All Eager To Pay Tribute To Miss St. John, Carnival Queen

Business Houses Invite Her to Accept Gifts for Trouseau

The Ladies will be Interested to Read About Her Official and Other Costumes for Her Visit to Montreal—Many Congratulations and Invitations Come to Miss Blair.

Miss St. John, Carnival Queen, as Winifred C. I. Blair, went back to work this morning. She is helping her generous employer, H. C. Olive, customs broken, get out work in advance, so that office details will not suffer too much while she is away...

The time at the disposal of Miss St. John before her departure for Montreal demands that her preparations in getting her trousseau ready be of the expedient. In fact the assembling of apparel, hurried engagements with modistes, furriers, milliners and others will hang up a record hereabouts no doubt. Indeed few elements have been faster.

Early in the afternoon, and also on the night of Miss Blair's publication as Queen, she and her representatives in Imperial Theatre were approached with offers to assist practically concerning her wardrobe and the many other details which will be of importance in the final tests in Montreal when the crown of beauty is to be placed upon the brow of one of the girls now flourishing in the Mount Royal Hotel. Acceptance of some of these unexpected and gracious offers is what kept the Queen and her suite so busy yesterday.

Her Costumes. Early in the morning a radical change in the plans made for the Queen's official sports costume caused a scurrying among tailors, cloth dealers and trimming departments. The new plans were the result of a late-hour conference over the telephone between Miss Blair and some well-wishers.

HAIL TO OUR QUEEN

We hail our chosen Queen today. To her our faithful homage pay. While Nature's robe of ermine gay Enwraps each festive scene; Her cheering subjects see her crowned. With all her staunch adherents round; Hark! How their loyal shouts resound. All hail our chosen Queen.

Hail! Hail! Hail! To healthful sport, and clean; Hail! Hail! Hail! Fair Winifred our Queen.

Through all the year we'll serve her cause; Respect her city, and its laws; And in our loyalty we'll pause In all the months between. Until another queen appears; Until another name endears; Till then no other claims our cheers But she, our chosen Queen.

Hail! Hail! Hail! To healthful sport, and clean; Hail! Hail! Hail! Fair Winifred our Queen.

HOPE A. THOMSON.

France To Tighten Grip if Germany Remains Obdurate

New Measures Threatened, May be Notice Given Tonight. Will Not Tolerate Passive Hostility Financed by the German Government—Queries as to Mediation by Vatican Commented On.

London, Jan. 31.—Apparently basing their statements upon Gen. Degoutte's warning to Germany, some of the British correspondents at Dusseldorf assert that the French almost immediately will send Berlin a notification, equivalent in spirit if not in form to an ultimatum demanding reversal of the Wilhelmstrasse policy regarding the Ruhr.

Germany is to be told, the Post's Dusseldorf correspondent says, that France will not tolerate passive hostility supported and financed by the German Government, and that if a satisfactory reply is not given drastic measures will be taken exceeding any that the settlement's all right—By Her!

Despatches to the Telegraph say that this notification will probably be forwarded to Germany this evening. The correspondent adds that it is not known what form the threatened measures will take, but says that they are not likely to involve further occupation of territory.

Rome, Jan. 31.—Queries from various official quarters as to whether the Vatican intends to mediate between France and Germany have brought the answer that neither side has approached the Holy See asking for such mediation. It is pointed out that the Vatican makes it a rule never to interfere in political differences between countries unless religious interests are so involved as to be endangered.

Naturally, it is added, the Holy See exerts its efforts at all times to avoid war, limit conflicts or relieve suffering, but it will not inquire into the merit of political questions unless asked to do so by the interested parties.

Berlin, Jan. 31.—Ego Stimes has repudiated the contract for reconstruction work in the devastated areas of France which he concluded several months ago with Marquis Lubersac, says the Deutsche Bergwerks Zeitung.

Paris, Jan. 31.—The French Federation of Labor, with 800 delegates present, voted against the "repressive measures, imprisonments and arbitrary searches" in the Ruhr.

Asquith has been invited to arbitrate the issue between Canada and Great Britain arising out of the debt due to Canada for munitions and other materials. The main point is whether Great Britain is to pay the current or normal rate of exchange.

French Decision Makes New Complications At Lausanne Conference

Will Not Leave So Long as There is Prospect of Agreement—Would Concede More to Turks—"Flagrant Violation" is British View.

(Canadian Press) Lausanne, Jan. 31.—The French delegation has announced that it can not consent to leave Lausanne so long as there are prospects of agreement with Turkey. This has led to complications among the allies which brought the Near East conference today to the brink of a greater impasse than had been anticipated for many days.

The French decision, which was understood to have the support of the Italian delegation, was further confirmed by a message to M. Bompard from Paris declaring that France was willing to make further concessions to the Turks and that she did not consider the Allied treaty as definitive.

The British received the French announcement as a "flagrant violation of the mutual understanding arrived at by the Allied plenipotentiaries only a few days ago." This agreement provided that if Turkey did not sign the treaty upon its presentation today, the powers would withdraw, leaving a few experts to supply the Angora representatives with any desired information.

The plan contemplated the return of the main delegations if and when the Turks agreed to sign. The Turks spent the night formulating counter proposals to the treaty. They described the Allied terms as worse than anything they had expected, calling particular attention to the provision for a system of "legal advisers." This, they say, was "absolutely unacceptable."

Later Lord Curzon announced it would be impossible completely to satisfy the Turkish requirements as to time, but personally he was ready to remain at Lausanne until Sunday evening.

Constantinople, Jan. 31.—Despatches from Angora purporting to reflect the official attitude of the Turkish Nationalist government, continue of the gravest tenor. It is said the council of ministers has taken "important decisions for measures necessitated by the developments at Lausanne."

Lausanne, Jan. 31.—Ismet Pasha, asked the conference today for a delay of two weeks before the signature of peace and a delay of eight days before a meeting of the conference committee. The interval would be employed, he explained, in striving by every means to reach an agreement.

Hamilton Clergyman Says Presbyterian Church Has Reversed Policy

Montreal, Jan. 31.—Charging the general assembly of the Presbyterian Church in Canada with having reversed its policy when there was no authority for the statement, the church is doing so, and with having otherwise acted in an unconstitutional manner, Rev. Dr. S. Banks Nelson, of Hamilton, explained, in a letter to the Moderator of the church, last night on the question of "Are Presbyterians Being Coerced into Church Union?"

