SUFFRAGETTE PRANK PLAYED BY TWO YOUNG PRINCES ON HON. WINSTON CHURCHILL

And now royalty has begun perpetrating "suffragette outrages," it has just leaked out. The king's sons, Prince Albert and Prince Henry, are the two miscreants. The incident happened just after some one looted the red flags from the golf course at Balmoral and left purple "votes for women" flags instead. That was bad enough, but how much worse it was when similar posters were found, a day or two later, plastered on the door of the guest-room of Rt. Hon. Winston Churchill, who was visiting at Balmoral Castle at the time.

If I was defeated by the Canadian people one year ago, no one has ever heard me complain over it, nor have they seen me take back water. Young as I am, young as I feel, I have tried my best to try again.' 'We are with you,' shouted a man in the audience.

Bake!

COULD your bake day be made a little easier? Very likely it could. Read this signed, sincere truth and judge for yourself:

Regal Flour readily yields the best quality and the utmost quantity of bread per barrel. No flour in the world yields more per barrel. The loaves it bakes are white and light. Its pastry is deliciously flaky.

Your first bakaday will tell if we exaggerate or not. If we have, in your judgment, your dealer will gladly return your money. We, in turn, must pay him back. Unless you are pleased we lose. Isn't that fair? Remember—Regal.

The Guilty Party

By RUTH CAMERON

ONE hears a great deal of protest from time to time against the owners of houses and apartments and the hostesses of boarding and lodging houses who bar children.

Now it surely must be pretty trying to find one's self shut out of a home which one is perfectly willing to pay for, simply because he has dared to help keep the race free. But I wonder if the landlords and hostesses deserve all our blame.

A beautiful apartment house was recently put up in our town. The families with children were not excluded and two moved in. One family had three children; they were well brought up and did not cause any trouble. The other family had but one child, a little girl about six years old who had been as thoroughly spoiled as a fond and foolish mother could spoil her.

This child was an inveterate tease and one of her most most pleasing tricks was to get out on the lawn in front of the house and then squat at the top of her lungs with her mouth wide open.

Stafford was originally one of the honors of the House of Howard. But the peerage, which was heritable in the female line, was attained in 1680, when Willard Howard, Lord Stafford, lost his head on the scaffold as a victim of the infamous Titus Oates.

RASH SO BAD BABY CAME NEAR DYING

Head Broke Out. Spread to Arms, Legs and Entire Body. Itched So He Would Scratch Until Blood Ran. One Box of Cuticura Ointment and Nearly One Cake of Cuticura Soap Cured Him. Has Had No Return.

"When my boy was about three months old, his head broke out with a rash, which was very itchy and ran a watery fluid. We tried everything we could but got no relief all the time, till it spread to his arms, legs and then to his entire body. He was so itchy that he would scratch until the blood ran, and a thin yellowish scud would all over his pillow in the morning. I had to put ointment on his head to prevent him scratching his skin. He was so weak and run down that he took nothing solid as if he was dying. He was almost a skeleton and his little hands were like sticks."

SIR THOMAS SAYS THERE ARE PLENTY CARS

Winnipeg, Sept. 21.—Sir Thomas Shaughnessy on his way east, declared here that the C. P. R. had plenty of cars for moving the grain east, though they were lying idle now owing to delay in harvesting and threshing.

He found conditions satisfactory on the line between Montreal and Vancouver, all of which he inspected by daylight.

He was unable to say if the C. P. R. would build a tunnel through the mountains.

ENGLISH, IRISH AND SCOTCH PERFORMERS

A Party of Clever Entertainers to Open at the Opera House on Monday

If variety counts for anything, the programme of vaudeville offered at the Opera House beginning on Monday, is certain to prove popular. Miss Dorothy Parker is the English representative, having played in many of the prominent theatres of London. Miss Parker is a dainty musical comedy girl and "wicked-lair" handmaiden costumes with the acme of gracefulness. Her singing and dancing will be an outstanding feature of the bill. Mr. Barker Nichols is a humorist of rare talent, late of the Variety theatre in Dublin. In addition to his comedy roles, Mr. Barker is also master of a novelty musical act of a different type than ordinary. The third member of the party is Miss Annie McKillop, a bonnie Scotch lassie, in native songs and specialties.

Miss McKillop, who possesses a splendid soprano voice, is winner of the gold medal in Glasgow Conservatory. There will be five specialties on this portion of the bill. In the motion picture department the management has secured an artistically inclined in the famous French fairy story "Hop O' My Thumb." This series of pictures is in two reels and is handsomely colored throughout. The scenes present a gorgeous spectacle as the production is an expensive one and has been made on an elaborate scale. The steady picture patron will be pleased to see a Mary Pickford type in the society story of a millionairess, the millionaire under the title "The Trouble Maker." The performance is one hour and a half long and is easily the biggest show in town for next week. The admission is 10 cents with a 5 cent price for the gallery. The shows start each day at 3 p.m., 7.15 p.m., and 8.45 p.m.

