OLD WILL PUT IN EVIDENCE.

On the judge's ruling that a foundamission of the will of Joseph H. Sifton, E. Meredith, K.C., was accordingly recalled, and identified the will produced as that of Joseph H. Court Hears Continuance of suming of court at 2 o'clock was Robt. Robinson, now a member of the local fire brigade, but at the time of Joseph Sifton's death a member of the London police force. Witness said he first heard of Joseph Sifton's death about 10 p.m. on Saturday, June 30. Witness identified prisoner as the man he met on Dundas street, near Ontario street,

London East, at about 12:45 o'clock on Saturday morning, June 30. Prisoner was on a wheel. Prisoner was looking for a boarding house kept by a Mr. Henderson. Witness ofwith him. Gerald went to the house and rang the bell. A man came, went back and sent another man out. Gernear the house; the former said he had found his man and thanked witness

Mr. Johnston tried to shake the witness' identification of the prisoner by asking him if he had not sworn at the preliminary examination that he was not quite sure that the prisoner was the man he had seen on that night. Witness repeated his statement that he was positive in his identification.

ELDER SIFTON VENTURESOME.

Andrew Gardner, whose farm adjoined on the west that of Joseph Sifton, said that on the morning of Sat-urday, June 30, he saw Joseph Sifton It being 1:15 p.m., the court rose for and a lady driving along the 6th concession between 5 and 6 a.m. Witness was not close enough to identify the

the axe and several bricks and took

Witness regarded the hole in barn as a dangerous place, and it would have been difficult to knock off boards while standing on the tie beam. To Mr. Johnston witness said that it would have been a venturesome act for Sifton to go up with slippery-soled boots, to knock off boards. knew that Sifton was an active and venturesome man, for his years, and witness knew of several accidents Sifton had met with through his venturesome nature

Witness had climbed up to the beam from which Sifton was alleged to have fallen. He found that it would be an easy matter to fall from the place. FOUND KNIFE IN HAY.

High Constable William McLoud was next called to testify. He had not known Gerald Sifton prior to the death of Joseph Sifton. Witness went to the Sifton barn on several occasions. one occasion he met Ephraim Bathurst and others there. They removed the hay and searched the mow. Witness found a knife, which was identified by him on its being produced. The knife was a brass-handled one, the brass stained with verdigris and the blade much rusted.

Witness took several chips of wood from the ladder and the floor and gave them to Dr. John Ferguson, of Toronto. Witness also took samples of dust and rubbish from the barn floor. Mr. Johnston asked witness when the chips were taken away. Witness said some were taken between July 21 and July 26, while others were taken later. Some were taken about the first week in August. Dr. McNeill took away some chips which were taken off by Detective Murray and witness. Some weeks after, some chips were handed back to witness by Dr. McNeill. The chips were taken from the sides of the ladder, not from the rounds. The chips taken by witness in August were given by him to Dr. Ferguson.

Mr. Johnston seemed to desire particularly to obtain an accurate statement as to what part of the ladder the chips were taken from. Taking a Bible lying on the clerk's desk, Mr. Johnston used it to represent the ladder and had the witness point out as nearly as he could the portions from which the chips had been cut. Pressed for an answer as to the exact date on which he found the knife, witness could only say that it might have been anywhere from August to October. Witness said that he had told Ed-

It is significant that in the homes of wealth, where the very best is demanded, "Purity" Baking Powder is used always. At the same time, in hundreds of families where economy decides the choice, "Purity" is selected.

Thus its purity attracts the rich, its economy attracts the poor. High quality and low cost—is there any better combination? to Edgar. EPISODE AT BURNS' HOTEL.

Edgar Morden, witness, Mary Macfarlane and Mary's sister drove one night to Burns' Hotel, Pipe Line road. Edgar came to witness and told him he wished witness to go with him and the women to the house of a friend in the country. Edgar said he had something to tell them. Edgar was to bring a rig for the party, but only brought a buggy. Witness also procured a buggy and took Mary Macfarlane with him. They drove to Burns' Hotel and went in.

"You had some drinks and a fight, didn't you?" asked Mr. Johnston, and the crowd laughed.

"I only want to say," observed the judge severely, "that I would dislike having to clear the courtroom, but I will do so, if order is not maintained." Witness, continuing, said that they reached the Burns house about 8 or 9 p.m. The women did not want to stay, as they said it was no place for them. Witness and Morden had words and Morden struck witness. The women became frightened, left the men and walked back home. The party were at the Burns house about hall

Witness said the hay of the mow had been searched once before the occasion on which he had found the knife.

CARRIED CHIPS FOR WEEKS. Dr. McNeill, recalled, said that the chips he had received from High Con stable McLoud had been carried in his pocket for several weeks or a month. Witness asked Detective Murray wha he would do with them, but got no satisfactory answer. Witness left them in Emerson's drug store for

Constable McLoud. Mr. Johnston said he was prepared admit that the chips produced were those taken from the ladder. Mr. Clute said that the crown was not prepared to prove that the blood on the chips was human blood. The could only prove it was mammalic

LENT SIFTON THE KNIFE.

David Lecky, a neighbor of Joseph Sifton, identified the brass-handled knife produced as one he had lent to Joseph Sifton about a month before the latter's death. He had not asked

Joseph Sifton to return it. To Mr. Johnston witness said it was an easy matter to lose such a knife He had on a previous occasion lent another knife, which was returned to him on request. first told Andrew Gardner of his lending Sifton the knife.

A SIFTON ON THE STAND.

The next witness called was John James Sifton, brother and executor of the late Joseph H. Sifton and uncle of the prisoner. He said that the total value of his brother's estate was \$20,-260. Witness could not say how much would be left after the debts against the estate were settled, as the account had not been closed. It would be more

than \$2,000, witness thought. Witness had been asked by Gerald on the night of the funeral about the existence of a previous will. Witness told him there was one in Mr. Meredith's hands, and gave Gerald an order to get it.

To Mr. Johnston witness said the debts against the estate had been much larger than expected, and that little of the estate was left. Joseph Sifton had told witness of the making of his will, but had told him nothing of the contents or names of the executors. Joseph Sifton was a close.

secretive man. Witness said the relations between Joseph Sifton and Gerald were always friendly. Witness did not ask for the holding of an inquest. Witness was at the barn between 10 and 11 on Saturday, June 30. The south door of the barn was then partially opened, and there was a hay rack standing by it. MEDICAL EVIDENCE BEGUN.

The first of the medical witnesses called was Dr. Hadley Williams, who performed the post-mortem on the

body of Joseph Sifton. He produced and prepared to read the report of the post-mortem, but Judge Britton said there was no necessity to read it all. only the portion concerning the wounds being material. This portion of the report Dr. Williams explained to the jury with the assistance of a skull.

The cause of death, said Dr. Williams, was the injury to the skull. After hearing the evidence of Dr. McNeill and John Sinker, witness said that there was no evidence of a bruise on the left side of the neck, but after 25 days no mark would be discernible. After hearing Herbert's evidence, Dr. Williams said he thought the injuries on the skull could have been produced

by an axe. If a conscious person fell from a height of 24 feet and struck upon his head, witness would look for other injuries, such as dislocations of the neck, shoulders or arms. A conscious person tries to save himself and often gets his limbs broken.

