NO. 48

THE KINRADE TRAGEDY

Baffling Details in Testimony Given at Inquest.—Recalls the Famous Borden Case of Fall River

The Kinrade murder case of Hamilton, Ont., is still as great a mystery at the close of the inquest as before. Miss Florence Kinrade, the sister of the murdered girl who was found in the dining-room of her house with nine bullets in her, persists in her statement that the murder was the work of a tramp and that there was no other person in the house but herself. Her statements conflict with each other at times and she is subject to swooning fits. The most unsatisfactory part of her evidence is the fact that the body was according to the doctor's testimony lifeless over an hour before the girl summoned a neighbor. There is a theory that the girl was not unacquainted with the murderer.

Hamilton despatch of 11th inst.—The Kinrade murder mystery is still a mystery, but if the line of questioning followed by Mr. Blackstock for the crown last night is not one of aimless irrelevance, a foundation is being laid for a startling revelation. At twenty minutes to two o'clock this morning, in answer to a direct question by Mr. Blackstock as to whether she could identify her sister's murderer, Miss Kinrade with a little cry answered: "I don't know his name, but, oh! I should know him if I saw him," and fainted. Doctors came to her, and on the motion of Mr. Hobson the inquest was adjourned till seven o'clock to-night.

For three hours Florence Kinrade was in the witness box and she was closely cross-examined by Mr. Blackstock with regard to the murder of her sister Ethel. The story which she told reveals so far no new fact, although in the course of her evidence there can be observed certain discrepancies in comparison with her former stories. Her evidence is also remarkable in regard to the incidents connected with her sojourn in the South, and because at Rochester and Buffalo she claimed to have stayed as a guest at houses the addresses of which and the names of their owners she cannot remember.

Apparently she was introduced to her career as a soloist by a Miss Elliott, an English woman given to traveling, whose present whereabouts she does not know, and who introduced herself to the girl at the Mac-Nab church. So far as her connection with Baum, with whom she was associated at a vaudeville theatre in Portsmouth, is concerned, she admitted that she proposed marriage to her having knowledge of her engagement to Mr. Wright, but she said that she regarded his attentions as a joke. Both Miss Kinrade and her father, who was on the stand two hours, spoke of the family being scared by mysterious men, supposed tramps and by an attempt to break into the house.

Beyond lapses of memory, Miss Kinrade gave her evidence clearly, although evidently under high nervous tension. Miss Kinrade said that she attempted to get out of the window of the parlor but the assassin pulled her back. How it happened that she had previously said she had got out of the window she did not know. Neither could she explain why when she ran into the back-yard she did not scale the fence, one easy to climb, and get assistance. As to the number of shots, the witness was unable to speak definitely. She thought that one was fired while she was upstairs. At least she heard a bang but did not realize that it was shooting. One shot was fired at herself as she ran out of the front door.

The silence of the court room became tense at one point when Mr. Blackstock, after going over Miss Kinrade's story, asked her if she had not at one time told of struggling with the man in the dining-room and there actually seeing her sister, who had come to see what was the matter, shot.

The Small Shareholders the Losers

(Mail and Empire, Toronto.)

The litigation between the Dominion Iron and Steel Company and the Dominion Coal Company ran its long course to the bitter end, which for many of the rank and file of the shareholders proved a disastrous one. When two great corporations repair to the courts to fight to the bitter end over claims amounting to millions of dollars, the position of the small shareholder is bound to be an uneasy one.

In a long conflict at law, involving appeals from one tribunal to another, the shares of the contending companies are sure to suffer in market value. The holder of such shares, desiring to turn them into money, finds buyers loath to take them except at a price as low as to anticipate a final decision adverse to them. Both the coal stocks and the steel stocks declined sharply in price as an effect of the uncertainty of the law. Men and women who had invested their savings in the Coal stock at \$100 share sold it in nervousness or under necessity at \$50. The litigation was ruinous to many thrifty people. Banks, not foreseeing what the outcome might be, prudently declined to lend money on the shares of the warring corporations. This, however, did not stop speculating in the shares. At least, it did not prevent men of large resources from gambling on the chances of the case. These "big men" had other securities they could pledge for the money borrowed to deal in Coal and Steel shares. Successful ones bought Steel stock and sold Coal stock short. Such speculation aggravated the situation of the small holder of Coal Shares. Take the supposititious case of a rich plunger who found himself in possession of 20,000 shares of Coal stocks at the beginning of the action. At some stage of the fight let him be supposed to become convinced that the Steel Company would win. Such a man would at once sell Coal stock and buy Steel stock. Unquestionably this was done on a very large scale, and the operation was an exceedingly fortunate one for some of those engaged in it.

How many big shareholders in this way shifted their position as the Steel Company's prospects seemed to brighten it is impossible to say, but it is conceivable that men whose weight in the Coal Company was great at the time the fight began and whose voice was for war, saved themselves by a timely selling out of Coal and purchase of Steel shares. But there was nothing for the small shareholders to do but bide the result. They could not "hedge." Yet it was not the small shareholders who brought on the fight.

How many big shareholders in this way shifted their position as the Steel Company's prospects seemed to brighten it is impossible to say, but it is conceivable that men whose weight in the Coal Company was great at the time the fight began and whose voice was for war, saved themselves by a timely selling out of Coal and purchase of Steel shares. But there was nothing for the small shareholders to do but bide the result. They could not "hedge." Yet it was not the small shareholders who brought on the fight.

Convicted Bankers Find a Shortage in Jail Accounts

Pittsburg, Pa., March 9.—Convicted bankers, now in prison in the Western Penitentiary here, have discovered an apparent discrepancy of more than \$26,000 in the accounts of the penitentiary, and it is said that the amount may be found to be even larger. The board of visitors of the Western Penitentiary some time since appointed Henry Reiber, formerly paying teller of the Farmers' Deposit National Bank, now an inmate of the penitentiary, to audit the accounts of the institution. Finding an apparent discrepancy, and being unwilling to assume all responsibility, Reiber obtained the assistance of William Montgomery, former cashier of the Alleghany National Bank and J. B. F. Ribbhart, former cashier of the Farmers and Depositors National Bank of Waynesburg, Pa., both convicted in the penitentiary, who are said to have agreed with him in his findings.

Reports of the alleged discrepancy were made to the board of visitors, who are awaiting the return of Warden William Johnson before making further investigation. It is said to be probable that the alleged discrepancy may be accounted for by bad book-keeping.

Repeat it:—"Shiloh's Cure will all ways cure my coughs and colds."

CORRESPONDENCE.

The Valley Experimental Farm

Editor Monitor-Sentinel:

Doubtless most of the readers of the Monitor are aware that a movement is on foot to establish an experimental farm in the Annapolis Valley.

The farm at Nappan, though it may have been a benefit to the farmers of the province in some particulars, has been a failure so far as an advantage to us in horticultural education goes. So it has been decided to establish one in the Valley.

The successful growing of apples is the most profitable branch of the farming industry in this Valley and though some may think they know it all, yet the better informed feel that they have only realized "the edge of the vast field of horticultural knowledge."

An experimental farm in horticulture in this Valley is an absolute necessity. The question now comes up, where shall it be located? Wolfville is determined to have it, and at the annual meeting of the Fruit Growers' Association in Middleton the Hon. O. T. Daniels strongly advocated the claims of that enterprising town.

Now the writer suggests Bridgetown as being the ideal locality. Wolfville has had its share of good things. The Horticultural School, under Prof. Sears, has proved of immense advantage to the surrounding country. Not only the young men, but the older men and women as well have attended and have obtained valuable knowledge.

They should be willing to give us at this end of the Valley something. Middleton has its McDonald Consolidated School. We have nothing. It is our turn now.

Dr. Sanders of the Experimental Farm at Ottawa, and Professors Cumming and Sears of Truro have been appointed to select a farm. Dr. Sanders has partly decided on the Elderkin farm near Wolfville but the price is \$12,000 or \$14,000. A farm can be purchased near Bridgetown just as good, in fact, better, for much less.

If I am correct, the province is to pay for the farm and the Dominion Government to pay the running expenses.

Now it is up to this part of the country to work this scheme up and to urge upon the government the justice and fairness of our claims.

Fortunately we will have the strong assistance of our Local and Dominion members and that will count for much.

Probably the selection will soon be made and if anything is to be done it must not be delayed.

Now, who will take the initiative in this matter? Who will lead off? Some energetic young man should take hold of it.

—S.

Information Wanted.

Editor Monitor-Sentinel:

Some weeks ago a piece was published in the "Monitor," under the head of "Old-time Schools and School Masters," by Mr. Benjamin Starratt, of Paradise, concerning the schools in the Annapolis Valley and their teachers of many years ago. I do not know if Mr. Starratt kept a "diary," or quoted from memory. Would he remember a man (?) who taught school at Granville Ferry some fifty years ago, who made himself notorious by inflicting brutal punishment on several of the boys who had committed minor offences. He used to take them out of the schoolroom to the entrance hall or shed, lock the door of the shed, put the key in his pocket, order the boy to take off his clothing, and then cruelly beat him until either his strength was exhausted or help and rescue arrived from the outside, attracted by the strokes of the weapon used and the boy's cries for mercy which could be heard a long distance away, and on entering the schoolroom, tears of sympathy could be seen running down the cheeks of all the other scholars. Does this find in human shape still cumber the earth, or has he gone to his just reward? If school teachers now should attempt such a thing, it would not be long before they would find themselves behind prison bars and they should be kept there at hard labor the remainder of their lives.

ENQUIRER.

Would Have Open Churches All the Week

(Montreal Witness.)

Public sympathy in Boston appears to be with those who have started a movement for keeping the Protestant churches open on week days.

The Roman Catholic churches are open every day, some of them at night as well as by day, and there is a feeling that church doors should not be closed against those who seek consolation in prayer and meditation or even restful quiet for a little while away from the distractions of the streets or the worries of business.

In summer and fine weather the parks and squares afford resting places for the weary and the troubled the unemployed and those who would snatch a few moments from the stress of exertion.

But during our long winters these have no places to go, except the schools, which are always invitingly open until midnight, and some of them, of course illegally, long after that hour.

The movement for open churches took its rise from the recent successful revival held by the Evangelists Chapman and Alexander, who, at their closing meetings, appealed to the church to look after the converts desirous of living a Christian life and keep in touch with them. They needed helpful influences to steady and support them in their new and often hard first endeavors to resist temptation, places of spiritual refuge and inspiration, and what could be more natural than such should be sought in the churches, whose doors ought to be open to receive them?

The Rev. Edward Worcester, founder of the Emmanuel movement, addressing a meeting of Yale students, said there was nothing sadder than to see life of all kinds swelling outside and the well-equipped churches with doors tightly closed, often with barred gates.

When the ministers were asked how the idea of having their churches opened to them, the preponderant majority stated that they would be pleased to join in such a movement.

Some thought it would require additional expense, with which some congregations could not be burdened. A few declared against it, but all seemed to feel that it would be an added uplift to the community.

There was entire unanimity, however, in support of having divine service every day in one or more churches in the city.

The evangelists declared that their knowledge of the benefits of a church that would be open every day came from their experience in every city they had visited.

There are many thousands whose religion is for every day, and the churches, it was held, should gladly respond to their needs.

It is certain that in most churches the week-day services that are held are not so attended as to warrant the hope that daily services would have the requisite of such services, namely, worshippers.

As for making the churches resting places and refuges for the poor, that would be making them into employment and relief bureaus, for which they would need to be equipped at considerable cost.

It is obviously desirable that places of prayer and meditation should be at all times open, should it be found that such use was made of them.

DOMINION EXPERIMENTAL FARM

Standard of Agriculture Materially Raised.—Eighty Tons of Seed Sent Out This Year.—Seedlings for Early Spring Planting.

Few people recognize what a potent factor the experimental farms have been in the production of improved varieties of field and garden crops as well as in the production of superior live-stock breeds. The experimental farm, by its methods of testing with consequent discovery of the varieties or breeds best suited to every locality, has been of material value in raising the standard of agriculture and agricultural products. New varieties have been originated by the experiment station or have been brought from some foreign country and have been grown upon the experimental farm until acclimatization has been effected, thus rendering successful growth under the changed conditions possible. This is one of the most important results that has been accomplished by the experimental station.

