

WORK ON MAGUASHA WHARF

Dalhousie—Other River Matters Discussed

Amiot, District Engineer of the Department of Public Works, Ottawa, with headquarters at Rimouski, P. Q. arrived in Dalhousie on the Limited-to-day en route to Upper Maguashash, P. Q., to give instructions to the contractors, who have commenced the work on the repairs and addition to the Ferry Wharf there.

Mr. LaBillois received word from Hon. Mr. Marcell this week, that tenders will be called shortly for a steam boat Ferry Service between Dalhousie

and Québec points by the Department of Trade and Commerce, Ottawa.

While in Dalhousie Mr. Amiot is guest at the Queen Hotel. He is expected to meet Capt. Frank Allard of Carleton, P. Q. with the view of meeting the requirements of experience of the navigators who fully understand the prevailing winds of the Restigouche River, the tides and the danger of the running ice in the spring before proceeding with the further repairs and alterations to the Upper Magalloway Wharf.

Rev. John M. Murchison who is the District Secretary and is working for the improvement of the Maritime Society holding meetings in the district is the guest of Ex Alderman J. G. Stewart at "Bellevue."

**CLOSER ECONOMIC
SOCIAL RELATIONS**

Washington, May 23.—A forward move to bring more cordial relation and better understanding between

States was made last night when the United States Chamber of Commerce with two thousand delegates present from all parts of the United States unanimously adopted a resolution proposed by the Chicago Association of Commerce declaring:

"That an inquiry be conducted in the officials of the United States Chamber as to the possibility of further improving the social and economic relations between the business men of Canada and the United States, to the end that each may enjoy the utmost advantage to be maintained to the best possible social and business contact between the citizens of the two countries.

This resolution is in accordance with action already taken by the Chamber of Commerce seeking to bring about a better understanding between the business men of the United States and the business men of Europe.

PRES. ASSOCIATION FORWARDED HER

Dr. Morrison Of St. John Addressed Meeting On Tuesday

Night—Many Present

At a meeting held at the Orange Hall on Tuesday evening at which Rev. Dr. Morrison of St. John was the principal speaker, a Presbyterians Church Association was organized here. The officers of the Association have not yet been announced.

Tuesday's meeting was largely attended and those present listened with rapt attention to Dr. Morrison's address in which he referred to the Church of Christ in the Christian Union but gave in some detail the reasons why he would vote against the proposed union of churches. W. F. Yorton was chairman of the meeting and tendered the thanks of the meeting to the visiting speaker.

All those interested in continuing the Presbyterian Church here remained after the meeting and affixed their signatures to the document as evidence that a vote of the congregation had been taken. A resolution of welcome was also passed.

TARGET SHOOTING

For the first time in many years target shooting was indulged in at Victoria Day on the Shooting Range of the Resougeuse Military Rifle Association. The members of the Association visited the range both morning and afternoon and practise at 200, 500 and 600 yards. The target was a 1000 yard target, was actually engaged. The second army Enfield rifles were used. The organization now has a membership of over eighty.

EXPERT DOES NOT RELY ON OYSTER

European Expert Who Makes
Pearls From Fish Scales Ad-
mitted to United States.

Quebec, May 25.—Because he holds
a secret for the manufacturing of arti-
ficial pearls from fish scales, and be-
cause, according to United States Im-
migration law, there is a clause to the
effect that unless a citizen is found to
do this work the alien must be admit-
ted to the country, Charles Harten-
berger, a native of France, who has
been detained here for some weeks by
the U. S. authorities together with his
wife, have gone forward to Eastport,
Maine. Their release was ordered by
the Department of Immigration at
Washington, and closes a case that
had caused much interest to all con-
cerned.

Hartenberger and his wife landed
from a steamer at St. John, N. B., last
April. They were detained there and
later transferred to this port to
await their final disposition under the
"alien labor contract" clause of the
United States immigration law. The
case was officially appealed to Wash-
ington with the above result.

Hartenberger some months ago en-
tered into a contract with the
Eastport firm. His services are con-
sidered very valuable to his principals,
and the latter have been very active
of late to secure his release from de-
tention quarters here. They have
proved to the satisfaction of the
Washington that Hartenberger can-
not be replaced by a citizen of the
United States, as the secret of manufac-
turing these pearls from fish scales
is entirely his.

William S. Walsh reports several instances
in his "Handy Book." Along about
1773, it appears, a Dr. Guither was
reported to have propagated frogs—
included with snakes in the legendary
prohibition—and another man to have
imported some vipers. These, when
released in his garden, are said to
have multiplied rapidly and spread
over the neighboring country.

An Englishman is said to have tried
the same experiment in Wexford in
1797, but his snakes all died soon after.
Still another attempt at Mile-
cross, near Newtonwards, in 1831 was
successful, but a later trial by the
Marquis of Waterford is said to have
been a failure.

In 1890 despatches told of two large
serpents, probably pythons, which
were killing young pigs and other
small animals near Castlebar. It
was afterward believed that they were
the progeny of a female which had
escaped when a travelling circus men-
agerie was released by its drunken
owner in retaliation for interference
by Tipperary policemen.

Scientifically the truth seems to be
that no country which has no cold
to support its life is naturally im-
mune from snakes. Many islands are
known, however, in which they do
not exist, or have not existed until
imported from elsewhere. Hawaii,
the Azores and several South Sea
lands share this blessing with Ireland.
Although they propagate with fair
rapidity, snakes move from one gen-
eral location to another very slowly.
They seem to have almost no wander-
lust. Colonies of them established
in places previously immune are
thus very easily stamped out unless
there is an outside source of con-
tinuous supply. This may explain why
snakes have never thrived in Ireland.
The one just found is probably a re-
cent importation.—Ex.

A RIVER THAT LOSES ITSELF
Poets and others have taught us to
accept rivers as more or less prosaic
features in Nature's general scheme
of things. Tennyson, for instance,
has held up the brook as a model of
virtue and longevity. It is both re-
freshing and interesting to discover,
therefore, that there are streams
which do not conform to this gen-
eral standard, but which, very much
like human beings, do things they are
not supposed to do according to the
accepted theories of convention.

There is a river in Canada which
loses itself completely and thereby
has earned a rather outstanding re-
putation. This is the Maligne River
which rises in Maligne Lake, in Jasper
National Park, Alberta, and, after
playing its pranks, tumbles as it if it
were applauding itself for its clever-
ness—with a great rush and roar into
the staid waters of the Athabasca.

After it leaves Maligne Lake it
flows for a goodly number of miles
with nothing in its appearance to in-
dicate that soon, so to speak, it is go-
ing to sow some wild oats. It is when
it reaches the Maligne Canyon,
situated about five miles from Jasper
Park Lodge, that it begins its pranks.
Here it dips suddenly and, without
warning, nose dives into a narrow
gorge it has cut for itself out of solid
rock. Within a distance of fifty yards
this chasm reaches a depth of several
hundred feet and it is hard to see the
water which has lessened in volume.
This diminution continues until only a
trickle is left. Yet, before the Ath-
abasca is reached, the river, is again
a roaring torrent. Only one explana-
tion seems possible, that somewhere
the river loses itself in an under-
ground passage. The answer is one
of the many interesting spots for
those who visit this magnificent play-
ground in the Canadian Rockies every
year.

This is but one of the many scenic
spectacles that the tourist needs in
the land of the mountains to be forgotten
beauty and many are now planning to
take advantage of the very low tourist
fares to this territory, which go into
effect on the Canadian National Rail-
ways on May 15th.

Illustrated literature and informa-
tion as to fares, etc., may be had on
application to the General Passenger
Department of the Canadian National
Railways at Montreal, N. B.

REMARKABLE EXPERIMENT

A remarkable fruit tree has been
grown as an experiment in the Trans-
vaal. A lemon tree was trimmed
until only three branches remained.
Upon one was grafted an orange,
upon another a grapefruit, while the
third was allowed to remain lemon,
with the result that at a certain time
of the year the tree is bearing oranges,
grapefruit and a few lemons all at
once.

METHODISTS MEET IN FINAL SESSION

Chatham District Passes Resolution Approving Church Union

The annual meeting of the Chatham District of the Methodist Church opened at Bathurst Wednesday evening. The ministerial session was held with the following clergy present: Rev. H. C. Rice, chairman, Bathurst; W. H. Godfrey, Campbellton; F. H. Littlejohn, Chatham; A. W. Brown, New castle; R. M. Brodie, Millerton; Geo. Elliot, Buctouche.

