Irish Volunteer Bill Rejected in the Lords.

The Irish University Bill Passed—Proposed Canadian Loan—The Bank Bill.

London, Aug. 7.—The House of Lords took up the second reading of the Irish Volunteer bill to-night, and rejected the measure.

London, Aug. 8.—It is supposed that the Irish volunteer bill, which failed in the House of Lords last night, was introduced by the action of the peers, who are great landed proprietors in Ireland. In an important speech in the House of Commons, the speaker of the House declared that he thought it impolitic to sign a stigma of disloyalty on the Irish people.

The Irish University bill was read a third time without a division. The result was loudly cheered.

London, Aug. 12.—In the Commons to-night the Colonial Secretary stated he intended to apply to the Home Government for a guarantee of a loan for the construction of the Canada Pacific railway. No such application had been made.

In the House of Commons the bill enabling unlimited liability banks to be formed, and allowing banks to increase their nominal capital by increasing the nominal value of their shares, passed through Committee.

Mr. Chas. S. Parnell, member of the Commons for Meath, left London yesterday for London, where he is to attend the organization of Irish constituencies for the forthcoming general election.

NEWMAN HALL DIVORCE SUIT.

The Rev. Doctor Gains the Day—Addresses Thrown Out.

The opening of this celebrated case, which was received by mail, is given on our sixth page. The following conclusion, with the result, was received by cable—

London, Aug. 8.—The evidence in the Newman Hall divorce suit was concluded last night, and this morning arguments in the case began. Mr. Willis, barrister, who has conducted the case on behalf of Mr. Newman Hall, addressed the jury in his interest, and made a powerful and somewhat impetuous speech. So great is the interest excited by the case that the court room, before the commencement of the proceedings, was densely thronged, and the officers had some difficulty in preserving order. Mr. Willis began his address by severally denouncing the conduct of the plaintiff in this case, Rev. Dr. Newman Hall. He said he had for years pursued his wife with a malignity and persistency which would be disgraceful to the lowest ruffian of the London slums. How much more so it is to one who wore the garb of a Christian minister and who professed to be governed in his conduct by the principles of Christian morality and religion! This man, continued Mr. Willis, was determined to rid himself of the woman to whom he had sworn life-long fidelity, and finding that his former accusations against her had failed, he had recourse to the methods of impugning her virtue and of building up evidence upon which he could claim a release from the obligations toward her which he had entered. For the accomplishment of his nefarious and diabolical purpose, he had contrived to thrust his wife into places where she would be assailed by temptation. He had procured for her the services of a woman who had visited her, and he had conspired with her to seduce her from the paths of virtue. It was almost incredible, but the evidence of the Rev. Dr. Newman Hall proved that he had done this. He had placed himself in a position to seduce the wife of his professed and dutiful friend, and he had done so. He had placed himself in a position to seduce the wife of his professed and dutiful friend, and he had done so. He had placed himself in a position to seduce the wife of his professed and dutiful friend, and he had done so.

Some sensation was caused in the House of Commons two weeks ago by the discovery of a conspiracy to seduce the wife of the Rev. Dr. Newman Hall. A special committee of the House was appointed to inquire into the matter, and the Rev. Dr. Newman Hall was summoned to appear before them. He refused to do so, and the committee reported that they had found evidence to the effect that the Rev. Dr. Newman Hall had conspired to seduce the wife of his professed and dutiful friend, and he had done so.

Mr. Gladstone appears to have regained some of his former vigor. He is reported to have been out for a walk in the Haymarket, and to have been seen by several of his friends. He is reported to be in good health, and to be able to attend to his duties.

London, Aug. 7.—The Home Rule League held a meeting at the Crystal Palace on Saturday night. The meeting was very large, and the speaker, Mr. Charles Stansfeld, made a powerful and somewhat impetuous speech. He declared that he thought it impolitic to sign a stigma of disloyalty on the Irish people.

London, Aug. 9.—The Dublin Freeman's Home Rule League held a meeting at the Crystal Palace on Saturday night. The meeting was very large, and the speaker, Mr. Charles Stansfeld, made a powerful and somewhat impetuous speech. He declared that he thought it impolitic to sign a stigma of disloyalty on the Irish people.