Grants and loans made and indicated to highway authorities amounted to £1,177,488, and, in addition, the board have indicated willingness to grant £875,000 to assist the construction of a new western approach road to London.
"There is a general impression," states the report, "that nearly the whole of the increase in maintenance expenditure has been due to motor traffic, but although such traffic has already been responsible for a considerable increase in the cost of maintenance of roads in rural areas it is doubtful whether this cause has yet affected the figures to so large an extent as it may do in the future unless prompt and effective steps are taken generally, as has been done in several counties, to arrest the increase by adopting better methods of maintenance."
Big expenditure on the roads, however, owing to motor traffic, is foreshadowed. The report states that if road authorities continue to maintain their roads by the old methods and without still further adding to the quality of material which it has been customary to lay down, the inevitable expenditure which will ultimately have to be faced will be increased. It proceeds:
"The existing difficulties of many highway authorities will become greater until they lead to serious troubles. In order to arrest these inevitable tendencies it appears to be necessary, if motor traffic continues and grows in volume, as it undoubtedly will, to strengthen the road crusts as rapidly as possible and to recast them with superior stone which should on all heavily trafficked roads be bound, not with mud, but with bituminous materials."
To encourage the authorities to undertake a larger amount of such work than they are able to accomplish immediately out of the rates, the board offer to advance loans, in most cases free of interest.

GOWNS TIGHTER AND OF VIVID COLORS

Marie Tempest Gives Away Secret of Autumn Styles

Paris, Sept. 21.—The carefully guarded secret as to what the autumn fashions will be is betrayed by Marie Tempest. The actress, who has been keeping the dress-makers busy, declares that the gowns worn this fall will be skintight, more sheaths for the female form divine—in a word, they will be tighter than ever.
"The pattern as such has vanished, but become drapery," said Miss Tempest. "Indeed, everything is draped; the dresses will be tighter under the drapery; there will be no foundations save those a woman's own true figure provides; everything will be transparent. I do not know what we women are going to do with such unobtrusional clothing. Fur appears in every blessed thing for indoor and outdoor wear for afternoon and evening."
"In regard to colors, they are the most vivid and most violent that can be obtained."

TO POPULARIZE THE USE OF THE LIME IN ST. JOHN

An effort is being made to popularize the use of the lime in this city as well as in other parts of Canada. While lime juice is very widely used, the fresh limes have not been introduced to this market on a large scale, and in the past have not been generally used. It is believed that this is largely due to the fact that people are not acquainted with the excellent qualities of this fruit, and that, on closer acquaintance, they will be anxious to buy them. Local dealers are to be supplied with the fruit, and it is possible that limes may become as common in grocery store windows as lemons now are.
Concerning this fruit the London "Lancet," a famous medical journal, says: "The lime is not so well known" as the lemon, although from the point of view of flavor it is regarded by many as being even superior to the lemon. In view of the fact that there is now a good and abundant supply of limes to this country it is interesting to contrast the analysis of this fruit with that of the lemon. According to an analysis which we have recently made, it would appear that the lime, although smaller than the lemon, yields, weight for weight, a good deal more juice. Thus, the average amount of juice expressed from a lemon on juice, as well as other fruit juices, is 37.20 per cent. of its weight, whereas the lime gives more citric acid, but less sugar. The lime, therefore, yields a "drier" juice and contains a third of the quantity of sugar present in the lemon. The antiseptic properties of lime juice may be regarded as more marked than those possessed by the juice of the lemon. While the alkaline salts amount to practically the same in both fruits, yet the phosphoric acid is greater in the lime than in the lemon. It is probably owing to the richness in alkaline salts that the use of lemon juice, as well as other fruit juices, is helpful in some diseases of the skin and in preventing eczema. The juice of the lime is equally valuable in this respect, if, indeed, in regard to some diuretic points it is not superior. To those who are asked to think imperially there is another point about the lime which may appeal to them: it comes from British colonies and not from foreign countries. Fiscal reasons apart, the lime is an excellent and wholesome fruit, and it seems a pity that we do not hear as frequently of a "Lime Squash" as we do of a "Lemon Squash."

On July 19, a granddaughter of George III, celebrated her 91st birthday. This is the Dowager Grand Duchess of Mecklenburg, the last surviving grandchild of George III. It seems extraordinary that anyone should be able to say "as she can" the children. They do well with plenty of milk, bread and butter and fresh vegetables. Fish is excellent for them.