The Dominion Experimental farm has performed many important experiments in this respect, and it is scarcely possible to make a statement that will cover absolutely every result that has been consummated. During the past fourteen years experiments have been conducted on trial plots for the purpose of gaining information as to the most productive and earliest maturing varieties of cereals, fodder corn, field roots, and potatoes. The Experimental farm bulletin, recently issued upon this topic states that, in arranging for these plots, the seed has always been supplied at the beginning from a common stock. In each case the seed has been sown as early in the spring as possible, and generally all the different varieties of the same crop have been sown as nearly simultaneously as possible so as to give all an even start. The soil for these crops has been raised to a high condition of fertility, and has been maintained as nearly uniform in character as could be obtained by cultivation, so as to inhibit the contingency of one crop possessing undue advantage over another. The bulletin presents in tabulated form the results of experiments performed past fourteen years. Every farmer should obtain a copy of this most valuable bulletin, since from it he can learn which varieties of grain or field roots can be grown with the greatest success in his district. The results are not from one year's experiments alone, but comprehend an average of yield for the last five years. A five-year average exhibits conclusions that generally can be depended upon as being fairly accurate. The plots upon which the experiments are conducted are one-sixtieth of an acre, those, however, for field roots are only one-hundredth of an acre. The size of these plots are sufficient to present a fair average and to exhibit clearly the character of the growth. The results are also embodied in the report of the tests carried on at the Experimental farms at Nappan, N. S., Brandon, Man., Indian Head, Sask., Lethbridge, Alta., Lacombe, Alta., and Agassiz, B. C.

In our present review we wish to deal only with the experiments at the Dominion farm. The report states that, while all the varieties of spring wheat suffered from drought and the attacks of the Hessian fly, the injuries varied a great deal with the character of the variety. Downy Riza and Hungarian White suffered very much in this respect, and the reason is given to be due mostly to soil variations. The varieties giving the highest yields were Bishop, Preston, Pringle's Champlain and White Russian. Twenty-four varieties of oats were tested, and the leading varieties in regard to yield proved to be the Twentieth Century, White Giant, Selected, Golden Beauty and Thousand Dollar. The seed was sown on May 15th and 16th at the rate of about two bushels per acre, except when the oats were exceedingly large, when the quantity was decreased accordingly. Thirteen varieties of six-rowed barley and eleven of the two-rowed kind were grown. The six-rowed barley was sown on May 7th at the rate of about one and three-quarter bushels per acre, while the two-rowed was used at two bushels per acre, and on account of rain the seeding was not completed until May 11th. The varieties claiming pre-eminence in the six-rowed barley were the Nugent, Stella, Odessa, Mensury, and Albert, while in two-rowed the leading ones comprehended the Swedish Cavalier, Standwell, Clifford and Canadian Thorpe. Eighteen varieties of peas gave good results. The amount of seed varied from two to three bushels per acre depending on the size of the grain. The premier varieties were the Prussian Blue, Mackay, Prince, Pictou and Victoria. The average crop of all the varieties was 28 bushels 42 pounds per acre. Fourteen kinds of Indian corn for ensilage were tested. They were sown in rows about three feet apart and the plants thinned out to six or eight inches apart in the rows. The seed was sown on June 2nd, and the crop was cut for ensilage on September 10th. The highest yielding varieties proved to be Eureka, Superior Fodder, Early Hastoden and Salzer's All Gold. The average yield in 1908 for all the varieties was 17 tons 1,348 pounds per acre. Turnips gave the high average yield, with twelve varieties in the test, of 27 tons 1,033 pounds per acre. The seed was sown in drills two feet apart and the young plants, thinned out to about seven inches apart in the rows. The seed was sown on May 22nd, and the crop was harvested on October 24th. The leading varieties were Perfection Swede, Hartley's Bronze, Hall's Westbury and Magnum Bonum. The mangels were sown in drills two feet apart and the young plants were thinned out to about seven inches apart in the row. The seed was sown on May 22nd, and the roots pulled on October 21st. The average yield of the ten varieties grown on the farm in 1908 was 23 tons 690 pounds per acre. The premier varieties were Prize Mammoth Long Red, Half Sugar White, Giant Yellow Inter-

Free to You, Madam, our 1909 Catalog of Dainty Millinery

Showing the Newest Spring Models in dainty hats to suit every age from "tot" to matron. You can buy from the McKendry catalog in perfect confidence that our millinery experts, second to none in America, will suit you as perfectly as if you bought your hat in person in our store. We give first attention to Mail Order business. Write for catalog to-day.

McKENDRYS LIMITED
226-228 Yonge St. TORONTO

"THE HOME OF THE HAT BEAUTIFUL"

The Log School House of Long Ago and Its Association

J. G. Hodzins, the historiographer of the Ontario Department of Education, includes in his annual report of 1908 the following graphic description of the typical schoolhouse of the early days, written by one of the Old Masters:

"Very distinctly the vision of a school of the old time, although at a date much less than fifty years ago, rises before me as memory carries me back to the little Canadian hamlet, in which boyhood was passed.

Voice Gave Out.

Thomas P. Macdonald, a prominent singer of Teeswater, says: "Six years ago I became a victim to La Grippe and had it in its worst form. The attack was unusually severe, and left me in a terribly weak, and run down condition. My voice also completely gave out, and my lungs seemed to be seriously affected. People who knew me thought I was not long for this world."

"One day I saw in the paper what PSYCHINE had done for others and thought I would give it a trial, so I set it for a sample bottle. This gave me such immediate relief, and I decided to try it. I determined to keep on with it at all costs, and in spite of what the doctor had said. In an incredibly short space of time I was completely restored, and my voice was soon in grand shape again. They used to tell me that a breath of wind would blow me away, I had got so thin, but PSYCHINE built me up in no time; I am a pretty solid specimen of humanity to-day, having gained in weight and put on flesh all the time."

STOP THAT COUGH OR THE RESULTS WILL BE SERIOUS. You can do this by toning up the system with Psychine. All druggists and dealers sell it. 50c. and \$1.00. FREE TRIAL sent on application to DR. T. A. SLOCUM, Limited, Toronto.

REMARKABLE SURGICAL OPERATION.

In a remarkable paper read at the meeting of the American Philosophical Society in Philadelphia, Dr. Alexis Carrel of the Rockefeller Institute showed how the kneecap of a dead man has replaced the injured joint of a living person; how the arteries of husband and wife have been successfully joined, so that the wife might endure the shock of a surgical operation; how an infant's blood has been revitalized by the blood of its parent; how a human artery and jugular vein have been interchanged; and are fulfilling each the other's function; how the kidneys of one cat were substituted for the corresponding organs of another, and how a living fox terrier now frisks about upon the leg of a dead companion.

"In my experiments to preserve arteries," states Dr. Carrel. "I found that desiccation would not do, but produced a state of absolute death. Then I put the arteries in refrigerators and kept them inclosed in hermetically sealed tubes, at a temperature a little above freezing. I found that an artery could be kept alive for sixty days and substituted for the artery of a living animal."

Clearly, the day is not far off when the perfect organs of a man who in life had been free from disease may be kept in cold storage after his death and used to replace diseased organs in living men.

BRANDY FROM SEWAGE.

The Paris correspondent of the London Daily Mirror says: Some remarkable statements are made today about the way certain kinds of very cheap brandy, gin, rum, and other spirits are made. According to these statements, a large quantity of alcohol is now very cheaply distilled from the sewage matter of great cities and it appears that the entire sewage from Southeastern Paris is submitted to perfected distillation process. The alcohol so obtained is macerated by a special secret cold process, and so treated, is sold as cheap brandy, and for mixing with various kinds of fancy alcoholic liquors.

PHYSICIAN TELLS HOW HE TREATS RHEUMATIC PATIENTS

A Distinguished Specialist Gives Valuable Advice.

In the first place I always impress upon my patients the importance of careful living and regular habits. Moderation in eating, keeping the feet dry and wearing plenty of warm clothing are some of the precautions. No amount of medicine will cure, or even help, unless attention is paid to these few simple rules.

I have had perfect results where patients followed these instructions, assisted by the following blood tonic and rheumatic specific: Fluid Extract Cascara, 1/2 oz.; Fluid Extract Carriana Compound, 1 oz.; Compound Syrup Sarsaparilla, 6 oz. Dose: One teaspoonful after meals and at bedtime.

It is advisable to drink plenty of water during the treatment. A prominent local merchant who has tried this treatment states that it relieves backache, bladder trouble, and urinary troubles almost immediately, and has a gentle but thorough action on the kidneys.

We advise all our readers to keep this prescription. The instructions are valuable.

In memory's wall, hangs a picture, Of a school house old and bare; It hangs with a beautiful lighting And I love to see it there; It stood on a bleak country corner. But boyhood's heart was warm; It glowed in the sunlight of summer. 'Twas cheerful in winter and storm.

The teacher, O well I remember, My heart has long kept him there; Perhaps by the world he's forgotten, His memory no touch can efface. He met us with smiles on the threshold, And in that rude temple of art. He left, with the skill of a workman, His touch on the mind and the heart.

Oh! gay were the sports of the noon-tide, When winter winds frolicked wit snow; We laughed at the freaks of the storm king, And shouted him on all arow. We flashed at his beautiful sculpture, Regardless of all its array. We plunged in the feathery snow-drifts, And sported the winter away.

We sat on the old-fashioned benches, Equaled with our pencil and slate; We thought of the opening future, And dreamed of our manhood's estate. I rapt a fond glance o'er the meadow The hills just beyond it I see; Away in the charm of the distance, Qld School House! a blessing on thee!

EASY TO MIX THIS

What will appear very interesting to many people here is the article taken from a New York daily paper, giving a simple prescription, which is said to be a positive remedy for backache or kidney or bladder engagement, if taken before the stage of Bright's disease:

Fluid Extract Dandelion, one-half ounce; Compound Kargon, one ounce; Compound Syrup Sarsaparilla, three ounces. Shake well in a bottle and take in teaspoonful doses after each meal and again at bedtime.

A well-known druggist here at home, when asked regarding this prescription, stated that the ingredients are all harmless, and can be obtained at a small cost from any good prescription pharmacy, or the mixture would be put up if asked to do so. He further stated that while this prescription is often prescribed in rheumatic afflictions with splendid results, he could see no reason why it would not be a splendid remedy for kidney and urinary troubles and backache, as it has a peculiar action upon the kidney structure, cleansing these most important organs and helping them to sift and filter from the blood the foul acids and wastes which cause sickness and suffering. These of our readers who suffer can make no mistake in giving it a trial.

LUTHER BURBANK PLANT WIZARD.

In order that his discoveries may be more generally distributed and incidentally that his work may not be hampered by business worries, the brains and genius of Luther Burbank the Plant Wizard, have been capitalized at several million dollars. The men who have secured the sole right to distribute to the world the plant discoveries of the Tanta Ross naturalist are Hartland Law and his brother, Herbert E. Law, two well-known millionaires of this city, and Oscar E. Dinnar, a wealthy eastern capitalist. There is no limit to the riches which the men have secured, except one or two small contracts which Burbank is fulfilling. Working alone, Burbank has not had time to give the results of all of his experiments to the public, but now a systematic effort will be made to distribute both his past and future products to the world.

One of the first things to be undertaken by the new company will be the fuller development of the sunless cactus which promises to transform the desert wastes into grazing lands for cattle. In this connection it is announced that Burbank has developed a cactus capable of producing saccharine matter which will yield both sugar and alcohol.

GOOD COUGH MEDICINE FOR CHILDREN.

The season for coughs and colds is now at hand and too much care cannot be used to protect the children. A child is much more likely to contract diphtheria or scarlet fever when he has a cold. The quicker you cure his cold the less the risk. Chamberlain's Cough Remedy is the sole reliance of many mothers, and few of those who have tried it are willing to use any other. Mrs. F. F. Starcher, of Ripley, W. Va., says: "I have never used anything other than Chamberlain's Cough Remedy for my children, and it has always given a good satisfaction." This remedy contains no opium or other narcotic and may be given as confidently to a child as to an adult.