Among other charges he said that church union was in some cases being forced in the west by traveling organizers.

A resolution was passed expressing the conviction that the "merging of our church in the proposed new organization would involve a serious loss to the spiritual forces of our Dominion."

Dominican School Burned

Newark, N. J., Jan. 31.—St. Antoninus Parochial School, founded by the Dominican Fathers in 1875, was destroyed by fire last night. No one was injured. Firemen saved surrounding buildings. The fire is believed to have started in the basement of the building.

STANLEY STILL IN DIFFICULTIES

Indications are, However, That Ice-Breaker Will be in Open Water Soon. Halifax, N. S., Jan. 31.—A message to C. H. Harvey, agent for the marine and fisheries department, from Captain I. C. Rhude on the Canadian Government steamer Stanley, indicates that the ice breaker is still in difficulties but has hopes of an early escape to open water. Captain Rhude's message reads as follows:—

"Scientific bearing south by west fifteen miles. Working through heavy ice, but see clear water west of us."

MUCH DONE BUT MUCH YET TO DO

Report of Executive to Social Service Council

Work for Under-Privileged Children, Mentally Defective and Aged Poor—Drive Against Liquor, Drugs and Betting.

(Canadian Press) Ottawa, Jan. 31.—Progress made in securing legislation for the suppression of evils and for the promotion of the public welfare is reviewed in the executive report presented at the annual convention of the Social Service Council of Canada here yesterday.

The child welfare, better laws for the protection of the weak and irresponsible, suppression of the drug traffic and gambling evil, immigration and temperance are some of the many problems dealt with.

Among the reforms which it is proposed to work for are mentioned the protection of all under-privileged and handicapped children, the sifting out and protection of the mentally defective, adequate care for the aged poor; upholding and extension of the laws for the suppression of the liquor traffic; the abolition of legalized betting houses; the suppression of traffic in habit-forming drugs; and the safeguarding of family life.

The committee on political purity and the franchise has made proportional representation and political patronage its chief subjects of study and is making a recommendation that in the forthcoming general redistribution bill provision be made for an experimental proportional representation.

"Very important progress has been made," it is stated in the report, "but much remains yet to be accomplished in suppressing the great national evils and in promoting all those forms of social well-being making for the comfort, care and welfare of our people."

DESTRUCTION IN IRELAND

New Reign of Terror by Irregulars is Reported - Mines Used at Coastguard Station.

Dublin, Jan. 31.—That the Free State Government still is confronted with a grave task is shown by the intensified campaign of destruction and incendiarism that is being carried on by the irregular forces. On Monday night Mrs. Corrigan, widow of a state solicitor, was given two minutes to evacuate her home. She and her maids had to snatch three children from their beds and, without dressing them, dash out into the cold, wet night. Their departure from the building was followed immediately by the explosion of a land mine which brought down the house in ruins.

**FIND 2 CHLORINE ELEMENTS**

University of Chicago Experiments Change Chemical Theories.

Chicago, Jan. 31.—Simple experiments resulting in changing some of the fundamentals of chemistry are before classes at the University of Chicago. Dr. W. D. Harkins and Dr. R. D. Milligan of the university assert they have succeeded in separating some of the elements of chlorine and mercury.

By passing chlorine through the stem of ordinary smoking pipes they separated this chemical into two elements, whereas, it had long been regarded as one, Dr. Harkins states. He explains that mercury was "split" up by evaporation at low pressure and by diffusing it. This established, he said, that mercury contained at least six, and perhaps seven or eight elements.

It is estimated that in Manhattan alone, more than \$8,000,000 was spent for theatre tickets in 1921.

**FIFTEEN MINUTES OF RADIO EACH DAY**

By Edward N. Davis  
Formerly Technical Electrical Expert For U. S. Government

Lesson No. 220.  
RADIO DICTIONARY.

**ABSORPTION CIRCUIT**

This type of circuit, commonly known as a "rejector" or "radio-frequency trap" consists of inductance in the form of a coil, shunted by a condenser, this arrangement being inserted in the ground lead of the antenna circuit. The purpose is to eliminate the interference due to disturbing spark stations or to the close proximity of alternating current power lines. The absorption circuit is tuned until the interference is reduced to a minimum and then the other elements of the antenna circuit are tuned to the frequency of the incoming wave, so that the desired station is heard at the maximum intensity.

**CONDENSER ANTENNA**

A form of antenna consisting of two horizontal metallic plates placed a few feet apart, the upper plate being attached to the receiving antenna terminal and the lower plate to the ground terminal of the circuit. The material of the plates may be two sections of copper netting each approximately ten feet square and located parallel to each other. It has lower conductor resistance than the usual form of outdoor antenna and owing to increased capacity a small inductance of low resistance is used in series thus giving a low value of resistance to the circuit. In comparison with the coil antenna, the "condenser antenna" gives satisfactory results in the reception of short wave lengths.

**AMPERE**

A standard electrical unit which denotes the amount of current flow. It is the amount of current produced in a conductor having a resistance of one ohm when an electromotive force of one volt is steadily applied. When the rate of flow in a conductor is one coulomb per second, the value of the current is one ampere.

**TUNING**

Proper tuning of a radio circuit consists in varying the inductance or the capacity, or both, so that the circuit is adjusted to a state of resonance with an external circuit containing similar elements. When the product of the inductance and capacity in a radio receiving circuit is equal to that of a transmitting circuit the strength of received signal is at a maximum and the circuits are said to be in resonance.

**ATMOSPHERICS**

A type of interference resulting from electrical disturbances which cause troublesome noises in the telephone receivers. These noises are also commonly known as "static," "strays" or "X's" and are often so severe as to completely prevent the reception of radio signals. This form of interference is more serious in the summer than in the winter and more prevalent in the tropical than in the temperate zone. Having no definite wave length, they are difficult to tune out, and the noises produced in the receiving telephones, as a result, cause an irregular grinding, a hissing noise (usually occasioned by snow or rain) or the sharp snap due to lightning discharge.

