Apply to V. T. FOLEY, 83 King Street, West, Chatham. Phone 180.

GLENCOE LODGE, No. 133, meets every Tuesday evening at eight o'clock sharp in the lodge room, opposite Royal Bank building, Main street. All brethren of the Order cordially invited to attend.—Russell Quick, N. G.; A. B. Sinclair, R. S.

100-ACRE FARM FOR SALE
This splendid farm, being lot No. 9, concession 7, Mossa township, improved farm, very good buildings, location ideal, which is close to the R. R. at Shields, Ont. Good reasons for selling. Property considerably reduced for early sale. No. 1 opportunity for a farmer for revenue and investment. Communicate with the owner on the farm or write for further particulars. Other farms for sale, exchange and rent. Sam. D. Campbell, Realtor, 422 Richmond St., London, Ont. "The Hub." City homes for sale, exchange and rent. Also summer cottages.

To Sell Summer Residents

City people in the country for the Summer can be sold groceries and meats by Long Distance. Some grocers (and butchers) call up out-of-town customers once a week and get their orders. Deliveries are made by truck or express.

Some grocers arrange with their customers before they leave town, to give this service. They say they can well afford to pay for Long Distance calls on weekly orders.

Let us work out with you a plan for the surrounding district.

TEACHER WANTED
For S. S. No. 8, Ekfrid. Duties to commence Sept. 2. Apply, stating salary and experience, to Roy Squire, Secretary-Treasurer, R. R. 3, Glencoe.

Father's Day
The Day to buy Dad a Tie. You have had our National Mother's Day—and now we have a day for dear old Dad. Sunday next is Father's Day. The object is to show Dad that he has a place in your heart. Buy Dad a Tie, a Shirt or a pair of Silk Hose, or any of the little intimate things that will make for Dad a whole smiling Day.

J. L. TOMLINSON
The Shop for Men

Apply to V. T. FOLEY, 83 King Street, West, Chatham. Phone 180.

GLENCOE LODGE, No. 133, meets every Tuesday evening at eight o'clock sharp in the lodge room, opposite Royal Bank building, Main street. All brethren of the Order cordially invited to attend.—Russell Quick, N. G.; A. B. Sinclair, R. S.

100-ACRE FARM FOR SALE
This splendid farm, being lot No. 9, concession 7, Mossa township, improved farm, very good buildings, location ideal, which is close to the R. R. at Shields, Ont. Good reasons for selling. Property considerably reduced for early sale. No. 1 opportunity for a farmer for revenue and investment. Communicate with the owner on the farm or write for further particulars. PLANTS FOR SALE
Plants for sale — tomatoes, early and late cabbage, cauliflower and peppers; flowers—asters, salvia and verbenas.—W. R. Sutherland, phone 81.

A gang of men working on the 16th sidetrack, Caradoc, unearthed a skeleton, supposed to be that of a woman or small man. Apparently it had been in the ground for forty or fifty years. Dr. Woods, coroner, was notified, who decided that nothing could be learned by holding an inquest.

Middlesex county council at Thursday afternoon's session received the long-awaited report of the committee which conducted a probe in camera some weeks ago of the charges of irregularities at the County House of Refuge in Strathroy. The investigators found that there was probably too great a consumption of liquor at the home, and instructions were issued that hereafter liquor must be dispensed only on a doctor's prescription.

Vendors of such soft drinks as lemonade or orangeade sold from large containers will be governed by regulations concerning the contents of the beverages. The name of the drink must be printed on a label on the container, warns the department of health, and if coloring matter is used the word "colored" must appear on the label. Saccharine is barred except in the case of medicated food. The above regulations, just issued, apply to all vendors of soft drinks.

London plasterers, who are now drawing \$1 an hour, have demanded \$1.25 an hour, and threaten to walk out unless their terms are met by July 1. The employers claim that work is not at all plentiful, and they think the demand is unreasonable at this time. Representatives of the men say that while a wage of \$10 a day for an eight-hour day may seem unreasonable, it only figures out to about \$5 or \$6 a day the year round, as plastering is a seasonal occupation.

Before the Committee on Privileges and Elections in inquiry into Home Bank affairs, G. T. Clarkston, joint liquidator, stated that there were about 60,000 depositors in the Home Bank, and between 1,600 and 1,800 shareholders. A dividend of 25 per cent. had been paid by borrowing \$2,500,000 and by getting the Ontario Government to suspend its claim for \$1,250,000. He anticipated that in about three years, under normal conditions, a 10 per cent. dividend might be paid.

Say it with printing.

DISTRICT AND GENERAL.

The death is recorded at Highgate of Dan McMillan, in his 67th year. Samuel Cole, a pioneer resident of West Lorne, died on Saturday, in his 80th year.

Ten thousand London school children celebrated their annual picnic at Springbank Friday.

In 1815 we had a summerless summer, so says Rev. Dr. Patterson's "History of the County of Picton."

A Maine farmer was electrocuted when he threw a pail of water on a fire burning about electrical wires in his barn.

The number of motor cars owned in Ontario in 1923 was 289,995, which is nearly half the number owned in the whole Dominion.

When Adolf Schacht, 45, of Stanford, Conn., came home from work and found his wife had had her hair bobbed, he broke all the dishes in the house and landed in jail.

Chas. J. Watson, of Bothwell, and Mrs. Alice C. Wade, of Euphonia, were united in marriage on May 29th, and expect to sail on July 2nd for a wedding tour in the Old Country.

Influenced by conditions of unemployment existing in the province, the Ferguson Government has decided to increase by \$1,250,000 its contemplated expenditure during the summer on Ontario highways.

Bothwell council has instructed the police to arrest all speeders in future. Riding bicycles or pushing wagons on the sidewalk will also be severely dealt with. It is proposed to license cigarette selling in the town.

Establishing a record for what is probably the largest shipment of sheep to the United States ever made in Canada, the R. McEwen farm at Byron will this week ship to Kentucky 104 head of pure bred Southdowns for a purchase price that runs into the thousands.

One tiny match in a private garage gave a \$3,000 lesson to a Belleville man. While working on his car the man dropped a tool and struck a match to look for it. An explosion and fire immediately followed, in which the garage and car were destroyed and the owner injured.

Middlesex county council on Saturday authorized the payment of \$80,000 to the University of Western Ontario, being the balance of a grant of \$200,000 which has been made for the erection of a science building as a monument to the men from Middlesex who fell in the war with Germany.

A gang of men working on the 16th sidetrack, Caradoc, unearthed a skeleton, supposed to be that of a woman or small man. Apparently it had been in the ground for forty or fifty years. Dr. Woods, coroner, was notified, who decided that nothing could be learned by holding an inquest.

Middlesex county council at Thursday afternoon's session received the long-awaited report of the committee which conducted a probe in camera some weeks ago of the charges of irregularities at the County House of Refuge in Strathroy. The investigators found that there was probably too great a consumption of liquor at the home, and instructions were issued that hereafter liquor must be dispensed only on a doctor's prescription.

Vendors of such soft drinks as lemonade or orangeade sold from large containers will be governed by regulations concerning the contents of the beverages. The name of the drink must be printed on a label on the container, warns the department of health, and if coloring matter is used the word "colored" must appear on the label. MASONIC SERVICE

Lorne Lodge No. 282, A. F. & A. M., held Divine service in St. John's church on Sunday afternoon, when seventy of the fraternity met at the lodge room and marched to the church.

The sermon was preached by the rector, Rev. Wm. Willans, who, after reading the lesson from the measuring of the temple and the holy city as recorded in Ezekiel and in Revelation, spoke of the measurement of a man, which should as far as possible be up to the standard of Christ in character.

Special musical numbers included an anthem, "O How Lovely," by the choir, and a vocal solo rendered in a pleasing manner by Miss Mabel Wright.

Visiting Masons were present from Dutton, Rodney, West Lorne, Melbourne, Thamesville and Wardsville. Rt. Wor. Bro. Graham, District Deputy, of Thamesville, was among those present.

JUNE BRIDE HONORED

Walkers, June 9.—A pleasant time was spent on Friday evening at the home of Mr. and Mrs. John A. Leitch when about twenty-five friends and neighbors surprised their daughter, Alma, bride-elect of this month, with a miscellaneous shower. There were many beautiful and useful gifts. A novel idea in the form of a large wedding cake made by girl friends decorated the table on which the gifts were arranged. The room was prettily decorated with lilacs and spring flowers. A musical program was given, consisting of violin and piano selections, recitations and songs. Rev. D. Robertson acted as chairman. After singing "For She's a Jolly Good Fellow," lunch was served by the girls. Many good wishes for the bride-to-be from everyone present completed a delightful evening.

WAS NATIVE OF EKFRID

The death took place Friday morning at Dutton of Robert McCallum, blacksmith, who has been ailing for the last two years. Mr. McCallum came to Dutton eight years ago, having previously resided in Chicago, and was much liked in the community.

Deceased was a native of Ekfrid township, where he was born in 1868, the son of Duncan and Nancy McCallum. He is survived by three brothers: John, Michigan; George, Belmont, and Daniel, Appin; also one sister, Mrs. Thomas Armstrong, Chicago.

THEIR SILVER ANNIVERSARY

(Press correspondence)
Mr. and Mrs. Colin Leitch, of Glencoe, celebrated the 25th anniversary of their marriage at the home of their daughter, Mrs. George Howe, of Ekfrid township.

The occasion was a complete surprise party to Mr. and Mrs. Leitch, as they were invited to their daughter's home for tea and upon arrival there found the yard crowded with autos, and to their surprise there were about forty friends to greet them.

The house was beautifully decorated for the occasion and a chicken dinner was served. The happy bride and groom of 25 years were recipients of many gifts of silver.

The guests were from Kent Bridge, Byron, Mossa, Ekfrid and Glencoe, and a jolly evening was enjoyed. Mr. Leitch was Miss Maud Crow of Kent Bridge, and Mr. Leitch has been a lifelong resident of Glencoe, being a merchant tailor, which business he has carried on for 50 years in Glencoe. They have three children, Mrs. George Howe, of Ekfrid, and Edna and Cecile, at home.

Mr. and Mrs. Leitch are held in the highest esteem and have a large circle of friends, and they have the hearty congratulations of the citizens of Glencoe.

THREE MONTHS FOR STEALING

Joseph Currie, Chippewa Indian, who was arrested in North Dutton recently for stealing property to the value of \$43 from Isaac Weaks, an Indian on the reserve, was sentenced by Judge Ross to not less than three months and not more than nine months in the Ontario Reformatory. The judge took into consideration the prisoner's war record and also that he was supporting his mother and crippled father. In his defence Currie stated that Weaks owed him and he thought he was justified in taking the articles. It was not his first offence for stealing. Currie had been employed north of Dutton, where the stolen articles were recovered.

The greatest tribute to the cloth is that when a preacher goes wrong the fact is considered sensational news.

IMPORTANT COUNCIL BUSINESS

Taxes to be Paid Semi-annually—Oil for Streets—Other Notes

Glencoe council, on motion of Councillors Parrott and Irwin, has instructed the clerk to prepare a by-law for having taxes paid in two instalments—one-half of the amount of taxes to be paid on July 1st and the remaining half to be paid on December 15th.

On motion of Councillors Munro and McAlpine the engineer was instructed to make a report with a view to repairing the drain from the corner of Main and Roe streets to the corner of Concession and Simpson streets, according to section 78 of the Municipal Drainage Act.

On motion of Councillors McAlpine and Irwin it was agreed to accept the tender of Vincent Watterworth for repairing the roof of the town hall at \$218, and to allow \$12 extra to tar the hips and valleys, according to specifications; if help is required, Mr. Watterworth is to hire D. R. Hagerly.

On motion of Councillors Parrott and McAlpine a 6,000-gallon car of oil for the streets will be ordered through the county engineer at once. A by-law for making the assessment between May 1 and September 30 received its three readings and was finally passed.

EKFRID COUNCIL

The municipal council of the township of Ekfrid met in the town hall, Appin, on Thursday, the 22nd day of May, 1924. All the members were present. The minutes of the last meeting were read, approved and signed by the reeve.

Cheques were issued in payment of accounts as follows: John E. Gough, repairing road grader, \$15; R. P. Eaton, assessor, salary, \$160; dogs tags, stationery and postage, \$5.88; Chas. Bardwell, damage to cutter by defective road, 6.50; J. E. Campbell, repairing road scraper, \$12.25; Sawyer-Massey Co., repairing road grader, \$53.06; clerk and treasurer, preparing statement of road expenditure for Ontario Department of Public Highways, \$20; C.N.R., freight on grader repairs, \$15.55. Also cur rent accounts were paid.

Council adjourned to meet again on Thursday, the 19th day of June, at ten o'clock forenoon.

MOSA COUNCIL

A meeting of the Mossa council was held at Glencoe on May 26th. All the members were present. The minutes of the last meeting were read and adopted.

Moved by Isaac Watterworth, seconded by A. McCrea, that the following accounts be paid:—J. D. McNaughton \$30 and L. McKelvie \$25, sheep killed and injured by dogs; Robert W. McKellar, \$110, for services as assessor; Municipal Ward, \$10.57, for blank forms; Marshall Moore, \$10, statute labor performed since the pathmaster returned his list. Carried.

Moved by Isaac Watterworth, seconded by J. A. Leitch, that the petition presented by Albert Winger, requesting that the McNaughton award drain be changed to a municipal drain, be accepted, and the clerk is hereby instructed to request James M. McGregor, C.E., to make an examination of the said drain and make report to the council. Carried.

By-law No. 737 to appoint road masters, fenceviewers, poundkeepers and sheep valuers was passed as read a third time.

The council adjourned to meet at Newbury on June 21st at 1 p.m.

EKFRID COURT OF REVISION

The court of revision for the hearing of appeals or complaints against the assessment roll for 1924 was held in the town hall on Thursday, May 22, with all the members present. Bertha Galbraith was appointed chairman.

The clerk presented a certified list of appeals, notice of which had been served upon him. The said appeals were taken up and considered by the court and changes made as follows: The C.N.Ry. assessment for business was struck off, being non-assessable by a recent amendment to the Act.

The dogs assessed to Dugald Black, W. G. Poole and Thos. B. Irwin were struck off.

The assessment on north half lot 1, concession 2, was reduced \$50, and N. D. Caruthers was assessed for west half south half lot 15, concession 5, in the place of H. and A. McCallum.

The bitch assessed against Chas. H. Lucas was struck off.

The roll, being amended, was finally approved by the court.

A. P. McDougald, Clerk.

DEATH OF MRS. MCINTYRE

The death occurred at the home of her son in London on Monday morning of Mrs. Annie McIntyre, widow of the late Malcolm McIntyre, of Alvinston, in her 80th year.

Mrs. McIntyre formerly lived at Appin, where her husband was in business as a blacksmith, moving from there to Alvinston. She leaves three sons—Dr. Donald, of Windsor; Alexander, of Bradford, and Angus, of London. She was one of a family of nine, only one of whom survives, James McMaster, of Appin.

* The funeral was held at Alvinston yesterday at 10 o'clock, service being held in the Presbyterian church there.

WEDDED IN CHICAGO

A quiet wedding took place at the home of Mr. and Mrs. Henry Cook, 5507 Gladys Ave., Chicago, on Monday, June 2nd, when Miss Anna Mae McIntyre became the bride of John M. Lundberg.

Prior to her marriage about fifty of the bride's fellow employees gave a miscellaneous shower in her honor at which she was the recipient of many beautiful gifts.

The young couple have taken an apartment on Irving Park Boulevard and will be at home to their friends after July 1st.

Miss McIntyre was a former Glencoe girl, having resided on the Longwoods Road near Strathroy.

TENNIS NOTES

A number of the young people of the town are quite enthused over tennis this year. A membership of about fifty is expected to participate in games during the season. Fees are now due, and those wishing to join will hand their names to the secretary-treasurer.

The following is a list of charter members and paid-up members for 1924: Charter members—Arnold Aldred, G. A. Dickson, Marjorie Gillies, Mrs. Hill, Mr. Hill, H. I. Johnston, Ed. Mayhew, R. M. MacPherson, Bruce McAlpine, Evelyn McCallum, Rev. D. G. Paton, Mabel Wright; paid-up members—T. A. Craig, G. A. Dickson, Marjorie Gillies, Mary Gardiner, Betty Grant, Mrs. Hill, Mr. Hill, Jean Irwin, H. I. Johnston, Mrs. Ed. Mayhew, Ed. Mayhew, Evelyn McCallum, R. D. McDonald, Olive Watts, Gladys McAlpine.

The first local tournament commenced on Monday evening, when Mrs. Ed. Mayhew and H. I. Johnston defeated Jean Irwin and G. A. Dickson, and M. Gillies and Roy McLean defeated Mrs. Hill and E. Arnold.

On Tuesday evening Margaret Morrison and R. D. McDonald defeated Frances Moss and Mr. Hill, and Betty Grant and Harry Moss defeated Mary Gardiner and Ed. Mayhew.