HOW BETTER ROADS WOULD HELP
(Yarmouth Light)

Thomas F. Anderson, of Boston, gave an address before the Union of Nova Scotia Municipalities at its recent session in Antigonish. In the course of his address he stated:

The development of the automobile industry has been even more wonderful than the growth of the vacation business. There are now in the United States and Canada, today nearly one million automobiles, valued at one thousand million dollars. Last year no less than 250,000 cars, valued at \$250,000,000, were made. Massachusetts has 42,000 and New York has 92,000.

An astonishing number of guests come to the palatial White Mountain hotels in New Hampshire in autos. A few months ago the Raymond and Whitecomb Tourist Company sent the first through automobile tour across the continent. Already we have auto lines running from Boston through to the White Mountains, and this is but a beginning.

Auto Parties

It is estimated that there will be 500 or more trans-continental private touring parties by auto this season, totalling 2,000 persons. Good authorities figure that these travellers will spend at least \$1,000,000 en route, their expenditures for hotel accommodation and souvenirs alone amounting to \$800,000. The Denver Chamber of Commerce reports that 2,000 autos visited Colorado in 1911 and left in that state \$2,700,000. It has come to be an axiom that auto-enthusiasm is among the best possible advertising mediums for a vacation section. This is something for the people of the maritime provinces to keep in mind.

The automobile of course should be properly regulated, but on the other hand, every possible encouragement should be given those who would like to visit our peerless province in this way, especially by providing decent and safe highways and proper sign-posting.

The question of better highways is one which looms large everywhere, and nowhere is it a more serious problem than in this part of Canada. As Horace Bushnell says: "The road that is

tions are especially active in helping on the movement.

In Colorado, through the joint efforts of the National State and Municipal Government, and of the Denver Chamber of Commerce, a wonderful 41 1/2 mile scenic highway, taking in the famous Garden of the Gods, the Pike's Peak region, etc., is to be constructed at large expense.

VALUABLE WORK OF CHAMPLAIN SOCIETY

Publishes Otherwise Practically Inaccessible Material Relating to Canada's History

—London Opinion.

Those who are interested in the history of Canada will value the work of the Champlain Society, which was organized in 1905 for the purpose of publishing valuable and practically inaccessible material relating to the History of Canada. The volumes published by the society are limited, except in special cases where unusual conditions exist, to five hundred and twenty copies, of which twenty are supplied for review purposes. They are beautiful specimens of book-making, and include reproductions of original illustrations, maps, etc., and the original texts. The works printed by the society are edited and translated by the best scholars obtainable, and printed in a style hardly equalled by any other publisher. The volumes are not sold to the public, but are supplied to subscribers only.

The society is supported by the subscriptions received from its members when called for, but not exceeding \$10 annually. Four subscriptions of \$10 each have been called to date. Each member receives, without further charge, two volumes for each contribution of \$10. Seven volumes have already been published, and the eighth volume will appear shortly. The volumes already published are furnished to new members, and can be paid for either in a lump sum of \$40, representing four subscriptions already called for, or in payments of \$10 each at intervals of six months. Subscribers choosing this latter alternative will, after these payments have been made, be on a footing with the other members.

The works already published by the Champlain Society are as follows:

1. The History of New France, Vol. I, by Marie LeComte, translated and edited with an introduction by W. L. Grant, and an introduction by H. P. Biggar. (To be completed in three volumes.)
2. The Description and Natural History of the Coast of North America (Acadia), by Nicholas Denys, translated and edited with a memoir of the author, collateral documents and a reprint of the original, by Prof. William F. Vaux.
3. Documents Relating to the Seigneurie of Tenure in Canada, 1688-1854; edited, with historical introduction and explanatory notes, by Prof. Bennett Munro.

GOOD WORDS FROM OTTAWA.

The report just issued by the Inland Revenue Department, Ottawa, stated that Dearborn's "Perfect" Baking Powder contained 33.7 per cent. of carbonic acid gas, which is a higher percentage than claimed for it. The report also states that "this is a good powder" pure and unadulterated.

Don't pay fancy prices for baking powder when you can get the "Perfect" for 40c. per lb. Two teaspoons full will do the same work as three of other brands, and do it better.

THE EVOLUTION OF DRESS

1,000 YEARS AGO!

A.D. 1800 Men wore clothing of some sort, but never before in the history of the world has man been able to clothe himself so smartly and economically as he can to-day through us.

\$20 Suit or Overcoat to Measure (Garbage and for \$8.60. (Valued by thousands of Duty Paid) Clients at \$30.)