**RADIO BEACONS**

Radio transmitting stations located in close proximity to a harbor are utilized for guiding vessels and enabling them to determine their position in a fog. Each transmitting station radiates a characteristic group of signals, for example, as reported by the Bureau of Standards, "One station may transmit dots in groups of three, a second station may transmit dots in groups of two and a third may transmit dots in groups of twenty or more. The navigator takes successive bearings on each of the transmitting stations. The position of the ship is then easily determined by plotting the bearings on a map." **BAKERY DESTROYED IN BRISK BLAZE**

Two Aged Women Rescued During Mill Street Fire—Other Premises Damaged.

Two aged women were rescued from the building at 134 and 136 Mill street during the fire which broke out there early yesterday afternoon. The building was occupied on the ground floor by the Hygienic Bakery and upstairs as a dwelling house. Mrs. Margaret Magee and Mrs. Hannah Thurlow were rescued by Harold E. Murray and Policeman Sheehan, who also searched the building for two children who were supposed to be lost. It was later discovered that it was for two kittens and not for two kiddies they were searching.

**The Morning Dish**

Here's a morning dish that's luscious and effective. A food that doctors in great sanitariums prescribe for anemic, tired people.

Stewed Raisins  
One package Sun-Maid Seedless Raisins, 1 slice orange or lemon rind, 2 cups cold water. Put raisins and water in saucepan and bring to boiling point. Add slice of orange or lemon and cook for 30 minutes.

Just say **Blue-jay** to your druggist. The simplest way to end a corn is Blue-jay. A touch stops the pain instantly. Then the corn loosens and comes out. Made in a colorless clear liquid (one drop does it) and in thin plasters. The action is the same.

covered that it was for two kittens and not for two kiddies they were searching.

An alarm was rung in about 2.30 o'clock. The fire appeared to have started in the rear of the second floor and to have spread into the bakery. The proprietors of the bakery, M. Kelly and T. P. Kelly, say that their plant will be a total loss and that two carloads of flour had been destroyed. The upper part of the building was also badly damaged. There was some insurance on the bakery but the furnishings in Mrs. Thurlow's flat was not insured. The building was the property of the Canadian Government. The fruit store of Max Marcus, the jewelry store of Walter Bailey and the barber shop of C. E. Barton all suffered damage from water.

The fire bell in King street cast out of commission while the second alarm was being rung. The street car system was completely tied up although a makeshift service was run from both sides of the fire.

**PAJAMA CHARGES DENIED ON STAND BY MRS. CROMWELL**

"Never Lent Mine to Any Male Guests," She Asserts—Says Housekeeper Drove Her Away with a Pistol.

New York, Jan. 31.—Mrs. Rose Barker Cromwell was on the witness stand under cross-examination in the Supreme Court in White Plains in the divorce action brought against her by her elderly husband, John Howard Cromwell.

The defendant denied that she ever had lent her pajamas to any male guest at her home and denied other allegations made by witnesses for Mr. Cromwell. She said her husband was "a home body," never went anywhere and never wanted her to go anywhere. He had destroyed "every spark of her love for him," she said.

"Didn't you have an automobile?" asked Humphrey Lynch, Mr. Cromwell's attorney.

"No," replied Mrs. Cromwell, "although Mr. Cromwell had three. He also had a yacht, but I seldom went aboard because I am a bad sailor."

She told of going to the Cromwell home in Allentown, N. J., last October and finding it occupied by Mrs. Genevieve Mulford, Mr. Cromwell's housekeeper, who locked the door and denied her admission. Mrs. Cromwell said she got in through a window and encountered Mrs. Mulford in the hall, armed with a revolver.

"I'll shoot to kill if you don't go away," she quoted Mrs. Mulford as saying.

"It is not your house, I told her," continued Mrs. Cromwell. "It belongs to my husband and I am still his wife. You have played me false. She said it was her house and I would have to get out."

After telephoning to her attorney for advice, Mrs. Cromwell said, she got out.

**SAYS PILOTLESS PLANE COULD BOMB NEW YORK**  
General Patrick Tells Boston It Would Be Possible Now to Send a Fleet Controlled by Radio.

Boston, Jan. 31.—A bombing air service that needs no pilots has been developed, Major Gen. Mason M. Patrick, head of the Army air forces, announced in addresses during a two-day visit here on advances in aviation, among them the "automatic air service."

This has been so highly developed, he said, that it could be used to bomb New York.

He said that a fleet of airplanes similarly might be operated with exactness, all by radio, he says.

Dirigibles to be filled with helium, which will be able to go to the North Pole and back without alighting, are now being planned. They will act as mother ships for airplanes, of which they will carry several each. The airplanes will be caught and held while the dirigible is in flight by a device below the latter, which experiments have proved practicable.

JURY GIVES VERDICT AGAINST MOTORIST

Samuel Nesbitt Found Guilty of Manslaughter in a Toronto Court.

Toronto, Jan. 31.—After being out about an hour a jury in the Assizes returned a verdict finding Samuel Nesbitt guilty of manslaughter in connection with the death of three-year-old Max Malinsky. An automobile driven by Nesbitt ran into a truck, throwing the little boy against a hydro pole. The Grand Jury expressed the opinion that Walter Miller, driver of the truck, should also have been charged with manslaughter, but Mr. Justice Ross stated that, after hearing all the evidence, he had come to the opinion that Miller was not to blame for any part in the tragedy. At the time of the accident Miller was arrested, but was later released. Nesbitt will be sentenced next Tuesday.

MATERNITY HOSPITAL FOUNDED 173 YEARS AGO

First Institution of Kind in England Originated at Meeting in Tavern.

London, Dec. 25.—(By Mail)—The story of a maternity hospital which had its origin in a public house is told by Ralph B. Cannings in a short history of the City of London Fraternity Hospital, which has just been published, quoted by "The Westminster Gazette."

"It was at a tavern in Bartholomew Lane, named the Black Swan, which had its origin in a public house, is told by Ralph B. Cannings in a short history of the City of London Fraternity Hospital, which has just been published, quoted by "The Westminster Gazette."

The hospital since then has had three homes. From 1750-1770 it was lodged in London House and Shaftesbury House in Aldersgate street; from 1770-1807 in the old building in City Road, and from 1807 to the present time in the new and existing building in City Road.

Over 8,000 children have been born in the hospital and 32,228 mothers have been patients.

In 1807 the income of the hospital was £2,538, against £13,962 in 1921 and the expenditure £2,476 and £15,054 in the same years.

When the hospital was first opened Mr. Cannings relates, the women's salary was £15 a year. By January, 1763 there were employed, in addition, four nurses at 28 a year each, and one domestic servant at 25 each year."