CHEERIO NOTES

The Cheerio Club held the last meeting of its second year on Friday, June 6, at the home of D. G. McEachren. An exciting game of softball was played early in the evening. The president, Agnes McEachren, took charge of the meeting. A program was then given, as follows:—

Solos by Lee Diggon, Walter Walker, Jessie Mitchell and Sid Hartley; instrumental by Alma Henderson and Carrie Gardiner; humorous readings by Jean McEachren and Catherine Mitchell; reading of "Live Wire" by J. D. Gillies. There was also a contest and progressive euchre, after which a dainty lunch was served.

The election of officers for the new year will be held at the next meeting.

PETTIT—WARREN

The marriage took place at noon on Saturday, June 7, at the Methodist parsonage, Appin, of Miss Jessie Warren, daughter of Ed. Warren, of Ekfrid, to Roy Pettit, of Detroit, son of Mr. and Mrs. H. Pettit, of North Ekfrid. The young couple were attended by Miss Pearl Pettit, sister of the groom, and Stuart Campbell, of Melbourne. After the ceremony they motored to the bride's home, where twenty guests partook of a sumptuous dinner, after which the young couple took the evening train for Detroit.

A friend in need is the one you dodge.

All that a man wants here below is more than he's got.

Riches formerly had wings, but now they have wheels.

Extract from a policeman's evidence in an English court:—"The man was drunk, had his coat off, and wanted to fight someone who was not there."

Another funny sight is a father striving to store up wealth in order to deprive his children of the chance for the character-building struggle which he himself enjoyed.

PAYING PARTIES.

People in the country frequently are taxed for the building of not only the church of their own particular choice but for those of other denominations which neighbors and friends are interested in. The problem is at times a difficult one to solve. Many of us have willing hearts but lean purses, so we must sharpen up our wits in order to find means to do our part.

Entertainments of various sorts offer a solution, for they bring the people together in a social way. The old-fashioned pound party, apron and necktie party, strawberry festival and oyster supper stood the test for many years and helped to build many churches, but there are newer ideas taking their place. One is a poverty party, where each guest is taxed a modest sum for every bit of luxurious apparel or jewelry that they happen to be wearing. This creates a lot of fun and the judges report on the cases and collect just dues before a modern pancake and coffee feast is served at a small sum per plate.

The initial party is perhaps newer still and may not have been tried in your particular neighborhood. Each guest has to pay an admission fee upon arrival, gauged by the number of letters in his name: five cents for capitals and a penny apiece for the small letters. No middle names are allowed to be overlooked. There is usually a punch bowl of lemonade or fruit punch, a table of homemade candy at modest prices, and if dancing is indulged in ten cents a dance is asked. This yields quite a tidy little sum and does not make an evening that is unduly expensive.

In one small town there were three churches going to be built and in order to be fair the heads got together and arranged their entertainments so that they did not clash, and each pledged to attend them all impartially, and it made the greatest harmony among the workers.

There is another point in church work that these same people cleared up and their findings are worth passing along. At each entertainment the women were asked to furnish food, cakes, pies, cold meats, and so on. Usually all such things that are not sold or eaten are wasted, so the women decided that the donors should take home anything of hers that was left.

Another idea was to have a food sale by each of the different groups on three Saturdays of the month, leaving the fourth Saturday free for all. At the sales home-made bread, biscuits, cakes, pies, mayonnaise, jellies, fancy desserts, baked beans, pickles, candies and other good things were offered at fair prices, and here again the donors took back the things of theirs not sold. The sales were wonderfully popular and profitable.

An indoor picnic is a jolly affair and has one money-making feature. Each worker, matron or maid, arranges a picnic luncheon basket for two, making it as dainty and attractive as possible; then at the appointed time they are sold at auction to the highest bidders, who invite their special girls to enjoy the contents.

WRIGLEY'S

After every meal

A pleasant and agreeable sweet and a l-a-s-t-i-n-g benefit as well. Good for teeth, breath and digestion. Makes the next cigar taste better.

ISSUE No. 24-24.

with them. The rest of the evening may be devoted to games.

EVERYDAY TABLECLOTHS.

It is a fact that pure linen seems too expensive to use for common table wear, but it is also a fact that the much-advised table oilcloth does not always prove to be a satisfactory substitute for linen.

A farm woman, whose dining table always looks inviting, says that unbleached cotton solves her problem. She buys the sixty-three-inch width, and uses it square, as her family is small. It can be used in greater width, and longer too. For trimming, a two-inch band of fast-color checked gingham is used in place of hems.

Such cloths are durable, easily made and laundered, and much more attractive than oilcloth.

LINOLEUM FOR THE STAIRS.

There was no stair carpet and the stairs were painted white. The tenant wondered how she could keep those stairs looking presentable, for she could not afford to buy a carpet to fit them, which would, perhaps, prove totally unfit to the next farmhouse into which she might move.

For a dollar she found a remnant of linoleum in a neat tile pattern which she cut into pieces of the width of the stair steps and about half their length. One of these pieces was fastened in the centre of each step, and the effect is very neat and pleasing. The linoleum softens the sound, is easy to clean and looks much better than a cheap carpet.

A PRACTICAL GARMENT FOR YOUNG CHILDREN.

4568. Here is a style that will appeal to the busy mother of little children, especially those of the "creeping" age. This design provides a convenient closing at the inner seam, which is very practical for children below 2 years of age. The garment may also be made with this seam closed, for the back is in drop style.

The Pattern is cut in 3 Sizes: 6 months, 1 and 2 years. A 6 months size requires 1 1/2 yards of 36-inch material. Pattern mailed to any address on receipt of 15c in silver, by the Wilson Publishing Co., 73 West Adelaide St., Toronto. Allow two weeks for receipt of pattern.

Send 15c in silver for our up-to-date Spring and Summer 1924 Book of Fashions.

USES FOR STICKERS.

Keep a box of stickers in your china closet. You will be surprised at how many times they will come in handy. For instance, when you want to put away jelly or preserves you can write the variety on the sticker and be sure it won't come off. Another use for them is to paste over the holes in salt and pepper shakers, usually closed with a cork.

TO CATCH THE DUST.

We want to leave the pantry window open when the hot days come, but the dust comes in through the screen. About the best things to do, then, is to fasten a piece of white cheesecloth neatly over the screen on the inside. This allows a free circulation of air, and the frequent need of laundering proves how much dust the cloth keeps out.

Take from man Hope and Sleep, and you make him the most wretched being on earth.

Minard's Liniment for Aches and Pains

"When Hearts Command"

By ELIZABETH YORK MILLER

"When hearts command, From minds the sagest counsellings depart."

CHAPTER XXI.

Jean was lucky, for shortly before she was quite ready to start for the farm Carlo drew up at the gate in the two-wheeled cart on his way back from early market. He had a few things to leave on behalf of his master, and Jean readily availed herself of the opportunity for a lift.

There was a so-called road to the farm, but it was a long way round, much too far for her to attempt by foot, and she had been dreading the steep mile-path. Alice would have undertaken the mission of delivering Hugo's mysterious-looking letter, or it could have been sent up by a peasant or farmer's boy going that way, but Jean was too curious about it to delegate the errand to anyone else.

Besides, she was longing for a brief escape from the wilderness of stitching, through which she had been plodding, and this was a good excuse for taking it.

The cart started off at a smart pace. Carlo's idea of travel being to make the little horse gallop madly. The cart rocked from side to side, moving in a fine cloud of white dust, and Jean held on for dear life, her head bent against the wind and to keep her hat from blowing off. She had no breath to spare to scold Carlo. But on the up-grade the little horse settled into a more sedate pace, Carlo leaned back with an idle whip and slack reins, and presently they merely crawled. And now they were enveloped in a black cloud, a cloud of gnats and horse-flies, infinitely troublesome. Jean fought them, Carlo and the little horse were indifferent. It was very hot, the hottest time of day, with the southern spring sun high in the sky.

Jean wished that she were going to Lucerne on a honeymoon, and that she had finished her interminable sewing, and that she had a little more money. In intervals of fighting the gnats and horse-flies she did sums in mental arithmetic—her greatest accomplishment—and came to the conclusion that it would be necessary to wire Christopher Smarke for a small sum. After all, it could be paid back out of Alice's little savings-bank hoard.

Weddings are not everyday affairs. Close-fisted Christopher refused to realize that. Of course he did not know yet that there was to be a wedding. Perhaps he would be annoyed that they hadn't troubled to write to him, even though he didn't come. Some people are so easily annoyed. By the time the exhausted little horse crawled them up the last steep lap to the fair smiling plateau at the top, Jean was in a pink perspiration between the arithmetic and the gnats, and inclined to regard the world as a hot and excessively troublesome sphere.

The little farm lay grilling tranquilly under the shimmering sun waves, not a soul, not a sound. Jean, being left at the kitchen door, entered, surprised and surprised to find a group of hens making a meal off the untidy remains of breakfast. Men's muddy boots stood about with an air of some time expecting to be cleaned. Other articles of more intimate attire had been hung to dry before a fire which had ceased to exist. Why had they not been spread in the sun? And where was Maria?

Jean called, and presently the old woman came hobbling in with a basket of newly-dug potatoes and a dead rabbit. She did not seem any too pleased to see company. Obviously this was a man's house, and feminine society had to be prepared for and was not encouraged to pay impromptu visits. Maria said that she thought the signori were in the fir grove taking a siesta. Jean went out to the fir grove, that delightful little plantation, with its odd bits of rock and floor of dry pine needles, which seemed from this lofty eminence to survey the whole world, and found Hector Gaunt and Hugo regularly enjoying themselves. Their coats rolled up for pillows they lay side by side on a slanting rock, eyes shielded from the glare by old panamas, with a pair of pipes and a half-emptied flask of Chianti and water to bear them company. "Just like disgusting tramps!" thought Jean as she approached their pleasant sanctuary.

Aloud she said: "So this is how you work!" Instantly the lazy flow of their conversation ceased, they raised themselves on their elbows, and blinked smilingly at her. "Hal-lo!" Gaunt cried. "Here's Jean. Well, this is a surprise." Hugo looked to be in radiant health and spirits. Already he was considerably tanned and appeared to have lost every vestige of his bad cold. He jabbed at his eye-glasses and his gaze was misty and far away as he added his greeting to Gaunt's. "We were talking about the Seven Seas," he said, "and once when we were lost and couldn't get our bearings for three weeks. That was long before you came to Bordighera with Madame Douste. Why, Hector was quite a youngster then. . . . But sit

down, my dear. Would you like my coat? It's not very clean, I'm afraid. We get so muddy on the terraces in the early morning."

Jean declined the coat and settled herself on a convenient boulder under an inky splash of shade.

"Here's a letter for you, Hugo. It came this morning and I thought it might be important."

Hugo reached out eagerly and attacked his eye-glasses again, giving them a very severe punch this time.

"Well, now—yes, of course! I thought so. I could have told you even before I saw it. . . . H'mm, yes, yes!" The murmuring went on as he tore open the envelope and read its contents, while Hector Gaunt and Jean waited to share in his news.

At last Jean's patience wore thin. "Hugo, who is it from? Do stop that silly mumbling."

Hugo looked up mightily pleased.

"You can read it if you like. Only a communication from Mrs. Egan's solicitor. You see, I was right. She did owe me that money, and she did communicate with her solicitor as she promised she would. I was right, wasn't I? I knew she'd pay it when I mentioned the matter. It probably slipped her mind. Ladies are so forgetful. But of course she's honest. I never doubted it for a moment. So you see I was right, wasn't I?"

He babbled on while Jean bent her astonished gaze upon the typewritten sheet. When she had finished, she handed it to Gaunt without comment, it being taken for granted that Hugo had no objection to his private affairs being bandied about.

Mrs. Egan's solicitor had written to say that acting upon her instructions he had received securities in cash to the sum of £5,000, and placed this amount together with bonds to the value of £15,000 to the credit of Mr. Hugo Smarke, otherwise known as Mr. John Bullis, in the Fleet-street branch of Mercer's Bank, whose receipt he held, and who doubtless would communicate with Mr. Smarke. If Mr. Smarke required funds for immediate use, a wire to Mr. Herbert Dowling, manager of this particular branch of Mercer's, would result in a transfer of the sum mentioned to the Bordighera branch of the Italian State Bank.

It was almost as though Hugo held £5,000 in his hand. He gazed in silent awe upon the capital.

How had he managed it? Why had he been so sure of getting such a huge sum from Tony Egan's widow? And here it was—here but for the asking, the matter of a telegram or two. "You see!" said Hugo, immensely puffed.

Yes, they saw, and they wondered. Gaunt began to question. "I suppose this is a genuine letter?" Hugo laughed and lunged recklessly at his tiresome eye-glasses.

"Bovril," read the name, Hector. Most important firm of solicitors in London. "Pon my soul, Hector, one would think that you'd lost touch with the world. . . ."

She was afraid to believe too readily. She was afraid to believe too readily for fear of future disappointment. And now for that telegram! Hugo got up and brushed himself free of the sticky web of his tangled hair. "Just in the very nick of time," he went on. "Because my poor wife is frightfully hard up, Hector. You may not have known it, but I did, and it's worried me. But, of course, after I saw Mrs. Egan I knew it was only a matter of a few days when I'd get this news. Dear me, I was afraid Alice might have no dowry. It's humiliating for a girl to start married life with no money of her own, and I disliked the idea of my daughter being in such a position."

A flame of anger swept Hector Gaunt's face, found a burning centre in his eyes, where it rested for a moment, they faded away. "Actually I am jealous of this absurd little man!" Gaunt said to himself. "What does it matter if he thinks of Alice as his?"

Yet in a way it did seem to matter tremendously, although Hugo's cool assumption of parenthood simplified matters. Hugo, like the man of the world which he most decidedly was not, had swept away all awkward barriers by the easy process of ignoring them. Wasn't it wise? Didn't it dispose for all time of that old and painfully sweet relationship which had once existed between him—Hector Augustus Gaunt—and this perturbed little woman now known as Mrs. Carnay? Hugo had done the thing decently and thoroughly from the

very beginning. It was too late to challenge him, now; too late for anything that might make life worth while.

With a shrug Hector led his guests to the omelet, the rabbit, and the cheese.

After lunch, while the little horse was being harnessed again, Hugo cleaned himself up, changed his clothes, and packed his bag.

Gaunt and Jean waited for him on the shady verandah and discussed in low tones the possible reasons for Carrie Egan's remarkable action.

Insidiously there had crept into Jean's mind an unpleasant word. Did blackmail lay behind the acquisition of that huge windfall?

(To be continued.)

Lifebuoy

is a true health soap. Its copious creamy lather contains a wonderful health ingredient, which goes deep down into every pore and purifies your skin—antiseptically.

The wholesome health odour of Lifebuoy vanishes a few seconds after using—but the protection remains.

Highest and Lowest. The greatest height above sea level is not so great as the greatest depth which has been probed below it. The summit of Mount Everest is 29,002 ft. high, and the ocean bed between Guam and Midway, in the Pacific, is 31,814 ft. down. Thus, from the very top to the very bottom is 60,816 ft.

Trees' Limits. The reason pine trees are so often associated with mountain scenery is because they are among the few trees that can grow at a very high altitude. Pine trees can grow at 6,200 feet, fir at 6,700 feet; but you will rarely find an ash above 4,800 feet, or an oak above 3,350 feet.

Minard's Liniment for Headache. A man wrapped up in himself has a shabby cloak.

Happiness.

'Tis not a joy that's born of wealth; The poor man may possess it. 'Tis not alone the price of health; No sickness can repress it.

'Tis not the end of mortal strife, The sunset of the day of life, Or but the old should find it: It is the bond 'twixt God and man. The touch divine in all we plan. And has the soul behind it. And so this toast to happiness The seed of which we all possess.

Edgar A. Guest.

For the June Bride Hotpoint PERCOLATOR

IN less than one minute after the cold water and coffee are put into a Hotpoint Percolator, percolation commences. Shortly the coffee is ready, sparkling and clear. It is nothing to get out of order. The Hotpoint Percolator is produced by an exclusive safety switch which it accidentally is subjected to "boil-dry." A gift that would be long remembered. For sale by dealers everywhere. Hotpoint Division of Canadian General Electric Co., Ltd.

Fixed Principles. The leaders for whom the crowd is always looking are men of whom it can be known that in a certain set of circumstances they will behave in a certain way. Before they presume to govern others they have learned to govern themselves. Early in life they formulated a creed whereby to live and to shape a character.

One difference between a politician and a statesman is that the first of these trims his sails to catch a favoring trend of public opinion. He seeks to please everybody. He is acutely sensible of the least change of favor, and his first care is to recover lost popularity. The statesman thinks ahead of his time, though his personal fortune suffers. "Statesman" he is called because he puts the welfare of the State before a personal advantage.

