MEN'S SUMMER UNDERSHIRTS and DRAWERS, 32 to 44 inch, 3 qualities

MEN'S FLEECE LINED SHIRTS and DRAWERS, 36 to 44 inches "Penman's" 81 cents garment. These will cost you about \$1.25 per garment next winter.

29 inch PRINTS, Regular price 24 cents, sale price 21 1/2 cents. Simpson's Price, page 237, item 48172, 29 inch prints, 29 cents. See!

31 inch BEST CANADIAN PRINTS, Regular price 29 cents, sale 26 cents net.

The above will give you an idea of my sale bargains and it is your last chance to secure a share.

GREY COTTONS, WHITE COTTONS

DRESS LININGS, in slate, brown or black 10 cents.

MEN'S SUMMER PANTS, Men's Handkerchiefs, Cotton Nightshirts

Ladies', Misses and Children's Plain Cotton and Silk-Lisle Hose Girls' white, Silk Lisle Hose, very fine ribs, sizes 5 to 10 inch Girls' and Boys' Heavy Ribbed Black Cotton Hose, 5 to 10 inch "Tiger", "Rock Rib" "Hercules", "Buster Brown"

Heavy Ribbed Black Wool Hose, sizes 7 to 10 inch, net price 40 cents. Wholesale cost price for this line for next Fall \$5.20 per doz.

Children's and Misses Corset Waists and Ladies' Corsets, Corset Covers, Drawers, Nightdresses, etc., etc., at much less than present price of materials in them.

23 inch White Flannelette 20 cents per yard. Simpson's price, page 228, item 45219, 27 cents per yard or 10 yards for \$2.50. Why not save 59 cents on 10 yards?

Clark's best six cord 300 yard spools, black or white, numbers 10 to 60, net sale price 10 cents each or \$1.19 per dozen. Beckwith has to pay \$1.20 for the spools he sells and they only contain 250 yards. I hereby challenge Beckwith or any other dealer to contradict this statement. The lowest price for 200 yard spools elsewhere is 8 cents. A 300 yard spool at 10c costs you three and one-third cents per 100 yards. Therefore 200 yard spools at the same rate is only worth six and two-third cents. If 200 yard spools are worth 8 cents 300 yard spools are surely worth 12 cents.

Clark's best six cord 300 yard spools prepaid by Registered Mail to any address in the Maritime Provinces, \$1.30 per dozen. Your own choice of numbers.

SNAPS, S-N-A-P-S. Dress Snaps, best quality, Beckwith's price until I cut it in two was 10 cents per doz. His present price 7 cents per doz. My Regular price 5 cents, sale price 4 1/2 cents. They cost 3 1/2 cents.

What will Spools, Snaps and the rest of the bunch cost you, in a few days, when I am sold out? Be Wise and Buy now.

Teach your Dollars to have more cents than to shop elsewhere.

LEMONS MAKE SKIN WHITE, SOFT, CLEAR
Make This Beauty Lotion for a Few Cents and See for Yourself.
What girl or woman hasn't heard of lemon juice to remove complexion blemishes; to whiten the skin and to bring out the roses, the freshness and the hidden beauty? But lemon juice alone is acid, therefore irritating, and should be mixed with orchard white in this way. Strain through a fine cloth the juice of two fresh lemons into a bottle containing about three ounces of orchard white, then shake well and you have a whole quart of skin and complexion lotion at about the cost one usually pays for a small jar of ordinary cold cream. Be sure to strain the lemon juice so no pulp gets into the bottle, then this lotion will remain pure and fresh for months. When applied daily to the face, neck, arms and hands it should help to bleach, clear, smoothen and beautify the skin.
Any druggist will supply three ounces of orchard white at very little cost and the grocer has the lemons.

The Need of Saving
The estimates submitted to the House of Commons call for a civil expenditure of \$437,000,000 and \$350,000,000 for war and attendant expenditure including credits, during the financial year 1919-20.
These figures demonstrate the absolute necessity of continued saving on the part of the people. The revenue during 1919-20 can hardly exceed \$325,000,000. The rest must be raised through borrowing from our own people.
It is for this reason that War Savings and Thrift Stamps have been issued. They make saving both easy and profitable; they will help Canada and help also those who buy them.