There is a distinctive style and finish about a "Curzon" Suit or Overcoat which this "ready to wear" or low-priced made-to-measure garment now sold in Canada lack. There is no resemblance between them. Indeed the "Curzon" suit and finish is hardly equalled, even in garments sold by the best Custom Tailors, whose charges are always excessive, if not altogether prohibitive. There is just that ease and comfort about our garments which give the wearer a "well-to-do" appearance.

Then there is the cloth to remember: Nothing but real British Materials every time.

Amazing Record of Noted French Revolutionary, Gustave Herve

BEN 11 YEARS IN PRISON

Just Pardoned Through Efforts of Famous Men, But No Reform—One of His Ideals is Uniting European Countries in Great Federation

(Times Special Correspondent)

Paris, Sept. 19.—Search would over and it is doubtful if you will find such another remarkable fight against organized government as that of Gustave Herve. All his life, single-handed he has been arrayed against official France, yet despite the sternest of repressive measures he has been battling as valiantly today as ever. Of his forty-one years, eleven and a quarter have been spent behind prison bars. Scarcely a day has he spent in his own country since he was sentenced to a term of imprisonment for his part in the revolution of 1871. He has been in prison for the greater part of his life, and he has been in prison for the greater part of his life, and he has been in prison for the greater part of his life.

WEAK MEN, WAKE UP! WHY DO YOU WAIT?

Are you satisfied to turn the grindstone for the other fellow all your life? Are you content to be a plodder all your days? There's nothing in it, and you know it. Then why not lace up and wear a Man's Electricity as I apply it to working wokers in the world. I am making bustling, energetic men out of wrecks every day. In every walk of life you'll find out those men whom I have saved from lives of wretchedness and despair—men who are making their mark in the world—men who are shouting the praises of my Dr. McLaughlin Belt—men who will tell you that their success in life dates from the time that they begin the use of my great Electric Appliances—the only absolutely safe and sure remedy for a weak man—a broken-down man.

My remedy is an honest remedy, a logical remedy, a time-tried remedy. You have seen my advertisements for over 20 years, if you have been on earth that long, and if you'll write to me or consult some of the men and women who have used my appliance or are using it, they'll tell you that it does all that I claim for it and even more. Then why do you wait? What's the use in bowling your fate? You know you are not the man you ought to be. I can help you with Electricity as applied according to my method more than all the Doctors and Drugs in Christendom. If it's fresh strength and energy you want, VIM and VIGOR, that's what I can give you, and you'll be a long time getting anything like that out of drugs.

Let me treat your case in my own way. Let me apply a steady current of Galvanic Electricity to your weakened system with my Dr. McLaughlin Electric Belt. Wear this appliance, night after night, for a few weeks and it will drive out all those pains and aches; it will restore energy and equilibrium to your nervous system; it will fill your body with fresh strength and energy; it will give you back the powers of manhood and make you a Man among Men. Again I place before you more PROOFS:

Dear Sirs—You will think I have forgotten you, but I have not. I wanted to be sure of what I would say about your belt, that is the reason I did not write before. I have worn the Belt about three months, and it has done me lots of good. The pains in my back have all disappeared. If I can do anything for your Belt I will, as I shall always recommend it.

His "Young Guard"

All these years of struggle have convinced Herve that he is well-nigh helpless, single-handed, against the state. He has now surrounded himself with a growing band of ardent souls known as the "Young Guard," which maintains a sort of guerrilla warfare against the "capitalists."

This organization also maintains a force of revolutionary police who not only prevent censored working men from running amok during demonstrations, but actually make arrests. Not long ago Herve's revolutionary police caught in their ranks some police spies, paid by the government, who were tried, condemned and ousted. By the secret work of this "Surrete Revolutionnaire" it was discovered recently that the government had a list of names of nearly all the socialist agitators, specially those favoring the insurrection of the working classes in case of international war. The government plan was to arrest and imprison them, en masse, immediately on the outbreak of hostilities.

Counter plans have been made by the revolutionists. Arrest under such circumstances would be resisted by violence and the leaders have made arrangements whereby, immediately on war with another nation being declared, they will never sleep two nights in the same place, but will keep constantly on the move.

A European Federation

"What we want is to found the United States of Europe," said Herve to me in conclusion. "If one studies history, and sees how Italy, France and Germany have become nations by the grouping together of small provinces which were always war-

ring with each other, one will realize that it is only one step further to a European federation, allowing each country its autonomy, as Switzerland permits its cantons. When this federation is founded war will end for all time. The billions now spent annually on armaments could then be spent for social betterments, for the uplifting of the people.

"Arbitration between governments must be compulsory. If it is not made so, the working classes, in rising, are acting only in legitimate self-defense.

"It needs only a reactionary movement to cement together all those who believe in and are working for the social republic, but who at present are split up into factions. The last time the people swept away the church, this time when the pendulum swings one way, as there are no clericals left to devour, the people will put an end to the capitalists."