The business session opened with the following lay delegates in attendance in addition to the clergy: S. MacLoon, Chatham; T. A. Clarke, Newcastle; K. Fair, Troutbrook; W. J. Kent, Bathurst; H. P. Dryden, Campbellton.

Statistics showed a considerable increase in missionary groups from the district. Rev. F. H. Littlejohn was named as district minister to stationing committee at conference. The lay delegates appointed to conference were A. F. Coates, L. C. Watham, T. A. Clark, H. Fair, J. Y. Mersereau, E. H. White, E. A. Dempsey, Ray E. Matthews.

The routine business took up the Thursday morning session and the delegates left for their homes that afternoon.

Before adjournment the following resolutions were unanimously adopted:

That this Methodist annual district meeting of the Chatham district as it closes what is in all probability its last session under the honored name of Methodism, place on record its appreciation of the loyalty and co-operation of the Methodist people, throughout the district and also the recognition of the splendid Christian fellowship and service, the past history of the district shows and further how the members of the district, ministerial and lay, now are prepared to enter cordially into the new relationships of the United Church of Canada to give devotion to its trusts and ideals and faithful administration of its affairs as authorized on the basis of union.

A resolution expressing regret at the departure of Rev. H. C. Rice from the district was also adopted.

Belledune

The many friends of Mr. Richard Currie are glad to see him around again, after his accident. Sat. last when he was thrown from his horse and sustained a broken collar bone. ed from Ottawa where she has been.

Miss Charlotte Hodgins has returned from the winter.

Messrs. Frank and Charlie Guitar, left Friday morning for West Brook, N.B.

Mr. and Mrs. Raymond Guitar of Westbrook are spending some time here, the guests of his parents Mr. and Mrs. Joseph Guitar.

Mrs. C. McAfee who has been spending the winter months here, has returned to her summer home.

Mrs. J. Stammer has gone to St. John to visit friends.

Mr. Walter Loane O'Connell was the week-end guest of his brother T. J. Loane.

Mrs. Geo. Miller and son Arthur of Dalhousie spent Sunday the guests of Mr. and Mrs. H. Ellis.

Miss Ruth Archibald, Jacquet River was the guest of Miss C. Anderson recently.

Mr. and Mrs. G. Chalmers and family of Bathurst motored here and were the guests of Mr. and Mrs. Jas. Chalmers.

Mr. John Grant has returned from Montreal where he went for treatment. His many friends welcome him back.

OUT FISHIN'

A feller isn't thinkin' mean—out fishin'; His thoughts are mostly good and clean out fishin'; Or he's not knock his fellow men, A feller's at his finest when—out fishin'.

The rich are comrades to the poor—out fishin'; All brothers of a common lurs—out fishin'; The robin with the pin and string Can chum with millionaire and king Vain pride is a forgotten thing—out fishin'.

A feller gets a chance to dream—out fishin'; He learns the beauties of a stream—out fishin'; An' he can wash his soul in air, That isn't foul with selfish care—out fishin'; an' relish plain and simple fare—out fishin'.

A feller has no time for hate—out fishin'; He isn't thinking thoughts of pell, Or goods stacked high upon a shelf, He isn't eager to be great—out fishin'.

A feller's glad to be a friend—out fishin'; A helmin' hand he'll always lend—

The brotherhood of rod and line An' sky an' stream is always fine—

A feller isn't plotting schemes—out fishin'; His liver is a coat of tan—

A feller's always mostly man—out fishin'.

The Bay Chaleur Country

An American Newspaperman's Idea of Restigouche as a Summer Vacationland.

It has often been truthfully said that we do not appreciate the beauty of our own country and that it takes a stranger to bring our attention to the beauties which have become commonplace to us. Below we present an article dealing with the Bay Chaleur district which bears out the above statement.

The following article was written by an American newspaperman of the name of J. H. Littlejohn, a frequent summer visitor to this part of the country. Its chief interest takes one through the famous Matapedia valley in the fact that here is a picture of the Province of Quebec.

The most important artery of traffic in this part of the country is the so-called International Highway running North through Maine from Portland via Brunswick, Augusta, Waterville, Skowhegan and Jackman and then on over the Boundary Mountains to Armistice, P. Q. and the city of Quebec.

Here one follows the North Shore of the great St. Lawrence River for a long distance through Riviere du Loup, Mont Joli where one strikes due South through the mountains and through Matapedia Valley to the little town of Matapedia, the gateway to the Bay Chaleur region from the North.

The second entrance from the North through Maine to Houlton as previously described travel almost the entire length of the Garden County of the United States, Arrostock and then cross the International Boundary at Madawaska into Edmundston, N. B. and then through the Teniscouata Lake district to Riviere du Loup and then East and South to Matapedia as previously described, following the South bank of the St. Lawrence river.

A third highway from the North is now being constructed from Van Buren, Maine and St. Leonard, N. B. across to Campbellton.

Matapedia is located in the mountains at the junction of the famous salmon rivers, the Restigouche and the Matapedia, two of the finest fish streams in the world. Here salmon are caught weighing anywhere from 15 to 50 pounds.

Here, also, is located the Restigouche Salmon Club, the membership of which is composed of some of the wealthiest and best known Americans.

Campbellton is the business section of the Northern Bay Chaleur country and a great lumbering centre. It is located on the Restigouche River, while Dalhousie is the county seat of Restigouche county and is situated at the mouth of the Restigouche.

New Mills is located on the New Brunswick side of the Bay Chaleur and commands a superb view across the bay to the Gaspé Peninsula with its mountain range. It is also protected with about the only island of any consequence directly within the bay, Heron Island with its stories of Captain Kidd, the pirate. New Mills has, also, the distinction of having the finest boys' camp in the province of New Brunswick, Camp Bonaventure, with the majority of its boys coming from the families in Cleveland, Ohio and other cities in the United States.

Charlo and Jacquet River on either side of New Mills, are beautiful settlements surrounded, as are all of the communities along this shore, by wonderful game filled forests, superb fishing and remarkable safe salt water bathing and boating.

Bathurst is the gateway to the Bay Chaleur country from the South, a very enterprising town with excellent stores and a large pulp and lumbering business. It is directly on the main line of the Canadian National Railway system with stations at each place.

The Bay Chaleur was first visited by the rocky explorers, Cabot and Champlain, and was given its name because of its remarkable warm water bay warmer in summer than any salt water far South in the United States. It is for this reason that it is so delightful for bathing. The bay was also the scene of the famous battle between the French and British fleets in 1760. Another notable incident in its history was of very recent date. This was when Gaspé Basin, on its northern shore, was the rendezvous and sailing point of the first great Canadian contingent in the World War.

The Northern shore of the Bay Chaleur is in the province of Quebec and is called the Gaspé Peninsula for it is a comparatively narrow neck of land extending for nearly 250 miles eastward with the St. Lawrence River on its northern side. One of the real wonders of the Western Hemisphere is located in the Bay Chaleur Perce Rock, at Perce, and here also are the spectacular Perce Mountains. There is a very good road from Matapedia to Bathurst.

Leaving Portland again one may take the coast route, via Rockland, or one of the two central Maine routes, via Bangor, Bangor, Augusta and Waterville to Bangor. Here he may continue north to Lincoln and

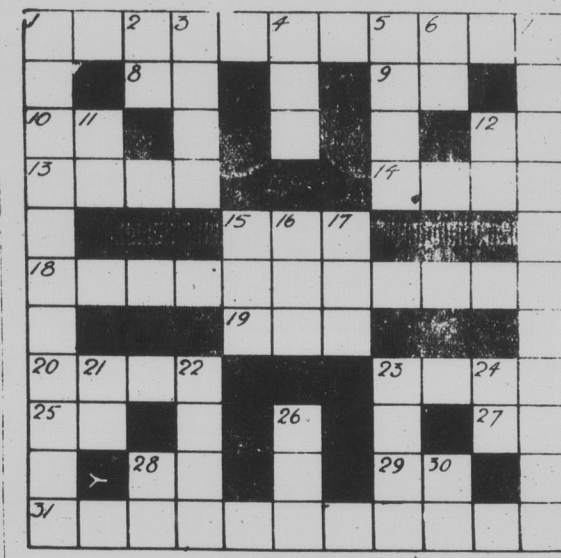

then on North to Houlton. At this point he may cross the International boundary into Woodstock, N. B. and then down the beautiful St. John river to Fredericton and through to New Brunswick or he may turn off at Lincoln and go straight through Topsfield to the west side of the bay and especially at Bathurst, Jacquet River, New Mills and Campbellton.