Returning from Russia

Cause of Early Old Age
The celebrated Dr. Michenhoff, an authority on early old age, says that it is "caused by poisons generated in the intestine."
When your stomach digests food properly it is absorbed without forming poisonous matter. Poisons bring on early old age and premature death. 15 to 30 drops of "Seigel's Syrup" after meals makes your digestion sound.

'Save the surface and
you save all'
Paint as a Matter of PRIDE

You owe it to your
own community to
keep your home in
perfect condition
Paint is a
preservative
Which House Dominates
Your Block?
SOMEWHERE in 'Every
community' is a house which
always smiles at you. It is always
a little more cheerful looking than
the others, brighter, better kept,
and—well painted.

Inside that house lives a good citizen and a good neighbor. His
house is so inviting that it is like a hand stretched out to you.
You are bound to feel glad that its owner lives near you.

B-H PAINT

Somewhere else in 'Every-community' stands another house.
Its owner has become discouraged. He has not done his share. He has
lost his ambition and gradually has accepted his fate as a down-and-
out.

You know that this is so, because his house says so. It is dingy,
beginning to crack and sag, and is unpainted.
Its owner is not a good citizen. He has not done his share. His
house stands out like a 'sore thumb.' It robs a whole neighborhood
of legitimate real estate value. Buyers of new houses avoid its
neighborhood.

Our reputation for fair dealing
and reliable goods, coupled with
the De Laval record of service
and durability, has made the
De Laval Cream Separator the
leader in this community.

COST—That's what you
put into a cream separator.
VALUE—That's what you
take out of your cream
separator.

Value in a cream separator de-
pends upon the amount and the
quality of service you get out of it.
Because it lasts fifteen to
twenty years the De Laval is
the most economical cream
separator to buy. If you con-
sider its cleaner skimming, easier
running, greater capacity and less
cost for repairs, the price of the
'cheapest' machine on the
market is exorbitant in com-
parison.

With present high butter-fat
prices and the scarcity of labor
this is truer than ever.

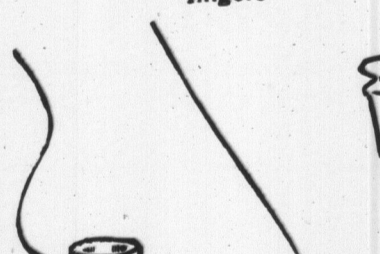

We'll sell you a De Laval on
such easy terms that it will pay
for itself out of its own savings.

Doesn't hurt a bit! Drop a little
Freezone on an aching corn, instantly
that corn stops hurting, then you lift
it right out. Yes, magic.

A tiny bottle of Freezone costs but a
few cents at any drug store, but is
sufficient to remove every hard corn,
soft corn, or corn between the toes,
and the calluses, without soreness or
irritation.

Freezone is the sensational dis-
covery of a Cincinnati genius. It is
wonderful.

INSTRUCTIONS FOR PLANTING

Some Good Advice for Professionals
and Amateurs

Mr. E. R. Clarke, proprietor of the
Annapolis Royal Nurseries, which
have been established since 1885, is
sending out the following valuable
information in the form of a four
page folder, to hundreds of his
patrons this season.

It appears to us that if our custom-
ers had an intelligent idea of what
they sought to accomplish it would go
a long way toward solving the problem
of successful planting of nursery
stock.

