LAW RESPECTING NEWSPAPERS
Subscribers who do not give express no-
tice to the contrary, are considered as
wishing to continue their subscriptions.
If Subscribers order the discontinuance
of their papers, the publisher may continue
to send them till all arrearages are paid.
If Subscribers neglect or refuse to take
their papers from the office to which they
are directed, they are held responsible till
they have settled their Bill, and ordered
their papers to be discontinued.
If Subscribers remove to other places
without informing the publisher, and the
paper is sent to the former direction, they
are held responsible.

CHARLOTTE COUNTY AGRICULTURAL SOCIETY.
THE THIRTY-FOURTH ANNUAL MEETING OF THE SOCIETY
WAS HELD AT THE TOWN HALL, St. Andrews, 10th January 1854, at
11 A. M. The Hon. B. Hatch, President of the Society, in the
Chair.
Several new members were proposed and elected.
The Treasurer's accounts for 1853 were read to the meeting ac-
companied by the necessary vouchers.
Resolves were passed to charge an entrance fee of ten shillings
in future to all persons desiring to compete at the society's shows
who are not members. Also to alter the 4th Bye Law, so as to make
the Annual subscription payable at each Annual meeting in advance,
instead of the October Quarterly meeting. Also to apply to the
Justices in their next General session to allot and set off two acres
of ground from the Eastern Common to be used by the Society for
Cattle Shows &c.
The Chair was then taken by S. Getty, Esq., and the following
officers elected viz:
HON. B. HATCH, President.
J. WALTON, J. Vice Presidents.
D. MOWAT, J. Vice Presidents.
W. HATCH, Treasurer.
ALEX. T. PAUL, Secretary.
Messrs. R. STEVENSON,
S. GETTY,
M. J. C. ANDREWS,
H. O'NEIL,
R. D. JAMES,
C. D. RICE,
T. T. ODELL,
J. H. WHITLOCK,
J. LOCHARY, Committee.

After thanks passed to Mr. Getty, for his able and impartial con-
duct in the Chair, the meeting adjourned.
ALEX. T. PAUL, Secretary.
January 10th, 1854.

REPORT.

The Committee of the CHARLOTTE COUNTY AGRICULTURAL SOCIETY, are now called to give an account of the proceedings of the past year, that the members of the Society may know, in what manner, they have exercised the power delegated to, and the trust reposed in them. They feel gratified in stating that at the termination of the thirty-fourth year of the Society's operations, the object in view is progressing, and the Agricultural interest has assumed a character so marked, from the experience of the past, that by steady perseverance in the pursuit, the cultivation of the soil under the improved system is of the first importance, in remunerating the occupier for the care, labor, and capital expended.
The Committee would now, advert to the crops produced the past season, for the abundance of which there should be a general and united thankfulness to Him who rules over all things, for this his goodness and bounty; they have been more than an average crop, although the demands for that article, resulting from an increase in lumbering operations, proposed the winter causes it to still command a high price. All kinds of grain have yielded satisfactorily: Oats are abundant and command immediate sale. Wheat, wherever it was sown, will induce a repetition the following season. Barley and Buckwheat have been productive. All kinds of roots, have been cultivated successfully—excepting the potatoe, which was again visited with the disease, and became almost a failure in this vicinity. The cultivation of the Swedish turnip, has been very extensive, and the crop produced of excellent quality. A great quantity has been exported from this section of the County. The Committee would suggest for consideration whether the Farmers would not be better remunerated by keeping their turnips and stall feeding Cattle for market than by sending them abroad.
It was resolved, at the last Annual meeting, of the Society, that a quantity of guano, plaster, bone dust, and various descriptions of seeds, should be imported, for the use of members of the Society, the Committee endeavored to carry out this Resolution, and the seeds, also the plaster and bone dust, were received; but owing to some failure in the shipment the guano did not come to hand. The bone dust, is partly in the agent's hands, also a large quantity of the plaster probably the latter article is unsaleable from its qualities being unknown, and about which some difference of opinion exists—some are of opinion that plaster retains moisture only, which is generally absorbed by plants, but it would, appear from the practical experience of persons, who have used plaster freely for Agricultural purposes, that it is an agent, which absorbs large quantities of ammonia, a principal and important ingredient in vegetation, and gives it to the surrounding plants, during the day, and again receives from the density of the atmosphere during the night a supply to be communicated as before.
Fifty bushels of grass seed from the Harvey settlement were purchased for the Society, and met with a ready sale. It is proposed to purchase at the same place, seventy five bushels for the next season.

This society, with various others throughout the Provinces petitioned the Legislature at its last session to enact a Law, to regulate the sale of grain, roots &c. by weight, the prayer of which petition was complied with, and a Law of that nature is now in operation.
Upon the invitation of your Committee, as suggested at the last Annual Meeting, Mr. Cumming Veterinary Surgeon, visited St. Andrews and delivered a public Lecture in the Town Hall, upon the nature and general treatment of the Horse which gave much satisfaction and contained a great deal of important and useful information upon those subjects.
A Resolution of both branches of the Legislature passed last session, offering a premium to any County, in the Province of two hundred pounds upon payment of Fifty pounds, for encouraging the importation of entire horses. Your Committee being desirous that this County should participate in the benefit which might result, from this Society taking advantage of the offer, entered into an arrangement, through the New Brunswick Society, upon security being given for two hundred pounds, for the importation of a Clydesdale Horse, as best fitted for the purposes required. Mr. Cumming was sent to Britain to purchase eight horses for different Societies. He made the purchases and shipped the horses for Saint John, he accompanying them, according to agreement but owing to boisterous weather, two of the Clydesdale horses out of the four purchased died on the passage, and upon the arrival of the remainder at Saint John one of your Committee was sent from here on behalf of the Society,

