The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

Queen's University

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

PREFACE.

The Canadian Society for the Prevention of Cruelty to Animals solicits the sympathy of the citizens of Montreal with the humane objects the Society has in view, and hopes many will become annual subscribers to its funds.

The friends of this useful and benevolent work must feel that it cannot be carried on without means. With their present income they have engaged two Inspectors, but more could be employed with advantage.

Intending members will kindly enrol their names at the Society's Office, 189 St. James Street, (Canada Life Building,) or at 219 St. James Street, where all information of its objects and works can be obtained.

ANNUAL MEETING.

The Twenty-Ninth Annual Meeting of the Canadian Society for the Prevention of Cruelty to Animals was held in the Long Room of the Mechanics' Institute on Thursday, the 20th January, 1898, at 3 p.m.

Among those present were : Messrs. Chas. Alexander, J. H. Joseph, R. R. Grindley, F. Wolferstan Thomas, Randall Davidson, Jas. Torrance, F. B. McNamee, Lieut.-Col. F. C. Henshaw, Lieut.-Col. E. A. Whitehead, J. Philip Scott, Rev. T. Harris, L. McI. Spackman, Capt. J. B. Clay, I. H. Stearns, J. P. Cleghorn, Geo. Durnford, Edouard Surveyer.

The President, Mr. Charles Alexander, having taken the chair, called the meeting to order, and requested the Secretary to read the notice calling the meeting, which, having been done, on motion, it was

Resolved : "That the minutes of the last Annual Meeting having been printed and distributed, be taken as read."—Carried.

The President said that Messrs. H. Tikeman and John Crawford, being unavoidably absent, desired him to express their regret.

The President requested the Secretary to read the Report and Statement, after which he moved, seconded by Mr. F. Wolferstan Thomas :

That the Reports and Statements as read be adopted. Before putting the motion, he would be glad to hear any remarks.

Mr. F. Wolferstan Thomas said he noticed that a legacy of \$180 net had been received by the Society, and he thought that all monies so left should be invested, which was approved.

In reply to a question, the Secretary stated that there was about \$750 already invested, proceeds of a legacy left the Society prior to the receipt of the present one.

The report was then adopted.

Mr. J. H. Joseph moved, seconded by Lieut.-Col. Henshaw :—

That all monies received from legacies be invested for the Society.—Carried.

It was also suggested that in future a form for bequests to the Society be appended to the Annual Reports.

The President requested the Secretary to read the amendment to the Constitution prepared for the sub-Committee on Branches by the Solicitors, Messrs. McGibbon, Casgrain, Ryan, Mitchell & Surveyer.

The question of liability having been asked, the Secretary replied that Mr. McGibbon's firm had also prepared a letter of indemnity, which the parties forming the Branch would be expected to give, so as to hold the Parent Society free from any expense the Branch might be involved in.

Mr. J. P. Cleghorn moved, seconded by the Rev. T. Harris :—

That the resolution be referred back to the same Committee with power to act in the premises.—Carried.

Mr. J. Philip Scott moved, seconded by Mr. L. McI. Spackman :—

That the thanks of the meeting are due, and hereby tendered to the President, Vice-President and Executive Committee for the care and attention given to the work of the Society, and that the following be elected for the ensuing year.
Carried :—

Stikeman, Ed. Surveyer, Jas. Torrance, Lieut.-Col. E. A. Whitehead.

Mr. Chas. Alexander and Mr. F. Wolferstan Thomas returned thanks, and Mr. Thomas said that a great deal of the active work of the Society was due to the advent of younger men, prominent among whom was Mr. Geo. Gillespie, and who, he regretted, was at present absent from the city.

It was suggested that much good could be accomplished if some of the leaders of the clergy could be got to become Patrons of the work, to which end Mr. Charles Alexander and Mr. F. Wolferstan Thomas were requested to wait on the Roman Catholic Archbishop and the Bishop of Montreal, as representing the Roman Catholic and Protestant Churches, and ask them if they would become Patrons. Messrs. Alexander and F. Wolferstan Thomas would kindly consent to carry out the wishes of the members.