The chief thing is to keep stock dor-
mant until it is placed in position
where you wish it to grow; two things
tend to start stock into growth; heat
and moisture; therefore keep stock in
a cool place and with very little
moisture, the stock must not be allow-
ed to dry out, it should always feel
slightly damp to the touch but not wet.
It must not be allowed to dry out en-
tirely because the only way a plant
absorbs moisture is through the small
roots or the nodules, on the roots,
where roots will start from, and if
these roots or nodules, become very dry
they lose the faculty of absorbing
moisture and the plant dies. The
bark of any shrub, or tree, is almost
impervious to water, it does no good,
and may do harm, to completely im-
merse plants in water for any great
length of time. Do not expose plants
to action of sun or wind, this dries
them out very rapidly, keep the roots
covered all the time with something
damp; do not think that a few moments
makes no difference, an excess of care
will pay you. If stock comes to you in
boxes, remember that closely packed
articles, in a moist condition have a
tendency to generate heat, while the
radiation of water induces coolness;
take some of, or all the stock out of the
box and either replace very loosely
or else store in basement or cellar with
something damp over the roots. You
can keep it out of doors but, if you do,
then protect it from sun and wind
with anything that will keep the wind
and sun from drying them. The
easiest way to do this is to lay stock
almost flat on the ground. If stock
comes in bales, place it where it will
be cool and keep the roots slightly
damp by pouring water on from time
to time.

Time is the essence of success, get
your stock into the ground at the
earliest possible moment.
MANURE—Never place manure so
that it will come in direct contact with
roots, especially green manure; we
believe the best way is to place it on
top of the ground after you have
finished planting and dig it in, from
time to time, during the summer. If
stable manure is not available, the
next best thing is nitrate of soda
applied in small quantities on top of
the ground and several applications,
at intervals of from ten days to a
fortnight; nitrate of soda will burn
damp foliage, put it on when the
leaves are dry.
Trim off bruised and damaged roots
by a smooth cut from the underneath
side, use a sharp knife, cut off any
broken limbs in the same way and if
there are any branches that do not
suit you, remove them.

Depth to Plant—Plant so that when
the ground has settled the plant will
stand at about the same depth it
stood in the nursery; dig your hole
large enough so that it will not cramp
roots, the larger the better.

HOW TO PLANT—After you have
filled in some top soil into the hole
place the plant in the hole and see
if it is right for depth and position,
alter any conditions in depth or con-
tour until you are satisfied that once
the plant is in the ground it will not
have to be taken up and replanted;
this saves time; once you are sure you
have the right position and depth
then fill in with good soil until the
hole is three quarters full, now if you
have water available, especially water
under pressure, turn on the hose and
fill the hole full of water and so way
and leave it until the water has com-
pletely soaked into the ground; then
put a little dry soil on top of this wet
earth, just enough to keep from
getting your boots muddy, and tramp
it down just as firmly as you can;
when you have done this fill in the hole
with more soil but leave it just as
loose on top as you possibly can; this
prevents capillary attraction and the
ground will not dry out until the
plant is established. Planted in this
manner, with water, a plant is almost
sure to grow.

Where water is not available: Plant
in precisely the same manner as
above, with the exception of not using
water, only when you first put tree or
plant in position work the earth
among the roots with the fingers until
you have all the interstices filled as
nearly as possible, tramp the plant
firmly into position when hole is about
three quarters full, and place top soil
very loosely.

Stake large trees to prevent swaying
but be careful not to girdle the tree
by this operation; use an open loose
loop about the tree and do not use
anything that will chafe the tree; cloth
bands are best.

The above instructions apply to all
classes of trees and shrubs but
special instructions are needed for
planting hedges, roses, etc.

HEDGES—Commence by digging a
trench using a double line, one
on each side and the proper distance
apart, usually about 10 inches, make
side wall as nearly perpendicular as
the soil admits of, place plants at
proper distances apart, usually about
16 inches, and against the side walls
of trench, place a handful of
earth over the roots of each plant to
break joints on either side of trench
go over the trench and see that plants
are properly placed, fill to about
three quarters full with earth, turn
on the hose, if you have water avail-
able, fill the trench full and allow to
soak in; then a little dry earth and

Our Readers are
Always Satisfied

What is more annoying than starting to read a
local or personal column and find amongst the items
paid ads? We believe in system. In the MONITOR
there is a place for ads. and a place for news. A
paper which studies the reader's interests im-
mediately gets a big circulation and that is what
the advertiser is looking for—a good advertising
medium. The advantage of advertising in a paper
carrying a classified column for small ads. is that
every advertisement is read, big or small. Try it
and you will prove that our statement is correct.

