President Says U. S. Cannot Recognize Settlement Based on Secret Treaty or Coercion---Premiers Point Out Jugo-Slavia Gains More Than Under Original Proposal.

UNABLE TO UNDERSTAND HIS ATTITUDE

Washington, Feb. 26.-President Wilson, in his reply to the British and French premiers on the Adriatic question, adheres to his previous decision, that unless the terms of settlement are returned to the provisions of the agreement of Dec. 9, he "must take under serious consideration" the withdrawal of the treaty of Versailles and the French alliance from the senate.

J. M. M. Grieg Reviews Proposed Scheme Before Engineering Institute.

J. M. M. Grieg of the York Township offices gave last night, in the rooms or the Engineering Institute of Canada,' a most interesting lecture on York township sewerage scheme. To complete the whole or the proposed plan would cost, Mr. Grieg said, something an acequate basis.

When Mr. Rollo made his announcement to The Hamilton Herald, he must have been passing his opinion merely on the draft of the bill as prepared by Dr. Riddell, and if you will observe, you will not that the Labor members when they put has Triesday made some decided that the strucked with the practice at once, but if the ratepayers approved, a portion of the around \$10,000,000, but, of course, it nnd that the Labor members when they met last Tuesday made some decided changes, which will greatly improve the bill and make it more workable. It becomes more and more apparent that it was a mighty good thing that a few of us took the initiative a few months ago and demanded that the Labor group should convene separately, and that all our measures should be based on the collective judgment of those elected to represent the people. near the Humber river, west of Weston road, and the other near Grenadier Pond, to take the drainage of Swansea district.

The cost of the Swansea section would be \$1,256,000; East York, \$2,357,-000, and the west end of the township \$6,000,000.

Amendments to the building bylaw were adopted, the chief change being the provision that all residences erect ed in the township must have a side entrance.

BOTTLING FACTORY

Fire of an unknown origin last night totally destroyed a frame building on the west bank of the Humber river, quarter of a mile north of Bloor street. The building was being used as a bottling factory by the Purity Springs Company, and was a wellknown landmark on the Humber. The fire was first noticed at 6.40 p.m., but altho the Keele street station fire reels were called out, it had gained too much headway, and the dry wood burned like tinder. The blaze was seen for miles, and lit up the sky for an hour. The cause is not known, nor has the loss been given out by the owners, except that the structure was burned to the ground.

Sir Herbert Ames Resigns

Portestant Committee Post

Quebec, Que, Feb. 26.—(Canadian Press.)—Sir Herbert Ames has resigned from the Protestant committee of the council of public instruction. His retirement is no doubt due to his connection with the leasue of the continued shortage of newsprint they are obliged "until further held its first annual seed fair in the tewn hall today. Considering the Screat amount of sickness in the locality, the had roaus and the inclement weather conditions the attendance was large. The quality of the exhibits was good and competition keen in nearly all of the lineteen classes. Some of the principal pize winners were: J. J. Balsdon, W. J. Demmett, James Carrol, George Rob., E. Honeberger, and R. J. Johnston. The judges were Prof. Squill of the O.A.C., and J. C. Steck.

RETAIL CLOTHIERS SEEK AMENDMENTS

Delegate to Approach Major Duncan on Profits Question.

Yesterday was the last and also the busiest day of the Ontario retail clothiers' convention. In addition to the morning session a committee, headed by R. F. Fitzpatrick, was delegated to wait on Major Lewis Duncan, of the board of commerce, regarding amendments to the board's clothing order fixing merchandising profits. The clothiers asked exemption on all gross profits up to 50 per cent on the cost price, or 33 1-3 per cent on the selling price. They are now allowed to "mark up" their goods to the extent of 26 per cent, of the selling price, and claim that this does not allow a fair that the cost net profit. They assert that the cost of selling is, in many cases, 30 per cent of the selling price, but they were unable to convince Major Duncan that a business properly conducted would cost this amount. The matter will be brought up before the heard

The privilege of averaging up certain goods was granted to the clothiers as follows: Where a certain grade of clothing has been purchased and it later becomes necessary to fill in certain sizes, for example, and an increase has occurred since the first purchase, that the material previously purchased be added to that last acquired, and an average price be fixed for all.

the afternoon session President Ed. Mack, who occupied the chair, spoke strongly against the use of silk in the lining of men's coats or suits. He said that a quarter-length lining of silk in an overcoat costs from \$1 to \$3 more than an ordinary lining and lasts less than one-third as long. Mr. Mack recommends that its use be discouraged by all clothiers as wasteful extravagance. He urged that the public be educated to the fact that althe it is attractive it is a poor and

CITY HALL NOTES

Issuance of bonds for non-essential purposes should be discouraged said Commissioner Bradshaw yesterday, when he agreed with the new government regulations to this effect. He believed that not only cities and oner nunicipalities should conform to this regulation, but that it would best serve the interests of the public to have private corporations accept the rule. Rate-payers today, said the finance commissioner, get only half value for their money, and high interest was the order of the day.

City Solicitor Johnston has advised that the city council cannot legally withhold salaries to the school teachers of the city. This means that no further opposition will or can be made to the recommendations of the board of education relative to increased salaries to the teachers.

