### Montreal Stock Market.

**PRICES STEADY—ABRUPT ADVANCES AND RECESSIONS INCONSISTENT WITH HIGH RATES ON THE ONE HAND AND PROSPERITY ON THE OTHER — TRANSVAAL STILL UNSETTLED.**

Montreal, Oct. 10.  
The persistency of stock prices at figures which are neither the very best nor the very worst of the year, but are a very good average figure, is the compound result of high rates and prosperity. The cost of carrying stock so long as stringent money prevails is effectually preventing any large advance, and on the other hand prosperity everywhere hinders all declines from becoming excessive. This speculative outlook does not reach out very far, but as far as it goes, which is a three or four point fluctuation for a week or two, it affords guidance for speculative action. For the next few weeks perhaps stocks should be bought when they are weak and sold when they are strong, the high and low during these weeks differing only by 3 or 4 points.

Such of the securities on the local Exchange as are immediately connected with outside markets were lower a little because these are lower, but their declines have been very immaterial. Montreal Cotton advancing to 146, scored a higher mark than that of the previous sale, but Dominion Cotton following the general market sold at 99 and thus fell off one full point. On lowered selling at London as cabled, there was a decline fractionally in the selling of C.P.R. here. The 91½ and 92 prices being about the equivalent of London quotation. Halifax Railway sold down 3 points to 102, rather on the absence of demand than excess of supply and the bid 100 along with the demand 102 showed trading in this stock to be languid. Toronto Railway, Twin City, Montreal Gas, Bank of Commerce, and Molson's Bank sold at prices of the previous day. Bank of Montreal sold up to 260, a five point advance on previous transaction. Republic at 119 sell off 1½ points, but Payne rose 1 point higher up to 120, while the ever vigorous Electric pushed ahead 1 point in both old and new stock, the old selling 165 and the new at 164.

The general success attending all business pursuits forbids any fear that prices will fall more than 3 or 4 points beneath today's ones, and high rates for money makes it very unlikely that advances will reach more than 3 points above today's prices at least in the mean time. The advisable course, therefore, is to buy on declines as they occur and to sell on advance, both of which are bound to happen as the many and opposite market influences operate.

**MONTREAL MINING EXCHANGE.**

**TRADING STILL CONTINUES DULL — GOLD PRODUCTION HELPS TO MAKE MONEY DEAR.**

Montreal, Oct. 10.

There was absolutely no life on 'Change this forenoon. Selling orders were more than useless, as buying orders were absent.

Montreal Gold Fields to the amount of 1000 shares sold at 13 $\frac{1}{2}$ , and a small block of Montreal-London changed hands at 51. There was also a sale of Monte Christo at 5 for a good round block of 5000 shares, otherwise the market was lifeless.

In connection with the production of gold the following is a curious state of inconsistency. The popular idea is that increased production of gold means cheaper money, while in fact, it means quite the opposite. Largely increased production of gold is due to the opening of mines where gold can be mined at a profit. Thus gold, the basis of international currency, falls in cost of production, i.e., falls in value, which means that prices of commodities expressed in gold tend to rise. Therefore there are many people anxious to borrow money with which to carry commodities, and thus profit by the rise. Hence when gold is rising in value, that is, is not being produced freely, money tends to be constantly cheap, while when gold is falling, that is, is being produced such as in the present day, in large quantities, money tends to be dear. We do not, of course, think that this factor of the cost of production of gold is the only factor in determining the value of money, but it is one of the many factors, and a real one.

There is good news to hand to the shareholders of the Canadian Gold Fields Syndicate in the shape of another rich strike on the Lake Shore Mine, the new discovery is doubly encouraging in that it proves that the ore body widens as it deepens. That the ore body widens as it deepens. There has always been plenty of ore in the upper workings, but it was scarcely credited that such a large chute lay so close to the surface. There are at present 61 men working on the property. The first shipments of ore under the new management will leave Moyie this week.

**MORNING SALES.**

# NEW YORK EXCHANGE.

ON LIQUIDATION OF 10,000 SHARES L. N. RUNS LOWER TO-DAY — BUYING OF SO PAC. GOOD AFTER IT HAD BEEN SOLD DOWN. — GOVERNMENT ACTION WILL RELEASE \$30,000,000.

New York, Oct. 10.

The London markets continue steady. Prices for Americans practically unchanged, but the tendency is said to be upwards. Discount rates are the same as on yesterday.