The Weekly Monitor

WEDNESDAY, APRIL 30th, 1919

PERSONAL

Mrs. Malcom Davis has gone to Ottawa, Ont., and Mrs. O. T. Daniels have opened their summer residence in Bridgetown.

Mr. C. W. Selig, of Kentville, was the week end guest of Mr. Angus Hirtle, West Paradise.

Mr. Wm. Donat, who has been a guest at "The Pines" left yesterday to visit his former home in England.

Rev. M. S. Richardson, the popular pastor of the Bridgetown Baptist church, was in Annapolis Thursday, returning Friday.

Mr. B. T. Miller, of Vancouver, who has been the guest of his father, Mr. L. R. Miller, was a passenger to Halifax yesterday.

Mrs. Alexander Campbell, of Worcester, Mass., who had been the guest of her father, Mr. I. F. Longley, returned home Wednesday.

Miss Mabel Marshall, of the Royal Bank, spent Easter in Wolfville and her sister, Miss Merna Marshall, of the Custom Office, spent the same day in Digby.

Mrs. Thomas, of Middleton, who was a passenger to Bridgetown Monday evening returned home yesterday with her daughter Miss Elsie Thomas, who is ill.

Corpl. Geo. Dechman is expected to arrive in Yarmouth this morning from Boston. He will probably be met at the boat by his parents, and motor to Bridgetown.

Mr. James MacD. Spurr, of Carleton Place, has purchased the John West property at Round Hill and left for there Monday where they will in future reside.

Capt. Wm. H. Gesner, one of our best known master mariners, went to Halifax last week to have his leg amputated. He was accompanied by his son, Capt. W. E. Gesner. His many friends wish him a thorough recovery.

Rev. R. W. Lindsay, pastor of the Port George Baptist church, preached this farewell sermon in this province last Sunday and leaves today to take up pastoral work in P. E. I. We wish him continued success.

Lt. Col. Vincent, accompanied by Mrs. Vincent and two children George and Clara, who have been spending a few days at the St. James, left yesterday for Vancouver. Before going overseas Col. and Mrs. Vincent resided at Carleton's Corner.

Mr. Fred McHugh, of the firm of McHugh & Cahon, proprietors of the Manhattan Produce Co., Fenwick street, Halifax, was in Bridgetown on a successful business trip Monday. We wish the firm every success. Watch for their adv. which will appear in the MONITOR in the near future.

Zimphelia Spectator: It is gratifying to learn that Rev. Father Grace, who was taken to the Infirmary at Halifax Good Friday under escort of Dr. Braide, is reported steadily improving in condition there and there soon to return to his beloved parish, but it is understood he will henceforth be assisted in his arduous parochial duties here by an active curate. The popularity of Father Grace, who stood the journey to Halifax remarkably well, was attested by the calls at his car of local priests at many of the stations as the train stopped.

School Notices

Applications for Provincial Examinations are due at the Inspector's office May 1st. The same as in former years will be charged.

The April Journal will not likely be printed until late in May. I hope to be able to have copies of the Minimum Salaries of Schools in this Inspector's in a few days. I will have them published in this paper if the Editor can see his way to do so.

The New Manual of School Law will not likely be printed in this present school year.

The Annual Meeting of the Board of School Commissioners for Annapolis West will meet in Annapolis, Thursday, June 12th. The Anna, East Board meets in Lawrencetown, Wednesday, June 11th.

This Inspectorate was more than forty teachers this year. Encourage your teachers early. Teachers will please watch this paper for advertisements for teachers. A hint to the wise should be sufficient.

Bridgetown, N. S., April 28, 1919. M. J. FOSTER, Inspector of School

A. F. & A. M.

Past Master Henry B. Hicks, acting as installing master, assisted by Past Master Dr. F. S. Anderson, as presenting officer installed the following officers in Robtway Lodge, No. 41 A. F. & A. M., at their last regular communication:

Help the Y.M.C.A. Finish its Work For Soldiers

Help the "Y" Construct the Manhood that will Re-construct Canada

ALL the world now knows that the Red Triangle of the Y.M.C.A. was the "Sign of Friendship" to thousands of your brothers, sons, nephews, cousins and neighbours' boys in the last four and a half years. Wherever the Canadian Soldiers went, the "Good old 'Y'" went too. And now it is coming back home with them!