Witness said he was of the same opinion as at the last trial, that it was hard to say if the injuries were more consistent with a fall than a blow. WOULD EXPECT WORSE INJURIES.

To Mr. Johnston, witness said that he had not seen the living body of Joseph Sifton.

pinion went, he was not prepared to whether death was due to a fall Dr. Williams said that the fracture

of the skull might have been caused by one impact or two. Asked if he had found on the skull any evidence of the delivery of 14 or 8 p.m. blows swung by a powerful man like the prisoner, witness said he would expect the skull to show more evidence of fracture than he found. Asked as to the condition of the scaln after the delivery of 15 or 16 hard blows, witness said he would expect it to be more severely torn.

cised wounds found and the blows described by Herbert, there would be much more blood.

Mr. Johnston handed the witness the fatal axe and a skull, and asked him to show how the conical wound found in the scalp could have been made by the axe. Dr. Williams replied:

"Oh, I won't pretend to do that." Bton's rejoinder.

With a blow struck as described by Herbert, it would be difficult to inflice a downward cut, as was found. The judge asked a similar question, illustrating his query by rising and himself handling the axe, while the doctor held the skull. Witness said it would not be quite impossible for such a cut to be made. This concluded Dr. Williams' evi-

EVIDENCE ALL IN TONIGHT.

Counsel on both sides rose and pointed out that they were of the opinion that all the evidence could be finished by Friday night, leaving Saturday for the addresses of counsel, the judge's charge to the jury, and the

finding of a verdict by that body. The members of the jury, after consulting together, announced through one of their number that they would prefer not to hold a night session. If necessary they would be willing to sit on Friday night in order to get the evidence all in.

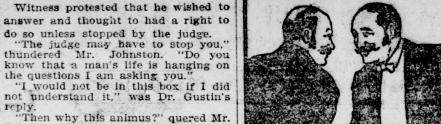

Court was accordingly adjourned till 9:30 Friday morning.

FRIDAY'S SESSION.

The fifth day of the Sifton trial opened with the crown's third medical witness in the box. The medical testimony took up a considerable portion of the morning session. The attendance was tor of dissecting at Toronto Medical College, He had had some experience "You are very wise," was Mr. John- larger than at any previous morning sitting, among the spectators being noa number of medical students. There was also the usual assortment of morbid-minded females, who devoured with avidity the ghastly details which cropped out from the evidence.

INJURIES GAUSED BY BLOWS. Dr. Eliphalet Wilbur Gustin, of St

Thomas, was the first witness to assume the stand on the opening of court. He proved on cross-examination to be a very argumentative wit-

He found mammalian blood on them, but the lapse of time had been such that the shape and size of the corpuscles had so changed that it was impossible to determine if it was human blood. Dr. Friend R. Eccles and Dr. Wm. Waugh, of London, deposed that they had assisted Dr. Williams in performing the postmortem. The report as

submitted was correct. High Constable McLoud was realled and asked what time he reached Edgar Morden's house on the night of Herbert's alleged confession. Witness replied he left the city about 11 p.m., reached Morden's about 12:30 and left

"Defense?" was the judge's laconic rejoinder. Dr. Arthur Jukes Johnson next took the stand in the interests of the defense. Dr. Johnson said he had been practicing in Toronto for 31 years. He is a member of the staff of Toronto General and Grace Hospital, a coroner and for 25 years surgeon to the Toronto railway. In these capacities he had seen a large proportion of the head injuries in Toronto for the past 30 years. He had been engaged as an expert by either the crown or the de-fense in all the important criminal cases in Ontario for ten years, except

of the skull. The blow which would cause the fracture on the side of the head would have crushed or at least cut the ear, With the fracture on the side of the skull further repeated blows would smash in the skull.

The injuries to the head were not made by an axe in the manner described by Herbert. The blow which produced the boggy feeling on the top of the head was a light one. The boggy condition of the scalp could be caused by a fall, but not by blows as described.

HERBERT'S STORY IMPOSSIBLE. "Is there anything that you do not

know about injuries from falls, doctor?" was Mr. Clute's opening question on rising to cross-examine Dr. John-

"Oh, yes," replied Dr. Johnson. "You can account for any injure by a fall?"

Witness said it would be impossible to prearrange an accident so as to obtain any given injuries. Mr. Johnston having interrupted Mr. Clute, the latter said: "Is my learned friend getting uneasy?" "Not at all," said Mr. Johnston. "The longer you keep at the doctor, the

better I'm satisfied. 'Then you should not interrupt." Mr. Clute finished his cross-examina-

tion at 12:30. To Judge Britton the witness said it was possible for a man to have a fractured skull and yet not lapse into unconsciousness for some hours Barrister Isador F. Hellmuth, of the firm of Kingsmill, Hellmuth, Torrance & Saunders, of Toronto, was next called. He had gone to see Walter Herbert in jail on July 26, of 1900. Witness told Herbert he must hear his story before accepting a brief. Her-bert told his story, saying that Jozeph Sifton's death was due to accident. The next morning witness went to Herbert, after having read in the city papers an alleged confession from Herbert. Witness told Herbert he could not take his case. Communications Re Afghanistan Must Be Addressed Through Government of India.

Kiel, Nov. 7.—Emperior William left here last night at 10 o'clock on board the imperial yacht Hohenzollern for England, where he will visit King Edward. A fleet of British torpedo boats will meet the Hohenzollern in British waters and escort ther to Sheerness. It is expected that the Emperor will remain at Sandringham as the guest of King Edward until Nov. 16, when he will go to Lowther Castle, to visit Lord Lonsdale.

The merchant says a letter from the Russian Government asking for closer commercial relations with Afghanistan was read by the America dispatch. by the Ameer in durbar.

Opinions were called for, and one nobleman suggested that the bearer of the letter be beaten. The Ameer caused a reply to be written, in which it was stated that he was willing to discuss the matter, but it was impossible to change in a moment the whole tenor of Afghan policy. All future communications must be addressed through the Communications be addressed through the Government of India, according to the precedent set by the late Ameer, Abdur Rahman.

Referring to Emperor William's approaching visit to England, the Berlin correspondent of the London Times says certain German journals which chronicle with manifest satisfaction any evidence of friction between Great Britain and France or Russia, speak as if Germany France or Russia, speak as if Germany were the only power which must not be criticised by the British press, and as if Germany's policy must never be considered at all in the light of its present or future bearings on British interests. These papers, says the correspondent, would apparently like to see in England a spirit of jovial good-fellowship and compliance towards all things German more characteristic of after-dinner conversation than the business portion of the day. If there were any possibility of the realization of this idea, and foreign politics could once more be treated by Englishmen in the easy-going way which facilitated many of Bismarck's plans, this complaisance would not be reciprocated by Germany, where public opinion, like the Government, is "toujours en vedette."

Vienna, Nov. 7.—An extraordinary instance of superstition is reported from the village of Gross-Zorlenez, in Hungary. The house of a widow, named Pova, had been lately repeatedly stoned, and the police were unable to discover the culprit. The widow's young son, becoming possessed of the idea that his father rose from his grave nightly and bombarded his former home, went to the cemetery, dug up the corpse, dragged it nearly a mile, and burned it. The boy was arrested.