There is a rumor that the British agent at Pretoria has been notified that the British troops must be withdrawn from the frontier inside 48 hours. Of course such a demand would be met with refusal which would no doubt be followed by an outbreak of hostilities.

Financial writers in morning papers call attention to the strength of the Steel stocks and predict that before the end of the year dividends will be declared on American Steel com., and steel wire. It is said that both of these companies are earning large dividends on common.

On the whole yesterday's market showed a good deal of liquidation. It opened strong and during the balance of the day had a dropping tendency, although in no case was the loss severe.

During the last half hour there were very heavy transactions in leather com., and there is a rumor in the Street that the preferred stockholders have formed a pool for the acquisition and for the control of common, so as to insure the acceptance of the plan by the common stockholders.

Atchison preferred was sold on stories of crop damage, which, however, are laughed at by people who know anything about crops.

There was a good deal of disappointment owing to the failure of the money market to show any tendency towards easiness.

Probably the cause of the continued stringency may be found in shipments of currency to the West, which are still taking place, and to the possibility of rather large shipments to Boston, and a special financial transaction. Generally bankers do not believe that there will be any material let-up in rates until the end of the month.

New York (noon), Oct. 10.

Although London prices showed moderate advances over our closing prices, the opening of our market was rather heavy and for the first hour no little liquidation was noticed.

L. N. ran down rather easily on the execution of a selling order of 10,000 shares by the specialist.

London bought on the decline.

So. Pac. was sold down by the Room on the theory that a decline would take place as soon as the new securities were issued and on the decline the buying was good and when the rest of the market rallied an easy recovery of 3 took place.

Trading in B.R.T. was fairly active; there were no transactions, however, of much significance. It is reported that Mr. Keene is still bearish on this stock, in fact he is believed to look for lower prices throughout the market.

About 11 o'clock the announcement was made from Washington that the government had decided to anticipate immediately the November interest and further that it would anticipate all the interest payments up to July 1st 1906, at a discount of 7-10 of 1 per cent per month. Should the bond holders avail themselves of this offer it is calculated that some \$30,000,000 would be released; this would of course be a substantial benefit to the money market and might bring about a material decline in rates.

No small part of the money stringency is due to the extremely clumsy system which the treasury has for keeping its balance. Its balance cannot be deposited in national banks, consequently whatever balance the government has is practically withdrawn from circulation entirely.

At the moment the market is strong but with very little doing. Money is quoted about 10 to 11, lending at 11.

## CHICAGO MARKET.

### NEWS OF THE MINES.

The following letter from the mine superintendent and the managing director of the Fairview corporation, received by us this morning, will prove very interesting to holders of the stock :

Fairview, B.C., Sept. 27th, 1890.

Dear Sir :

With this you will find a report of work done during the past four months on the Stemwinder mine which doubles our visible ore supply. During the past month two mining engineers of established reputation have examined the property. Joseph J. Taylor, head examiner of the Gooderham Blackstock syndicate, confirms Mr. Bledsoe's report both in regard to values and of the ore in sight. He reports as follows :

"The ore will positively go down for some distance, and the outcrop extends in both directions far beyond the end lines of the claim, so that as far as available ore goes, one may dismiss that by saying it would keep a 40 stamp mill going for years."

W. Thos. Newman, M.C.M.I., of Vancouver, reports as follows :

"I have just finished a thorough examination of the levels of the Stemwinder mine and a careful comparison of same with the report of J. F. Bledsoe, M.E., dated May 15th, 1890, and now seen by me for the first time. I am able to endorse the said report as correct in substance and in fact, and to add that in my opinion such extensive backs of ore as you have blocked out in the Stemwinder mine can be mined and milled by a mill not less than sixty stamps located at the mine for an average cost of less than \$2 per ton."

We are now in possession of the Smuggler mill and intend to treat 1000 tons of ore, which will be taken from the different stopes; this will demonstrate the values beyond all doubt, and then it is simply a question of extensive machinery and careful management to give large and lasting dividends.

Five of the largest and best mines of America are paying handsome profits on ore which is worth from  $\frac{1}{2}$  to  $\frac{3}{4}$  of the value of ours. We have one of the largest, if not the largest, showing of free milling quartz in Canada, and all mining men concede the fact that a mine of this nature is the surest and best, as once found they will last for generations. We expect to be able to start the mill by Oct. 15th, and it will take about a month to know the result, of which we are perfectly confident. The company is in a better financial position than ever before.