For the support which has made possible the war work of the Y.M.C.A. we thank you. Your money has been well expended. We have rendered full account.

We ask now your continued sympathy and support for Red Triangle Service for our Soldiers during demobilization, and for Y.M.C.A. work for Canada generally during the Reconstruction period. The Annual Red Triangle Campaign will be held throughout Canada May 5th to 9th, 1919. The objective is \$1,100,000.

The Y.M.C.A. will keep its chain of Service unbroken till the end.

For Our Men Returning

For the soldiers and their dependents, returning from Overseas, we have provided as follows:—

1. A Red Triangle man on board every ship when it leaves Great Britain, with a full equipment of games, gramophones and records, magic lantern, literature and writing materials. Where possible, also a piano or an organ. Lectures, concerts, sing songs, instruction re Government repatriation plans, and Sunday Services.
2. Red Triangle comforts and facilities for the men on arrival at Halifax, St. John, Quebec and Montreal, including coffee stalls, with free drinks, free eatables, cigarettes, candies, etc.
3. Red Triangle men on every troop train to provide regularly free drinks, eatables and cigarettes, organize games and sing songs, and furnish information.
4. Red Triangle free canteen service, information bureau, etc., at each of the 22 Dispersal centres in Canada.
5. Red Triangle Clubs in the principal cities of Canada in the shape of large Y.M.C.A. hostels to furnish bed and board at low rates and to be a rendezvous for soldiers.
6. Seventy-five Secretaries to superintend Red Triangle service in Military Hospitals, Camps and Barracks throughout Canada.
7. Tickets entitling soldiers to full Y.M.C.A. privileges for six months at any local Y.M.C.A. furnished.

In addition to our work for the returning soldiers, we have to maintain the Red Triangle service to the full for the soldiers in Siberia, as well as the work of special secretaries in Northern Russia, Palestine and Poland.

Y.W.C.A.

For the wives and children Overseas, dependent upon Canadian soldiers, and for Y.W.C.A. work in Canada generally, a sum of \$175,000 from the Red Triangle Fund will be set aside for the Dominion Council of the Y.W.C.A., which is caring for the soldiers' women folk, and their little ones on the long journey, from Liverpool to Canada, and is also extending its work for Canadian girls.

For their sake also be generous when you make your contribution.

For Canada's Manhood

The Reconstruction program of the Y.M.C.A. includes the following vitally important developments:—

1. An increased service to 300,000 teen-age boys in the Dominion—the development of Canadian Standard Efficiency training; Bible Study groups; summer camps; conferences; service for High School boys, for working boys, in the towns and cities; for boys on the farm and for boys everywhere, who have lacked opportunity for mental, moral, physical or social development.
2. Inauguration of Y.M.C.A. work in the country, and the smaller towns and villages lacking Association buildings and equipment, on a plan of county organizations. This will include the establishment of Red Triangle centres for social, recreational and educational work among boys and men, in co-operation with the churches.
3. The promotion of Y.M.C.A. work among Canada's army of workers in industrial plants, both in Y.M.C.A. buildings and in factory buildings, organizing the industrial workers of our cities by meetings, entertainments, games and sports.
4. The establishment of the Red Triangle in isolated districts where lumbermen, miners and other workers hold the front trenches of industry.
5. Besides these main fields of increased activity for 1919, we have to provide for enlarged work among railway men, college students and for our campaign to encourage physical and sex education. Under all our work we place the fundamental foundation of manly Christianity.

FOR the sake of our victorious soldiers and their dependents, and the happiness of their home-coming; for the sake of our future citizens, our teen-age boys; for the sake of rural life in Canada; for the sake of the social betterment of the toilers in factory and workshop; for the sake of lonely men and boys in our mines and forests; for the sake of Christian Society and Canadian manhood—we appeal to you. Give us your contribution, little or big. Be as generous as you can.