For sale by W. A. WARREN, BRIDGETOWN, A. E. ATLEE, ANNAPOLIS ROYAL, and BEAR RIVER DRUG STORE.

A postal card mailed at Gibraltar, and addressed simply "Spelled either way, Springfield, Mass., U.S.A.," was promptly delivered to Otto Bagh a piano dealer of that city.

The Farmer's Calling

(N. O. Nelson, in Central Canada Citizen.)

The farmer has his fortune, his comfort, his intelligence in his own hands everywhere, but more fully in Canada than anywhere else, because the Dominion government affords him more practical direction. The majority of farmers in all countries make indifferent use of their opportunities. They lack initiative, run in ruts, take up with new ideas slowly or none at all. To this there are exceptions a plenty to prove the possibilities.

Immigrants into a new country are more enterprising and make larger and better farms and communities in a few years than they did at home. Necessity compelled them to plunge in, they had to initiate, the spell of tradition was broken, the habit of enterprise and work got fixed, and they kept it up. More important still is co-operation, getting together, getting inspiration and knowledge from contact in affairs of mutual interest. Association is the talisman in the farmer's calling more than in any other. Voluntary association for business, for education, for sociability, is the power to raise the world.

After a life-time of political agitation mostly revolutionary, the great Mazzini said, "Italians associate! cooperate!" After seventy years or an agitator's life, much of which had been political, George Jacob Holyoke said, "Of all the reforms I have been connected with, co-operation is the most important."

The farmer needs co-operation more than any other class. He needs it for business, for social stimulus, for education in and out of school. The farmer suffers from segregation, and its resultant loneliness, from inertia from inherited habits, often from ignorance. He raises half a crop, he raises to sell rather than to eat, he wastes time and material, he keeps slovenly premises and inferior tools and stock. This does not apply to all farmers, but to many. It applies to all countries, and more to the old communities than the new. Quebec and the old south and the north-east and the Alleghenies in the States are far behind the west and north-west.

The farmer needs little legislation. Laws neither make nor mar his crops they affect in no appreciable degree his prices. He does not need more knowledge than he has or than is readily accessible. What he needs is to use well the resources he has and do the things he knows and says he should do. The farmer who will carry out what he knows and approves will in a few years revolutionize his own home and fortune and profoundly influence his neighborhood and country. Raise all of his living that will grow in his climate. That will leave a very small grocery bill. Raise some more of it than for his own use and sell it. That will pay his store bill. Drain sub-soil, pulverize, fertilize and cultivate frequently his land, he will then get two or three times his former crop for very little more work. Keep good breeds of stock, they eat no more, but the cow gives twice as much milk, the steer and hox weigh twice as much, the horses pull twice as big a load and plow twice as much land. Keep the barn and tools and fences and roads in repair, the barnyard clean, the drains open. Have a family orchard with all the fruits, have a home acre with big shade trees around it, a grass lawn regularly mowed, with shrubs and rose bushes and flower beds and no weeds. Don't go in debt for a big house which takes a lot of money and drudgery to build and to keep up, but make the modest house a beauty within and without.

Then associate with the other farmers. Have a co-operative creamery and keep five to ten cows that will give from four to eight gallons a day, of five per cent. butter-fat milk. The best Holsteins or Jerseys will give a gross income of from \$150 to \$200 a year at present butter prices when perfectly fed and kept. I have seen on a common Quebec farm, cows with a certified record of 12 gallons a day. Have a co-operative buying and selling association, a stallion syndicate and a store.

It lies entirely with the farmers themselves to: Raise a living at home. Double the crop. Make the home attractive. Co-operate in all their business. Already Denmark has done it to the extent of quadrupling her exports of butter, bacon and eggs in twenty years and changing the poor peasant country into a rich farming country. Four-fifths of the Dames are now co-operators—in farm produce, stores and banks.

Ireland has done it. Minnesota and Wisconsin have done it in butter and cheese. California in fruit packing and shipping. Illinois, Iowa, Minnesota and Dakota in grain. Canada has done it in a smaller degree; it should be a leader. When once there is this business co-operation, the improvement in price, in quantity and quality of product, is inevitably followed by better homes, better schools more social life, better fellowship, more life.

BURNS & SCALDS.

DAILY MISHAPS MAKE ZAM-BUK A DAILY NEED.

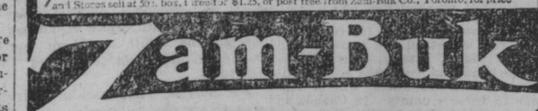

ACCIDENTS will happen in the best regulated homes; and having a box of Zam-Buk handy is a precaution that has saved thousands of families much worry and expense. There is never any knowing what a small injury may lead up to if neglected. The stoppage of the bleeding, or the pain from a cut, burn, or scald, lulls many people into a false sense of security. Dust getting into a wound may set up festering, inflammation, and blood-poisoning. In a similar way, a tiny cut may be the starting point of itching and irritating eczema; and the spot your child scratches on his head, the unsuspected beginning of ringworm or some other hair-destroying scalp disease.

Zam-Buk, while such a perfect healer, is also the inveterate enemy of skin-disease. A burn, scald, cut, or bruise promptly and regularly dressed with this rare and rich balm cannot "turn the wrong way"; and any tendency of the skin to become itchy, inflamed, or "matt-r-r-r," is speedily checked. This is because Zam-Buk not only grows new, healthy skin, but, being so refined, is absorbed by the pores, and its healing essences make perfectly healthy all the underlying tissues. Always keep a box of Zam-Buk handy, for daily mishaps make Zam-Buk a daily need.

BAD SCALD CURED. Mrs. W. Corkey, 13, Richmond Square, Montreal, says: "My little grandson was severely scalded on his right leg from the line to the ankle. This injury was very serious, and demanded great attention. We used nothing but Zam-Buk, and it was wonderful how cooling and soothing it proved. It was some weeks before the leg was really healed, but there was not a scar left to show where he had been scalded. As the home 'remedy,' I trust Zam-Buk is without equal."

CHILD BURNED BY STOVE LID. Mrs. H. Girdlestone, 106, Rawdon Street, Bradford, Ont., says: "I find Zam-Buk a splendid healer of children's injuries. My little boy burned his foot very badly on the red-hot lid of the stove. The skin was completely lacerated, and he had a shocking foot, the wound turning to a running sore, festering, and discharging. I applied Zam-Buk, and it effectively checked all discharging and festering, drew out the inflammation, and finally healed the wound without a scar."

Zam-Buk is a positive and certain cure for cuts, burns, bruises, sprains, riles, festering sores, ulcers, scalds, blood-poisoning, sores, chapped hands, cold cracks, lacerations, ringworm, scalp sores, bad leg, diseased ankles, and all other skin diseases and injuries. Rubbed well into the parts affected, it cures neuralgia, rheumatism, and sciatica. All Druggists and Stores sell at 50c. box, 12c. per tin, or post free from Zam-Buk Co., Toronto, for price

It Reaches the People

Cured His Rheumatism In Three Weeks.

James LeB. Johnstone, a prominent member of the Citizen's Band, of Chatham, writes:

"I contracted Rheumatism by exposure, five years ago, and was ailing for two months and in great pain all the time. I got Father Morrissey's No. 7 Tablets and took them for about three weeks, when the Rheumatism all left me and I have had no return of the pain since."

Father Morrissey's "No. 7" Tablets

have cured thousands of this terribly painful disease. Rheumatism is generally brought on by exposure, but is really caused by Uric Acid in the blood. This Uric Acid is an irritating poison, formed from the waste matter of the body. The kidneys should remove it, but when they fail it poisons the blood, and, settling in the joints, causes Rheumatism.

"No. 7" Tablets clear out the clogged-up Kidneys and stimulate them to perform their task of filtering the Uric Acid out of the blood. When this is done the Rheumatism simply and naturally vanishes.

"No. 7" Tablets cost 50c. At your dealer's.

M. K. PIPER

PROPRIETOR AND PUBLISHER.

WEDNESDAY, MARCH 17, 1909.

The question of a location for the new experimental farm for the Valley is again revived. It was for a time supposed that the Elderkin and Robinson farms of Wolfville had been decided upon, but it seems that the matter is still in abeyance.

A correspondent in this issue makes the suggestion that Bridgetown would be the proper site, being well located and having a number of suitable farms which might be obtainable at a reasonable price.

The Monitor heartily endorses this suggestion, and gladly submits the letter to the consideration of our farmers. There is no time to be lost in the matter as every section of the Valley is or will be making overtures to secure it. The facilities for railway and shipping transportation are as good as anywhere in the Valley, while for orchard experimentation no better location could be found. Many farms hereabout combine orchard, tilled land, upland, meadow and virgin soil, all of which would be required for a system of experimentation. The advantages to our farmers of having instruction through object lessons constantly before them would be incalculable and would raise the standard of our agricultural section immensely.

In a word this is a good thing. Let us make an effort to get it.

HONORS FOR GOODWIN.

The Charlottesville, Va. Daily Progress says Stanton and Goodwin, of California, were the stars in the recent football contest between Virginia and John Hopkins Universities, and described their work on the field as follows:—

"Stanton, the speedy Californian ran a speedy race. He had caught and passed his man, Hunter, on the first lap. The lead alternated between the two runners several times, but the Californian finally handed down to Wiltshire a lead of about four feet. But Hopkins was there with the goods in the person of Fulton and again it was a see-saw, first one and then the other being in the lead. The excitement by this time was intense. The spectators were on their feet and the roar was deafening. Apparently there were as many supporters of Virginia present as there were of Hopkins enthusiasts. Wiltshire by a mighty effort gave Goodwin of Virginia a lead of four feet over Stollenwerk, the Hopkins star, who, last year in the dual meet with Hopkins, on Lambeth Field, won the quarter from Goodwin and Waples. But there was a different story this time, for in one of the most sensational quarters ever run, Goodwin came out victor, winning the relay for Virginia by seven feet.

No idea of the brilliant race that Goodwin put up could be easily described in words; it must have been seen to be appreciated. At the finish Stollenwerk was in a state of collapse. The entire audience rose to its feet at the finish to give the victor an ovation."

Goodwin, referred to above, is a son of G. H. Arnold Goodwin, formerly of Bridgetown, now the president of one of the foremost real estate companies in Los Angeles, Cal., bearing the name of G. H. A. Company. Mr. Goodwin's two sons are attending the University of Virginia and are making a splendid record in their studies as well as winning honors in athletics. Their mother, Mrs. Goodwin, is a daughter of Mr. David Phinney, and with her family spent the summer at the old homestead here three years ago, a visit which we trust they will find opportunity of repeating ere long.

Domonion Experimental Farm

(continued from page 1.)

mediate and Yellow Intermediate. Sugar beets gave very successful results. Three varieties only were tested, and of these Villmorin's Improved gave the highest yield, with French Very Rich and Wanzleben following very closely. The seed was sown in drills two feet apart and the young plants were thinned out to about five inches apart in the rows. The seed was sown on May 22nd, and the roots were harvested on October 23rd. The average yield of the three varieties was 18 tons 133 pounds per acre. Twenty-three kinds of potatoes were grown. For planting, the potatoes were divided into pieces with at least three eyes in each, and these pieces were planted in rows two and a half feet apart, and placed about a foot apart in the rows. The average yield of the crop in 1908 was 118 bushels 8 pounds per acre. The leading varieties were Dooley, Vermont Gold Coin, Morgan's Seedling and Holborn Abundance.

The distribution of seed grain from the Experimental farm closed on Feb. 13th. Over 20,000 samples were sent out altogether, and even these were inadequate to supply the demand. Great interest has been exhibited, especially in the Northwest territories, in the growing of improved varieties and there has been extensive co-operation among the farmers in this regard. These 20,000 samples aggregated altogether almost 80 tons of seed.

In the horticultural department the young seedlings are being prepared for early spring planting. The method followed comprehends root grafting upon crab apple stocks. It has been found that the crab apple stock can be used to the greatest advantage, since this tree is very hardy and can withstand the extreme cold of the winter. Besides, it is capable of thriving under adverse soil conditions. These seedlings will be sent out to various points in Canada in order to test their hardiness. Formerly Canada has been dependent upon southern varieties, and it has always taken some time before these became acclimatized to the Canadian winter. During the winter experiments have been conducted in regard to the best temperature for keeping fruit. The results of the tests prove that 32 degrees is the most suitable temperature.

