MUNICIPAL COUNCIL.

The Matter of Increased Expenditure on Public General Hospital.

A Discussion Over How the Levy for the Assessment Shall Be Made.

Coun. Christie and Mayor White on the Actual Needs of the Institution and Especially as to the Improvements Demanded—Other Business.

The regular quarterly meeting of the municipal council was held Tuesday afternoon at the Court House, and a long session it proved to be, lasting over four hours. Warden McMillin presided, and there were in attendance...

City of St. John—Coun. White, Macrae, Stackhouse, Robinson, Hamm, Maxwell, Tutts, Lewis, McGoldrick, Bullock, Baxter, Allan and Millidge. Sincere—Coun. Morgan. Lancaster—Coun. Armstrong, Long and Lowell.

St. Martins—Coun. Cochran, Mosher and Radford. St. John—Coun. White, Macrae, Stackhouse, Robinson, Hamm, Maxwell, Tutts, Lewis, McGoldrick, Bullock, Baxter, Allan and Millidge. Sincere—Coun. Morgan.

After the confirmation of the minutes of the last meeting, the report of the finance and accounts committee was submitted. They recommended the payment of accounts and in addition there to the amounts of taxes assessed several accounts of Quaco school lands, board of examiners of surveyors of lumber, peddlers' license and auctioneers' license to be distributed by law directed.

The committee further recommended that the following named persons be relieved of arrears of taxes due by them, namely:—The estate of John McKenna, of the parish of Simonds, the widow having paid the sum of \$150. The balance due, \$125, be struck off.

That Wm. Coleman, of the parish of Lancaster, be relieved of taxes assessed against him, he being a cripple. In the matter of the charge made by Wm. Fox against the parish of Lancaster in the parish of Lancaster, which was referred to the councillors of that parish with instructions to report to your committee, the committee having held an investigation into the said charge, under oath, report the evidence taken before them, without any recommendation and after fully considering the whole matter, your committee find that Constable Hanson was negligent in the discharge of his duty as a constable, and they recommend that he be dismissed from the office.

The committee had before them a delegation from the board of commissioners of the General Public Hospital, in support of a petition of the board submitted to the council at its last meeting and referred to your committee for further consideration, relating to proposed improvements in the General Public Hospital.

After careful consideration of the whole matter, your committee recommend that the committee on bills for legislation and by-laws be instructed to prepare a bill for enactment at the next session of the legislature, to pay to this council to issue debentures or said improvements to the amount of \$25,000, each debenture to be in sum of \$500 each with interest at the rate of three and a half per cent. per annum, 40 years to run.

And also that the law be amended so as to empower this council to all purposes of the General Public Hospital in lieu of as at present issued by the board of hospital commissioners.

The committee recommend that a telephone be placed in the office of the registrar of deeds to connect with the same wire in the sheriff's office, providing the same can be procured at second telephone rates, namely, one cent per line, and that this amount be referred to the warden with power to act.

That portion of the report dealing with bills was adopted without discussion. The section providing for the distribution of the amounts to the credit of the several funds was also adopted. That extending relief to certain ratepayers passed. The recommendation that Constable Hanson be dismissed was agreed to.

When the section providing for the issue of the \$25,000 of debentures for the improvement of the hospital was read, Coun. Christie suggested an amendment which made provision for the payment of interest and sinking fund. The commissioners wanted an additional allowance of about \$6,000. The assessment for the maintenance of the institution was now \$12,000. It was for the council to decide how far they would go in this direction.

Secretary Vincent pointed out that now the hospital commissioners issued a warrant every year and the council issued another. The finance and accounts committee recommended that the whole assessment be levied by the council itself. That was why no mention was made in the report as to the additional assessment.

Coun. Baxter made some inquiries as to how much of a levy the commissioners could make, and the secretary replied that they could go up to \$12,000. Coun. White said the hospital commissioners would ask the Council to make a levy each year, and it would not exceed \$12,000. It would not be well to have two levies, and he advocated giving to the hospital commissioners the right to make this extra levy. The hospital building was an old structure and it was built as economically as possible. It was a brick building with a shingle roof. The roof had been repaired from time to time. After 20 years the building was in need of important and extensive repairs. It was necessary to renew the roof, and it was proposed to put on a copper roof. Much money had been expended

in repairing the old one. The building should be properly ventilated. A shaft was built in the centre, but it did not go through the roof. The method of ventilating proposed was to put in a system of double windows, which had given much satisfaction in the new Montreal hospital. The floors were to be renewed. The nurses' home was to be enlarged, which was evidently a necessity. Other repairs in the interior of the main building were anticipated, all of which were urgently needed.

Taking up the maintenance of the hospital, Coun. White said the number of patients used to be in the neighborhood of 60. Now there were 118 people there. The treatment of the patients was more expensive than formerly, so were the medicines used and the cost of surgical work. Help cost more and the running expenses were higher. Despite the effort to make out that the hospital was unpopular and not well managed, it seemed more popular than ever, for it contained twice as many patients as in former years. No matter what was said against it, its popularity was ever on the increase, the patients having increased, the good of more nurses was evident. There were now on the staff 13 nurses, and it was proposed to add 5 more. A lady nurse was required to be at the head of this staff. Then some urged the appointment of a steward. The commissioners had several reports looking into the matter of purchasing the supplies. He thought the commissioners should have power to levy the assessment for the maintenance of the institution.