who deemed it not advisable to draw lots, for one of the remaining horses, both of which fell to other Counties. The horses were insured, and the insurance defrayed all expenses, consequently this Society sustained no loss by being connected with the matter. As the Central and Eastern part of this County is without an Entire Horse, your Committee have felt desirous that one should be imported, and with this object in view, have put themselves in communication with parties in the New England States upon the subject, and have received a letter from Frederick Holbrook, Esq., President of the Vermont State Agricultural Society, who recommends the Morgan Horse as the best suited for improving our breed of horses, and your Committee can add with confidence, that the Morgan Horse imported some years since by this Society was of great value to this County being highly approved, and giving general satisfaction as combining strength with activity. Your Committee selected from the Stock belonging to the late Colonel Shore of Fredericton, two Rans and two Yokes with young of the Leicester breed and also imported from the Stock of Mr. John F. Andrews of West Cornwall, Connecticut, a new Oxfordshire Ram, and a Leicester Ram, which animals were sold at public auction upon condition of their being kept in the County for the improvement of the breed of sheep, also four pair of improved fowles male and female, consisting of the Royal Cochins, Black, Poland and Dorking; all of which were disposed of in the manner before mentioned. The importation of both the sheep and fowls, was attended with a heavy pecuniary loss to the Society, but the Committee hope the ultimate advantages resulting from the importation will more than compensate for the present loss; a Boar of the Essex breed was also ordered but could not be obtained the last fall.

The Committee in pursuance of the arrangements referred to in the last Annual Report of the Society paid Mr. M. J. C. Andrews Twenty pounds, as a bonus for the services of his Entire Horse Cleverland Lad to the County the past season, they have also concluded that the Society's Stall should be kept over another year.
The Society's cattle show was held on the Twenty fifth, day of October last; owing to extremely stormy weather on the preceding day as well as on the morning of the Show day, the number of articles at the Exhibition was not so large as usual; however the cattle were in many cases highly creditable; the grain and roots excited much attention particularly the Altringham field, carrot, mangold wurtzel and patsnip, blue nose and other varieties of the potatoe, from their great size and healthy appearance; some very fine apples were exhibited, raised by D. Mowat, Esq. showing that this description of fruit can be successfully produced if proper attention is paid to its cultivation. There was also exhibited some excellent honey by Mr. J. H. Whitlock the production of his bees. This Committee would recommend that a more general attention to the production of these articles be given by the engaged in Agriculture. The butter exhibited varied extremely in quality, some of it being quite inferior to that shown on former occasions. The woolen cloth, cotton and wool, satinettes, as also samples of knitted yarn and domestic manufactures generally were of excellent quality, denoting that commendable attention is given to this branch of industry which is producing marked improvement. The Committee awarded and paid upwards of thirty two pounds as premiums upon the articles exhibited.

The Treasurer's accounts, embracing the receipts and expenditures of the past year, will be submitted for your consideration, together with the Report of the Committee of audit thereon. The Committee congratulate the Society upon the uniform support, received from its members, in important and arduous in which it is engaged. It is essential, that the farming Community should on all occasions participate in and cooperate with the objects of the union, for unity is strength. In fact all persons have a vital interest in carrying still higher the improvements of Agriculture, and this is best done by the united energies brought to bear on every new discovery. It is much to be regretted, that in the schools of this Province, at least in those of the higher order, there is no class of Agricultural Chemistry taught. The establishment of such classes, would early attract the attention of the mental energies of the youth of our County, to the subject, and impress upon them the important fact, that Agriculture is a science well worthy the attention of any and all persons. It would create a taste for reading books upon the subject, reading would create reflection, and reflection would develop its effects, in individual and general elevation of the mind and consequent improvement in the cultivation of the Soil.
Which is respectfully submitted.
H. HATCH, President.
ALEX. T. PAUL, Secretary.
St. Andrews, January 10th, 1854.

European Intelligence.

ARRIVAL OF THE ASIA AT NEW YORK.
New York, Jan. 31st, 1854.
The Asia arrived at noon. The Sultan has consented to negotiations proposed by the four powers in neutral city.
The allied fleets entered the Black Sea on the 3d January.
The Czar is reported not to view it as declaration of war, and ordered Russian Naval force to rendezvous at Sebastopol.
On the 4th Jan. the Turks stormed entrenched camp at Citale, on Danube, putting 2,500 Russians to the sword. Also defeated 18,000 marching to relieve Citale. These successes prevent passage of Danube at present.
Nothing diplomatic from St. Petersburg.
The infant child of the Queen of Spain is dead.
Consols 93½. Breadstuffs for week advanced. On Flour 1s on wheat 1d. to 2d. on Indian Corn 2s. Provisions active. General Market unchanged. Manchester trade good.
THE HIGHLAND KILT.—The question of abolishing the Highland Kilt, as a part of the dress of the Highland regiments in the English service, is quite warmly debated in the London newspapers. Bare legs during such weather as we now are experiencing, and much more, in such a climate as Quebec has—and there is always a regiment of these kilted Highlanders there—must be anything but agreeable. It is the ancient semi-barbarous dress of Scotland, and

is therefore clung to; but a more awkward and uncomfortable style of dress can hardly be conceived of; and it seems, that the Highland soldiers themselves are heartily sick of the dress and desire an alteration.

VICTORIA'S NEW YEAR'S GIFTS.—It is the custom of the British Sovereign to distribute, at Windsor Castle, new years gifts to the poor of the parishes of New Windsor, the Holy Trinity and Clewer. These were to consist this year of about two thousand dollars worth of clothing, nearly three thousand pounds of beef, and over 54 tons of coal; were to be distributed among some 650 poor persons.

A GOOD MOVE.—Universal Weights and Measures.—A Committee of the New York American Geographical and Statistical Society have presented a strong report on the importance of the adoption of a universal system of weights and measures. They propose a memorial to Congress, praying it, in view of the difficulties which still surround the whole subject, to propose the appointment of a joint scientific commission of the United States, England and France, and of such other nations as might choose to unite, to propose for general adoption such system as might meet the wants of the commercial community, politician, the geographer, the scientific inquirer and the public. The report was adopted.

Revenue of Russia.—The highest estimate that has been made of the yearly revenue of Russia, is \$23,060,000; the lowest, \$16,000,000. Sir Archibald Alison states it to be \$20,000,000. Mr. McGregor, in his Commercial Statistics, makes it two millions less, or \$18,262,118. Mr. McCulloch says it is \$15,846,000.

