COURT OF REVISION

Village of Waterdown

The Court of Revision to hear and determine the appeals against the Assessment Roll for the Village of Waterdown for the year 1923 will hold its first sitting at the Community Memorial Hall, Waterdown, on

Friday, June 9th, 1923

At 8 o'clock p. m.

Of which all persons interested are required to take notice.

J. C. MEDLAR,
Clerk of Said Municipality.

Waterdown, May 24th, 1923.

COURT OF REVISION

Township of East Flamboro

The Court of Revision to hear and determine the appeals against the Assessment Roll for the Township of East Flamboro for the year 1923 will hold its first sitting at the Township Hall, Waterdown, on

Monday, June 4th, 1923

At 2 o'clock p. m.

Of which all persons interested are required to take notice.

L. J. MULLOCK,
Clerk of said Municipality.

NOTICE

NOTICE is hereby given that a By-Law was passed by the Corporation of the Township of East Flamboro on the 11th day of May, 1923, providing for the issuing of Debentures to the amount of \$25,000 under the provisions of 13-14 George V Chapter 61, and that said By-Law was registered in the Registry Office of the County of Wentworth on the 14th day of May, 1923.

Any motion to quash or set aside this By-Law, or any part thereof, must be made within Three months after the first publication of this notice, and cannot be made thereafter.

Dated at Waterdown this 15th day of May, 1923.

L. J. MULLOCK,
Clerk of Said Municipality.

CARD OF THANKS

Mrs. Thos. Mann and family wish to thank the many friends for their kindness and sympathy in their sad bereavement.

Half-Acre Garden Gives Big Returns

You can make on an average \$44 net on a half-acre garden on your farm. Can you make as much on a half-acre in any other way? The thing has been worked out by the Illinois Experiment Station. After five years, this station found that the average gross income from its half-acre garden was \$74.85. With a labor cost of \$25.71 and expenditures for seeds, plants, and insecticides of \$5.08, the net return was \$44.06. Here is what the Illinois garden produced in its last year:

Onions, green 36 dozen, ripe 2 bushels; asparagus, 104 pounds; radishes, 103 dozen; lettuce, 22 baskets; turnips, green 5 baskets, early 10 dozen, late 2.6 bushels; rhubarb, 34 pounds; spinach, 21 baskets; peas, 11 baskets; beets, green 8 baskets, early 15 dozen, late 8.9 bushels; cabbage, early 108 heads, late (large) 24, late (small) 24; beans, string 16 pecks, lima 14 pecks; early potatoes, 5 bushels; parsley, supply; cauliflower, early 25, late 10; carrots, early 24 dozen, late 7 bushels; squash, summer 93, winter 330 pounds; sweet corn, 47 dozen; tomatoes, ripe 25 bushels, green 7 bushels; cucumbers, slicing 387, pickles 76; muskmelons, 1,185 pounds; watermelons, 2,063 pounds; egg plant, 41 fruits; peppers, 4 pecks; parsnips, 3.4 bushels; salsify, 1.3 bushels; winter radishes, 3.1 bushels; celery, 20 dozen.

Corning Beef in the Home.

The pieces of beef commonly used for corning are the plate, rump, cross ribs, and brisket, or in other words the cheaper cuts of meat. The loin, ribs, and other fancy cuts are more often used fresh, and since there is more or less waste of nutrients in corning, this is well. The pieces for corning should be cut into convenient-sized joints, say 5 or 6 inches square.

Base Ball

The Waterdown Juniors, under the able management of Mr Lovejoy have entered the Junior City League and will play their first official game at Waterdown on Saturday, June 2, with the Hotspurs of Hamilton. The officials of the H. A. B. A. will be on hand, and it is expected that Reeve Smith will be there to pitch the first ball and Councillor Speck to receive it. Everybody turn out and help boost the boys to victory.

Locals

Mr. J. F. Vance and family have moved to their new home on Mill street.

Mr. Geo. Willis attended the conference of the Methodist Church in Brantford this week.

Albert and Mrs. Slater of St. Catharines spent Sunday with friends in the village.

Mr. George Allison arrived home last Tuesday after a week's visit with friends in Toronto.

The many friends of Mr. Levi Shelton will be pleased to know he has returned from the hospital.

Mr. John Mitchell, who has been in poor health for some time, was removed to the hospital last Monday.

Dr. R. B. Gillrie has moved his office to the residence recently occupied by J. F. Vance on Dundas street.

The Liberal-Conservative meeting in the Memorial Hall last Wednesday was well attended. A. L. Shaver Conservative candidate for North Wentworth, and others addressed the meeting.