If one would visit a territory not overrun with tourists which still retains its original characteristics and quaintness, has superb scenery, wonderful hunting, fishing, boating and bathing and which is now easily accessible by railroad or by automobile, then the Bay Chaleur region fills every requirement and desire.

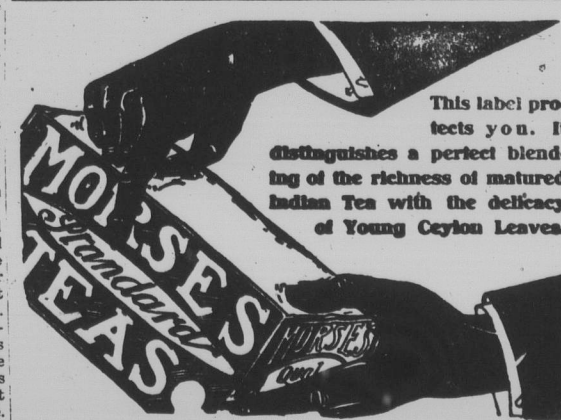

A PLACE FOR REFLECTION

Visitor from London—Do you mean to say you do nothing but lean on that fence all day? Why, I should go mad in a week!

Native of Rural Village—Aye! Some would. But it's all right for a chap who can do a bit of thinking for himself.

IGNORING THE MARITIMES

The Editor, Montreal Daily Star:

Sir—A Star special cable from London published in your issue of May 6, said:

"The London Pressman were on Monday given a preliminary view of the Canadian National Railway Pavilion at Wembley. The principal new feature is a panorama which shows Canada from East to West as it would unfold itself during a railway journey across the Continent. The first scene is Quebec city. The St. Lawrence is kept in view and the new Quebec Bridge is passed and then the Island of Montreal is presented. Ottawa, Toronto, Hamilton and Niagara are passed and the spectator finds himself travelling through the region of the Great Lakes into the Western lands, the foothills of the Rockies, and out to the Pacific coast."

In the same issue was a letter decrying the talk of secession. This continual ignoring of the Maritime Provinces as a part of Canada is getting us rather tired. It is bad enough for the English newspapers to bound Canada on the east by the Province of Quebec, and much worse for the Canadian papers to do so, but it is the limit when the Canadian Government Railway sets its official seal of approval on this offence. It appears that the only time we are recognized as part of Canada is when we clip in help pay for bridges and free canals in "Eastern Canada" to pay to bring immigrants to Central and Western Canada, and assume part of the liability incurred by the same Provinces for railway bonds—while building and paying for our own railways. We did very well before when we were not a part of Canada and can do so again; and if it is the desire of the "powers that be" to have Canada bounded on the East by Quebec, and have a railway journey by the Canadian National Railways across Canada commence at Quebec, we will be quite satisfied. If the kind of publicity complained of is not stopped and stopped soon, your correspondent is liable to hear more than talk of secession.

ROBERT A. LOGIE, Chatham, N. B.

FUR FARMING
The Maritime Provinces are the home of the fox-farming industry. Are they doing as much along this line of development as is commercially possible? The Government of Ontario has decided to establish a fur farm. It will be a provincial farm, and we are told that "educational leadership in fur-farming methods, together with the supplying of stock to prospective farmers is to be the service rendered by the farm, which is to be hoped, will prove the inspiration for a profitable industry in the province." The farming is not to be confined to the production of fox fur, and we are told a decided interest is being taken in the development of a muskrat industry in Ontario; but the farm will go further and attempt to develop wild fur life in general, and its possibilities as an industry. It would be well for our own provinces to keep an eye on the development of this new branch of industry in Ontario.

You'll be all steamed up to the hystorical point when you see Harold Lloyd in "Hot Water." At the Opera House Monday and Tuesday.

A CAUTIOUS MAN
Mrs. Chart—No, my dear Vicar, my husband has never spoken a harsh word to me.
Vicar—Ah, charming man! So considerate!
"Oh, no; only cautious!"

HOW TO KEEP FIT IN MIDDLE AGE

"Suicide" by Living Too Well
Denounced by Doctor

A man of fifty-five has no right to be bald, deaf, stiff in the muscles, with teeth going and varicose veins, declared the medical officer of health for Deptford, Dr. Charles S. Thomson, D. P. H., at the National Food Exhibition, Olympia. The chronic bon vivant, the gay Lothario, the glutton, and wine-bibber who dies early is a suicide he said.

"When we add to over-indulgence in food and drink the strain of social and business ambitions, worry, anger, and grief, then our errors are followed by structural changes in our organs. The mind and ineffectual race for life becomes the triumphant race for death."

"Those who cut down their mistakes after forty have a clear eye, a retentive memory, an elastic step and untroubled brain, resilient and elastic arteries, and a green old age as their reward."

"Our whole life and well-being depend on the proper digestion of food, and we need thirty-two good teeth and bites for each mouthful of food. A man should visit the dentist every six months if he wants to live long."

"Dinner at night is better than a full midday meal. Eat meat once a day only. Everybody over forty should take enough food to maintain the lightest weight consistent with perfect health. It is sheer nonsense for a man to think that at fifty-five he should weigh a stone more than he did at thirty."

"Never take alcohol before night, and take very little of it even then. Moderation in eating is imperative. Drink plenty of water between meals, fast for a day from time to time, and take a three-mile walk daily."

"Try a three-day fast at times. Take the French breakfast of coffee and a roll in place of the heavy English breakfast. Get away from that foolish idea of 'keeping up your strength,' for over-eating ruins the strength."

"A man of forty-five or fifty should not indulge in the foolish afternoon tea with cake and bread-and-butter; take a cup of tea and nothing else. At the evening dinner, fish fowl or game is better than veal, pork or roast beef. Fruit salad and savory cheese complete a good dinner. Eat nothing after 8 p. m. Such a diet will help a man to be middle-aged until seventy."

"Early hours, long sleeping nights, no excitement, the minimum of stimulants, change of scene and plain and simple diet must be the rule."

Matapedia

Miss Lillian Adams "nurse in Training" in Boston is spending her holidays with her parents Mr. and Mrs. S. M. Adams.

Mrs. W. A. MacPherson, Port Daniel, Que. spend a few days the guest of her sister Mrs. W. Fraser, before entering the Soldiers' Memorial Hospital as Nurse in Training.

Mr. and Mrs. Wm. Ross "nee Miss Boucher" of Chandler was the guest of Mr. and Mrs. James Delaney for the week past.

Mr. and Mrs. Wm. Ross of Chandler accompanied by Mrs. Jas. Delaney attended the National Hospital Hospital, Campbellton, N. B.

Friends are glad to see Mr. S. M. Adams home again after being confined in the hospital.

Miss F. Murray is the guest of Miss R. Irving.

Mrs. S. Walker is the guest of Mrs. J. Walker.

We notice that summer and fishing season is approaching, as the club houses are being re-opened.

Miss Mary Haley was in town Saturday.

Mrs. Alex Irving was in Campbellton last week.

Mr. Walter Coughlan has returned from St. John to resume his summer work.

Mrs. Mina B. Duncan spent Victoria Day the guest of Mrs. Thos. Busted, Bordeaux, Que.

Mr. Morton Irvine has returned to Matapedia.

Mr. and Mrs. En. Boudreau have left for St. On. Que. where they will reside and make their former home.

BEAUTIFUL TRIP FOR SUMMER

Maritime Provinces Have Everything for Which Tourist Could Ask.

If one fact stands out more clearly than another in the relation of cause to effect, it is shown by the popularity of the Maritime Provinces generally as a motor holiday ground. The cause dates back only a few years when a good road policy was inaugurated and gradually carried out. The effect is apparent today when this extreme easterly part of our country is attracting more and more automobile tourist traffic every year.

To the tired easterner whether from Ottawa, Montreal or Toronto, Boston or New York, the fresh Atlantic breezes, the old world cities of Halifax, St. John, and Charlottetown, the peaceful and beautiful valleys of rich agricultural country, all afford such a complete relaxation to the highly nervous strain under which most men are working today that it is no wonder so many go, and then keep on going year after year.