The value of railroads may be gleaned from the following.
Between 1840 and 1850 New York constructed nearly 1500 miles of railroad, and her property was augmented from \$639,174,000 to 1,080,390,245; and her population increased from 2,428,921 to 3,100,000. During the same period, Massachusetts constructed more than 1000 miles of railroad, and property was thereby augmented in value from \$299,878,399 to \$597,693,999, and her population increased from 737,699 to 991,274.

Thanksgiving of the Rescued.—The surviving officers of the Third Artillery, rescued by the barque Killy from the San Francisco yesterday met at Grace Church, (Rev. Dr. Vinton's) on Brooklyn Heights, in accordance with a vow made while exposed to impending death, to offer public thanksgiving for their deliverance. Three or four officers however, owing to a reaction, occasioned by their severe labors, exposure, and deprivation, were detained at home by indisposition. Many members of their families were present, also the parish children.

The exercises were opened by a good service from the choir. After that, the communion service proper was administered. The sermon, by Dr. Vinton, was listened to throughout with the deepest attention. Reference was made to the fact that while on the wreck after Rev. Mr. Cooper had concluded a prayer in the cabin, in which the interposition of Christ in stilling the waves of Gennesaret was spoken of, as illustrating His power to control the raging sea, there was a violent storm of rain beating down the waves and thereby rendering their condition comparatively safe.
The exercises were concluded with the Gloria in Excelsis, chanted by the choir and congregation.—[N. Y. Jour. of Com.

MUSICAL MISCE.
Some three weeks ago our night composers were disturbed by a range though not unagreeable sounds issuing from the walls of the room, from beneath the floor, and from behind the cases, and in fact from every imaginable place in the office. Sometimes it would be heard in a low, murmuring sound on one side of the room, and be responded to in a lively chirrup on the other. These sounds gradually grew more distinct and familiar, and the men at the cases learned to enjoy the musical accompaniment to the click of the types.

In the day time these sounds were not heard, and they returned every night as soon as the office became quiet so that no one was moving about. A loud step across the room stopped the music, and the habit grew up naturally among the men to move softly about, so that the performance should not be interrupted.

The sounds were all musical, resembling the softer notes of the Canary bird, with a prolonged warble at the close. The wonder was what all this was, or whence it came, or why.

One night two small mice made their appearance among the composers with most similar manners. One who had not much music in him made an attack upon this happy couple, and but for the prompt interference

of the foreman, and all hands, they might have been slain.
"It is a good omen," said Frank to George "and you will feel safe in knowing that these mice are put here to guard you while you sleep,"—and so George, the night watchman has ever regarded them since, and gives them their daily bread.

They have now become familiar and more musical. Every night they sit and sing, and cheer the hearts of those who tarry at the cases, or work upon the forms, after the great mass of the city's population are asleep.

They are rather shy of strangers, and seem to know who are their friends. The foreman shows them a look over his work as he makes up his forms, and they seem to take pleasure in seeing his progress. They seem to be silent only after the lights are put out for the night.

Some of our readers may think we are joking. But it is not so. Any one who is curious may come and see and hear for themselves. They have now for some weeks exhibited themselves every night.

Godman, in his Natural History, Vol. II, pages 86 and 87, speaks of a mouse that exhibited great susceptibility to music, and died apparently from its influence. He attempts to account for this upon the idea that the mouse had a diseased nervous system, which could not sustain the excitement.—We have no recollection of a case like the present one on record. It is certainly worthy the attention of the curious. The lovers of natural history may think it worth an effort to secure and retain them.

The mice are apparently of the common species, their color an ashy brown, inclining to a lighter shade than ordinary, with short, plump bodies and delicate limbs.

We would invite the officers of the Natural History Society—or those among us skilled in this branch of natural history,—to give them a call some evening just after 10 o'clock though we cannot give out many tickets at once.—State of Maine (Portland.)

DESTRUCTION OF THE PARLIAMENT BUILDINGS AT QUEBEC.

A telegraph despatch received at the News Room, states that the Parliament Buildings at Quebec were destroyed by fire yesterday morning. The fire broke out between 3 and 4 o'clock in the south wing of the buildings, and continued raging with terrific fury until the whole block was entirely consumed. Very little was saved from the wing, in which the fire originated, but it is said the greater part of the Library and many of the most valuable documents were rescued from other sections of the building. The exertions of the Firemen and Military were beyond all praise. It is probable, however, that if the communication between the different portions of the block had been cut off by means of iron doors, the whole building would not so easily or rapidly have fallen a prey to the devouring element.

It was impossible at the hour when the despatch was forwarded, the fire still raging, to give any minute particulars of the catastrophe or a description of the scene. The spectacle was awfully grand, and was witnessed by a great number of people.

The destruction of the Legislative Hall is a loss which will be felt throughout Canada generally, but more particularly in Quebec. A later account says that the fire was finally subdued without further damage. It is thought to have originated from one of the fires of the hot air furnace. The building is said to be insured for \$30,000 in offices in England.
Weather very mild.—New Brunswick.

NOTICE.

The Firewards request the attention of the Inhabitants of St. Andrews to the following Rules, passed at the April General Sessions, 1853.

Rule 4th.—Every Householder, or occupier, shall provide himself with two good and sufficient Leather Buckets, to be kept in some convenient place in the house, and on every alarm of fire shall convey, or cause to be conveyed, to the place of fire, there to be used as may be required; and upon his wilfully refusing or neglecting any of the aforesaid requirements, shall pay a fine of forty shillings, to be recovered and applied as hereinafter directed.
Rule 5th.—Every Householder shall keep at every House he shall own in said Town two good and sufficient Ladders, one to be always kept on the roof, fastened at the top end by two sufficient iron hooks, and to be extended down to the eaves, the other to be of sufficient length to afford safe and easy access to the roof at all times; and in case of the non-residence, absence, refusal, or neglect of the owner to furnish the same, the Tenant, or Tenants, occupying the house shall, at the expense and cost of his or their Landlord, procure them; and every person wilfully refusing or neglecting to perform any of the duties required by this Rule, to pay a fine of forty shillings, to be recovered and applied as hereinafter directed.

