The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

PREFACE.

THE present Catalogue of the Circulating Library, which is the third which has been issued, comprises all the titles contained in the first and second catalogues with their various supplements, and also the new books received while the catalogue was being prepared.

The number of books in the Central Circulating Library is about 22,000, represented in this catalogue by nearly 50,000 entries.

The Author's Catalogue, occupying the first section, pages 1-193, consists of an alphabetical arrangement of the Authors, and a further alphabetical list of their works under the name of each author.

Works of Fiction are further catalogued under the title of the book.

Anonymous books appear under their respective titles.

In the case of books published under a pseudonym, cross-references are given, as far as possible, to the correct name of the author.

Authors' names printed between brackets, thus [Preston], indicate that the book was published anonymously.

In the second section, pages 195-342, the titles are arranged under subjects, a key to the arrangement of which will be found on page 5.

All biographies appear under the names of the persons of whom they are the subject. Thus, "Boswell's life of Johnson" will be found under Johnson.