CHURCH UNION MOVEMENT IN A QUARTER CENTURY

Toronto, Jan. 31.—(Canadian Press)—For nearly a quarter of a century the big question of union between the Presbyterian, Methodist and Congregational Churches has been seriously under discussion, according to a list of dates issued by the Presbyterian Church Union Committee recently.

1908—A proposal was considered for organic union with the Methodist and Congregational churches.

1904—A special committee on the question of church union was appointed.

1909—Organic union was declared practicable, and the basis of union endorsed.

1910—The basis of union was sent to Presbyteries.

1911—The Presbyteries approved and the whole question was sent to the people.

1912—The people voted for union. Immediate consummation was deferred in the hope that "practical unanimity" could be secured within a reasonable time.

1913—Amendments to the basis of union were invited with a view to settlement of the question.

1914—The joint committee was asked to prepare an amended basis of union.

1915—The amended basis of union was submitted to the people, with the following notices:

"The people are reminded that the decision on this question must be reached on the basis of the votes cast."

1916—The people again voted for union, and decided to constitute the "United Church of Canada."

1917—A truce was called that the church might prayerfully await "new light" and "divine guidance."

1921—Resolved to "take such steps as may be deemed best to consummate organic union as expeditiously as possible."

Dr. C. W. Gordon, minister of St. Stephen's Presbyterian Church, Winnipeg, ex-Moderator of the Presbyterian General Assembly, and well-known author, in the course of a recent interview emphatically declared himself as opposed to further delay in the consummation of the union.

"The interests at stake are so vast and pressing that the Christian Church cannot afford to pause for a single day, merely for the sake of pausing or because of any hope that we may have of winning those opposed to union to share our convictions," said Dr. Gordon. He said he believed that the alignment and mobilization of the Christian forces of Canada by church

DEVOTED HEBREW SCHOLAR DIES IN PALESTINE

Jerusalem, Jan. 8.—(A. P. by Mail)—Palestine Jewry has met with a great loss in the death of Eliezer Ben Yehudah, the father of the revival of the Hebrew language.

Educated in Paris, he came to Palestine forty-one years ago at the age of twenty-three. With the faintest of constitutions and without friends or money, but with an iron will and a steadfast purpose, he set himself to arouse the depressed and discouraged Jews of Palestine to self-consciousness and self-respect. He believed that through a revival of the tongue of the great Hebrew prophets his oppressed brethren would awaken to a new life, and by every means within his power he sought to arouse them.

How well he succeeded may be judged by the fact that tens of thousands of Jews in Palestine are speaking and reading pure Hebrew; it is the language of instruction in all of the excellent Jewish schools of the country, and it is recognized by the government of the land as one of the three official languages. At his death Yehudah had all but completed the compilation of a Hebrew dictionary which will stand as a final monument to the memory of one who gave his entire life to give still new life into the Hebrew people of Palestine.

It was a notable procession of people of all creeds that followed the funeral procession as it wound its way to the Hebrew cemetery on the Mount of Olives. The casket was covered by Zion's flag, and a drizzling rain could not hinder his many friends from showing the deep respect in which he had been held by all classes.

ILL, HE TRIES BLACKMAIL TO PAY FOR OPERATION Will Hand Admits Menacing Norwich Man as "Easy Way" to Get Needed Funds.

New London, Conn., Jan. 31.—William D. Wolakowski, a woollen mill worker, said to have resorted to blackmail in his effort to raise money for an operation for cross-eye and neck trouble, was arraigned in City Court here. He was charged with sending a threatening letter to R. C. Platt of Norwich demanding that \$1,100 be turned over to a messenger with no questions asked.

Mr. Cox admitted that the camp had been crowded on one or two occasions. Magistrate Palling inflicted a fine of \$50.

CHARGE THEY BOUGHT DYED STONES AS COLD Dealers Cause Arrest of Seller to Whom They Say They Paid \$4,000 On 200 Tons.

New York, Jan. 31.—Charged with delivering 200 tons of dyed stones instead of coal, and accepting \$1,400 as part payment for it, Vincent Harris Olsen of Bedford avenue, Brooklyn, was held by Magistrate Elperin in Adams street court, Brooklyn, in \$500 bail for a hearing on a charge of grand larceny.

Olsen said he was acting merely as agent for the Tidewater Fuel Company of Manhattan. The Tidewater Company went into bankruptcy on Dec. 2 and its affairs are now under investigation. Olsen said he deducted his commission and turned the money over to the company.

The complaint was made by Benito Brothers, coal dealers of Hicksville, L. I., who charged that on Nov. 9 they made the \$1,400 part payment for the coal. When it was delivered an examination disclosed, they alleged, that the "fuel" was mostly stone, dyed black, with some fragments of brick and ashes mixed in.

FINED FOR OVERCROWDING CAMP SLEEPING QUARTERS

Fort William, Jan. 31.—Charged with violating certain regulations imposed with the authority of the Provincial Government by the Ontario Board of Health in respect to sleeping quarters operated in connection with lumber camps, C. W. Cox in Police Court explained that the camp in question was a temporary one opened hastily in an effort to fill a rush order for plies to be used in elevator construction.

The charge was filed by W. C. Millar, District Sanitary Inspector.

Mr. Cox admitted that the camp had been crowded on one or two occasions. Magistrate Palling inflicted a fine of \$50.

PRINTER'S "STONE" TO MARK HIS LAST RESTING PLACE

Andrew E. Nolan Leaves a Wish That Marble Slab be Set at Grave.

New York, Jan. 31.—Almost sixty years ago Andrew E. Nolan of Leonard street, Jersey City, opened a little print shop. In those days all type was hand set, and the printer's "stone" was about the most important thing in the plant.

Nolan picked a good "stone," a four-foot slab of smooth marble, upon which for more than half a century he made up type forms. Time scarred the original flawless surface, the years mellowed its whiteness, its edges wore smooth through constant contact with the aprons and scores of transient printers, stains smudged and blackened it, but it remained a good stone, a solid reliable basis upon which to create sound typographical achievements.

Last Monday Nolan died. Almost his last request was that the stone which he had worked for nearly sixty years should be set at the head of his grave.

The stone is being cleared of its disfiguring scars, and will be suitably inscribed before it takes its position at the head of Nolan's grave.