Coun. Ruddleick agreed that it would be well to have the hospital improved. He did not concur in Coun. White's statement as to the expensive of drugs, which he considered could be bought cheaper now than ever before. Coun. McGoldrick looked up Coun. White's remarks in all respects. It was evident that more money was needed to maintain a hospital containing over 100 patients than it housed a smaller number of people. Despite the nasty things said at the investigation, the 118 people now in the hospital seemed to be well cared for. He hoped the recommendations would be approved.

Coun. Bullock failed to understand why so much more money was needed for the maintenance of the institution. The hospital would be no bigger, and he could not understand why so much money was required. Coun. Allan advised Coun. Bullock to visit the hospital more frequently. He would find it in good condition. There was hardly a week but what some new expense would be discovered in the way of maintenance. The trustee in the hospital would be as industrious as compared with what were utilized years ago.

Coun. Macrae insisted that the recommendation should be made in respect to the provision of sinking fund and interest. The secretary inserted in the section the words required to provide for sinking fund and interest.

Coun. Maxwell asked if the bonds previously issued for the hospital were issued by the commissioners or the council. Coun. White replied that the commissioners issued bonds years ago. When some of the members of the municipality assumed the responsibility of re-issuing the same and the council paid the interest on them.

Coun. Maxwell said if the commissioners issued bonds in the past, why should they not issue the proposed \$25,000 bonds? Coun. White replied that the commissioners were willing to issue the bonds if the council wished it. It was enough for the council to order the issue of the bonds than the commissioners. It made no difference whether the council paid the interest or gave the money to the commissioners with which to pay it.

Coun. Maxwell urged that the issue of bonds by the council and commissioners should be made in such a way that it would be difficult to get at what the cost of the hospital was. Why not have one body issue the whole lot of debentures required to be sold for various purposes?

Coun. Tutts thought the commissioners should make the improvements under the same name as the money. Coun. Christie went on to tell the councillors of the actual needs of the hospital as represented by the commissioners in the finance and accounts committee. The estimates were about as follows: New floors, \$1,200; new walls, \$155; enameled bins, \$2,000; copper roof, \$4,000; plumbing, etc., \$2,000; new windows, frames, etc., \$4,000. Years ago the commissioners undertook to ventilate the hospital by the idea was abandoned owing to the fact that there was not sufficient money available. This proposition to ventilate it with double windows as was done in Montreal, was a good one. The nurses' home was to be enlarged and 13 additional rooms and a bathroom provided at a cost of \$5,000. An additional \$1,000 was asked for furnishing this house. Two thousand dollars was proposed for expenditure on the epidemic hospital in plumbing and repairs. Then \$4,000 was spoken of for expenditure on external repairs in connection with the buildings and improvements on the grounds. He did not approve of a large outlay on the grounds. The bonds should be issued by the council. The municipality should keep all this business within themselves.

Coun. White assured the council that no large expenditure was contemplated on the grounds in connection with the hospital. Coun. Hamm suggested that the mayor's committee visit the hospital and see for themselves what was needed there. Warden McMillin agreed that extra repairs were needed at the hospital.

Coun. Ruddleick protested against the expenditure of a large amount of money for the maintenance of the grounds. Coun. Christie wished it understood that which would issue the bonds the security of the commissioners. The bonds, he thought, would go off at par if issued in small lots. This was an argument in favor of the Council making the issue. The section was adopted.

The next section was then read, providing for the amendment of the law in repairing the old one. The building should be properly ventilated. A shaft was built in the centre, but it did not go through the roof. The method of ventilating proposed was to put in a system of double windows, which had given much satisfaction in the new Montreal hospital. The floors were to be renewed. The nurses' home was to be enlarged, which was evidently a necessity. Other repairs in the interior of the main building were anticipated, all of which were urgently needed.

Taking up the maintenance of the hospital, Coun. White said the number of patients used to be in the neighborhood of 60. Now there were 118 people there. The treatment of the patients was more expensive than formerly, so were the medicines used and the cost of surgical work. Help cost more and the running expenses were higher. Despite the effort to make out that the hospital was unpopular and not well managed, it seemed more popular than ever, for it contained twice as many patients as in former years. No matter what was said against it, its popularity was ever on the increase, the patients having increased, the good of more nurses was evident. There were now on the staff 13 nurses, and it was proposed to add 5 more. A lady nurse was required to be at the head of this staff. Then some urged the appointment of a steward. The commissioners had several reports looking into the matter of purchasing the supplies. He thought the commissioners should have power to levy the assessment for the maintenance of the institution.

Coun. Ruddleick agreed that it would be well to have the hospital improved. He did not concur in Coun. White's statement as to the expensive of drugs, which he considered could be bought cheaper now than ever before. Coun. McGoldrick looked up Coun. White's remarks in all respects. It was evident that more money was needed to maintain a hospital containing over 100 patients than it housed a smaller number of people. Despite the nasty things said at the investigation, the 118 people now in the hospital seemed to be well cared for. He hoped the recommendations would be approved.

Coun. Bullock failed to understand why so much more money was needed for the maintenance of the institution. The hospital would be no bigger, and he could not understand why so much money was required. Coun. Allan advised Coun. Bullock to visit the hospital more frequently. He would find it in good condition. There was hardly a week but what some new expense would be discovered in the way of maintenance. The trustee in the hospital would be as industrious as compared with what were utilized years ago.