Of course a man in public life or in private relations must suffer at times for having principles and adhering to them. He makes enemies—and thereby his strength is manifested. Only a weakling, a truckler, can find himself invariably on the popular side; and he does not win popularity by his shifting attitudes. Rather, he incurs contempt, for people soon learn to despise the veering weathercock who declares, as in the story of the Member addressing his constituents: "Those are my principles. If you don't like them, I can change them."

Yet none who lives life, and uses his senses, and is glad to learn, regards all truth as something once sealed in a vial, never to be opened for examination. It will not do to dwell in a chamber closed to sound and air. We shall be exposed to the peril to which Bagehot, the British economist, adverts when he observes that most writers are men who have always lived in a room. We must have new light and leading wherever we can find them. But challenging tenets, fresh discoveries, deserve to be tested and proved from the standpoint of what we know already. The old is not to be discarded suddenly just because it is old. There is an intellectual restlessness that goes from fad to fancy and back again, merely because of the desire for some new thing that St. Paul found among the Athenians. They had no fixed principles; they had demagogues instead, and to day the world is full of modern Athenians who put up a favorite or publish a doctrine one day merely to ostracize on the morrow. Of such is the kingdom of those who have no fixed principles.

Paris Fair Clips 8 Centuries Off March of Time.

The Poire Saint Germain, most picturesque of Paris fairs and the one which gives most perfectly the illusion of days long past, drew throngs to the Place Saint Sulpice, facing the historic church of that name, says a Paris despatch.

This fair, which was revived after the war, is an event which the spring tourist cannot well afford to miss. With the aid of substantial "scenery" a perfect reproduction of a medieval village is secured. The famous fountain in the center of the Place Saint Sulpice has disappeared under its disguise and crisscrossed battlements rise in its stead. Quaint half-timbered houses surround it, offering alluring wares of ancient vintage—warming pans, brass andirons, bits of faded brocade, jeweled earrings that perhaps were seen at Versailles when it was the abode of kings, lovely old furniture bearing the "patina" of time and centuries of careful polishing.

The dealers in the stalls do not mar the picture—they are garbed in silks, velvets and lace that belong to the past. The harlequin itself is age-old—the world has always traded shrewdly at fairs.

Being under state patronage, the amusement feature of the fair is adequately cared for. In an open-air theatre, performances of ballets and plays are given which recreate those held long ago. One of the farces, "Le Pate de Chapon," is an adaptation of the "Badin Qui Se Loue" that was played in Paris in 1345. The signal for the closing hour is given each night by buglers, who, in their medieval costumes, make a picturesque sight as they stand on the battlements.

One understands better the great antiquity of French civilization when one reads the placards announcing that it is the 638th Poire Saint Germain. The first one was held in 1176, but there have been gaps in its sequence. The modern revival dates from 1922, and the crowd purchases wares and is thrilled by the fairs and acrobats in much the same fashion as were their remote ancestors. All of which proves France is very old—and eternally young.

Man.

The biped called Man is the only animal who wears a hide other than his own.

Who is bound by the fetters of caste. Who considers that his own is the only species entitled to liberty and the pursuit of happiness.

Who will not give his heart fully and freely to the Master who loves and tenderly cares for him.

Who preys upon his own kind. Who will attack or whip the female of his own species.

Who makes a gala occasion of the agonized death of other creatures.

Who, when he is unimpaired, gets "time off" for good conduct.

Who considers that he alone is entitled to the love of his Maker and the joys of eternity.—David Lee Wharton.

Soils & Pigs

Address communications to Agronomist, 73 Adelaide St. West, Toronto

HAIRLESS LITTERS AND POTASSIUM IODIDE.

Certain definite abnormalities in pigs, such as complete or partial hairlessness, undeveloped hoofs, blindness, large flabby and unnaturally developed neck and head all arise from the same cause of causes. Pigs so affected usually die although the sow remains normal.

Pregnant sows which are fed a highly nitrogenous ration, given insufficient exercise, and little or no vegetable or mineral matter are usually the heaviest sufferers.

This indicates a deficiency of some necessary element in the ration. Control of the trouble lies in preventive feeding and improved management of the sow. It is imperative that the sow be encouraged to take daily exercise. In so far as is practical, separate the feed trough, sleeping cabin and hay rack, or if the sow is housed in a shed or straw stack adjacent to or situated in the barn yard, the feeding trough should be placed some distance away so that she has no alternative but to take exercise. Close confinement of the pregnant sow must be carefully avoided.

Bray should always form part of the ration and to this should be added such meals as shorts, screenings, oats or barley supplemented with 5 per cent. of tankage and 1 per cent. of bone meal. Pulped mangels or boiled turnips and clover hay, preferably alfalfa, are suitable roughages. Minerals in the form of charcoal, earth, soft coal or wood ashes, etc., should always be available for the sows.

If these measures fail, medicinal treatment must be resorted to. Scientific investigation has demonstrated that the addition of iodine in some form to the sow's ration may remedy the trouble. In Eastern Canada, where only an occasional litter may be affected, exercise and proper feeds should be successful, but where hairlessness is common iodine should be administered during the gestation period, or at least for the greater part of it. A solution of one part of potassium iodide in a gallon of water may be prepared and when this solution is supplied to the sow in the meal ration at the rate of one tablespoonful

per day she gets a daily allowance of about two grains of the drug, which is sufficient.

POULTRY REGISTRATION.

Poultry Registration is now well under way. The first inspection of 1924 is completed and the inspectors in the various provinces report favorably on the work. The breeders have given generous support to the movement and interest seems to have increased materially during the last year. This is no doubt due to the better knowledge gained with respect to registration work throughout Canada. Those in direct charge of the inspection of registered hens have tried to impart such detail to the breeders as will enable them to keep accurate records of the progeny of the registered females. Recording forms have been supplied to each breeder, and leg bands, which later are to be used as wing bands, have been furnished for all chicks, the progeny of registered females. All male birds have been inspected for these markings and in nearly every case the very finest of producing blood lines are to be found behind these males.

An honest effort is being made by every breeder to establish a firm basis for his registered poultry, as he realizes that fraud or carelessness of any kind will later reflect on the strain. The firm confidence displayed by the public generally in registration shows that the work of the Canadian National Poultry Record Association is being appreciated by the poultrymen of Canada.

Reports of fertility and hatchability are very encouraging and give promise of being very much better than the hatchings season of 1923. To hear of 75 per cent. hatchings is quite common and many breeders are getting even 90 per cent. hatchability from their registered birds. Generally speaking, the contestants who have been successful in the various laying contests throughout Canada report active business conditions, which indicates that the egg-laying contests are serving as a guide to the buying public in the securing of reliable bred-to-lay stock.

The Pretty Room the Paintbrush Made

BY MARY GRACE RAMEY.

This year daughter reached the age when the usual hit-or-miss furniture found in the growing girl's bedroom wouldn't do at all; in fact, she was quite unhappy about her room and when I surveyed it with a critical eye I couldn't quite say I blamed her. There was a rather battered brass bed, a hand-me-down from former grandeur which had lost some of its rods and was altogether hopeless, though the spring was good and quite comfortable; also a shabby, golden oak chiffonier, with a scroll top—how did we ever come to buy these things anyway? A small desk from some nondescript period and a funny little old dresser, which had been mine when a girl, completed the inharmonious effect. The curtains were discarded lace affairs not suitable for any spot in the house, so they were used here. No wonder daughter was discouraged and that keeping her room in order had grown to be a matter of duty with no pleasure in it.

But where was the money to come from for the pretty set she so longed for? That was beyond me until I took father into my confidence, and together we decided to try our hands at making new furniture from the old. The attic, like those in many old homes, contained the leavings of past generations. Here we had an old hope chest which had been forgotten for years; they are quite the thing now, though used with a spring instead of the ropes, and they are very comfortable as well as pretty. The spring from the brass bed fortunately was the right size, and with four large hooks forged by the blacksmith from heavy strapiron and screwed to the side rails, it could be used very well.

MAKING A START.

A funny little old-fashioned washstand could take the place of the untidy desk most satisfactorily and the table would easily stand a coat of paint. My old-fashioned bureau when deprived of much of its ornamentation was quite presentable in line, though sadly lacking in finish. The scrollwork was removed from the chiffonier and the high inlaid back entirely taken away and a plain piece of pine board substituted. It was shaped to conform with the simple lines of the other furniture. To be quite up-to-date the mirror was removed from the chiffonier and the molding painted to match the rest of the pieces. Then it was hung by a colored cord above the chiffonier. If the bureau had been a suitable shape it would have been treated in the same way, for it is very much the thing just now to hang one's mirrors flat against the wall. Here we had a start, but such a start! Almost every piece was of different wood and the

finish sadly marred and scratched; daughter thought her room was to be more of a mess than ever. But with scrubbing of strong soda water and much scraping and sandpapering, all done in the cellar, every piece was finally cleaned and ready for the paint. For economy's sake we used a first coat of inexpensive paint as near the desired color as could be obtained. This was gone over with sandpaper when thoroughly dry and then two coats of enamel given. For our color we selected a soft, greenish blue, of egg-shell gloss. This gave a more subdued finish than regular enamel. Of course each coat was thoroughly dry before another was given. Decoration was a matter of discussion; some voted for stenciled flowers, but daughter wished striping of a rather light, creamy yellow. Father, who is clever at work of this kind, purchased a regular striping brush for a few cents, and after a little practice was able to give the furniture quite a professional finish with the narrow stripes.

THE FINISHING TOUCHES.

While father was busy in the cellar with his cleaning and varnishing I had not been idle. All the blue and white cotton rags I could muster, with a few yellow and cream, had been prepared in advance. I had a crocheted and braided rug, a greenish blue, of egg-shell gloss. This gave a more subdued finish than regular enamel. Of course each coat was thoroughly dry before another was given. Decoration was a matter of discussion; some voted for stenciled flowers, but daughter wished striping of a rather light, creamy yellow. Father, who is clever at work of this kind, purchased a regular striping brush for a few cents, and after a little practice was able to give the furniture quite a professional finish with the narrow stripes.

Daughter is so proud of her smart little room these days that no amount of work seems too much for her to attempt to increase its loveliness.

Dustless Concrete Floors.

Concrete floors are a mighty desirable feature in many farm buildings; everyone wants them and everyone should have them if at all possible.

But nice as they are, dustless concrete floors are better still. And it's a very easy matter to make them dustproof. Here is how to do it: When the floor has perfectly dried, paint it with boiled linseed oil, thinning to the proper consistency with gasoline. To obtain a glossy surface, which many will prefer, several coats should be applied.

They Were Seven.

Seven little babies,
Tiny yellow chicks,
Old Cat grabbed one—
Then there were six.
Six little fluff balls,
See how they thrive,
Mother Hen stepped on one—
Then there were five.
Five darling chickens,
Scratching near the door,
Mister Rat selected one—
Then there were four.
Four lively youngsters,
Playing by the tree,
One ate a poison bug—
Then there were three.
Three scrawny fledglings,
Gobbling oyster stew,
One overate himself—
Then there were two.
Two husky cockerels,
Scrapping in the sun,
Automobile passed along—
Leaving but one.
One lonely rooster,
Pecking at a bun,
Company for dinner—
Now there are none.

I Make \$20 a Week More.

I am making nearly \$20 a week more than I did last year. And I'm not working much harder than I did either; I've just learned to think. You early last fall, my husband decided to abandon exclusive wheat farming and see if we couldn't make more money with diversified farming. We thought we'd like to raise fine hogs; but getting started took ready cash, and with the low price for our wheat we had mighty little ready money.

I wondered what I could do in my own home to earn more than I was already earning—about \$8 a week—with butter and eggs. It occurred to me that the only real accomplishment I had was cooking.

We live near enough to a city to have a ready market for whatever we want to sell. First came the idea of cottage cheese. Every morning I fed the chickens quantities of sour skim-milk. They didn't really need it, for the wheat was green and fresh, and there was ample corn for them. I can make a good cottage cheese, and I remember that Mr. Hill, the groceryman, had told me once that he had a regular demand for good cheese. He offered me 10 cents a pound; and I found that I could easily make 47½ pounds a week. I added nearly \$5 to my weekly income.

One day when I saw the two hundred fat, plump chickens spluttering around in my back yard it dawned on me that they weren't making money enough for us. I thought of making pressed chicken.

I fished out the kettle, contracted with the grocery to furnish 10 pounds, at first, at 50 cents a pound—a clear profit of 25 cents a pound—and went to work.

I make my chicken by boiling the fowl till the flesh fell from the bones, grinding it with the coarsest knife, covering it with its own liquor, and allowing the mixture to stand and mold overnight.

All fall I've been building up a trade. Frequently my sales run into 50 pounds a week. I figure that I'm adding \$12.50 a week from pressed chicken to my income.—Mrs. G. D. B.

POULTRY

If eggs are dirty, don't wash them. Washed eggs deteriorate more rapidly than unwashed, and detection of a few washed eggs may cause buyers to penalize the entire lot.

Unusually large quantities of washed eggs are reported this spring. Although dirty eggs are discounted in price, washing eggs will generally cause producers a greater loss.

Only clean, unwashed, high-quality eggs bring top prices. Production of clean eggs is accomplished by keeping hen house floors and nests clean, gathering the eggs daily and keeping the laying hens during muddy weather in dry quarters until afternoon, when most of the eggs will have been laid. Producers will find it more profitable to use the soiled eggs on the farm, and to market only the best quality product.

It is better to point with pride than to view with alarm.

Water in the Kitchen from an Outside Well.

A dug well, walled with sewer tile, with a pump in the kitchen, is here described by a farmer:

"A good well-digger dug the well at the rate of \$1 a foot in depth, and also placed the tiles in position. I used eight sewer tiles, twenty-four inches in diameter. Seven of these were in the ground and, each crock was two feet in height. This made a well fourteen feet deep, for we left one whole crock projecting out of the ground.

"This well was installed during that awfully hot and dry period of the summer of 1916 and we were indeed grateful to discover water the next day to a depth of eight feet. Several wells in the neighborhood went dry during this drought.

"The exposed portion of pipe under the house was covered with newspapers and boarded up to prevent freezing when winter comes, especially if we forget to let the water down at night by raising the pump handle all the way up to open the valve inside, as should be done for safety.

"The benefit of having the pump in the sink directly in the kitchen, can hardly be overestimated, especially during zero weather, when you are compelled to waste a couple of kettles of hot water to prime it, if outside.

"The one tile above the ground has several advantages. It is of a convenient height for a person to work at. It gives a good platform to set vessels upon, and is much cleaner. The ground dirt can not get on it, and it is out of reach of small animals which are very apt to fall in. The joint between the first and second crocks from the top was cemented shut. All other joints were left open to permit easy passage for the water. Our water is as clear as crystal and all the 'city folks' who visit us, delight in drinking it."

Tell Them So.

Tell the hired man he has done well when he does a good job. He is human, like the rest of us, and it will inspire him to do well all the time. Talk things over with him. Give him a chance to express his opinion about how work shall be done and what new plans shall be developed.

If you have a tenant on your farm, tell him you are well pleased with his way of doing things, if you are, and it may pay to stretch a point on this score.

Tell your tenant that you will put on some better cows this year, or do some other thing to increase the efficiency of the place. There is no surer way to hold a good man and to insure his doing the best possible for the place than to give him the best possible cows to work with, or extra good tools of any kind.

Some women would be wonderfully glad if they knew their husbands appreciated their efforts to keep the home nice and to have food that just fills the bill. This is not so easy for the good wife to do as you may suppose. She must not only have good food, but she must be prompt and on time. Then men folks are not always as considerate as they might be in this direction. They are very apt to storm round a good deal if things do not come round on tick. When you see the wife sweating and getting red in the face, help her and keep the men busy resting till the call to dinner comes.

Motor Mixtures.

There are now on the market numerous compounds or mixtures for motor-car engines. A number of these are simply gasoline with an addition of benzol, and the addition of benzol is an advantage for most engines.

However, on cars using cork floats in their carburetors, one precaution is necessary. Benzol attacks the shellac coating on the surface of the cork float, and with the shellac dissolved there is a tendency for the float to become soaked and heavy so that it loses its buoyancy and cannot function properly. This affects the operation of the engine and an excessive quantity of fuel may be consumed from a frequently little suspected and often hard to trace cause. Therefore, in using a fuel other than gasoline, make sure it contains no benzol, provide your engine has a shellac-coated cork carburetor float.

Above scene may seem peaceful, but such is not the case. Indeed it is the scene of much activity for it is a part of the mill of the Puget Sound Lumber Company of Victoria, B.C.

Home Education

"The Child's First School is the Family"—Froebel.

Shall I Take My Child to Town — By Marion Beal

Whether or not to take the young child to town is a problem that confronts the average mother, at some time or other, and one which requires a wise solution if she is to give the child the best care possible. She has been told that these trips to the city are injurious to the delicate nervous system of the young child, and having given much thought to his best interests she hesitates to take him anywhere.

