Canada been surcharged with so much uncertainty.

Great events in Canadian politics are about to take place. The reorganizing and rehabilitating of great political parties is in progress. New leaders are appearing.

The order is changing. All things are becoming new.

THE next two years will be a momentous period in the political life of the country. Reconstruction is a greater task than Confederation.

How will you take your place in the affairs of the nation? What opinions will you form? How will you cast your ballot intelligently if you do not keep in touch and inform yourself on the great questions of the day by reading a daily newspaper national in viewpoint and international in scope?

This is the task and responsibility of The Globe-to give all the news, progressive views, and space for opposing opinions. Such was the threefold purpose of George Brown. His ideal was a Great Family Newspaper with a place in every home. That is The Globe's ideal to-day.

It is not a party organ, but a medium for the development of

public opinion and an advocate of reform. It is the servant of the people from whose needs it draws its inspiration.

To be informed of the progress of events, you should avail yourself of The Globe's great news gathering organization. For an analysis of these developments, and clear, sober thought upon them, read its editorial discussions from day to day. They are written by close students of economics, politics, industry, commerce, social reform and religion.

And further, what The Globe has been in the past is a sure guarantee of what it will be in the future. The personality and ambitions of its founder ever dominate the activities of its publishers.

Therefore, nothing will be left undone to make The Globe the newspaper that George Brown would have it be and to earn a place for it in every Canadian

P. Secretary. deg. F. only the tenderest vegetation suffers, but if below it wholesale destruction results. High temperatures cause strong evaporation from the leaves of plants and thus the need of all rheumatism, headaches, liver

leaves of plants and thus the need of all rneumatism, neadacnes, liver a large amount of precipitation to prevent stunting or death itself.

In a pamphlet by A. J. Connor, of the Meteorological Office, Toronto, an interesting relation between the growth and yield of wheat and the growth and yield of wheat and the in the kidneys or your back huret or temperature is set forth. Both yield and growth are increased by a low temperature and a low range in temperature. A critical period appears to exist in the latter part of the 90 days following sowing, and if the weather in this period be warm, dry, with great temperature range, the wheat plants will head quickly and the harvest be light; but if the cool moist conditions exist heading will be postponed and the yield increased. Thus it remains a matter of seeding at the proper time to insure the cool moist weather in the critical period. In the Western Provinces the sowing is early, namely, the last of April, throwing the critical period about the middle of July, the variability of the temperature of which is the critical factor. However, the rule there is the earlier the better, while in Ontario we are unable to sow spring wheat sufficiently early to procure that desired cool, moist weather, nor

can it be obtained by late sowing. All cereals are best adapted to the temperate regions and especially those of low temperature and small temperature range. Consequently the above temperature effect is applicable to all. Fruits as a rule require a higher temperature region, but not a high-temperature range. Many fruits, however, have a wide distribution and is the result of variety.-R. G. Moffatt, O. A. College,

Live Stock Notes.

This is the time of year when horses are in danger of getting too much hay and too little exercise. Idle horses will keep in much better condition if given regular exercise, and if their supply of hay is wisely

restricted.
Stables that are well ventilated and lighted, even though on the cold side, are more comfortable and more healthful than dark, steamy, warm

Young cattle and breeding stock of beef breeds enjoy a short outdoor run every day during winter, and treatment of this kind promotes health.

Breeding ewes must have abundant exercise if vigorous, healthy

lambs are looked for. Good alfalfa or clover hay, with about four pounds roots, or two or three pounds of silage, per ewe, per day, makes a good ration. Roots fed to horses not at hard work will cut down the cost, as well as add variety, to the ration.

Kidneys Bother

TAKE A .GLASS OF: SALTS .IF YOUR BACK HURTS OR BLAD-DER TROUBLES YOU.

No man or woman who eats meat egularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid which equites the from the strain, get sluggish and fail to filter the waste and poisons from the blood, then we get sick. Nearly

if the urine is cloudy, offensive, full of sediment, irregular of passage, or attended by a sensation of scalding, stop eating meat and get four ounces of Jad salts from any pharmacy: take a teaspoonful in a glass of water before breakfast and in a few days your kidneys will act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and haes ben used for generations to flush and stimulate the kidneys, also to neutralize the acids in urine so it no longer causes irritation. thus ending bladder weak-

Jad Salts is inexpensive and cannot injure; makes a delightful ebervescent lithia-water drink which every one should take now and then to keep the blood pure, thereby avoiding ser ious kidney complications.