Millgrove

Our village was surprised last Monday by distinguished visitors in the persons of Lieut. Governor Procter of Brantford and Hon. F. C. Biggs, who paid a visit of inspection to our Public school and proclaimed a holiday for the pupils.

Dr. MacLean of Frelton addressed the Women's Institute here on Wednesday, and was very much appreciated.

Mrs. Carl Baker of Kitchener spent the week end in this neighborhood.

Mr. Wm. Tufgar of Hamilton has purchased a property on the 5th concession, and is engaged in gardening.

Mr. John H. Drummond is attending Conference this week in Brantford.

J. S. and Mrs. Stuart of Hamilton visited friends in the village on Sunday last.

Harvey Binkey has sold his place here and has moved to the city.

Carlisle

The Annual Garden Party of the Carlisle Methodist Church will be held on the church grounds on Monday, July 2nd. A splendid afternoon and evening program will be given, announcement of which will be made later.

At Rest

The funeral of Thomas Mann took place on Sunday afternoon from his late residence on Dundas street and was attended by a large number of friends in the village and vicinity. Rev. C. L. Poole conducted a very impressive service at the home of the deceased. Interment was at the Baptist Church Cemetery, Westover, where the Rev. Mr. Hains officiated at the grave. The pallbearers were three brothers, Fred, Arthur and William Mann, and three brothers-in-law, Fred Poole, James Ing and Thomas Darling.

Mr. Mann was well known and highly respected. He was 57 years of age and his sudden death is much regretted. He is survived by his widow and one son, Harold, who buried his wife two weeks previous, and two daughters, Mrs. Wilbert Chappel and Mrs. Harry Chappel, 3rd concession, West Flamboro.

Father's Day

Canadian Neckwear Manufacturers, co-operating with a similar movement in the United States, are promoting a Father's Day for June 17th, 1923. This is patterned after the Mother's Day that has been so successful for many years and was promoted by the florists.

Popular imagination is demanding that some recognition be made of father's share in the burden of the work-a-day world. With no thought in the world of robbing mother of the cherished place she occupies in the hearts of every daughter and son in the broad universe, little children are beginning to ask, "Why isn't there a Daddy's Day?" A number of letters have appeared in the press lately—some from little children, some from older children of the fairer sex who know that father had a place in laying the foundation and building the structure of the home—asking why there shouldn't be a Father's Day and suggesting that one day out of 365 be set aside for him.

And why shouldn't there be a Father's Day? Has he not endured the heat and burden of the day too? Has he not been inspired by the same high motives as mother in giving his sons and his daughters a better chance in the world than he had? Has he not harried upon his shoulders heavy burdens of responsibility, endured anxieties, fought his way through difficulties and made innumerable sacrifices for those dependent upon him? There is no one who realizes this better than mother, daughter and son. That is why popular imagination is demanding a Father's Day.

Women's Institute

The regular meeting of the Waterdown Women's Institute will be held at the home of Mrs. W. G. Horning on Tuesday afternoon, June 19th at 2.30. A large attendance is requested as the Government speaker, Miss Powell, will address the meeting. The Millgrove Branch will provide a musical program. A very cordial invitation is extended to all the ladies of the community who are interested in our motto "For Home and Country."

Here and There

Panama canal tolls for April amounted to \$1,378,967

About \$2,200,000 is to be spent on the construction of roads and bridges in the province of British Columbia this year.

The Customs and Excise revenue for April amounted to \$20,500,000, an increase of \$5,000,000 over the receipts of April of last year.

Emigrants numbering 15,000 left Scotland for Canada during the first four months of the year, according to consular estimates in Glasgow.

Canadian flour has at last been placed on the Panama market. One boat has just loaded the first consignment of any size, 1,000 barrels being taken.

Seventy-five per cent. of the copper produced in Canada in 1922 was the output of British Columbia mines. The Canadian production for the year was 43,321,492 pounds, of which British Columbia accounted for 32,432,521 pounds.

The famous Chateau Frontenac husky dog team, remembered by visitors during last winter's sports season, is being perpetuated. One of the dogs has just given birth to three pups, and if the youngsters turn out to be like their parents the Chateau Frontenac team is likely to continue winning dog derbies.

Fishing licenses in the Maritime Provinces have been reduced. The special fishery regulations for Nova Scotia, New Brunswick and Prince Edward Island have been amended to provide that in many instances where the license has been more than a dollar it will now be one dollar.

No limit will be set to the help to be offered to new settlers in the agricultural sections of the province of Quebec, according to Premier Taschereau. The latest government provision is to pay colonists at the rate of \$4.00 per acre for land cleared on their colonization lots since 1920. \$7,000,000 have been voted for provincial colonization.