Specially important is the special meeting of the city council called for next Monday afternoon to consider the question of police courts in Toronto which Alderman Singer desires to be subject of thoro investigation. The alderman secured the following fifteen names hecessary to call a special meeting: Controller Ramsden, Controller Gibbons, Alderman Risk, Alderman (Mrs.) Hamilton, Alderman Whetter, Alderman Phinnemore, Alderman Maxwell, Alderman Ryding, Alderman Nesbitt, Alderman Sykes, Alderman MacGregor, Alderman Singer, Alderman Honeyford and Alderman Baker.

Consideration respecting the estimates for the registry office for the current year, amounting to about \$20,000, was deferred.

Among other things the committee of works yesterday afternoon recommended that six months' pay be given to Mrs. Fuseley, widow of the late foreman of the crematory. Faithful employes who have been laid up very ill have been recommended for three months' pay.

Controllers Gibbons and Cameron for once were as one undivided unit yesterday. This happened regarding the matter of cutting down estimates. They both agreed that it would be the acme of wisdom to give the whole board responsibility for any items cut off any estimates presented. Controller Maguire on the other hand pointed out that so far as he was aware the citizens desired to lower rather than increase the mill rate. Controller Gibbons, replying, stated that after a while Controller Maguire would place responsibility upon guire would place responsibility upon other members of the board relative to any unpleasant cut made.

ARGUMENT RIFE **BETWEEN RIVALS**

Great Industrial Battle Being Waged Between Trades Union Organizations.

William O'Brien yesterday afternoon showed a receipt to the offices of the Canadian Federation of Labor for twenty dollars, payment of per capita dues upon a hundred members of his organization, the Canadian Union of Portable and Hoisting Engineers, and sent in to the federation offices a few days ago for the month of January-February. He stated that his fully paid up membership today was 104. Comrade O'Brien (he has seen service on the firing trench in Picardy) stated that he would willingly refute a statement appearing both in a Toronto evening paper and in The Industrial Banner to the effect that non-union men had been refused jobs in the United States cities because they were unable to produce international cards. The facts were, he said, and names could be produced to support his own statement, that international hoisting engineers from Canada who were able to produce their international cards were refused permission to work because international unions in many cities in the United States were absolutely closed shops. howed a receipt to the offices of the Canadian Federation of Labor for twenty

GIRLS AS MECHANICS.

Robert Troman, well known in labor circles, yesterday afternoon, in an interview with The World, expressed the opinion that mechanics these days was becoming more and more a species of manual labor, with the factor of real honest-to-goodness skill of the old days much eliminated. He stated that machinery of today was so complexly fashioned yet so easy to manage that girls and apprentices were enabled to turn out engines, machines and automobiles which only the most highly skilled men would have been able to turn out 40 years ago. Wilson's Note of Protest. President Wilson's note of January 19, in protest to these arrangements, asked whether it was "the intention of the British and French governments in the future to dispose of the various questions pending in Europe and to communicate the results to the government of the United States,' adding that Clemenceau and Lloyd George must realize there were features in the proposed Fiume settlement which could not be acceptable to the United States government. Rocking the Boat.

Strange signs appear of a threatened disruption of what Canadians have been taught to regard as their birthright of representative and responsible government. Ministerial and parliamentary accountability has been weakened by the repeated delegation to commissions of executive powers that were unknown a few years ago. Organizations of persons with no electoral sanction behind them have been encouraged, in effect, to mock responsible government, and to make a shadowy thing of constituted authority. In substantiation of this view look at what has happened with regard to revising the educational system of Ontario, and the right of citizens to buy and sell foreign securities.

Premier Drury has brought a nest of U.F.O. and other hornets about his ears, as a consequence of listening favorably to a unique proposal by the Massey Foundation, in disclosing the main facts of which The World is entitled to believe it has rendered an acceptable service to the public.

The Massey Foundation is as entirely admirable an institution within its proper limits, as the Massey-Harris Company is in the business field. But the Massey Foundation, with intentions every whit as good as those with which the road to everlasting disaster is paved, has endeavored to start a responsible government on the road to a break-up of the very fundamentals of responsible governernment's virtue of public economy liament and endorsed by the King? by proposing to pay all the commis-

sion's expenses.

However sweetly it was done, the effect of the proposal was that the representative government of nearly three millions of people was asked to simple corporation was to assume the primary responsibility for revising a public educational system, and was to show the government how to spend money to public advantage.

A more singular usurpation of the basic functions of representative and responsible government has never been tried. The closer it is examined the more extraordinary does it airpear, and the more amazing is the confessed first attitude of Premier Drury towards it—an attitude which the instinct of other U.F.O. leaders, as soon as they heard of it, immediately told hem was that of a statesman not wide awake at the democratic switch.

Without here elaborating the several statements given to the press by Premier Drury and Col. Vincent Masaccount of the negotiations for the commission as "a pipe dream," or decent to intimate that some breach of the Ontario temperance act was responsible for what was published.

It is enough to say that Mr. Drury has since admitted that he was at first favorable to the Massey proposal, that the commission, as given in The unprecedented innovation could have person of average political common- ister of finance wait for parliamentary commission could only have been con- before inviting the bond dealers and to normal would arrive, but stated veyed by somebody who not only knew financial interests to announce that the all that had been done, but who him- government of Canada is in a secondself felt certain that the premier, to ary position to themselves? all intents and purposes, was committed to its acceptance.