To the mother who must take her child or children, or else stay at home, this is indeed a grave consideration. I have often seen these mothers, with two or three youngsters trailing petulantly and fretfully in their wake. One look at the little faces proved that it would have been much better for these children to have remained at home. The mothers, too, showed plainly the fatigue marks that support this conclusion.

Here the wisest solution is to ask the father occasionally to give his weekly half holiday to caring for the children, so that the mother may shop, free from the burden of keeping an eye on restless youngsters. Perhaps Dad will demur, but most men, not in a position to provide an assistant for the wife and mother, will be glad to perform this duty, if the reason for it is made clear.

However, it is to the mother who can leave the children in charge of a competent person, that I purpose to address this article. As a matter of course she leaves the children at home when she goes shopping. Yet perhaps she is often perplexed as to how to answer the repeated pleading of the youngsters to be allowed to "go with mother."

A solution of this problem may be found in a plan I have tried with great success. When my eldest boy was a little over a year old, I allowed him a short trip; that was the beginning. I had been attracted by a show window in a big store, a window full of gayly colored balloons, tossed about by a fan, and the next afternoon I took the year-old son to see this window. For half an hour he stood and crowded with delight, just

watching the gaily colored balls float about. And for a week he would clap his little hands and call "Blow." Of course on this trip there was no shopping to tire him; he was merely allowed to watch the fun, then taken directly home, and I found the small adventure did him no harm. Naturally, it was not repeated often, but as he grew older he was given opportunities to watch other windows, never, however, to the point of fatigue, nor was the trip topped off by a lot of rich candy and ice cream, although a simple treat, such as a milk chocolate, was sometimes allowed.

These trips, "window education" my friends call them, have proven really instructive, for as a direct result the children have learned many interesting things. They have seen wonderful displays of jewels, musical instruments, and goods from many foreign countries. They know just how silk, cotton and woolen goods are made from seeing replicas of these processes. They know how cigars are made, and how a piano is made. They have seen windows that in their appeal to the childish imagination have been a true delight; Easter windows and Christmas windows have afforded them pleasure that lasted for weeks.

More rarely, perhaps once in six or eight weeks, they see a really good motion picture, one that I have previously seen and found suitable. Of course they do not go if an epidemic is prevalent nor unless in perfect health themselves, and I take the further precaution of inquiring at the box office when the house is least crowded. Safeguarding them in these ways, I have found it beneficial to indulge the modern youngster's longing to go to the movies.

One feature that appeals to me very strongly in favor of this mild "going to town" is that the children are thus acquiring a natural poise, and are at ease with any person with whom they are thrown. They are learning to take an intelligent part in conversation, and while not forward, are not self-conscious and shy, as the child is apt to be if kept too much at home.

ing noise on the inside. It really was the oddest looking thing he ever saw. "When I finish my bread and honey," he thought to himself, "I'll climb up there and see what that is." And he turned quickly to take a big bite of his bread and honey without even looking at it.

Then "Ouchie Ow, Ouchie Ow!" Some bees from what Bennie thought was the big paper bag up in the tree had flown down to get some of the honey that was on Bennie's bread. They had stuck fast and when Bennie had taken the bite without looking, he had gotten one right in his mouth and it stung him.

Off the stone wall he jumped and down went the bread and honey with the rest of the bees into the dirt. Bennie went crying home with a very sore tongue and he thought he never would try to play a trick on anyone again.

A Doorway Gutter.

In rainy weather the drip from the roof over doorway is very unpleasant when going in and out. To eliminate this I made a gutter six feet long on the roof. This extends a foot and a half on each side of the door. The gutter is made of a piece of 1½x2-inch board, nailed onto the roof and pitched to drain two inches in the six feet. The tin for flashing was cut from an old kerosene can. This was pushed up an inch and a half under the shingle above and nailed, then pounded down into the V formed by the roof and a 1½x2-inch piece and over the top edge of the 1½x2-inch piece, where it was nailed again.

"Please, mother, am so hungry. Can't I have some bread and honey?" he asked. "Yes, Willie, you may if you will be careful with the crumbs," answered Mrs. Woodchuck. "I will be very careful, mother. I'll take it out doors to eat," said Willie. And so in a few minutes Willie was out in his swing munching a nice slice of home-made bread spread all over with honey and he certainly did like honey.

Just then Benny Fox came along on his way home from school. How good that bread and honey looked to Bennie. It just made his mouth water, and his dinner pail was empty. "Willie, let's get your little red wagon and take a ride down the south hill," he suggested. "That will be fun," said Willie. "Just wait a minute until I get my wagon." So, laying his bread and honey down in the swing, he scampered off after it.

As soon as Willie was out of sight Bennie Fox grabbed the bread and honey and ran down the road. "How fine my scheme worked," chuckled Bennie to himself as he climbed upon the stone wall just around the bend in the road so that he might fully enjoy his delicacy. It was just ready to take his first big bite when he spied something hanging from the branch of the tree above him.

"What can that be," he wondered to himself. He had never seen anything that looked like that before. It was like a big paper sack full of air, but there were some little black holes in it and he could hear a funny buzz.

This is a year of prizes, but no one has yet offered one for beating a train to the crossing.

LANDSCAPING WITH PIGS

The rest of the world submits quite too readily to the florists, the nurserymen and the landscape gardeners as the only farmers who contribute to the beauty and refinement of life.

Yet, being myself a horticulturist and a landscape gardener, I am ready to assert that I have more than once seen a Berkshire boar more genuinely beautiful than any Hydrangea paniculata grandiflora that ever grew. I will add that a good flock of well bred White Rock hens is more ornamental than a whole flower bed filled with geraniums. I once saw an alfalfa pasture full of young Hereford bulls, all of an age and all pure-bred, and in point of beauty they were fairly thrilling.

No, it will not do to assume that trees and shrubs and flowers are the only beautiful objects in the world.

Of course, the breeder of fine Short-horn cattle feels in his own heart that one of his well-fed steers is quite the handsomest object on the farm, but he stands quite ready to admit that his is a vulgar and uncultivated taste. On the contrary he ought to stand his ground.

For many years landscape gardeners have made use of swans, cranes, ducks and other poultry—which they have usually called ornamental water fowl—to decorate their parks.

Some of them have introduced doves and pretty pigeons to add life, variety and beauty to their lawns. Some of them have even put small flocks of sheep into their parks where they serve both to mow the lawns and to enhance the pictorial interest.

Yet this ornamental use of livestock has been rare on this continent. It ought to be more frequent. And in this branch of landscape gardening greater prominence ought to be given to the good honest breeds of farm livestock rather than to the conventionally ornamental varieties usually exploited.

A DELIGHT TO THE EYE.

As a specific suggestion there is the device of R. J. Pearce, landscape gardener, who has laid out many modern business farms, and who thinks it proper to include a show lot close to the farm buildings and fronting on the public road, where the farmer who is proud of his livestock can show them off to passers-by. Quite possibly they will make as brave a show as the hollyhocks in the garden or the weeping willow trees on the front lawn.

There is no legitimate reason, either, why good cattle should not be brought forward in the farm picture so that they can be seen and enjoyed from the windows of the farmhouse itself. If there is a half acre of lawn reserved for the farmhouse yard it would still be possible for such truly ornamental livestock to graze within fifty or one hundred feet of the windows and porches to everybody's delight and certainly to nobody's detriment.

For my part whenever I visit anybody's farm I am always a great deal more anxious to see the pigs, the cattle and the apple trees than any so-called ornamental flowers, shrubs or trees whatsoever.

It is full time that serious and healthy people began to recognize the beauty and dignity of good well-kept farm land, of farm crops and of livestock. It is time that the landscape gardeners understood these matters and some of them do. More especially is it time that the livestock men understood, but some of them don't.—Frank A. Wau.

Washing Dairy Utensils.

Such a thing as washing milk pails seems so simple a process that to mention it invites ridicule, yet a lot of folks forget that to do the work thoroughly there are four distinct and separate steps to be followed.

The steps in order are: Washing, rinsing, scalding and drying. The first step is the actual washing of the utensil. Cold water should be used first because hot water will cause the milk to adhere to the sides of the can and make it harder to remove.

After the milk has been washed out with cold water, then hot water and a cleansing powder may be used. Soap is a poor cleanser for dairy utensils as it is very hard to rinse off. An alkali powder seems to cut the grease much better, but that alone will not do the work. The scrub brush must be used.

Rinsing is so easy that many tend to neglect it, or at least half do it, thinking that it isn't essential. The washing powder must be removed.

Hot water should be used for this instead of cold water, as the latter will harden any grease that might have remained on the surface with the powder. Just the pouring over of hot water will not be sufficient. Again the brush should be used.

The purpose of scalding or sterilizing the utensils is to kill all the bacteria present. Hot water will not do it; it must be boiling. The utensils should be held in the water long enough until they have become of the same temperature as the water.

Drying seems like a small item, but the woman who made the highest scoring pound of butter during a recent contest emphasized the airing and sunning of the separator and milk utensils every day.

The kindness you radiate is the only kindness you retain.

The Young Girl's Corset

is a most important item. Much damage can be done to her health and figure by badly-fitting corsets. But she will be sure to find a

which will combine comfort with the support she needs. Not only will it fit her perfectly but its durability and the fineness of its workmanship are unexcelled.

The Transcript

Published every Thursday morning from The Transcript Building, Main Street, Glencoe, Ontario. Subscription—in Canada, \$2.00 per year; in the United States and other foreign countries, \$2.50 per year.

Advertising.—The Transcript covers a wide section of territory in Western Ontario, and its readers are the leading farmers and townpeople. It is a first-class advertising medium. Rates on application.

Job Printing.—The Jobbing Department has superior equipment for turning out promptly books, pamphlets, circulars, posters, blank forms, programs, cards, envelopes, office and wedding stationery, etc. A. E. Sutherland, Publisher.

WIDELY-KNOWN ORATOR COMING

Geoffrey F. Morgan to Lecture at Chautauqua Here.

Audience Will Hear Notable Address on Topic of Universal Interest.

"Success with Ease" is the subject of the lecture to be delivered at the coming Dominion Chautauqua by Geoffrey F. Morgan, well-known lecturer and humorist.

"Success with Ease" is full of sound philosophy, good humor and common sense. It deals with the qualities that

GEORGEY F. MORGAN

make for success in life, and is a Chautauqua favorite.

Mr. Morgan has made for himself a high place on the lecture platform. Wherever he appears there are always insistent demands for a return engagement.

He is known to thousands of people through his many contributions to leading educational publications.

THE HANDLING OF MILK

A Column Dealing With Milk and Its Products

Pasteurization — Preservatives — Commercial Buttermilk — Cheese — From High and Low Testing Milk. — Milk From Sweet Clover — Gelatin and Bacteria in Ice Cream. (Contributed by Ontario Department of Agriculture, Toronto.)

Following are summaries by the Department of Extension of the O.A.C., Guelph, of work done in that institution with milk and some of its products:

Value of Pasteurization.

To test the value of pasteurization as an acid in keeping milk in a usable condition for a long period, a study was made by the Dairy Department of the Ontario Agricultural College during July of 1923. Similar samples of raw and pasteurized milk subjected to a temperature of 53° to 54° F. gave results as follows: The raw milk did not keep for twenty-four hours, while the pasteurized milk was sweet at end of third day. Similar samples of raw and pasteurized milk held at 37° to 43° F., gave the following results: The raw milk kept sweet for less than forty-eight hours, while the pasteurized milk was still sweet and in good condition at the end of two weeks. The trials show the great value of pasteurization in the fluid milk trade and the necessity of low temperatures for holding the milk after pasteurizing.

Milk Preservative.

Investigational work carried out by the Department of Bacteriology, O.A.C., that is of special interest to the cheesemakers and managers of factories, was concluded during the past year. Many factors had been experienced trouble in keeping the composite samples of milk in good condition for the period required by the Dairy Standards Act. The result of the O.A.C. Bacteriological Department investigation shows that not less than six grains of corrosive sublimate is required to keep a one pint sample in good condition for forty days. This amount should be used if the butter fat tests are made either once or twice a month.

Commercial Buttermilk.

In the Dairy Department of the Ontario Agricultural College during the past season a few lots of commercial buttermilk were made by using either pasteurized skim-milk, or the buttermilk from churnings of pasteurized sweet cream, not ripened before churning.

To the milk was added 20 per cent. water, 5 per cent. culture and one-half ounce of salt per one hundred pounds of milk. This was allowed to stand until the next morning when it was nicely coagulated. The coagulated milk was then poured into the churn and churned for about twenty minutes. This made a buttermilk that was in good condition, had good flavor, was smooth, and did not separate. After churning one lot for fifteen minutes a small amount of cream was added. The churning was then continued and in nine minutes the cream had churned into fine buttermilk granules which gave it the appearance of "old-fashioned" buttermilk and was well liked.

Comparative Yields From High and Low Testing Milk in Cheese-making.

Investigations carried out by the Dairy Department and the Chemistry Department of the O.A.C. College with low and high testing milk used in the manufacture of cheese gave results that are interesting to cheese factory patrons. The low testing milk contained 12.03 per cent. solids and 3.41 per cent. fat. The high testing milk contained 12.29 per cent. solids and 3.62 per cent. fat—not very much difference between the two samples. The yield of cheese per 1,000 lbs. of milk was \$9.85 lbs. from the low testing lots, and \$5.84 lbs. from the higher testing lots, or nearly six pounds of cheese more per thousand pounds of milk for a very small increase in the percentages of fat and total solids. This is further evidence of the injustice of paying for milk on the basis of weight, and not considering the fat and solids content of milk when dividing money among patrons of cheese factories.

Milk From Sweet Clover.

The Dairy Department of the Ontario Agricultural College made four lots of butter during July when the cows were pasturing on sweet clover. The butter was scored when fresh, and again after holding in storage, but none of it had a flavor that could be attributed to sweet clover. These results are similar to those obtained in 1922.

Gelatin and Bacteria in Ice Cream.

With the great increase in the consumption of ice cream and the development of the ice cream manufacturing business various schemes have been evolved to take care of the demand in a way profitable to those manufacturing and selling this food. In making examination of various samples of gelatin sent to the Bacteriology Department of the Ontario Agricultural College some samples were found to have a bacterial content as high as 960,000 per gram. While some ice cream cannot be made if low grade gelatin is used in its preparation.

Cowpeas.

As a rule cowpeas should not be cut for hay before the pods begin to turn yellow. The best quality is produced and the hay cures most readily if the vines are cut when most of the pods are full grown and a considerable number of them are mature. At that stage of growth none of the best hay varieties will have dropped their leaves and the plants will have practically attained their full growth.

Here and There

British Columbia's agricultural production last year increased in value \$4,000,000 over the 1922 period, figures compiled by the provincial Department of Agriculture show.

A steady increase in the volume of wheat exports from Canada is noted in the monthly statement just issued by the Dominion Bureau of Statistics. In April, 1924, 6,085,465 bushels in all were exported, as against 5,143,304 in April, 1923.

It is anticipated that hundreds and thousands of visitors to the beautiful Annapolis Valley, Nova Scotia, will help to celebrate the famous fruit-district's "Apple Blossom Sunday," which falls on June 8th this year. The entire orchard belt, extending from Annapolis Royal to Windsor, a distance of about 80 miles, is always white and pink with blossom in the first part of June.

Hon. Honoré Mercier, Minister of Lands and Forests, speaking of arrangements made in the province for forest protection this year, stated: "I really believe that the way the service is organized and with the good-will manifested by all classes of the community, who realize the importance of protecting your national domain, the year will be a good one and the losses reduced to a minimum."

The report of the statistician to the board of grain commissioners for April, recently issued, records the heaviest spring great lakes shipping season on record. The report says that there are indications that all the surplus of the western crops will be moved as fast as transportation facilities permit, as export purchases are to be heavier than usual and all ocean tonnage out of Montreal for May and June has already been engaged, as well as part for the July loading.

Something new in the way of railway equipment is the new storage battery now operating over Canadian Pacific lines between Galt and Hamilton. The car attains a speed of 35 miles per hour and makes two trips a day in each direction. It has three compartments: general, passenger, smoking and baggage, is of all-steel construction and will accommodate 50 passengers. The service is giving to the people of the district.

Interviewed in Vancouver as to the success of the round-the-world cruise completed on May 24th by the "Empress of Canada," E. W. Beatty, said:

"To gauge the success of the 'Empress of Canada's' round-the-world cruise one has only to ask the passengers their opinion of the entire trip. I spoke to several while crossing the Pacific and without exception they all expressed their complete satisfaction with the ship, its officers and the arrangements made and carried out since the day they left Vancouver, almost five months ago."