The tourist from central Canada, or the Middle States may take his choice of either the St. Lawrence river route, or the road winding around the bays of the Rocky Maine coast, but whichever he takes, there is not one mile of either but also has its own particular charm of scene or of interest. The former after leaving Montreal, runs along the north bank of the river as a provincial highway to Quebec and consequently is always kept in splendid condition for motoring, passing through Berthier and Three Rivers on the way. Crossing by ferry to Lévis, then runs through Montmagny, Kamouraska to Rivière du Loup, and turning east at this point, passes along the shore of Lake Temiscouata and down to Edmundston just over the boundary in New Brunswick. From here the route lies all along the lovely valley of the St. John river, and so on to Fredericton and St. John.

Or via Maine
If one, however, wishes to reach New Brunswick from Boston or New York, he will naturally travel by the Maine Coast route, passing not only through Portland, Bangor and St. Stephen, but also through a country where nearly every town and village has some literary or historical interest acquired during the past three hundred years.

From St. Stephen, New Brunswick, this route, it is only about 80 miles to St. John, but if one likes golf this short distance may take a day or two to negotiate, as a fact, miles after leaving St. Stephen the fine Algonquin Hotel, and the famous golf links adjacent at St. Andrew's, overlooking the bay, are a combination very difficult to resist.

Halifax, Nova Scotia, may be reached by five separate routes, depending very largely on the source of approach. Firstly, all from Montreal, New Brunswick through Amherst and Truro. Next, by road from Amherst to Parrsboro, crossing the Minas basin by ferry to Wolfville. Another, by ferry from St. John to Digby, then through the famous Annapolis valley to Wolfville and Windsor. The fourth is by sea from Boston to Yarmouth, and thence by either the north or south shore, and the fifth is by sea all the way from Boston. These two latter routes to Halifax will give the traveller from Boston a good start for a Maritime tour, which is a distinct advantage to one already familiar with the coast roads.

Prince Edward Island
Prince Edward Island has now a splendid system of roads from one end of the island to the other. Approach to it is either by ferry from Cape Tormentine to Borden, or from Pictou to Charlottetown. A tour of the Maritimes would not be complete without seeing the "Garden of the Gulf" and the circular trip could be made to include most of the prominent features of this delightful island. And speaking of circular trips, a glance at the new map prepared by the Natural Resources Intelligence Service, showing the principal motor roads of the Maritime Provinces, reveals the possibilities that present themselves. Where else on this whole continent can a circular trip of about 2,000 miles be taken with all the variety and interest of land and sea?

Starting, say, from Ottawa, Montreal or Quebec, crossing to Lévis, and going by way of Rivière du Loup and Fredericton to St. John, New Brunswick; then across the Bay of Fundy to Digby, Halifax and Pictou, taking the boat to Charlottetown and Borden, returning by ferry to Cape Tormentine, Chatham, Campbellton and Metis, and thence back home through Rivière du Loup again.

All through these Maritime Provinces, improved roads have brought improved hotels. Competition for the tourist trade has developed greater comforts and conveniences for the traveller. Gas and oil supply stations, repair shops and garages will be found all along the main roads so that no one need hesitate in planning a trip through these most pleasant lands.

HOW TO COOK GREENS
Whether or not the first wild greens—chickweed, mustard and sometimes—be enjoyed is much in evidence. It is in this springing season, largely on the preparation, seasoning and general attractiveness of the product. Only young tender plants, tips and leaves should be gathered for cooking. All greens should be looked over carefully to remove wilted or coarse leaves, stalks, stems and then thoroughly washed. This is best accomplished by plunging the greens into warm water and washing by rubbing between the hands as if they were cloth. Lift from the water; never pour the water off, as this leaves the sediment in the greens, and plunge into another pan of water. Continue washing until no trace of sand is left.

New Carlisle

Our sympathy is extended to Mr. and Mrs. Clifton Flowers, whose bright little son passed away with pneumonia at the age of nineteen that same in a short time, as their little daughter died about eight months ago.

The weather is extremely cold, and yesterday we were visited by a snow storm.

We are sorry to hear that Mrs. Roland Beebe is in the Soldiers' Memorial Hospital at Campbellton, where she has undergone a very serious operation and we sincerely hope for a speedy recovery.

An entertainment by the New Carlisle Amateurs was held in the Parish Hall on Saturday, the 16th, of May, and was largely attended and thoroughly enjoyed. The audience were not doomed to disappointment, for from the rising of the curtain until the finish it was heartily applauded.

Following is the program:—
Opening Chorus—"You're in Love with Everyone."
Song—"We Parted On The Shore" By Mr. J. Lang.

Dialogue—"Bridget's Investment." Characters—Mrs. Andrew Ross, Mrs. Angus Astles, Mr. Wilfred Morrison, Mr. Roy Hall, Mr. Wilson Hall.

Song—"Loves Old Sweet Song"—Mr. Roy DeGruchy, Miss L. Huntington.

Song—"Silver Threads Among The Gold." Mr. Harold Thompson, Miss V. Caldwell.

INTERMISSION

Chorus—"We've Only Been Down To The Club"—By The Boys.
Playlet—"Squaring It with the Boss." Characters—Miss L. Huntington, Miss V. Caldwell, Miss H. Wellman, Mr. W. Morrison, Mr. Roy Hall, Mr. H. Thompson.

Song—"Mr. Ormsby." Dialogue—"Aunt Virginia Ear Trumpet." Characters—Miss L. Huntington, Miss W. Weary, Mrs. Andrew Ross, Mr. W. Morrison, Mr. H. Thompson.

Song—"Mr. J. Lang." Chorus—"Cousin Jeremiah. (By The Company)" Closing Address by Rev. W. DeGruchy.

GOD SAVE THE KING
Death again visited New Carlisle on Thursday, May 14th, and has claimed for its own, one of our respected citizens, in the person of Mr. James Thomas Astels, at the age of seventy six years after a lingering illness many friends for kindness borne with uncomplaining patience.

He leaves to mourn his loss, a widow, six sons and four daughters, Mrs. Walter Bond and Mrs. Ernest Foster both of Toronto, Mrs. Frank Adams of Montreal, Mrs. Charlie Young of New Carlisle, and Gilbert of New Hampshire, Thomas of Sask.

Edwina of Montreal, and St. John, Edward and Stuart at home, also two brothers, Ernest of New Carlisle, and Wm. of Gascou. The funeral was held on Sunday afternoon at two p. m. and was largely attended in spite of the rain. Interment was made in the Episcopal Cemetery Rev. DeGruchy officiating a large number turned out to the funeral to pay their last respects to one who was held in high esteem of all who knew him. Much sympathy to Mrs. Astels and family in their dark hour of sorrow.

Mrs. J. T. Astels and family wish to thank many friends for kindness shown them in their bereavement.

Cape Cove

The weather for the past week has been very rough and our lobster fishermen have been unable to fish their traps, during the past week to advantage.

Messrs. DeGruchy and Hamilton, of the Bank of Nova Scotia, New Carlisle paid a visit to friends and relatives in Cape Cove Saturday. Miss DeGruchy also spent the week end at her home.

Congratulations to Mr. and Mrs. W. E. Beck of Cape Despoir on the arrival of a bouncing baby girl.

Miss Bosay of the Maternity Hospital Cape Despoir, has been unusually busy the past week, congratulations to her on her very successful work in her new undertaking.

A very enjoyable evening was spent at Mr. John Mahan's on Thursday evening where a number of friends met at a shower party given in honor of Miss Janet Beck. Our popular comedian Mr. John Albert was somewhat indisposed that evening, and was unable to perform as usual, to the disappointment of Messrs. S. C. LeGrand and A. W. Baucou.

Mr. and Mrs. J. Seale, Jr. Sealville, were out in their "Moon" car on Sunday.

Our esteemed Doctor Pondiot left for Montreal last week we understand that he will be coming back in a few weeks with his bride.

Congratulations to Mr. and Mrs. Wm. Beck, on the arrival of a baby boy.

Gustave LeMieux Esq. M. P. P. for Gaspe was in town Saturday and Sunday, staying with Mr. Ed. Bourget.

Mr. Chester Mann of the Bank of Nova Scotia, Paspheiac who was spending his holidays with his parents returned to Paspheiac Monday morning to spend a few weeks holiday.

During a smallpox scare in Glasgow, a certain doctor was so busy vaccinating people that he had to make an auxiliary room for such operations in the basement of his house.

One day a burly man called and said he wished to be vaccinated and the maid told him he would have to be one in this basement.

"I'll be done in the arm," said the man, "or I'll no be done at all!"

A golf ball will be awarded to each member of the team making the lowest score for fourteen holes.