CREW IS GASSED BY GUN FIRED AGAINST THE WIND London, Jan. 11.—(By Mail)—While H. M. S. Emperor of India was carrying out exercises in the English Channel nine men forming a gun crew were gassed, says "The London Daily News."

The gun was pointed against the wind, and apparently the wind blast, which should carry the gases away from the crew, failed to act. The gases were blown back and all nine men were rendered unconscious.

They recovered under treatment.

DAY BY DAY, IN EVERY WAY, WE'RE GETTING WETTER AND WETTER!

# A 10-minute talk on Physiology which may make you ten years younger

It is a practically universal law of Nature that any muscle or organ which is not exercised regularly, sooner or later gives trouble. Yet we neglect the very ones on which health and life depend!

**NINETEEN** years ago Metchnikoff, famous scientist at the Pasteur Institute in Paris, startled the medical world with his announcement that in the human colon lay the secret of life and health.

The colon, or large intestine, is a hollow tube about four feet long, equipped with rings of muscles like a set of clamps. By contracting one after the other, these muscles force the contents of the tube along.

The colon is never empty. Into it drains the waste which the body must get rid of—dead cells, poisonous acids, waste from food which the body cannot use.

### How the body removes this waste

The muscles of the colon must keep all this waste moving—otherwise it decays and generates deadly poisons which soak through into the blood and flood your whole system.

Premature age, loss of vigor and vitality, skin and stomach troubles are the result. And as the body grows weaker, the way is left open for serious and even fatal disease.

That is why constipation is so dangerous. That is why the first thing your doctor wants to know—no matter what you consult him for—is: are these muscles acting regularly—freeing you of the poisons that gather in your system?

What this does to the muscles of your arm, Fleischmann's Yeast does to the muscles of your intestine—gives them normal, healthy exercise

The reason is simple. We inherited our bodies from ancestors who ate an abundance of the raw foods of the forest. Such foods created a bulk which gave the muscles of the intestine plenty of work to do, exercising them regularly and constantly. Today our civilization demands more delicate foods—marvellous in variety and in taste—but leaving the muscles of the intestine with too little work to do. This makes them weak and flabby—just like the muscles of your arm without exercise.

### Drugs only increase the trouble

Seventy-five million dollars is spent every year in America alone for cathartics and purgatives. Yet such drugs not only cannot cure constipation—they actually increase it. They make the muscles act, it

THESE FACTS have been substantiated by some of the best scientific brains of the country, many of whom have been engaged in research on Fleischmann's Yeast during the last three years.

is true, but they do it by nervous irritation. That is not exercise. Each time it happens, it leaves the muscles weaker than before.

The only way to relieve constipation permanently is by giving these muscles natural, healthy exercise.

You can take your choice: either treacherous drugs which only make matters worse, or natural exercise of the intestinal muscles as nature intended! Either a losing battle with poisons that sap your vitality and cloud your brain—or the joy of vigorous lasting health!

His famous paper 20 years ago started the medical world

### The simple food that is restoring health to thousands

Everywhere physicians and hospitals are prescribing Fleischmann's Yeast today—not as a medicine, but as a fresh corrective food which gives the intestinal muscles regular, natural exercise.

Every cake of Fleischmann's Yeast consists of millions of tiny living plants, which mix with the waste products in the colon, softening them, and increasing the bulk of the waste. This greater bulk gently encourages the muscles to act, and at the same time strengthens them by offering just the resistance they need.

Our delicate modern foods leave the intestinal muscles with too little work to do

Day by day Fleischmann's Yeast builds up the flabby muscles of the intestine—exactly as regular exercise builds up the muscles of your arm

Gently, regularly, they respond—easily and naturally the waste is moved along and out of your system!

Your own physician will heartily endorse this principle of regularly exercising the intestinal muscles as the only way to relieve constipation and all its evils.

Fleischmann's Yeast is in no sense a purgative and does not produce immediate violent action.

It must be eaten regularly to secure lasting results.

You couldn't run a race—unless your leg muscles had been regularly exercised—neither can you keep healthy without regularly exercising the intestinal muscles

Eat at least 2 or 3 cakes a day—plain, or dissolved in water, milk, or fruit juices—preferably half an hour before a meal, or the last thing at night. If you eat it plain, follow with a glass of water. Get several cakes at a time—they will keep in a cool, dry place for several days. Be sure you get Fleischmann's Yeast. All grocers have it.

**Appetite and energy restored—**Yeast is the richest known source of Vitamin-B, on which health and vigor so largely depend—it is inexpensive and easily available. Men and women troubled with loss of appetite and energy, or faulty digestion, have found that these troubles disappear when they eat Fleischmann's Yeast regularly.

By helping to "tone up" the whole system, and at the same time keeping it free from poisons, Fleischmann's Yeast enables you to eat more, and to get more benefit from the food you eat.

**Skin and complexion cleared—**Skin troubles are often danger flags of lowered vitality—generally associated with constipation. Fleischmann's Yeast is now established as a food which corrects the basic cause of many disorders of the skin.

That ruddy glow of health, that freedom from such unhealthy skin conditions comes only from perfect health within. Fleischmann's Yeast rids you of these disorders by increasing the number of white corpuscles in the blood and keeping stomach and intestines in a natural, healthy state.

THE PEOPLE MAKE A COUNTRY

(Edmonton Journal)

In his address at Tuesday's luncheon Lieut.-Col. Biggar told how, when driving along an Ontario country road, he began to see a man a lift. The latter began the conversation by saying: "Do you know, I have been walking up and down this road for two months and you are the first person who has picked me up. It seems strange to me that no one has done so, because, you see, I come from the west."

As was to be expected, they were immediately on good terms and began to compare the two parts of the Dominion. It was a singularly beautiful locality through which they were passing and Lieut.-Col. Biggar said, pointing to one piece of landscape, "You have to admit it is pretty hard to match that out west." To which the scornful reply of his companion was: "Fah! It's the people that make a country."

WHAT'S GOING IN THE MONEY AND STOCK MARKETS TODAY

TAX RATE SHOULD BE ABOUT SAME AS LAST YEAR'S

At a session of the Common Council yesterday afternoon, the total estimate was presented as \$1,170,274.88. The amount added to the total of \$687,291.76, the city's proportion of the county taxes, will make a total levy in the city about the same as last year.