The admissions of the premier and Col. Vincent Massey are ample proof of how an ingenuous adventure of rocking the boat of responsible government would have upset it, but for the praiseworthy recognition by Mr. Grant of the dangers inherent in the rockers' ideas.

Of course, the Massey Foundation had no idea that it was trying to turn the ark of our covenant upside down. But that it was making the effort in good faith shows that very strange notions are abroad among what it is becoming the fashion to call the intelligentsia, and how sharply a government, presumed to be green because it comes from the landowners of the province, must watch against the manifold innocences of "slipping one

Turn now to another remarkable exampje of how the proprieties of democratic government are confused, and their confusion advertised, by those who should know better. Here are sentences from yesterday's news:

All trading in stocks, bonds and other securities from outside Canada stops today in this country. At the request of the minister of finance, Sir Henry Drayton, this drastic action has been taken by Canada's financial interests to protect

the home security market. The bond dealers and stock ex-changes have been in conference today with regard to the proposal of the minister of finance and have reached a decision to grant the minister's request and to co-operate to the fullest extent.

What form of government is this? Under what act of parliament does the land if the examples afforded by Tominister of finance make a request ronto and Ottawa on the eve of the touching the age-long freedom of the meeting of legislature and parliament people which bond dealers and stock are of any significance? THAT is why I am here. That is why the others are here. In my younger days I made plenty of money. But it was a case of 'easy come, easy go'. If I had only formed the habit of putting something away out of my earnings I would be comfortable and independent today."

A pathetic story this, told in bitterness by an inmate of a home for dependent poor—a man, old and penniless because of a bad beginning in life.

It is a story of wilful neglect and disregard for the future. In its main essentials it is the story of a vast number of men-men thoughtless and short-sightedmen who blindly refuse to consider to-morrow seriously.

All about us we see these men. The evening of their lives is a time of drudgery, if not of humiliation. They pay a heavy price for the folly of a wasted youth.

Premier's Reply.

M. Millerand, who had succeeded Clemenceau as premier of France, and Lloyd George replied under date of Feb. 17, saying there was "no foundation for the assumption that the new settlement involves a capitulation to the Italian point of view as opposed to the Jugo-Slavs." They summed up President Wilson's criticisms of the new agreement under four points: That it ceded to Italy the corridor; that the corridor, with Flume as a free city, paved the way for annexation to Italy; that the modification of the Jugo-Slav-Italian frontier was detrimental to Jugo-Slavia, and that it provided for the partition of Albanía.

The premiers remarked that President Wilson had "ignored the great advantage conferred on Jugo-Slavia at the same time." In their discussions they had found, they said, that "nobody desired the consummation of the free state of Fiume," and that "the net upshot" of the agreement was to give Jugo-Slavia 150,000 more Jugo-Slavs than the original proposal. The premiers argued that the guarantees of the league of nations were sufficient to guard against the annexation President Wilson feared, and his criticism of Italian domination of the rallway they replied to by holding

the annexation President Wilson feared, and his criticism of Italian domination of the railway they replied to by holding it "a commercial, and not a strategic, railway," and adding that "under President Wilson's proposals it is commanded by Italian guns."

Administration of Albania.

Details of the administration of Albania, they said, were yet to be elaborated and the "feelings and future interest of the Albanian people," were to be regarded. The premiers found "difficulty in understanding the present attitude of the United States," and hoped their explanations would lead to a reconsideration of President Wilson's attitude. They disclaimed any desire "to force a settlement unacceptable to the president of the United States," and added they would not attempt to insist on its acceptance until after hearing his views.

-8 p.m.—The Atlantic storm has passed they will not wreck the whole machinery for dealing with international disputes because their view is not adopted in this particular case. France and Great Britain cannot believe that it is the purpose of the American people to take a step so far reaching and terrible in its effects on a ground which has the appearance of being so inadequate." This was the conclusion of the reply of the

London, Feb. 26.—The allied supreme council tonight despatched to Washington its answer to the note of President Wilson on the Adriatc question, received yesterday. The reply was completed during today's session of the council.

The answer to President Wilson was drafted without the presence of Premiers Lloyd George and Millerand. Mr. Lloyd George was engaged this morning in preparing for the Turkish debate in the house of commons this afternoon, while M. Millerand was hurriedly called home because of the French railway strike. The premiers, however, had already given-their conferees their ideas on the subject.

The council members, it is said, believe their reply will end the present controversy. President Wilson's last note is represented as having been written in a conciliatory tone and not difficult to answer.

the open side and closed fast and beat Sulivan.

U. T. S. nailed down the fast Stratford line. Carroll sent them out to stick to their checks. They did it and that tells the first period story.

Aggett and Munro were great. The fermer poked away the puck from his man time after time, picked it up like a flash and was away, wiggling well in before testing McLeod. Munro used his body on the defence, broke fast and worried the Stratford defence with his rushes and hard shots.