Hand your contribution to the canvasser when he calls, or if you live where it is difficult for him to call, send it by check, money order or registered letter to the National Treasurer, Red Triangle Campaign, 120 Bay Street, Toronto.

Please Note:

We are not asking for money to carry on our work Overseas, with the Army in Great Britain, France or Belgium. That work will continue at its maximum for some months, financially provided for by the liquidation of our assets Overseas, and will not terminate till the last man has sailed for home.

INSTRUCTIONS FOR PLANTING

(Continued from page 3)

tramp down firmly; fill loosely to proper depth. Where water is not available proceed as described and refer to paragraph "Where water is not available."

Roses for hedge purpose are planted in precisely the same manner as "hedges" except that they are planted in single rows while hedges are planted in double rows.

ROSES—Planted in beds—If stable manure is available excavate to a considerable depth, 18 inches to 22 or 24 inches. Fill in the excavation with manure, spread evenly over the bottom until after it is tramped down, you have a layer of manure from 4 to 6 inches deep; fill in with good soil; if difficult to obtain proper depth, on account of rocks, or hard pan, you can mound up the bed, elevating it above the general surface of garden or lawn; if you plan to use artificial manure, less depth of digging will do but not much less than 1 foot. Roses always have, apparently, poor roots; that is, roses have fewer roots than most other plants; remember this and do not be disappointed when you open your rose bundles, and, on this account, roses require very severe cutting back; do not leave more than four or five buds on the strongest; plant three and some times even two, are better; cut them back and give roses plenty of food and

you will get a moderate amount of bloom the first year they are planted. Plant as directed in above instructions, either with or without water.

Vines and Climbing Roses.—These are often planted close to buildings where the soil is very poor, where this is the case we use

BOX PLANTING.—All there is to this is to use a bottomless box, or tub, and sink it a little, very little, deeper than the surface of the surrounding soil. Fill this bottomless box with the best earth you can get, and where practicable, follow instructions as given for planting with water, otherwise as instructed for dry planting; water occasionally, be careful here, not too much water, and by the time the contents of the box are exhausted, the plant will be established in the surrounding soil.

PROTECTION.—All roses must be protected through the winter if you wish them to do well the following summer; it is neither a very difficult nor a very expensive job. Wait until the ground freezes, then cover the ground with litter of any sort that will keep the frost in; stable manure is excellent if there is sufficient straw in it; after you have done this cover with evergreen boughs or anything else that will not blow away and which will protect the tops from wind and sun shine. In the spring do not remove covering until

there is no danger of repeated freezing and thawing. Rambler, and other climbing roses, are best protected by removing from trellis and laying down on the ground; or you can so arrange that trellis and rose attached can be laid down; they will flower much better if covered like other roses. Vines, the first year or so, require much the same protection as roses. This is especially true of the Ampelopsis Vetchell, Japan or Boston, Ivy but all newly planted vines, are the better for protection during the first winter.

These instructions are issued more especially for the benefit of our city and urban patrons; our country trade is, usually, pretty expert in the care and culture of all kinds of trees. We are glad to afford any needed information to our country customers if they will apply for it.

STRAWBERRY PLANTS.—Strawberry plants are generally shipped in boxes, packed in moss; they will heat if left in the boxes too long; if you cannot plant at once remove the plants from the boxes and place in shallow trench cover the roots with earth but not covering the crown, put in a bunch at a time, not separate plants, water after you have them trenched out and place a board over them to keep off sun and wind, raise the ends of the board enough to allow a circulation of air; brush will do if boards are difficult to get. In

planting be sure not to cover the roots and be sure to cover all the roots; do not put roots into the ground in bunch, spread them out. If ground is dry, water by punching a hole, along side each plant and fill the hole with water. Cover this hole with earth. Once watering in this way, usually sufficient.

SECURITY FOR BONDS

Bonds will be secured by a specific First Mortgage and charge upon freehold and leasehold lands, water powers, timber leases, all plant and machinery now owned or hereafter acquired by the Company, and by a floating charge on all other assets.