REPTILE HUNTER

French Snake Killer Dies of Bite Of Viper

POISONED BY MUSHROOMS

Numerous Cases in Various Parts of France—Strange Sequel to Domestic Tragedy—Why Teller's Wedding Did Not Take Place on Day Appointed

(Times Special Correspondence) Paris, Sept. 10.—After destroying upwards of 2,000 vipers in the course of the career of a snake hunter, Henri Sausseur is dead from the bite of a snake.

During the performance of a strolling players' company at the fair of Bourgen-Bresse, near Lyons, the actors and actresses, who had dined together before the play and had eaten poisonous mushrooms, were taken ill on the stage.

The statistics contained in the report of the inspector of lunatics which has just been issued, show that the proportion of lunatics to the total population has more than doubled in the last thirty years and the rate of increase shows no falling off.

The figures for the last two years are as follows:— 1911 1910 Men12,888 12,704 Women11,787 11,600

This shows an increase of 2,085 lunatics in the year. The increase in the previous year was about 1,000. In 1880 the proportion of lunatics to the population was 250 per 100,000. In 1911 it was 563 per 100,000.

The average rate of increase during the entire period was 10 per cent per annum. The cause of the increase is not clear.

It is generally believed in Ireland, too, although it is hard to say with what degree of truth, that the local authorities in the United States, Canada and Australia often "assail" the return of these emigrants who have failed in their attempt to find a better life in the new world.

It is interesting to note that the proportion of lunatics to the population has more than doubled in the last thirty years and the rate of increase shows no falling off.

More than a year ago a young woman named Louise Vallee left her husband's house at Allouville near Charleville, and went to live in Paris with her lover, Gaston Lamy, a chauffeur. The husband, Charles Vallee, learning that Louise had left her home, offered to take her back. This offer was accepted, Louise left her lover suddenly, without telling him of her resolve, and returned to Allouville. The chauffeur Lamy soon discovered the whereabouts of his errand mistress, and set off for Allouville.

Reaching the house of the reconciled couple, he rang the bell. As soon as the door was opened, he stepped into the apartment, drew his revolver, and fired several shots at the husband and wife, who were sitting at table. One bullet grazed the head of M. Vallee, actually severing a lock of hair, another pierced the hand of his wife.

FAMOUS LITERARY SHRINES

(London Tit-Bits) When Turner purchased a few square feet of canvas worth a shilling or two, and, with his pigments and a brush, painted the sunset on it, or the towers, minarets, and palaces of Venice, he made that piece of canvas practically priceless.

At the corner of an old-fashioned Georgian square in the sleepy cathedral city of Lichfield stands another priceless house.

It is a little, unpretentious, two-story cottage, which would command a rental of half a crown a week at the most.

It is a quiet and eminently respectable street in Chelsea. Opposite the end of it, in the Lombankend Gardens, sits the rugged stone figure, carved by a master sculptor, of a man who once lived in the house numbered twenty-four.

MARRIAGE RATE

LONDON NEWS LETTER

Trying to Improve the Telephone Service—A New Departure in Social Work Among Outcasts of Metropolis—A New Banking Quarter

(Times Special Correspondence) London, Sept. 10.—According to the official figures in the registrar general's returns, marriage is rapidly becoming unpopular.

These figures are causing considerable discussion among scientists, and the belief that the falling marriage rate is due to the increasing love of pleasure and independence among young women is rapidly gaining ground in many quarters.

"I think the increasing unpopularity of marriage is undoubtedly due to the growth of independence among modern women, and I am sure there will be a still greater falling off in the marriage and birth rates in the future," said Dr. Ezekiel Boyd.

Every year the women of Great Britain take a more active part in the coming perfectly capable of earning their livelihood, which means that they have pleasures and pastimes of their own, which are missing after marriage.

"There is no doubt that the lower middle class girls in many cases prefer the freedom of earning her own living to what she looks on as the squalid obscurity of marriage in a tiny home. Another factor to be taken into consideration is the increasing expense of marriage. Married life costs too much in these days, and young people hesitate more and more before they embark on such a perilous venture."

This disinclination to marry has a very serious aspect for the women for they arrive at middle age, finding it increasingly difficult to provide for themselves, and yet the age when it is easy for them to find husbands.

London's "Flames" The official hints for the improvement of the telephone service have been received with hilarity of a decidedly bitter nature by those who have had reason to complain of the present system.

It is not likely, however, that much betterment in the present conditions will be attained until the promised new exchange has been established and placed in working order.