Rowell bodied like a major, and it was a very pleasing twenty minutes for the Toronto supporters. Stratford, a big, fast team, had speed, combination and checking ability. They were smart as traps inside and needed close watching. Stratford perhaps overdid the passing. Outside of that they were great, and all the more credit to U. T. S. It was different in the second period. Stratford opened with a burst of speed that dazzled the Varsity school, and U. T. S. were battling like Tigers in their own corner, and little Joe Sullivan was the busiest buttle like Tigers in their own corner, and little Joe Sullivan was the busiest buttle like Tigers in their own corner, and little Joe Sullivan was the busiest better the second period. that dazzled the Varsity school, and U. and the home crew had a dash that will spell trouble for anybody. Kelterborne broke away, raced down and passed over to Lavette right at the net for the first counter of the period. In came Stratford again, Sullivan came out to save from Kelterborne, and Carson picked up the rebound and had the empty net to drop the puck in. Plaxton poked away the puck from Carson, worked down and shot from the side. The puck crossed the line, but the goal umpire never raised his hand. The referee was on top of the play and ruled

side. The puck crossed the line, but the goal umpire never raised his hand. The referee was on top of the play and ruled it a goal. Kelterborne got the last goal of the period from the corner. U. T. S. staged a come-back, got down to the checking again and easily held their own for the last five minutes. Munro opened up rush after rush, but had no luck. It was Stratford's period by a good margin. The third saw even a bigger margin for Stratford. They broke down the U. T. S. attack with a withering check. In tore Stratford three at a time, and the net result was four goals, with the Toronto school drawing a blank.

Munro opened up several corkscrew rushes, but couldn't get one into the net. The final was 8 to 2.

OLD CANADIAN ATHLETIC CHAMPION DIES IN JERSEY

Princeton, N.J., Feb. 26.-A Canadiah who made athletic history died here this week in the person of George Goldie, Princeton U.'s first physical director. He was born in Montreal 78 years ago, and was born in Montreal 78 years ago, and was widely known in Canadian athletic circles, having held the five and three-year all-around championship titles of the Caledonia Club of Canada, as well as of the United States, from 1869 to 1885. Tho identified with Princeton and a resident of this city for many years, he made frequent trips to Canada and took part in many big athletic events in the eastern cities of the Dominion.

SWIMMING AT WEST END.

The Ontario Y.M.C.A. boys' swimming championships have an added attraction in conjunction with the regular program at the West End Y.M.C.A. tonight. The famous Hunter trophy will be competed for, for the third time, in the West End natatorium tomight. All the best swimmers in the city will be out to decide who will be the next holder of this much-coveted prize. When this trophy was first put up for competition. H. Morton, the University of Toronto crack, defeated all-comers and won the right to be the first one to gain possession of the cup. He was called on to defend his title at a later date and was beaten by F. Woods of Central, who has held it since then. Both Morton and Woods will be in the race tonight, Morton determined to wim it back and Woods determined to hold it. Neither of these cracks are going to have a soft job of it, as Varsity have entered several of their best met who trimmed McGill right in their own pool recently, and if Morton and Woods are not at their best, either Stephenson or Lindsay are liable to upset the dope and come thru with a win. The following are the boys' championship events: 20 yards speed, 40 yards speed, 100 yards speed, 220 yards speed, swan dive, front jacknife, neat dive and two voluntary dives.

This will be the biggest show of its kind ever held in Toronto, being a dual meet with Toronto Varsity in boxing (six bouts), wrestling (five bouts), fencing, sabre fighting and double-bladed sword work by two well-known Japanese artists. There will also be an exhibition in gymnastic work by a trained squad under the direction of Bob Donney, a well-known British gymnast. In addition to the above, West End Y have challenged Central to a walking match—and this will be staged on the big circular track at Central Y, the same evening. Jake Freeman of Central, and Barnes of West Find, two Olympic contenders, will captain the rival teams.

Two Bank League games will be played at the Arena this afternoon. The tans can see these fixtures without charge and be treated to some fast hockey. Standard and Royal, the latter with a clean sheet of wins, meet first. Dominion, still undefeated, and Hamilton, clash in the second game. The Bank League is gradually building up the league and hope soon to have it on a pap with the league in the old days when it was the big thing in Toronto.

T.C.C. have a three-goal lead to carry into their return O.H.A. Junior semi-final with R.M.C. at the Arena tonight. Their performance in Kingston was the best of the season, and they will show the fans toright that they can stick to combination for the full sixty minutes. It will be Toronto fans' last chance to size-up the canocists before they go into the final.

The Toronto and Niagara Power, Company desires to inform its twenty-seven thousand customers in Toronto and the public generally that, beginning from April 1st, 1920, the Company will find it necessary to increase its rates for electricity.

This action has been caused by the enormous increase in the prices of materials and labor, taxes of all kinds, Workmen's Compensation premiums, and, in fact, of everything required by or incidental to the Company's business.

The average rates of the Company have increased approximately 1 1-2% since 1914.

The increase in taxes, insurance and other uncontrollable expenses in the same period has amounted to 100%.

The increase in cost of labor and materials used in the electric light business has averaged more than 100%, and in certain cases more than 200%.

The only method by which the Company can meet these payments is to collect it from the users of its service if the quality of the service is to be maintained.