NOW IN WORSE POSITION

Circumstances Are Looking Bad for Allan Mason.

Miss Morton's Watch Was Offered in Pawn by White Man.

Boston, Nov. 6 .- Today's developments in the case of Allan G. Mason, the wealthy business man who is under arrest charged with the murder of Miss Clara Morton, a laundress at the McLean Asylum in Waverly, last Saturday night, have been of a startling nature. It was announced first that the watch of the victim had been found in a Cambridge street pawnshop, where it had been pawned for \$4 by a young colored man, and this discovery at once led to a general search of the city for this man by the entire police force, but without avail. But later developments were far more sensational.

NEW LIGHT. When the pawnbroker's memory had been jogged a little and he had had time to think over the matter, he remembered that the watch had ben brought to his office on last Saturday night between the hours of 11 and 11:30, by a white man, and offered in pawn. Owing to the fact that it was after business hours, he refused to receive it, and after expressing disappintment the man departed, taking the watch with him.

watch with him.
On Monday morning the same watch was brought in by a colored man about 21 years of age, of whom the pawnbroker bought it for \$4. A burly colored man, evidently a companion of the other, had been waiting outside the shop while the trade was being made and as soon as it trade was being made, and as soon as it was completed he entered and took the money which the proprietor had passed over. Both men then departed.

STARTLING DISCOVERY. Continuing their investigations the officers made another startling discovery, to the effect that the watch of Miss Agnes McPhee, of Somerville, another "Jack the Slugger" victim, has been pawned at the same Cambridge street shop on Oct. 3, the day after her murder, by a white man, whose description tallied exactly with that of the man who brought the Morton watch to the pawnbroker's the Morton watch to the pawnbroker's

the Morton watch to the pawhitoker's last Saturday night,

The descriptions of these men is said by the police to agree to a striking extent with that of the suspect Mason, and the pawhitoker will be given a chance tomorrow to identify him, if possible, as the pawhit with the control of the developments have been his visitor. The developments have been most unfavorable to the prisoner, al-though his friends still claim that he can fully establish an alibi.

STILL A MYSTERY seismic disturbances in Guatemala. He says the ashes worked great benefit to coffee planters, because they killed off noxious insects and will serve as fertilizers.

anus far it appears that one watch was pawned by a negro, while the other was sold by a white man. To find those men, the entire police force of the city has been at work in vain for 48 hours. Meanwhile, it has been learned that a negro employed by the Mason family has gone away from the city, and the police cannot ascertain where he is. It was a negre when proposed the Morton witch. On negro who pawned the Morton watch. On the other clue, the pawnbroker who held the McPhee watch went to Cambridge today to have a look at Mason, for he declares that the man who pawned the watch was a white man.

STORM ON ALASKA COAST

Many Vessels Grounded on the Nome Beach.

Eight Persons Perished-Terrible Experience of a Crew.

Seattle, Wash., Nov. 7. - No less than eight men were drowned, three vessels driven ashore and practically every lighter on the Nome beach was wrecked in a storm that commenced on Tuesday, Oct. 14, and continued throughout the day. The facts are supplied by Purser Robertson, of the Ohio, who arrived today. The known dead are: Frank Kelly, George Robertson, George Fleuth and Samuel Josephson. A dozen or more people thrown into the surf were rescued by the life-saving crews. The schooner Louise, the steamer Elk, and the launch Fleet Wing were among the larger craft left on the beach. In each instance the crews were rescued or managed to reach the shore. The storm caused the water to back up in Snake River and Dry Creek and Dry Creek bridge was washed away.

PERILS OF THE DEEP. dozen on card, sale price 5c which they abandoned in mid-ocean, Oct. 15, after she was dismantled by a hurricane and waterlogged, arrived here today on the steamer Grenada from Trinidad. The vessel left Bear River, N. S., Aug. 13, for Buenos Ayres, with a cargo of lumber. On Sept. 18 she encountered the hurricane. Every effort was made to keep her afloat, but vainly. The crew worked night and day until Oct. 15, when the decks were almost level with the water. All hands abandoned the ves sel in the ship's long boat, which was provisioned, but had no nautical instruments. They steered southwest, and finally reached Grenada, on Oct. 25, having covered a distance of 1,450 miles in an open boat. Many privations were suffered during that time. The Florence B. Edgett was built at Digby, N. S., 1890, and registered 491

A CURE FOR ALL

Not a Patent Cure-All, Nor a Modern Miracle, But Simply a Rational Cure for Dyspepsia.

In these days of humbuggery and deception, the manufacturers of patent medicines, as a rule, seem to think their medicines will not sell unless they claim that it will cure every disease under the sun. And they never think of leaving out dyspepsia and stomach troubles. They are sure to claim that their nostrum is absolutely certain to cure every dyspeptic and

he need look no further. In the face of these absurd claims it is refreshing to note that the proprietors of Stuart's Dyspepsia Tablets have carefully refrained from making any undue claims or false representations regarding the merits of this most excellent remedy for dyspepsia and stomach troubles. They make but one claim for it, and that is, that for indigestion and various stomach troubles Stuart's Dyspepsia Tablets is a radical cure. They go no farther than this and any man or woman suffering from indigestion, chronic or nervous dyspepsia, who will give the remedy a trial will find that nothing is claimed

for it, that the facts will not fully sustain. It is a modern discovery, composed of harmless vegetable ingredients acceptable to the weakest or most delicate stomach. WILL FIGHT TAXATION Toronto Street Railway Company May

Appeal to Privy Council.

Toronto, Nov. 7 .- The Toronto Railway Company, worsted in Ontario courts, proposes to carry its fight against the taxation of rolling stock, to the Imperial Privy Council. The first step in the matter was taken yesterday when a notice of writ for a declaration by the courts that the as-sessment of the rolling stock of the company for 1902 is illegal, and asking for an injunction restraining the city from distraining on the rolling for the taxes until the matter is decided, was served upon the city. The assessment totals \$450,000, and

confirmed last winter by the taxes payable on this assessthis year amount to \$8,775. Under a judgment from the court of appeal this year the rolling stock of railways was held to be liable for assessment as being plant and not personalty, and in consequence the assessment was made before rolling stock had been exempted as personalty. Rolling stock is not now assessable, the amendment to the act governing scrap iron assessments specifically

exempting street railway rolling stock.

Where Preferential Trade Stands.