"That is good enough for me. It is simple demonstration that the Canadian Pacific can successfully conduct cruises in competition with any organization in the world and maintain that company's standing as a credit to Canada. The 'Empress of Canada' has carried the Canadian flag over the seven seas and into most of the world's great ports, and the missionary work she has done for Canada in the various countries touched should not be lost sight of. As one result of the undoubted success of this cruise, we look forward with renewed interest to the Canadian Pacific cruises of next season. These include the West Indies, the Mediterranean and another round-the-world cruise which will be made by the 'Empress of France,' already overhauled and fitted with a view to providing the greatest possible comfort for the passengers. The experience gained this year will greatly help in enabling us to make these cruises even more successful than those recently completed."

SLUGGISH LIVER DURING SPRING CAUSES POISON!

This is the time of year when your liver becomes sluggish and your intestines become clogged up with poisonous waste. Your liver does not properly purify blood that flows to your skin. The result is sallow complexion, dark circles and pimples, coated tongue and bad taste morning. As these poisons continue to flood your system, your resistance is lowered, you feel dull and tired and sick.

Make this test! Cleanse and tone your liver with Dr. Thacher's Liver and Blood Syrup. Contains pure ingredients prescribed by physicians. Helps nature strengthen your stomach, soothe tired and overtaxed nerves, brace up system, and purify your blood. Notice quick difference in way you look, eat, sleep and feel. You, too, will be satisfied, as others have, or no cost.

Dr. Thacher's is sold and recommended by P. E. Lumley in Glencoe.

THE PACE THAT WINS

A country of wealth is not necessarily a place where money is piled up in banks or invested in securities. It is rather a place of happy homes, and plenty of hard work, and reasonable reward therefor. There is no country on the globe offering such an opportunity for a good living as Western Canada. Easily gained dollars in the past have been to many a handicap rather than a prod to greater activity. Any change taking place in this land today must be a change back to harder work and contentment.—Winnipeg Tribune.

COURTESY

Last evening a little girl, perhaps seven years old, came into the Herald office. She asked two or three questions, and was given a ray of sunshine. It was the delightful way she said "Thank you very much" for the information she sought.

That's the quick road to anyone's heart—courtesy. Its appeal is instantaneous and lasting. She will never be lacking in friends, with refinement like that.

There are plenty of contrasts. It is ever so slight a shock, for instance, to read the curt signs, "Keep Off" posted here and there on the lawn at the Hamilton Public Library and elsewhere. In the more sensitive moments one wonders whether "Please" wouldn't improve these grass warnings at the civic centre of culture.—Hamilton Herald.

Mortgage Sale

— of —

Valuable Garage Property IN VILLAGE OF GLENCOE

Under and by virtue of the powers contained in a certain mortgage, which will be produced at the time of sale, there will be offered for sale by public auction at the McKellar House, in the Village of Glencoe, at 3 o'clock in the afternoon on SATURDAY, JUNE 28th, 1924, the following property namely:

In the Village of Glencoe, in the County of Middlesex, containing one-seventh of an acre or less and being composed of the southerly thirty-two feet of village lot number four and the northerly six feet of village lot number three in block "C" on the west side of Main Street in McDonald and Ross' survey of part of lot number one in the second concession of the Township of Mosa, according to registered plan No. 159, which said parcel of land is more particularly described by metes and bounds in said mortgage, together with a right-of-way to and from the said parcel of land over a strip of land twelve feet in width and extending southerly along the easterly limit of lot number eleven in said block "C" from Sykes Street to the above described land and abutting the same in common with adjoining owners and licensees.

This property is well situated on Main Street in the Village of Glencoe and has on it a large and substantial brick garage in first-class condition, together with valuable equipment installed as fixtures thereon.

Clearing Sale

Farm stock and implements and farm, on lot 15, con. 2, Mosa, on Thursday, June 19th, at 1 o'clock:— Bay gelding 6 years old, 1500 lbs.; bay gelding 10 years old, 1350 lbs.; bay mare 8 years old, 1400 lbs.; brown mare 3 years old; bay mare 3 years old; bay mare 5 years old; brown gelding 4 years old; (horses are all first-class and well bred); cow 7 years old, milking; cow 3 years old, milking; Cocksbutt disk drill, fertilizer attachment, good as new; Cocksbutt Beaver gang plow, Judy bottom; walking plow; set of wooden harrows; disk harrow; steel roller; steel hay rake (Cocksbutt); scuffer; 40-gallon galvanized steel oil tank; pair heavy bobslings; 2 single buggies; heavy lumber wagon; hay rack; gravel box; wheelbarrow; Daisy churn and butter worker; 30-ft. extension ladder, good as new; framer's boring machine, with set of augers; 2 iron sugar kettles; set of double harness; 2 sets of single harness; set of double driving breast collars; extra harness with lines for a three-horse team; whiffletrees, neckyokes, logging chains, spades, shovels, hoes, post auger; bucksaw, crosscut saw, and other useful articles too numerous to mention. Everything must go; no reserve, as the proprietor is giving up farming owing to ill health.

Terms:—Shuts of \$10 and under, cash; over that amount, 6 months' credit on furnishing approved joint notes; discount of 10 per cent. per annum for cash on sums entitled to credit.

The farm of 80 acres, lot 15, con. 2, Mosa, with good buildings, will be offered for sale at the same time and place, subject to reserve bid. Terms made known day of sale.
J. J. JOHNSTONE, Proprietor;
H. D. McNAUGHTON, Auctioneer.

The New Master Six Double Service Sedan

HERE is a practical, comfortable and economical closed car for five passengers, built for strenuous, everyday, business service, yet eminently appropriate for family motoring. Notwithstanding its low cost, this double service Sedan is equipped with the new, more powerful, automatically lubricated McLaughlin-Buick Motor, the well-balanced, 120-inch wheelbase chassis, the new tested 4-wheel brakes and every other mechanical feature which has made the 1924 models of "Canada's Standard Car" the season's outstanding values.

Plantation Jubilee Singers Popular Chautauqua Attraction

The Plantation Jubilee Singers, colored singing organization of note, will be heard at the coming Dominion Chautauqua in splendid programs ranging from folk-like plantation melodies to religious hymns and spirituals.

The Plantation Jubilee Singers have appeared with great success before representative audiences everywhere. They are educated people and trained musicians who represent the best attainments of their race.

The music which they will feature here is that of the American negro. It was conceived during the old plantation days in the United States. This type of music possesses a rhythm and melody found, perhaps, in the music of no other race. Negro folk songs and plantation airs are familiar to everyone.

The programs of the Plantation Jubilee Singers will contribute greatly to the enjoyment of Chautauqua audiences here.

Tait's Corners anniversary services were largely attended on Sunday last, when Rev. Dr. McIntosh, of London, preached excellent sermons both afternoon and evening. Special music was rendered by the choir.

The funeral of Mrs. Mary Auld, widow of the late John Auld, who died on Saturday at the home of her son, John Auld, Melbourne, was held on Monday afternoon at Delaware. Mrs. Auld was in her 98th year, and is survived by one son, John Auld, of Melbourne.

Peter McNeil's farm in Metcalfe was sold by auction by L. L. McTaggart at the McKellar House on Saturday afternoon to Wm. A. Walker, of Metcalfe, for \$5,550. Mr. McNeil is having a clearing sale of farm stock and implements on Tuesday, June 17th, having decided to retire from farming.

The boys' and girls' calf feeding competition will be a feature of the Western Fair again this year, and is creating a great deal of interest among the boys and girls and stockmen generally. Fourteen prizes at least will be awarded ranging from \$75 to \$10. Particulars may be had from the secretary, W. D. Jackson, London.

A number of ladies from Glencoe and neighboring villages attended an interesting meeting of the Presbyterian W.M.S. District Conference at Tait's Corners church on Tuesday afternoon. Splendid addresses were given by Mrs. McEvoy, of London, and Mrs. Gauld, of Port Hope. Musical numbers were given by Miss King and Miss Hazel McAlpine, of Glencoe.

A local tournament was held at the bowling green on Wednesday afternoon of last week, in which five rings of bowlers participated. The next tournament will be held on Wednesday afternoon, June 18. All those interested are invited to be at the green at 1.30, when a draw will be made. Any new members wishing to bowl will please give their name to R. M. MacPherson, secretary, or James Poole, president.

The Canadian National Railways, acting in conjunction with the Glencoe Horticultural Society, have placed three flower beds in their yards here and in another prominent spot have placed a marker in white cobblestones showing "Glencoe," that he who rides may read. These are the beginnings of a purpose to make the surroundings at the railway station attractive and give travelers a good impression of the town. The co-operation of the C.N.R. in this respect is greatly appreciated.

Glencoe Oddfellows will observe the 105th anniversary of the Order on Sunday, June 15th, when Divine service will be held in the Methodist church at 11 o'clock, conducted by Rev. A. S. Whitehall. Members of the lodge will meet in the rooms at 10.30 a.m. and 2.30 p.m. In the afternoon the graves of deceased brethren in Oakland cemetery will be decorated. At the same time the Daughters of the Empire will decorate the graves of Great War veterans. Oddfellows are asked to leave flowers at J. W. Smith's not later than Sunday morning.

PERSONAL AND SOCIAL

Miss Louise Garbutt, of London, is visiting friends in town.

Miss Annie Aldred is home from New York for the holidays.

Mrs. Irvine Wood, of Rutherford, is visiting her sister-in-law, Mrs. Mac, McAlpine.

Mr. and Mrs. John Hayter motored to London and spent Sunday with friends there.

Miss Jessie Currie, of Court right, spent the week-end with her aunt, Mrs. David Currie.

Mr. and Mrs. Chas. Olde returned home after Saturday evening a week with friends in Detroit.

Mrs. Luckham and daughter Lorna returned home on Friday evening, after wintering in Florida.

Mr. and Mrs. Walter F. Vaughan and son Donald, of Buffalo, are spending a week with Mrs. Vaughan's brother, J. D. Smith, en route to California.

Mr. and Mrs. Richard Singleton were in London on Monday attending the funeral of their brother-in-law, Thomas Lyons, who died suddenly at his home there Friday evening.

Visitors at the home of Mr. and Mrs. J. A. McCracken on Sunday were Mr. and Mrs. Angus Graham, Miss Lizzie McCracken and Mrs. Archie Graham and daughter, of Thamesville.

BOOSTING WESTERN ONTARIO

In these days of motor cars there are few places in Western Ontario which are not within reasonable distance of water and good bathing beaches. In addition, there is more charming tract of country in the world than Western Ontario, with its beautifully wooded, rolling country, with its innumerable prosperous and happy small cities, towns and villages, prosperous and attractive countryside. There is no district in Canada and few on the continent where there is such a happy combination of urban and rural life as in Western Ontario. There is no "better" place than this for the great peninsula. Let us one and all resolve to be boosters of Western Ontario.—London Free Press.

The true test of chivalry is changing tires for a lady while wearing white flannel pants.

AUCTION SALES

Farm stock and implements, on north half lot 19, con. 14, Metcalfe, on Tuesday, June 17th, at 1 o'clock—Mare 10 years old; horse 9 years old; cow 10 years old; cow 6 years old; heifer 3 years old; steer 2 years old; heifer 2 years old; heifer 1 year old; steer 1 year old; calf; M.H. binder, 6-ft. cut; Deering mower, 6-ft. cut; M.H. hay rake, 10-ft. wide; seed drill; Bissell disk; plow; 2 sets iron harrows; spring-tooth cultivator; wagon; buggy; cutter; darning mill; portable blacksmith's forge outfit; set woven wire fence stretchers; set double harness; set single harness; half mow hay; grain bags; Anchor, 50-lb. cream separator; barrel churn; gobbler; 2 turkey hens with young birds; about 60 hens; whiffletrees, neckyokes, and other articles too numerous to mention. As the proprietor has sold his farm everything will be sold without reserve. Peter McKellar, proprietor; L. L. McTaggart, auctioneer.

Farm and household effects, on south half lot 1, range 3 south of L. W. road, Mosa (known as the Clana farm) on Wednesday, June 18, at 1 o'clock—Polled Angus steer 3 years old; Hereford cow 5 years old, not in calf; frost window blind; 2 front window side blinds; 3 front window curtains; 2 north end window blinds; 2 north end window curtains; west window blind and curtains; small table, ash; secretary, oak; 4 plain chairs; 2 rockers; rug 9x11, Brussels; 2 rag rugs, small; Gurney Co. No. 25 cedar chest; wood; bedroom dresser; ash wardrobe; small table with drawers; large bedroom pitcher, 2 glasses; metal bedstead, white; mattress; 4 window blinds; ash kitchen cabinet, with utensils; National cook stove, with pipe; dining table; 3 kitchen chairs; dishes and cutlery; 2 smoothing irons and handles; new walnut (solid) bedstead, and mattress; new walnut (solid) dresser, (vanity table); new walnut (solid) chiffonier, mirror; 3 window blinds, very wide; 2 blinds and curtains; hall blind and curtain; ash bedstead and mattress; drum stove; coal oil stove; 12 feet rope; hand saw; bucksaw; lantern; sprinkling can; hoe, brush hook, rake, mop, axe, garbage pail, coal oil can, wash board, boiler, gallon measure, lawn mower, all new or in good condition; Ford truck and "roadster" (Ford roadster with box for trucking); wheelbarrow; 18 lengths stove pipe; 200 sap buckets. Terms on household effects, 2 head of cattle and Ford truck, cash. The farm above described contains 119 acres, more or less, and has a dwelling house and barn on it. The farm will be offered subject to a reserve bid. Conditions made known at time of sale. Merritt & Co., proprietors; L. L. McTaggart, auctioneer.

GLENCOE

The indications of worms are restlessness, grinding of teeth, picking of the nose, extreme peevishness, often convulsions. Under these conditions one of the best remedies that can be got is Miller's Worm Powders. They will attack the worms as soon as administered and they pass away in the evacuations. The little sufferer will be immediately eased and a return of the attack will not be likely.

Say it in The Transcript.

Here and There

Shipments of grain from the Grande Prairie and Peace River districts over the Edmonton, Dunvegan and British Columbia Railway during the past season have totalled 2,471,000 bushels of wheat and 1,700,500 bushels of other grains.

The longest solid train of red cedar edge grain shingles ever hauled across the continent left Vancouver, B.C., recently for Chicago and the Eastern States. Several other long trains of this product will be shipped in the near future by the Hunting Merritt Lumber Company, by whom the consignment was forwarded.

A despatch recently sent from London states that Professor Carlyle, of the E. P. ranch, is sailing for Canada shortly, taking back with him a number of brood mares and other stock for the ranch. The Prince of Wales continues to evince the deepest interest in all the doings of the ranch and keeps in close touch with things there.

Approximately the same acreage as produced the West's bumper crop last year will be under cultivation this season. The outlook now is that over 14,000,000 acres of land will be ready for seed under generally favorable conditions. The estimated acreage to be seeded this year, by provinces, is as follows: Manitoba, 4,450,400; Saskatchewan, 3,354,190; Alberta, 3,472,315.

The value of boots and shoes exported by Canada during the year ended March, 1924, more than doubled the value of Canadian boots and shoes bought by other countries during the preceding year. Last year the exports were valued at \$304,913, and for the preceding year at \$130,034. The United States was the chief buyer, taking 2,227 pairs, with Japan second, taking 1,628 pairs.

Concluding her round-the-world cruise, the palatial Canadian Pacific steamship "Empress of Canada," docks at Vancouver on May 24th. Reports indicate that this four-months' pleasure voyage under the genial care of Captain Robinson, hero of the Japanese disaster, has been a splendid success, the passengers being loud in their declarations of satisfaction.

During the fiscal year ending March 31st, 1924, Canada imported goods to the value of \$893,335,491, an increase of \$91,000,000 compared with the previous similar twelve months, while she exported \$1,045,141,656, an increase of about \$10,000,000. The total trade increased in that twelve-month period by about \$210,000,000, compared with the corresponding period a year ago.

It is expected that negotiations between the British Government and the Province of British Columbia will lead to the settlement of several shiploads of immigrants from the British Empire in the province this summer. Each Government proposes to grant \$300, or \$600 in all, to each family and shelter will be provided them close to the sea, where they can engage profitably in their accustomed pursuit, fishing.

The itinerary of the personally conducted tour of the Canadian Teachers' Federation, en route to their annual convention to be held at Victoria, B.C., August 12th to 16th, has just been announced. Starting from Toronto, a special train for the teachers will proceed west by Canadian Pacific Railway, halts being made at Western Canada's chief points of beauty and interest. It is expected that about 150 will make the trip.

That Sweden is capable of sending 25,000 men to Canada as immigrants yearly was the statement of Otto Elander, prominent Swedish editor, when in Montreal recently. Mr. Elander is touring Canada with the object of studying conditions as they exist in Sweden, settlements here and reporting upon them to his fellow-countrymen desirous of immigrating to this country.

CHEVROLET

A Canadian Car for Canadian Conditions

FEW cars can boast of being so thoroughly Canadian-made as Chevrolet. With the exception of certain essential motor car accessories not now made in Canada, Chevrolet cars are built, not merely assembled, in Canada.