C. S. W. ARMSTRONG, District Secretary.

THE BROOKLYN DAIRY AND ORCHARD COMPANY, LIMITED.

(Middleton Outlook.)

The Brooklyn Dairy and Orchard Co., Limited, is being organized with \$50,000 capital, \$40,000 of which is to be paid up. Nearly \$25,000 of the stock is already subscribed.

The provisional directors are Messrs. E. T. Neily, F. R. Butcher, H. E. Reed, G. N. Reagh, W. C. Feindel and J. B. Neily. Mr. W. G. Parsons is solicitor and the Canadian Bank of Commerce the company's bankers.

The company is to obtain the farms of Messrs. E. T. Neily and C. H. Wright, of Brooklyn. These two large farms are contiguous so the company will own 612 acres in one block. This property will include three residences and four barns, 50 acres of orchard, two acres cranberry bog and 10 acres suitable for cranberry culture, 150 acres of woodland 150 acres of pasture and 250 acres of hay and grain land.

It is the intention to greatly enlarge the orchard and to keep 100 cows and a large number of pigs. The aim of the management will be to produce and use on the farm the hay, feed and fertilizer.

Mr. Neily, one of our most successful and staunch farmers, will be the manager and will be assisted by a practical dairy man. The extensive area of strong tillage land and ample pasturage together with the protection from frosts which the elevated situation of Brooklyn affords renders this property a favorable one for the experiment of farming on a large scale. If the scheme proves a success there will probably be a number of these large farming projects started, especially in the Brooklyn and Clarence district where the conditions are particularly favorable for expansion of present farming operations.

Old Age Annuities.

Particulars of the new system of old age annuities have just been issued by the Ottawa government. As the matter is of general interest, the following summary of the plan is instructive:

A man beginning at 35, and paying 25 cents a week until he is 60, may provide an annuity (or income) for the remainder of his life of \$129.91.

A man beginning at 25, and paying 25 cents a week until he is 60, will receive \$99.34 at 60.

A man beginning at 30, and paying 25 cents a week until he is 60, will receive \$74.73 at 60.

A man beginning at 35, and paying 25 cents a week until he is 60, will receive \$57.90 at 60.

A man beginning at 20, with a cash payment of \$10, paying 25 cents a week, and adding \$10 every five years until he is 60, will receive an annuity of \$151.96 at 60.

\$5.00 in addition to the 25 cents a week will secure him at 55, and for the remainder of his life, an annuity of \$220.60, or at 60 of \$323.50. And the same amount at the same age would secure a girl an annuity at 55 of \$202.95, or at 60 of \$289.05.

The annuities will be paid in equal quarterly installments the first payment to be made when the age specified is attained; and should the annuitant die before the first installment of annuity become due, payments received will be returned with 3 per cent. compound interest added.

In case of death before 60, all payments made, with 3 per cent. compound interest, will be returned to the heirs.

Any further information desired may be secured on enquiry of S. T. Bastedo, superintendent Canadian government annuities, Ottawa, or the local Postmaster.

A PLEASANT PHYSIC.

When you want a pleasant physic give Chamberlain's Stomach and Liver Tablets a trial. They are mild and gentle in their action and always produce a pleasant cathartic effect. Call at W. A. WARREN'S, BRIDGETOWN, A. E. ATLEE'S, ANNAPOLIS ROYAL, and BEAR RIVER'S DRUG STORE for a free sample.

C. L. PIGGOTT, Queen St.

LOCAL AND SPECIAL.

St. Patrick's Day.
Rev. Father Grace held mass in St. Alphonso's Church on Thursday last.

Windsor's small-pox scare is over and the schools and churches are reopened.

Our thanks are due Hon. George Whitman for copies of parliamentary proceedings.

There is a bill before the legislature to change the name of Kingston Station to Kingston.

M. W. Graves has rented Mr. Beckwith's house on Queen Street, formerly occupied by Dr. Armstrong.

If interested in the purchase of real estate take a look at our classified advertisements on page seven.

Lieut. H. Hood, of the Salvation Army, will give special address next Sunday night, at 8 p. m., "Too Late to Buy Oil." All welcome.

Among the cargo of steamer Boston on Wednesday night were 128 crates of live lobsters, which sold in Boston yesterday at \$30 for large and \$16 for small. She also had the record shipment of boneless fish there being 1,800 boxes.—Yarmouth Telegram.

Don't forget the town meeting to be held next Monday night to discuss ways and means for the improvement of our streets. This is perhaps the most important question put to our rate-payers since incorporation. A cheaper or improved system of electric lighting will also be discussed.

The stock for the new telephone line to run from Bridgetown to Darling's Lake has been nearly all subscribed. A meeting will be held at William Todd's at the Hill on Saturday evening for the purpose of nominating a Board of Directors. The line will be a great acquisition for the people of that section.

Mr. E. Mordecai, of Cambridge, Mass., having retired from the business of cigar manufacturing and requiring a change of residence, has decided to try Bridgetown and has rented one of Mr. Beckwith's houses on South Street. The Monitor trusts that he and his family will find our town an agreeable place to reside.

Rev. A. S. Lewis, of the Baptist Church, has accepted a call to the Baptist Church at Yarmouth, and will leave about the last of April. Mr. Lewis is one of the best pulpiterators and most energetic workers for the public good that Bridgetown has ever had and many more than his own church-members will part from him with regret.

L. D. Shafner will build a vessel at Annapolis this season, a four-masted schooner. He will also launch from his shipyard here the tern schooner which was started last season and upon which work will be resumed in about two weeks. Mr. Shafner is in Yarmouth this week looking after his lumbering interests there, having acquired a large tract of timberland from the Stachelins.

Mr. W. Avar Marshall had a thrilling experience and a narrow escape from drowning last Saturday afternoon while attempting to cross the river at Belleisle. About midway across the ice gave way and then followed a struggle for life. His strength and presence of mind saved him from a watery grave. This should be a warning to others to keep off the river which is now very treacherous.

Unity Rebekah Lodge of Annapolis and Autumn Leaf Rebekah Lodge of Bridgetown have been invited to meet with the Middleton Lodge on the evening of the 18th. A special train will leave Annapolis arriving at Bridgetown at 7.20. Tickets at a reduced rate will be issued and as there will likely be a basket-ball game between Kentville and Middleton, a large number beside Lodge members will probably take advantage of the excursion.

The organ recital and sacred concert to be given in Providence Methodist Church Wednesday evening March 24th, promises to be one of the best ever given in Bridgetown. Professor Williams, who comes to give the recital, is one of the most accomplished pipe organ players in Canada and is thoroughly familiar with the organ placed in this church last year. A number of outside sinners will add the choir of the church in the special vocal program. The proceeds will go toward the organ fund.

Interior improvements have been made in the store occupied by J. Harry Hicks and owned by O. Ruffee. Two rooms in the rear have been thrown into the main shop, an office built in one corner, new metal ceiling and new floors put in, and a fresh new coat of paint the store looks neat and commodious. Mr. Hicks carries a large and comprehensive stock of men's and boys' clothing and furnishings and by courteous treatment and square dealing is building up a substantial business. The Monitor wishes him continuous success.

PERSONAL.

Mrs. D. D. Whitman, of Nictaux, was the guest of Mrs. Cunningham last week.

Mrs. Stephen Thorne and son, Carew, of Lower Granville, are visiting Mrs. Edward Marshall.

Mr. and Mrs. Ralph A. Bent will be at home to friends Tuesday and Wednesday, March 23rd and 24th.

Annie Young, County Secretary, is attending the District Sunday School Convention in the west end of county.

Miss Shea, of St. John, who has been with Miss Chute as head milliner for several seasons, is expected to arrive this week to resume her position.

Miss Muriel Russell, who has been spending several months at the home of her aunt, Mrs. (Dr.) Freeman, returns to her home in Newcastle, N. B., today.

Mr. and Mrs. Ralph A. Bent are occupying the house on the Foster farm near Carleton's Corner, recently purchased by the latter's father, Mr. George Bent.

Miss Jeffery, since her brother, Thomas, returned to Melrose, Mass., has been the guest of Mrs. Charles Lewis and will remain with her for an indefinite time.

Mr. Thomas Foster, has been confined to his house with a severe attack of asthma and pleurisy for two or three weeks but is now progressing favorably towards recovery.

Rev. E. Underwood has been in Annapolis attending the deanery meeting this week. He was accompanied by Mrs. Underwood and they were the guests of Judge and Mrs. Owen.

Law and Order League.

At its meeting on the 11th inst., the Law and Order League passed very unanimously resolutions as follows:—

1st. Expressing to the Board of School Commissioners its gratification at the proposed effort of the Board to secure the attendance at school of all the children of the town of proper age, and promising to aid the Board in this matter as far as it possibly can.

2nd. Expressing its gratification at hearing that the Town Council proposes to enforce the by-law respecting the Curfew, which the League understands is now upon the minutes of the Council, and promising co-operation as far as possible.

3rd. Asking the Town Council to grant permission to the League to hold its quarterly meetings in the Town Hall, as well as any special meetings which the League may occasionally find it desirable to convene.

Meeting of Annapolis Deanery

The Annapolis Deanery met in St. Luke's Church on Monday afternoon, when business in connection with the work within the bounds of the Deanery took place. In the evening a very interesting and able illustrated lecture on "The Early Introduction of Christianity into Great Britain" was given by the Rev. J. Lockwood.

The Chapter met again on Tuesday morning when a paper was read by the Rev. J. Lockwood on "The Church of England as Established by Law." On Tuesday evening the Rev. H. How delivered a very instructive and carefully prepared lecture on "The Mission of St. Augustine to England."

This Wednesday morning at 10.30 the celebration of the Holy Communion is held, the Rural Dean being the celebrant. It is interesting to note that this day marks the thirtieth anniversary of the ordination of the Rural Dean. The sermon on this occasion was preached by Rev. J. Lockwood.

The ministers present are Rural Dean Rev. H. How, Rev. H. deBlois, Rev. J. Lockwood, Rev. Warners, Rev. Reeks, Rev. Underwood, Rev. Suckling and Rev. Driffield.

CARD OF THANKS.

Mr. John Lowe and family wish to express their deep gratitude to their neighbors and friends, who so kindly came to their relief on the occasion of their recent loss by fire.

DIED

MACK.—At Upper Granville, March 12th, Allen Mack, aged 79.

DANIELS.—At West Paradise, March 13th, Winchester Daniels, aged 74.

BROOKS.—At Centreles, March 14th, after an illness of two weeks from paralysis, Israel Brooks, aged 93.

A MIS-HIT

Did you make a mis-hit the time you employed the last "help." Don't worry. There are lots of good fish in the sea, and a sure bait to catch them is a Want Ad.

NEW BUSINESS LOCALS.

Go to Mrs. Turner's for bargains in Groceries.

A chance for bargains at John Hall's Auction Sale. See adv.

Bananas, Oranges, Figs and Grapes at Mrs. Turner's.

Go to F. B. Bishop's, Lawrencetown, for great bargains in Wall Paper.

Ham and Bacon for sale at C. L. Pigzott's.

Choice Confectionery and Penny Goods at Mrs. Turner's.

Everything in high-grade Clothing and Furnishings at Bridgetown Clothing Store.

Buy your flower and garden seeds for early sowing at C. L. Pigzott's.

The rivers of bargains flow steadily on six days in the week at J. W. Beckwith's.

J. U. LOGIE, specialist in optics will be at Mr. Bird's store, Bridgetown, on the 29th and 30th of March; at Lawrencetown on the 31st, at Paradise April 1st, forenoon only.

Oranges from 20c. per dozen up, at C. L. Pigzott's.

We made our reputation for Made-to-Order Clothing last season. Our new Samples for 1909 have just arrived. If you take pride in having a perfect fitting Suit entrust your order to us.—Bridgetown Clothing Store, Queen Street.

Buy your Grafting Wax, ready for use, and material for making same at C. L. Pigzott's.