Mr. Chamberlain has not absolutely precluded the idea of a tariff preference for colonial products in the British market. He merely says that the preference granted by Canada is not so material an advantage to Great Britain, as to warrant the latter in exempting Canadian products from the present British grain duties. It can be readily understood that Great Britain, under any circumstances, would not care to grant this favor to Canada, alone, because she would be discriminating against Australia, New Zealand, South Africa and the other that Mr. Sifton did the right thing in portions of the Empire. It is plain permitting the Doukhobors to enter that a preference in the British market must be conditioned upon a preference for British goods in the colonies, at least in all the self-governing colonies. That is the situation at present. The Canadian Government proposes to meet it in a statesmanlike way. The Government will endeavor to frame a tariff schedule which will throw a still States, had this to say of a Congresgreater advantage to the British producer. As stated by the Canadian Ministers at the Colonial Conference, this might be done without injustice to any Canadian industry by increasing the duties on non-British importations. The Canadian Government also undertakes to urge the adoption of a British preference by the sister colonies. With all of them united on the principles of preferential trade, and in a position to submit a definite proposition to the British Government, the issue will remain with the people of Great Britain. The other colonies, or some of them, may not entertain the Echeme, or, if they do, Great Britain may refuse to depart from her tradit'onal trade policy. In either event, Canada is free to take her own course. Altogether apart from any reciprocal preference in the British market, the Canadian preferential tariff has proved a wise move. It was a substantial measure of tariff reform, and to that extent a relief to the consumers of the country. It has also fostered an enthusiastic goodwill toward Canda in the mother country, which has

yielded splendid commercial results.

The other day a cable dispatch to that British importations of American toots and shoes had practically ceased. Two or three years ago the ed country was buying a great deal of American footwear. Our enterprising neighbors crowed lustily over this conquest. The British manufacturers growled at it, but as they had no paternal government to help them they proceeded to help themselves, and so effectively that they have expelled the intruding Yankee shoe from the Lome market. The stimulus of competition proved a good thing for them, need to have the perseverance of the as it forced them to adopt newer pro- saints. cesses and adapt their wares more successfully to public tastes. Some of the Canadian boot and shoe manufacturers are complaining of American competition, but we believe it would le the worst thing that could happen the Canadian boot and shoe industry if the tariff were raised so high as to exclude foreign goods. The shoe manufacturers of this country are busier than ever before. They supply over 95 per cent of the footwear sold at home, but the small margin of American competition has served to put them on their mettle. Owing to the limited market they may not be able to put out as large a variety of patterns as the Americans, but they are producing an article that for finish, style, quality and price cannot be beaten. If they were assured of an absolute monopoly of the home market they would not have the same incentive to keep their products up to the top-notch of excellence. They have a very fair margin of tariff protection and can maintain their present hold on the Canadian market so long as they continue their present enterprising methods.

Those Boundary Marks.

An Associated Press dispatch says Lieut. Emmons, U. S. N., has reported to United States Secretary Hay that no monuments have been discovered marking the boundary line between Alaska and British territory. Some time ago a story was in circulation that Canadian officials had destroyed or removed some of these stone hears or monuments that were supposed to have been erected along the boundary line before Russia sold Alaska to the United States. There is no evidence that any such landmarks were ever put up. The British and Canadian Governments have denied any knowledge of them. It is rather surprising that Secretary Hay should have taken env notice of the cock-and-hull story that Canadians were laying hands on these suppositious boundary signs. Perhaps he took action in the matter from friendly motives in order to close the mouths of the jingoes. He commissioned Lieut. Emmons to make an investigation and the result supports the British contention. The matter is of little importance in itself, but it is another argument for the settlement of the Alaskan boundary question, which is the only source of friction at | advise me to do so, dearest?'

There is still another candidate for Congress who would be buried beneath an avalanche of hostile votes if the voters were alive to the duty they owe to their district and city. We refer to Timothy D. Sullivan. "All his life," said Chief of Police Byrnes of him a few years ago, "he has been the associate of thieves and bank robbers. His saloons are the resorts of local crooks. Daniel Driscoll, who murdered 'Beezy' Garrity; Peter Barry, leader of the Whyos, and Thomas Aveny, burglar—these are some of his companions." He is the real leader of Tammany Hall, and may be said to typify in his person every low and degrading ten-dency of the hall at its worst. At 39 he has accumulated \$400,000, after starting in as a bootblack, and this on a salary of \$1,500 a year as a representative of the City of New York in the State Legislature. In addition, he has partly owned two disreputable theaters, two alleged hotels and several saloons, and, as we have frequently stated, "is believed to have had a share in some large contracts, and has been charged with having participated in the 'protection fund' of \$3,600,000 apparatus." which is paid by poolrooms, policy chops, bawdy houses, and illegal businesses; besides having received gratuities from policemen he had advanced, prisoners he had discharged, persons whose indictments he had

It will mean glorification of the heeler and the boss, and the deification of the "grafter" and the corruptionist. It will mean that New York City has once more touched the lowest depths possible in its delegation in Congress. The election came and Sullivan triumphed along with the whole Tammany ticket. Mr. Flint is mentioned as the probable successor of Sir John Bourinot, as Clerk of the House of Commons.

Mr. Flint was born in Yarmouth in 1847, his parents, as is the case with so many residents by the sea, being of New England ancestry.

Past grand master of the Nova Scotia Freemasons, Mr. Flint has always been most popular throughout his native province.

GRANT MEMORIAL HALL

Corner Stone Laid at Kingston by Sandford Fleming.

Fitting Tributes to the Memory of the Late Principal of Queen's.

Kingston, Nov. 6 .- The faculty and students of Queen's, the citizens of Kingston and many prominent people from distant parts of Canada met today to do honor in a signal manner to the memory of the late Principal Grant. The celebration was twofold. First, the corner-stone was laid of the new Grant Memorial Hall, the funds for which, upwards of \$30,000, have been collected and subscribed by the graduates and students of Queen's. This ceremony was performed by the chancellor, Sir Sandford Fleming, in the presence of a distinguished gathering. Immediately thereafter the ompany repaired to the old convocawas held and a brass tablet in memory of the late principal was unveiled in the presence of a crowded audience. Rev. Dr. Ross, of Montreal, and Hon. George W. Ross, Premier of Ontario. delivered addresses which were eloquent tributes to and strong estimates of the work of Principal Grant. The corner-stone bore this simple inscription: "This stone was laid by Sir Sandford Fleming, K. C. M. G., chancellor of Queen's University, Nov. 6,

1902." On behalf of the Alma Mater ciety Rev. James Wallace presented and unveiled a splendid bass tablet bearing an appropriate inscription in memory of Principal Grant, which was acknowledged in a brief address by the trustees.

DESIGN OF THE HALL. The Grant Hall has been designed in close harmony with the new Kingston arts building, which it will adjoin. With its twin towers to the south, its range of external buttresses, its leaded and arched windows and clere-story windows, it will present what may be described as a semi-ecclesiastical appearance. Its great width-the dimensions are 100x70 feet-will, however render it distinctively an auditorium. The roof is to be hipped, in harmony with the tops of the towers. These are Romanesque campaniles, and, together with the entrance, are copied from a well-known example in the South France. The interior will be finished in stone and brick, with a barrel vault in wood and plaster. A gallery will run around three sides of the auditorium, and the total seating accommodation will be 1,000. In addition, the big platform at the north end will 200 more. The floor will have a slight pitch towards the platform. Both galleries and main floor will have direct communication with the Kingston arts building. A feature of the interior will be aisles, which will have the effect of cloisters. These aisles and the groynes in the roof will help to break up the sound waves, and, it is hoped, will have a beneficial effect upon the acoustics of the hall.

CANADA'S DRINK BILL

Amount of Spirits and Beer Used in Past Year-Tobacco Burned.