The Company believes that its patrons prefer quality, continuity and dependability at a slightly higher price rather than that the quality of its service should be reduced.

The Toronto and Niagara Power Company owns and operates the plant and property formerly owned by the Toronto Electric Light Company, Limited, including distribution system, storage batteries, steam reserve plant, and its contract for Niagara Power supply over transmission lines from Niagara Falls. Its aim is to give its patrons a service in every respect equal, if not superior, to that of any City on the American Continent.

Notice is hereby given to all customers of the Company that rates at present in force will be changed from April 1st next and accounts for electric current rendered on the following rates:

ICY WINDS BLAST HOPES OF SPRING

Winter, Young as Ever, Plays

It was reported last week that geese had been seen flying north—true harbingers of spring. Poor deluded creatures, as misled in their calculations as the human geese who trusted in the augury. Today their little webbed toes point stiffly skyward and the only "honk, honk" to be heard is the petulant warning of the stray motorist yearning for hot Scotch. Eyen the optimistic agriculturist writing visions of bumper crops to follow the plumbless snows and glorious deep frosts of 1920 is peevish as he leaves his city office and faces zero winds sweeping the corner of King and Yonge.

Yesterday being the 26th of February, some alleviation from cold-cars and coal bills might have been expected in Toronto, rather than a term perature 19 degrees below the average, with a northwest wind of 14 miles per hour at 8 a.m. and 22 at noon. The inean of the day was 5 degrees and the meanest of the day exactly zero at about the time the morning whistles blew. Even Dawson City looked little chillier with 6 degrees below; Ottawa merely held its own with 2 below; Montreal are a dead heat with the Queen City and Parry Sound won the Arctic explorers' convention site with 14 under the zero mark. Owing to the fact that delegates were late in arriving no morning session was held, and the convention opened at 3. p.m. with J. G. Byans, president of the Kingston branch, in the chair. Mr. Evans lamened the fact that there are so few branches of the Army and Navy League in the eastern part of Canada. "All our energy has been spent in the west," said Mr. Evans. "The east has been sailly reglected, and there are so few branches of the Army and Navy Veterans' League in organization." Most of the afternoon was devoted to organization. DR. NEIL RESIGNS FROM PRESBYTERY

Westminster Church Congregation Appoint Retiring Minister Pastor Emeritus.

At a special meeting of the members of Westminster Presbyterian Church, East Bloor street, held in the Central Methodist Church last evening, the resignation of Rev. John Neil. D.D., came up for consideration.

Dr. Neil briefly outlined his reasons for retiring at the end of March next, and he assured his congregation with all earnestness that it was not on account of the heavy responsibilities fac-ing the minister of the congregation, occasioned thru the lamentable fire which destroyed their church a few weeks ago. He declared he was no shirker. He had been minister of

Westminster Church for over 35 years. The meeting reluctantly acquiesced in the resignation. Numerous tributes were paid by members to the love and esteem in which Dr. Neil was held by the congregation. A resolution was carried appointing

Dr. Neil paster emeritus of Westmin-ster Church, as also a resolution that he receive, during his lifetime, a re-tiring allowance of \$2000 per annum. The representatives of the session to the prespytery are Arthur Hewitt and Dr. J. M. Duncan, and the representatives of the congregation to the presbytery are Messrs. David Merton and

The presbytery meets on March next when the resignation will finally be passed upon by the members.

In regard to the selection of a site for the building of a new church, in was learned last evening that nothing definite has transpired, altho it is understood several suitable sites have been offered.

When two Wives Meet

Secretly, every wife is fiercely ambitious for her husband—his success, appearance, strength—his standing among his fellow men.

Be worthy of that wife of yours. Keep healthy! Strength, appearance, success depend on health. Living habits today are largely artificial—indoor—sedentary. To be healthy, we must regard Nature's laws. And one of the first of her laws is "Avoid Constipation. Keep the poisons of intestinal matter moving out of your body."

By an entirely new principle Nujol will keep the poisonous waste moving out of the body. Every other form of treatment either irritates or forces the system. Nujol works on the waste matter instead of on the system.

Nujol prevents constipation by keeping the food waste soft, thus helping Nature establish easy, thorough bowel evacuation at regular intervals—the healthiest habit in the world.

It is absolutely harmless and pleasant to take-try it.

Nujolis sold by all druggists in scaled bottles only bearing Nujol trade mark. Write Nujol Laboratories, Standard Oil Co. (New Jersey), 50 Broadway, New York, for booklet "Thirty Feet of Danger."

enormously popular about the time of the Reformation. It aws Cicely Neville, called the Rose of Raby, afterward the Duchess of York, who gave the name greatest vogue in England, where she was known as Proud Cis. Her grandchild, the Princess Cicely Plantagenet, was a nun.

After the Reformation, strangely enough, Cicely became a generic term for milkmaids and sank into oblivion. When it was revived it came forth as Cecilia and was straightway contracted to Cecily and Cecil.

Cecily's talismanic stone is jet, denoting sorrow, yet, if it is worn by Cecily, it is said to preserve her from misfortune, suffering and danger of every sort. Wednesday is her lucky day and 3 her lucky number. (Copyright, 1920, by the Wheeler Syndicate, Inc.)