The total revenue requirements for the city have steadily increased last year. In 1912 the total assessment was \$660,729, which shows that the assessment has increased nearly a million dollars inside ten years.

GIANT CONSTABLE OF MONTREAL IN STRENGTH FEATS

Montreal, Jan. 31.—Arthur Giroux, giant provincial constable, broke some world's weight lifting records here last night. The first was when he raised with both hands two 300 pound weights over his head weights of 231 1/2, 241 and 250 1/2 pounds. Another record was broken when, using one hand, he raised 293 1/2 pounds in the air. The record made here some years ago of lifting the long dumbbell over the head with both hands, Giroux lifted 307 1/2 pounds. Another feat of strength was shown when with one hand he raised to his shoulder a dumbbell weighing 347 pounds. Finally he lifted from the ground to the level of his chest four iron dumbbells attached together, combined weight 530 pounds.

KNOCKED DOWN BY TRUCK, GIRL CATCHES HER TRAIN

Little Thing Like Automobile Accident Not Enough to Spoil Engagement.

New York, Jan. 31.—Eleanor Benjamin of 47 East Sixteenth street, Brooklyn, started for Utica to take part in a skating contest. At the ferry approach to the Lackawanna Station in Hoboken an automobile truck loaded with milk cans knocked her down. Patrolman Cassidy was on duty at the ferry slip. He carried the girl to a waiting room. Sympathetic witnesses inquired for a doctor, and telephoned for an ambulance. Gustav Rielen of Little Ferry, N. J., who drove the truck, was placed under arrest. A physician was found. As he pushed his way through the crowd the girl opened her eyes and jumped up in alarm.

"What's the matter?" she asked. "Has the train gone?" The bystanders explained to her that she was the victim of an automobile accident and must lie still. She said that was all nonsense, declared positively that she would not make a charge against Rielen, and refused to permit the doctor to question her. "Don't be foolish," she told everybody. "I've just got to catch that 'thracas' train."

POPULAR GIRL IS PRAISING TANLAC

Miss Ions Declares It Completely Overcame Indigestion, Restoring Lost Weight and Full Strength.

"I never gave a statement for any medicine in my life but Tanlac helped me so much I think it is only right I should tell about it," declared Miss Margaret Ions, 440 11 1/2 street, N. W., Calgary, Alberta. Miss Ions served overseas in the war and is a highly respected and popular girl. "I was in a badly run-down condition for a year," she said. "I fell off fifteen pounds and felt tired and worn out all the time. My appetite left me, the little I did manage to eat didn't seem to do me a particle of good, and I suffered terribly from indigestion. My nerves were all unstrung. I could get no rest at all and really don't believe I ever saw a well day. "But two bottles of Tanlac changed things completely. I began to pick up at once, have gained five pounds, and never felt better. My nerves are steady, I sleep soundly, and my indigestion is gone. It is a pleasure to recommend Tanlac."

AMERICAN LEAGUE WILL MEET FEB. 19

May Adopt Home Run Zone Rule at Philadelphia Conference Despite Opposition.

Chicago, Jan. 31.—The spring schedule meeting of the American League will be held in Philadelphia Feb. 19, President Johnson announced recently.

The decision to hold the meeting in Philadelphia instead of here was reached because the annual banquet of the Philadelphia baseball writers will be held on that date, and President Johnson, together with Ty Cobb and George Sisler, will be the guests of honor. More than 1,000 will attend.

The principal question to be considered at the meeting will be the adoption or rejection of the plan to lessen freckish home runs. Clark Griffiths, president of the Washington Club, brought the suggestion to the attention of the club owners at their December meeting, and was regarded with sentiment favorable to the proposition.

The National League, however, opposed it, and Commissioner Landis has since stated that he does not favor it. It is possible, however, that the American League will act to restrict home run territory to anything beyond 315 feet from the home plate. While the plan may appear to be radical, President Johnson said it would not be a handicap on the real home-run hitters, such as Ken Williams and Babe Ruth.

PARK SKATER ARRESTED

Teacher Fined \$1 for Disregarding Danger Sign.

New York, Jan. 31.—The first ice skating arrest was made when Policeman James E. Reynolds of the Arsenal station arrested Herbert Schneider of St. Nicholas avenue on a lake in Central Park. He charged in the Night Watch that Schneider, an instructor in the Harlem Evening High School, had passed a danger barrier and had done fancy skating around a large danger sign. Schneider was fined \$1. In his defense he said the sign was useless, as there was no danger in the locality it marked.

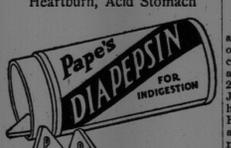

Special police details have been assigned to keep order on the ice and the men have been told to go after offenders on skates instead of following the usual procedure of standing on the bank and blowing a whistle.

THIRTEEN-YEAR-OLD SAMARITAN LANDS IN HANDS OF POLICE

Caught With Stolen Shoes, Says They're Gift From Papa Also Thieves, Whom He Had Fed

New York, Jan. 31.—The charity of Charles O'Connor, thirteen years old, 710 Tenth avenue, and a member of the graduating class of Public School 19, led to his arrest while burdened embarrassingly with four pairs of shoes.

The shoes, which came from the broken shop window of the Peerless Shoe Store, were, in a way, the reward for Charles' devotion to his chum and neighbor, Henry Otto, also thirteen, who had lived at 712 Tenth avenue until a week ago, when he left home.

Charles had been furnishing food for Henry during the week of his voluntary exile. The other morning when he went to invite Henry to breakfast with him, Henry, who was a member of the South Devon Archery Club, pointed it out to Charles and suggested that they bear gifts to Charles' family. They were seen leaving the store by Patrolman John De Carlo, who collared Charles. Henry tossed his gifts to the winds and ran like a hare, escaping arrest.

Charles was held for examination on a charge of juvenile delinquency.

GORMAN TAKES 220 AT SARANAC

Beats Jewtraw Out on Home Stretch, Where Cup Leader Falls—Garnett Takes Lap Prize in Mile, but Spills Near Finish.

Charles Gorman of this city got away to a good start in the third meet of the Adirondack Gold Cup skating championships, which started at Saranac Lake yesterday, by capturing the 220 yards after a great brush with Jewtraw. He fell in the preliminary heat of the mile and failed to place. Frank Garnett qualified for the mile and in the final was awarded a lap prize, having led for four of the eight laps, but in the last lap he fell through a chance to place among the winners. The race between Gorman and Jewtraw was a feature. Jewtraw had the blocks and Gorman on the outside. When the gun went off Gorman leaped forward and was after the flying Jewtraw and despite his best efforts he was unable to pass him as they approached the tape Gorman was passing his famous rival when the latter fell.