Ottawa, Nov. 7. - The annual report of the Inland Revenue Department for the year ending June 30 last shows that the quantity of spirits produced during the year was 3,234,147 proof gallons, as compared with 2,652,708 proof gallons produced in the previous fiscal year. The revenue for the year was \$11,433,871, compared with \$10,-608,708 last year, an increase of \$820 .-

The raw material used in the production of spirits during the year was 41,397,871 pounds Indian corn, 9,449,057 pounds rye, 3,432,066 pounds malt, 413,-465 bushels oats, and 29,470 bushels

The Dreadful Predicament in Which Many Pale, Weak and Emaciated People Find Themselves-Cure Obtainable by the Use of

DR. CHASE'S

Slow starvation is a frequent source of ill-health and results directly from debility of the stomach and bowels and their consequent inability to digest and assimilate the food.

Digestion demands a normal state of the blood and a healthful condition of the nervous system. Dr. Chase's Nerve Food cures dyspepsia and indigestion by purifying and enriching the blood, increasing the nerve force in the body and by so supplying the power to run the machinery of the di-

gestive system. The rosy cheeks, the healthful appearance, the rounded forms and increasing weight of persons who have used Dr. Chases Nerve Food speak volumes for its influence as a system builder and regulator of the digestive

and assimilating organs. The digestive fluids of the stomach are made to flow freely, the linings of the stomach and bowels take up the nourishment derived from the food and instead of slowly starving, the bodily tissues are replenished, firm. thy flesh is added and strength

and vigor return.
Mrs. J. Hamilton, 709 William street, London, Ont., states: "For a number of years I have suffered a great deal with nervous headaches and nervous dyspepsia and indigestion. Believing this to be the result of a weakened and exhausted nervous system I began to use Dr. Chase's Nerve Food, and can say that I found it very beneficial. It strengthened and restored the nerves, improved the digestion, and cured the adaches. I can heartily recommend Dr. Chase's Nerve Food to any affected as I was." Dr. Chase's Nerve Food, 50c a box.

BYE-ELECTION THE WAR OFFICE

Developed — Canadian Beef Wrongly Condemned.

London, Nov. 7.-The Daily Mail makes a great spread, with scare headlines, of another war scandal, in which a great Canadian beef consignment is wrongly condemned. The reference is to a large shipment of Canadian tinned beef, which shipment of Canadian tinned beef, which was condemned as putrid at Cape Town, but was subsequently, at the instance of the Canadian Government, found quite good, and was reissued to the troops. Official inquiry today elicits this reply: "The facts are highly colored in the Mail. If you want my private advice," said the official, "I would say, tell Canadians to shut up if they want more orders. Canada has done, and will do, very well with army contracts."

THE COLONIAL BLUE BOOK.

Colonial Secretary Chamberlain, in reply to a question put by Thomas Lough, the Liberal member for Islington West, said the reason for not publishing in the blue book report of the colonial conference the full report of the speeches of the colonial premiers, was that objection was taken that it would be a breach of privilege to publish what has been agreed upon to treat as confidential. No turther papers, he added, would be published.

A Doctor Treated Mrs. James Mowson of Stratford, for Eight Weeks for Liver Trouble-Since Taking Celery King Her Husband Says

SHE LOOKS BETTER THAN EVER Celery King, as well as being a most potent cure for stomach and blood disorders, as is shown by the accompanying testimonial, is a very agreeable drink. As to its potency as COSTLY JOKE an alterative, Celery King owes that to its being compounded with the end that nature should receive natural assistance. More explicitely stated, Celery King, in its working, builds up the entire system throughout. A great many so-called "cures," compounds and sarsaparillas do their work at the expense of one or more organs of the oody. Then a reaction sets in, often accompanied by complications and, to use a biblical reference, "That man's last state were worse than the first.' Celery King does away with any danger of bad reaction. The new ingredients contained in it prevent that possibility. Mrs. Mowson says: "I had a doctor treating me

bad taste in my mouth, and would belch up so. I told the doctor not to call any more, as he did not give me call any more, as he did not give me to call any more and met a friend, and of course told him how I felt. He said: 'As you have tried your doctor and he has not cured you, try a package of Celery King. It has cured me, but I did not let myself it will help you a little.' But I am glad to inform you that Celery King did not help me a little, but a very great deal. If you wish to use my name in this testimonial, I will be glad to let you inform the public of my great relief, as now I can eat anything and feel good afterwards. Ottawa, Nov. 7. — It is understood that Lieut.-Col. B. H. Vidal, deputy adjutant-general, Ottawa, and Surgeon-Lieut.-Col. G. S. Ryerson, of Toronto, have been promoted to the full rank of colonel. Colonel Vidal entered the Canadian militia at the age of 16, and re-ceived a commission in the Fourth Regiment of Foot in 1866. He served in the Abyssinian campaign, and was present at the action at Arozhie and the capture of Magdala. In 1897 he was appointed commandant of the Royal School of Infantry, St. Johns, and the following year became D. O. C. of No. 8 military district. He was appointed deputy adjutant-general at headquarters on July 1, 1901. appointed Col. Ryerson served in the Fenian raid of 1870, and the Northwest rebellion of 1885. He holds a medal for

each campaign. During the South African war of 1899-1900 he served as Red Cross commissioner. WHY GO LIMPING and whining about your corns, when a 25 cent bottle of Holloway's Corn Cure will remove them? Give it a trial, and you will not regret it.

MOLINEUX TRIAL NEARLY CLOSED

Strong Points Made for the Accused.

New York, Nov. 7. - Mrs. Anna C. Stephenson, who testified yesterday in the trial of Roland B. Molineux that to the best of her belief Harry S. Cornish was the man who mailed the poison package, resumed the witness torney Osborne wanted to know if it was true, as reported, that she did not recognize Cornish until he was pointed out to her in court. She replied that is was not true.

Several witnesses who were handwriting experts all testified that Molineux did not write the address on the poison peaks the poison package. A clerk in a drug store testified that he had sold bromo seltzer to Cornish, also to Mrs. Rogers. Miss Miller, the clerk in the store where the bottleholder was purchased, testified that she sold the holder late in the evening. Her evidence was corroborated by a man who was in the store at the time. The prosecution has held that the holder was purchased early in the afternoon. Miss Miller positively swore that the man who bought the holder was not Molineux. The defense rested at 11:40, and Mr. Osborne called Joseph Farrell, the Newark detective, as his first witness in rebuttal.

After the close of the prosecution's case, the Molineux trial was adjourned until Monday, when the arguments of counsel will be made.

Company Comes to Grief in Boston-Musicians Want Their Money.

Boston, Mass., Nov. 6. - Signor Mascagni and his Italian opera company have landed upon the rocks in Boston, and Italy's great composer is without a manager, with a company of 160 people, many of whom claim they have no money. The end came last night after a series of disasters since the arrival of the company in this city last Sunday evening, and Signor Mascagni's opera, "William Ratcliff," announced for last night, still awaits its first production

The Mascagni venture has been a financial failure, and it is stated that Messrs. Mittenhall Brothers and Kronberg are up to the present time about \$60,000 to the bad on account

of it. The different versions of the situation vary widely. The Mittenhall Brothers say that the members of the company are indebted to them for an amount said to be \$22,000. The musicians, who seem to be the leaders in the trouble, declare that the firm owes them for salary.