Complete prospectus, copies of which will be forwarded on request, contains a letter from Mr. Archibald Fraser, President of the Company, from which we summarize as follows:

- Fraser Companies, Limited**, is one of the largest manufacturers in Canada of spruce lumber and cedar shingles. It also operates at Edmundston, N.B., a Bleached Sulphite Pulp Mill with an annual capacity of 35,000 tons. The business has been in operation since 1877.
- Timber Areas**, freehold and leasehold, in Eastern Quebec and New Brunswick aggregate 1,661 square miles and contain 1,760,000,000 ft. b.m. spruce and cedar, and 4,650,000 cords pulpwood. In addition, 900 square miles of privately owned lands are operated under favourable lease.
- Annual Output** is as follows:
Bleached Sulphite Pulp 35,000 tons per annum
Lumber Production 100,000,000 ft. b.m. per annum
Shingle Production 135,000,000 pieces per annum
- Property Values** securing Bonds \$10,000,000—five times \$2,000,000 Bonds outstanding.
- Net Current Assets**, after deducting all Current Liabilities, as at December 31st, 1918 (including this issue) totalled \$1,594,836.77—over 79% of Bonds issued.
- Net Earnings**, as certified by Geo. A. Touche & Company, for five years, 1914-1918, inclusive, after Depreciation and Bank Interest, were:

1918	1917	1916	1915	1914
\$740,374.37	\$706,355.11	\$432,003.14	\$393,321.04	\$410,267.71

Bond Interest \$120,000 (reduced annually by serial maturities)

Net Earnings given above make no allowance for profit on the Company's investment of approximately \$2,500,000 in its Edmundston pulp mill recently put in operation. Earnings from this source alone during the current year are expected to be several times Bond Interest requirements.

PEAS AND OATS

Oftentimes the failure of the regular hay crop or the necessity for an increased amount of forage is the cause for much speculation in determining a providing for the deficit. As an emergency crop there is none more suitable than a mixture of peas and oats. In fact, it is a valued dual purpose crop with those who have had experience with it since it is equally suitable for soiling, hay silage and grain purposes. The classes of crop, namely peas and oats, making up the mixture are admirably adapted for growing together.

They both have the same seasonal and climatic requirements and mature in about the same number of days. Besides the oats support the pea vines which facilitates the harvesting and curing of the crop.

At the Central Experimental Farm and several of the branch Farms and Station this crop has been utilized extensively as a soiling, silage and hay crop as circumstances demanded. It is usually grown as a catch crop where the hay crop has failed or in a regular rotation of, first year oats crop, second year peas and oats seeded down to clover and, third year, clover hay. Exception may be taken to peas and oats as a nurse crop which is ordinarily justifiable where the crop is allowed to ripen for grain. On the other hand,

where the peas and oats are cut in the green state, thus being removed early in the season, the disadvantage as a nurse crop for clover is practically eliminated. In the experience of the Experimental Farms the stands of clover on areas having peas and oats as the nurse crop, are practically equal to other stands of clover grown with nurse crops of wheat, barley and oats.

The cultural treatment of the soil for a crop peas and oats under regular cropping conditions is similar to that for ordinary grain crops. Fall ploughing, discing thoroughly in the spring until a deep, mellow seed-bed is prepared, proves most satisfactory. Sown as a catch crop where new seedlings of grasses and clover fail, a satisfactory seed-bed may be prepared either shallow ploughing or by thorough discing depending on the compactness and nature of the soil. Older meadows or exhausted sod areas can only be prepared for crop by ploughing and discing. In sowing, ordinary seed-drill is used. The peas and oats should be mixed thoroughly before being placed in the seed-box of the drill and from time to time as sowing goes on the mixture should be stirred with the hand. Otherwise the peas will work down through the oats and be sown first leaving the last part of the seeding almost pure oats. The most suitable proportions of the

mixture are equal parts by weight, sown at the rate of at least 3 bushels per acre. Suitable varieties include Golden Vine and Prussian Blue pea and Banner and O. A. C. No. 72 Oats.

