A Derangement of the Nervous System. A berangement of the Netwons System.

(73- In NERVOUS COMPLAINTS, Drugs and
Metholines increase the disease, for they weaken the
vital energies of the aiready prostrated system; while,
under the strengthening, life-giving, vitalizing infaence of Galvanism, as applied by this beautiful and
wonderful discovery, the exhausted patient and weak
eneed sufferer is restored to former health, strength,
elasticity and wigher.

when all hope of relief had been given up, and everything else been tried in vain!

To illustrate the use of the GALVANIC BELT, suppose the case of a person afficted with that base of civilization, DYSP-PSIA, or any other Ghronic or Nervous Disorder. In ordinary cases, atmulants are taken, which, by their action on the nerves and mucles of the stomach, afford temperary relief, but which leave the patient in a lower state, and with injured faculties, after the action thus excited has ceased. Now compare this with the effect resulting from the application of the GALVANIC BELT. Take a Dyseptic sufferer, even in the worst symptoms of a attack, and simply lie the Belt around the Body, using the Magnetic Fluids a directed. In a short period the insensible perspiration will act on the positive element of the Belt, thereby causing a Galvanic circuition which will pass on to the negative, and thence back again to the positive, thus Keeping up a continuous Galvanic circuition, the supplementation of the Belt State of the State when all hope of relief had been given up, and every-thing else been tried in vain!

TURKISH BLACK SALVE.

INDER THE PATRONAGE OF THE HONORABLE

PHIS SALVE, prepared from the original Receipt, procured from a celebrated Turk shi Hakim, (physician) of Smyrna, in Asia Minor, and which has obtained an unprecedented celebrity in Great Brifain and the East Indies, from the astonishing Cares performed by it in both these countries, has lately been introduced into Mont-real. As might be expected, its popularity has followed it, and its use is becoming general among all classes. The contracted limits of an advertisement necessarily precludes entering into any adequate detail of its merits, but, for the information of the public, it is intended to publish, from time to time, such statements of cures as have or may occur. It has been used for the following complaints with the most complete success:—Such as Swollen Glands, Broken Breasts, White Swellings, Whitlows, Scalds from Steamboat explosions, or other causes, Burns, Fever Sores, Scrofulous Seres, Sore Nipples, Carbuncles, Scald Head, Gun-shot Wounds, Bruises, Boils, Frostbites, Wens, Chilblains, Ulcerated and Common Sore Throats, and Boniens. If used in time, it will prevent or cure Cancers, also, Swellings arising from a blow on the Breast, Ring Worm, Pains in the Back, Rheumatism, Gout, Pains in the Chest, Palpitation of the Heart, Complaints in the Liver, Spine, Heart and Hip, Rushing of Blood to the Head, Swelled Face and Toothache. In fact, it is impessible to enumerate half the complaints that have been cured by the application of

A HISTORY OF THE LATE PROVINCE OF LOWER CANABA, PARLIAMENTARY AND POLITICAL

ROBERT CHRISTIP, Esq., M.P.P. for George.
Quebec: Thomas Carv, 1850.

In the preface to this, the third volume of his most vuluable history, the author tells us, he had originally latended that the work should be comprised in three volumes, but that, since the publication of the second volume, some interesting original papers, relating to the history of Lower.

Canada, have been placed in his hands, in consequence of which he has altered his intention, and Canada, have been placed in his hands, in come quence of which he has altered his intention, and will extend the work to four volumes. Every one who is interested in the his ory of Lawer Canada, will be glad to hear of Mr. Christies determination, for, since the destruction of somany valuable documents and works elucidating the earlier history of this Province, contained in Mr. Fartbault's collection, totally consumed on the contained in Mr. Parthault's collection, totally consumed on the never-to-be-forgotten night of the 25th of April, 1849, every fregment that can be brought to gether assumes a ten-fold value.