SUMMARY OF NEWS.

Explosion at Long Island New York and
terrible loss of life.—On Saturday the 23rd ult., the Ball Cartridge Factory of Mr. French, of Ravenswood, Long Island, New York, a few miles below the East River, exploded, causing a terrible loss of life, blowing the bodies in all directions. The telegraphic despatch to the Boston papers, says:—

It is supposed that from 20 to 25 persons were killed, as 30 hands were usually employed in the building, and all who were inside at the time were killed excepting two, who were mostly boys and girls employed in filling the car ridges. Three girls belonging to one family were among the victims. All the buildings within a circuit of two miles were violently shaken and the windows in the vicinity smashed. The scene at the ruins was terrible. The building itself was blown to atoms; the fragments and machinery with mutilated bodies and disjointed limbs of the human victims being scattered about the fields. The remains of thirteen bodies were so far recovered and fixed together as to be identified. There were over 50,000 ball cartridges in the factory besides a corresponding quantity of powder. The balls flew in all directions. No person out of the building was severely injured. Another account says that the number ascertained to be killed is but fifteen, many others however are shockingly mutilated and are lying in a precarious condition. Some of them have been removed to the Hospitals, some to Blackwell's Island; others to the care of their friends. Mr. French, the proprietor of the factory, was in the employ of Hitchcock & Co., of this city, dealers in munitions of war. Great indignation and threats were manifested towards him by the friends of the victims, and it is rumored that he has left the place for fear of personal injury. The magazine, containing between two and three tons of powder, was situated within a short distance of the factory, but fortunately escaped. Every dwelling house in the immediate neighbourhood was shaken almost to its foundation. The Rev. Mr. Waite, an Episcopal clergyman residing near the manufactory, was forced to remove with his family to a neighbour's house, to obtain shelter from the inclement weather, every window in his own house being blown completely out. All the dwellings in the immediate vicinity were in the same state. A stage happened to be passing at the time and the concussion was so great that the glasses in the windows were shattered into a thousand pieces. Mr. French's house, which is about thirty rods from the factory, was very much damaged, the windows and a portion of the furniture having been destroyed. Persons who were in the City Hall at Williamsburg felt the shock, and it was the general impression that it was occasioned by an earthquake. The excitement in the vicinity of the casualty was very great during the afternoon, and the scene was heart rending.

Fire in New York.—The Columbian Foundry and Machine Shop in Duane street, New York, was burnt on the night of Saturday, the 23rd ult., together with several adjoining buildings occupied as factories, stores, and dwellings on Pearl and Centre streets, were also burnt, and others were greatly damaged. Less not estimated, but very large. A great many poor families were driven into the streets, the night being intensely cold, the thermometer ranging sixteen degrees with a fierce wind blowing. At a later hour a fire broke out in a stable in Pearl street near the Battery which together with two dwelling houses adjoining were destroyed. The latter were occupied by about fifty poor families, many of whom were obliged to seek refuge on the Battery.

A Great Snow Storm Out West.—The St. Louis Intelligencer of the 17th gives an account of a terrible snow storm which has prevailed along the line of the Mississippi and Chicago railroad, east of Bloomington. The track was covered in many places to the depth of eight or ten feet, and all communication between Chicago and St. Louis was cut off for the time being. Passengers who left Chicago on the 11th for St. Louis were three days on the route. The train was stopped in the middle of Grand Prairie by a formidable snow-drift, and detained there thirty-six hours, and the suffering which was endured during that time by 150 half-famished and half-frozen passengers may be better imagined than described. The train for Chicago was stopped about eight miles east of Bloomington, and all hands deserted it and returned to the town. At the date of writing (the 17th) three Bascom mails were due at St. Louis. Everything was blocked up with snow.

A Horrific Murder.—It really seems that our city is swarming with murderers, burglars, and villains of all grades, from deadly assassins. On Thursday an elderly man, named Daniel Taffs, stopped at the Fifteenth Ward House, Sixth and Hathaway streets, wishing board awhile, stating that he was from Erie, Pa., a carpenter by trade and in quest of work. He is represented to have been a decent, quiet man; had a few dollars about him, which he exhibited, and which led, of course, to his barbarous murder. After supper that evening, he went out into the street, and in course of an hour after he was found by some passers by, lying on the sidewalk, near the tavern. He was taken up, and into the house, and was found to be dead, the whole side of his head being carved in as if by an axe, stone, or club. His pockets were inside out and the contents gone. Coroner Noble took charge of the body, and had it decently interred, yesterday. Thus died, in the most shocking and instantaneous manner, at the hands of a cold cruel assassin, a stranger in our streets! To have caught the villain and shot him down, would

have been far too lenient a punishment for his crime; but that he will be taken, there is a strong probability. —[Cin. Unionist, Jan. 21.]

The Union of the Colonies.—In the Nova Scotia Legislature, on Tuesday last, the Hon. J. W. Johnston moved a resolution, to be laid before the House, for the union of the British North American Colonies. In course of his speech, he said:—

The motion I am about to make, Mr. Speaker, will I am sure commend itself to the feeling of this House. The Hon. Provincial Secretary told us yesterday that it was the duty of Nova Scotians to boast, and if we look to the report he yesterday brought in, we will know how to do that. To my mind, Sir, it is infinitely more important that we should have something to boast of; if we can elevate our positions, improve our resources, consolidate our strength, and give to us that which we now earnestly yearn for—something of nationality—shall we refuse to avail ourselves of the opportunity. Let us blow our trumpets as loudly as we please—still, little Nova Scotia must just remain as she is; nay, New Brunswick and even Canada must be to a certain extent limited and controlled in their progress whilst they remain without national character, influence or position. Ever since I first contemplated this subject under the auspices of a man of extended talent and sagacious mind—I allude to Lord Durham—my eyes have been steadfastly fixed up on the period when it could be accomplished, and I now believe that a movement in that direction, though commenced by the smallest and least influential of the three Provinces, may produce results favourable to its speedy accomplishment.

