THE BY-LAW CARRIED

Voting on the by-law to authorize the raising by debentures of a further sum of \$5,000 for the completion of the town hall took place on Monday, and the by-law was carried by a majority of 65. Only 8 opposed it in P.S.D. No. 1 and 9 in No. 2. The total vote was small, but this is attributable largely to the fact that the result was accepted as a foregone

This positive, clear cut demonstra-tion of the will of the people in this matter should be frankly accepted by all parties, and all should join heartily in giving their moral and financial support to an undertaking in which all are alike interested.

Athens is going to have a public building worthy of the progressive spirit of the village, and a few dollars more than the first estimate will not provide the progressive spirit on the product of the p put any citizen on short allowance.

The council has proved to be a ousiness council, and now with clear sailing and an uninterrupted line of communication with the base of supplies, we may expect the building to be completed in the shortest possible

St. Catharines Well

In St. Catharines, the Garden City of Canada, eleven miles from Niagara Falls, on the main line of the Grand Trunk Railway, is situated the histor ic St. Catharines Well, about which is woven many a romantic Indian legend, whose curative properties known far and wide throughout North America. The water of this famous Saline Well is considerably denser than sea water, but clear, and spark ling and odorless, and is remarkable

for its penetrative qualities.

These waters are a great specific for liseases as rheumatism, gout, scrofula, neuralgia, liver troubles, skin disease and cases of nervous prostration, or as a tonic pure and simple. The treat-ment is conducted on the broadest possible lines, the idea being to assist nature as much as possible. The use of these waters is the chief remedial agent, accompanied by static electricity, massage, exercise and rest. All treatment is in charge of house physicians. The baths are in a separate building, connected with main build-

Webster, Derbyshire and Bissell.

VILLAGE COUNCIL

The municipal council of Athens met in special session on Friday evening to consider a petition from the
required number of the occupiers of
dry goods, boots and shoes, tinsmiths,
and barber shops, praying the council
to pass a by-law to close all shops
named from the hours of seven o'clock p.m. until five o'clock a m. on the following day of every Monday, Wednesday and Friday; and from nine p.m. until five a.m. on every Tuesday and Thursday during the year, excepting during the month of December and evenings preceding a public holiday. A by-law in accordance with the petition was read three times and passed, a clause being inserted repealing by law No. 105 and such portions of by law No. 66 and amending by laws Nos. 69 and 74 as are inconsistent with this by-law.

The by-law to come into force on the

26th Sept., 1904. On motion, the clerk was instructed to notify all parties affected by this by law, in writing, of its having been

The council then adjourned to meet on Sept. 30th to dispose of debenture by law, strike the rate of taxation for 1904, and appoint a collector of taxes

Praise for the Karn Piano

Extracts from the Mail and Empire, Sept. 1st and 3rd

"There is always a crowd around the fine exhibit of the D. W. Karn Piano creasing interest being taken in this handsome exhibit. This is an un-doubted sign of merit. The crowds are attracted and held there by the array of beautiful instruments on view. The mighty stream of visitors surging through the Manufacturers Building picks out from among the many the Karn display as being the premier exhibit on the grounds. Neatness and artistic beauty characterize this display, and one ceases to wonder at the great fame attained by this company in the nusical world, when one sees the beauty of their instruments and hears the bewitching music they are capable of producing. People go away and tell their friends, and of course the next day sees an additional number of ad-mirers. Everybody knows that no other make of piano or organ equals the article manufactured by the Karn

Co., and everybody tells everybody else. Thus the Company's fame ing by a glass covered corridor.

Full information, descriptive matter and all particulars may be had on application to J. Quinlan, D. P. A.,

Montreal. firm, is one of the modern men of suc cess. He oversees the entire business of the company. To his great business management is due the immense suc cess which the company has achieved. The company has a branch in London, England, and another in Hamburg, Germany, and in both these foreign fields a large trade has been built up. They manufacture the finest grade of pipe and reed organs made, as well as the best pianos, and their business has grown to such a wonderful extent durng the last few years that it is almost impossible to supply their wholesale trade. No visitor to the exhibition should miss seeing this splendid dis-play." Those who do not visit the Toronto Exhibition should see this Display of Karn Goods at the

agent at Brockville.