Coun. Macrae insisted that the recommendation should be made in respect to the provision of sinking fund and interest. The secretary inserted in the section the words required to provide for sinking fund and interest.

Coun. Maxwell asked if the bonds previously issued for the hospital were issued by the commissioners or the council. Coun. White replied that the commissioners issued bonds years ago. When some of the members of the municipality assumed the responsibility of re-issuing the same and the council paid the interest on them.

Coun. Maxwell said if the commissioners issued bonds in the past, why should they not issue the proposed \$25,000 bonds? Coun. White replied that the commissioners were willing to issue the bonds if the council wished it. It was enough for the council to order the issue of the bonds than the commissioners. It made no difference whether the council paid the interest or gave the money to the commissioners with which to pay it.

FREE BOOK. I will send you the book on Cataract to all suffering from the disease. It explains the origin, danger and cure, and is a valuable treatise on the subject. Address: Special Agent, 23 Doane St., Boston.

so that all warrants should be issued by the Council. The secretary explained that at present the county issued the warrant for the assessment for one set of things and the commissioners issued the warrant for others.

Coun. Robinson was anxious to know how much a state of things came to exist. Coun. Christie told Coun. Robinson that he was in the Council when the assessment for the maintenance of the hospital was made. The county objected to it, but the commissioner threatened to get the legislature to pass the act authorizing them to make the issue, despite the feeling of the Council. At Frederickton the bills and by-laws committee considered the enactment of a permissive bill, which was passed. After that, with the consent of the Council, the commissioners issued the bonds.

Coun. Robinson wanted to know if the Council were to tell what was wanted at the hospital. Coun. Christie replied that the commissioners were permitted to issue the bonds and the Council would order the assessment. This was what was done by the alms house commissioners.

Coun. Christie stated that the hospital commission consisted of nine gentlemen, four appointed by the local government, three by the county of St. John, and two by the city of St. John. The government contributed \$3,800 a year towards the support of the hospital. Let the people of the parish be a ridiculous small grant. The commissioners had handled the money placed in their hands with care and skill. It was asked why so much more money was needed for maintenance. The Royal Commission recommended the lady superintendent, and to additional nurses, and two additional male nurses. The salaries of these nurses would amount to \$2,664, and the superintendent would demand a large salary and the two nurses would have to be paid "good wages." To this must be added the salaries of the other staff.

Coun. Christie was willing to give the commissioners \$4,000 in addition to the \$12,000 annually assessed for the maintenance of the hospital. Coun. Macrae said there was a principle involved. It should be decided whether the county councillors, who were responsible for the support of the hospital, or the commissioners, their appointees, do it. The passage of this section would be so interpreted as an expression of want of confidence in the commissioners. It was done with the consent of the school trustees of the city of St. John.

Coun. Robinson agreed that the matter under consideration was simply one of the mode of payment. The council could if it determined to order the assessments agree upon the amount of the grant.

Coun. Christie stated that the school trustees asked for a certain amount each year and the city of St. John was bound to assess it. But the school trustees were not to be assessed. It was the same with the main figure. It was the same with the main figure. It was the same with the main figure. It was the same with the main figure.

Then the council ordered the assessment. The estimates should be carefully looked into by the councillors. The council should be satisfied with the estimate of the school trustees. The estimate was really needed for the hospital, but when the commissioners proposed to go outside of that the council would not look carefully into the matter.

On the suggestion of Coun. Baxter the following words were added to the wording of the section after the words "commissioners": "And that the section of the act limiting the assessment to \$12,000 annually be amended so that the council may, without a dissenting vote."

The councillors for Simonds, to whom was referred the petition of the St. John Agricultural Society seeking a reduction in the valuation of an assessment on Moosepass park, reported that the valuation of the park had been reduced to \$1,800, and that one-half of the amount is paid in by May 1st, the owners be relieved of the balance due.

The report was adopted. Henry Galbraith, collector of rates in Lancaster, sent in his resignation, which he had tendered on account of ill health. Inquiry was made as to his collection and if he had paid in regularly. It was found that he had not. Magilton reported that his accounts were considerably mixed up. He had statute labor and moneys all mixed up. The letter was laid on the table.

Richard Rawlings, who has been looking after the heating apparatus in the Court House at \$1 per day, petitioned for an increase from November 1st last to \$1.50.

This matter was referred to the buildings committee with power to act. The secretary stated that J. V. McLellan, the registrar of deeds, had submitted his report of the year. He had deposited \$415.50 to the credit of the municipality.

It was ordered that a copy of this report be printed on 10 minutes. W. A. Gallant, late collector of taxes for Musquash, sent in a letter asking for compensation for extra work done in the hunting up of receipts for taxes given by a former collector, who failed to pay the money into the treasurer. The bill was for 14 days at \$2.50 per day.

It was held by some of the councillors, and the auditor looked them up, that the work which Mr. Gallant did was of no value to the county. All he accomplished, it was claimed, was to look over a lot of receipts. Coun. Dean said Mr. Gallant had done it all after his year's collecting was finished. He hunted up receipts given by a defunct collector, and in some instances got the receipts; in others copies of them were made. The man should be paid.