Summary: 220 yards event—Won by Charles Gorman, St. John, Paul Foraman, New York, second; Edward Gloster, Toronto, third. Time, 19.4 seconds. One mile event—Won by Harry Kasky, Chicago, William Steinmetz, Chicago, second; Edward Corcoran, Johnson City, third. Time, 2:04.4-5. Points: Gorman and Kasky, 30; Foraman and Steinmetz, 20; Gloster and Corcoran, 10.

A NOTABLE ADVANCE IN CURE OF TETANY

Chicago, Jan. 31.—Professor Anton J. Carlson, Head of the Department of Physiology in the University of Chicago, announces that during the last two years Assistant Professor L. R. Dragstedt and Associate Professor A. Luckhardt of the University have made fundamental contributions to the causes and control of tetany and allied metabolic and nervous disorders.

By preventing or controlling the acute tetany for five or six weeks following the extirpation of the parathyroids in dogs, a chronic state is developed in these animals that appears to be identical with idiopathic epilepsy and allied disorders in man, such as spasmodophilia and convulsion in children, tetany of pregnancy, etc. We have then for the first time these diseases developed in the experimental animal, which permits a more complete analysis of these disorders than has hitherto been possible in the human being. The research is being pursued in detail with reference to the influence of the tetany toxins on the kidneys, the liver, the eyes, and the nervous system.

The methods of control of the tetany diseases found effective in dogs are being applied to allied diseases in man. This work has opened up an important field in physiological and medical research.

12 'KLAN LADIES' IN BLUE CAPTURE MOONSHINERS

Alkahoma City, Jan. 31.—Dressed in flowing blue robes and hoods, and with white crosses covering their breasts, the "Ladies of the Ku Klux Klan" began their first open activities here last week by capturing a still in operation in a house four miles south of the city.

Twelve members of the organization, said to be an auxiliary of the Ku Klux Klan, slipped quietly out of the city in motor cars, stole up to the house, overpowered two men operating the still and held them until law enforcement authorities were called.

The women made the capture without the aid of a man. Four of the heaviest women sat on the prisoners until the police arrived. The men are now in the city jail.

HELP KIDNEYS BY DRINKING MORE WATER

Take Salts to Flush Kidneys and Help Neutralize Irritating Acids.

Kidney and bladder irritation often result from acidity, says a noted authority. The kidneys help filter this acid from the blood and pass it on to the bladder, where it may remain, irritate and inflame, causing a burning, scalding sensation, or setting up an irritation at the neck of the bladder.

It seldom fails to relieve the torment and discomfort. Sufferers from skin trouble should get a little jar of Mentho-Sulphur from any good druggist and use it like a cold cream.

Bladder weakness, most folks call it because they can't control their urine. While it is extremely annoying and sometimes very painful, this is often one of the most simple ailments to overcome. Begin drinking lots of soft water, also get about four ounces of Jad Salts from your pharmacist and take a tablespoonful in a glass of water before each meal. Continue this for two or three days. This will help neutralize the acids in the system so they no longer are a source of irritation to the bladder and urinary organs, which is then at normal again.

Jad Salts is inexpensive, and is made from the acid of grapes and lemon juice, combined with lithia, and is used by thousands of folks who are subject to urinary disorders caused by acid uric acid.

Here you have a pleasant, effervescent lithia-water drink which may quite relieve your bladder irritation. Ask your physician to examine your kidneys at least twice a year.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

The Civic Power Commission met at City Hall last evening with A. M. Rowan in the chair in the absence of R. A. McAvity, the chairman. Mayor Fisher read a letter from Hon. J. B. M. Baxter, city solicitor, recommending that land be expropriated for the building of the station and establishment of the right of way, as some of the heirs were minors. On motion of F. S. A. McMullin seconded by W. L. Harding, the commission decided to take this course. A bill of \$151.75 presented by the Mayor for the pay of engineers of the city public works department up to January 1st, 1923, was passed together with one for seventy-five cents for expressage on plans. A bill of \$80 due the city solicitor for making several contracts of the contract between the City of St. John and the N. B. Electric Power Commission was referred to the Common Council.

POSTPONE BOOK OF PRAYER MATTER

Church of England Questions Before the National Assembly.

London, Jan. 31.—(Canadian Press Cable).—The national assembly of the Church of England yesterday decided to postpone until next July consideration of the proposal to revise the Book of Common Prayer, as well as other business. This decision was reached after a lively debate in which the Deans of Westminster and York suggested that the consideration be deferred at least a year. Hugh Cecil and the Bishop of Durham protested against the postponement, the former saying that the consideration would not fall if other measures on the agenda were postponed.

The Bishop of Durham declared that the rest of England should fulfill the historic role of rescuing the church from London infidelity.

The Scotchmen lost only one contest and that was in the afternoon at the Thistle Club when the Wingham ring, under Skip Crawford took B. Bramwell's stone heaves into camp to the tune of 22 to 8. New York, Jan. 31.—Harry Greb, of Pittsburgh light heavyweight champion of the United States, defended his title in a fifteen round bout with Tommy Loughran of Philadelphia at Madison Square Garden last night. Both weighed 168 pounds.

Loughran was a defensive puzzle in the first round and in the second he pocketed several stiff lefts to the champion's face. The challenger added a few more in the third while Greb pruned wildly, exchanging effectively. They exchanged more evenly during short rallies in the fourth. Greb landed two hard right jabs during the quiet fifth but was cautioned to stop butting with his head. Both men tried unsuccessfully for an opening in the sixth.

Greb remained baffled and Loughran was generally on the defensive in the seventh, but in the eighth the champion quickened the pace finding the challenger willing to exchange. Greb had the edge of some loose fighting in the ninth.