Motors, axles and other heavy parts are made in the mammoth General Motors plant at Walkerville; while body-building, top-building, small-parts making, assembling and finishing is done at Oshawa.

Hence, every dollar you pay for Chevrolet helps build up a strong Canadian industry that is giving employment to thousands of Canadian workmen.

There are many other reasons, moreover, why you should investigate Chevrolet.

Chevrolet stands up, winter and summer, under Canadian conditions of road and climate—and delivers quality transportation at a lower cost per mile than any other car.

And Chevrolet price, though it is much lower than you would expect to pay for a car so fine, is the full cost of the car and its equipment—there are no extras to buy.

Before you buy a car at any price, have us demonstrate the superior features and equipment of Chevrolet.

Ask us about the GMAC Deferred Payment Plan

for Economical Transportation.

Wedding Invitations

New and Correct Styles at The Transcript Office

Dominion News in Brief

Victoria, B.C.—The following big industrial undertakings are projected for the immediate future: a valve plant at North Vancouver to cost \$150,000; a \$400,000 logging railway up the Chehalis River Valley; a \$100,000 hospital at Nanaimo; a \$200,000 sawmill at Port Coquitlam; a \$1,000,000 plant at Chemainus; a \$200,000 amusement centre at Victoria; about \$10,000,000 in power plants in the Stave Lake district; a \$1,250,000 expenditure on a provincial highway through the Fraser River Canyon. In addition, there are hundreds of small lumber mills, fishing undertakings, small manufacturers, etc., in course of construction.

Calgary, Alta.—Alberta seed growers are looking to this year being the most prosperous ever known in the seed-growing industry. During the past few years they have brought great honor to the province and themselves in securing the highest awards available at the Chicago International Hay and Grain show. Alberta growers, in 1923, produced and marketed more registered seed than all the other provinces of Canada. In the marketing of this seed, it has been distributed throughout the Dominion as well as many parts of the United States.

Regina, Sask.—During the year ended June 30, 1923, 1,462,288 pelts, valued at \$2,242,835, were taken in the Province of Saskatchewan, according to returns made by the chief game warden. Of the total value, muskrat accounted for more than 50 per cent. Royalty collected by the province on these pelts totalled \$89,568.

Winnipeg, Man.—Spring seeding has been carried on under favorable conditions and rapid progress has been made. Although showery in some

sections, splendid drying weather has prevailed and, notwithstanding that seeding is from ten days to two weeks later, indications are that work will conclude quite as early as last season.

Toronto, Ont.—Comparative figures on the hydro power installed in the United States and Canada, show that the latter is far in the lead in the matter of horse power installed per 1,000 of population. According to the latest figures the United States has 10,455,000 h.p. of installed water power, as against Canada's water power installations of 3,227,414 h.p. The horse power per 1,000 population in the United States is 95 h.p., but in Canada it is 350 h.p. per 1,000 people.

Montreal, Que.—That Canada now has considerable sums invested in foreign securities is the statement of the Bankers' Trust of New York, which has made a careful survey of foreign investments held by Canadians. In accordance with the accepted British policy of financing buyers of domestic products, at the close of 1923 Canadian banks were loaning to residents of foreign countries in the neighborhood of \$350,000,000. Direct foreign investments, other than bank loans, aggregated in 1921 over \$400,000,000. St. John, N.B.—Prospects are very bright for an active building program here this year. It is expected that a number of public buildings, such as schools, etc., will be erected, while several industrial companies have announced their intention of remodeling or enlarging their plants.

Bridgewater, N.S.—The quantity of lumber and laths produced in this district during the past winter is appreciably larger than in recent previous seasons, and if satisfactory sales can be made, considerable benefit should be reflected from this source. Up to the present time no difficulty has been experienced in disposing of laths.

Above is shown the "roll call" of the Strachan family from Dennistoun, Glasgow, who sailed to Canada from Glasgow on the Marburn. Mr. Strachan is a miner and he hopes to make miners out of the eight boys in his family of nine.

104 MILES AN HOUR IN "MILITARY ZENITH"

Col. Vuillemin Wins French Aviation Trophy in 1,756-Mile, All-day Flight.

A despatch from Paris says:—By flying 1,756 miles over the "Military Zenith" course at a rate of 104 miles an hour, including stops, Colonel Vuillemin has established a new record and captured the most important French aviation trophy.

The "Military Zenith" competition involves an all day flight twice covering a circuit formed by a chain of cities, including Paris, Tours, Chartreuse, Lyons, Strasbourg, Metz, Dijon, and a return to Paris. The 1,756 mile route has tempted all the greatest military pilots.

Colonel Vuillemin, flying the larger part of the day in heavy rain and against a nasty wind for the rest of the journey, accomplished the total distance in sixteen hours, fifty-four minutes and thirty-four seconds, representing an average speed of 104 miles an hour. The previous record holder, Sergeant Major Bonnet, made a speed of 101 miles an hour.

Colonel Vuillemin started from the Villa-Coubly Aerodrome Wednesday morning, just after four o'clock, and was back ten minutes after his long flight over the whole eastern half of France. Twenty minutes later he started again for the second circuit. He checked back at Villa-Coubly a few minutes before nine o'clock.

Gen. Smuts is More Sure of Election Victory

Capetown, June 8.—After concluding a three-weeks' tour of the constituencies, Premier Smuts gathered that the prospects for the Government's return in the Union general election, which takes place on June 17, are excellent.

Supporters of the Nationalist-Labor pact have made the very grave mistake, says the Premier, of regarding the result of recent by-elections as an index of what will happen in the general election. They began their campaign on small and petty issues, overlooking the fact that the people view the general election from an entirely different angle, and forgetting that the whole policy of the pact parties in the past and for the future would come under review. Supporters of the pact are now discovering to their dismay that the pact itself is really the great issue of the election.

STORAGE ELEVATORS AT BRITISH PORTS

Facilities for Moving Canadian Wheat Planned by Labor Government.

A despatch from London says:—Provision of storage elevators at British ports to afford facilities for the movement of Canadian wheat in British bottoms from Vancouver is a plan understood to be engaging the attention of the Labor Government as an alternative to the Imperial Preference. So much interest has been taken by Labor members in the scheme that Hon. Geo. Hoadley, Minister of Agriculture for Alberta, was asked to take it over with Labor members interested in Empire affairs. Liberal members have also expressed approval of the scheme.

The plan would in all probability ultimately resolve itself into a co-operation agreement between the Alberta wheat pool and interests on this side, whether Governmental or private, which would construct storage elevators. It is urged in its favor that a large part of the grain shipped via eastern ports passes over American railways, is loaded at American ports and financed by American money.

Frenchmen Build Bridge in Twenty Minutes

A despatch from Paris says:—A remarkable engineering feat was accomplished recently near Beziers, on the Bordeaux-Cette Railroad line.

A steel bridge weighing ten tons was put into place by man-power in twenty-one minutes. An extra twenty minutes were required to fix the bridge and replace the tracks.

Forty-nine minutes after commencing the work traffic on the line was resumed.

British Use Airplanes to Hunt Fish Supply

A despatch from London says:—Following up its policy of trying to beat swordfish into plowshares, the British Labor Government plans to use war airplanes in catching fish. It is proposed to have planes locate shoals of fish in northern waters, it was stated on behalf of the Government, in the House of Commons. Six planes will be employed in the service beginning next month.

Rehearsing for the Royal Naval and Military Tournament at London, these men are carrying a field gun across a chasm by means of a trapeze.

The Week's Markets

TORONTO.

BRITISH EXPEDITION TO EXPLORE ARCTIC

Two Ships and Seaplane to be Used by Binney Exploration Party.

A despatch from London says:—The British Arctic expedition organized by George Binney will shortly sail from Newcastle. Two ships have been chartered—a 300-ton Norwegian whaler and a small Norwegian sailing ship. A seaplane specially designed for Arctic reconnaissance work will accompany the expedition, which has the support of the Royal Geographical Society, the Air Survey Committee of the War Office and the Air Minister. The chief object of the expedition is to explore North Eastland, an island to the northwest of the main Spitzbergen Island. Other objects are to beat the farthest north record of sailing in navigable waters and to investigate the northwest of the Franz Joseph Archipelago.

Col. S. E. Tennant is to lead the sledging party in North Eastland, and Lieut. Aldous will conduct the ground survey. The party will include Captain Helmer Hansen, who was at the South Pole with Amundsen.

Irish Free State Appoints Kennedy Chief Justice

An official announcement was made that Hugh Kennedy, Attorney-General for the Irish Free State, has been appointed Chief Justice and Timothy Sullivan, president of the High Court of Justice. Mr. Kennedy resigned his seat in the Dail Eireann and his post of Attorney-General.

Both Mr. Kennedy and Mr. Sullivan are well known Irish lawyers.

Squadron Visits Honolulu En Route to Canada

A despatch from London says:—The vessels of the Special Service Squadron, which is touring the Empire under the command of Vice-Admiral Sir Frederick Field, are due to arrive soon at Honolulu, the first port of another power at which they have called since leaving England on November 27, 1923. The squadron will remain at Honolulu until June 12, when it leaves for Canada. The battle-cruisers Hood and Repulse and the light cruiser Adelaide will proceed to Victoria, B.C., and the light cruisers Delhi, Danae, Dauntless and Dragon to Esquimaux.

Britain Pays United States \$69,000,000 in Cash

A despatch from Washington says:—Great Britain is to make a payment of \$69,000,000 in interest on her war-time indebtedness to the United States on June 15, and it probably will be made in cash this time. Instead of Liberty bonds, as all of the Liberty bond issues are being quoted at par or better.

Treasury Department officials said today that they had received no notification from the British Government as to the form in which the payment would be made. It was generally accepted, however, that the British Government would select the most economical method, and make payment in cash.

Alberta Coal Moved to Ontario Points at \$6.50 Ton

A despatch from Edmonton says:—Following discussions between the Government at Ottawa and Premier Greenfield of Alberta, a proposition has been forwarded to Premier Mackenzie King that one hundred thousand tons of Alberta coal for points in Ontario be handled this summer at a freight rate of \$6.50 per ton, the Dominion Government guaranteeing the railway from loss on its movement if this rate proves actually less than operating cost.

Early action is asked for and there is reason to believe that the Government's answer will be favorable.

A life begets a life till they come to generations.

People would have better health if they would remember that their stomach is a work room, and not a play house.

CURE FOR GANGRENE CLAIMED BY THE FRENCH MEDICAL ASSOCIATION

A despatch from Paris says:—A serum will cure gangrene and peritonitis. Experiments were begun during the war by Prof. Michael Weinberg of the Pasteur Institute in Paris, and Dr. Benjamin Jablons, Major in the American Medical Corps. It was perfected and given to the world through the French Medical Association. The chief value of the serum during the war was to prevent gas gangrene, and now it is to save appendicitis patients, whose infections usually cause death from gangrene or peritonitis.

During the war Prof. Weinberg and Dr. Jablons, 498 West End Ave., New York, now in Paris, discovered that gangrene was caused by intestinal germs. The serum was delayed on account of medical politics. In the past five years, however, the serum

Prof. Weinberg perfected proved to cure most gangrene cases arising from appendicitis, and also most peritonitis cases from the same cause when used in time. Thirteen of fifteen cases were saved.

Meanwhile Dr. Jablons, working in America, perfected a "buffered citrate cure" for dry gangrene, or Raymond's disease. A meeting of the Pasteur Institute will announce the formula of the solution this week and a complete list of its cures.

Dr. Jablons is now investigating diabetes in France, having proved since prohibition diabetes has doubled in America. Dr. Jablons blames the overeating of pastry and candy in America and the lack of alcohol in the system, which previously kept the diabetes rate down.

PACT TO SUPPRESS SMUGGLING AT BORDER

Canada and United States Sign Treaty Regarding Liquor and Narcotics.

A despatch from Washington says:—Secretary Hughes and Ernest Lapointe, Canadian Minister of Justice, signed at the State Department on Friday a treaty between the United States and Canada for the suppression of liquor and narcotic smuggling across the international boundary line.

The convention is a result of the conference in Ottawa between Canadian officials and officials of the State and Treasury Departments, the Americans going to Canada to work out some means of co-operating to check run-running across the border. It will become effective ten days after exchange of ratifications and will remain effective for one year, after which it may be terminated on thirty days' notice.

The State Department described the pact in part as follows: "Each Government is to furnish information, upon request, to the appropriate officers of the other, concerning clearances of vessels or the transportation of cargoes, shipments or loads of articles across the international boundary when the importation of articles transported by land is subject to the payment of duties; also information respecting clearances of vessels to any ports when there is ground to suspect that the owners or persons in possession of the cargo intend to smuggle it into American or Canadian territory.

Clearances are to be denied to vessels carrying cargo consisting of articles the importation of which is forbidden by either country, when it is evident from the tonnage, size or general character of the vessel, or the length of the voyage or certain other conditions that the vessel will be unable to carry the cargo to the destination proposed in the application for clearance."

"Arrangement is made for the return, under reasonable conditions, of property brought into either country from the territory of the other when the owners are nationals of such other country."

"There is agreement that both countries shall exchange information concerning the names and activities of persons known to be engaged in the violation of the narcotic laws of the two countries."

"The convention also provides for the attendance of Government officials of one country as witnesses in the other, and the production of records and files or certified copies thereof in the trial of civil and criminal cases."

"The convention also provides for the attendance of Government officials of one country as witnesses in the other, and the production of records and files or certified copies thereof in the trial of civil and criminal cases."

"The convention also provides for the attendance of Government officials of one country as witnesses in the other, and the production of records and files or certified copies thereof in the trial of civil and criminal cases."

SUBWAY WORKERS IN LONDON ON STRIKE

Only About Fifty Per Cent. of Normal Service Running.

A despatch from London says:—A partial strike of electric power station men here on Thursday inaugurated what may develop into a nation-wide strike and the complete stoppage of London underground transportation. Forty out of the 140 subway stations in London had closed on Thursday and only about fifty per cent. of normal service was running. The situation is the result of the strike of sixty per cent. of the employees of one of the two big electric power stations supplying the subway. So far it is a purely unofficial strike, not authorized or recognized by the union leaders.

The Labor Press service, which is the official publicity organization of the Labor party and the Trades Union Congress, issued a statement on Thursday declaring the strike was fomented by "an unofficial committee dominated by Communist influences." The men struck in sympathy with another unofficial strike of more than 1,600 shopmen of the Great Western Railway, who are demanding an increase of ten shillings a week, a minimum wage of three pounds a week, a guaranteed number of working hours per day and week, and a week's annual holiday with full pay. The railway company refused to consider the demands until regularly presented through officials of the National Union of Railwaymen.

The transportation situation is further complicated by the action taken in Thursday's final meeting of the annual conference of the Associated Society of Locomotive Engineers and Firemen, which instructed delegates to return to their depots and prepare for a nation-wide strike. They are asking an immediate reply from the railway companies to their demands for revision of the classification and promotion system of locomotive firemen, and for full pay for Sunday work whether or not a full day's work is done.

Natural Resources Bulletin.

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa says:

The industrial structure of Canada rests in uncommon degree upon the utilization of water-power, and the extension of the water-power industry has been notable with regard to both the rate of development and the diversity of the field which it serves. The actual extent of Canada's water-powers has been by no means fully ascertained, but they are known to be abundant and well distributed throughout the Dominion, which, with the tributaries, forms important zones for settlement and industrial expansion.

Foremost amongst the outstanding power rivers in Canada is the St. Lawrence, not only because of its enormous discharge, but also due to the almost complete natural storage of the Great Lakes which feed it. This great river is capable of furnishing over 3,500,000 horse-power, of which less than 1,500,000 horse-power is in the international reach and would have to be apportioned between Canada and the United States.

Among the many large rivers flowing into the St. Lawrence from the northern Laurentian plateau is the Ottawa, for most of its length lying between Quebec and Ontario. On the Ottawa river development has been confined to less than 100,000 horse-power in the vicinity of Ottawa city, leaving still untapped 21 sites, aggregating 678,000 horse-power, on a basis of ordinary minimum flow, and probably twice that amount with adequate storage. It is from the headwater tributaries of the Ottawa that the silver mines of Northern Ontario draw their main supplies of electrical and compressed air energy. Many rivers from the north enter the St. Lawrence river and Gulf and, while surveys have not been initiated on all, a number of sites are known to offer large power possibilities.

Ontario Takes First Place as Richest of Provinces

Ottawa, June 8.—Canada's aggregate tangible wealth in the year 1921 was \$22,195,000,000, according to a survey of the national wealth of the Dominion just completed by the Dominion Bureau of Statistics. Of that total Ontario ranked first among the Provinces with an estimated aggregate wealth of \$7,751,000,000, or 35.1 per cent. of the total, while Quebec was in second place with a total of \$5,423,000,000, or 25 per cent. of the Dominion total. Saskatchewan came third with \$2,846,000,000, or 12.8 per cent. of the total. In a summary of the survey it is shown that the wealth was most widely distributed in three Prairie Provinces than in Ontario and Quebec. Saskatchewan led in per capita wealth with \$3,757; Alberta was second with \$3,317 and Manitoba was third with \$2,705. In comparison, Ontario per capita wealth was \$2,507 and Quebec's was \$2,347.