The Hon. Provincial Secretary, in supporting the motion, remarked:—
I can only say as an individual member of the House that nothing would give me greater pleasure than to engage in the discussion of the exceedingly interesting question propounded in the resolution just moved. Sir, I almost hailed that notion as something clearer, more elevated, more exciting (I speak in the rational and proper sense of the term) than some of the discussions in which we have been engaged. I quite agree with the Hon. and learned member for Annapolis, that British North American Provinces have the extent of their population is rapidly increasing, they possess the natural resources necessary for the creation of a great nation; cheerfully then will I engage in discussing the measure contemplated by him. And, Sir, let me say to him, the conflicts of fact here, will never do us the honour of coming on this evening, which we may expect from the opening of the wide and expanded field. Again then, Sir, I will gladly engage with him in that discussion.

In the Nova Scotia House of Assembly, on Monday last, the Hon. J. W. Johnston gave notice of his intention to introduce a similar provision to that commonly designated the Maine Liquor Law. —[New Brunswick.]

The Great Republic.—The underwriters have accepted the abandonment of this vessel and to-day she is to be paid for, and the business settled. She will probably be sold in about a fortnight, and will very likely be converted into a steamship as a propeller. She is now entirely empty, and vessels adjacent appear very insignificant contrasted with her immense bulk. —[New York Journal of Commerce.]

Awful Death.—A most tragical tale is told of the sufferings of 3 soldiers, of a detachment of 6th Regiment, now stationed at Tortola, and a black man, who got into a boat, the soldiers with the intention of deserting and getting over to Crab Island, and from thence as opportunity offered, to America. After a while, the wind rising, they were driven out of their course, and so remained in the open boat for several days, without food or water. At length one of the soldiers proposed to draw lots, that one should be killed to furnish food for the others. They did so, and the lot fell upon Thomas Buckley, one of the soldiers who forthwith bound up his arm, and opened a vein to bleed himself to death; one of the others, and the black man, sucking his blood, and afterwards went raving mad, and jumped into the sea. Buckley also died; and there remained only one soldier out of the party in the boat, Wm. Lennon, who threw the dead body into the sea, lashed the helm, and left himself to his fate. He had not tasted any of Buckley's blood, because according to his own statement, he felt a scruple at doing so, as he had been his comrade. After 11 days' drifting, the boat was driven on the coast of Saint Domingo, and the Coast Guard found the survivor, and after giving him some refreshment carried him to Jacmel, to the English Consul, before whom he made relation of the facts as above, and he was sent back to Tortola in the Steamer. —[Bathurst Paper.]

LATER FROM AUSTRALIA.—We learn from the Boston papers that the schooner Castilian has arrived at Callao, from Port Philip, with Melbourne dates to the 2nd of November. The steamer Great Britain, which left Liverpool August 11th, arrived at Hobson's Bay, Australia, October 16th. The quantity of gold coming forward had been very large, and the arrival of the Great Britain had caused more activity and a slight advance of from 6d. to 9d. an ounce. The quotation at Port Philip was £3 17 8. At Melbourne the quotation is £3 16 6.

The accounts from the diggings are favourable—new diggings still continue to be found. A fair business was doing at Melbourne, but prices had not improved, and in some articles there was a downward tendency. For had

slightly declined—best samples selling at £33 per ton. Teas in demand. Coffee lower, and heavy stock on hand. Hams and provisions in fair demand. American-barrel Flour is quoted at £3; Haxall and Gallego, £3 5 a £3 10.

THE STANDARD.

WEDNESDAY, FEB. 8, 1854.
ENGLISH NEWS

The Arabia arrived at Halifax on Saturday last. A synopsis of the news will be found in another column. The Turks had been triumphant, the battle of Citale was confirmed, the battle was resumed on the 6th, and ended on the 8th in favor of the Turks. 1,000 Russians were killed and 4,000 wounded, among whom were two generals. Breadstuffs generally were plenty, from the large arrivals, the market was languid for a while, but again became active; wheat advanced 3d to 4d. Flour active—6d to 1s advance.

We are gratified to notice that arrangements are in progress for the establishment of a Reading and News-Room in this Town, which we learn, will be opened in a few days.

CONCERT.—On Monday evening last Mr. Kethro gave a Concert in the Town Hall, on which occasion, he was kindly assisted by the "Quartette Club" of this Town. The Hall was crowded and Kethro's singing, gave universal satisfaction; we must not omit noticing that the young men of the "Quartette Club" also delighted the audience with the sweet music of their voices.

P. E. ISLAND.—Society must be in a miserable condition in this Island, the most bare-faced atrocities are committed in noon day. The crime of *stabbing* has become so frequent, that the Judges have declared, that in future they will sentence parties convicted of this crime, to be publicly *whipped* in addition to the usual penalties.

We have been favored with the following extract of a letter to a Merchant in this City, dated Newcastle, England, 12th January:—
Courier.

"Freights upon Coal, for the coasting ports, are advancing rapidly, and have already attained rates almost beyond former precedent, with every prospect of their being maintained, and the demand for shipping greatly exceeding the supply. Coal being scarce in the London market, has reached a price almost fabulous—42s. per ton, having been paid by dealers. Timber freights are expected to open at high figures—50s. for Quebec; 44s. and 45s. for St. John and the lower ports being spoken of as probable."

We are glad to learn that the new ship "Recorder," which was launched from the yard of Mr. James Johnston some weeks since, and unfortunately struck on Blind Island, has been got off this morning into the eddy, and is now waiting for the steamers to tow her through the Fells.

The successful accomplishment of this difficult undertaking is owing to the energy and untiring perseverance of the purchaser, Mr. John Clark, who, with a number of men, has been engaged at the work for the last four weeks.

There has always been a difficulty, and much difference of opinion, about the proper way of getting the proceedings of the Legislature reported and published. While there were few newspapers in the Province, and these had but little circulation, the task of reporting the debates in full was more than could be borne by the press. It has more than four been the custom for many years to pay a small sum, from £50 to £100, to each Reporter who attends the House, until last year, when a contract was made with one party to report and publish the debates for a specific sum.