UNDERTAKING

Summary.—Lesson I.—Topic: Reho boam's answer to the ten tribes and their revolt. Place: The assembly was held at Shechem. After Solomon's death the people assembled at Shechem to choose a new king. Solomon's son, Rehoboam was heir to the throne; he was young and tender hearted, but vain and wicked; the people asked to be relieved of excessive taxation; Rehoboam counseled with the people as to what answer he should give; he forsook the counsel of the old men and listened to the counsel of the young men; he returned a stern reply and said he would be more severe than even his father Solomon had been; ten of the twelve tribes mon had been; ten of the twelve tribes then revoltd and chose Jeroboam as king.

Topic : Jeroboam's effort to establish himself in his kingdom. Place: The northern part of Palestine. As soon as Jeroboam was declared king of the ten tribes, he took measures to establish himself in his kingdom; there were bright prospects before him; he enlarged and fortified several cities; he then took steps to keep his people from going to Jerusalem to worship fearing that if they did their hearts would become at tached to Rehoboam and that they then would kill him; he made two calves of gold and set one up in Bethel, and the other in Dan, urging the people to wor-ship in these cities instead of going to Jerusalem. This became a sin for the

people soon fell into idolatry. III. Tonic: Judah's prosperity and victory. Place: Judah, Asa's kingdom. After the death of Rehoboam, Abijah, his son, reigned in his stead; his reign was short, and at his death, Asa, his son reigned in Judah forty-one years; Asa was u good king and did what was right in the sight of the Lord: he removed the altars of the strange gods which had been set up in the kingdom and broke down the images which had been erectdown the images which had been erected to idols; he commanded his people to seek the Lord and to obey his law; he fortified the cities in Judah; the land had rest from war for many years; Asa raised an army to meet the Ethiopians, who came against him; the battle was set in array; Asa cried unto the Lord; the Lord caused the Ethiopians to flee.

IV. Topic: Jehosaphat establishing a judiciary. Place: Jehosaphat reigned over Judah. At the death of Asa, Jehosaphat extended the stable of the

a junciary. Place: Jehosaphat reigned over Judah. At the death of Asa, Jehosaphat, his son, reigned in his stead for twenty-five yeafs. Jehosaphat was a good king and trusted God; he thoroughly cleansed the land from idolatry, but he committed a great error in joining himself to Ahab; he went with Ahab to field against Ben-hadad king of Sy. to fight against Ben-hadad, king of Syria; the prophet of the Lord warned him o, but he did, and Ahab was ten Jehu, the prophet, reproved Jehosaphat for helping the ungodly and for loving those who hated the Lord; after this Jehosaphat appointed judges in the land and did what he could to reorm the people and atone for the course

he had pursued.

V. Topie: The idolatry of Israel's kings. Place: Omri and Ahab reigned over the ten tribes. Omri and Ahab were both very wicked kings; they led the people into the worship of idols and tully established Baal worship in the land; the prophets of God were slain and his worship forhidden. Oncy founded the his worship forbidden; Omri founded the city of Samaria and made it his capital; at his death Ahab, his son, reigned in his stead; Ahab was worse than any of the kings that had preceded, for he married Jezelei, a heathen woman; he built a house in honor of Baal in Samaria and

VI. Tepie: Elijah's obedience and faith. Place: Samaria, Brook Cherith, and Zarephath. Elijah the prophet ap-peared to Ahab and told him that there faith. Place: would be a great drought and famine in the tand which would continue three years; the Lord sent Elijah to the brook would be a great drought and famine in A peeriess procession of such characters the land which would continue three years; the Lord sent Elijah to the brook dried up; Elijah was sent to Zarethath; the rayens was sent to Zarethath; and the such as a God's advance grammanded the such as a God's advance to the landers of reform and here. brook dried up; Elijah was sent to Zare-phath; a widow woman was commanded to feed Elijah; he asked her for a little water; told her to bring him a morsel of bread; she said she had but little; Enjah encouraged her and asked her to bring him a cake first; he said they

nd an be supplied.

11. Topic: Elijah meets Obadiah and lace: Somewhere in Ahab's The famine had lasted three kingdom. years and six months; the supplies were exhausted; the Lord told Elijah to show himself to Ahab; Obediah and Ahab were seeking grass; suddenly Elijah ap-Anab that Elijah was there; Obadiah feared and said that, if he should tell Ahab that Elijah was here, and then the prophet did not appear to Ahab, he would be slain; Elijah said that he would cer-tamly appear to Ahab; Elijah asked gather all Israel and the pro

phets of Baal upon Mount Carmel. VIII. Topic: Elijah convincing Israel that Jehova is the true god. Place: Mt. Carmel and Jezreel. A test was proposed by Enjah in order to prove that he was the true God; Baal's prophets he was the true God; Baal's prophets prepared their sacrifice and called upon their god to send fire; no answer; Elijah ared his offering; dug a trench; covupon God and fire fell from heaven; the sacrifice and the wood and the stone were consumed, and the water in the trench was lieker lap; the people said, 'Jehovah is God.' The 450 prophets

of Baal were slain. of Bant were, sain.