Steady Prices Marked the Trading Yesterday in Live Stock.

Receipts of all kinds of live stock at

Turnips — \$1.25 per bag; California write turnips, \$5 per case.

Shallots — \$1 per dozen bunches; domestic 40c to 50c per doz.

St. Lawrence Market.

Eutter and Eggs both declined on the wholesales, selling as quoted below. Cold storage eggs are practically off the market.

Poultry—Receipts are light and prices especially on live weight heavy hens and ducklings—the latter being higher for live weight than the dressed variety, ctused by the heavy demand by the Jewish trade.

Meats—All grades of beef have at last declined, but lamb has a higher range owing to light delivery.

Hay—There was not any brought in yesterday, prices for No. 1 being \$30 to \$32 per tom.

Grain—

Good buthers are wanted all right at the week's decline. The cow trade is holding fairly steady, but is lower in sympathy with other grades.

There has been a fair to good demand this week, and yesterday. too, for the because of mile week's decline and the week's decline. The cow trade is holding fairly steady, but is lower

In the small stuff, sheep and lambs are holding very firm, the sheep trade especially showing unusual strength, as shown by the fact that one local firm, the H. P. Kennedy, Limited, sold a bunch, 42 in the lot, averaging 140 lbs. apiece, to the Wm. Davies Co., at \$14.50 per cwt., while Quinn & Hisey sold a small lot of lambs at 22c per ls).

Rice & Whaley realized the same price on a small lot. These individual cases are just cited to show the strength of the small-meat trade. are just cited to show the strength of the small-meat trade.

The run of fresh hogs was around 800 and at that it is pretty hard to say just definitely what the market quotations really are. As a matter of fact, the packers are standing pretty firm on their expressed intention to pay 174c and 184c, 1.0.b. and fed and watered, respectively, but in a few cases some of the commission houses realized more money for their clients. In view of the fact that the market has not as a whole fact that the market has not as a whole come down to the levels proposed by the buyers, it looks as two there might be a revival of strength in this class of live stock. At the same time the condition of the hog trade in the big American centres gives little ground for much hope along that line.

maple Leaf Milling's decline of 71-2 points was a disturbing incident in an otherwise quiet and steady local market yesterday. The immediate effect of the Dominion government's measures to curb importation of securities is apparently to still further currial speculative interest in stocks listed on the Toronto exchange, but it is argued that eventually the embargo will work out to the advantage of local securities by limiting competition with them. However, yesterday's total transactions in listed stocks amounted to barely 1800 shares, as compared with more than 2800 on Wednesday and a slightly larger total than this on Tuesday.

Secondary or Independent Steels Almost Only Weak Features in Afternoon.

CALL MONEY EASIER

New York, Feb. 26.—Stocks were unsettled again at the outset of today's trading, in consequence of the cuts in the dividends of low-priced copper shares. The market continued unthe dividends of low-priced copper shares. The market continued uncertain during the forenoon, but strengthened substantiary later, when rails were in especial demand.

Almost the only features of weakness were the secondary or independent steels, in which further liquidation was precipitated, probably as a result of the very adverse annual statement issued foculty by the Republic Iron and Steel Company.

adverse annual statement issued recently by the Republic Iron and Steel Company.

There was sporadic selling also of leathers, shippings, metals and minor specialties of the several miscellaneous groups. This was more than offse, however, by the steady recovery of motor, oils, equipments and kindreus the two preceding sessions.

Foremost among the more extensive gains of the day were General Motors, the high-grade petroleums, Cruc.b.e. Steel, Baldwin and American Locomotives, American Car and American International. Gross gains of 2 to 13 points in these issues were shaded by realizing sales at the end.

Speculative or low-priced transportations again featured the buying of rails, but seasoned shares in the transcontinational, granger and trunk line divisions participated in the advance, which extended from 1 to 4 points. Sales amounted to 1,000,000 shares.

Most of the day's news and developments relating to market values was favorable, if only in a negative sense. Time money was again deadlocked, but call loans were plentiful at 10 per cent, that rate ruling thruout against yesterday's maximum of 15 per cent.

Recurrent weakness of Liberty and Victory issues was the outstanding feature of the bond market, new low prices being established in all but a few of these groups. Rails and industrials rallied slightly and internationals were steady. Total sales (par value', aggregated \$12,150,000.

Old U. S. bonds were unchnged on call.

What Will the Stock Market Do Next-Up or Down?

THE drastic declines of the past few days have left many investors and traders in a bewildered state of mind, wondering whether the liquidation is about over or if stocks are a purchase, and if so, what stocks to buy?

In critical market stages such as we are now passing through, it requires a close study of underlying conditions in order to arrive at sound conclusions as to the real market position; to separate the wheat from the chaff, and to determine which stocks are a purchase and which a sale.

In a special letter I have clearly set forth my deductions and opinions, based upon a critical analysis of industrial, political, financial and market condi-tions. A copy of this letter should be in the hands of everyone interested in stocks. This letter will be sent FREE and without obligation, on request. I also suggest that you

SEEKING NEW OIL **AREAS IN CANADA**

President Stillman Tells Imperial Oil Shareholders of Vigorous Campaign.