Cutting for soiling may take place before pods form on the pea vines and the oats began to head. Saved as hay, cutting began as soon as pods are formed and the oat kernels are in the milk stage of growth. This is also the most suitable stage at which to cut for silage. If the crop is not required for any of the foregoing purposes it may be allowed to ripen to be harvested for grain. Both grain and straw makes good feed.

The feeding value of pea and oat hay is high, standing very close to alfalfa and equal to red clover. As silage it is excellent, although it yields less and the cost of production is greater than corn ensilage.

This accommodating crop, so suited to varied conditions, is bound to become better known and more highly appreciated on a greater proportion of Canadian Farms

The West Indies wants our fish, our lumber, our flour, our manufactured products. There is a market there for many millions of dollars worth of Canadian goods. Canada wants the sugar produced in the West Indies, the cocoa and the fruits.

THIS WOMAN SAVED FROM AN OPERATION

By taking Lydia E. Pinkham's Vegetable Compound, One of Thousands of Such Cases.

Black River Falls, Wis.—"As Lydia E. Pinkham's Vegetable Compound saved me from an operation, I cannot say enough in praise of it. I suffered from organic troubles and my side hurt me so I could hardly be up from my bed, and I was unable to do my housework. I had the best doctors in Black River Falls, and they wanted me to have an operation, but Lydia E. Pinkham's Vegetable Compound cured me so I did not need the operation, and I am now all my friends' friends."—Mrs. A. W. Buzzer, Black River Falls, Wis.

It is just such experiences as that of Mrs. Buzzer that has made this famous root and herb remedy a household word from ocean to ocean. Any woman who suffers from inflammation, ulceration, displacements, leukorrhoea, nervousness, irregularities of "the blues" should not rest until she has given it a trial, and for special advice write Lydia E. Pinkham Medicine Co., Lynn, Mass.

Municipal Elections was read and on motion received and adopted.

Dr. Armstrong, County Health Officer, addressed the Council urging the necessity for Local Boards of Health to be firm in enforcing the health regulations in cases of small pox.

Council adjourned sine die

Report of Committee re Municipal Elections

To the Warden and Councillors of the Municipality of Annapolis:

Gentlemen—We beg to submit the following resolution: "Resolved WHEREAS—The conditions caused by the war have greatly increased the financial burdens of the Municipality we deem it necessary to avoid all unnecessary expense. Therefore we, your committee believe it in the best interest of the country that arrangements be made to dispense with Municipal Elections for the coming term; thereby saving the county a large amount of money."

W. W. MARSHALL,
F. W. BISHOP,
J. C. GRIMM.

Report of Committee to Government re Bills

To the Warden and Councillors of the Municipality of Annapolis:

Gentlemen—Your committee appointed to consider the communication of Arthur Roberts, Secty-Treas., regarding Bills respecting the right of Towns to be represented in Municipal Councils and placing responsibility for road making upon Municipalities beg to report as follows:

We consider both measures detrimental to the interest of Municipalities and recommend that the views of the Municipal Council be sent to Hon. O. T. Daniels: "The Municipal Council of Annapolis County by resolution passed today protest against the passage of any Act allowing Town's representation in Municipal Councils. Council also condemns passage of any Act placing responsibility for road making in towns upon Municipalities."

Bridgetown, N. S. April 16, 1919

Respectfully submitted
W. W. MARSHALL,
A. D. THOMAS,
F. W. BISHOP.

Report of Committee re Ear Marks

To the Warden and Councillors of the Municipality of Annapolis:

Gentlemen—Your committee to report on the revision of registration of ear marks for sheep and cattle beg to make the following recommendation. We would recommend that the division of the county be as formerly viz the Townships of Wilmot, Granville, Annapolis and Clements, and that one Registrar be appointed for each division. That each registrar on or before the 31st day of December of each and every year file with the County Clerk a copy of all registration made during that year. We would also recommend the Municipality provide suitable books for keeping the records and determining the registrar's fees. We would recommend a fee of 50 cents for all new registration and 25 cents for transfers.

E. SHAFFNER,
I. T. COULSTON,
A. D. THOMAS.