DR. WIGLE RESIGNS
 At a meeting of the Mt. Allison board of Regents held Wednesday, last week Rev. Dr. Wigle, who for seven years has been the faithful and efficient Principal of Mount Allison Ladies' College, placed his resignation in the hands of the secretary. After discussion the Board regretfully accepted his resignation to take effect in May, 1926. A committee was appointed to nominate a successor and a report will be submitted at the October meeting of the Board.

PAINS ACROSS THE BACK

Relieved by Lydia E. Pinkham's Vegetable Compound

Mitchell, Ontario.—"I have taken your medicine for a number of years. I do not take it steady all the time, but I never without it. I always keep it in the house. I took it first for pains in the abdomen and bearing-down pains, headaches and pains across the back. I have my home to look after and many a day I could not get up at all. I saw the advertisement in the paper about Lydia E. Pinkham's Vegetable Compound, and Mrs. John Miller told me about it, too. Every time I take it, it makes me feel better and I always recommend it to my friends. I am willing to answer letters from women asking about this medicine and you may use this letter as a testimonial."—Mrs. F. J. WASSMAN, Mitchell, Ontario.

The merit of Lydia E. Pinkham's Vegetable Compound is told by women to each other. Many times I have known by experience what this medicine will do and they are anxious for others to know. Such testimony should cause any woman suffering from the troubles so common to her sex to give this well-known medicine a fair trial.

Do you know that in a recent canvass among women users of the Vegetable Compound over 220,000 replies were received. To the question, "Have you received benefit by taking this medicine?" 86 per cent. replied "Yes."

This means that 86 out of every 100 women are in better health because they have given this medicine a fair trial.

Hello Daddy—don't forget my Wrigleys!

Slip a package in your pocket when you go home to-night.

Give the youngsters this wholesome, lasting sweet—for pleasure and health!

Use it yourself after smoking or when you're driving a great little trucker.

WRIGLEYS

after every meal!

Fine for catarrh when melted in a spoon or snuffed up the nose and vapors inhaled.

Head and Chest Colds Relieved In a New Way

A Salve which Releases Medicated Vapors when Applied Over Throat and Chest.

Inhaled as a vapor and, at the same time absorbed through the skin like a liniment, Vicks VapoRub reaches immediately inflamed, congested air passages. This is the modern direct treatment for all cold troubles that is proving so popular in Canada and the States where over 17 million jars are now used yearly.

Splendid for sore throat, tonsillitis, bronchitis, croup, head and chest colds, catarrh, asthma or hay fever.

Just rub Vicks over throat and chest and inhale the medicated vapors. It quickly loosens up a cold.

VICKS VAPORUB

Over 17 Million Jars Used Yearly

MEN who wear Penmans knitted underwear gain in health, in comfort and in purse. Penmans Balbriggans are refreshingly cool, absorb perspiration and allow the skin to "breathe."

They do not rip or tear, outwearing ordinary summer underwear three times over.

Penmans Balbriggans are sold in all styles. Whether you prefer the loose-fitting or the form-fitting styles there is a Penmans garment that will suit your taste perfectly.

"The best known numbers are 22 and 46. The number appears directly below the trade mark on the cloth label attached to every garment. Also made in lower priced lines which, however, always bear the trade mark. If your dealer has no stock he can obtain it."

FINDS TROPICAL VALLEY IN NORTH

Prospector Makes Discovery In British Columbia—Heated by Hot Springs

A strange valley in the wilderness of northern British Columbia where tropical conditions are said to prevail is to be explored this spring and summer by an expedition now being organized here.

The valley lies in the heart of the vast unexplored area lying north of the Skekine River. It is said to be only two hundred miles long and barely forty miles wide, but if the reports brought out by those who have made a partial investigation are true it is one of the most remarkable places in the world.

Although hemmed in by snow-capped mountains and surrounded by a territory which experiences a long and severe winter, this mysterious valley is said to enjoy a tropical climate from one season to another. Moose and deer and all other game animals are said to be of great size and exceptionally tame, and with them dwell, according to reports, many animals and birds that at present are not known to science. The vegetation is luxuriant and quite different from that of the surrounding district. Rose bushes are said to be growing there as high as fruit trees and with branches as thick as a man's wrist.

It is more than a year since Frank Perry, Vancouver mining man and prospector, came out of the north and told of his discovery of the mysterious valley. He related how, after climbing a mountain top, he had looked down a valley that was overcast by a bank of fog. This seemed an unusual phenomenon in winter. He descended into the valley and found that it contained rivers of warm water that flowed from a series of hot springs.

These, he said, accounted for the warmth of the area and unusual variety and density of the vegetation. Perry travelled with dogs and claims to have spent eight years in the district "living off the land." He visited civilization occasionally, bringing out with him his sensational stories of a virgin game paradise.

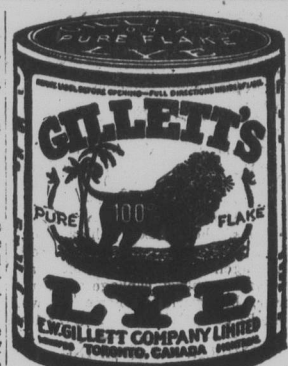

For a time Perry's assertions were not credited, but he has convinced a number of well-known capitalists and he is going back this summer with an airplane as part of his equipment to make a more thorough examination of the valley. One of those behind the enterprise is Charles H. Mackintosh, former Governor of the Northwest Territories. Another is Philip P. Loneragan, pioneer Seattle mining engineer.

In addition to the unusual climate and flora of the valley it is said that an oil lake and open coal seams were seen by Perry during his visit, and that he found traces of placer gold, copper, iron and bauxite. George Plater, an old time prospector and trail blazer, for which supplies have already been shipped from here to Telegraph Creek, B. C., the northern starting point.

A NEW BUILDING MATERIAL

To be able to build a house in three days at a cost of \$1,950, said house to include three bedrooms, a kitchen, a parlor and a living room, is the claim of Commander C. A. Burney, Conservative member for the House of Commons for the Uxbridge Division of Middlesex, England.

The discovery, or rather the invention of a new building material, the result of joint experiments carried on by Commander Burney and an English chemist, has brought about the prospect of cheaper houses from a material which has a cement basis and the tensile strength of steel. Secure in the confidence that this material will prove a success, Commander Burney is making arrangements to secure a factory site and will begin at once the erection of

two experimental houses. The material has taken over a year to evolve, and according to its promoters its chief assets are that it is twice as strong as concrete and half as heavy. Unlike concrete, it is not brittle, is as heat-resisting as will take on any color. Referring to its cost, Commander Burney estimates this as about eight and one-half shillings per cubic foot. The fact that this material, which is barely heavier than wood, has been subjected to all kinds of tests, cracking only after a sustained pressure of 4,700 pounds to the square inch, is also urged as in its favor for use in the construction of houses. Describing the houses, which he calls "parlor houses," whether because in addition to living room each one will include a room to be known apparently as a parlor, is not clear. Commander Burney says that the walls will be hollow with a seven-inch air space. There will be no wood used in these buildings except in the doors. The houses are to be built in sections and some element in the construction of the material evidently demands that they shall be built in pairs, because Commander Burney states that "each pair of houses will have two hundred and forty pieces." Cheaper homes are a demand, and if Commander Burney and his chemist have found a material that has all the qualities its inventors claim for it, and if they can build houses, varied in design, airy and light and warm, containing, as he claims they will, all known labor-saving and hygienic devices, at the cost he claims he can, he will find plenty of householders ready to invest in his enterprise, even if it means occupying two of his twin establishments. The recent revelations of the British Association for the Advancement of Science have shown that anything can be produced, invented, or, like the fairy tales of childhood, wished into existence, therefore there is no difficulty in accepting both the industrial and the economic prospects that are suggested by Commander Burney and his invention. If it should prove a success it will revolutionize the present tendency to live in apartments as the low cost of building will make houses and family life, to which there are indications of a desire to return, a possibility.

MONUMENTS OF INDIANS

Anthropology is a formidable name, but interesting science. Briefly, it may be accepted as meaning the study of man in general. To that study no race has provided a more interesting problem than the North American Indian, whose origin is more or less shrouded in mystery. Consider, for instance, the totem poles of the Indian of British Columbia. What relationship exists between these curious monuments to valiant red men and the gaudy banners of the Chinese, or the crude carved obelisks of the Egyptians? Perhaps none, but it is a fact that these totem poles constitute a distinct type of art which has much symmetry of color and design, though first appearances may appear to be to the contrary.