Other properties in the district are being developed and Fairview is steadily improving. The 1600 lots owned by the Corporation are likely to prove one of its most valuable assets. The Canadian Pacific Railway is busily engaged in laying out its line through the district which will, we are led to believe, reach Fairview as well as go through the White Lake pass which should make the Corporation's Coal Lands at this

point one of the most valuable properties in British Columbia.

In conclusion, we can state that the prospects of the Corporation were never so bright, and the work is going forward steadily with every indication of success.

Yours very truly,

RICHARD RUSSELL,  
President and Manag. Director.

Fairview, B.C., Sept. 15th, 1890.

Mr. Russell, Pres. and Manag. Director, Fairview Corporation,

Dear Sir :

In reply to your request for a concise statement of the progress made since my report, permit me to point out that development work has vigorously been pushed ahead all summer. On the second level the drift has been sent west from the bottom of the shaft a distance of 360 feet, and the same drift has been continued east from the shaft a distance of 235 feet, making 385 feet of drifting on this level. At the same time an upraise has been put in from the second to the first level a distance of 100 feet, and drifting on the north vein on the second level has now reached 120 feet. All the above work is in quartz. In addition a crosscut has been run 185 feet south for the purpose of exploring the ground in that direction. The preliminary work has been done for the purpose of continuing the shaft down another 100 feet.

Average samples taken as the work has progressed have demonstrated that the values contained in the quartz remain practically the same as those mentioned in my former report. With a small amount of sorting, the ore can be depended upon to yield \$5 per ton. Ore bins are being constructed and all arrangements hastened for the purpose of supplying the ore necessary to keep the Smuggler mill, which has recently been secured by the Corporation, going at full capacity as long as may be considered advisable.

A saw mill has been purchased and is now being installed for the purpose of supplying all lumber that may be needed for structural and mining purposes. The necessary timber limits have been secured and a contract let for the delivery of a large amount of logs at the mill. This mill will effect a great saving to the company.

The stamp mill is being overhauled and put into shape and as soon as arrangements are completed we will be ready to begin the continuous treatment of all the ore that you may think desirable to put through while the mill remains in its present location.

Respectfully,

J. E. BLEDSOE, M.E.,  
Supt. Fairview Corporation.

## CHICAGO MARKET.

EUROPEAN WHEAT DEFICIT - AN INNER WHEAT MOVEMENT - OPENINGS TO-DAY WEAK AND BUSINESS SLACK.

Chicago, Oct. 10.  
The Armour-Wear deal, if there was anything in it at all, has passed out of notice but smaller primary receipts and the now generally spoken of refusal by farmers to make any considerable offerings at the present prices, is bulking more and more as about to be a controlling market influence. It for the present is not causing any nominal advance in the open market, but to it must be traced the good prices foreign buyers are paying outside the sphere of manipulating agencies. Producers not merely know this year the value of their cereals, but are able to hold them till buyers come up at least to this value apart altogether from market prices. Much very good business has thus been done outside the ordinary market range and in a quiet way. Grain markets must stick more to real values and less to speculative values or they will lose much export business and get out of touch with this inner wheat movement.

The Liverpool Corn Trade News says that there will be in Britain a crop of 8,200,000 qrs, compared with 9,300,000 in 1898, but that the deficiency is practically made good by heavy reserves carried over. Of France it says the crop will be 42,000,000 qrs, that is 3 millions less than last year; of Germany 13,780,500, against 15,126,144 last year; Belgium 30 or 40 p.c. less; Holland 700,000 qrs against 3,000 last year; Italy 2½ million qrs less; Spain 11 million qrs. against 13,000,000 last year. These facts pointing to a European shortage of wheat make unlikely any considerable decline in prices.

On lower cables arriving from Liverpool wheat & lower, Chicago market opened weak. May wheat & and Dec. & lower than close, with a downward tendency. Corn opened & higher, but fell off at once in succeeding sales. Oats was about yesterday's level. Provisions were weak in all options and volume of business comparatively insignificant.

Provision receipts today, 20,000; decrease on last year, 4,000.

Car lots received:

Corn, 1,860, shipments, 966,958.

Wheat 434, shipments, 157,022.

Oats, 888, shipments, 2,840.

Primary last week: 1,284,729, shipments, 467,229; last year, 2,015,464; shipments, 1,183,859.

This showing a decrease of 730,000 shows the prevalence of storage among farmers themselves, which cannot but operate as a bull factor, and revive the strength of the market which is weak today.

(See page 5.)