There is no making a good cloak of bad cloth.

Every cruel act hardens the heart and blunts the sensibilities. All animals appreciate kind words and gentle treatment. Some animals suffer as much from a harsh, lead tone of voice as from a blow.

Measurement of this huge sycamore at Rondeau Park, Ontario, found it to be five feet in diameter.

The Sense of Obligation.

There is nothing at all attractive in the idea of obligation. No one enjoys being under an obligation, no one likes to assume new obligations; and a person who is really kind and well-disposed does not enjoy feeling that he has put another person under obligations, however much he may have enjoyed doing the kindness that has had that practical effect upon their relationship. Yet, if to incur obligations is always more or less unpleasant, to fulfill them is one of the more buoyant experiences of life, and perhaps we should be philosophical enough to welcome them for the sake of the satisfaction we shall feel when we get rid of them.

Certainly among people who do not permit themselves to be oppressed by the sense of their obligations we usually find those who are most successful in settling the account. There are some of course who light-heartedly or callously refuse to meet obligations that they can legally evade, but they may as well be excluded from consideration, for we do not recognize ourselves as belonging to that company. Most of us probably make the mistake of letting obligations weigh too heavily upon our spirits—obligations of all sorts, social and moral, large and trifling, obligations to church and state, community and family; if we let ourselves become depressed in contemplating them, we are pretty sure to find our power of satisfactorily meeting them impaired. Some of them are constant, to be terminated only when life closes; if we are harassed by an obligation that is ours for life, we are unlikely to fulfill it adequately and to get from the continuous fulfillment of it the satisfaction that it might yield.

In every responsible human being the sense of obligation is inborn. He has a sense that he must make something of the life that has been given him. Under that sense of obligation he need not chafe. It should be productive not of unhappiness but of happiness. The sense of obligation is really the greatest force in the world.

Woe Hughie.

He's gone to school, woe Hughie,
An' him not four,
Sure I saw the fright was in him
When he left the door.

But he took a hand o' Denny,
An' a hand o' Dan,
Wi' Joe's owd coat upon him—
Och, the poor wee man!

He cut the quarest figure,
More stout nor thin;
An' trottin' right an' steady
Wi' his toes turned in.

I watched him to the corner
O' the big turf stack,
An' the more his feet turned forrit,
Still his head turned back.

He was lookin', would I call him—
Och, my heart was wae,
Sure I lost I am without him,
But he be to go.

I followed to the turnin'
When they passed it by,
God help him he was cryin',
An', maybe, so was I.
Elizabeth Shane, in "By Bog and Sea in Donegal."

The Nick in the Axe.

Walter Smith went to the woodpile to do his part in keeping up the supply of wood for the kitchen stove. It was a clear, frosty morning; the snow was glistening; the ice on the pond was smooth and inviting, and Walter's skates had been recently sharpened. He picked up the axe and swung it quickly and impatiently down on a stout birch block. Out from the edge of the steel fell a small fragment.

Walter looked at the nick in dismay. He had neglected to warm the axe and thus take out the frost; zero weather makes steel brittle. Walter knew that his father would not tolerate a nicked axe round the place; so, being an honest boy, he took it to him at once. "That is too bad, Walter," said Mr. Smith patiently. "You turn the grindstone, and I'll hold the axe."

Hour after hour Walter turned away at the stone; all the morning he and his father worked and again after dinner. Boys passed with their skates on their way to the pond, but Walter had to grind on. The stool was hard, and at night the neck still showed. And the next morning, though his arms and shoulders ached, he had to turn the grindstone again. Finally about noon the axe was in good shape.

"There, that's done," said the father. "Impatience doesn't pay, does it, Walter? What we have to do we should do right and in good spirit. If we do it in any other way, something and sometimes one gets hurt. That hasty blow has delayed you in your wood cutting and has made a lot of extra hard work besides, without considering that it has spoiled a day and a half for me. No wonder the Apostle tells us to add self-control and patience to faith and courage and knowledge. But, my boy, you are lucky you could grind out the result of your impatient act. A rash word or deed might knock a nick out of your teacher's respect for you or out of a valued friendship or out of some other noble relationship in life that could not be so easily mended."

It was a lesson that Walter never forgot. In after years when his impatient spirit seemed likely to gain control over him he remembered that weary day and a half spent grinding out the nick in the axe.

A good companion makes a heaven out of hell.

RED ROSE ORANGE PEKOE

Surnames and Their Origin

GUNNING.

Variation—O'Gunning.
Racial Origin—Irish.
Source—A given name.

Here is a family name which in many instances comes from Anglo-Saxon sources. It is, however, often of Irish development, being merely the Anglicized form of the clan name of O'Gunning.

In point of age, this family or clan name shares honors with that of O'Day, or, to use the Gaelic form, "O'Deafachaidh," tracing directly back to the period when Brian Boru reigned as High King over Ireland and established by edict the system of clan and family names.

The O'Gunning clan was probably founded a few years after that of O'Day, for its founder, unlike that of the O'Days, was not of the same generation as Brian Boru, being, in fact, his grand-nephew.

The given name, in this case, happens to have the same spelling in the nominative as in the genitive case.

It is from this latter that the clan name is formed by the prefixing of the "O," which has the same significance as the Anglo-Saxon ending "son" and the Norman-French prefix "fitz."

MARIS.

Variation—Mariss.
Racial Origin—Norman-French and French.
Source—A locality—Also a given name.

Here is a family name which may be accounted for in several ways.

The simplest explanation lies in its development from a given name which was fairly popular among the Norman French, that of "Martius."

But while this undoubtedly accounts for the name in a great many instances, it does not suffice for all. It is also traceable to the name of a locality in Normandy, known as "le Marais."

In the first instance the early form of the name is found as "Fitzmaris" or "Fitzmaris" (which undoubtedly also has developed in some instances into Fitzmorris), the "fitz" being the Norman development of the Latin "filius" meaning "son."

In the latter, the early form is found as "de le Marais."

But it is also a matter of record that, in some instances, the family name was brought into England after it had already become a family name in France, in the form of "Mares."

A SPLENDID LAXATIVE FOR THE BABY

Mother should constantly be on guard to keep baby's bowels working freely, and his stomach sweet, for nine-tenths of the ailments from which little ones suffer are caused by derangements of the stomach and bowels. Baby's Own Tablets are a splendid laxative for the baby. They are mild but thorough, contain neither opiate nor narcotics, and are absolutely guaranteed to be safe and efficient for either the newborn babe or the growing child. By their action on the bowels and stomach they drive out constipation and indigestion; break up colds and simple fevers; make the dreaded teething period easy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Basque Heart and Soul.

From the little town near the Spanish frontier to the mountain village is not more than thirty kilometers, but the motor diligence that runs between them takes a whole day for the trip—sister what an accommodating fellow the driver is. To please a passenger, says the London Times, he will pull up at what he thinks is the finest point of view so that a photograph may be taken, and he is flattered when the camera is turned on him and his diligence.

He is a Basque heart and soul and grows eloquent about the scenery, so wild, so solemn on the mountain heights, so smiling and intimate in the valleys. The gardens are full of flowers, fruit and vegetables; the meadows yield three crops of hay in the season.

You may learn if you will who lives in the beaming white houses with the brown beams and old stone name plates, for driver and fishwives are

willing to talk. They will tell you that the Basque country is the most beautiful corner of all France; that life is easy for everyone there; that there is no poverty at all, and that the workman lives as comfortably as the man of leisure; that the Basques have large families, and their sons and daughters emigrate, though only to earn money and bring it back to their own village, where they spend it on the land they love. When the people are tired of talking they sing old Basque folk songs with a lively lilt in every air. The mountains are folded in a purple robe; the evening star comes out, and from the shore, as the diligence nears the town, comes the long wail of the Atlantic breakers. The moon appears.

My Wife.

Trusty, dusky, vivid, true,
With eyes of gold and bramble-dew,
Steel-true and blade-straight,
The great artificer
Made my mate.

Honor, anger, valor, fire;
A love that life could never tire,
Death quench or evil stir,
The mighty master
Gave to her.

Teacher, tender, comrade, wife,
A fellow-farmer true through life,
Heart-whole and soul-free,
The august father
Gave to me.

—Robert Louis Stevenson.

Large Forests Stand on Ice.
One of the largest forests in the world, between the Ural Mountains and the Okhotsk Sea, in Russia, stands on ice.

"Yesterday is dead—forget it; tomorrow doesn't exist—don't worry; the day is here—use it!"

Waste of wealth is sometimes retrieved, waste of health seldom, waste of time never.

Less Pot-washing

SMP Enamelled Ware has the smooth surface and polish of fine crockery—without the breakage. And it is so very easy to clean—just like china, and therefore makes light work of pot washing.

Try this test. Take an **SMP Enamelled Ware** sauce pan and an all-metal sauce pan of equal size. Into each pour a quart of cold water. Put on the fire at the same time. The **SMP** sauce pan will be boiling merrily when the water in the other is just beginning to simmer.

SMP Enamelled WARE

"A Face of Porcelain and a Heart of Steel"

Three finishes: Pearl Ware, two coats of pearl grey enamel inside and out. Diamond Ware, three coats, light blue and white outside, white lining. Crystal Ware, three coats, pure white inside and out, with Royal Blue edging.

Kissing Placed Under Ban by Tokio Police.

"Kissing is an unclean habit, the introduction and encouragement of which is not desirable by the Japanese," the Chief of the Metropolitan Police of Tokio said today in explaining why a bamboo screen was erected around a bronze reproduction of Rodin's "The Kiss." The work was one of several French masterpieces banned from public sight by the police censor.

When the art exhibit loaned to Japan by the French Academy of Art opened yesterday those attending were astonished to find Rodin's "The Kiss" covered up.

A representative of the French Embassy called at the Foreign Office to learn the reason for the ban on bronzes and canvases which were the pride of France. He was referred to the police, who gave the above explanation.

A REAL NERVE TONIC

Is a Bountiful Supply of Rich Health-Giving Blood.

Sufferers from what medical men speak of as nervous debility find themselves tired, morose, low-spirited and unable to keep their minds on anything. Any sudden noise hurts like a blow. They are full of groundless fears and cannot sleep at night. Their hands tremble, the legs feel as if they will give away following a walk or any exertion, and the mind is greatly disturbed by the most trivial incidents.

Doctors of the nerves with poisonous sedatives is a terrible mistake. The only real nerve tonic is a good supply of rich, red blood. To secure this, new rich blood use Dr. Williams' Pink Pills which have a direct action on the blood and through it stimulate every nerve and organ in the body.

The best Tobacco for the pipe

Ogden's CUT PLUG

Self-Pity.

Self-Pity how came you inside my door?
I've given you the gate oftentimes before!
Who left my door ajar and let you in
With cringing men and sycophantic grin?

Honest emotions I admit at times
And count them rather honored guests
Than crimes;
But you—fool toadstool in my mushroom bed!—
Are even worse than all your foes have said.

While you are here my virtues count for naught;
While you are here my usefulness the good I've wrought;
While you are here my striving is in vain.

To raise the courage that can smile through pain;
While you are here contempt must be my gain.

Even from friends if they should shrewdly heed
Until your loathsome presence I eschew
I am in sore disgrace—outside with you!

—Stickland Gillilan in "Success."

GREEN TEA IMPORTS LARGER.

Statistics from Ottawa show that in 1922, 553,977 pounds more Green Tea were brought into Canada than in 1921, and 906,728 pounds more than in 1922. The reason given is that the fine quality Green Tea of India and Ceylon have displaced the inferior Japan and China Greens which, due to their low price, were imported heavily some years ago. Salada Tea Company is the largest importer of India and Ceylon Green Teas.

Correct.
"Where do most of our traffic difficulties originate, anyhow?"
"Detroit, I think."

The Star Twinkles.

There is a bit of tragedy as well as comedy in the story that in the Tapestry of Life, Mr. Raymond Blackway tells of a young man who after years of poverty and misery finally emerged as a poet of the highest order. A certain literary duchess who had been greatly fascinated by the charm and beauty of his verse gave an afternoon tea in his honor.

Poor fellow, he sat in speechless agony, surrounded by his admirers, realizing that as the star of the occasion he was expected to twinkle at least once during the afternoon. At last an inspiration came to him. He started to speak, and dead silence fell upon the room. "This is what he said: 'Have you noticed, d-d-duches, that this year's pawn tickets are all pink?'"

Mystery in Chinese Gongs.

The manufacture by the ancient Chinese of gongs and tom-toms, with their perfect tones, still remains a mystery to the outside world, although their chemical composition has been determined.

CORNS

Lift Off—No Pain!

Doesn't hurt one bit! Drop a little 'Freezone' on an aching corn, instantly the corn stops hurting, then shortly you lift it right off with fingers. Your druggist sells a tiny bottle of 'Freezone' for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot calluses, without soreness or irritation.

Minard's Liniment for Sprains.

Even Then a Soldier.

An Italian officer who won distinction in the Great War was in his boyhood the hero of an amusing incident. His chief fault then was that he would interrupt any one if he had anything he wanted to say himself. Our mother, writes Miss Lisi Cipriani in A Tuscan Childhood, repeatedly said to him: "Ritchie, you must never interrupt me when I am talking. Wait till I have finished and then say, 'At your convenience, mama, I have something to tell you.' Take time; learn to be polite."

One day toward the end of the season my mother had taken Ritchie and me to the baths at Leghorn. The baths are built in piers and extend into the sea, and bridges connect the piers. Before the autumn storms begin the boards are taken away, so that only two long wooden beams and the railings remain.

I had crossed one of the bridges at a considerable distance from where my mother and some friends were sitting in a group and was watching a man who was fishing. Just as I left him and was about to cross the bridge on the beam he called to me that he had hooked a fish. I waited till the fish was safely landed and then started to cross. But so interested was I that I forgot that the boards had been taken away and, walking on as usual, fell into the sea.

Ritchie, who had been standing by me, rapidly crossed the bridge and ran to my mother. Taking off his cap, he stood politely beside her for some time, waiting till she had finished a rather long story that she was just telling. Then he said:

"Mama, at your convenience, I have something to tell you."
"What is it?" inquired my mother approvingly.

"Mama, at your convenience, Lisi has fallen into the water."
"What?" cried my mother, jumping up. "Has any one pulled her out?"
"I don't know," Ritchie replied calmly and politely, "but I did not interrupt your story—and she can swim!"

Nasty Nicknames.

"I hope they don't give my little boy any nasty nicknames in school?"
"Yes, mother; they call me Corns."
"How dreadful! And why do they call you that?"
"Cause I'm always at the foot of the class."

When a man's cloak is threadbare it is easy to pick a hole in it.

INSIST! Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 24 years.

Safe. Accept only a Bayer package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monach (Germany) and of Bayer Manufacture of Montreal (Canada).

DISTEMPER

A tablespoon of Minard's in a cup of molasses mixed with the brush wash will give quick relief.

Thin Folks

If you are weak, thin and nervous, let your druggist supply you with Bitro-Phosphate. It is guaranteed to increase weight and strength and restore energy, vigor and nerve force. Price \$1 per pkg. Arrow Chemical Co., 26 Front St. East, Toronto, Ont.

Someone to Care.

Our daily task bends and fatigues us. There's no passion to do or to dare. Automatically working and working—If there's nobody somewhere to care.

And often life's road does seem furrowed.

We question if Fate has played fair—But the breathe of love clears all our worries.

If there's anyone ready to listen With eyes sympathetic and mild, If there's someone who really needs you—

Though that someone be only a child. —Leraine Ballantyne.

Minard's Liniment for Distemper.

Biscay Waters for Zoo.

The new aquarium at the London Zoo is supplied with sea water from the Bay of Biscay.

A true friend will multiply your joys and divide your sorrows.

MOTHER OF TWIN BOYS

Tells How Lydia E. Pinkham's Vegetable Compound Relieved Her of Inflammation and Great Weakness

West St. John, N. B.—"I was in a general run-down condition following the birth of my twin boys. I had a great deal of inflammation, with pains and weakness. Finally my doctor recommended Lydia E. Pinkham's Vegetable Compound. He said that your medicine would be the only thing to build me up. I am sure he is right, for I am feeling much better and am gaining in weight, having gone down to ninety-three pounds. I was in bed for over a month, but am up again now. I have recommended the Vegetable Compound to my friends and give you permission to use my letter."—Mrs. ELMER A. RITCHIE, 82 Rodney St., West St. John, N. B.