Both plans were objectionable on many grounds, and could only be justified on the plea that if Reporters were not paid the debates would not be published. Such an argument is no longer tenable, as we are prepared to say that there are several newspapers ready to report and publish the debates if all grants and contracts are done away with, and in no other way can the proper freedom of the press be secured.—*Ibid.*

The Wesleyan Chapel at Barrington Passage was burned to the ground on Sunday night last. The fire is supposed to have been communicated from the stove pipe.

CAIAI, Mo., Jan. 26.—A fire occurred at Milltown, St. Stephens, this morning, which consumed the Universalist Meeting house, and one dwelling house. Owing to the severity of the weather the engines could not be worked in time to save either. The meeting house was partially insured.

SIR ALEXANDER BANNERMAN.—We learn from the Royal Gazette of Prince Edward Island, that no person has yet been named as Governor of that Island, in succession to Sir Alexander Bannerman, and that is left entirely to His Excellency's choice to ask pro-

motion, or to remain in his present government.

European Intelligence.

ARRIVAL OF THE "ARABIA."

TURKISH WAR.—Battle of Citale confirmed. Turks successful. Russians were continuing force at Citale to attack Kalafat on 13th, but on 6th 15,000. Turks marched out of Kalafat, attacked and stormed Citale. Resumed battle with the Russians on the 6th, ending on the evening of 8th, with great slaughter of Russians who confess a 1000 killed and 4000 wounded, including two of their generals. Turks remained on the field overnight, attacked some of the Russians and drove them back upon Krejova, with loss of cannon and immense slaughter on both sides. One of the Turkish generals reported to be killed.

Very little from Asia.
The Hungarians and Poles who had been waiting at Constantinople for employment were shipped for Asia army. Klappa declined an Asian command, but offers to serve in Europe.

On the 5th the whole of the Allied Fleet entered the Black Sea. Two ships sent with following to Russian Government at Sebastopol. Conformably with orders of our Governments the British Squadron in concert with that of France is on the point of appearing in the Black Sea.

Around Sebastopol and coast of Crimea, Russians are erecting batteries, and have extinguished all Light-houses.

NEGOTIATIONS.—Dec. 31.—Paris made following modifications to Note of Four Powers: 1st.—Instead of evacuation of Principalities as soon as possible, say within 15 to 20 days after acceptance by Russia. 2d.—The renewal of Treaties to be with special reference to the integrity and independence of Turkey. The Porte will elaborate his administration system alone and spontaneously.

On the 12th the British and French ministers at St. Petersburg also communicated to Russian minister of Foreign Affairs, entry of Allies into Black Sea.

LATEST.—Mail Saturday morning brings nothing later or reliable. The *Czara's* reply had not reached Vienna previous to sailing of the *Arabia*.

BRITAIN.—Parliamentary preparations being. (Aberdeen will read Queen's Speech to a preliminary meeting of Government supporters. Lord John Russell has sent Circular to Members of the House of Commons, requesting full attendance at opening of the House.)
Sir Robert Inglis has resigned his seat.
Mr. Roebuck contradicts that he intends to bring Prince Albert's alleged Political interference before Parliament.

England is actively recruiting Artillery and Coast Defence Guard. Ten thousand wanted. Exertions using also to man the Navy and more Ships fitting out, but apparently no yardmouth.

YARMOUTH SHIPPING.—A late number of the Yarmouth Herald contains a list of the Shipping belonging to that Port, by which it appears that the "solid men" of that thriving town are the owners of

22 Barques, 11,039
19 Brigs, 4,416
20 Brigantines, 2,518
59 Schooners, 3,016
21,019 tons

Well done, Yarmouth—you deserve to prosper. Eleven thousand two hundred tons of Shipping are now in course of construction at that Port!

PROVINCIAL APPOINTMENT.
George Kerr, Esq., of Miramichi, and William Johnson Ritchie, Esq., of Saint John are appointed Queen's Counsel in this Province.

Extraordinary Punishment of a Captain.
—We have published some and received several other letters on the subject of the treatment of the passengers on board Messrs Hall's ship Asia received during their passage from England to this colony. That the complaints on this subject, are but too well founded there can but little doubt, and we should have given full vent to our correspondents' indignation the reason, but all that can be done and a good deal more than ought to be done in the way of punishing the Captain, has already been done. Captain Hawes, being convicted of divers breaches of the Passenger Act, at the Williamstown Police Court, was fined for them in the aggregate amount of £1800. In default of payment of the enormous fine imposed upon him, Capt. Hawes being condemned to a series of terms of imprisonment, amounting altogether to nearly thirty years. This tremendous sentence has begun to take effect. We shall certainly take care that Captain Hawes is not lost sight of; but now that the council is sitting we would urge upon some philanthropic member publicly to question the government as to what has been done, and what is to be done with regard to this very extraordinary case.—*Melbourne Morning Herald, Sept. 10.*

NEW BRUNSWICK OCEAN STEAMERS.—As this matter is one of much public importance, as well as private interest, on account of the Provincial support required by the projectors, we have freely opened our columns for its discussion, and are of opinion that the subject will profit thereby. It is of vast consequence, and involves a large amount of money, besides public and private interests; and is therefore important that it should be candidly, openly, and fairly discussed, and well looked at in all its bearings. At the same time we have the fact before our eyes that large public inducements are

held out to other lines of steamers, both to Canada and the United States; and we much fear that unless New Brunswick follows suit, we may be a long time without ocean steamers to England, and other people reap the benefit of our rich freights and passage money to the United Kingdom.—*St. John Chronicle.*

Musical Gift.—On Monday the 23rd inst., the sum of one hundred and seventy-two dollars was presented to the publisher of the Provincial Patriot with the accompanying—
"To Mr. Lorimer, Editor of the St. Stephen Banner, as a new year's offering." We regret that we are not at liberty to publish the names of those generous gentlemen who have thus evinced their kindness towards us, as very few Editors meet with such tangible tokens of good-will; but the handsome donation merits gratitude too deep for words—Eight individuals, who would feel an honest pride in recording their names each for himself, as one of the people, are associated in this "new year's offering"—to them, as in duty bound, we tender our sincere respects, and shall ever feel deeply grateful.—*St. Stephen Patriot.*

NEW ORLEANS, Jan. 29.—Burning of a Steamer and Loss of Sixty Lives.—The steamer Georgia, from Montgomery, Ala., caught fire on Saturday night, and was totally destroyed with most of the cargo, consisting upwards of one thousand bales of cotton. She had nearly 200 passengers, principally emigrants going to Texas, and slaves; 30 were drowned; many others were missing. Loss of property over \$80,000.