IX. Topic: Elijah's flight. Places: Jez-reel, Ecer-sheba and Horeb. Ahab told tezebel all Elijah had done; Jezebel seat a messenger warning Flijah that he-would be killed; Elijah fled for his life; dismissed his servant; went a day's journey into the wilderness; sent angels to

in a cave. God asked Elijah why he was there; Lijah to d the Lord how zealous he had been, and how they had sought his life; God caused a great wind to rend the mountain and break the rocks, and after the wind an earthquake, and after the earthquake a fire, but the Lord was not revealing Himself in these; following these manifestations, the Lord spoke

INTERNATIONAL LESSON NO. XIII.

SEPTEMBER 25, 1904

Review.—Read Psalm 103: 1-12.

Summary.—Lesson I.—Topic: Reho
Summary.—Lesson I.—Topic: Reho
Be upon me." Elijah went up by a whirlwind into heaven.

XII. Tepic: Israel reproved and exhorted to seek God. Places: Amos was a native of Tekoa, bit prophesied at Bethel. Jeroaboam II. was king of Israel; the kingdom was prosperous and rich: the people were very wicked and were worshipping idols; because of their sins Amos tells them that they would be carried into carried into carried into a carried into heaven.

XII. Tepic: Israel reproved and exhorted to seek God. Places: Amos was a native of Tekoa, bit prophesied at Bethel. Jeroaboam II. was king of Israel; the kingdom was prosperous and were worshipping idols; because of their sins Amos tells them that they would be carried into a carried i

be carried into captivity. PRACTICAL SURVEY.

A disastrous division. For nearly thir which exceeded all the far and fabulous accounts and before which the splendor of Sheba faded into astonished insignificance. Divided and contending, their strength wasted and glory declined until the once proud and powerful people became an easy prey to their enemies, They were literally "consumed one of another" other."

Lessons two, five and twelve are con nected with the story of Israel, the se-eding kingdom. They should be reviewed in connection. In them we have national in connection. In them we have national evil introduced, increased, rebuked. Jeroboam, forgetful of the power which had lifted him from the estate of a fugitive to sovereignty, violated the first fundamental command and as a political strategem introduced idolatry, thereby accomplishing the extermination of his own household, and started his people at the very threshold of their history on the steep decline toward national degradation and ruin. The history of the past teaches that any nation departing from true worship and obedience to divine commands, invites disorder and desvine commands, invites disorder and des vine commands, invites disorder and des truction. France abandoned God, defied reason and beauty and wept repentant tears of blood in the bitter strive of the rears of blood in the bitter strice of the revolution. America temporized with human slavery and five sanguinary years wrought out the purification and punishment. She bows to day before the legalized liquor traffic and is reaping the sad harvest of corruption and crime, and increasing confusion sweeps from ocean to ocean, while darker clouds hang on the horizon.

Lessons three and four represent Lessons three and four represent a brief but consecutive period in the eventful history of the original and preserved kingdom of Judah. The subject considered seems to be rulers and reforms. Solomon declared that "when the righteous are in authority the people rejoice; but when the wicked bear rule the people mourn." Asa and Jehoshaphat were both mourn." As and Jehoshaphat were both reformers, though diverse spheres enlisted and czeupied their activities. Rehoboam. like his rival sovereign, early forgot his obligation to the Supreme Authority. on which depends the stability of all thrones. Chastisement followed, but utter destruction was averted by a timely humiliation and "come deliverence" was humiliation and "some deliverence" was granted though the independence of the kingdom was temporarily lost. When his grandson Asa ascended the throne a reign of righteousness was instituted. His first care was the removal of the oc-casions and evidences of idolatry. Im-ages were broken, their altars were destroyed, the groves cut down and the peo-ple commanded to "seek the Lord God of their fathers, and to do the law and the

horizon.

ommandments.' In lessons six to ten we turn from truths of public to those of personal import, disclosed in a life closely interwoven with civil affairs. The character woven with civil affairs. The character of Israel's prophet, austere, unbending, and unblemished, and hiding a great wealth fo tender sympathy, towers in majestic solitude above the corruptions of the times like the glittering snowerowned summit of some lofty mountain above the mists of the shadowed set up images to the heathen god; the judgments of the Lord fell upon Ahab, and he was slain in battle.

walleys below. God always has such who stand as human landmarks in eras of general decline in church or state. Their stern rebukes are the clarion call of dutywith a ringing echo of doom if dis-regarded. Fearless and faithful such men ecome the storm centres of progress A peerless procession of such character

A. R. FAWCETT RETURNS.

Denies Entirely the Story of an Elopement.