The volume before us, narrates succinctly the

events that occurred in Lower Canada to the ex-piration of the Provincial Parliament in 1834, embracing part of the Government of Lord Dalhousie, that of Sir James Kempt, and part of that

of Lord Aylmen to the last and a state of the last with the last and the last to the last acknowledgment's prefixed to this volume. Since the publication of the second volume, a question was raised, by the Monreal Courier, we believe, in the first instance, as to how for the expedition to Platsburgh, in 1814, under Sir George Prevent, was to be attributed to that officer's own will in the matter, or to instructions received by him from England, We think that Mr. Christie has fully proved that the Governor of Carada acted under instruction, and has, thus far, vindicated his memory. Whether the expedition itself was conducted on truly scientiste military princi-ples, in quite another matter; we do not think it was, but this is not the place for a discussion of the question. Sir George Prevent's policy, during the whole of the last American war, was the work, assume to write among property ducted strictly on the defensive—such being not called; he simply elaims to give a sketch of the only in accordance with his instructions from called; he simply elaims to give a sketch of the colly in accordance with his instructions from called; he simply elaims to give a sketch of the called; he called the ca England, out also emores on any processing the content of heatilities, the necessary means in Canada for as offensive warfare. But a terwards, when the upfire of the Canadian people was thoroughly roused by Brock's success at Detroit, the capture of General Hill, success at Detroit, the capture of General Hill, such as unch as impartial nearation or success at Detroit, the capture of General Hill, such as content in the most success at Detroit, the capture of General Hill, such as content in the most success at Detroit, the capture of General Hill, such as the most success at Detroit, the capture of General Hill, such as the most success at Detroit, the capture of General Hill, such as the most success at Detroit, the capture of General Hill, such as the most success at Detroit, the capture of General Hill, such as the most success at Detroit, the capture of the c DeSa'aberry the British Government felt that Cannada will safe from offensive operations by the Americans, and the glorious termination of the Peninsular compaign leaving a fine army at their disposal, it was considered by the English Afiniaters that offensive operatio's might be undertaken. The event proved that it have seen.

At eight o'clock, the time appointed for the At eight o'clock, the time appointed for the was a very unfortunate idea. We have, however, but very little space for detail; it accepts that very little space for detail; it accepts though, from a despatch of the 3rd of June, 1814, from Earl Bathurst to Sir George Prevost, that that General was if possible, to "desfroy Sackeit's Harbor and the naval establishments on Lake Eric and Lake Champlain." He was cautioused, however, not to advance so far into the American territory as to endunger the safety of any portion of the army. But the destruction of the establishment on Lake Champlain could not be accomplished without a forward movement into the American territory and Sir George Prevost, therefore, seems to us to have had no other alternative, if he wished to corry out his instructions. Mr. Christic distinctly states that Captain Floor and Mr. A. W. Cochran, who filted the poste of Military and Civil Secret sy to Sir George Prevost during the expedition, have frequently, in his hearing, attributed the unfoward expedition to orders from Englaird, and he publishes a private despatch from Sir Georga to Earl Bathurst, after the retreat of the army, in which he explains the causes of the failure of the expedition, and hitmutes that in former despatchs he had a second of the former despatchs he had a second of the state of the army, in which he explains the causes of the failure of the expedition, and hitmutes that in former despatchs he had a second of the second of th Bathurs, after the retreat of the army, in which he explains the causes of the failure of the expedition, and hitimates that in former despatches he had pressed on the Secretary's attention the fact that no affracts operations could be carried out the energy a territory without efficient name upport. How shamefully part of the navel facility port. How shamefully part of the navel facility behaved, we know from the testimony of our gallant enemy, Macdonoush, who distinctly stated for the commissioners of its Industrial Exhibition of the Processing of the New York, and we know should have and gunboats done their duty, the Americans must have been bestier, and we know also that Rayes and McGee, both Lieutenants is the Royal Newy, never, after their shameful flight, duted down themselves to stand a Courte-Martial in Logiand and were consequently struck off the New York. Will Mr. Christic forgive we if we wenture to diment from one implied opinion expressed in the fact of the farther processing never have been invoked. We do not think that the Indians are auxiliative, where and in war had a never have been invoked. We do not think so are successfully yours, and where the commissioners is the more reason why ahe should not use the heavy knives of the Ghastan, or why are should not not the fact of the services of all her subjects; then a no more reason why ahe should not use the heavy knives of the Ghastan, or why are should not not the fact of the services of all her subjects; then a not not be gettlemen, by a link of the factor processing a manifestion of the sould return to the factor of the sould return to the sould return to the factor of the sould return to a sould return to the factor of the sould return to the factor of the sould return to the factor of the sould return to the