Second despatch.—It is estimated that sixty persons were drowned or burned on the Georgia. All baggage and money were lost. The boat was valued at \$28,000.

Mr. Ames of Jefferson, Mo., took from under the snow after the last rain storm, a sheep which had been buried for 17 days. The sheep is alive and well.—[Bangor Courier.]

DEATHS.

On the 29th ult. MARGARET, wife of Mr. Thomas Haddock, formerly of St. John, aged 33 years.

TO LET.

ON first of May next, The House Shop &c., now occupied by Mr. Francis Waddell, in good repair.
H. HATCH.
Feb. 7, 1854.

TO LET,

And Possession given 1st of May.

That large and commodious Dwelling House and premises, at the Corner of Barr and King Streets, recently occupied by Mr. King. The House has been thoroughly repaired and painted, and put in good repair, and is admirably adapted for a general private residence. KING'S COLLEGE.

CIVIL ENGINEERING, &c.
A COURSE of Instruction in Civil Engi-
neering, at King's College by Mr. McMahon Cre-
gan, who has been appointed to that duty by His
Excellency the Governor, and will commence on the
15th of February next, and continue until the end
of April. It will be open to students of the Col-
lege on payment of a fee of ten shillings and to all
others on payment of a fee of two pounds, for the
course.
Persons desirous of joining the Class are re-
quested to communicate with the Registrar. The
course will embrace, with other subjects, the fol-
lowing syllabus—
An explanation of the construction and uses of
Logarithms, Sines, Tangents, &c.; Trigonomet-
rical Formulas; Resolution of Plane Triangles;
methods of surveying with the Theodolite, Cir-
cumferenter, &c.; construction, use and adjust-
ment of the instruments used by Engineers, both
for field and office work; Levelling; method of
determining best route for Railway, &c.; compu-
tation of the quantities of land, earthwork, &c.;
required for the execution of the works; estima-
tion of comparative labour by units of work;
Horse power of Machinery, &c.; method of
"setting out," Railway curves and side widths;
calculation of gradients and theory of inclined
planes; super-elevation of rail; composition of
and resolution of forces; calculation of strains and
pressures; strength of materials; theory and
practice of timber and iron framing; viaducts,
bridges, &c.
Three Lectures a week will be given in the
College, and instruction in the field will also be
given once a week, or as often as may be expedi-
ent.
CHARLES FISHER,
Registrar.
Fredericton, December 1, 1853.

Notice.

By JOHN TALLIS & CO. of LONDON

THE LIFE AND TIMES OF THE LATE Duke of Wellington;

By Lieut. Col. Williams; (a Companion in
Arms, of His Grace)
Comprising the Campaigns and Battle
Fields of Wellington and his Comades,
the Political Life of the Duke and his
Contemporaries, and a detailed account
of England's Battles by Sea and Land,
from the commencement of the Great
French Revolution to the present time,
interspersed with Anecdotes, Personal
Incidents, and Advantages, etc.
ADDRESS.
The earthly career of Arthur Duke
Wellington has closed; one of the greatest
men of the nineteenth century, the fore-
most military commander of any age, has
paid the debt of nature. The time has now
arrived for giving to the world a History
of the Great Captain—of the Events of his
Life and Time—a life marked by patriotism,
probity and honour, and events the greatest
which have ever agitated the civilized
world, and whose influence will be felt
upon society till the end of time. Such a
work must appeal to the best and proudest
feelings in the heart of every Briton—the
glory of his country, the honour of its name
and position among the nations—pay his
own existence as a freeman, are recorded
and engraven in the annals of the "well
fought fields," and "the deadlymiment
breaches, the immortal battles and the glori-
ous sieges in which Wellington and his
Companions in-arms gathered untiring laurels,
placed their country's honour and
renown on the highest pinnacle of fame and
glory, and tore the victor's wreath from the
brows of heroes decorated with the trophies
of Italy, Egypt, and Germany.
To supply such a desideratum in Eng-
lish literature, the publishers of The Life
and Times of the Duke of Wellington have
determined to produce a book which shall
present to the reader, not only the dry
details which a mere biographical sketch
would afford, but a comprehensive work,
embracing the contemporaneous history of
the period; exhibiting the circumstances
which brought about the great events in
which the Duke and his contemporaries
were engaged, and giving to the reader a
connected narrative of the lives and actions
of the Warriors and Statesmen of the nine-
teenth century; and this from the pen of
one who was a companion in arms of the
great hero, and participated with him in
many a well fought field.
In order to carry out their views, the Pub-
lishers have determined that the work shall
be profusely illus- rated by Portraits of the
Warriors and Statesmen of the last half
century who have shed a lustre upon the
history of their country; also representations
of the most important engagements by
sea and land from the period of 1780 till
1852; so that the work, when finished, shall
form an Illustrated Gallery of the Naval and
Military Exploits of England.
It has been well said, "Character is the
true strength of nations; true glory their
best inheritance. When the time shall
come that the British heart no longer thrills
at the names of Cressy, Poitiers, Agin-
court, Blenheim, Ramillies, Oudenarde,
Malplaque; of Talavera, Salamanca, Tou-
lou, Waterloo—the last hour of the
British Empire will be struck." The pro-
motion and elevation of national spirit and
feeling is therefore the duty and interest
of every man and loyal son of England.
May Heaven inspire the hearts of every
one of us with that spirit and feeling.
Conditions of Publication.—The work
will be issued on the 1st and 15th of every
month, in Paris at 1s. 3d. and Divisions
handsomely bound at 9s. 4d. printed on Im-
perial 8vo. double columns, each part will
be embellished by two highly finished steel
Engravings, and will contain 32 pages of
text press. A beautiful steel Engraving,
13 by 19 inches, the storming of Sering-
patt, the first victory in which the late Duke
of Wellington was engaged in India, to
every subscriber to the work.