There are many women who find their household duties almost unbearable owing to some weakness or derangement. The trouble may be slight, yet cause such annoying symptoms as dragging pains, weakness and a run-down feeling.

Lydia E. Pinkham's Vegetable Compound is a splendid medicine for such conditions. It has in many cases relieved these symptoms by removing the cause of them. Mrs. Ritchie's experience is but one of many.

You might be interested in reading Mrs. Pinkham's Private Text-Book upon the "Ailments of Women." You can get a copy free by writing the Lydia E. Pinkham Medicine Co., Coughour, Ontario.

What special directions for prayer did Jesus give in his sermon on the mountain?—Matt. 6: 5-13.

NEWBURY

Miss Jessie H. Fletcher returned from Galt on Saturday.

Mrs. O. Prangley and daughter Elsie, Miss Helen Parrell and Mrs. W. O. Kraft spent Thursday in London.

Dr. A. McG. Bayne is opening an office in the Commercial House here in the near future.

Knox church is preparing for a musical concert to be given in the church on the 20th inst.

The Y.P.S. of Knox church had an interesting meeting in the church Sunday evening. Mrs. (Rev.) Bolingbroke gave a splendid paper on the life of Mary Slessor, missionary in Africa. The singing by the choir and a trio by Adair Bayne, Harry Babcock and H. Bolingbroke were much enjoyed.

The W. M. S. of Knox church met on June 5th at the home of Mrs. A. Fennell. The president, Mrs. Bolingbroke, presided and Mrs. Leatherby lead the devotional exercises. Mrs. Moore read a splendid paper on women's work in Formosa. Mrs. D. Fletcher followed with a reading from the Messenger on missionary work in Western Canada. The meeting closed with prayer, after which lunch was served.

WARDSVILLE

Allan Henderson, of Walkerville, spent the week-end with his mother and sister here.

Mr. Bridgette and Mr. Cornelle were in Windsor last week attending the Methodist Conference.

Mrs. D. L. Purcell, Mrs. J. Sloan, Mrs. Lee and E. J. Purcell spent Thursday in London.

Reeve Stinson spent last week at county council in London.

On Friday evening the neighbors and friends of Misses Florence Winters and Lili Blain gathered at the Blain home to shower the two young ladies who are brides of this week. Many nice presents were given, and the young ladies received the hearty congratulations of their friends.

The students of Form III, with their teachers and several friends journeyed to the home of the Misses Atkinson on Friday afternoon, where they were delightfully entertained.

The early part of the evening was spent in games, after which supper was served on the lawn to the thirty guests. The remainder of the evening was spent socially in various games, contests and stunts. At the close of the evening a hearty vote of thanks was moved by Allan McLean, seconded by Fred Whitfield, to which Mr. Atkinson replied suitably. The W.H.S. students then gave their school yell, followed by three cheers for the Atkinsons.

Monday afternoon the ladies of the village played their first game of soft-ball against the W.H.S. team. In spite of handicaps on both sides the game proved an unusually interesting one. It ended, as usual, in favor of the W.H.S., the score being 19-10.

Notice.—Monuments, in Scotch and Canadian graves, inscriptions engraved at your cemetery a specialty.—Wardsville Granite & Marble Works; Chas. Mimma, proprietor.

A circus may take a lot of money out of town; but the catalogue houses do not even give a parade.

WOODGREEN

Mrs. W. Johnston, of Ekfrid, spent the week-end at Alfred Nethercott's. Mrs. Chas. Grover is spending a few days with her son Major, of Ekfrid, who is confined to his bed with measles.

Mr. and Mrs. Isaac Watterworth have returned home after attending the Methodist Conference in Windsor.

Mr. and Mrs. James Watterworth, of Detroit, spent the week-end with his parents, Mr. and Mrs. Lewis Watterworth, on the Big Bend.

Dr. and Mrs. Frank Watterworth, of Detroit, have returned home after spending a few days with Mrs. Mary Watterworth.

Mrs. Fred Lawrence, of St. Clair, Mich., has returned home accompanied by her cousin, Miss Alice Harvey.

On Thursday evening a large crowd witnessed a friendly game of soft-ball at Pratt's Siding between the Woodgreen and Pratt's Siding ladies. The exciting game ended in a score of 27-25 in favor of Woodgreen.

Timber is being placed on the church grounds for the erection of sheds.

An Oil of Merit.—Dr. Thomas' Electric Oil is not a jumble of medicinal substances thrown together and pushed by advertising, but the result of the careful investigation of the healing qualities of certain oils as applied to the human body. It is a rare combination and it won and kept public favor from the first. A trial of it will carry conviction to any who doubt its power to repair and heal.

CAIRO

Frank Woodrow, of Walkerville, is visiting with Mr. and Mrs. Fred Sullivan.

Alfred Wehlmann has gone to Windsor where he has secured a position for the summer.

Mr. and Mrs. Will Ball, of Strathroy, are visiting in and around Cairo. Moses McKeown and son John, of Brooke, spent Sunday with Mr. and Mrs. Joe Cross.

Stuart Smith and daughter Muriel, of Walkerville, spent Saturday and Sunday with Mrs. Agnes Smith.

Miss Tena Leitch is visiting with Mr. and Mrs. John Cross.

Mrs. Rachel McKeown is spending a few days with Mrs. Alfred Everitt.

Miss Velma Young spent the week-end with her sister, Mrs. Albert Rush, of Bothwell.

Mr. and Mrs. Archie McCready and baby, of Newbury, visited with Mr. and Mrs. Osborne Gage on Monday.

DAVISVILLE

Matthew Armstrong had a big barn raising on Thursday when about two hundred neighbors and friends gathered to give their assistance. In the evening they had a jolly good old barn dance.

Miss Annie McIntyre, of Windsor, is spending a couple of months with her parents.

The many friends of Jim McIntyre are glad to see that he is able to be out of the hospital and up and around.

The only universal language that seems to have much success is a wink.

Ready-made Medicine.—You need no physician for ordinary ills when you have at hand a bottle of Dr. Thomas' Electric Oil. For coughs, colds, sore throat, bronchial troubles, it is invaluable; for scalds, burns, bruises, sprains it is unsurpassed; while for cuts, sores and the like it is an unquestionable healer. It needs no testimonial other than the use, and that will satisfy anyone as to its effectiveness.

SOUTH EKFRID

A. E. George, of London, spent the week-end at Dan H. McRae's. Mr. and Mrs. Fred Gough and Mr. and Mrs. C. Troyer, of Glencoe, spent Sunday at D. R. McRae's.

Miss Eva McRoberts spent the week-end at D. S. McEachern's.

Wm. Coad and Wm. George spent Saturday in London.

John and Mary Sinclair, of Appin, spent Sunday at D. S. McEachern's.

Mr. and Mrs. Wm. Stevenson, of Glencoe, spent the week-end at Gilbert Duncan's.

Miss Jean Murray, of Glencoe, spent the week-end in this vicinity.

T. J. McDonnell and James and Philip McRae spent Sunday in Thamesville.

Mr. and Mrs. J. S. McAlpine visited here on Sunday.

Mr. and Mrs. McKillop and baby of West Lorne, spent Sunday at David Doble's.

Miss Marion Doble spent Sunday at her home here.

Mr. and Mrs. James Cook, of Glencoe, visited at Dugald McIntyre's over the week-end.

Miss Margaret Coulthard spent the week-end at her home here.

SHETLAND

Mr. and Mrs. W. H. Jeffery are spending a few days at Fred Jeffery's.

Walter Lewis and Wm. Nickleson, of Detroit, spent Sunday with Shetland friends.

The annual Methodist Sunday School convention was held in the church here last week and was well attended.

Mr. and Mrs. Henry Showers and baby, of Detroit, spent the week-end at Wm. Bolton's.

Mr. Dykman and Wm. Bolton, of Detroit, spent the week with Shetland friends.

The Shetland boys play ball with Newbury at Cairo on Saturday.

No need to suffer with corns, or to run the risk of paring them. Remove them surely and painlessly with Holloway's Corn Remover.

MIDDLEMISS

Wm. Brown is planting three acres with potatoes.

"Save the surface and you save all." John Wrightman sets the example.

The L.O.L. held their regular meeting Wednesday night. Nearly all the members were present.

D. McNabb has the flax mill building all torn down and removed.

Alex. McDonald and his friend, Don McCullum, motored home from Detroit for the week-end.

George Clark is working on the C. N. R. section as spare man.

Planting is practically over. The season is about two weeks later than usual.

Mr. and Mrs. E. W. McDonald returned to Windsor on Saturday after a three weeks' visit with friends here.

Mrs. N. Fletcher, of Detroit, spent the week-end at her home here.

CAIRO

Dr. Burdon, of London, spent Sunday with his sister, Mrs. Prangley.

Mr. and Mrs. Robert Huffman were Sunday visitors with Mr. and Mrs. George Bilton.

Mrs. John Misner and daughter Marguerite, of Orford, spent last week with the former's mother, Mrs. John Curran.

Mr. and Mrs. Robinson, of Wardsville, spent Sunday with Mr. and Mrs. Roy Hands.

Renew your daily newspaper subscriptions at The Transcript office.

KILMARTIN

Prof. Andrew Leitch, of Montana, will occupy the pulpit in the Church of Christ on Sunday, June 15th.

Mr. and Mrs. James Dewey, of Sarnia, spent the week-end with Mrs. Joseph Moore.

Garfield Munroe, of Ford, spent Sunday at his home here.

Mrs. Thomas Moore and son Robert, of Walkerville, spent the week with her mother, Mrs. Alex. McAlpine.

Miss Katie B. Leitch, of St. Thomas, spent Sunday at her home here.

Mr. and Mrs. Mac. Purcell, of Rodney, spent Sunday with friends here.

A great many from here attended the barn raising at Chas. Willey's on Monday.

A soft-ball team has been organized at S. S. No. 17 for the coming season. Miss Drina McAlpine, president; Miss May Moore, secretary; Will McKellar, manager.

The Ladies' Aid of Burns' church met at the home of Mrs. D. W. Munroe on Wednesday last, with an attendance of 35 members and 13 visitors. They pieced a quilt, and had a birthday collection which amounted to \$15. The next meeting will be held at the home of Miss Julia McEachern on July 2nd.

Mr. and Mrs. Neil Knight and daughter, of Windsor, spent a week with Mrs. Knight's sister, Mrs. Neil W. Munroe.

MELBOURNE

Melbourne, June 5.—A number of friends gathered at the home of Mrs. Annett to celebrate her 85th birthday. Guests were present from Bridgeburg, London and Dutton. About 40 were present. The birthday cake was made and presented by Mrs. Towers, of Bridgeburg. Many friends at a distance sent useful and pretty gifts.

The baseball games here are becoming very interesting. The last game was played here on the 7th between Delaware and Melbourne. The people came for miles to see the game, which resulted in a tie. An other interesting game is looked forward to in the near future.

Mrs. Gilbert McLean is attending the Methodist Conference held in Windsor this week as representative of the Methodist church here.

APPIN

Rev. Mr. Wells addressed the congregation in the Presbyterian church Sunday morning in the interests of the Lord's Day Alliance. Dr. McDonald sang a solo in his usual pleasing manner.

Rev. and A. D. McIntyre are visiting their parents here.

The contract has been let for re-decorating the Presbyterian church, work to commence in July.

Rev. N. Stevenson is attending the General Assembly at Owen Sound.

John Macfarlane was a delegate to the Methodist Conference in Windsor.

Clifford Hughes visited his brother Will in London on Sunday.

Geo. McGill, Jr., is visiting his parents here.

An interesting evening was spent last Friday in the basement of the Methodist church here, when the Kerwood Young People's League to the number of thirty visited Appin.

League, put on a splendid program and took part in a debate, being the fourth in the debating tournament of Strathroy district which has been going on this spring.

Kerwood young people were represented by F. Richardson and R. Johnson, and Appin by Miss Anna Farrell and Ronald Macfie.

Kerwood took the affirmative and Appin the negative on the subject "Resolved that the Scotchman has done more for Canada than has the Englishman."

The judges were Mr. Lucas, of Kerwood, and Martin Johnson and McKellar McArthur, of Appin. After much deliberation the judges decided points on the debate to be equal, and the negative, Appin, won by two points.

All the speakers are to be complimented on their excellent material and the manner in which it was delivered. At the conclusion of the debate Appin League served lunch and a social hour was spent.

An interesting and well attended meeting of the Ladies' Aid was held at the home of Mrs. James Lotan, Jr., on Tuesday afternoon. Important business was transacted, after which lunch was served by the hostesses, Mrs. Lotan and Mrs. Irwin.

Miss Gertrude Lotan, nurse in training at Victoria Hospital, London, is spending a few days at her home here.

Postmaster Macraut has been granted permission by the Post Office Inspector to close on Wednesday afternoons along with other business places during the summer months.

EKFRID STATION

The June meeting of the Community Club was held at the home of Mrs. Wm. Kirkwood last Thursday afternoon, and was in the form of a quilting bee. Two quilts kindly donated to the club by Mrs. Mary McLean were quilted. A dainty lunch was served by the hostess, assisted by Mrs. James Murray and Mrs. Dunc. McTavish.

The next meeting of the club will be held at the home of Mrs. Dan Mack on Thursday afternoon, July 3rd.

A large number from here attended the barn raising at Chas. Willey's on Monday afternoon.

Miss Ella Switzer has returned home after an extended visit with friends in Windsor.

CAUGHT WITH THE GOODS

"Well I'll be blowed," said Joe Dupuis, telephone lineman, as he inspected a piece of lead-covered cable; "I didn't think a respectable squirrel would do it." Over a score of telephones had been reported "out of order." Tests showed trouble in a cable passing through a group of trees on a shady residential street. The lead-covered sheath of the cable had been gnawed clear through. A timely snap by an alert photographer caught Mr. Squirrel in the very act of repeating the offence a few days later. Rats in the basements of large office buildings often gnaw lead cables and tie up telephone service. The squirrel in the same role is rarer, but all too frequent to please the men who keep our telephones in order. It's the paraffin in which the wires within the cable have been treated, that attracts the marauders.

FEEL BETTER IN FEW HOURS OR NO COST!

This is the time of year when your liver becomes sluggish and your intestines become clogged up with poisonous waste. Your liver does not properly purify blood that flows to your skin. The result is sallow complexion, dark circles and pimples. As these poisons continue to flood your system, your resistance is lowered, you feel dull and tired and sick.

Make this test! Cleanse and tone your liver with Dr. Thacher's Liver and Blood Syrup. Contains pure ingredients prescribed by physicians. Helps nature strengthen your stomach, soothe tired and overtaxed nerves, brace up system and purify your blood. Notice quick difference in way you look, eat, sleep and feel. You, too, will be satisfied, as others have, or no cost.

Dr. Thacher's is sold and recommended by P. E. Lamley in Glencoe.

MODEL CENTRE

Dan McAlpine is confined to his bed again.

Mr. and Mrs. John Spackman, of London, and Mr. and Mrs. Ross Watterworth and daughter Alice and Mrs. Lydia Watterworth, of St. Thomas, spent Sunday with Mr. and Mrs. Dan Graham.

The Heartbreakers played softball with Appin on Friday evening.

The score was 17-9 in favor of Appin. Mr. and Mrs. Chester Thorncroft and Evan spent Tuesday in Watford up the 85th birthday celebration of B. Williamson.

Mrs. Dan Graham spent a few days visiting in London last week.

CASHMERE

Mr. and Mrs. Ted Knowler and family, of Bothwell, and Mr. and Mrs. Norman Young, of Cairo, spent Sunday with Mr. and Mrs. Wed. Dark.

Mrs. B. F. Jeffery, of Newbury, and Miss Ona Jeffery, of Detroit, spent Sunday with Mrs. Calvin Stiller.

Miss Helen Knowler, of Bothwell, spent a few days with her uncle, Wed. Dark.

Mrs. Allen Stiller and son Norval spent Monday with Calvin Stiller.

The Ladies' Aid held a meeting in the church on Tuesday to straighten up the lawn social affairs and found they had a surplus of over \$65.

NORTH NEWBURY

Born—to Mr. and Mrs. Abe McMaster, a son.

Miss Mary Moran is visiting at her home here.

Gordon Armstrong, of Dawn, called on his mother, Mrs. Robert Armstrong, one day last week.

Fergus Foley spent the week-end at his home.

Mr. and Mrs. Thomas Foley spent Sunday with her parents, Mr. and Mrs. Fred Armstrong.

Strangled with Asthma is the only expression that seems to convey what is endured from an attack of this trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is beyond measure. Where all was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

Reports on Canada's Crops

At frequent intervals throughout the season the Bank of Montreal issues reports on the progress of the crops in Canada. These reports, telegraphed to headquarters from the Managers of the Bank's 550 Branches, cover every Province and form a reliable index of crop conditions.

The reports are furnished free. Upon request at any Branch of the Bank your name will be placed on our mailing list.