Coun. Macrae asked what it was intended to do with reference to the defalcation of this man Balcom. The bondsmen were well able to pay. Coun. Dean said the amount was about \$1,000. Coun. Macrae thought the matter of Mr. Gallant's bill should go to the finance and accounts committee for consideration, they also to consider what should be done with the amount due the county by Mr. Balcom.

The secretary said he gave Mr. Gallant instructions similar to those given other collectors, with this addition, that he was to get all the information possible relative to Balcom's defalcation. Mr. Gallant, he presumed, got all the information he could, for use in the case against the defaulter's bondsmen. After this explanation, Coun. Baxter moved that Mr. Gallant's bill be paid at \$2 per day.

This motion passed. In the same case, the secretary said the committee who took up the matter of Mr. Balcom's defalcation had not acted, desiring first to get the facts of the case, and then to get at Musquash who, if arrested for their taxes, would go to jail and then proceed to pay for a part of their taxes. The secretary reported that James Donnelly of Musquash wanted a refund of taxes paid. Coun. Dean said Mr. Donnelly had refused to pay taxes or do any work on the roads for six or eight years. He had a lot of land, and he wanted a transfer of some property. Now he wanted the money refunded. It should not be done.

Coun. Millidge moved that it be referred to a committee to consider the encroachment made by Mr. Charlton on the highway. Mr. Charlton had a fence in the parish of Simonds that did not encroach on the road. The board of health was asked to appoint one of the physicians practicing at St. Martins to vaccinate people free of charge. There was a long discussion over this resolution, and finally Coun. Cochran changed his motion so as to recommend that the board of health be asked to provide for the vaccination free of charge of all people who cannot pay therefor.

This passed and the Council adjourned. STEALING NOT THEFT. Stealing coal under certain conditions is not theft, and the person who does the stealing will not be treated as a thief, according to the principles laid down by Magistrate Ritchie yesterday morning.

It was during the hearing of a case in which a young fellow was charged with taking a quantity of coal from a car. The prisoner said that a woman whose husband was sick in bed and who had no coal, had asked him to get some. Then the magistrate decided that if the boy's story was true the man would be dropped. He said that at times like the present when the weather is very cold, it would not be a criminal act for any person to steal coal provided it was necessary for the comfort of any sick or helpless one. It would not be stealing any more than would be the case if a man took a loaf of bread to keep himself or his family from starving.

And Deputy Jenkins added that he would not hesitate a minute about stealing coal if he were in poor circumstances, and his children suffering from cold.

JULIAN HALPH DEAD. NEW YORK, Jan. 23.—Julian Ralph, author and war correspondent, died tonight at his residence here. Dr. Calvin S. May, who attended Mr. Ralph, gave the cause of death as dropsy, complicated with ulcer in the stomach and enlargement of the liver. Mr. Ralph was stricken with a hemorrhage while he was acting as correspondent with the British army during the Boer war. A second hemorrhage occurred at St. Louis immediately after he had received his appointment as eastern representative of the Louisiana Purchase Exposition.

Mr. Ralph was born in New York on May 27, 1853, and served on the staffs of several of the New York papers. He became attached to the London Daily Mail in 1899. He leaves a widow and five children.

VALUE OF TESTIMONY Greater Than Assertion. There is none of us so hardened but when we have been able to aid our fellow creatures by conferring a benefit or bringing a little comfort into their lives we like to have appreciation shown. This generally affords more pleasure than the performance of the act itself, and in this connection the following letter from a Texas lady is of more than usual interest.

"Dear Friends: I address you as such, for you have been such to me. I suffered for three years of agonizing pain. I was treated at the hospital, and the new and elegant hospital, of Memphis; they only gave me temporary relief. I came west thinking the change of air and water would benefit me; five months ago the bleeding pipe came back on me, and bled so much that I thought I would die. I have had four of the finest doctors in this section of Texas; all they did was to finally nearly let me go to my grave; all they wanted was a big sum of money from me and to operate on me. I said, no surgeon's knife would enter me; if it was my time to die God knew it, and when I died I would die all together.

"I began hearing about your medicine. I had no faith in you, but I sent and got a box of your Pyramid Pile Cure; in two days the blood flow had slackened to one half the amount, and in one week I felt so much better I walked four blocks and did a little housework. I was not bleeding then, in three weeks I was well.

"God bless you for putting such a wonderful medicine within the reach of suffering men and women. I shall never cease to recommend your medicine or be without it; also I used your Pyramid Pills. Sallie A. Hearndon, Paris, Texas."

"Testimony like this (for the genuineness of which we vouch) should be more convincing than all claims and assertions, and should leave no doubt in the mind of the reader as to the merit of the remedy. Pyramid Pile Cure is sold by druggists for fifty cents a package, or will be mailed by the makers to any address upon receipt of price. Write Pyramid Drug Co., Marshall, Mich., for their book on cause and cure of Piles."

John Burns of the schooner Carrie Bell, from St. John for New York with lumber, abandoned off Mt. Desert January 19, arrived in Rockland Saturday badly frost-bitten. He was sent to the port physician to the U. S. Marine Hospital in Portland.

You Can Buy BEST OF WASH DAY SOAP of any Grocer. BEST FOR EVERY DAY.