ONE OF THE BEST INVESTMENTS you can make is in Nova Scotia Telephone stock. The advertiser will dispose of a few shares. Inquire at MONITOR OFFICE.

F. B. Bishop, Lawrencetown, has the largest stock of Wall Papers in western N. S. to select from and as these goods must be closed out some genuine bargains will be given. Samples shown upon request.

Yes; a little advertising IS better than none—a great deal better. But, if your business is worth while, a little advertising is not ENOUGH.

I buy my Wall Papers direct from the factory in very large quantities and can save you 25 per cent in preference to buying from the jobbing house samples.—F. B. Bishop, Lawrencetown.

Public Auction

The subscribers will sell at Public Auction on the 23rd day of March, 1909, at one o'clock in the afternoon, at the premises of the late J. Albert Daniels, at Paradise, the following personal property:

Hay, about 12 tons.
Two Cows, one Colt, one yearling Steer, one Horse, two Pigs.

Ox Wagon, Mowing Machine, Springtooth Harrow, Plough, Horse Rake, Wheelbarrow, one Light Harness, one Heavy Harness, one Sleigh, one Covered Carriage, one Light Open Carriage.

Household Furniture, consisting of Organ, Gramophone and records, three Stoves, one Bedroom Suit, and other articles too numerous to mention.

TERMS: Cash or approved joint note for all sums above \$5.00 on 6 months.

JAMES O. DURLING,
J. EDWARD MESSENGER,
Executors.

Dated March 8th, 1909.

WHAT AN AGENT SAYS.

My agent, Mr. J. H. Smith, of East Sable, N. S., writes me that great cures are being made there with Reed's Earth Cure. One year ago Smith was cured of weak lungs which doctors failed to cure. A lady who has had what doctors consider to be a cancer and incurable, has been cured. Some have been cured of ulcers, weak back, etc., all were thought to be incurable. Mr. Smith is not the only agent who reports doctors failed to cure. All who wish to know more of what my remedy can do had best write me for circulars.

N. H. REED, H. D. Shelburne, N. S.

TOWN OF BRIDGETOWN

Meeting of Ratepayers

I hereby give public notice that a public meeting of the rate-payers of the town of Bridgetown will be held in the council chamber in the said town of Bridgetown on Monday, the 22nd day of March instant, at 7.30 p. m., at which meeting there will be submitted to the ratepayers for approval a proposed expenditure of a sum of money not to exceed four thousand dollars for the permanent repair of the streets of the town.

At the same meeting the matter of a more economical and better system of electric lighting will be considered pursuant to a petition laid before the town council by some of the ratepayers of the town asking that a public meeting be called for that purpose.

By order of the town council,
F. L. MILNER,
Town Clerk.

Dated Mar. 1st, 1909. 2 ins.

Mail Contract.

SEALED TENDERS addressed to the Postmaster General, will be received at Ottawa until Noon, on Friday, the 16th April, 1909, for the conveyance of His Majesty's Mails, on a proposed Contract for four years SIX and THREE times per week respectively each way, between MIDDLETON (ANAPOLIS) and MOUNT HANLEY and OUTRAM, at Postmaster General's pleasure.

Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Office of Middleton, Mount Hanley, Outram and route offices and at the Office of the Post Office Inspector at Halifax.

POST OFFICE DEPARTMENT,
Mail Service Branch,
Ottawa, 26th Feb., 1909. 3ins.

PUBLIC AUCTION.

The subscriber will sell at public auction on March 31st, at one o'clock in the afternoon, at the premises of the late Daniel Bishop at Centreles, the following personal property:—

TRUCK-WAGGON, LUNG, MORTISING MACHINE, DRIVING HARNESS, WORK-HARNESS, FORKS, SHOVELS, SAWS, WHEELBARROW, GRINDSTONE, HOUSEHOLD FURNITURE, consisting of organ and everything necessary for up-to-date housekeeping. Also the cottage home will be offered for sale, if not sold previously.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Annapolis Royal Ice Piers," will be received at this office until 4.30 p. m., on Tuesday, March 23, 1909, for the construction of three ice piers in the Annapolis River at Annapolis Royal, Annapolis County, N. S., according to a plan and specification to be seen at the office of C. E. W. Dodwell, Esq., Resident Engineer, Halifax, N. S.; E. G. Millidge, Esq., Resident Engineer, Antigonish, N. S., on application to the Postmaster at Annapolis Royal, N. S., and at the Department of Public Works, Ottawa.

Tenders will not be considered unless made on the printed form supplied, and signed with the actual signatures of tenderers.

An accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, for five thousand dollars (\$5,000.00), must accompany each tender. The cheque will be forfeited if the person tendering declines the contract or fails to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,
NAPOLEON TESSIER,
 Secretary,
 Department of Public Works,
 Ottawa, February 22, 1909.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department. 2 ins.

BLACK KNIGHT STOVE POLISH

is a revelation to housekeepers. Nothing like it has ever been made before. It means less work, because it does not get dull or brown, and is so easily applied. It means less work, too, because just a few rubs bring a bright, brilliant polish that always looks fresh and clean. It is cheapest, because you get a bigger can for the money.

If your dealer does not handle "Black Knight" send his name and the for full sized can. 7A

Mr. F. W. Baldwin On Airships

Mr. F. W. Baldwin, known in Toronto as "Casey" Baldwin of football fame, who is working with Dr. Bell in conducting experiments with aerodromes, gave an interesting address recently in Toronto University. He said in part:

"The sensation of flying is a thing that simply cannot be described," said the speaker. "The only way to understand it is to be up the air yourself."

"It gives one an indescribable feeling of joy to speed through the air. There is such a sense of freedom, and you are not worried as when travelling at high speed on the ground."

"It is the smoothest kind of speed—smoother than that of the motor boat or the motor car, and it is really the greatest sport imaginable. You can fly alone at a rate of forty miles an hour, but you have no idea of the pace. It is something like on a large fast steamer. The ground seems to be slipping past under you and you hardly realize that you are going faster than it would be safe to go in a motor car."

"In motorizing you can see the road ahead of you and you know when you are going to climb a grade, but in flying you don't see the road. The road and grades in the air are the currents, and you have to learn to travel through them and how to handle the aerodrome when you strike a strong current."

"Think of the possibilities of the aerodrome. The locomotive when it was invented went ten miles an hour. The aerodrome is starting out at the speed which the locomotive has attained to-day."

"Few people realize the important part that sport is likely to play in its development. The building of motor cars for racing purposes led to many improvements in the manufacture of cars, and now the same men are taking up the aerodrome."

"When they have been successful what possibilities will be opened up not only for the transportation of passengers and freight, but also for the exploration of such countries as Tibet, and Central Africa, that are so difficult of access."

"The great military powers are spending vast sums annually on aerodromes. France and Germany realize that the flying machine may revolutionize the art of war. England's insular security is threatened, for a fleet of perfected aerodromes would be a greater menace to London than two German fleets of warships. London could be destroyed, and the combined navies of the world could not prevent it."

"It is a struggle for the supremacy of the air, and our bulwarks must be extended upwards and on the two power basis."

"The great military powers are afraid of the flying machine, and the struggle to improve it must go on."

"The great use that the aerodrome would be in scouting is shown when we consider what it would have meant in showing the location of Cervera's fleet in the Spanish-American war, or when the Japs fought so hard to capture the hill on which they wanted to place a few men merely to direct the fire of their guns against Port Arthur."

"The old theory was that man was not ordained by God to fly, and the number of broken bones that resulted in the various attempts seemed to prove it."

"In 1742 Henson patented a very crude flying machine in Great Britain but it was a wonderful anticipation of the modern aeroplane. There were even then visions of crossing the Atlantic and the Sahara, but the invention of the balloon in 1783 gave a great setback to the flying machine."

"An appeal was made to the merit of science to attend attention to aviation, by Nedar in 1863, who condemned the balloon, and showed how it diverted attention from the invention of a better mode of aerial navigation."

"The first heavier-than-air flying machine was invented in 1892 by Sir Hiram Maxim, and since that time the flying machine has been aimed at its stability."

"Lieutenant Picher took the work up in England, but was killed, as was also a German who had been very successful."

"The Wright brothers in the United States made great progress in controlling their machine, and in 1905 they made a flight of eleven miles, and on the next day of twenty-four miles."

"The French took up the idea, and after Santos Dumont's achievements fifty machines were built there."

"The United States had the best aeronauts, but France built ten machines to every one built by any other country."

"In 1907, Mr. Alexander Graham Bell organized the Aerial Experiment Society of operating a large machine Association, and he set over the city by adopting a unit construction so that, for every increase in weight of the machine, there would be a proportionate increase of surface. This was very important."

"His idea was not to make a large bird, but to harness a flock of birds."

"The June Bug was the first flying machine of the Aerial Experiment Association to make a successful flight, and has made many flights of two miles."

Repeat it—"Shiloh's Cure will always cure my coughs and colds."

Joker's Corner.

A LIVELY CHASE.

"Aren't you afraid to go home alone, girls? If you'll wait just a few minutes John will be home, and he will be glad to go over with you."

Thus spoke Mrs. Smith to three young ladies who lived 200 yards down the road and who were about to leave her house after an evening call.

"Oh, no, we're not afraid! We'll just get out our hats, and then if any one comes for us we'll give battle." This was from the youngest of the three, and she flourished a long and dangerous looking pin. Finally jabbing it into an imaginary foe. The two others took their hats in their hands, and the three, bidding good night to their hostess, made their way down the path to the gate. All on the alert and in readiness to repel attack. They were as brave and bold as ever warriors were. They turned from the front yard into the road and started toward home.

"Girls, what's that?"

The three stopped and listened, but only for a moment. Away back on the road they could hear the footfalls of a man. They went on at a rapid walk. The footsteps of the man grew nearer, and they could hear that he was walking more quickly than he had been.

The girls walked faster.

The man walked faster.

The girls almost ran.

The man was coming nearer, and he almost ran.

The girls broke from their walk and scurried rapidly on. They were but a little distance from their front gate now.

Then, oh, horrible! The man began to run after them! They did not have the strength to scream out. It was all they could do to keep on running. The villain was almost on them now, but they were just a few feet away from their front gate. They got to the gate, opened it, and their pursuer was upon them. They would probably have fainted, but they caught a glimpse of the man who had chased them, and it was the brother of two of them.

"Well," said he, all out of breath "you're nice ones to run away from me that way. I was going to stop in at Mrs. Smith's to bring you home and then I saw you starting out."

The girls did not speak just then, nor for many months did they say anything of the fact that two of them could never afterward find their hats.—Detroit Free Press.

WHEN CASEY REACHED THE PARLOR.

An old Irishman named Casey made a lot of money as a contractor, and built a fine house for his children. The sons and daughters were much ashamed of the plebeian father, and Casey was always kept in the rear of the house when they had a party or a reception. One day Casey died, and there was a great to-do about it. The children had a fine coffin, with lilies of flowers, and Casey was laid in state in the parlor.

That evening an old Irish woman who had known Casey when he was a laborer, came and asked to see the face of her dead friend. They conducted her to the parlor.

She walked up to the coffin, took a long look and said: "Faith, Casey an' they've let 'em into th' parlor at last!"

WAS TAKING NO CHANCES.

"Porter."

Thus the passenger for London hailed a railway servant at a small Scottish station.

"Yessir?" the man instinctively held out his hand.

"Do you think this parcel well enough tied to trust going in the van?"

"Well I'll see," answered the porter, dropping the parcel with a bang.

"She'll get that here, an' she'll get that at the junction—giving it another drop—and she'll get that at Perth!"—banging it so lustily that all the contents scattered over the pavement. "Well, sir, if she be goin' farther than Perth, she'll nae do whatever!"

A COMPLIMENT.

You could tell from his hair that he was a musician, or something of that sort. "Yes," he said to the company at large, "the greatest tenor in the land once paid me the biggest compliment I could wish." "Oh?" remarked some one, interrogatively.

"It was like this: I sang without accompaniment—I always have trouble with accompanists; they're so unsympathetic, you know—and at the end of the song he said to me, "Do you know, when you began without an accompanist, I was surprised; when I heard you, I was astonished; and when you sat down I was delighted!" And the sun shone down and lit up the youth's beautiful smile of satisfaction.—Glasgow News.