London, Aug. 11.—An unusual demonstration of the strength, earnestness and unanimity of the Home Rule party in London was given at a great meeting held at the Crystal Palace on Saturday night. The meeting was very large, and the speaker, Mr. Charles Stansfeld, made a powerful and somewhat impetuous speech. He declared that he thought it impolitic to sign a stigma of disloyalty on the Irish people.

London, Aug. 12.—The Home Rule League held a meeting at the Crystal Palace on Saturday night. The meeting was very large, and the speaker, Mr. Charles Stansfeld, made a powerful and somewhat impetuous speech. He declared that he thought it impolitic to sign a stigma of disloyalty on the Irish people.

London, Aug. 13.—The Home Rule League held a meeting at the Crystal Palace on Saturday night. The meeting was very large, and the speaker, Mr. Charles Stansfeld, made a powerful and somewhat impetuous speech. He declared that he thought it impolitic to sign a stigma of disloyalty on the Irish people.

London, Aug. 14.—The Home Rule League held a meeting at the Crystal Palace on Saturday night. The meeting was very large, and the speaker, Mr. Charles Stansfeld, made a powerful and somewhat impetuous speech. He declared that he thought it impolitic to sign a stigma of disloyalty on the Irish people.

London, Aug. 15.—The Home Rule League held a meeting at the Crystal Palace on Saturday night. The meeting was very large, and the speaker, Mr. Charles Stansfeld, made a powerful and somewhat impetuous speech. He declared that he thought it impolitic to sign a stigma of disloyalty on the Irish people.

London, Aug. 16.—The Home Rule League held a meeting at the Crystal Palace on Saturday night. The meeting was very large, and the speaker, Mr. Charles Stansfeld, made a powerful and somewhat impetuous speech. He declared that he thought it impolitic to sign a stigma of disloyalty on the Irish people.

London, Aug. 17.—The Home Rule League held a meeting at the Crystal Palace on Saturday night. The meeting was very large, and the speaker, Mr. Charles Stansfeld, made a powerful and somewhat impetuous speech. He declared that he thought it impolitic to sign a stigma of disloyalty on the Irish people.

London, Aug. 18.—The Home Rule League held a meeting at the Crystal Palace on Saturday night. The meeting was very large, and the speaker, Mr. Charles Stansfeld, made a powerful and somewhat impetuous speech. He declared that he thought it impolitic to sign a stigma of disloyalty on the Irish people.

London, Aug. 19.—The Home Rule League held a meeting at the Crystal Palace on Saturday night. The meeting was very large, and the speaker, Mr. Charles Stansfeld, made a powerful and somewhat impetuous speech. He declared that he thought it impolitic to sign a stigma of disloyalty on the Irish people.

NEWS FROM ABROAD.

Reports from all portions of Northern New Jersey indicate a most pronounced revival in the iron trade.

The veterans of 1812 have been ejected from their headquarters in New York City by the action of the city authorities.

A Chicago despatch says Father Vandermorel, a Jesuit orator of note, has joined the Episcopal Church, and is now with the Rev. Canon Knowlton.

The collector of Customs at Niagara Falls reports the seizure of a number of boxes of opium, valued at \$10,000, by the action of the customs officers.

Prof. Archibald Geikie, of Edinburgh, one of the most distinguished of living geologists, arrived at New York on Monday.

Working in a baker shop with the thermometer at 120°, and then sitting in a refrigerator and drinking ice water, killed George B. Stetson, a well-known actor, in ten minutes.

Wm. H. Vanderbilt has just given \$100,000 for a new building for the Civil Engineering and Scientific Hall on the grounds of the Vanderbilt University.

The Executive Committee of the New York State Freshmen's Association have invited the Freshmen of the United States to meet in a general convention at Chautauque Lake, on Sept. 17th, 18th, 19th, 20th, and 21st.

There has been a decrease in the tobacco crop in North Carolina. The reports indicate that the yield will be within 20 per cent of that of the year 1877.

There arrived at New York during July 12,710 emigrants, ending July 31, 1878, was 103,245, against 74,130 during the previous fiscal year.

There has been a decrease in the number of cattle in New Jersey. There are now 706 cattle in quarantine. The disease has been ascertained to be malignant.

