HALF the joy in living is in pleasant and harmonious surroundings in the home, and not the least of the elements that contribute to this harmony is tastefully decorated walls. Time was when harmony and decorative possibilities counted for little so long as the walls were covered and made clean—it is not so to-day—and while people may still study economy in the doing of it, the manufacturers of wall papers have encouraged good taste and artistic effects to such an extent that from the highest to the lowest grades of goods, harmony of color and design have received the greatest of attention, and for the very reason that our customers will not be satisfied with anything short of the most artistic, no matter what the price be they want to pay, we have selected very largely for the present season's Wall Paper trade from the "Staunton" line, from which we obtain the widest possible variety of pleasing designs and color effects.

This folder shows a few very artistic treatments, only intended

No. 1638

as a hint of what you may see when you visit our store.

For the kitchen we show a nice selection of granites in natural colorings and also tile patterns. For the bedroom there is almost no limit to pretty decorative designs in florals and stripes. For the hall we are showing many special designs and colorings which permit of very rich and effected treatments, we mention specially the tapestry and textile designs. For the dining room, the sitting room, the den and the parlor, there is almost no limit to the decorative possibilities from our collection of new and appropriate papers.

We are setting our nets for the largest Wall Paper trade we have ever done, and if superiority of stocks will bring it to us we shall have it. May we have the pleasure of a call from you to look through our Wall Paper lines? You will be welcomed.