BROTHER TOLD BROTHER

One Suffered for Fifteen Years, the Other for Thirteen.

The convincing powers of a testimonial were never more clearly shown than in the case of Mr. Hugh Brown. A brother, Lemuel Brown, of Avondale, N.B., read in the paper about Hon. John Costigan being cured by "Fruit-a-lives." Knowing the Senator would only endorse a medicine which had cured him, Mr. Lemuel Brown tried "Fruit-a-lives." They cured him of Chronic Indigestion and Constipation, so he urged his brother to try them.

Hartland, N.B., Oct. 28th, 1907.

"Three doctors told me that I had Liver Disease and serious Stomach Trouble. My stomach was very weak. I took their medicines for thirteen years and grew worse. My brother (who was cured of terrible indigestion by "Fruit-a-lives" after suffering for 15 years), recommended me to try these wonderful tablets. I bought half a dozen boxes and have just finished the sixth. I eat all kinds of hearty foods without distress and am greatly improved in every way. "Fruit-a-lives" also cured the Chronic Constipation which was so distressing in my case."

(Signed) HUGH BROWN.

50c a box, 6 for \$2.50; a trial box, 25c. At dealers or from Fruit-a-lives, Limited, Ottawa.

An Irishman who was tortured with toothache walked into a dentist's surgery one evening and inquired of the extractor of molars: "How much do ye charge for hullin' out wan tooth?"

"One shilling; five shillings with gas," replied the expert on ivory.

"Five shillin' with gas!" gasped Pat "Beorrah, then, I'm come round early in the mornin' when it's daylight."

"Miss Bub-bub-Bright," began Stutterton. "will you bub-but-be m-m-m-er, I lul-lul-love—"

"Really," interrupted Miss Bright. "you must give me time to consider. Mr. Stutterton, in the meantime perhaps you will be able to say it."

Have used MINARD'S LINIMENT for Croup; found nothing equal to it. sure cure.

CHAS. E. SHARP,
 Hawshaw, N. B., Sept. 1st, 1905.

THE CORPSE SHRIEKED.

New York, Feb. 27.—A cable despatch to the Herald from London says:—At the annual meeting of the National Association for the Prevention of Premature Burials, held in London today, Mr. A. F. Jenkins, of Baltimore, Md., stated that a day or two before he left America he learned of a case in which a loud shriek was heard from a coffin that had been placed in a trolley to be carried into a crematorium. Nothing could be done, as the trolley already had been started and its progress into the flames could not be arrested.

Another speaker declared he had come across 151 cases of persons who according to medical testimony, had been interred alive, and more than two hundred cases of persons saved from that fate on the very brink of the grave.

A resolution was carried, urging the Government to remedy the present unsatisfactory and dangerous State burial laws.

SUNLIGHT SOAP

No trouble with Sunlight Soap. Just follow the directions on the wrapper and Sunlight does the rest. Costs little—does much—never injures hands or clothes.

MINARD'S LINIMENT CURES DANDEUFF.

THE HOME

COOLING A GENEROUS IMPULSE.

It is a generous impulse that prompts one to offer a little neighborly present, to proffer assistance or to do some little kindly act of service. Often these impulses do not coincide with your needs. No matter, if you receive the offer in the same generous spirit in which it is made, you have enriched the generosity and increased the pleasure of the giver. If you refuse, no matter how plausible the reason you give, the warm-hearted impulse is cooled, a pleasure is turned into disappointment.

It has been given to no man or woman to refuse an offered kindness so skillfully that the giver will not feel hurt. It makes him say to himself, "Very well, I guess next time you will wait until your help is asked." And that is a very bad way to feel. And that is all the spontaneous overflowing of generous, neighborly spirit.

At church, the man beside you offers a hymn book. Accept it with a smile, even though you cannot sing ten per cent. of "Old Hundred," and he will enjoy the services a little more because he feels he has helped you enjoy them. Refuse and a shadow of unpleasantness will linger over him the remainder of the hour.

A boy sees another lifting a heavy box over the fence. He runs up. "Let me help you."

"Thank's," says the other. "It's a tough lift for one." The boy goes on whistling a little livelier than before. But if the fellow says, "Oh, no, I can manage it all right," he goes on remembering mean things that fell on his head.

A young matron in a country village under a neighborly impulse took a nice, warm loaf of a fine baking to a neighbor across the street. The neighbor to whom a loaf of bread was a loaf of bread and never a yellow primrose by the river's brink explained that as she herself had just baked, she was afraid it would spoil before they could use it, and therefore the young matron had better keep the loaf. She did. But never since has she had any neighborly impulses in the direction of the house across the street.

A little child went up to the teacher's desk at recess, and shyly offered her a grimy stick of candy. The teacher knew the child wanted the candy, while she did not.

"No, thank you, Marv. You keep it. I do not want it."

The little one had come to the desk with victory in her eye, for generous impulse had conquered appetite. She hurried out with drooping head, flung the candy away, and ran crying to her older sister.

"Teacher wouldn't take my candy."

A man picks a basket of tomatoes and takes them to the family next door.

"Why, I'm very much obliged, Mr. Johnson, but I just bought a bushel this afternoon." The man turns away richer by a basket of tomatoes, but poorer by a generous impulse spoiled.

The natural gift of graceful acceptance is rare; but it is as easily cultivated as a row of sweet peas, and as universally pleasing.

There are only three rules to learn. Take everything, do it promptly, and be glad about it.

FOLLOW YOUR OWN HEADLIGHT.

Remember this, you who seek to develop power of body and mind. When you set forth in the world to carve out a career, do not be forever consulting your friends and leaning on them for advice about your course of action. There are great issues in life, vital turning-points, where most of us feel the need of counsel, but such occasions do not present themselves every day. In the smaller matters pertaining to conduct and business, learn to decide for yourself. Of course, I am addressing the noble-minded and ambitious, not the idle and vicious. Cultivate conscience and self-respect, aspiration, and ambition to be and do your best. Then go ahead on your own basis, and so on your own manner.

If you form a habit of continually consulting other minds for guidance you weaken your own judgment. If you depend upon yourself, and appeal only to the highest powers of the universe for strength, you fortify the best qualities within you, and educate your own nature for self-government. Not only avoid asking advice, but avoid taking too much of it. It will be impossible for you to follow all the suggestions your friends and acquaintances offer. Nothing is easier to give than advice. No two brains are constructed in exactly the same manner, and no two minds regard life from exactly the same standpoint. One person tells a youth to sacrifice everything for an education to go through college at any cost of time, labor and pleasure; another advises him to be satisfied with a common-school education, and to turn

his attention to business early. One urges you to read widely, to avoid society, and to have no intimate friends but books. Another says, seek the companionship of people, study mankind, make yourself popular, and achieve success through influence. If you obey the first, a dozen friends differ in the books they suggest for your training; if you yield to the latter, as many varying counsels are given regarding the kind of people whose acquaintance you should try to cultivate.

It is sheer madness even to attempt to follow all the counsels of all our best friends. It would require twenty lives. We must decide things for ourselves. "Seek first the kingdom of heaven," which means, seek the highest impulses of your own nature, the God within you, and the power to decide wisely will be given you. Once having decided, steel yourself to criticism. Whatever course you choose, some of your friends will deride and bemoan your decision. Content yourself with the thought that while they are your good friends, and mean well, they cannot live your life for you, and, therefore, you must live it for yourself, and in your own way. Like a locomotive, you must follow your own headlight.

There is nothing which more strongly aids the development of our powers than standing firm and unswerving through a storm of criticism, when we know we have chosen the right pathway, and that our motive is a worthy one, however questionable the course may seem to observers. It is impossible to pass through such an experience without being suffering until we rise to heights of spiritual serenity, which few of us attain in youth; but suffering is another source of development.

ONE SUIT OR SEVERAL.

It is always a question with women as to whether it is wiser to put all one's dress allowance in one good gown or to divide it up among many. The balance of favor seems to be with the former method. One good gown, well made, of excellent cloth, and in a moderate style, gives more distinct satisfaction than two or three of poorer quality and ill cut. One has to pay for cut and sewing. The test of a well-cut, well-sewed gown is not in its first appearance, but in its last.

One argument against buying one expensive suit instead of two or three cheaper costumes, is, that one likes variety, and that to be seen constantly in one gown looks as though one were down to the last cent. The truth of it is that a woman looks better and gains more approval for her clothes and style of dressing by being seen every day in one perfect suit than in several gowns which neither hang nor fit in the way they should.

One of the most difficult lessons in clothes for any woman to learn is that variety is not always the path to dressing well. The wise woman who has a moderate purse is apt to pay out the greater part of her dress money for one excellent frock or suit. She would prefer to wear it every day for two seasons and get the credit for looking her best than to divide her money into clothes that will not stand the strain of service. The test of a gown is not the way it looks on the first day it is put on but the way it keeps its cut and hang as it continues to be worn.

Therefore, the woman with a small allowance should not attempt variety.

CLOTHES CLOSET.

The most common of all complaints in the household is a lack of closet room. Here are the directions for building a very serviceable and neat clothes closet at a very small expense.

Procure two boards—soft pine will answer nicely—about fourteen or sixteen inches wide by five feet long and two boards the same width about four feet long. The two longer boards are to form the sides of the closet and the two shorter ones the bottom and top. After the four have been nailed together in the form of a box with two open sides, narrow wood slats are to be nailed across one of the sides, placing them about five inches apart. These slats are to hold the clothes hooks. The number of slats should not be over four nor less than three, and the top one should be fitted tightly against the top board.

When the frame of the closet is complete stand it in the corner of your room or against the windowless side where your trunk has taken up so much room and been of so little use and proceed to stain it with a nice dark furniture stain. It is well to follow the color of the wood in your room, or a clear white is very good, though it soils easily. After the stain is dry put in the hooks; then across the front stretch a cur-

STOMACH DISTRESS.

Every family here ought to keep some Diapiesin in the house, as any one of you may have an attack of Indigestion or Stomach trouble at any time, day or night.

This harmless preparation will digest anything you eat and overcome a sour stomach five minutes afterwards.

If your meals don't tempt you, or what little you do eat seems to fill you, or lays like a lump of lead in your stomach, or if you have heartburn, that is a sign of Indigestion.

Ask your Pharmacist for a 50-cent case of Pape's Diapiesin and take one tripartite after supper to-night. There will be no sour risings, no belching of undigested food mixed with acid, no stomach gas or heartburn, fullness or heavy feeling in the stomach, Nausea, Debilitating Headaches, Dizziness or Intestinal cramping. This will all go, and, besides, there will be no sour food left over in the stomach to poison your breath with nauseous odors.

Pape's Diapiesin is a certain cure for all stomach misery, because it will take hold of your food and digest it just the same as if your stomach wasn't there.

Actual, prompt relief for all your stomach misery is at your Pharmacist, waiting for you.

These large 50-cent cases contain more than sufficient to cure a case of Dyspepsia or Indigestion.

tain of cretonne or some dark, soft cotton stuff striped or figured in pretty colors. If you wish to use a pole and rings for the curtain you may do so, but you will find it better to run the curtain on a wire, as it prevents a particle of dust from getting in the closet, whereas a curtain on pole and rings hangs so loosely that dust is liable to be found annoying.

Who does not love a tranquil heart, a sweet temper, a balanced life? It doesn't matter whether it rains or shines, or what misfortune comes to these possessors these blessings, for they are always sweet, serene and calm.

That exquisite poise of character which we call serenity is the last lesson of culture, it is the flowering of life, the fruitage of the soul.

It is as precious as wisdom, more to be desired than gold—yes, than even the gold. How contemptible mere money—wealth looks in comparison with a serene life—a life which dwells in the ocean of truth beneath the waves, beyond the tempests, in the eternal calm!

How many people we know who sour their lives, who ruin all that is sweet and beautiful by explosive tempers, who destroy their poise of character by bad blood! In fact, it is a question whether the great majority of people do not ruin their lives and mar their happiness by lack of self-control. How few people we meet in life who are well balanced, who have that exquisite poise which is characteristic of a finished character.

—From True Witness.

USES OF OLIVE OIL.