Some five new centres are in contemplation—four in the west and one in the city. The post office authorities hope in this way to get rid of the existing congestion of business, with the annoyance and delay now experienced by subscribers. At the same time, no responsible person is inclined to believe that the service, even under present conditions, is so very bad as some of the newspapers here represent it.

At the beginning of October, when tramps return to London from the country, a new departure is to be made in dealing with these individual social scoundrels. A scheme has been arranged by which anyone who is without the price of a night's lodging, which may be fixed at ten cents, can obtain shelter and food.

Hitherto the police have hesitated to proceed against those sleeping out, but the absence, in many cases, of suitable accommodation. A commissioner of police has now offered to arrange that police stations on night duty shall carry tickets to be handed to homeless persons who they may come across near their stations.

These tickets are to be presented at an office to be opened in the Strand, which is to act as a kind of clearing-house for vagrants. Mrs. Sarah Bernhardt will be fulfilling an engagement in this country at the time of her next birthday, October 25, when she will be sixty-nine. Some of her English admirers have decided that an address of congratulation shall be prepared and presented to her on the occasion, the signatures to be obtained from representatives of literature, the drama, and art, and of the social life of the country generally.

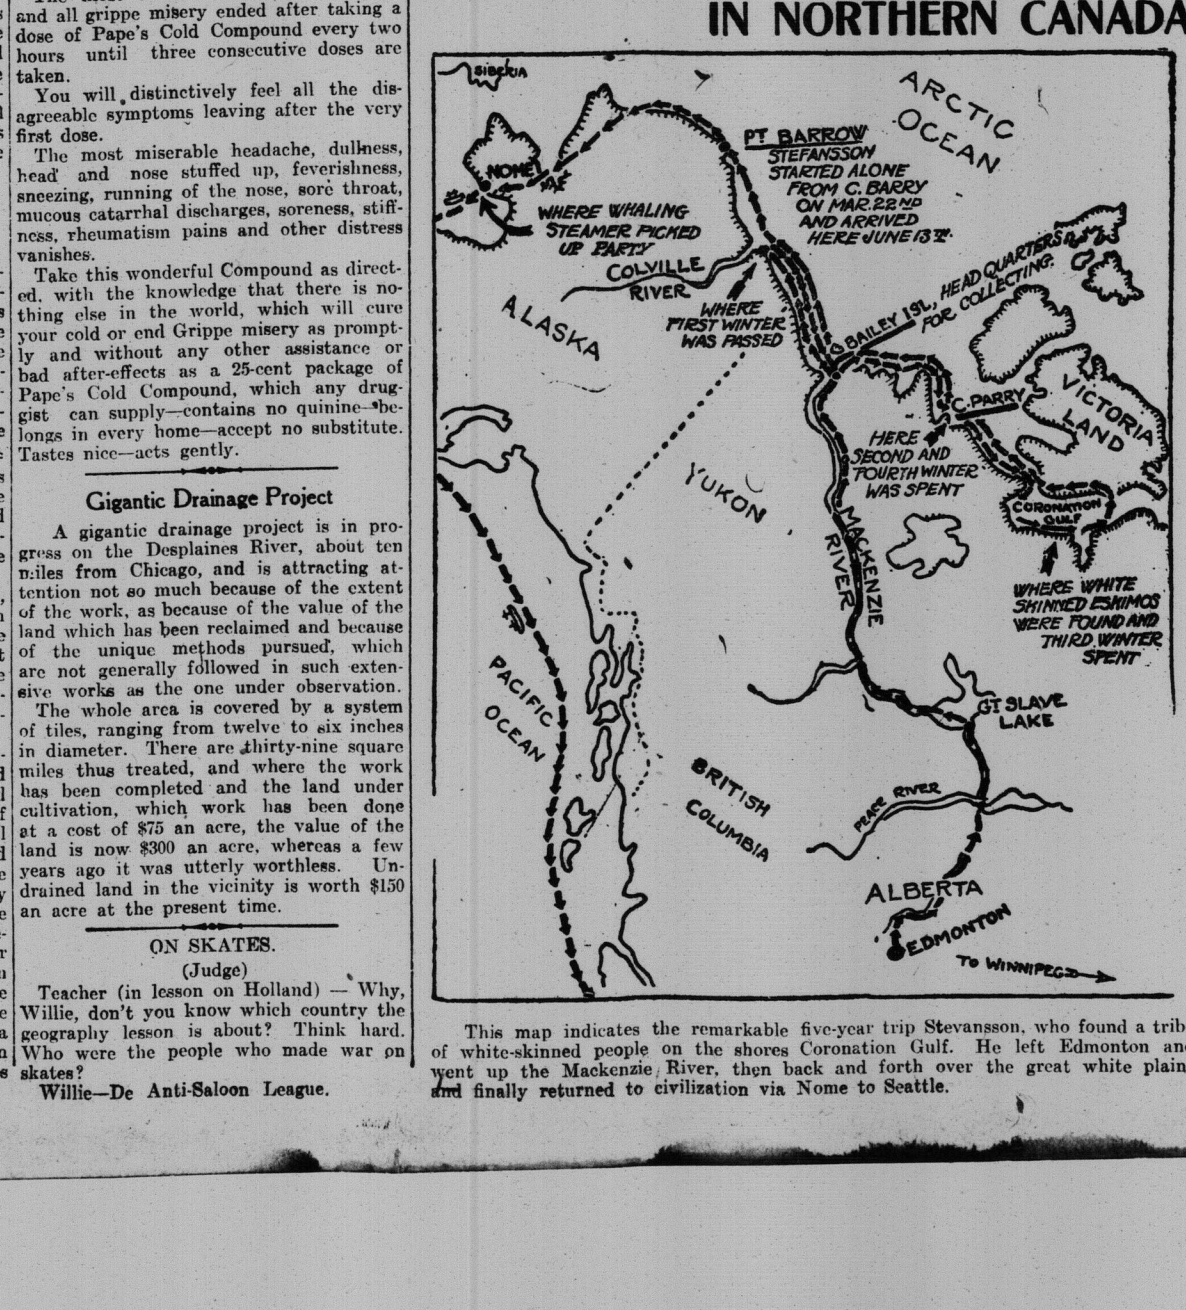

Blank sheets for signatures to be attached to the memorials are to be available at all places of public resort, including theatres and clubs. The address, with the signatures, will afterwards be engrossed on vellum and bound as a volume.

Banner activities to the Kaiser an inclination to come to England in a short time on a private visit in the hope that the change of air will effectually complete his recovery. It is said that the German Emperor retains very pleasant recollections of his stay at Highcliffe on Christchurch Bay a few years ago, and is inclined to repeat the experiment. A peculiarity of the pleasant seaside resort is the fact that, owing to the nature of the soil, rain water drains off as if by magic. Half an hour after a storm, if the sun breaks out, the roads are quite dry again. The scenery in the neighbourhood of the New Forest is of a delightful nature, and as a rotating centre Highcliffe can hardly be excelled.

New Uniforms in Army The new uniforms to be worn by officers has now been passed officially. The existing collar of the field service dress jacket has been abolished in favor of the open front and step-collar that is already worn by the Brigade of Guards. The whole contrivance is very simple, and the character of the collar, as of an ordinary civilian's lounge jacket, save that the opening is less