Not the least interesting part of the book, is the account of the author's own persecution by the demagogues of the Lower Canada Parliament—it is not every men that can say, he has been five times elected by his constituents, and five times expelled by a Parliament, of which it is not too much to say, that if it had had the power, as it had the will, it would have been fifty times so tyrannical as any such Assembly the world ever law. As it was, its raving and storming were but like the tempest in a certain utenail of ignomations offers, which is quieted by pitching it out of a window; and Mr. Christie in his arm-chair may smile when he thinks that he has lived long enough to live down calumny, and see his malignant enemies scattered like chaff, witle he sits triemphantly, no man having a chance in opposing him, for the same constituency which with samirable consistency and contage; five times returned their persecuted member. The only user of those found in the major ty against Mr. Christie, on these successive expul sions, that now exists as a public man, is Mr Louis Lafontaine-and he, only last year, narrow

When the arrangement between the Through Ethe and Mr. Bethune's Company expires, on the Sth Negember, the proprietors of the farmer for tend to put on the Passport as an opposition hear to Mr. Bethune's lit will, however, be too lists in the season to do more than make a show of opposition. Mr. Bethune is in treaty with Capt. Dick's share-sone-half—of the Chief Vastice Robinson, for £7,000. Captain Dick is to build himself not to run any load so the lake is opposition for ten years. The arrangement will most likely be made, for Cuptain Dick, fike every other sensible man, must see the great difficulty of contending with the Through Line and Mr. Bethune's combined; the company that owns the latter, consisting of 80 porsons, with an acapte capital. For the last few years, the schooners engaged in the lake trade have been decreasing in numbers; and, in a few more years, it becames as if the Polligan, in the street. The secret of the success of the steam craft is the immense average in time that results from their rapid sailing. A Pollicon will make twenty to twenty two trips in a season from the head of the lake to Montreal, while a schooner would not make more than six or seven. Last senson, the Ottown carried dottin 33,000 barrels of flour. The schooners can hardly make a paying business of it at less than 1e. 6d. per barrel from the head of Lake Ontario to Montreal, while the steam eraft end. Trey would remember that the body had been found near the prisoner's house, and his immediate neighbor, Munro, had positively savon that no gun had been discharged from his house that night. The deceased's body had been found lying on the ground immediately opposite prisoner's door. They would remember that when search had been make in prisoner's house that a gun had been found in a closet which bote evidence of having been recently discharged. All these facts would go a great way, to fasten upon the prisoner the discharge of the gun. All the facts that he had narrated were corroborated by Murray, who also gave direct tes-

formation on the subject.

The Globe is laboring hard to whip in the unru'y Ministerial pack, As things go at present, the total disruption of the Ministerial party is evident and this the Globe is trying hard to avert. The great complaint of that journal is, that the Ministry have no policy before the country—that their supporters do not know what measures they intend to introduce, and that the Press is in utter gnorance of all their movements. This the organ calls a want of tact, and proposes, as a re-medy, the formation of Reform Committees in every County, which shall be committed to the policy of the Government; and that no member of the party shall be at liberty to express inde pendent opinions on the policy of the Government That is what the proposal amounts to. The ef-fect of this scheme would be to make the Globe the organ on all those Legislative questions on which it has now no information whatever, and perhaps to prevent some of the complaints that ow have from the Ministerial ranks. It is, in act, a clumsy attempt to surround the Ministry with a factitious eclat, and to curb the free expression of opinion. But it will require a good deal of maxing to persuade men of independent views and feelings to enter into political engagement hat would compel them to sacrifice their convicions at the shrine of party. The Globe does not comprehend that it is the advance of opinion that splitting up the Government party. It is a total missperchepsion of the actual political con-dition of Upper Canada, to suppose that the old see-saw game of Tory and Radical is to be played forever. The bulk of the people will not allow hemselves to be thrust into the rank of either the old decaying parties. A new state of things is dawning. There exists a desire for elective institutions, which neither of the old parties are willing to grant. They are both alike behind the times. Neither of them can control that popular