Residents on Block East of Wellington Petition For It.

It was decided at a meeting of the board of works last night to have the trees on the north side of Dundas street, between Wellington and Waterloo, cut down. The request to have them removed came in the form of a made by the club, and its success in every petition signed by W. M. spencer and others, who asked it on the grounds that they were not only an eyesore, but that they caused persons driving to take to that side of the street, with the result that it was badly cut up and made a sodden and filthy mudhole of the space along the block between the trees and the sidewalk. This was very objectionable to the owners and ten-ants, and hindered the renting of stores and houses. The only owners along the block who objected were Dr. Nelles and Mr. Wm. McDonough. The report of Mr. W. E. Saunders, who was asked for his opinion on the matter, did not favor the cutting down of any but the rotten trees. He said that they were an immense benefit to the street, and it would be a pity to cut them

The members of the board urged, however, that the block was becoming a business stretch, and as such should not have shade trees standing literally in the center of the street.

A Holiday in Bed.

I was told the other day, says Woman's Life, of a decidedly novel way in which two hospital nurses spent their vacation. Hospital nursing is very arduous, for the hours are long, and the two girls were thoroughly worn out. They went off to a seaside place, they took rooms, and they went to bed. People were surprised they did not go down stairs, and it was feared they were ill. When the landlady went up she was told very quietly they were quite well, but that they meant to stay there for many days. When they did get up it was only to take a walk, and, practically speaking, they spent their vacation between the sheets, and astonished their friends by the way they looked when they returned to town. They were sensible women, for most people would have gone in for what they called enjoying themselves, and would have returned to work more tired than

Lady Curzon's Elephants. Lady Curzon, too, has one distinction that is unique, says the London Household Words. She is the possessor of more elephants than any other Anglo-Saxon or European in the world, for more than one of her dusky admirers has sent her ladyship an elephant, ometimes two. One of these is an immense creature with the kind of wonderful sagacity about which we all read in school readers in the rays of our youth. Its unwieldy form. Lady Curzon in a white and gold howdah on its back, is often to be seen in the native bazars, and when the beast sees anything for which it has a fancy that article is promptly handed up to its mistress. One day last year he made a very queer present, nothing less than a small brown baby of 2 or 3 years old. It was the son of the great beast's keeper, and no sooner did the elephant see it trotting along with its mother than he seized it gently and lifted it in the air. The next moment Lady Curzon was gazing in astonishment upon a small brown baby clothed in a string of beeds. Need-lessly to say, it descended a richer and happier baby.

Youthful Frankness. "The absolute frankness of very

small children was aptly illustrated by a recent happening in an uptown family," said a gentleman. "A 5-year boy of the robust, adventurous order was particularly desirous of having a cycle. He strongly urged his father to buy him one, and his parent suggested that he should pray for one before retiring that night and perhaps God would send him one. During the afternoon, as he was closing his office. the father, remembering the conversation, decided to buy one. When he reached the shop, however, he concluded that the little fellow was too young to ride a bicycle, and purchased a tricycle instead. The present was placed in the woodshed after bedtime. and early in the morning the boy asked if the bicycle had been sent in answer to the petition. His father told him he had better look in the woodshed to see if it had arrived, and then followed close upon his heels as the youngster went to investigate. The little fellow looked surprised and disappointed on seeing the tricycle, and then turning his eyes upward with the utmost sincerity, but with a tinge of impatience woodland Cemetery, and was largely said: 'Oh, God, don't you know the attended. admirable aims of the society, and of its continued success and prosperity. The programme opened with a quartet, the "Oberon Overture," by Weber, well rendered by four of the club members, Mrs. J. Pocock, Mr. Albert Jordan, Miss. H. Fitzgerald and Miss Dorothy Yates. The club was fortunate in having upon the programme two artists who appeared in London for the first time last night, but whose reappearance will be anticipated with much pleasure by all who heard them. Miss Eileen Millett, of Toronto, a brilliant soprane, is a pupil of Mr. Torrington, on whom she reflects great credit. Her voice is delightfully clear and flexible, and showed to advantage in the Verdi numbers from "Il Trovatore," and the "Magnetic Valse," by Venzano, both difficult technically. The lovely Schubert songs, so rarely heard, were artistically sung and interpreted beautifully. She gracefully responded to encores, singing "May Morning," by Denza, and an exquisite ballad

As a result of the decision another petition asking that a piece of curbing at the northeast corner of Dundas and Wellington street be removed so that rigs could drive along the side of the street easier, was granted. Mr. William Abbott championed the cause of the petitioners.

Mr. W. H. Bartram wrote the board asking them if there was any intention of repairing Cavendish street. The letter was laid on the table.

Infamy's Success.

Tacon Theater in Havana, one of the largest and most famous in the western hemisphere, was built by an old reprobate, Marti, who was a notorious pirate in his day, and obtained immunity for himself by betraying his comrades into the hands authorities. One dark and rainy day, Marti rushed by the sentry guarding the palace in Havana, asd entered the apartments of the captain-general, who was writing at a table. When the captain-general raised his eyes and

saw the cloaked figure before him he reached for the bell.
"Stop, your excellency," cried the stranger. "I am here on a desperate enterprise. I have come to deliver into your hands every pirate on the Cuoan coast upon one condition-a par-

don for myself' "You shall have it," was the answer. "But who are you?"
"I am Marti and I rely upon the promise you have given me."

Preparatory to this interview Marti had appointed a rendezvous for the different bands, to which he conducted the Spanish force, and every pirate was captured and righteously garroted. As for Marti, he was not only pardoned, but was given a monopoly of the sale of fish in Havana, which made him a rich and thus eminently respected citizen, who ended his days in the odor

The mountings for ship guns and guns in coast fortifications are so designed and constructed as to throw into the power of one man, in so far as possible, the whole control of directing the gun at the desired target and firing it when ready, says Capt. J. F. Meigs, in the Engineering Magazine. The loading of the gun and the opening and closing of the breech block is performed to the rear of the man firing it, and therefore out of his sight, and certain interlocking arrangements in the firing apparatus are so devised as to prevent him from firing the gun unless the breech block is fully closed. Admiral Lord Collingwood, who was second in command to Nelson at the battle of Trafalgar, was in the habit of telling his men that, if they could fire three well-directed broadsides in two minutes, they were certain of victory. Their guns weighed 2,400 pounds. The modern six-inch breechloading gun, which weighs 12,000 or 15,-000 pounds, has been fired eight times within a minute at a target about 1,500 yards distant, probably quite three times the distance in Lord Collingwood's mind, and struck the target each shot. The difference here shown is due principally to the mounting. It is due in some degree to the fact that the modern gun is breech-loading, but the quicker rate of fire must be ascribed in large measure to the ex-

So stagnant has the market for paintings in oil become, says the London correspondent of the New York Tribune, that many artists of good reputations despair of ever again making a living by the sale of their work. The just action of the executive may bear hardly on the Torontos and on Morrison, justice promotes the best interests of the game, and must be upheld, even at some cost to the feelings of in-dividual clubs and erring players. Toronto's defense consisted largely in an effort to put emphasis on London's non-compliance with certain technical requirements. That sort of defense may be acceptable to the hair-splitters of the C. A. A. U., but the executive of the O. R. F. U. is made up of different stuff, and London got a chance to be judged on the merits of its case. The great merit of London's case is just this-that hockey in Pittsburg is on such a basis that the young Canadian who plays the game with the exiles should realize that he takes his athletic life in his hands. It is too bad that one mistake should put Mr. Morrison out of a game to which he is a credit. The general interests of the game are superior to the claims of the individual player, and the O. U. executive could not overlook the fact that Mr. Morrison had played with the Pittsburg outfit."