At the annual meeting of sharehold. ers of the Imperial Oil, Limited, held esterday, the president, C. O. Stillman, made interesting reference to the company's quest of oil in Canada. He said that exploration of all prospective oil ried on with edoucled vigor in the hope that the Canadian petroleum industry could be rendered self-contained, and continued: a:eas in this country was being car-"As a result of the exploration car-

ried on in the west during the year 1919 by our geological staff, several se-cetions of prospective territory were made on which it was considered advisable to make drilling tests. Five trilling rigs are now at work on loca-tions extending from the international theen made, and it is expected that at least three other rigs will be put in operation during the coming season.

"The production of crude petroleum is western Ontadio during 1919, according to government returns, was two hundred and twenty thousand barrels. Most of the output was obtained from the old producting horizon in the corniferous limestone by nearly two hundred operators and compenies, and practically all of this was purchased from these producers by Imperial Oil, Limited, for its Sarnia refinery.

"In orilling for natural gas in Dover Township two years ago the Union Natural Gas Company developed some crude oil production in the irenton limostone at a depth of about thirty-three hundred feet.

"Imperial Oil, Limited, is testing the trenton formation at three different points in western Ontario at the present time, and it is hoped that a commercial production may be developed."

CANADA'S MINERAL STORE UNDERRATED

More Capital and Adequate Labor Will Do Wonders for Northern Ontario.

At the central branch of the Y.M.C.A. prominent bishop of the church referred to the rich copper mines of Cobalt. So far as the point of his story was con-cerned, it mattered not whether the mines were of silver or copper. But when a resident of Canada, an eloquent anl able man, makes a mistake as to the kind of metal at such a fambus camp, it suggests a considerable lack of knowledge as to our mineral resources on the part of

our mineral resources on the part of many persons.

And now we have Moody's Investors Service, New York, proving an actual disservice so far as Canada is concerned. The gold yield is first given in ounces, but in arriving at the total in dollars, no account is taken of the fact that each ounce means \$20.67, thus reducing the sum of Canadian production more than twenty times. No doubt this was an unintentional mistake, but it led to an erroneous impression of our resources, and out of this false data came the further statement that Canada is "not rich in mineral resources, altho she if the world's greatest producer of nickel and an important producer of silver and copper." Then, it is added, that prior to the war our mineral production varied from \$13 to \$19 per capita, as against \$20 to \$25 in the United States. It is to be regretted that Canada has not realized on her mineral deposits to the same extent as the United States. But this does not imply that our resources are less than hers. They are in all probability much greater. We are behind our neighbors only in point of development.

The total area of Canada is 3.729.665 square miles, and of this over 2.000.000 square miles are occupied by the pre-Cambrian rocks, conceded by all geologists as the principal metal-bearing rocks of the world. Great as are our agricultural areas, our mineral areas are greater still.

The mineral resources of the United States are much nearer exhaustion than are those of Canada. We have a great future, the republic a great past, so far as metal mining is concerned. In gold, silver and nickel, Ontario has the biggest mines in the world. Her phenomenally rich silver deposits at Cobalt were unknown fifteen years ago, and the active exploitation of her gold mines did not begin until 1910.

future, the republic a great past, so far as metal mining is concerned. In gold, silver and nickel. Ontario has the biggest mines in the world. Her phenomenally rich silver deposits at Cohalt were unknown fifteen years ago, and the active exploitation of her gold mines did not berin until 1910.

To say that Ontario is the greatest producer of nickel in the world fails to do us justice. Our output is 80 per cent. of the world's total. And what about stellite and monel metal, the most valuable alloys ever known, and both due to our nickel and cohalt deposits? Both these valuable compounds are now making a sensation in the industrial world. Great Mineral Wealth.

Cobalt has produced more silver than the world-famous Comstock lode. The average contents of the ore shipped for a period of ten years ran from 1013 ounces to 2359 ounces of pure silver per ton of 2000 lbs. No silver region in the world-famous Comstock lode. The average contents of the ore shipped for a period of ten years ran from 1013 ounces to 2359 ounces of pure silver per ton of 2000 lbs. No silver region in the world, neither Potosi nor the Comstock, has ever approached this record in point of value per ton of ore.

"Not rich in mineral resources" for sooth with the world's record in gold silver and nickel and only the merest fraction of our productive areas as yet touched. And this wonderful result has come from mere chance discoveries. The nickel at Sudbury and the silver at Cobalt were both due to the necessary work on the right-of-way for railway building. This fact alone shows that our unrivalled resources were neglected until a little more than ten years ago.

WINTER WHEAT IN KANSAS HARD HIT

-British Export Demand for Oats.

Chicago, Feb. 26.-Serious damage to winter wheat in Kansas had a bullish effect today on the corn market. Prices of corn closed firm, %c.to 2c net higher, with May \$1.37\% to \$1.37\%, and July \$1.31\% to \$1.31\%. Oats finished \\ \chi_c off to a like advance. The outcome in provisions was 2\%c to 15c down. Visions was 2/2c to 15c down.
Values in the corn market jumped rapidly after a break of about one cent in the early trading. The transient weakness was attributed to bearish efforts to emphasize difficulties of the financial situation. Sentiment changed to a decided extent, however, when official reports indicated 10 to 15 per centicial reports indicated 10 to 15 per cent ficial reports indicated 10 to 15 per cent. of winter wheat in several northwestern sections of Kansas was apparently dead, No. 2, \$3.