Coun. Cochran called attention to the need of free vaccination out in the parish of St. Martins. The board of health gave notice that all who applied for their office in the city would be vaccinated free of charge. It would be difficult for people to come in from St. Martins. Children were not allowed to attend school unless they had been vaccinated, and he knew of three schools which were closed because of the requirement. He moved that the board of health be asked to appoint one of the physicians practicing at St. Martins to vaccinate people free of charge.

There was a long discussion over this resolution, and finally Coun. Cochran changed his motion so as to recommend that the board of health be asked to provide for the vaccination free of charge of all people who cannot pay therefor.

This passed and the Council adjourned. STEALING NOT THEFT. Stealing coal under certain conditions is not theft, and the person who does the stealing will not be treated as a thief, according to the principles laid down by Magistrate Ritchie yesterday morning.

It was during the hearing of a case in which a young fellow was charged with taking a quantity of coal from a car. The prisoner said that a woman whose husband was sick in bed and who had no coal, had asked him to get some. Then the magistrate decided that if the boy's story was true the man would be dropped. He said that at times like the present when the weather is very cold, it would not be a criminal act for any person to steal coal provided it was necessary for the comfort of any sick or helpless one. It would not be stealing any more than would be the case if a man took a loaf of bread to keep himself or his family from starving.

And Deputy Jenkins added that he would not hesitate a minute about stealing coal if he were in poor circumstances, and his children suffering from cold.

JULIAN HALPH DEAD. NEW YORK, Jan. 23.—Julian Ralph, author and war correspondent, died tonight at his residence here. Dr. Calvin S. May, who attended Mr. Ralph, gave the cause of death as dropsy, complicated with ulcer in the stomach and enlargement of the liver. Mr. Ralph was stricken with a hemorrhage while he was acting as correspondent with the British army during the Boer war. A second hemorrhage occurred at St. Louis immediately after he had received his appointment as eastern representative of the Louisiana Purchase Exposition.

Mr. Ralph was born in New York on May 27, 1853, and served on the staffs of several of the New York papers. He became attached to the London Daily Mail in 1899. He leaves a widow and five children.

VALUE OF TESTIMONY Greater Than Assertion. There is none of us so hardened but when we have been able to aid our fellow creatures by conferring a benefit or bringing a little comfort into their lives we like to have appreciation shown. This generally affords more pleasure than the performance of the act itself, and in this connection the following letter from a Texas lady is of more than usual interest.

"Dear Friends: I address you as such, for you have been such to me. I suffered for three years of agonizing pain. I was treated at the hospital, and the new and elegant hospital, of Memphis; they only gave me temporary relief. I came west thinking the change of air and water would benefit me; five months ago the bleeding pipe came back on me, and bled so much that I thought I would die. I have had four of the finest doctors in this section of Texas; all they did was to finally nearly let me go to my grave; all they wanted was a big sum of money from me and to operate on me. I said, no surgeon's knife would enter me; if it was my time to die God knew it, and when I died I would die all together.

"I began hearing about your medicine. I had no faith in you, but I sent and got a box of your Pyramid Pile Cure; in two days the blood flow had slackened to one half the amount, and in one week I felt so much better I walked four blocks and did a little housework. I was not bleeding then, in three weeks I was well.

"God bless you for putting such a wonderful medicine within the reach of suffering men and women. I shall never cease to recommend your medicine or be without it; also I used your Pyramid Pills. Sallie A. Hearndon, Paris, Texas."

"Testimony like this (for the genuineness of which we vouch) should be more convincing than all claims and assertions, and should leave no doubt in the mind of the reader as to the merit of the remedy. Pyramid Pile Cure is sold by druggists for fifty cents a package, or will be mailed by the makers to any address upon receipt of price. Write Pyramid Drug Co., Marshall, Mich., for their book on cause and cure of Piles."

THE NEW ARCHBISHOP OF CANTERBURY His Personality, Attainments, Ecclesiastical Views. (N. Y. Sun.)

The new Archbishop of Canterbury succeeding the late Dr. Temple, Dr. Rev. Randall Thomas Davidson, D. D., Bishop of Winchester. Although his appointment which will commend itself to Englishmen through the world, it is one which will probably take the English Church by surprise and for this reason, when Archbishop Benson of Canterbury died, in December, 1898, Dr. Davidson was offered the archbishopric by Queen Victoria through the prime minister, and nomination was declined, chiefly account of health. Consequently, Dr. Temple's death the English Church has been mentioned as possible candidates Dr. Ingram, Bishop of London, who is a great worker, preacher and a special favorite of Queen Victoria by whom he was invited to preach the coronation sermon; Moulle, the scholarly Bishop of Exeter, a decided Low Churchman, and Dr. Boyd-Carter, the former Archbishop of Ely. The usual tradition to Canterbury is from London. Dr. Ingram is only a young man of excessive youth (if not excessive earnestness and energy) is an immigrant in the way of such an appointment as Primus of All England.

Dr. Davidson is ten years older than the Bishop of London, and has practically served a long apprenticeship in the office, having been chaplain private secretary to two Archbishops of Canterbury. When a curate at Darford, Kent, Archbishop Tait pointed him his secretary, in 1871, when Archbishop Benson was appointed to Canterbury Dr. Davidson received the office of secretary for months. Queen Victoria not only him one of her honored chaplains, also appointed him Dean of Winchester, and later on, in 1887, when Archbishop Benson was appointed to Canterbury Dr. Davidson received the office of secretary for months. Queen Victoria not only him one of her honored chaplains, also appointed him Dean of Winchester, and later on, in 1887, when Archbishop Benson was appointed to Canterbury Dr. Davidson received the office of secretary for months.