REMARKABLE EXPLORATION IN NORTHERN CANADA

(London Tit-Bits) A party of five men, including a woman, have just returned from a five-year trip in the Arctic region of northern Canada. The party, led by Dr. Stefansson, had set out in 1906 to explore the interior of the continent, and had spent the last winter in the Arctic wastes. They had traveled through the Yukon, the Klondike, and the Alaskan coast, and had reached the Arctic Ocean. The party had been accompanied by a dog sled team, and had traveled through some of the most desolate and inhospitable regions of the world. The expedition had been a remarkable one, and the results of the exploration are of great importance to the world.

This map indicates the remarkable five-year trip Stefansson, who found a tribe of white-skinned people on the shores of Coronation Gulf. He left Edmonton, went up the Mackenzie River, then back and forth over the great white plains and finally returned to civilization via Nome to Seattle.

Manager Kelley

Manager Joe Kelley of the champion Toronto team has been twenty-one years in baseball, and this is his eighth pennant. "I broke into baseball in 1891 with the Boston National League team, which won the pennant that year," said Mr. Kelley. "I was a regular player then, being a youngster and utility outfielder. It feels just as good today to win a pennant as it did then, and the game has just as many thrills and disappointments. You've got to have the 'break' to win a championship, even if you have a good ball team. "I felt sure we would win this year, even though we did have a run of bad luck in the early part of the season. Our judgment in the selection of the team, I think, has been thoroughly vindicated, and the bright promise of the training trip has been realized. "Kelley was the star left-fielder and hitter of the great Baltimore team of 1894, 1895, and 1896, when three National League pennants were won in succession. He played left field and first base for Brooklyn, and captured the team in 1899 and 1900, when the Trolley Dodgers won the National League championship for two years. "Kelley's next pennant was won for Toronto in 1907, so that he has repeated again for the Leafs five years later. He was manager of the Boston National League team in 1908, and in Toronto in 1910, 1911, and 1912.

A visit to the playground opened Thursday by the North Woodward Avenue Presbyterian church dispels the vision called up by the mention of the word "public playgrounds," a vision of a small dusty square, often but the size of a lot situated in a congested portion of a tenement district in an overcrowded city where the children of the poor gathered in their hundreds to get some pleasure out of life, pleasure not to be found in the crowded alleys and dangerous streets.