Face, neck and hands made glowing and soft by being massaged with olive oil, after which rub the skin well with a soft piece of cloth, each meal will increase the flesh.

One tablespoon of olive oil after massaging the scalp with olive oil will promote the growth of the hair and also keep it glossy. (Not more than six or eight drops being used at one time.)

Aching eyes, just barely touch the ball of the eye with olive oil. This will greatly relieve them.

Eyebrows are greatly improved by being brushed with olive oil. (Use a small toothbrush and do not irritate.)

Brittle fingernails occasionally dipped in warm olive oil will be greatly benefited.

ANCIENTS WHO MADE UP.

Who would have thought that the little curls that a fashionable girl thinks necessary to pin upon her coiffure this season would have been quite natural to an Egyptian beauty of say five thousand years before Christ? Perhaps not exactly curls, but certainly additions to the amount of hair allotted by nature. It seems that truth will out, for this is one of the facts that learned professors have been able to establish by their excavations in Egypt. False teeth were resorted to by the ancients. I myself, says Dr. Waldstein, in exploration in Greece have come across a perfect set of false teeth, made very much on the plan our dentists adopt to-day. And these teeth, I may add, were actually gold filled, although they probably dated back to the fourth century before Christ.

In the same country ladies' perfume boxes containing scents and rouge have been unearthed from time to time. Human nature undergoes few changes through the ages.

The man who believes his razor to be the product of comparatively recent times may be surprised to learn that the Greeks and Romans habitually used similar articles.

The shaving stick, however, appears to have been unknown in those days. Oil was the substance they used to soften the beard.

RED MITES.

Mrs. K., Shelburne Co., N. S.—What will rid a hen house of red mites. I have transferred my hens to another building but the mites are still in the old house.

Ans. It is doubtless troublesome to exterminate red mites when they have obtained a firm foothold in the poultry house, but it can be done by using the following solution with which the premises should be carefully sprayed, viz.:

Corrosive sublimate, 4 ozs.
Common Salt, 4 ozs.

Disolve the above in a gallon of water. When thoroughly dissolved add water to make 25 gallons and mix in the gallon solution. Spray every nook and crevice. As this solution is highly poisonous it should be carefully used. Follow by whitewashing. Before returning hens to the house see that they are all free from lice.

There are numbers of small jobs around the house that boys and girls can do. Fathers and mothers should insist on these little things being done by the children. It helps the children to have something to do. It trains them to do bigger and better work later on in life.

JUST LISTEN.

Good listeners are thought wise. for a good listener never has time to say much and when he does speak it usually counts.

Suppose you try being a good listener for one week?

When you are asked out, don't tell all you know in the first ten minutes. Reserve something. Have you been in Europe, and seen the King? it will keep; have you visited Paris? it will also keep; can you boast an acquaintance with some of the country's big guns? there is no hurry. Just keep your ears open.

There is always some one to air himself or herself at every evening out. Take a rest and listen.

When some one tells a good story don't try to rob him of the credit of being the first to spring it in this quarter. Don't tell him you heard it before. Laugh.

Don't try to go him one better. Let him get away with the idea that he is the whole cheese. Just listen.

TABLE MANNERS.

Insist that the child shall behave decorously at the table, as well as eat properly, from the time he can comprehend an order conveyed in the simplest language. Do not let him make a nuisance of himself by crumpling bread into it, or churning crackers into mush in his milk, or dip toast into his cocoa, or work vegetables and gravy into a mound, using the knife as a trowel. He should be reproved for sipping soup and other liquids audibly, and for loud inspirations after drinking. Line upon line and precept upon precept, gently but regularly enforced, will make a well bred boy of him. And right habits learned in childhood last a lifetime.

There is common sense in each of the conventions at which vulgarians scoff.

FORCE CHEERFULNESS.

The next time things trouble you, instead of getting so down on your luck that indigo is a baby blue in comparison, get a grip on yourself and force cheerfulness. That cheer may be like an incubator chicken at first sight, but it will be a good sized content long before unfeeling processes would give peace of mind. What do you do when harassed? Get so grumpy that you make life a burden for all around you? Do you snarl or sulk or take on that hang dog look? Or do you keep a stiff upper lip so that even your dear and near do not guess that troubles make a dint in your self-complacency?

TWO VEGETABLE SOUPS.

Cabbage Soup.—If you have never made it, do so, for to those who like cabbage it is a delicious dish. Chop your cabbage fine in the chopping bowl, put in a stepman, into salted water, let simmer until tender. Add milk, cream and butter, and salt, if needed, and you have a soup fit for a queen.

Potato Soup.—Pare a few nice potatoes. Let stand in water a little time before boiling. Cut out every eye or blemish carefully, so they will preserve as white an appearance as possible. Boil till tender, remove and mash nicely. Then add milk, cream, butter and salt; keep hot till served. Some night when you want something warm to preface bread and butter and accessories—try it.

CURE FOR CREAKY SHOES.

"There is one certain and simple remedy for this annoyance," says Woman's Home Companion for February. "It is to drive little wood-nails into the soles. The nails prevent the friction of the shoe soles. Any cobbler will do it for you very cheaply and it restores your peace of mind quite wonderfully."

Repeat it—"Shiloh's Cure will always cure my coughs and colds."

Father Morrissey's Remedies Now On Sale

Arrangements Completed to Supply His Famous Prescriptions to All Who Need Them

It was a severe loss to his Parish and his friends when the beloved priest passed away last spring, but the loss would have been even heavier to the world had his remedies perished with him.

But fortunately Father Morrissey had reduced his best prescriptions to formulae. These were known only to the priest himself and to the druggists who put them up. At his death he bequeathed them to the Sisters of the Hotel Dieu at Chatham, and from them the identical remedies are now being prepared—by the same druggists—and distributed throughout the Maritime Provinces.

The remedies are still known by their old names: "Father Morrissey's No. 7," for Rheumatism and the Kidneys; "No. 10," a splendid Cough mixture and Lung Tonic; "No. 25" for Cough and "Father Morrissey's Liniment." They can be had from any store where medicines are sold, or from the Father Morrissey Medicine Co., Ltd., Chatham, N.B.

There are numbers of small jobs around the house that boys and girls can do. Fathers and mothers should insist on these little things being done by the children. It helps the children to have something to do. It trains them to do bigger and better work later on in life.

THE TEST OF THE HEART.

"Tis easy enough to be pleasant When life flows by like a song. But the one worth while Is the one who will smile

When everything goes dead wrong. For the test of the heart is trouble. And that always comes with years. And the smile that is worth All the praises of earth Is the smile that shines through tears."

—Ella Wheeler Wilcox.

FOR DISEASES OF THE SKIN.

Nearly all diseases of the skin such as eczema, tetter, salt rheum and barbers' itch, are characterized by an intense itching and smarting, which often makes life a burden and disturbs sleep and rest. Quick relief may be had by applying Chamberlain's Salve. It allays the itching and smarting almost instantly. Many cases have been cured by its use. For sale by

Paradise

We regret to report Mr. Isaac Lonley in poor health. H. H. Morse is visiting friends in Lynn and Cambridge. Mrs. F. W. Bishop entertained friends on Tuesday evening. Mrs. S. K. Morse entertained friends pleasantly on Friday evening. The Sewing Circle will meet with Mrs. Charles Covert on Thursday evening. Mr. George Starratt was summoned to Braintree, Mass., last week, where her mother is seriously ill. Miss Edna Marshall, of South Farmington, accompanied by her friend, Miss Mars, spent Sunday with her mother, Mrs. L. C. Marshall. Rev. H. H. Saunders spent a few days in New Brunswick last week, preaching in Sussex on Sunday. The pulpit was occupied here on Sunday by Mr. Rose of Acadia.

Lawrencetown.

F. A. Mulhall was in town Saturday. E. A. Phinney spent Sunday at home. N. H. Phinney left for Windsor on Monday. R. E. Felts returned from a trip to Dixby on Saturday. Miss Tiney Balcom is visiting friends in Bridgetown. Miss Bartheaux, of Nictaux, has been a recent guest of Mr. and Mrs. W. W. Bent. Mr. R. V. Harris, of Oregon, has been the guest of Mr. and Mrs. H. W. Phinney. Miss Dennison, of Middleton, spent Sunday, the guest of Postmaster and Mrs. James. Miss Stella Parker, of Middleton, spent Sunday the guest of Miss Louise Felts. Mrs. Oswald has been the guest of her daughter, Mrs. C. Zwicker, of Albany, recently. Mr. Charles Stoddard, of Stoddardville, was the guest of this sister, Mrs. I. Durling. Mrs. (Rev.) L. Wallace is spending a few days the guest of her mother, Mrs. (Dr.) Morse. Rev. Mr. McGregor, of Tremont, has been assisting Rev. Mr. Barnell in his special services this week. Mrs. Wheelock returned home on Saturday, after spending several weeks in Kentville and Bridgetown. Dr. Smith and bride, of Massachusetts, spent a few days of last week the guest of his aunt, Mrs. R. E. Felts. Miss Purdy returned to her home in Bear River, after spending the winter the guest of her sister, Mrs. H. W. Phinney. Miss Johnson, of Yarmouth, and Mrs. C. L. Dodge and children, of Kentville, are guests of Mrs. (Dr.) Primrose. The Annapolis County District Sunday School Convention meets in the Methodist vestry Friday afternoon at 2 p. m. and again at 7 p. m. All are cordially invited to attend. Rev. Dr. Brown, Field Secretary, will address the meeting; also the Revs. Barnell and Brown.

Arlington

Miss Nellie Marshall, we are glad to say, is improving in health. Mr. James Marshall, of Lower Clarence, was visiting at Mr. J. E. Marshall's recently. Mr. and Mrs. John Robinson, of Bloomington, were visiting at Mrs. W. A. Stick's recently. Mr. and Mrs. Joseph Marshall were visiting at Mrs. Norman Milbury's, Ste. Croix Cove, recently. Mr. George Snow and the farmers of the surrounding communities are putting in a large cut of loam in the Crow Hollow.

Annapolis.

Miss Nellie Riley is visiting friends in Bridgewater. Mrs. John McKav is in Boston taking in the spring dressmaking openings. Mr. J. M. Owen went to Yarmouth on Saturday to attend to some legal business there. Mr. Robert Malcom was registered at the Queen Hotel, Halifax, on Thursday last. Mr. H. E. Hoyt has purchased the general store business from Mr. Fred Beeler at Leaulle. Miss Ruby Chisholm, milliner, was in St. John last week, taking in the spring millinery openings. The quarantine has been lifted from the suspected houses in town and we now have a clean bill of health. Miss E. Mahoney has returned from a visit she has been paying her friend, Mrs. Rawdine, at Clements- port. Mr. D. S. Riordan was in St. John last week. We understand he has sold his black Sable Island pony to some parties there. "The Story of Camp Bucksaw" by Dr. Edward Breck, is the title of an article appearing in the last number of Recreation Magazine. The following item, appearing in the Tacoma News, has reference to a son of our townsman, Mr. John Brittain:—"BRITAIN.—At Tacoma, Washington, to Mr. and Mrs. F. A. Brittain, a son." The Annapolis County District S. S. Convention met here Tuesday afternoon and evening. The meetings were held in the Methodist Church and were well attended and interesting. Mr. George Lynch and wife, who have been visiting the farmer's parents, Mr. and Mrs. James Lynch have returned to their home in Brandon, Man. Mr. Stewart Nichol accompanied them to the west. Mr. William Lawrence, better known as Billy Boehner, who for the past five years has been playing Uncle Josh in Denman Thompson's "Old Homestead," has severed his connection with this company and will next year star with his own play, "Uncle Dave Halcomb."

Dr. E. and Miss Breck and Miss Josephine leave to-morrow for New York, where Mrs. Breck and her daughter take the steamer for Austria on a visit to Mrs. Breck's former home. Mrs. Breck will be much missed in musical circles in this town. The Doctor will return in about a month's time. The case of Charlie Silk versus Charlie Fong, which was a jury case in the County Court last week before Judge Pelton, was decided in favor of the plaintiff Silk. The Chinese form of oath was administered which was the killing of a chicken in Court. The case caused a good deal of interest on account of both parties being Chinamen.