The meeting then adjourned.

ANNUAL REPORT.

The Executive Committee of the Canadian Society for the Prevention of Cruelty to Animals have the honor of presenting to the public and friends of the work the Twenty-Ninth Annual Report for the year ending 31st December, 1897.

The statement of the Inspectors' work shows that they have been actively engaged throughout the year, and the number of cases that had their attention

exceed the preceding year by 725. This is, no doubt, due to the Society having been able to employ, during a greater part of the year, four Inspectors. The staff is at present somewhat reduced, as the vacancy created by the departure of Mr. C. L. Kobold, a most efficient officer, to Newhatcom, has not yet been filled, but the Committee expect to obtain a suitable person ere the opening of spring.

The year, the Committee are glad to report, has not been signalized by remarkable cases of brutality, and even the increase in number is due to the fact that the increased staff give the Society the power of more closely patrolling the city and also the zeal of officers as well as their prudence is commendable, much has been accomplished by judicious instruction. The Committee are pleased to be able to report that in addition to the small troughs placed in various parts of the city, and, as heretofore, kindly kept filled and clean by sympathizing friends, the large watering trough, placed on the Upper Lachine road, has proved such a general comfort to those travelling the road that the Society has been requested to have one placed on the Longue Pointe road, some of the residents of which volunteer to have it cared for if one is provided.

The Society have again issued calendars inculcating humanity to animals, the workmanship of which is entirely Canadian. These are, as in former years, distributed among the schools and other public places.

The amendment in the laws relating to the S. P. C. A. which it is proposed to have introduced to the next session of Parliament, copies of which have been sent to Veterinary Surgeons and others interested, has met with general approval from almost all parts of the Dominion.

The Committee are pleased to report that in addition to the Branches and Agents already established, an Agent, Mr. J. P. Sherfirt, has been appointed at Knowlton, also a Branch established at Sherbrooke, with Mr. Wm. Farwell, General Manager of the Eastern Townships Bank, as President, and, no doubt, will be of much good in these neighborhoods in connection with these Branches and to facilitate working of same amendment to the Constitution will be submitted for your approval and confirmation.

The Committee has to deplore the death of one of its most valued and zealous members, Mr. W. G. Murray, who, during his life, was one of the most active members, and who provided for the carrying on of the work by leaving the Society a legacy of \$200, which has been received from his executors, less the Government duty.

The Committee have to thank Mr. Lucien Forget for valuable services rendered the Inspectors.

The thanks of the Society are hereby tendered to the *Montreal Star, Gazette, Herald, La Presse* and *Witness* for recording subscriptions and the work of the Society, and to its Honorary Counsel, Messrs. McGibbon, Casgrain, Ryan, Mitchell & Surveyer, and to Mr. J. L. Marehall, Honorary Veterinary Surgeons McEachran, Baker & McEachran, Dr. O. Bruneau, V.S., for gratuitous professional services kindly and freely rendered, also to Lieut.-Col. Hughes, officers and men of the police force.

JOHN E. FLETCHER,
Inspector.

MONTREAL, 19th January, 1898.

MR. GEORGE DURNFORD
Secretary S. P. C. A.

DEAR SIR,—To me it is very pleasing to see the beneficial influence which the Society exerts on the drivers of horses these days.

Their general conduct towards man's noble assistant (the horse) has very much improved : so much so that I have noticed the kind word and clap on the neck now frequently take the place of the whip of former years.

The master carters now appear to have found out that it is the best policy to employ men who will be kind and patient, instead of, as formerly, reckless young fellows as drivers.

The exemplary punishments meted out by the Police Magistrate have also had a deterring influence on the naturally cruel and careless.

Continual watchfulness for and reproof of those who are unkind to God's creatures is necessary by Inspectors and others interested in the Society's work on the streets.

Overloading is the worst feature on the Mountain street district, at present by ice teams, poor animals badly matched. These men are hard to handle, being chiefly from outside municipalities, and carry no numbers, so cannot be reported to the regular Inspectors at the office.

Your Honorary Inspector gladly reports prompt attention by the Street Inspectors to all cases brought to the attention of the office by him.