In July, 1895, Bishop Davidson nominated Bishop of Winchester, which in the English Church is next to London. As Bishop Davidson has been popular among the clergy as an exceedingly broad liberal administrator.

In personal appearance Dr. Davidson is an attractive man, of medium height, clean-shaven, and with a singularly kind and sympathetic countenance. He is a Harvard graduate, Trinity College, Oxford. During university career he was seriously incapacitated from active work by gunshot accident. As Bishop he did take a position in "honors"—a very unusual circumstance in the education of an Archbishop of Canterbury.

His predecessor in office for the middle class, Dr. Davidson, is a man of high character, and not from the nobility. His father is Henry Davidson of the house, Edinburgh, as Bishop of London. In 1878 Dr. Davidson acted secretary of the great Lambeth conference of the clergyman, and in 1881 he acted as secretary of a young clergyman of four years' standing in the mission work in the world, and was also secretary of the success conferences, and is consequently known to the Bishops of the Episcopal Church in America.

The calling of the Lambeth Conference was opposed by the then Bishop of York and by five of the other Bishops, and it is admitted that it was Mr. Davidson's wise and judicious conduct, as secretary, which brought about the success of the conference. In his account of the conference Dr. Davidson records the fact that the Bishop of Lincoln was excommunicated at the conference, and that he believed if the good American Bishop had been present at the conference, he would have been excommunicated. Dr. Davidson has published several articles in English magazines.

In 1881 Mr. Davidson married. Tait, a daughter of Archbishop Benson, and on the death of Dr. Tait he was a biography of his distinguished father-in-law. It is in these two times of the Biography of Archbishop Davidson that we discern only the literary ability of the archbishop but also his keen sense of humor.

He writes: "I remember my wife's remark, one afternoon five days after I had settled at 22, that the archbishop rebuked me, only for a temporary absence I had prevented him, he said, from catching the train, and I had not seen it. My surprise, he added: 'I never, if I could help it, write single letter of importance, giving it to somebody to pick hole for I often find the silliest people the best critics.'"

On one occasion the archbishop to him, "Davidson, write and tell me how you are a consummate ass, but very kindly."

These who, like the present we have met Dr. Davidson, have all been impressed with his manly character, his true sense of humor, gentleness bearing and his simplicity; so that King Edward VII. is credited with the selection of right man for Archbishop of Canterbury. The appointment is undoubtedly made by the King. The archbishop ranks next to the royal prince, is expected to be present at the coronation of the throne; he is usually the person upon whom falls the duty of informing and conveying the news of the coronation to the world; who solemnizes the baptisms, formalities, marriages and burial ceremonies, and is the chief officer of coronation of a King or Queen; always the trusted adviser of King.

THE PASTOR A PEEPING TOM. A Clergyman of Rome, N. Y., Arrested on Complaint of Two Sisters. UTAICA, Jan. 19.—The Rev. Theophile Wittlinger, pastor of Trinity Lutheran Church, Rome, was arrested today on a charge of eavesdropping. The complainants are the Misses Mary and Caroline Geisler, who charge the clergyman with playing the part of a Peeping Tom. Last night policemen traced a man's footprints from beneath the bedroom window of the Misses Geisler to the house of the clergyman. They rapped on the door and through the curtain they saw the reverend gentleman descend the stairs with a lamp in one hand and a club in the other.

Mr. Wittlinger did not let the policemen in. Subsequently he appeared at police headquarters for an explanation. He stoutly denied the charge against him, but was arrested when the Misses Geisler positively identified him.

The affair has created a big sensation in Rome, where the Rev. Mr. Wittlinger is very prominent among the circles. He went to Rome from Tonawanda last May. He is 29 years old and unmarried. He is a graduate of Elmhurst College, St. Louis, and the McCormick Theological Seminary at Chicago.

WANT OPEN DOOR POLICY. JOHANNESBURG, Transvaal, Jan. 21.—Efforts are being made here to surmount the labor difficulty. Colonial Secretary Chamberlain received a number of mine representatives today. He agreed to throw open Natal and British East Africa for the recruiting of native labor, and he said that if his influence with the foreign office prevailed, Uganda would also be thrown open.

Mr. Chamberlain proposed that the government should import to South Africa five thousand natives, on the condition that mines import an equal number, the government laborers to be employed on the railroad and other government works. He estimated that this step would release 10,000 natives for work in the mines. The mine owners, however, appear to object to any government control in the matter. They want the open door policy, and believe that the shareholders will not sanction the importation of British labor.

IN MEMORY OF MORRIS ROBINSON.

The Canadian Society of New York city is to erect a tablet, in Wall street, to the memory of Morris Robinson, who was born in Wilnot, Nova Scotia, in 1774, and who was a member of the New York branch of the United States bank when that was the great financial institution of the world. The occasion of the Canadian Society's observance is the 29th anniversary of the establishment by Mr. Robinson of modern life insurance in the United States, which falls on February 1.