Super-heated starch exploded in the drying room of the candy factory of Bataafs & Co., New York, on Friday last. The explosion was very severe, and many persons were injured.

London, Aug. 6.—The evidence in the Newman Hall divorce suit was concluded last night, and this morning arguments in the case began. Mr. Willis, barrister, who has conducted the case on behalf of Mr. Newman Hall, addressed the jury in his interest, and made a powerful and somewhat impetuous speech.

Some sensation was caused in the House of Commons two weeks ago by the discovery of a conspiracy to seduce the wife of the Rev. Dr. Newman Hall. A special committee of the House was appointed to inquire into the matter, and the Rev. Dr. Newman Hall was summoned to appear before them.

and are excellent cooked in any way with this slice of bacon. Venison, as in the days of good old Isaac, is still justly considered a savory dish. The ham, neck, shoulder, and saddle should be roasted; roasts or broil the breast, and fry or broil the steaks. Venison requires more time for cooking than beefsteak. The ham are excellent pickled, smoked, and they are not so long as other smoked meats.

The garnishes for game are fresh or frozen berries, currant jelly, sliced oranges, and apple sauce.

AGRICULTURAL.

TREASURY CREAMERY.

WE COPY the following article from the Treasury Creamery, which was also in the paper for the use of the accompany engraving.

This is the first establishment of this kind in Ontario. Messrs. Hestie & Inglis, two enterprising store-keepers, had read about factory creameries, and hired a man who had worked in a factory; they then erected the first creamery in Ontario. The first year, 1874, they obtained the milk from 180 cows. They realized such good prices for their butter and cream that they have increased the number of cows to 300 to 400. In 1878 they had 4,000 cows, and this year they expect the milk of 1,000 cows. The reputation and price of this butter have been continually on the rise since the first establishment of the creamery. They ship the butter to a firm in Glasgow, Scotland; for their last shipment they received 120s. per 112 lbs. Customers that have once used this butter they require it again; and the merchants that purchased it were eagerly waiting its arrival, and it was at once taken from the docks by ready purchasers, and at this year the highest price paid for any of 1878 was 12s. 6d. per cwt., the realising 20s. per 112 lbs. more than United States butter.

The whole of the butter made is shipped except that required for one house in Toronto. The farmers received 7s. per gallon for their milk. This is much more than was realized by cheese-makers last season. This creamery also enabled the farmers in this locality to realize over \$5,000 more than they would have done in the ordinary way. Only one-quarter of the farmers in this locality have been able to avail themselves of the benefits of this creamery. It is estimated that \$15,000 more might have been made in this township alone had all the butter been made on the factory system. The average price realized by farmers for home-made butter was 10s.; the factory butter brought 22s. per cwt.

India as a Wheat-Growing Country. A report of the English Government on a collection of upwards of one thousand samples of wheat received from a great variety of districts in India, gives an extremely favourable account of the possibilities of a large Indian export trade in this article. The report has been prepared by Dr. Forbes Watson, who observes that the subject has special importance at the present time, on the depreciation of silver and its effects upon the finances of India can be best contracted by a development of Indian exports in the Dominion. The five superior classes, against 268 samples, valued at £27,000,000, and 101 samples of exceptionally pure wheat, which only 114 are decidedly up to standard, and the remainder are of inferior quality, and the circumstances under which they were planted and cared for. Last year there were 281 acres under wheat, and 322 under peas, 74; roots, 42; green fodder, 29; and cultivated 146. The following summaries of experiments will, no doubt, be interesting to those who are engaged in agriculture, and compared with their own experiments may be of value.

LAST YEAR nine acres of fall wheat were

grown on the same soil as last year, and the results were as follows:—Black Tartarian (from Scotland), 56 bushels per acre; New Zealand, 51; Hopewell, 48; Empress, 40. Tartarian straw was strong and on its feet when all others were badly lodged. In the experimental plot this year a great many varieties are being tested. Many of the varieties are already cut, while others are yet quite green. Norway white, well, but it is only now turning white. Colorado, White Blade, Hopewell, and Tartarian are cut and shocked. The White Blade is very like the old Potato oats. The Short has poor straw, but will yield fairly. Bulmer's Chariot is very early, but it is not so much as the Potato oats. The Short has poor straw, but will yield fairly. Bulmer's Chariot is very early, but it is not so much as the Potato oats. The Short has poor straw, but will yield fairly. Bulmer's Chariot is very early, but it is not so much as the Potato oats.