But "eternal vigilance is the price of existence," and if this Humane Society is to be a means of real and lasting good, it should develop and keep abreast of the work, by being fearless in prosecuting all cases when the law is violated, and yet kind and patient towards first offenders.

Much of our work is caused by unfeeling ignorance on the part of the drivers, and if the bit and bridle could be exchanged for a day, a good deal of wisdom would be imparted.

Respectfully submitted,

Yours truly,

JAMES R. DICK,
Hon. Inspector.

CONSTITUTION.

1. The title of this Society is "The Canadian Society for the Prevention of Cruelty to Animals."
2. Its objects shall be to provide effective means for the prevention of cruelty to animals, throughout the Dominion of Canada.
3. Any person may become a member of this Society by paying the sum of three dollars, ladies and clergymen two dollars, children under sixteen years of age one dollar, as an annual subscription. The name of the member neglecting for one year to pay the subscription, or at the time wholly refusing to pay, may be erased by the committee from the list of members. The committee may from time to time elect patrons and honorary members.
4. The committee, consisting of thirty members, who shall manage all the affairs of the Society, shall be elected at the annual general meeting of the same on the third Thursday in January. They shall appoint from among themselves a president and secretary-treasurer, who shall be *ex-officio* members of the committee and may also, from time to time, appoint such other officers and make such rule, or By-Laws as they may think fit, provided that these rules be not inconsistent with this constitution. They may also fill any vacancies that may occur in any officers of the Society.
5. The annual meeting of the Society shall be held on the third Thursday in January, when the out-going committee shall present a general report of the proceedings of the Society, and an abstract of the state of accounts and general concerns of the Society up to the 31st December previous, and the committee for the ensuing year shall then be elected by ballot or nomination, as may be decided upon at the meeting.
6. A special meeting of the Society may be held at the call of the committee, and shall be held upon the written request of ten members of the Society, due notice of the meeting being given by the Secretary-Treasurer.
7. At all meetings of the Society nine members present (who have paid their subscriptions) shall constitute a quorum. Five members shall constitute a quorum at meetings of the committee.
8. Any article of this constitution may be altered, amended or suspended for any length of time by consent of two-thirds of the members present at a meeting specially convened for that purpose, provided that such alteration, amendment or suspension shall have been specified in the notice summoning the meeting. A week's notice shall be given of a meeting for such purposes.
9. The constitution shall be printed and a copy thereof, with a list of the committee, shall be delivered to every member, but no one shall be absolved from the effect of these rules on any allegation of not having received them.

SUGGESTIONS TO INDIVIDUALS WHO SEE OR HEAR OF ACTS OF CRUELTY TO ANIMALS.

As a general rule, the eye-witness, or a person informed of any act of cruelty to any animal, should furnish the Secretary-Treasurer of this Society, as soon as possible, with full and precise particulars of the act. That officer will institute the proper inquiries, and with sufficient evidence, conduct the prosecution without expense to the witness or complainant, and without his assistance, unless the latter is necessary to the conviction of the offender. (The names of persons and letters supplying information are kept STRICTLY PRIVATE AND CONFIDENTIAL when secrecy is enjoined.)

In all cases persons are requested to obtain the NAME and ADDRESS of the offender [his NUMBER and date of same also, if the driver of a vehicle plying for hire].

The following excellent directions given by the Royal Society, London, should also be pursued: "Make a note of the time when, and the place where, the offence was committed. If for driving a horse or other animals with galled neck or shoulders, or other wounds, note the size and situation of such wounds, and especially whether they are raw, discharging, or in contact with the harness; if for flogging or beating, note the number of blows, and on what part of the body inflicted, and the effect, if any, on the skin of the animal; if for lameness, ascertain PARTICULARLY whether or not there is suffering, as lameness is not always an indication of pain; if for weakness or infirmity, take care to have good evidence of the bodily condition, age, and incapacity of the animal and the labor extracted from it; if for overloading, it is indispensable to show painful distress of the animals, e.g., trembling, falling, unusual perspiration or exhaustion, or to show violence on the part of the drivers; if for mutilation or any other torture, observe minutely and take down in writing the precise character of the same in detail. It is important also to remember the exact words of accused when stopped, which frequently amount to an admission of guilt. In every case, if possible, obtain the name and address of a respectable witness willing to give evidence. If unwilling, such witness can be summoned to give evidence."