Totem poles are not the vague creations of idle men. They are carefully thought out and executed records of deeds well done and they provide an open book for those who have the knowledge to read.

Nowhere are finer examples of these totem poles to be found than in some of the Indian Villages on the route of the Canadian National Railway between Jasper and Prince Rupert. At Jasper there is a fine specimen, brought from the Queen Charlotte Islands and erected intact beside the Jasper station. But the greatest collection is located at Kitwanga, on the Skeena River. This is one of the show places of northern British Columbia and trains stop to allow passengers to view the poles and it is safe to say that, next to Niagara Falls, this little village is almost the most photographed spot in Canada.

That in itself tells of the appeal these poles make to the imagination of the tourist. Another proof is the fact that it is almost impossible to get the train out of the village on time, because there are always some passenger who desire to linger with these striking monuments of an ancient race.

Illustrated literature issued by the Canadian National Railway may be had by writing the General Passenger Department at Montreal, N. B.

MADAWASKA PRIEST HAS DIED IN ROME

Grand Falls, May 27.—Rev. Eugene Madawaska, priest of St. Andrew's parish, died in Rome, Italy, after a long illness. He was 80 years of age.

The news of his death was received yesterday in a cablegram which was the first word that had been received concerning Father Madawaska since he sailed from Boston for Rome on April 28. A cable was sent to Rome asking that the body be brought to Canada for burial.

HELPING HANDS

Wife's voice (from up stairs)—"You are back very quickly, dear." Husband (who went out ten minutes previously to try a new motorcycle)—"Er—yes—dear. I got a lift on an ambulance."

BOY SCOUTS HAD PLEASANT OUTING

Twenty Scouts of Local Organization Camped at Tide Head Over Week-End

The local Boy Scouts had their first outing of the season over the week-end. About twenty scouts and cubs of the local organization left on Saturday morning for Tide Head, under the leadership of their Scoutmaster, Harold Sampson. The weather was cold but the enthusiasm of the boys overcame all obstacles. A sheltered and cosy spot was found on Mr. Archibald Alford's farm at the foot of Sugar Hill, which the owner kindly permitted them to occupy. Here their tent was pitched in short order and a beautiful spring of water was located nearby. Saturday was spent in scouting, fishing and games. The principal event was the discovering of the supposed old Indian trail that led over Morriay Rock. Sunday was a quiet day, in the evening the scouts to the number of eighteen, (two being left to guard the camp) paraded to the Presbyterian Church where we were made welcome by the pastor, Rev. Mr. Forbes, the boys greatly enjoyed the service, especially the music of the big bass violin. After the service the troop returned to camp where the tent was all lighted up from electric light taken from the car. Here a sing song was put on much to the delight of all, the instrumental music was furnished with a mouth organ, a number of solos and duets were rendered besides many hymns which were sung heartily by all. At the close of the sing-song a talk was given by the Scoutmaster after which a short prayer was offered in thanks to Him who has given us the big outdoors and all things good. Camp broke Monday, all returning home, tired but happy.

EGG PRESERVATIVES

Cheap eggs in winter—Many families, even of farmers and other poultry keepers, have very few eggs to use from October to February, when the best methods of preserving eggs, for use from them to preserve and store as many as required, if they would but take the trouble to do so.

Experiment at Cap Rouge.—In order to secure information regarding the best methods of preserving eggs, an experiment was started in 1916 at the Cap Rouge Experimental Station. Eight methods were tested: 1, wrapping in paper and leaving undisturbed; 2, wrapping in paper and turning daily; 3, packing in oats; 4, packing in sawdust; 5, Compose Gaulin; 6, Armstrong paste; 7, lime water; 8, waterglass.

Results.—It was soon found that the two best methods, by far, were the lime water and the waterglass. These have been continued to date and very little difference has been found, though different lots of eggs are tested each year by the Dominion Chemist and the Dominion Poultry Husbandman, at Ottawa and by the Superintendent of the Cap Rouge Experimental Station.

Best Method.—Use one pound of good, freshly burnt quicklime to five gallons of water. Slake the lime with a small quantity of water, just enough to cover it, and then stir the milk thus formed into the water. Slake the lime with a small quantity of water, just enough to cover it, and then stir the milk thus formed into the water. Keep well stirred for a few hours, allow to settle and pour the saturated water over the eggs. With waterglass, use about four pounds in ten gallons of water.

General Advice.—All eggs used should be perfectly fresh and, if possible, from flocks having no male birds. The eggs should be completely immersed during the whole period of preservation, and the vessel should be kept covered. The best temperature, though not absolutely necessary, is from 40 to 45 degrees F.

FEAR EXTERMINATION OF SEALS IN PROGRESS

St. John's Nfld., May 18.—An expedition to determine whether extermination of seals is in progress is being urged upon the Government, it was learned to-day, as a result of the partial failure of the seal fishery for several years. The proposed expedition would discover whether the seals are dying out or have merely changed their haunts.

An airplane has been used for this purpose in the last three years, but the results have been unsatisfactory.

"They must be up to the Studebaker standard—"

WITH this injunction, Studebaker engineers set out to design the Studebaker Standard Six and Special Six Coaches several months ago. There could be no compromise in quality. The new Studebaker Coaches had to maintain Studebaker's time-honored reputation for quality. They could be coaches IN NAME ONLY!

The new Standard Six Coach and the Special Six Coach are now on display in our showroom. They are high quality cars in every respect. Only the prices are low. You are invited to come in and see them.

The New Studebaker Standard Six Coach

50 h. p. Standard Six engine, remarkable for its power, flexibility and smoothness

\$2065

Delivered; taxes included

The New Studebaker Special Six Coach

Mounted on the famous 65 h. p. Special Six chassis, famous for its exceptional power and endurance

\$2550

Delivered; taxes included

Genuine balloon tires; lacquer finish; lighting control on steering wheel; new-type emergency brake; 8-day clock and dashboard gasoline gauge, with other instruments, mounted in an oval group under glass. These and many other refinements are standard on the new Studebaker coaches.

FOOD JAG HAS REPLACED WHISKEY

Doctor Says that Heavy Drinkers Consume Too Much Sugar

"Food junkies," who appease their craving for alcohol by eating rich foods containing a great amount of sugar, have replaced the heavy drinkers of pre-Volstead days, and as a result, diabetes is claiming hundreds of new victims, Dr. Richard F. Tomlin, San Francisco, said in an address Friday before the convention of the California State Homeopathic Medical society.

"These people love the flesh pots but try to convince their physicians that they are light eaters," he asserted. "They are just as much drunkards as the man who drinks liquor to excess and the consequences are equally serious. The Volstead law has had the effect of driving the sugar containing products, and diabetes is on the increase."

In an address on plastic surgery, Dr. George Warren Pierce, San Francisco, surgeon declared that science delivered the knockout punch which ended the ring career of Jack Dempsey heavyweight champion, when he underwent an operation for the remodeling of his nose.

"I was fully convinced that Dempsey never would fight again when the news was published that he had undergone an operation for the remodeling of his nose," Dr. Pierce said. "One punch would completely shatter Dempsey's false nose."

Dr. Pierce denounced "beauty specialists" who attempt face lifting and nose remodeling by the injection of paraffin, asserting that "these people constitute one of the worst type of criminals in the country."

SPRING FLOWERS.

(Experimental Farm Note.) Great is the pleasure of the gardener when the first snowdrop appears. This is the first flower in most gardens, and it would be worthy of a place for that reason alone, but its dainty white bells are very appealing and attractive to most people.

Another very early flower is called Bulbocodium vernum and it makes a splash of color immediately after the snow is gone. The flowers are much like crocuses in appearance though botanically they differ. They are light reddish purple in color and remain in bloom for about two weeks.

Scilla sibirica, a small bell shaped blue flower, and alba, which is a creamy white variety, come next and are in bloom with the crocuses. Some of the best of these showy bulbs are Cloth of Gold yellow, the earliest of all. Mont Blanc, white, purpurea grandiflora dark purple, Madame Mina pale lilac with darker stripes.

Of the perennial other than bulbs, one of the earliest to bloom is Arabis alba (Rock Cress) which makes the sheets of white in borders and rock gardens so familiar in Springtime. The single varieties is the earliest, but the double form is a much finer flower and remains longer in bloom.

Another white flower which follows Arabis is Iberis sempervirens (perennial candytuft). This plant is of a shrubby nature and the clusters of flowers stand up above the ground and make handsome clumps. The foliage is dark grey green, very different from the greyish green leaves of Arabis.