THE GENUINE BALM OF COLUMBIA FOR RESTORING THE HAIR.

"Long bar is a glory to woman." says Paul, And all feel the truth of the pious quotation; Preserve it than, indies—your glory may fail,

I long bar is a glory to woman." says Paul,
And all feel the truth of the pious quotation;
Preserve it than, indies—your glory may fail,

If you wish a rich, laxuriant bend of hair, free from daily of the second your expectations. Many who have lost their hair for twenty years, have had it restored to the original prefection by the tase of this baim. Age, state, or condition, appears to be no obstacle whatever; it also causes the fauld to flow with which the delicate hair tubes is filled, by which means thomanods (whose hair was gray as the Asiatic angle) have had their hair restored to its natural color by this invaluable remedy. In all cases of favor is will be found the most pleasant wash that can to used, will be found the most pleasant wash that can to used, from falling out. It satesighests that contains the used, from falling out, it satesighests the roots, in over falls to impart a rich gloss appearance, and as a perfuses for the toilet it is unequalled. It holds there times as much as other miscailed hair restoratives, and is store effectain.

POINT IN JOUR, PARISH OF PASSON THESA truly valuable WATERS are distinguished for the large quantity of Bromise and Indiane they contain, and are acknowledged superior to all other Medicineal Waters. They are the most agreeable refreshment of the description that have yet appeared. They can be used cold to the generat degree in the most apprensive heat of Sammer, and that without altering or affecting injuriously the health of the person using them appose the contrary, they are found to improve and strengthen. The large number of cares effected by the use of the above Waters, enable us to recommend their to the public us an excellent remedy in a very great number of cases. The against of a few only of the persons of celebrity, who have given their written recommendation of the Waters, are here given. These, however, show the happy results arising from their application in

The Proprietors have their Depot established at No. 6, Jacquee Cartier Place, next door to the Hotel of Serafino Giraldi, Esq. The distance for conveying the Waters to the Depot is so trifling, that we are enabled to have a constant supply fresh, and are consequently in possession of a better market than any other person. Prices, 7jd. per gallon, and 2s. the dozon, (in bottles.) Sick persons, unable to pay for it, can have some gratis, by producing a certificate from their Physician, since we are unwilling that any should be deprived of these healing and wonderful Waters, prepared by Providence for his creatures, which are apparently designed for the alleviation and cure of many protracted and dangerous diseases.

Dn. G. W. Halber: I believe your form Wine and Pills have been the means of saving at life. When I commenced taking them, I lead at the point of death, with Bropsy, Piles, and astiman. My Physicians had given the over at post-cure, and my farmity had lost all hop of any recovery. While in this deadled stu-tion, your Forest Wine and Pills were procured for se, and before I ham finished the first bottle of the Wine, band book of Pills, I experienced great rivel; my body and limbs, which were greatly scoten, became sensibly reduced. Hopes of my recovery began now to revive, and after continuing he need your medicines for about a mouth, the Pristod Anthona were completely cured. The broad, with which my life were placed in such grad danger, was also nearly gone. I have continued the use of your Mediciness until the present time, and I now enjoy as perfect health as ever I die a my life, although I am more than said, your of us.

I ascribe my recovery entirely to the und your excellent Medicines. Several of my septembers have also used them with smaller we can a obstimate compilaints, and I can cheerfully recovered the tens to the public. SAVED FROM DEATH!