Berlin, Sept. 19.-The learned horse roprietor of The Leader and Recorder, whose sudden departure caused a sensa tion in Toronto Junction last week, returned to the town last night. To a reporter, speaking over the telephone, Mr. Fawcett said that his reason for going away were private, but that the sen-sational stories started as to his mo-tives had caused him to return to refute There was no truth, whatever in the idea that an elopement had any thing to do with his departure. He wish

ed to give such a story an unqualified denial, as it did a gross injustice.

Mr. Fawcett said he had intended giving up his business, but he now realized that it was in such a condition that he felt confident he could carry it on suc-cessfully, and that his own personal at-tention was required to effect such a result. He would watch with interest to-morrow's meeting of creditors called

A MATRIMONIAL AGENCY.

London Concern Offered to Supply Wives to Colonials.

London, Sept. 1 .- London Truth has been making investigations respecting an advertisement addressed to bachelors, which appeared in certain colonial papers. Truth says the advertisers called themselves Lloyd and Duncan, Anglo-American agents, 91 St. Mary's road, Leyton. On inquiry at the ad care for him.

X. Topic: God's manner of dealing with I liah. Place: Roreb, the mount of God. Whilah was at Horeb or Sinai, hid in a cave. God asked Elijah why he was in the colonies with suitable partners.

terprise has been that a number of dollars have been transferred from the other side of the Atlantic to this, and that the not revealing Himself in these; following these manifestations, the Lord spoke in a still, small voice.

XI. Topic: The parting of Elijah and Elisha. Places: Gilgal. Bethel, Jericho, and the place where Elijah was translated: Flijah made a farewell visit to the schools of the mymbers; Elijah asked where Elijah was translated. Truth wonders that the possibility of the colonial papers which published the advertisement. Truth has received several manifestations. **Fully Appreciated**

Car Construction Company to be Formed in Canada.

The New York Herald of Sept. 19 says: It is definitely stated that the Pressed Steel Car Company has entered into an arrangement with the Grand Trunk Railway and the new Grand Trunk Pacific whereby a car construction company will be formed in Canada and the patents owned by the Pressed Steel Car Company will be used in the Canadian company. President F. N. Hoffstot has returned from a trip to the Canadian Northwest, to which a number of English and Camadian capitalists ber of English and Canadian capitalists had gone to investigate the territory through which the new transcontinental raifroad would pass.

It is understood that the stock of the

Canadian company will become an asset of the Pressed Steel Car Company. It will be recalled that the American Locomotive Company interests recently acquired a plant in Montreal in which lowill be construted for Canadian railways.

Miss Nettie Blackmore, Minneapolis, tells how any young woman may be permanently cured of monthly pains by taking Lydia E. Pinkham's Vegetable Compound.

"Young Women:—I had frequent headaches of a severe nature, dark spots before my eyes, and at my menstrual periods I suffered untold agony. A member of the lodge advised me to try Lydia E. Pinkham's Vegetable Compound, but I only scorned good advice and felt that my case was hopeless, but she kept at me until I bought a bottle and started taking it. I soon had the best reason in the world to change my opinion of the world to change my opinion of the medicine, as each day my health im-proved, and finally I was entirely without pain at my menstruation periods. I am most grateful."—NETTIE BLACK-MORE, 28 Central Ave., Minneapolis, Minn. - \$5000 forfeit if original of above letter proving genuineness cannot be produced.

If there is anything about your ase about which you would like special advice, write freely to Mrs. Pinkham. She will hold your letter in strict confidence. She can surely help you, for no person in America can speak from a wider experience in treat-ing female ills. She has helped hundreds of thousands of women back to health. Her address is Lynn, Mass.; her advice is free.

EARTHOUAKE AT OTTAWA. Objects in Houses Shaken and People Alarmed.