Toronto Telegram: President Mack's Canadian baseball league would, in all probability, be more popular, if there were more demand for it, or, in other words, if the demand came from the towns that would have to support the teams. Various towns in Canada have already had some experience with Canadian league ball teams, and the man who went to one of them and tried to sell stock in a ball club would be looked on with more suspicion than a lightning-rod peddler. Of course, the salary limit would keep out the bailiff this time; but it didn't do it before, and patriotism is not highly enough developed even in this Canada of ours to induce people to go into the cultivation of home-grown ball players, when the past shows that it is not likely to be done at a profit.

Ottawa Journal: Last summer the Chicago, Nov. 6. — Jordan, held at games in the Interprovincial League were well-attended by Ottawans, and

when people will travel under such adverse circumstances to the Little Farm grounds at Hull to see baseball, we are torced to conclude that they would also support the game if it were played in GOES HARD WITH TORONTO the city. It is practically settled that this city will be represented at the meeting to be called shortly for the purpose of perfecting the proposed scheme.

Hamilton Times: That Canadian league scheme won't do for Hamilton. Recent experiences with Woodstock and Guelph have been far from satisfactory, and Hamilton does not want to be tied up with them again. Toronto substituted for Woodstock, it would be better. wants good ball, and good players cannot be secured at \$500 to \$000 a cannot SIMPLY FICTION.

Cleveland, Nov. 7 .- Napoleon Lajoie says regarding the story from New York that John T. Brush had personally seen the king of ball players and had offered \$35,000 to Lajoie for a twoyear contract with McGraw's team: "That's a good story, only it's fiction. I don't know that I have ever seen John T. Brush."

AFTER SIEVER. Detroit, Nov. 6.-Ed. Siever, the local left-hander, has received another letter from McGraw, of New York, asking him to name, at once, his terms for 1903. There has been considerable correspondence between manager and player, but it has not before reached the figure stage. It is more than probable that Siever will sign with New

Tom McInerney, the Irish champion is in Buffalo. Asked as to his plans, McInerney said: "Of course the object of my trip here is to meet your best American wrestlers. I am prepared to meet McLeod again, or I will tackle Tom Jenkins if he cares to meet me. But before I go against the American champion I would like to take in a few of the small fry."

FAR OFF HILLS LOOK GREEN.

A great Shoe centre, is Boston! Canadian skilled labor has made it so! Its total population is about 650,000. Of this, 117,000 were born in Canada. The State of Wassachusetts alone contains over 350,000 Canadians.

A heavy percentage of these are making

Making the same kind of shoes in the United States, that their Fathers and Brothers are making here, in The Slater Shoe factory.

Why have these people emigrated? Because United States wages are 25 per cent. higher than Canadian.

Why don't their Brothers follow?

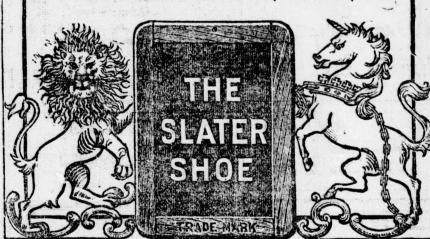

Because the cost of living in Massachusetts is 50 per cent greater than in Montreal, so that workmen who have children, or non-earning parents, to support, net better results, at lower wages, here.

But—who pays the 25 per cent. difference in wages?

Figure this out before you buy United States Shoes in Canada, which must also pay 25 per cent. Customs duty, when entering this country. "Far off hills look green" but they are

rocky enough when you climb them. "The Slater Shoe" has all the good points of the best United States shoe, and it is made in Canada - by Canadians - for Canadians.

Was Caught in a Flashlight Picture-Divorce Proceedings.

New York, Nov. 7.-While passing a drug store window two weeks ago, William Brewster, of 57 Sixth street, Hoboken, was attracted by a flashlight photograph taken of the interior of the Empire Theater, that city, on its opening night. The picture seemed to show his wife, Lottie, seated in the front row of the orchestra with a man. Brewster had suspected her for some time, and the picture decided him. He has begun proceedings for divorc. In the bill of complaint, which he has filed in chancery through his counsel, Assemblyman John Fallon, of Hoboken, he names, four corespondents. Mrs. Brewster's maiden name was Long. She was married to the complainant in the spring of 1901 by the Rev. M. Beatty, pastor of the First Presbyterian Church, of Hoboken.

Smallpex at Port Huron.

Sarnia, Nov. 6.-Dr. C. A. Hodgetts, of Toronto, arrived here this morning. commissioned by the Provincial Board of Health to inquire into the condition of the smallpox outbreak in Port Huyon, with a view to taking measures to prevent the spread of the disease to this side of the boundary. It is reported that fully 60 cases have developed in Port Huron, and that fresh cases are occurring every day. Precautionary measures in that city have been very lax and there are practically no facilities for combating such an outbreak, so that the situation is alarming, and calls for prompt action by the Ontario Government.

ANDREW'S SOCIETY CONCERT Mr. Leonard Auty, of New York, who is to make his first appearance in London at the grand Scottish concert, on Tuesday evening, Nov. 11, is one of the leading tenor singers of that city. Commenting upon a recent appearance in New York, the Scottish-American says: "His 'Macgregor's Gathering' wrought up the Scotch enthusiasm of the au-dience to a high pitch, as he gave full effect to the stirring expression—the fire and spirit and defiance contained in its lines, while the pathos of the 'Flowers of the Forest' was equally well produced." Mr. Auty will bp request sing these two songs in London,

while his first number will be "The Land o' the Leal." Besides Mr. Auty, Miss Jessie Maclachlan, Miss Dorothy Taylor, Mr. Ruthven McDonald and the St. Andrew's Highland Cadets, will all take part. AN UNPLEASANT EXPERIENCE. Has it ever been your unhappy lot to be told by your physician that you must go to a hospital and submit to an operation? If so, you remember with what dread and shrinking you awaited the day when you must endure the knife. The present day surgeon appears to be possessed by a mania for operating, especially in cases of hemorrhoids or piles, and while the greater number of the profession do not recommend this "last resort" unless they honestly believe it necessary, the fact remains that much needless operating is done, and the patient put to much expense and suffering, for what? To obtain a possible temporary relief; these words are used advisedly, because in nine cases out of ten the affliction returns and the patient is just where he started from. Oftentimes he could be cured much more simply and easily by the use of such a remedy as the Pyramid Pile Cure; this has come to be recognized as the best remedy on the market for the painful disease named, and the druggists now sell more of it than all other pile remedies combined. The writer personally knows people who were afflicted with the worst form of bleeding and protruding piles and who were permanently cured by the use of Pyramid Pile Cure. In every one of these cases the attending physician had assured the sufferer that only by an operation could he rid himself the disease; so much for the infalli-bility of the doctors. This remedy, which is sold by all druggists at the low price of fifty cents, is in suppository form, is applied directly to the parts affected, and performs its work quietly and painlessly. The Pyramid Drug Co., Marshall, Mich., will mail

dinary Activity and Success.