THE FARM MANAGER reports great advantages from horse-hoeing spring and fall wheat, the wheat to be sown in drills a sufficient distance apart to admit of working the horse-hoe. The cheese factory is now completed, but will not be put in operation till the end of the year. The posts are eight feet high, and the fence four and a half feet high. The cattle are in fair breeding condition. The pigs do not now show to advantage, account of lack of straw for bedding. The farm generally is becoming fairer, and it is expected that the season will be a successful one. The following summaries of experiments will, no doubt, be interesting to those who are engaged in agriculture, and compared with their own experiments may be of value.

The Short has poor straw, but will yield fairly. Bulmer's Chariot is very early, but it is not so much as the Potato oats.

THE FARM MANAGER reports great advantages from horse-hoeing spring and fall wheat, the wheat to be sown in drills a sufficient distance apart to admit of working the horse-hoe. The cheese factory is now completed, but will not be put in operation till the end of the year. The posts are eight feet high, and the fence four and a half feet high. The cattle are in fair breeding condition. The pigs do not now show to advantage, account of lack of straw for bedding. The farm generally is becoming fairer, and it is expected that the season will be a successful one. The following summaries of experiments will, no doubt, be interesting to those who are engaged in agriculture, and compared with their own experiments may be of value.

LAST YEAR nine acres of fall wheat were

grown on the same soil as last year, and the results were as follows:—Black Tartarian (from Scotland), 56 bushels per acre; New Zealand, 51; Hopewell, 48; Empress, 40. Tartarian straw was strong and on its feet when all others were badly lodged. In the experimental plot this year a great many varieties are being tested. Many of the varieties are already cut, while others are yet quite green. Norway white, well, but it is only now turning white. Colorado, White Blade, Hopewell, and Tartarian are cut and shocked. The White Blade is very like the old Potato oats. The Short has poor straw, but will yield fairly. Bulmer's Chariot is very early, but it is not so much as the Potato oats. The Short has poor straw, but will yield fairly. Bulmer's Chariot is very early, but it is not so much as the Potato oats.

THE MODEL FARM.

Series of Experiments on Fall and Spring Wheat.

This farm, which is situated in the Township of Guelph and within about a mile of the city of Guelph, lies at an elevation of about 900 feet above the level of the sea. It was originally variegated, but is now a fine soil, and is well adapted for the raising of crops. The soil is very rich, and the average of ordinary Canadian farms, and was probably, when purchased, about the value of the farm property, the place is assuming a very much improved aspect, and the present managers are doing all that they can to make it suitable for the purpose for which it was intended. There are objections, however, to the location, which are not overcome, one of which is the great height above the lake, rendering the ripening of late fruits and vegetables almost impossible and making the experiments unprofitable, and in a measure unadvisable for all the rest of Ontario.

The results so far, though not in themselves of value to compare with the experiments that might have been done if the farm had been properly located in the position and on a soil which would have compared with the average Canadian farm, would have been of some value to the Canadian farmer. The farm consists of 250 acres, the greater part of which is now under cultivation. The buildings consist of residences, college buildings, stables, barns, carpenter shops, cheese factory and greenhouses. There are also a number of professors and foremen of departments, a man, engineer and joiner, with salaries amounting between \$500 and \$1,000 per annum, exclusive of servants, &c. The number of students has increased from 12 to 140.

The farm is divided into 21 fields, varying in size from 11 to 30 acres, and of each field a second crop is raised. The quality and quantity of crops raised upon it, and the circumstances under which they were planted and cared for. Last year there were 281 acres under wheat, and 322 under peas, 74; roots, 42; green fodder, 29; and cultivated 146.

The following summaries of experiments will, no doubt, be interesting to those who are engaged in agriculture, and compared with their own experiments may be of value.

LAST YEAR nine acres of fall wheat were

grown on the same soil as last year, and the results were as follows:—Black Tartarian (from Scotland), 56 bushels per acre; New Zealand, 51; Hopewell, 48; Empress, 40.