It is sometimes advisable that the eye-witness of an act of cruelty should give the offender at once into the custody of a policeman or constable. This summary method should be adopted only when the case is one of gross and undoubted cruelty, and when the offender is not a resident of the place and will not give his name and address, or when, in the case of a resident or non-resident, there is reason to believe that he is not giving these truthfully or that he will evade a summons or will abscond. In any of these cases the eye-witness of an act of cruelty may direct the attention of a policeman or constable to the offence and request the latter to do his duty.

It is earnestly hoped that the personal inconveniences arising out of proceedings to protect animals from the outrages of cruel persons will not deter friends of humanity from co-operating with the officers in their efforts to promote the object of the Society.

The Society would impress upon Master Carters, Coal and Wood Merchants, and others, the importance of not employing young lads, under the age of fourteen years, as drivers of loaded horses, both from their inability to assist the animal when backing or on hilly places, and the thoughtlessness natural to youth, which frequently leads to racing the horses and using the whip unnecessarily.

In respect to overcrowding cars and busses drawn by horses and mules, the Society has to point out that, until a law like that of England, limiting the number each vehicle may carry, is enacted, the Society is powerless to prevent overcrowding. This has been demonstrated by the test case the Society brought being dismissed, and, until the law is altered, it remains for the members, by precept and example, to abstain from overcrowding cars or other vehicles going up hill.

Another cruelty the Society would gladly see stopped is the one of the cruel overhead check-rein. The discouraging of the use of it is earnestly commended to the members and friends.

It has been pointed out that many horses are ruined by rusty nails, glass or other substances running into their feet. Very much of this evil could be avoided if householders and storemen would exercise a little care and see that the rubbish emptied into lanes and street is free from rusty iron or other substance likely to cause injuries to animals.

Attention is also called to the following existing cruelties, pointed out by the American Humane Association of Chicago:

Animals in freezing and starving condition, in exposed localities on the Western plains, in the winter season.

Animals so horribly burned on their bodies, through careless branding, as to make wounds that never heal.

Animals severely wounded and tortured by clubs and long, sharp, iron prods, when being loaded on stock-cars.

Animals so cruelly crowded, trampled, starved, and kept without water, when transported long distances by rail to market, as to make their meat unfit for food.

Horses compelled to endure excruciating torture by the over-check and other high check-reins, through the ignorance and pride of thoughtless drivers.

Dogs and cats driven to desperation and madness for want of water.

Horses ruined in health and limb through being over-loaded, lack of food and improper feeding.

Old, galled, crippled horses, ill-fed, over-loaded, and generally abused by hard masters.

Cows compelled, through the penuriousness of their owners, to run the streets, in many cities and villages, quenching thirst from mud-puddles, pounded by clubs, beaten by stones, and mutilated by dogs, when driven from yards into which the animals forced themselves because of hunger.

Calves with feet tied and tortured, while being transported long distances, in distressed position, over rough roads, by butchers and others.

Fine horses outrageously high-checked and brutally over-driven by drunken, careless and cruel drivers.

Pigeons wantonly wounded, mutilated and allowed to linger hours before death comes to their relief, at shooting tournaments.

Horses left standing in exposed positions, through severe storms, without covering.

Beautiful song and useful birds needlessly slaughtered by men and boys for sport.

Insects, birds and animals, of various kinds, cruelly put to death by thoughtless persons, when a little care would make death less painful.

The cruelty and savage instinct aroused by pugilism, cock and dog fighting.

CARE OF ANIMALS IN WINTER.

Do not compel domestic fowls to roost in trees. Aside from danger of being captured by owls and other enemies, the swaying of the branches upon which they are sitting will prevent them from getting rest; while in the severely cold weather, thus exposed, feet and combs are frozen and the bird is so benumbed as to make it impossible for it to be of much profit on the farm. Securely sheltered from wind and storm, and allowed to sit on a broad roost, feet are thus kept warm, refreshing rest is obtained and the fowl is much stronger, healthier and more profitable to its owner.