Ottawa, Sept. 19 .- At fifty-two minites forty-five seconds past eight to-night an earthquake was felt in this ity. It lasted about eleven seconds. Two distinct shocks were felt, the first being the more severe, Objects in nouses were shaken and even displaced. On Sandy Hill people were so much alarmed that they ran out of their residences. The vibrations were in a southwesterly direction. No rumbling noise was heard. Dr. Ami. of the interviewed Geological Survey, who was interviewed, expressed the opinion that the shock

G. T. R. ENTERPRISE. was probbly due to the adjustment and settlement of the large blocks of in Canada. was probbly due to the adjustment and settlement of the large blocks of the carthy's crust in this faulted region of eastern. Ontario. These occurrences are not infrequent in this part of Canada, especially along the north shore of the Ottawa. About fifty miles from this city there is a hill, to which the name "Trembling Moun-tain" has been given by reason of the

very frequent earthquakes which take place in that neighborhood.

Eyes and Nose ran Water .-C. G. Archer, of Brewer, Maine, says: "I have had catarrh for several years. Water would run from my eyes and nose for days at a time. About four months ago I was induced to try Dr. Agnew's Catarrhal Powder, and since using the wonderful remedy, I have not had an attack. It relieves in ten minutes." 50 cents.—17.

THE LEARNED HORSE.

It Passes Successfully an Examination by Scientists.

Toronto, Sept. 19.—Mr. A.R. Fawcett, Hans, has just stood a successful examination before a scientific commission, including physiologists, psychologists, pedagogues, naturalists, aninmal trainers and others. Their report sets forth that the evidence he gave of comprehending handwriting, his musical and color discrimination and mathematical work were crimination and mathematical work were performed under circumstances exclud ing the possibility of a trick. The methods of the horse's owner, Herr von Osetn, are pronounced to be those of a pedagogue rather than of an animal trainer. The case appears to them to be wholly exceptional, and to deserve thor-ough scientific study.

CROPS ALL RIGHT.

Fully 85 Per Cent of the Northwest Wheat Cut.

Winnipeg, Sept. 19.—Mr. Black, west-ern manager of the Ogilvie Flour Mills Co., speaking in reference to reports cir-culated on the Chicago Board of Trade yesterday of great damage by frost to the wheat crop in Manitoba, said that such reports were untrue, and were cir-culated no doubt by interested parties. The facts were that fully eighty-five per cent. of the wheat was cut at the end of last week and more or less threshing is already done. Returns from the ma-chines quite confirm the previous esti-mate made by the company of fifty-eight million bushels and inspection returns reveal a very fair quality indeed.

REDUCED TO THE RANKS.

Detective Cote, of Montreal, Punished for Being Indiscreat.

Montreal, Sept. 19.—Detective core of the oldest members of the city force, was reduced to the rank of a constable by the Police committee this afternoon, following an investigation into his connection with the case of Mamie Lalond, the young girl from Prescott who committed suicide by taking Paris green at a down-town hotel here two weeks ago. Cote, having recovered a quantity of stolen goods and money in the girl's possession, bought supper for her and then accompanied her to the hotel. He afterwards went with her to a drug store, where she bought a poison, but not the drug that ended her life the following morning.

Cote explained at the investigation that he had merely befriended the girl, and no evidence was produced to show that his conduct had been anything more than indiscrect.

Montreal, Sept. 19.—Detective Cote, one of the city sat \$1.50 per c.wt., fed and watered. To make at \$1.50 per c.wt., fed a

Heart relief in half an hour. A lady in New York State, writing of her cure by Dr. Agnew's Cure for the Heart, says: "I feel like one brought back from the dead, so great was my suffering from heart trouble and so almost miraculous my recovery through the agency of this powerful treatment. I owe my life to it "-13.

Too Much for Good Nature.

First domestic—Theorem you liked your place; why did you leave it? Second domestic—I liked it all right, but they had the gall to appoint the funeral of one of the daughters on my day off.

vantage of the water freights. reports from the Northwest are no more encouraging, and prospects for business generally are considered bright.

At Toronto the activity which has characterized trade during the Exhibition has been well maintained. Travellers are out on their routes now and are sending in numerous well distributed orders. This week the Canadian cotton mills issued their price list for the ensuing season for cottons and colored goods, showing reductions from that of last year of about

ten per cent, all round.

Wholesale circleseat Quebec during the past week shows past week shows no immediate im-provement over that of the past. On the whole the outlook is favorable, and storekeepers are preparing for an active win ter business

ter business.