This playground, which adjoins the church is as completely and modernly equipped for the children's use as any found in cities much larger than Detroit.

The grounds are the result of the generosity of Mrs. Helen Tracy McCreight, who is strongly interested in church and philanthropic work.

The playground covers a plot of ground 140x200 feet, extending back from Woodward avenue and adjoining the church building on the north. It is fully equipped with the latest devices for child play, all of which are of galvanized steel, and will withstand the winter weather as well as the hard usage they naturally will be subjected to by the children.

The plot is open to the children of the public, although they are under the supervision of the church and the Rev. Samuel H. Meyer, superintendent of the young people's work in the church and assistant to the pastor, Rev. Sherman L. Divins, will give his personal supervision to the playgrounds during the daytime.

The equipment was provided for by donations from families in the neighborhood in amounts ranging from small sums up to contributions of as much as \$200. During the summer, while the grounds were but partially equipped, there was an average daily attendance of 400, and, with the return of so many families from their summer vacations, and the fall reopening of the schools, it is estimated that 2,000 children will get their pleasure from the generosity of the church and its benefactor.

One feature of the public playground movement is its importance in providing a means of social intercourse for the mothers of the children, as many of them accompany the youngsters to the grounds.

The grounds Friday afternoon presented a scene of gaiety and activity, there were streamers flying from the poles,

SKETCH PROSPECTIVE OF PROPOSED HOTEL TO BE ERECTED IN PRINCE WILLIAM STREET.

By Jas. E. Adamson, Architect and Engineer, 127 Stanley Street, St. Catherine Street, W., Montreal, P. Q., Aug. 1912.

"A start on the excavation for the basement of the new \$1,000,000 hotel, which is to be erected in Prince William street, and Mr. Adamson said that the idea of going to German street was abandoned and had not been even thought of by the promoters of the scheme. He was in conference with contractors in the city yesterday and he was assured that the excavation in the rock would be carried on during the cold weather.

He was in conference with contractors in the city yesterday and he was assured that the excavation in the rock would be carried on during the cold weather.

Mr. Adamson will be in the city several days longer completing arrangements for the start of the work. The new hotel will be situated in the middle of the lot facing the custom house, and will be six stories high, with basement. The building will be up-to-date in every particular, and one of the finest hotels in Canada. The new structure will do much to add to the general appearance of that part of the city.

D., etc. relates the experiences of Friedrich Grotzschow, who visited America in 1837 and went boar hunting in the Ozark mountains. This is a fascinating bear story. Duck Hunting is given considerable attention in this issue and includes duck shooting on the river Sagug, at Long Point, on the St. Lawrence, in the Kootenay district and an amusing western tale entitled "Hunting in Sage Brush Ho's Duck Pond." "Duck Shooting by Reginald Gourlay is also a well illustrated article on Rearing Wild Ducks in Captivity. LOCAL BASEBALL NEWS

P. J. Duggan, former captain of the Fredericton Pats, is still playing with the Providence team. The Bulletin published a cut of Duggan in his Providence uniform and the Sporting Editor in his comment has the following:

"Duggan, the young outfielder from the Fredericton team of the New Brunswick League, is hitting the ball hard for the Grays. George Winter, the former Toronto and Montreal pitcher, wrote Manager Donovan at the youngster and recommended that he be given a trial. The chance to pick up a promising player has not overlooked and in the games he has played thus far with the Grays he has more than made good Winter's hope."

Fredericton Gleason—"The last of the Fredericton club's players will leave tonight to Boston, 'Red' Wildes and 'Hannah' Hoyt have lingered here since the close of the season.

The Fredericton team is to start a series with the Quincy City League champions on Saturday at Quincy, Mass. All the players, except Frank Hale, who has gone to Winnipeg, who finished the season with the Pats, will be available for the games and Pat Duggan will probably also play after Saturday.

JUVENILE COURT

Three youthful offenders were arraigned in the juvenile court this morning. John and James Donovan, aged twelve and ten years respectively, were reported by Truant Officer McMann for playing truant from St. Malachi's school for several weeks. Both boys pleaded guilty and were given a severe reprimand. They were sent below to the guard room for a while, and were later brought in and allowed to go with a caution, that if they played truant again that they would be sent to the reformatory.

Harrison Martin, aged twelve years, was charged with assaulting Mrs. McVane, by striking her in the face with a potato. Mrs. McVane swore that Martin threw a potato out of a window at her, and it struck her in the face. The boy denied the charge, but was told that he was liable to a fine of \$20 or two months in jail. He was also sent down stairs, but was later allowed to go on suspended sentence.