Do not clip horses during the winter months. With the same propriety we might cut the hair from a dog or shear a sheep at this season of the year. The argument in behalf of the practice is that the horse in perspiration will dry more quickly if the hair is short. If the animal is thoroughly blanketed and kept in a sheltered or warm place, after being driven, no danger results from perspiration, whatever the length of hair; while the horse that has been deprived of its coat in the winter time suffers perpetually while being exposed to the cold. It is cruelty

inflicted upon beautiful carriage horses for the purpose of style. Happy is the ordinary work-horse in the winter time, for, however much it may perspire, it is allowed to carry its full growth of hair during the cold weather.

Do not leave cattle to stand shivering, while extremities often freeze, in the snow storms and severe winds of winter, when a little time would suffice to construct of boards, rails or poles, a support upon and around which may be placed hay, straw or weeds, thus making a shelter that may comfortably protect them. Cattle kept in fairly warm condition throughout the winter will, as milkers, give a larger and better yield of milk, and as beeves will take on flesh much more rapidly than if left exposed to inclement weather.

Aside from a question of humanity, the more attention and care that is bestowed upon animals, with a view to their comfort, the more will they be of service and a source of profit to their owners.

CARE OF ANIMALS IN SUMMER.

Provide water—fresh, pure water. Think, reader, how you are refreshed by a drink of cool water on a hot day. The lower animals are equally in need of the means of quenching thirst.

The active dog requires drink frequently during the hot day, as does also the cat; and a dish of fresh water should stand where they can have access to it. Undoubtedly many a dog is driven to madness through lack of water; and the testimony is that hydrophobia is almost unknown in those localities where dogs can drink when they wish.

Every city, village and country town should be liberally supplied with drinking fountains for animals, and they should be so constructed that even the smallest dogs can drink from them. No gift to a people confers a greater pleasure than a fountain, and that person who turns aside a stream from the field and gives a watering trough to the roadside, or provides a fountain at which man and beast can drink pure water, is truly a public benefactor.

Give the horse frequent opportunity to quench thirst at times when not too much over heated, and before eating. To drink freely immediately after eating prevents a favorable digestion of food.

Provide shade. How instinctively we seek the shadow when the sun is pouring its hot rays on the dry and parching earth. If the pasture is not provided with shade trees, in a convenient locality, set four, six or eight supports, across which place straw or grass, and thus, in a brief time and with little labor, make a shade in which animals can rest from the heat of the sun, to the great comfort of themselves and benefit to their owners.

Remove the harness from the horses in the hot day whenever you desire to give them a full, free rest, and once during the day, preferably at night, a thorough currying and grooming will not only give rest, but will do about as much towards improving the animal's condition as will the oats.

Examine the harness on your working team, and you will discover that blinds, check-reins, and cruppers, are simply torturing contrivances, serving no useful purpose. Take them all off for the convenience of yourselves and the comfort of the horses. Keep the stable well ventilated and free from the strong ammonia, which is injurious to the eyes. Assist the animals to protect themselves against flies, feed regularly, hitch in the shade, and remember that the care which will give comfort to the lower animals will make them doubly profitable to their owners, aside from the humane bearing upon the subject.

HOW TO MERCIFULLY KILL HORSES, DOGS, AND
OTHER ANIMALS.

THE HORSE.

Shooting.—Place the pistol muzzle within a few inches of the head, and shoot at the dot, aiming towards the centre of the head.

Blows.—Blindfold, and with a heavy axe or hammer strike just below the forehead at the point indicated in the present cut. Two vigorous well-directed blows will make death sure.

Be careful not to shoot or strike too low.

THE DOG.

Shooting.—Place the pistol muzzle near the head, aiming a little one side of the centre of the top of the skull, and shoot downward at the dot, so that the bullet shall go through the brain into or toward the neck.

Do not shoot too low, or directly in the middle, because of thick bones.