The regular weekly meeting of the Glee Club was held at the home of Mrs. Frank Darlie on Thursday last after practice. The Club was organized and the following officers appointed for this year:—President, Mrs. H. How; Vice President, G. O. Cheese; Treasurer, Miss Lyon; Secretary, Mrs. F. W. Harris. Music and Executive Committee, Mrs. How Mrs. D. Byers, Mrs. C. McLaughlin E. Breck and T. M. Seeley.

A paper prepared by Judge Savary on General Williams, Hero of Kars was read, in the absence of the writer, by Professor McMeenan before the last meeting of the R. S. Historical Society, Halifax. The paper was a strong contribution and gave the history of this marvellous man whose event at Kars was the crowning one of the Crimean war and earned for this Annapolitan world-wide recognition.

Mr. Alcorn, of Bear River, who is hauling ice for storage in town, lost a horse on Wednesday last for which he lately refused \$250.00. The span which had just finished unloading was standing at the rear of Mr. James Morrow's barn and started to run away. When near Blackie's store they collided with a post and the six-year-old black broke its leg. The horse travelled as far as the Ritchie house before stopping. It was found necessary to shoot the injured beast.

Bear River.

14c. Seersucker now 10c. per yard.—W. W. Wade. Rev. Father Grace held service at the chapel on Indian Hill on Sunday. Mr. I. Edgar Lamoreaux was a guest at the Bear River Hotel over Sunday. Mrs. B. C. Munson, of Amherst, is visiting her parents, Mr. and Mrs. E. E. Rice. Mr. Thaddeus Harris is confined to the house, the wagon wheel having run over his heel. Richard Clarke, who was confined to the house for several days, is able to be around again. S. S. Bear River sailed for St. John on Monday, taking for that market quite a quantity of produce. Rev. I. A. Corbett administered the ordinance of baptism to three candidates at the Baptist Church on Sunday evening. Rev. William Ryan, of Auburn, occurred the Methodist pulpit on Sunday, the morning service being in the interests of missions.

Belle Isle

Mr. and Mrs. Frank Goueber and Miss VanBuskirk, of Melvern Square were guests last week of Mr. and Mrs. R. W. Ray. Miss Maria Wade, who has been spending a few weeks with her sister Mrs. N. K. Clements, at Yarmouth, returned home last week. Mrs. Seth L. Gesner and little daughter Marjorie, who have been visiting her sister, Mrs. Messener, at Paradise, during the past week returned home on Monday. On Friday evening, the 12th ult., a large number of the young lady and gentleman friends of Miss Fannie Dodge made up a "surprise party" and called on her at her home, it being the 15th anniversary of her birth. Although taken by surprise, the charming and courteous young hostess was equal to the occasion. In a few moments she had all the rooms in her spacious and hospitable home at the disposal of her guests, who in music, games of varied kinds, and plays, etc., did enjoy themselves to the extent of every wish or desire. It being the Lenten season, "tripping the light fantastic" could not be indulged in. At 12 o'clock a dainty and most inviting collation was served. Conspicuous in the centre of the table was a beautiful birthday cake around which stood fifteen lighted tapers indicative of her age. Each of her young lady friends present blew one out. The cake was then cut and served up to the company, after which all departed wishing her many very happy returns. She was the recipient of many tangible tokens of esteem from friends and relatives from a distance.

North Williamston

Service here on the 21st at 7.30 by Rev. C. H. Haverstock. Mrs. R. D. Stevenson, of Brickton, arrived home on the 13th. Mrs. O. DeLancey spent a very enjoyable week with friends at Bridgetown.

Mrs. John Moore is visiting her daughter, Mrs. W. Bustard, of Mechanic Settlement, N. B. A. Bezanson and son are busily engaged sawing wood with their gasoline machine. Mrs. Arthur Wheelock and son, of Clarence, were guests of her brother, D. M. Charlton, on Monday. Mr. and Mrs. D. M. Charlton spent last Saturday and Sunday with Mr. and Mrs. M. Nelly, of Lower Middleton.

Hampton.

Henry Chute has gone to Beaver Harbor to join the schooner, F. G. French. The steamer Ruby L. called on Monday and took on board quite a quantity of potatoes and other freight. Mrs. Charles B. Mitchell fell on the ice several weeks ago injuring her back, and seems to be recovering very slowly. Mrs. I. B. Snow has been very sick for several weeks. Doctors Armstrong and Burns have been in attendance. At present she is settling around the house again. Judson Foster and wife have been visiting D. M. Foster and family, of Karsdale; also his father, J. V. B. Foster, who resides with his son, D. M. Foster. The elderly gentleman is now entering his ninety-ninth year. L. D. Brooks, when engaged in hauling ice on Saturday last, had the misfortune to put his knee out of joint. Dr. Armstrong was called to place it in its position again, and it is progressing favorably.

Port Wade

Lena Keans, of the Digby High School, was home with her parents over Sunday. Amy Litch, of Lower Granville, has been visiting with her parents here the past two weeks. Charles Parks and wife, of Port George, were visiting last week at the home of John W. Snow. Guilford Harsh, of Graywood was the guest of George Westhaver Saturday and Sunday last week. The special meetings of the Baptist Church held by our pastor, Mr. West, are to be continued this week, as indications of promise seem to exist. Benjamin McColl, a former resident of Lower Granville, but for some years engaged in business in Lynn, is now visiting his relatives and friends here. Captains E. Keans and W. McGrath who are promoters of the S. S. Ferry service here, have inspected the boat under construction, and pronounce her "all right." Mr. Guilford Haynes, of St. John son of John Haynes, Esq., of this place, is building a summer cottage. His wife and family will move here in the early summer. A "tea" was held Thursday night last with Mr. and Mrs. C. D. Arthur, where a pleasant evening was spent and the sum of fifteen dollars added to the fund for the purposes of the M. E. Church. The men of this place, who have been lumbering north of Thorne's Cove, have returned home. They report a very fine cut of lumber between five and six hundred M. feet. A. D. Mills & Sons are the shippers. The Albert J. Lutz, Captain Aot. is in port with a goodly catch of fish something over 75,000. This is exceptionally good considering the weather which has been very rough, there being about three days in the three weeks out which were fit for fishing. The Lutz, with a crew of twenty-three men, is now lying at anchor in the stream where they will overhaul and fit up gear for halibut fishing, the haddock season being ended.

Pictou.

Mr. Alvin Nelly, of Cambridge Kings Co., is visiting friends and relatives here. Mrs. B. W. White, of Somerset, spent a few days of last week with her niece, Miss Mary Chipman. We are sorry to report that Mrs. (Rev.) Willard Parker is, at present, suffering from an attack of la grippe. Mr. and Mrs. F. A. Chipman entertained a large number of their friends at a "character party" on Tuesday evening, March 2nd. Mr. Harry DeLancey left for Boston a few days ago where he will spend a short time and then go to Vancouver where he intends remaining indefinitely.

STIFF NECK.

Stiff neck is caused by rheumatism of the muscles of the neck. It is usually confined to one side, or to the back of the neck, and one side. While it is often quite painful, quick relief may be had by applying Chamberlain's Liniment. Not one case of rheumatism in ten requires internal treatment. When there is no fever and no swelling as in muscular and chronic rheumatism, Chamberlain's Liniment will accomplish more than any internal treatment. For sale by W. A. WARREN, BRIDGETOWN, A. E. ATLEE, ANAPOLIS ROYAL, and BEAR RIVER DRUG STORE.

Obituary.

JOHN JEFFERY. The death of John Jeffery, which occurred at the County Hospital where he had been for treatment the last few months, was sudden and unexpected by his friends. He was the son of the late John and Sarah Mangorde Jeffery of this town. While several of his brothers and sisters went abroad he remained at home with the other members of the family and was a comfort and support to his father and mother in their declining years. During his younger days he engaged quite extensively in poultry raising and was successful with bees, having a nice apiary. He also took a great interest in his trees, both fruit and ornamental. Personally he was noted for amiability, honesty and integrity of character. He was a consistent member of the Baptist Church for a number of years and was constant in his attendance until sickness came with advancing years, causing his decline physically and mentally. Repeat it:—"Shiloh's Cure will always cure my coughs and colds."

Smith Cove

Joel Burt is in poor health, having suffered a slight hemorrhage. Mr. Norman Sulis has recovered from a severe attack of sciatica. Mrs. Charlton, of Middleton, is visiting her daughter, Mrs. George W. Potter. Miss Leita Weir, of Waldeck, visited her aunt, Mrs. Harvey Weir, last Saturday. Rev. I. W. Porter, of Wolfville, passed through Saturday en route to Bear River. Miss Harriet Thomas has gone to Boston to spend a month or two with friends. Mrs. Gidney and her daughter, Miss Frances, are expected home from Halifax this week. A number of school children have received an atlas of Canada from Mr. C. Jameson, M. P. Rev. Henry Carter led the Bible class last Saturday night. He taught an impressive lesson. Miss Jennie Potter was at home to her friends on Friday evening last. A very nice time was spent. Miss Lillian Winchester is visiting her brother, Mr. Lovitt Winchester, station agent, South Maitland. Arthur Cornwall has varied out a large quantity of cordwood, which he will offer for sale during the summer. Mr. D. H. Baldwin and Miss Louise Wheeler, who have been wintering at the Out of the Way Inn, returned to Boston on Saturday last. Mrs. George W. Potter has been received into the Baptist Church. She joined by card from the Middleton church, where she was an active worker before moving here. Miss Nellie Saulnier, of Metehan has arrived to take charge of the "wringing house-cleaning" at "Wohndes Lodge," it being the intention of Mr. Gidney, the proprietor, to be ready early for the tourist travel. Miss May Corwell entertained a number of friends at supper on Wednesday evening last. Before dispersing for the night, the guests were served with delicious ice-cream. All enjoyed themselves very much. Mrs. George Adams, of Victoria Bridge, is in receipt of a letter from Williamsport, Pennsylvania, stating that her brother, Fletcher Milbury, died in that town on the 9th of February last. He was seized with acute rheumatism about Christmas time, and never rallied. He was born in Port Lorne, on the Bay shore, 58 years ago, and when 21 years of age

went to Williamsport, where he has lived ever since. He visited his old home once during all that time, and that was to spend the summer after an absence of seven years. He was planning on coming next summer again to stay the season. Like so many Nova Scotians, Mr. Milbury was very successful in the land of his adoption, being at the time of his death foreman of the Darling Pump Company's works, which were closed the day of the funeral to permit of the officials and employers attending the obsequies in a body. Deceased was twice married, and is survived by his second wife and one daughter nineteen years of age. He joined the Presbyterian Church when he went to Williamsport, and was a member in good standing of that denomination when he passed away. His aged mother, who is now Mrs. William DeLonz, of Clementsvale, was much grieved to hear of the death of an only son, to whose welcome homecoming next summer, after an absence of thirty long years, she was looking forward with motherly anticipation. In addition to Mrs. Geo. Adams, mentioned above, there is another sister, Mrs. W. H. Lene, living at Clementsport. Much sympathy is felt for the bereaved family. Fletcher Milbury, senior, father of deceased, died at Port Lorne many years ago.

Grand Manan, N. B., May 23rd, 1908. Mr. W. H. McLean, the popular liveryman of Grand Manan says, "Empire Liniment cured Colic in a valuable mare of mine after other liniments had failed. The mare was off her feet and two hours after taking Empire Liniment she was up and eating and another bottle made a complete cure." (He further stated he found it an effective remedy for the horse).

Another piece of Dickens' London is being demolished in Fulwood's Rents, Holborn, London, the basement of which is said to have been the original of Fabian's thieves' kitchen. It was also a resort of Jack Sheppard, but at an earlier date Francis Bacon lived in the building.

MINARD'S LINIMENT CURES DIPHTHERIA. 5 cent and 10 cent bundles of newspapers at MONITOR OFFICE.

He who is ambitious will never write well; but he who tries to say simply what he feels and thinks, what religion demands, what faith teaches, what the Gospel promises, will write better English than if he made a study of English literature.

Fig Pills

The Great Kidney and Liver Pill Cures Rheumatism, Indigestion and Stomach Trouble.