The decision of the Canadian Pacific Railway Company to scrap agreements of sale with 30,000 Canadian farmers in the west and enter into new contracts with them, extending over 34 years on an amortization basis, will affect agreements of a value of approximately \$100,000,000, and relieve many farmers of heavy, pressing debts.

The new motor ferry operated between Victoria, B.C., and Bellingham, Wash., develops a speed of 14 knots in adverse weather. This motor driven vessel, recently launched, is the first of its class to be used in this service and the first to be added to the Canadian Pacific fleet. It has a capacity for 50 automobiles.

Abraham Martin, first Scotch settler in Canada, first King's Pilot on the St. Lawrence and first farmer on the Plains of Abraham, which were named after him, has been honored by the Canadian Pacific Steamships, Ltd., at Quebec by the erection of a granite shaft. Hon. Athanas David, Provincial Treasurer of Quebec, officiated at the unveiling ceremony recently.

Nothing but the highest quality materials go into Peerless Fence. We can recommend it unreservedly.

Bull strong, pig tight, chicken high—there is a Peerless style for your every fence requirement. All are heavily galvanized and give years of satisfactory service. Come in and let us show you.

FROM HARD TIMES TO CANADA

Do the pioneers lament? Migrants aboard the tender of the
WHEN the Canadian Pacific steamships "Marloch" and "Metagama" last docked at St. John, Canada gained to the extent of over six hundred able-bodied and industrious farmers, farm workers and women from the Hebrides. Forced by the loss of their fishing trade through the war and German competition, and by general hard times to leave their thatched homes, these people have come to a land of promise and have been welcomed as the most valuable immigrants in years. Under the leadership of Rev. Alexander J. Gillies and Rev. John MacMillan, they have gone to the Red Deer district of Alberta and to various parts of Ontario, where they will engage in agriculture.

Most of them are from the island of South Uist, Benbecula and Barra. Here their families worked small farms of from ten to twenty acres and kept a stock of from two to eight cattle and ten sheep on common pasturage. In the spring they gathered seaweed for fuel, planted oats, barley, rye and potatoes, and when this was done took to the sea,

some to engage in fishing, which brought but small monetary return, and others to join the merchant marine. In the fall those who were near returned home, harvested the small crop and thatched their houses. But there was not work for all. It was of no use to fish when there was no market and one man could do the work of the farm which produced but little. The wolf was at every door, almost, and the emigration officer received more applications for information and later assistance than he could comfortably handle.

These people having arrived and received welcome have already buckled down to work. Their losses at home have contributed to Canada's gain. A large party have gone to Red Deer where they will build their own church and school, and in addition to English they will retain their own native Gaelic tongue. The remainder of the immigrants have been split up as hired men in various parts of Ontario. Over four hundred were passengers on the "Marloch," the rest on the "Metagama."

MILK PASTEURIZATION

Making Milk Safe for Use in the Family.

Pasteurization is Not Sterilization—Diseases Transmitted by Milk—Points Charged Against Pasteurization—“Safety First” a Good Practice.

(Contributed by Ontario Department of Agriculture, Toronto.)

The process applied to milk, that we know as pasteurization, was originally used by Pasteur to prevent the souring of wines and beer, and it is now universally applied in the control of milk supplies of large cities. At first it was intended for the preservation of milk, that is, to prevent souring, but now it is used solely with the idea of destroying disease-producing micro-organisms.

Pasteurization is Not Sterilization.

Pasteurization is not sterilization. A much greater heat is required to sterilize than is applied in the former process. Pasteurization consists of heating the milk to a temperature of not less than 140 degrees, F., for a period of not less than 20 and not more than 30 minutes, and then rapidly cooling it to 45 degs. F., or under, and keeping it at that temperature until delivered to the consumer. In addition to this, every care must be taken to have a clean product. The process does not remove dirt; therefore those responsible for the supervision of milk supplies insist on a high quality of milk for pasteurization.

No matter how carefully milk is handled and how well cows are inspected there still remains the danger of the carrier, that is, a person harboring the germs of a disease and yet not affected by them; or of the person who is developing an infectious disease, yet is not sick enough to stop working. The people may unwittingly infect the milk by coughing, sneezing, by their soiled hands when milking or washing vessels, or indirectly in many other ways. It is true that if the milk is kept cold these disease-producing bacteria will not multiply, but they may remain alive and fully virulent for a long time and the original number be sufficient to cause infection.

Disease Transmitted by Milk.