Farmers Consider Quotations Low Compared With Outside Points.

Farmers in the vicinity of Toronto are complaining that the quotations issued by the grain section of the local board of trade are not correct and entirely out of line with transactions at outside points. line with transactions at outside points. A reputable farmer from Agincourt, in Scarboro township, told The World yesterday that feed barley at that point was selling at \$1.85 a bushel, whereas the board of trade quotation was \$1.25. Oats quotation by the same board at \$1 to \$1.02 were also criticized, as new oats were selling at the same village as high as \$1.16.

\$1.16.

A prominent Toronto grain man, asked to explain the difference in the quotations, said that the board of trade figures were nominal ones, as practically no car lots of barley or oats had been received in the local farmers' market for some time. He added that a member of the grain section to whom had been entrusted the revising of quotations in the farmers' market had died recently, and that the figures had not been given as close attention as would otherwise have been the case. At the same time he asserted that Manitoba feed barley could be delivered today in Toronto in car lots \$1.85 quotation mentioned in Agincourt. Allowance should be made, too, he said, for the fact that the board of trade figures showed the prices paid by dealers, and a margin should be allowed for a fair profit.

HERRICK GOLD MINES

PROSPECTUS AND MAPS OF THIS FINE PROPERTY --- USE THE COUPON IN THE LOWER RIGHT HAND CORNER

> PRESENT OFFERING LIMITED TO 100,000 SHARES AT

THE officers and directors of the Herrick Gold Mines, Limited, are shrewd, keen and successful business men. Mr. A. H. Chapin of Springfield, Mass., is president of the Herrick. He is also president of the Moore Drop Forgings Co., a company which has a credit rating in Dun's and Bradstreet's of \$1,000,000 or over. Dr. J. T. Herrick, a prominent physician, and E. A. Snowman, a retired manufacturer, both of Springfield, are also directors of the Herrick. The other directors are well-known business and financial

These are men of outstanding ability in the business world, and their presence on the Herrick directorate indicates that the affairs of the company will be shrewdly and efficiently handled under their

Up to the present time the sum of \$60,000, expended in development and erection of camp buildings, has been provided by the directors themselves, and they have pledged themselves to provide a further \$140,000 for treasury purposes. This demonstrates most emphatically the confidence which these men have in the future of the mine. It must certainly appear to every thinking person that the results of exploration carried on to date must strongly indicate the existence of a very important ore body to warrant men of this stamp contributing so largely to the finances of the company.

From the time the initial exploration of the property was begun a measure of success entirely unlooked for has been met with. As the work was carried on step by step the results proved a distinct surprise. In the beginning the vein was stripped for a distance of 1,000 feet on the surface. Channels were cut at intervals of 5 feet across the width of the vein and over its entire length. When the samples taken from these channels were assayed only two blanks were obtained. The results showed an average value of \$6.00 to the ton in gold and a remarkably even distribution of the metal over the entire payable zone. This was a very highly encouraging development. Shaft sinking followed to a depth of 60 feet to ascertain if these values held or were increased at depth. Not only were values found to increase, but the vein itself widened out considerably.

The fact that the vein extended in practically a straight line on the surface for 1,000 feet led to the assumption that it would continue to great depth in a practically unaltered course, as shown by the strongly defined walls on the surface. In order to verify this the diamond drills were set up and pointed to cut the ore body at various depths and points along its lateral extension, having regard to the dip of the vein as shown on the surface. The drills cut the ore at the different depths close to the objective point. The deepest hole pierced the vein at 800 ft., where the mineralized zone was shown to have a width of 22 ft.

These developments strongly point to the existence of a tremendous ore shoot, having a length of 1,000 feet, a depth of 800 feet and at least a width of 10 feet, or 8,000,000 cubic feet: It is usual to figure 13 cubic feet of this rock to a ton of ore. The ore shoot would contain, therefore, approximately 600,000 tons of ore.

Assays of shaft samples and drill cores gave a value of \$15.00 in gold to the ton. Assuming this figure to be the average of the entire ore body, it will be readily seen that a value of \$9,000,000 in gold is indicated down to the 800-foot level. Of course, it is not as yet definitely proven that the total tonnage will average this, but it seems reasonable to suppose that when the ore is opened up it will be found to run close to this mark.

in any event the work already done seems to prove conclusively that the Herrick is unique among properties in the prospect class.

Here is a clean-cut mining proposition, possessing unusually attractive investment and speculative possibilities. Gold mining has entered on a period of unexampled prosperity. The demand for gold is greater than it has been for many decades. That this demand will be insistent for many years to come is unquestionable. The time to invest is when a gold mine is in its early development stages. The shares can then be obtained at a relatively low price. The Herrick is the type of a gold mining investment offering unusual possibilities for large returns within a reasonably short time. We regard 40 cents a share as a low price when the known merits of the property are

100,000 shares is the limit of the present offering at 3 this price. As this allotment is being steadily absorbed from day to day, we advise sending us your order for Herrick shares as early as possible.