In Vancouver, Victoria, etc., business at the Pacific Coast generally is well up to expectations for this time of the year. The demand for winter supplies from the inland mining centres is quite an important factor in the jobbing trade at present Payments are reported as being

sent. Payments are reported as being fairly satisfactory.

At Winnipeg there is a more cheerful feeling in business circles now that considerably over seventy-five per cent. of the wheat crop has been cut. High the wheat crop has been cut. High prices, of course, are expected for the season's crop, and altogether the financial results of the season's operations in the wheat belt, no matter what may happen from now on, will be much better then last year's. than last year's.

At Hamilton this week, according to

At Hamilton this week, according to Bradstreet's reports, there has been a good active demand for good seasonable goods. Orders coming forward are on a liberal scale, and in many cases are calling for a higher class of goods than in previous seasons. Stocks in wholesale trade circles are very complete and attacking which prospects are for

trade circles are very complete and attractive now, and the prospects are for a large season's turnover.

In London wholesale circles this week there has been a better inquiry for most all lines of fall goods. The farmers are still busy with harvest operations, but will soon be making larger deliveries of produce at country trade centres, and that will stimulate business generally.

SEVEN SERIOUSLY HURT.

Boiler at the Toronto Bolt Works' Mills Exploded.

Toronto, Sept. 19 .- A sudden and fear-Toronto, Sept. 19.—A sauden and lear-ful explosion, followed by a storm of bricks and iron faggots, raining down through clouds of released steam, caught the employees in the rooling mill of the Toronto Bolt and Forging Com-pany yesterday afternoon. Five of the of the Toronto Bolt and Forging Company yesterday afternoon. Five of the fifty employees were afterwards carried into the open air all with severe injuries, but almost all with stories to tell of miraculous escapes from death. The men injured were William Dixon, water tender. Laws Watson chief on water tender; James Watson, chief en-gineer; Frederick Jones, first engineer; James Hall, second engineer; Albert E.

Dunsford, ironworker; George Woods, mill hand; Charles Jolly, superintendent. Dixon was reported from the Western Hospital to be in a dying condition. James Watson and Frederick Jones, are James Watson and Frederick Jones, are also suffering from dangerous injuries. Between 1 and 2 o'clock yesterday, when all of the employees were toiling over the glowing furnaces, an auxiliary boiler which was being used to reinforce the regular plant in rolling steel, suddenly exploded. The impact came from below, and with a tremendous rear the below, and with a tren ow corrugated iron roof of the building was split in twain, and the great iron smokestack, which had reached sixty-five feet in the air, came tumbling down into the chasm the force of the explosion had made This first blast liter lly blew the half dozen men then near the boiler away from the death that would have come from the falling smoke

The superintendent, Charles Jolly, was hurled through one of the openings in the side of the building and dropped coparatively uninjured on a pile of slag, nearly sixty feet away. Three engineers, who were in front of the ill-fated boiler, were in front of the ill-fated boiler, were picked up apparently together and anded in a heap about the same distance in the opposite direction, bruis-ed and scalded, and two of them unconscious. The others were thrown to different parts of the building and fell among the piles of wrecked masonry and machinery.

TIRED OF PRISON.

Will Be Released Because She is Guiltless of Any Crime.

Lockport, Sept. 19.—Mrs. Nettie Brown, of Niagara Falls, who asked Judge Hickey to send her to Auburn Prison in order that she might be with her husband, has grown tired of prison life. Brown and his wife were arrested and tried on a charge of appropriating property in a house in which they boarded and removing it for their own use. Brown was convicted, but the trial developed that his wife was guiltless of the crime.

She informed the court with tears, in

her eyes that she preferred life in prison to separation from her husband. Judge Hickey finally granted her request and committed her to Auburn and she accommented her busband. Yesterday District Attorney Stockwell received a blank form from the State Pardoning Board asking him for any reason he might have for objecting to releasing Mrs. Brown on parole. The District Attorney had none, and the woman will be released. released.

The Unknown Bridegroom.

"You were faint," her companing responded. "I caught you as you swayed in your seat, and as we were near the door, it was the work of a moment to get you out here. I really believe no one else observed your indisposition, for you walked mechanically until we were outside the saloon, when you lost yourself just for a minute or two," Mr. Carrol explained, while in his heart he was living over again that bissiul moment—blissful in spite of his anxioty—during which he had held the silght form passive in his embrace, and a deathly pallor to the steamer to hasslight form passive in his embrace while her beautiful face had reste

while her beautiful face had rested upon his breast.