Mr. John Pringle Unanimously Reelected President.

The annual meeting of St. Andrew's Society, which was held last night, marks the close of a year whose prosperity has been unapproached in its previous history. In financial success, in the importance of its undertakings and in the interest developed among the members, this past year has been notable. The prestige of the society has increased, its good works have not diminished, its chief object, which is to keep alive and warm the memories and thoughts of the old Donald was absent, he read also the land, "of woodland wild and valley green," has been happily accomplished. These pleasing results have not been due years proprietor of the Rattenbury to the efforts of any individual, but to tions \$896 50, which leaves a small bal-House, Clinton, and brother-in-law of the desirable combination of loyal support Mr. George T. Hiscox, died yesterday by the public, an interested membership, the the Homewood Sanitarium, Guelph, and a zealous, hard-working and able body of officers. Among these latter, the trouble. He was the oldest resident of first in position and nearly everything else-certainly in enterprise, capacity for work and the skill and energy which brings success, was Mr. John Pringle, president. If Mr. Pringle ever thought when working during the year for the good of the society, that his light was hidden under a bushel-probably he did not, for he is a modest man-this idea must have been completely shattered before the meeting was over last night, as he was forced into accepting the presihome of Mr. T. D. Box, was the scene dency for a second term, in the kindest but most decisive manner. In this the day evening, when his daughter, Miss members were unanimous and enthusiastic, so much so that Mr. Pringle must have been repaid for the thought and

time which he has devoted to the society. The election of officers was probably the most important, but not the most interesting feature of the meeting. Any one of the members, had he afterwards been asked, would surely have acknowledged that for a meeting of men, the women were talked of very much. This carried carnations. After the wedding be, had it been a meeting of Irishmen, B. Campbell; honorary secretary, Mr. who are notoriously partial to the girls, but it's not so looked for with soberminded Scots. The fact is, that these members of St. Andrew's Society are enjoying such prosperity that they are conscience-stricken. They feel that they are selfish in keeping so much to themselves, and are beginning to think that they ought to let the ladies share it. No more delightful proof could be given of the falsity of the idea that men don't think

FLOURISHING CONDITION

When the meeting had neither the election of officers to talk about, nor the ladies, they had plenty of satisfaction in musing over the excellent financial position which the society is now in, as shown by Treasurer Jones, who, by the way, gave up any notion of kicking about being re-elected to that position, as he had learned by the failure of twenty-five or more such annual kicks that St. Andrew's Society wants him to celebrate the centennial of his assuming of this office. Briefly, he told the society that it has a balance of very nearly \$900, which is by far the healthiest balance the society has ever had. As Mr. R. D. Mctreasurer's report of the St. Andrew's Cadets, in which the receipts for membership totaled \$461 50, and the subscripance after paying for the kilts. There is still a certain sum-something in the neighborhood of \$300-uncollected, though subscribed, and this will permit the society to get rifles for the boys and have even then a comparatively small deficit in the corps' account.

It will therefore be seen that the society is in a flourishing condition. Some of these days they may feel strong enough to have a home of their own. This was talked of last night, and Mr. John Miller, formerly a member of the Winnipeg society, told of the success which has attended the establishment of quarters in that city. This will be looked into by the executive committee, to which the question of arranging for the annual celebration of St. Andrew's Day was also left. It was, however, mentioned during the meeting that it is probable that Hon. G. W. Ross, Hon. George Foster, and Rev. W. J. Clark will be speakers at the banquet.

The full list of the officers elected is: Honorary president, Col. Macbeth; president, Mr. John Pringle; first, second and third vice-presidents, respectively, Messrs. E. J. MacRobert, R. D. McDonald and Jones; assistant treasurer, Mr. F. D. Macsie; past president, Mr. J. B. Mc-Killop; chaplains, Rev. Messrs. W. J. Clark, A. J. MacGillivray, D. L. of London's Prosperity.

Mr. Alex F. Pirie, the versatile editor of the Dundas Banner, spent a few days in London this week, looking up old friends. He publishes a sketchy account of his visit in the Banner. Mr. Pirie was much impressed with the McClary works now in course of erection, and says that one of Colonel Gartshore's projects is to plant a village on the opposite bank of the river for the employes of the company. He has secured a farm of 200 acres upon which houses will be erected, so that workmen may pur-

chase them. Mr. Pirie comments favorably on The Advertiser's "splendid new building," and says this journal is evidently bound to be up-to-date. Mr. Pirle

"We had the pleasure of hearing a sermon by Rev. W. J. Clark, also an old Dundasite, who has within the last year received tempting offers from Vancouver and Winnipeg, but who seems to be very fond of his present charge and people. He had preached to the Kilties, an organization of young volunteers, in the morning, when the church was filled. But it was filled again in the evening when Clark gave an excellent sermon. His people seem to be very fond of him and very proud of his abilities, well they may, as he is one of the best preachers in Canada, and one of the most effective. Very little gesticulation, but a quiet, impressive, earnest and sympathetic-voiced preacher, whose every word seems to be uttered with the hope of convincing. His mother is a sister of James Somerville, of Dundas, and the old lady is pardonably proud of the fact that she has given two sons to the ministry, Rev. John Clark, of Parkdale, being

THE NEW ELECTRIC RAILWAY.

I think the workingmen of this city will know what to do with the new electric railway next January. They will see to it that if this council will not do its duty by the citizens they will elect a council that will. Every man running their cars. Those present at the meeting were Ald. The feeling of the meeting indicated that satisfactory arrangements will be made between the two companies.

Manager Carr expressed himself as in favor of seeing the new company get into London, as it would be in the interests of the city and the local company by many be sure the voters of London of London in the local company by many be sure the voters of London vou may be sure the voters of London vou may be sure the voters of London vou may be sure the voters of London get into London, as it would be in the interests of the city and the local company. The latter is ready to enter into an agreement for the running of Traction Company cars over their lines. The construction of the 3,300 or 3,500 feet of track necessary to connect the two lines, said Mr. Carr, would be done by his company if the city would consider it as track allowance under bylaw 916.

Mr. Welch said the Traction Company is willing to construct this track, but as the local company did not want another company owning track inside

Now, how are we old temperance workers going to cover this wide breach between the two temperance parties? As the matter now stands only parties? As the matter now stands, only those styled prohibitionists will be found at the polls on Dec. 4. There was a lamentable blunder made by the Liberals lamentable blunder made by the Liberais last May, in their feverish excitement to wreck the Ross Government, to put a whisky party into power. In the year 1834 I signed the temperance roil, and have been in said cause up to May last. Previous to that time I was foremost in every temperance movement. Will the prohibition party now work as hard to cement the two temperance parties, as they did to divide them last May?