Alyssum saxatile, though not quite so hardy as the plants just mentioned is well worth trying. It makes clumps of bright yellow which are very effective in the spring garden.

Aubretia, a dwarf growing plant with flowers of various shades of mauve, needs protection in the Ottawa district.

Myosotis (Forget-me-not), a well known old favorite should be in every garden. Its seeds itself freely, but can be easily destroyed when it encroaches on other plants.

Narcissi are among the most beautiful of spring flowers, and should be mixed in the perennial border in clumps of ten or fifteen of the same variety. The varieties vary in hardiness and the following are among the best: Sir Watkin, Emperor Empress, Mrs. Gray, Seagull, White Lady and Barrii conspicuus.

Tulips. Early flowering varieties can be planted among the Arabis and Forget-me-nots and beautiful effects obtained by careful arrangement of the colours, or they can be put in clumps as suggested for the narcissi. Varieties: Cottage Maid pink and white, Couleur Cardinal deep crimson, Chrysolora yellow, Keizerkroon scarlet and gold, Fred Moore ruddy apricot, Darwin and cottage tulips bloom later and are more satisfactory for the perennial border. There are a large number of varieties and it is difficult to make a selection, but the following are beautiful:

Darwins.
Bartigon, crimson.
Clara Butt, pale pink.
King Harold, deep purple.
Pride of Haarlem, bright red.
Princess Elisabeth, deep pink.
Valentin, bluish violet.
Cottage

Gemeiniana spatulata, bright scarlet.
Inglescombe, pink.
Moonlight, pale yellow.
Mrs. Moon, deeper yellow.
Floote, white edged crimson.

Protection Sans Obstruction.
An old New York farmer attended to the protection of his property and was over to watch the dancing at night says "Tulips are Tops." He hadn't been out in the world much, and so was much impressed with the girls' clothes at the dance.

"Some of the ladies' clothes I see here," he said puts me in mind of a barbed wire fence.
"Well," said he, "it's this way, they appear to protect the property without obstructing the view."

SEND PICTURES OF ALL KINDS BY WIRE

Most Delicate Detail Now Transmitted by Wire to District Points

Anything that can be photographed from fingerprints of criminals to elaborate interior decoration is now being accepted as a "message" by the American Telephone & Telegraph Company. The most delicate detail, according to the company officials, has been transmitted as distinctly as words.

One commercial use made of the new process was the sending of an advertisement layout, photographed from a plate of type from a New York firm to a Chicago newspaper, in which it appeared the same day.

An X-Ray picture of a human hand was another message sent yesterday demonstrating possibilities for medical purposes.

News pictures were among the first sent over the wires. President and Mrs. Coolidge leaving the capital in Washington after the inauguration ceremony, were seen the same day in Chicago. Photographs of the effects of the recent tornado in Southern Illinois also were transmitted.

Company officials declared that photostatic copies of signed wills, checks and the like, acceptable as evidence, would be a valuable part of the new business.

HAVE DOGS A SIXTH SENSE?
A friend of mine who lives in a house on the outskirts of London has a terrier whose conduct tends to the belief that dogs possess some sixth sense of which we know nothing.

The windows of his flat are much too high above the floor for any dog to be able to see out of them. All day long a stream of motor and horse-drawn traffic passes along the road below the windows, and the dog pays not the slightest attention. But now and again a horse and cart goes by which, though apparently he can only hear it, start him into a paroxysm of fury which lasts until the cart is once more out of hearing.

There may be some reason for his fury which we know nothing about but how does the dog know, even when the windows are shut, that that particular cart is passing? For invariably it is the same horse and cart which has this effect upon him.

The same problem arises in the case of a dog of my own which lives in the front rooms of my house. At the back there is a garden which cannot be seen from the front yet the moment a cat or dog comes into the garden my dog, in the front rooms knows that the strange cat or dog is there, for he sets up a loud, angry barking which continues until he is let out, when he rushes into the garden to drive away the intruder.

How did he know?
Another friend of mine owns a bull dog. If anybody who he does not know makes a lurch into the lock of the front door at any time of the day or night he does back instantly bristles and he prepares for attack with threatening growls. But if his master or anybody whom the dog does know pushes in the latch-key the animals attitude is entirely different. Yet obviously the dog cannot tell by the sound of the key being pushed into the lock whether the person outside is a stranger or a friend.

It would be interesting if somebody could throw light on the mystery of advance some plausible theory to account for the singular power which dogs alone seem to possess of becoming aware of what is happening out of their sight.

Some People Have Funny Ideas

What do you think Carnation Milk is like? Do you think it is "thick as molasses in January"? It isn't. Do you think it is "syrupy sweet"? It isn't. Do you think it has a funny taste? It hasn't. Do you think something is "put in" to make it keep? There isn't. Do you think some of the food value is taken out? It isn't.

Pure Milk in a modern package—that's all Carnation Milk is just pure milk with part of the natural water content taken out by evaporation. All the food value of full-cream milk is left in. No artificial sweetening or other preservative is added. Each can is hermetically sealed and sterilized to keep its contents pure, sweet, and utterly safe.

Carnation Milk is a great aid to better baking because of its convenience, safety and richness. Always ready for use on your pantry shelf—none is wasted because it keeps sweet for several days when opened. Sold by grocers everywhere—order several tall (16 oz.) cans or by the case of 48 cans. Send for copy of Mary Blake's Cook Book—address: Carnation Milk Products Company, Limited, Aylmer, Ontario.

METHODS OF APPLYING FERTILIZER FOR THE POTATOE CROP

Commercial fertilizers are largely used by potato growers in New Brunswick. Their use constitutes a heavy charge against this crop and consequently they should be used in such a manner that the greatest return will be obtained.

Frequent complaints have been heard from the potato growers during the past five years about fertilizer injury. In order to obtain information on this problem, experiments were begun at this Station in 1923 to determine the best method of applying fertilizer for this crop. A 45-5-5 fertilizer was applied at the rate of 2000 pounds per acre to plots (1) broadcast, (2) in the row in direct contact with the seed and (3) in the row mixed with earth. These experiments have now been carried on two years with the following results:

Method of Applying Fertilizer	1923 Per centage Stand	Yield per Acre Potatoes
(1) Broadcast	81.4	171.2 cwt.
(2) In row in direct contact with seed	57.6	184.9 cwt.
(3) In row mixed with earth	71.9	178.9 cwt.

Experiments were carried on during the past season using one-quarter and one-half the above amount of fertilizer. Space does not permit printing of the details here. The results showed that where smaller quantities were used, very little if any injury resulted.

The 1924 results do not show as great a difference in the percentage stand or yield as the 1923 results but it has been generally noted that fertilizer injury is apparently worse some years than others. It is generally considered that the amount of injury will be affected by weather condition. As there is no way of forecasting seasonal conditions, the results would indicate the advisability, when applying large quantities of fertilizer in the row, of having the potato planter adjusted to keep the sets away from direct contact with the fertilizer.

Prepared, Emergency Dishes From Your Pantry Shelf.

Housewives are frequently called upon to get up emergency lunchedishes for unexpected guests. A well equipped emergency chest often solves the difficulty, offering canned and bottled dainties that are the "makings" of many a good dish. See to it that the shelf is well stocked at all times and the list at hand, then you will be equal to the emergency that may arise.

Savory Cheese Toast

Open and drain carefully a small can of tomatoes. Add to them a grated onion, a minced pepper and a teaspoonful of minced celery leaves, or a little celery salt. Add pepper, salt, a little sugar, a tablespoonful of soft butter, a teaspoonful of mixed mustard, a cupful of Worcestershire sauce, and two tablespoonfuls of rich cream. Stir the mixture over hot water until all is blended, then pour upon slices of toast, arranged on a hot dish. Garnish with parsley.

English Cheese Fondue

Heat a quarter pint of milk, then add to it an ounce of butter. When melted together pour over a half cupful of crumbs and let stand ten minutes. Next add the beaten yolks of three eggs, a teaspoonful of cheese, pepper, salt and then fold in the stiffly beaten whites of the eggs. Pour into a well buttered baking dish and bake in a medium oven until set like a custard. Serve at once.

Frizzled Ham and Poached Eggs

Cut as many slices of cold boiled ham as are needed. Put a small piece of butter in a steel frying pan and when hot put in the ham, turn it lightly as it crisps in the butter.

Have ready a hot dish on which slices of toast have been placed. Poach an egg for each slice, dust with paprika, place the hot ham around the edge and serve.