"I am glad and you were very thought'ul," Florence murmured, and now quletly withdrawing herself from his encircling arm. "I should have been so sorry to have made a scene, and I am not liable to such attacks. I denot repropher. attacks; I do not remember ever fausting before, save once." She shivered as she recalled that experience in Rosedale chapel, and which had been so strangely and faithfully

reproduced to-night.
"What could it mean?" she asked
nerself; "was it merely a singular
coincidence, or could it be possible
that."

that—"
The alternative which suggested The alternative which suggester itself to her cauch her to shiver again from an ley chill.

"You are cold," said Mr. Carrol, with gentle solicitude; "let me get

you a wrap."

He drew her hand more closely within his arm, thrilled by her dependence upon him, and conducted her to her chair, where lay the roft, warm shawl which he knew so well. He folded it about her shoulders and pinned it with the strong classp-pin which he found fastened upon

it, as deftly as a woman would have ily; "how very handy you are! I am sure you must have a mother and sisters for whom you have done the same thing."

"Miss Richardson, I have no one I am utterly alone in the world," he replied in a tone of repressed feeling that was more pathetic than any outward manifestation of grief would have been.

They made their way to the stair-way, when, with a respectful "de-

way, when, with a respectful "allow me," Mr. Carrol again passed his arm about her and supported her so firmly, yet so easily, that she soon found hers if at the top almost without an effort on her

Then the young man once more Then the young man once more drew her hand through his arm, and they began to slowly pace the deck.

Held her to talk of various things, to draw her mind away from herself, until she forgot all about her recent indiposition, and was so n conversing with almost her accustomed animation.

'Is your home in England, Mr. Car-rol?" she ask do "from the carshe a k d, after an alusion to

No, Miss Richardson; I am one of those unfortunate individuals who have no home."

"Ah," she cri.d. with a righ, "pray pardon me. I seem strangely inclined to touch upon painful topics to-night."

to-night."
"It was a very natural question," he kid y re pinded, "so pray do not reproach yourself. I am really a native of the United States, although it has not been my home for many years. Business of importance, however, recently recalled me there, and now I am on my way to England to win lup some other affairs. When those are settled I settled hardly know where I shall locate— that will depend somewhat upon Dame Fortune's smiles or frowns. My mother was an English woman, and I suppose I have relatives resiling not far from London, and it is my jurpose to look them up before push out into the business world again-just to keep me from feeling quite alone"

His tone, rather than his words, saddened Florence, and she felt sure that he must have met with some sad reverses and disappointments in life. Pethap, the thought, that was the reason he appeared so grave and dignified and older than his

of whom you speak will have smites rather than frowns for you, Mr. Carrol, although what you have said has led me to infer that you may have been the special football of an untoward fate," said the gentle girl in a hopeful tone.

"Thank you, Miss Eichardson, for

your good wishes, and I shall do my utmost to bring them to pass." When Florence awoke the next morning the steamer was at rest—

When Florence awoke the next morning the steamer was at restated mighty pulse had ceased to beat and she knew that she must have arrived in port, while the hurrying of many feet overhead and the sounds of confusion that came to her cars, told her that her fellow-voyagers were preparing to go their several ways. After breakfast they all repaired

Florence was standing with her back to the windlass; Mr. Carrol was

her left, and Mr. Merrill on her right—the latter doing his best to monopolize her attention, while the former remained almost silent, alhis grave eyes were fastened Loth Mr. and Mrs. Seaver observed

arriors expression, and commented upon it in confidential asides. Sudan exclamation of alarm escaped the lips of Mr. Seaver.
What appeared likely to prove a most disastrous accident had oc-

an instant, and a deathly pallor overspread his face, for Florence was directly under the falling case, which must have killed her instantly had

it fallen upon her.

Quick as a flash he encircled her slight form with his fight arm and slight form with his fight arm and swang her out of harm's way just in season to save her unscathed, but not in time to save himself from an ugly knock upon his left shoulder and arm from the iron-bound corner of the clumsy box, which fell to the deck with a deafening crash. "Thank Heaven you are safe!" 'the

young man whispered in Florence's ear, as he released her when sne had regained her feet—for he had swept bor entirely off them; "I feared I

for extirely off them; "I feared I could not do it."

"Mr. Carrol, you are hurt," she cried, appalled by the pallor of his face, and then her glance fell upon his left arm, which hung limp and helpless by his side. "Oh, the dreadful thing sit you as it fell!"