The making of the Robinson tablet, which is to be of bronze, is in the hands of Tiffany. The tablet will be affixed to the front of the building now numbered 56 Wall street, on the front of the original offices of the first permanent American life insurance organization. The Canadian Society is inviting as its guests at the unveiling prominent officials of Canada, and the formal exercises will be followed by a banquet.

WANTED—A case of Headache that KUMBERT Powders will not cure in from ten to twenty minutes.

AMHERST MEN IN LUCK.

The Exploits Lumber Co., who own 14 1/2 square miles of timber limits and a large and well equipped saw mill at Exploits Bay, Newfoundland, have dis- posed of the same to a Boston syndi- cate represented by the Wood Barker Co. of that city. Already two pay- ments have been made to the concern which operates the place, and it is composed of ten Amherst gentlemen. The price received is in the neighbor- hood of \$250,000. The lumber company will get out some eight millions of logs this winter and the Boston people will assume charge on June 1st. The saw mill, which is fitted with rotary, gang and band saws, is capable of producing between 100,000 and 120,000 feet of lum- ber per day.

WILL BE A CANDIDATE.

Pascal Hobert, county councillor for Kent, was in Moncton on Wednesday on his way to St. Joseph's College, where he will be a candidate in the contest for the approaching local elec- tions and thinks his prospects are bright for being elected.—Times.

REMARKABLE SUCCESS

Of a New Catarrh Cure.

A large and constantly increasing majority of the American people are catarrh sufferers. This is not entirely the result of our changeable climate, but because modern investigation has clearly proven that many diseases, known by other names, are really catarrh. Formerly the name catarrh was applied almost exclusively to the com- mon nasal catarrh, but the throat, stomach, liver, bladder, kidneys and intestines are subject to catarrhal dis- eases as well as the nasal passages.

In fact, wherever there is mucous membrane there is a feeding ground for catarrh.

The usual remedies, inhalers, sprays, douches or powders, have been practi- cally failures, as far as anything more than temporary relief was concerned, because they simply dry up the mu- cous secretions, without having the remotest effect upon the blood and liver, which are the real sources of catarrhal diseases.

It has been known for some years that the radical cure of catarrh could never come from local applications, but from an internal remedy, acting on the blood and expelling the catarrhal poison from the system.

A new internal preparation which has been on the market only a short time, has met with remarkable success as a genuine, radical cure for catarrh. It may be found in any drug store, sold under the name of Stuart's Catarrh Tablets, large pleasant tasting lozenges, composed principally of anti- septic ingredients. Blood root, Red gum and similar catarrh specifics.

Dr. Anstie in speaking of the new catarrh cure, says: "I have tried the new catarrh remedy, Stuart's Catarrh Tablets, upon thirty or forty patients with remarkably satisfactory results. They clear the head and throat more effectively and lastingly than any douches or inhalers that I have ever seen, and although they are what is called a patent medicine and sold by druggists, I do not hesitate to recom- mend them, as I know them to be free from cocaine and opiate, and that even a little child may use them with entire safety."

Any sufferer from nasal catarrh, throat or bronchial trouble, catarrh of the stomach, liver or bladder, will find Stuart's Catarrh Tablets remarkably pleasant and convenient, and your druggist will tell you they are abso- lutely free from any injurious drugs.

Still Pushing the Law Against Liquor Sellers.

Annual Meeting of the Charlotte- town Board of Trade—A Painful Accident—Recent Marriages and Deaths.

CHARLOTTETOWN, Jan. 17.—Another return of liquor was made Friday afternoon at the instance of Prosecutor Jenkins. This time the victim was E. P. Gillis. His saloon was broken open and about 25 worth of liquor seized. A number of prohibitory cases are now pending.

CHATHAM NEWS.

CHATHAM, Jan. 21.—The January thaw is just getting in its fine work. There has been exceedingly cold weather during the last few days, but last night the temperature moderated con- siderably, and this morning was quite mild with indications of snow, which materialized about noon in a soft storm which in turn gave place to rain, which is still falling. The recent snow storms have rendered the work in the woods much more prac- ticable, and hauling of the yards is now in progress.

The novel spectacle of a four-in- hand was observed on the streets this afternoon. The novelty was enhanced by the interesting fact that the team had a lady driver. The occasion was a driving party given by Mrs. Coope, manager of the Bank of Montreal, the guests being a merry party of young ladies and children who, to the num- ber of twenty-five, occupied the seat- ings of Groats' drive, and under the skilful guidance of Mrs. Groats circled about the town and suburbs. Mrs. Groats was much admired for the very judicious manner in which she handled the handsome pair of black beauties.

ROTHESAY-HAMPTON SUNDAY SCHOOL INSTITUTE.

Yesterday was a notable day among the Sunday school workers in this part of Kings county. This institute is al- most a completion of the many Sun- day school meetings of this month.

At 9.30 the first session was promp- tly opened. Miss Helen G. Thomson, in the chair, called Rev. H. Shaw to lead the opening worship. This consisted of inspiring songs, earnest prayers, and an instructive Bible reading from 1st Epistle Peter.

Rev. J. B. Gough took up the sub- ject. The study of Christ as a Model for Teachers. This was excellent in well arranged thought, and after twenty-five minutes by the speaker, fifteen minutes were occupied by six other people, no one speaking wide of the theme. Song and offerings came here, then an open conference on Sunday School Extension was conducted by the field secretary. The members joined freely, and seed thoughts for further work were left to grow.