toria, Chapter 4, known as the Labour Act,
or upon Lands located, on which any part
of the purchase money money still remains
due, will be seized; and the parties found
cutting or trespassing will subject them-
selves to all the pains and penalties of the
Acts 14th Victoria, Chapter 29, intitled,
"An Act to revive and continue an Act to
provide for the more effectual prevention of
trespasses, and protection of Timber grow-
ing on the Crown Lands within this Pro-
vince," and 13th Victoria, Chapter 7, in-
titled, "An Act for the better prevention of
trespasses on Crown Lands and Private
Property."
And all Seizing Officers and Deputy Sur-
veyors are hereby required to give immedi-
ate notice to me of any trespasses that may
come to their knowledge.

ON THE
Philosophy of Marriage and the Secret Influences of Youth and Maturity.
With fifty Coloured Engravings on Steel. In a Sealed Envelope, price 2s. 6d. sterling.
SELF PRESERVATION: an Analytical and Investigative of the Physiology and Functions of Marriage—in all the bearings in which it is important subject affects the health and happiness of man, with its disqualifications, and impediments, tracing their origin to the effects of juvenile solitariness, youthful excess, tropical climates, or close study; to lowered by practical remarks, founded on twenty years experience in the treatment of impotence, nervous debility, local weakness, spermatorrhoea, syphilis, and all diseases of the urinary and generative system. Illustrated by fifty Coloured Engravings on the anatomy of the reproductive organs and their relative conditions in health and disease. By SAMUEL LAVERGNE, M.D., No. 37, Bedford-square, London. Doctor of Medicine, Matriculated Member of the University of Edinburgh Honorary Member of the London Hospital Medical Society, Licentiate of Apothecaries Hall, London, &c.
The essential object of this treatise is to point out the fatal consequences resulting from certain habits, irregularities and excesses, which have produced more misery in youth, degradation in manhood, and premature decay at all stages of life, than perhaps any other class of disease known to modern pathologists. Its perusal is particularly recommended to persons entertaining secret doubts of their physical condition, and who are conscious of having hazarded the health, happiness, and privileges to which every human being is entitled. The contents embrace the origin, effects, prevention and treatment of the deplorable catalogue of maladies connected with nervous debility, exhaustion of the vital energies, prostration of mental and physical capacity local and general weakness, acute and chronic spermatorrhoea, and their endless modifications. The treatment adopted is founded on experience gained in the most celebrated schools of medicine, and by the most eminent practitioners, both in Great Britain and in Continental Europe. Every peculiarity relating to the physiology, pathology, and general treatment of the disease incidental to the generative system is clearly explained, and the means of immediate relief and ultimate cure described in detail. The professional reputation of Dr. LaVergne, who has taken the most distinguished medical and academic honours, at home and abroad, is in itself a sufficient guarantee that those who may place themselves under his care will, in every instance, meet with that delicate, considering and invaluable secrecy which are so requisite in the treatment of these cases.
CAUTION.—In consequence of the extensive sale of this work, which has now attained its sixteenth edition, several spurious and imperfect copies are in circulation. The genuine edition can be had only from the Author or his authorized agents.
The work may be had of St. John, of O. Chubb & Co., price 2s. 6d. sig. Halifax, Messrs. Motson & Co.; Quebec, at the Gazette Office; Montreal, Mr. Dawson, bookseller.

Valuable Properties for SALE OR TO LET.
THE Dwelling House, Stores and Wharf, in the town of St. Andrews, formerly known as the Jones' property.
The Dwelling House, Out Houses and Wharf, in said town, formerly known as the O'Neil property.
100 Acres of Land in St. James', about one hour's drive from Milltown, St. Stephen.
100 Acres of Land in St. Patrick, through which the St. Andrews & Quebec Railroad is projected, and in which, or in its immediate vicinity, will be established a Depot, which will very materially enhance its value.
15 Acres of Land, within five minutes walk of the town of St. Andrews, a delightful situation for a Country Seat. If not shortly disposed of, it will be laid off in suitable lots for building purposes, and let on leases of improvement.
The subscriber begs to announce to the Public, that he has had his Lands, which are within ten minutes' walk of Chamcock, laid off, and will sell or lease Building Lots on advantageous terms. His object, in disposing of a safe and commodious building accessible at all seasons to vessels of the largest tonnage, with an unlimited and unrivalled water power, on which there are already some manufactories, with others of a most extensive scale proposed, and on the eve of springing into immediate operation, is that Chamcock is one of the most desirable situations within the British North American Colonies, for the Capitalist, the Mechanic, and operator. In view of which the said Building Lots are offered to the Public. Terms reasonable.

NOTICE.
WHEREAS Licence to sell all the Real Estate of Nevin Thompson, late of Saint George in the County of Charlotte yeoman, deceased, was, on the 5th day of September last past, duly granted by the Court of Probate for the said County, to me, the undersigned, Administrator of the said Nevin Thompson, for the purpose of paying his debts:
And Whereas, the real estate of which the said Nevin Thompson died seized, consists of the undivided moiety or half part of lot number Two, in the grant to Alexander M. Vicar and others, in Mercersburg, in the said Parish of Saint George, and which descended to him, the said Nevin Thompson, is heir at law of his father, the late Ebenezer Thompson, and which said lot is bounded as follows: On the West by land granted to Nevin M. Vicar; on the East by land owned by John M. Vicar; Northernly by land owned by John M. Nichol; and Southernly by the Campbell grant; (as called) and as the same lot heretofore conveyed to the said Ebenezer Thompson, by Alexander M. Vicar, NOTICE therefore is hereby Given, that I the undersigned, as Administrator as aforesaid, shall proceed to sell the above described Real Estate, under and by virtue of the said licence by Public Auction, on Tuesday the 7th day of December next, at 12 o'clock, noon, at the Homestead, on the Premises.