Until methods of milk production are much more perfect than they are at present the only way of maintaining a safe milk supply would appear to be by pasteurization, in which the rapid cooling and keeping cool is given as much attention as the maintenance of the correct temperature for the proper length of time.—Ronald Gwatkin, D.V.S.C., Ontario Veterinary College, Guelph.

mycosis and others. Pasteurization destroys the organisms that are the cause of all the foregoing diseases. In regard to bovine tuberculosis it is known that though adults may be relatively immune to infection from a bovine source, children are quite susceptible, and a considerable percentage of cases of tuberculosis in young children can be shown to be of bovine origin. There are certain biological differences in the bacilli from humans and cattle which make it possible to differentiate these infections. A cow may be dangerous even though the udder is not infected, as the germs are passed out with the excreta before any clinical evidence of tuberculosis is present, and owing to the position of the udder it is almost impossible to keep them out of the pail as they fall in with the tiny particles of manure that are on the cow's body and that silt down in the form of dust. Apart from the recognized disease producing bacteria, it is known that large numbers of ordinarily harmless ones in milk may cause a serious and frequently fatal diarrhea in children during the summer months.

Points Charged Against Pasteurization.

Some of the arguments put forward against pasteurization are: That the cream is reduced; that the milk is rendered indigestible; that the milk will not sour, thus doing away with nature's danger signal; and that the vitamins are destroyed. The last is the only argument that now carries any weight. The cream is not reduced in quantity, but by heating the fat globules are broken up smaller and do not rise to the top so easily, thus causing the cream line to appear less. As a matter of fact at 142 degs. F., there is very little reduction even in the appearance. With proper pasteurization the chemical and physical constitution of the milk is not appreciably changed, at least not to an extent that renders it less valuable as a food. The lactic acid bacteria that cause souring of milk are not all destroyed by the heating, and consequently properly pasteurized milk may sour like raw milk, thus indicating its age and condition. Recent work on vitamins shows that the anti-rachitic and anti-neuritic factors are not removed by pasteurization, but that the anti-scorbutic vitamins probably is. It should be replaced by giving daily a teaspoonful of orange or lemon juice diluted with water and sweetened.

“Safety First” Good Practice.

“Safety First” Good Practice.

“FEELING” FOR LAYERS

This Method is About as Certain as the Trap Nest.

Experiments With Capons—Feeding Costs—Excellent Flesh Produced—Without Confinement—Handling Baby Chicks.

(Contributed by Ontario Department of Agriculture, Toronto.)

The writer carried on a series of experiments with poultry when connected with the Agricultural Experiment Station for Vancouver Island, Sidney, B.C., and presents the following notes as among those worthy of consideration:

DETERMINATION OF EGG-LAYING

A test was made of the feeling method, to determine its accuracy. Thirty hens that were under trapnest record were subjected to the feeling process for eight days: January 17 to 24.

The results of “feeling” were checked up and tallied perfectly with the “trapnesting,” indicating that it is quite possible for any careful person to determine which hens are laying by feeling the bird for the presence of the egg in the oviduct, in the early morning before she leaves the perch. The method also has an advantage in that it eliminates the necessary confinement of the birds in a “trapnest” for a period which is frequently longer than is actually required to produce an egg.

The great disadvantage of the feeling method is that it is impracticable for pedigree breeding, inasmuch that the eggs from individual birds cannot be recorded.

CAPONS.

Thirty cockerels were operated on when twelve weeks old. These birds were a thrifty and well-grown lot, averaging 2½ pounds in weight. After caponizing, they were kept under the same conditions as the cockerels. The feed cost for a pound increase in weight was slightly less for the cockerels up to six months of age. At this time the cockerels and capons weighed the same. These birds were killed for Christmas trade when 264 days old, and weighed, plucked, 3 pounds 2 ounces. The percentage of offal was low, being but 18 per cent.

The most profitable use is made of beet tops when they are sliced and fed with alfalfa hay or other forage and possibly supplemented with grain or concentrate feeds.

The chief value of cowpea hay lies in its high percentage of digestible protein. This has been verified by numerous feeding tests.

The Standard of Comparison

As Good As It Looks

Master-Four Model 23-34 Special Roadster

To see this beautifully proportioned, two passenger, four-cylinder roadster is to want to get behind the wheel.

The speed and power suggested by its graceful lines and low hung body are fully realized on the open road. Its ease of handling and instant response to the throttle insure unusually satisfactory driving in traffic.

TRANSMISSION LOCK

On the lower end of the gear shifting lever is a reliable theft lock—standard on all 1933 McLaughlin-Buick models. This is one of the features which has lowered insurance rates for owners. Other standard equipment features are: bumper, scuff plates, full crown fenders, drum type head, lamps, etc.