A Question Box was conducted, after which the session adjourned till 2. In the interim a luncheon in the primary room had been prepared by the ladies, and was much enjoyed by the visitors.

The second session of the Institute was begun at 2 p. m. There was much increased attendance, and those who had been in the earlier session could be heard in their greetings of new- comers, saying, "I wish you had been here in the morning."

Rev. W. W. Lodge conducted a Bible reading on Sowing and Reaping. Pre- paratory to the Scriptures, there were several choral songs and fervent pray- ers. This exercise did not keep within its time limit so well as each morning exercise, but it was good. After the minutes of the morning session were read, Rev. E. Baird was called to

MAYOR UPHELD.

Reformatory Governors Endorse Refusal to Admit Goodspeed.

At Meeting Yesterday They Passed Resolution Upholding Mayor White and Telling Him to Go Ahead.

The board of management of the Industrial Home and met in the City Hall Tuesday and almost unanimously endorsed the action of His Worship Mayor White, the chairman of the board...

Mr. Allison asked if it were possible for the matter to be settled by any resolution of the board...

Mr. McKewen said the sentence was as final as the decision of his worship apparently was. Having been pronounced by the judge it could not be changed.

Mr. Skinner gave it as his opinion that the fear that Goodspeed might contaminate other inmates of the reformatory...

Mr. McKewen believed that Goodspeed was at heart a better boy than he was already at the reformatory. He was by no means a hardened criminal.

He went into the case at length, apologizing for Goodspeed's conduct throughout and deprecating the feeling that had developed against him.

In conclusion Mr. McKewen moved that the chairman confer with the attorney-general with a view of preventing Goodspeed's admission to the reformatory...

Hon. C. N. Skinner, counsel retained by the mayor, asked for his opinion as to the position of the board in the matter...

Section 5 says the prisoner must be held in jail until the sheriff has received the warrant which the chairman was "authorized" to sign.

THE BEST OF ALL IS BENTLEY'S LINIMENT. It cures all pains and aches...

A COUNTRY REVERIE. Ben, said Silas to his friend, I received a letter from you...

For all the chance person gets up here on the farm. Don't count for much...

But if that falls, all's not lost. For I'm told what's true: Your always sure to get a job if you measure 5 feet two.

Oh, won't I have a bully time. When to old St. John I go. (Going up the main street) Me and Cousin Floy.

And when I get my city chap You needn't have any alarm. I'll give you a lesson in Cousin Bill, Then he can quit the town.

So I'm going to quit tomorrow. I've sold my stock and barn; For Floy guarantees me a job. When I come down from the farm.

Mr. Estabrook spoke of the chief justice's remark since the sentence that he was sorry he had not sent the boy to the penitentiary.

Mr. Skinner moved that the board should not be influenced by public opinion, and should not place itself on record as resisting the administration of justice.

Mr. McKewen moved that the board should not be influenced by public opinion, and should not place itself on record as resisting the administration of justice.

They come unexpected and when least welcome. He armed with a compound cure in a bottle of Nerviline...

The finest creamery butter, the kind you like on your own table, is absolutely the only kind that's ever used in Christie's Biscuits.

The fact that various grades of butter can be bought for 5 to 15c. per pound less than the kind used in Christie's Biscuits, indicates the jealousy of Christies for the reputation of their Biscuits.

Over 600 varieties. At all grocery stores.

SERMON.

The Rev. Dr. Newell Dwight Hillis on Living For the Things That Count.

Living For the Things That Count, was the subject of a recent morning sermon in Brooklyn, N. Y., by the Rev. Dr. Newell Dwight Hillis in Plymouth church.

In his life of Walter Scott, Lockhart quotes from one of his father's letters: "Forty-five years old today, my life is now more than half done."

The seasons change. The winds, they shift and veer; The grass of yesterday is dead.

WHAT ARE THE THINGS THAT COUNT?

What are the things that count? Let one of the wisest men answer. In his vision Jeremiah calls before the judgment seat of reason all eager aspirants for immortality.

fellows, with all men who lead armies and control political parties, and manifest their strength for leading movements and leading them toward that which is any blind railing at the strength, for a new competitor will arise and in wrestling trip him, and when the new claimant is crowned with laurel the old one is forgotten.

Men there are who are raised up to lead the nation and clothe the state. It is a great thing to be able to turn raw iron into tools, to transport food from the interior to the sea.

GLASSES OF MEN.

From his view point there are four classes of men. First, there are men who are rich in the outside but poor in the inside.

FIDELITY COUNTS.

If we pass in review the things that are loved and must be loved in letters of gold, and understand them, Fidelity. Who is not ambitious to have these words carved on his tomb.

HELPLESSNESS AND SERVICE.

But if the path of duty is the way to glory, if faithfulness is a thing that is loved, then the heroism of the ordinary life is the greatest of all.

LOVE COUNTS.

Another thing that counts is love. It is that love and by loving serves another fulfills Walter Scott's definition. Love really means an overflowing soul.

SELF SACRIFICE COUNTS.

In retrospect self-sacrifice counts. Have you read W. Watson's poem, "Domesticated"? Was ever a great thought married to simpler, more musical words?