## Gov. Pugsley Makes Replies To Rumors

### Has Not Resigned or Signified Such Intention—Leaves For Fredericton.

Montreal, Jan. 31.—I have not resigned. I have not signified my intention of resigning. Thus, for the moment, Hon. Wm. Pugsley, lieutenant-governor of New Brunswick, has nailed the broadly circulated rumor that he was on the point of giving up office. Seen today by a representative of the Canadian Press here, Hon. Mr. Pugsley contented himself with this brief rebuttal of the report. Asked if he would affirm that he did not intend to resign, he declared he could not make this statement. "My term of office expired in November last and, of course, I am continuing at the moment as constitutionally required," he said.

Hon. Mr. Pugsley leaves Montreal for Fredericton this evening when the new government of Hon. P. J. Veniot, who succeeds Hon. Mr. Foster, will be sworn in at the capital tomorrow.

## "ROGUES' GALLERY" FOR ST. JOHN

St. John is to have a "Rogues' Gallery." Commissioner Thornton this morning received the necessary attributes and one will be established in a room at police headquarters at once. There is a cabinet containing 500 cards, on each of which is a space for answers to questions such as color of hair and eyes, height, age, marks of identification, record and other things. On the back of the card is room for two small photographs of the "rogue," one front and one side face. For the present photographs will be taken by local photographers, but it is planned to have a camera and a man to operate it soon. The cabinet is similar to one installed in Halifax about a year ago. The fingerprint apparatus will be put in the same room. When information about a criminal is wanted, information will be taken from the card and forwarded, but the card itself is retained as a part of the record for the local police.

Word was received in the city this morning from the Cunard Line headquarters in Liverpool that the Soviet government had given permission to the Cunard Line to open an office in Kiev, the capital of Ukraine to arrange transportation by its steamers to and from Soviet Russia. This is the first office to be opened in the Ukrainian capital since the war and the announcement is considered to be of significance in regard to the policy of the Soviet and Ukrainian governments.

### HARBOR REVENUE.

Commissioner Buech said this morning that the harbor revenue for January, 1923 would be about \$6,000 in excess of that for the corresponding month last year. He attributed this to the fact that there was more freight offered, the berth accommodation being well taken up and the fact that ships had been handled to good advantage. The commissioner said that Commander Elliot of the C. P. R. had complimented the harbor master on the accommodations and the way in which the ships had been handled. Asked as to whether the usual grant of \$1,000 to the swimming schools stood or whether it was included in the grants cut down or refused altogether the commissioner said that the grant stood though it was hoped to make it larger that some improvements might be added.

## GARNETT LED TILL LAST LAP

### Clear Zero Weather and Good Ice for Today.

### Carpenter and Joe Beckett Reported Matched for May 14 in London—Turf Men of New England Meet.

A despatch from Saranac Lake today says that in the mile race Harry Kay of Chicago won in a close finish with Wm. Steinmetz of Chicago, after Frank Garnett failed to maintain the lead he held until the final lap. Edward Corcoran of Johnson City, finished third in the one-mile event. Garnett won the lap prize.

The one-hat and three-quarter-mile events were on the card for today. Clear zero weather, with little wind, and perfect ice conditions were promised.

Carpenter and Beckett. Paris, Jan. 31.—Georges Carpenter will meet Joe Beckett, the English heavyweight, on May 14, in London, according to Francois Descamps, Carpenter's manager.

Boston, Jan. 31.—The annual roundup of the followers of the turf in New England drew more than 700 horsemen to this city to attend various meetings under the auspices of the Bay State Circuit.

At a meeting of the stewards of the circuit yesterday three tracks came into the organization and one dropped out. The new members are Readville, Marshfield and Worcester, while Norwich surrendered its dates. Combination Park, Melford, accepted Norwich's dates and will have two meets this year. Readville's meet will be run as part of the grand circuit programme. Worcester, nominally a member, did not have a meeting last year, but will carry on this year.

## TAX RATE MAY BE BIT LOWER

### Mayor Gives Opinion That It May be Under \$2.98—The Estimates Show Reduction.

Mayor Fisher this morning gave it as his personal opinion that the tax rate this year would be slightly lower than last year when it was \$2.98.

It appears that through some error in figuring an item of about \$85,000 derived from the sale by the city of lands and properties to be applied against the interest and sinking fund charges was placed on the debit side of the ledger instead of on the credit side which made the estimate of \$70,000 less. The mistake was discovered on Monday. Then arose the question as to whether or not the total estimates, which had been cut by about \$40,000, should be gone over again and the matter of salary increases taken up for further consideration. Today was the last day in which this could be done and no action was taken as it would have well been impossible to go over anything this again.

The total of estimates for the city, including schools for 1923 is \$171,028.76, nearly \$20,000 less than last year. The total estimate for schools for 1923 was \$467,149.81 as against \$446,370.51 for last year. Independent of schools the city estimates for 1923 were \$108,878.90 and for last year they were \$748,629.98. The Common Clerk is now ready to make out the city warrants for the assessors.

## C. W. L. Session In City Today

### Diocesan Sub-Division Meeting in K. of C. Hall—Delegates From Other Places.

The annual meeting of the Diocesan Sub-Division of the Catholic Women's League is being held in the Knights of Columbus Hall here this afternoon. About twenty-eight delegates will be present from the local sub-divisions of the St. John diocese, including Moncton, Sussex, St. John and St. John North. The out-of-town delegates will include Mrs. James Prid, president of the Moncton sub-division, and Mrs. DeVine, president of the Sussex sub-division. There will be five delegates from the Moncton body and one from Sussex.

The visitors were guests at noon at a luncheon given by the diocesan president, Mrs. D. P. Chisholm, in the Uptown Tea Rooms, King Square. Included amongst the matters taken up at the afternoon meeting will be the presentation of sub-division reports and the election of officers on the diocesan board. A general meeting is planned for tonight for all the members of the diocese, and will be held in the Knights' hall. Mrs. Chisholm will preside at both meetings.

## OPPOSITION STILL SEEKING A LEADER

According to J. D. Palmer, of Fredericton, leader of the opposition party in the provincial arena, a convention of the Conservative party will be held in St. John about February 20. Regarding a report that he would present his resignation as leader, he could not say anything definite at the present time but would present his views to the gathering.

C. D. Richards, house leader of the opposition, whom rumor has named as Mr. Palmer's successor, has declined to make any statement as to his willingness to accept the leadership. He said he had no intention from Mr. Palmer's resignation to resign, nor did he know if the party leaders desired him to take the post. Locally there is some talk of a possibility of the leadership being offered to L. P. D. Tilley, but Mr. Tilley declined to discuss the matter.