Curried Ham Omelette

Beat the yolks of six eggs well, then add two tablespoonfuls of cream, pepper and a tiny bit of salt. Beat the whites of the eggs stiff, and then beat through them a half cupful of very finely minced cold ham a half teaspoonful of curry powder and a saltspoonful of sugar. Fold the whites into the yolks, then turn all into a hot buttered omelette pan. Cook in the usual way and when turned set into a hot oven a few seconds to brown, then serve.

Hot Slaw

The slaw may be made to serve with cold sliced meats. Remove the outer leaves and cut out the heart of a small firm cabbage, then slice it thin on the cutter. Put into a saucepan a heaping tablespoonful of butter, a half cupful of sugar, a half teaspoonful of a saltspoonful of red pepper, a tablespoonful of dry mustard, a beaten egg and a half cupful of vinegar. Heat slowly, stirring well until all is blended and thickened. Add the cabbage in little by little, until all is blended and melted into the sauce, then it is ready to serve.

Vermicelli Eggs

Boil eight eggs hard, slice, halve and remove the yolks. Make a rich cream sauce and color it with a little bit of saffron and put in the egg whites. Pour over slices of toast arranged on a hot dish and put the yolks through a ricer all over the top. Garnish with little slices of broiled bacon.

Fruit Salad

Peel and dice four red apples, dropping the cubes into a little cold water, in which the juice of a lemon has been squeezed. Remove the skins

EXPERIMENTS ON BURNED LAND IN N. B.

Re-seeding Work is Being Continued This Year in New Brunswick.

Burned Land caused by forest fires in the past must not remain idle if cheap methods of re-seeding can be formulated, and forest fires must be kept out of our forests if we are to eliminate a repetition of previous losses.

The results of re-seeding experiments carried on by the Dominion Forestry Branch in New Brunswick for the purpose of learning the degree of success which might attend efforts to re-seed areas on which the forest growth has been destroyed by fire, indicate that re-seeding by this artificial means is feasible. The experiments have not been carried on long enough to furnish detailed data as a considerable period of years must elapse before results approaching final can be observed. So far, however, it has been decided that the method is cheaper than the planting of young trees reared in nurseries.

This work was first undertaken in 1923 when the Honorary Advisory Council of Scientific and Industrial Research granted \$5,000 for the purpose. The grant was made to a committee of Federal and Provincial officials to make re-seeding experiments in New Brunswick on burned land, on which severe fires or repeated fires had prevented natural new growth. It was realized that in such cases planting of young trees on a large scale would be too costly an undertaking to be practical and it was decided to experiment with seeds of native species of pine and spruce, using various methods of sowing the seed into the soil in spring and autumn.

Observations in the present year indicate that seed sown in 1923, grew well in 1924. The experimental work will be continued. J. C. Veness of the Dominion Forestry Branch is now experimenting in spring seeding with a party near McGee's Sliding in Sunbury County on the Fredericton and Grand Lake Railway and later will conduct similar experiments in Northumberland County.

In spite of this degree of success the fact remains that in this country no means of reproduction on a large scale by re-seeding or re-planting can approach the methods of Nature in cost. New Brunswick has natural forests which if given anything near a fair chance will reproduce themselves. But Nature receives tremendous setbacks for the scars of the greatest fires are removed in time, but setbacks which require years to overcome. During these years forest land which might be producing big revenues is valueless except for its future. Often a further setback from fire occurs when the young growth which covers the old burn is itself destroyed by fire.

The efforts directed toward artificial reproduction of forest growth in themselves are warnings against forest fires and the way to make them unnecessary is to keep fire out of the woods altogether. Mature trees, second growth, young growth, seedlings, all should be protected against fire which is the greatest enemy of the forest wealth of the Province of New Brunswick.

Forest Service, Fredericton, N. B., May 15, 1925.

DA RELIEVES RHEUMATISM

NO CATHETER FOR ALARM
Uncle Henry Brathwaite the veteran guide and woodsman does not anticipate that strange old remedy because of the long spring. He says that nature usually provides for the safeguarding of the young of the partridge. As a rule they do not begin hatching until after June 1st, so that the fully developed young of a month will really make little difference with them.

Keep the cookie box full

Children, you, everybody likes cookies. They're lightest and most delicious when made with Quaker Flour. Keep the cookie box full and let all the family enjoy them.

Quaker Flour makes all baking easy. It is good for bread as well as for cakes and pastry.

Inserted by Mother, sister and brothers.

HOME NURSING CLASS
The last Home Nursing Class of the season will be held in the clinic, Monday evening, June 1st. A full attendance is requested.

RAIN BENEFICIAL
The heavy rain of Monday night and Tuesday was very beneficial to the country. The danger of forest fire has been eliminated, and crop conditions improved.

TRADE WITH GERMANY

It is said that Germany is now the third best customer of Canada. This is a development which was not expected in war time or immediately thereafter, but it shows how trade channels defy many obstructions and obstacles. In the last fiscal year Canadian exports to Germany were \$20,000,000 an increase of \$10,000,000 over those of the previous year.

JUNE ROD AND GUN
The June issue of Rod and Gun is Canada's best form of a special Ontario Tourist number including the attractive features of a personal message to tourists from the Hon. G. Howard Ferguson, Premier of Ontario, and a special section setting forth the attractions of Ontario to the tourist.

The month's articles are specially selected to be appropriate to the number and provide a wealth of interesting and seasonable reading for all right sportsmen. Look the Bummer is a story of canoe travel in Northern Ontario; Dependable Penage of small mouth bass. The regular feature stories of their usual high quality include Canoeing, Photography and Trout fishing on Nova Scotia's Braving Rivers by Bonnydale Dale, The Young Mail Carriers by Martin Hunter.

Rod and Gun in Canada is printed monthly by W. J. Taylor, Ltd., at Woodstock, Ont.

WEDDINGS

MURCHIE-MILLER
A quiet but very pretty wedding took place on Wednesday afternoon, May 20th, at 4 o'clock at the home of Mr. and Mrs. Robert J. Miller when their second daughter, Eva Margaret, became the bride of Mr. Hugh Murchie of Black Lands, N. B.

The ceremony was performed by the Rev. W. W. McNeill, in the presence of relatives and immediate friends. The bride, looking winsome in a gown of white duchess satin and silver trimming, with bridal veil and orange blossoms and carrying a shower bouquet of white and pink carnations entered the drawing room on the arm of her father. To Lohengrin's wedding march.

The house was tastefully decorated for the occasion. After a dainty luncheon Mr. and Mrs. Murchie motored to their home in Black Lands. The bride's going away costume was a suit of navy pique with hat to match.

The bride and groom were the recipients of many beautiful and useful gifts including several generous sums of money. The groom's gift to the bride was a lovely string of pearls. Their many friends wish them a long and happy journey through life.

NOTICE RE DOG TAXES

CUT IN PRICES FOR WEEK-END

Splendid Program at Opera House, Mystery and Tom Mix, Priced Within Reach of All.

The Opera House management are pleased to announce a special week-end admission fee for this Friday and Saturday, when the evening prices will be 25 and 50 cents as they have been all week.

This announcement should certainly find favor with theatre patrons, especially in view of the fact that the program is, if anything, better than those which have preceded it.

The Friday and Saturday bill will open with a two real Mermaid Comedy—and a very funny one it is—followed by De La Ferre, Magician and Illusionist, presenting an entire change of magic, sleight-of-hand tricks etc.

By special request he will also repeat his "Maid of India" Sword Cabinet.

Test which was so acceptably received on Monday and Tuesday last.

Little Miss Cecelia ("Bobbie") De La Ferre will also appear in a new dance number.

Next on the program will be the Tom Mix feature "The Last of the Duanees" from the celebrated novel by Zane Grey.

Following the feature M. De La Ferre in his character of Mystery, Oriental Mind Reader will answer the many questions submitted by the audience.

This act alone is a unique feature and patrons have been amazed at the correctness of his answers and the rapidity with which he handles the questions.

The various acts are ably staged, beautifully dressed and well presented. Certainly here is a program which is worth fifty cents of anybody's money and in view of the decrease in prices aforementioned it is probable that the Opera House will be well filled on Friday and Saturday.

A special Children's Matinee is scheduled for 2:30 p.m., Saturday. Matinee prices are 15 and 25 cents.

Movie Star falls for Blue Eyes! Harold Lloyd is in Hot Water. At the Opera House Monday and Tuesday.