"Yes, I did got grazed just a little," he admitted, trying to smile, "but do not be troubled, it will not amount to anything; if you have

amount to anything; if you have recovered from your shock, I will ask you to excuse — me — while I—" He broke off suddenly, and sway-

But Mr. Seaver was already at her side, Laving bounded forward the moment he had turned his wife so that she should not see their dear one killed, as he surely thought she must be; and he now laid a strong, sustaining hand upon the young man.

"Carrol, you are hurt!" he faltered in shaking tones. "God bless you for saving our dear gir!! But I declare I can't bear to have you maimed. Come, I'm going to take you directly down to the ship's surgeon and have you attended to."

It was late in the afternoon when

ecty Gown to the eap's surgeon and have you attended to."

He led him away, supporting him as tenderly as if he had been his own son, while Florence, the moment she felt Mrs. Seaver's trembling arms encircling her, dropped her head upon her shbulder and burst into tears.

CHAPTER IX. Mr. Carrol's injury proved to be quite a serious one, in spite of the light manner in which he had spoken of it to Florence; one of the bones of the forcarm — the radius — having been broken, while he had received a very bad bruise on the shoulder.

He was very brave, however, during the setting of the bone, claim.

you have done, my dear fellow," said Mr. Seaver, earnestly, as while the surgeon was bandaging the arm, the young man gave him a brief account of the accident and passed very lightly over his part in it. "I saw on saved the life of my ward, ms. Richardson."

What has happened?" he inquired of a bystander.

"There be a poor little devil inside there, sir, who dropped dead out here a minute ago," the man gravely replied.

Mr. Carrol forced his way into

Richardson."

"Now, toetor," he added the next moment, "I hope he isn't going to be laid up with this hurt."

"I hope hot, truly," the surgeon replied; "the bone will not give him replied; "the bone will not give him. replied; "the bone will not give him eery much trouble—it will probably be all right in the course of three weeks. He fray have some twinges about the shoulder from the bruise, but he will come out all right in time."

"I'm glad to hear that," said the lawyer, but still regarding the young man regretfully. "I hope," he con-tinued, addressing him. "if there is anything I can do for you, you will

"Thank you, sir, but I am sure I shall get along nicely. I am not going to have very much to do during the next few weeks, but wait about London until some papers are ready for me to sign, and it is very fortun-ate for me and others that my right arm was not injured," the young man cheerfully responded. Then,

for him.

Here they found Florence and Mrs.

Marrill and one or

After breakiast they all regained to the deck and stationed themselves near a windlass to watch its operations as it raised the baggage from the hold.

Here they found Florence and Mrs. Souver with Mr. Merrill and one or selves near a windlass to watch its operations as it raised the baggage from the hold.

The moment Florence caught sight of her guardian and Mr. Carrol, she sprang forward to meet them.
'Oh! it was broken!" she sorrow-

"Oh! it was broken!" she sorrowfully exclaimed, and with starting
tears, as she caught sight of his
bandaged arm in its sling.
"Pray, do not be disturbed, Miss
Richardson—it is not a bad break,
and will soon be all right ngain,"
the young man smilingly replied.
Then he continued, glancing at his
watch: "I shall be obliged to take
leave of you immediately if I am
to catch the ten-thirty train for
London Good-by, Mr. Seaver, it has
given me great pleasure to make to eatch the ten-thirty train for London Good-by, Mr. Saver, it has given me great pleasure to make your acquaintance, and I, shall look eagerly forward to our reunion, a

The lady warmly shook hands with him, at the same time expression her gratitude for his brave act of that morning.

she gave him her hand and looked gravely into his eyes; "it is a great debt to owe you, and I hope you will believe that I am proportion-ately grateful."

ately grateful."

"You are all determined to overestimate what I did upon the impulse of the moment," he smilingly returned, but giving the hard he held an involuntary pressure which instantly brought the color back to her hitherto pale cheeks.

"It was very fortunate for me that you had the impulse, and were brave enough to act upon it." Florence returned, and the words sent a hot flush of flame to Addison Merrili's face.

tend to having his baggage transferred to it.

He saw him safely off, showering cautions and good wishes upon him, together, with antiepations of meeting him again a month later, then returned to the steamer to hasten the departure of his own party.

In less than a half hour they were cleasantly thereby

pleasantly though temporarily located in a fine hotel, where they were to rest a few days before starting ont heir tour through Scotland. Mr. Merrill bade them a re-

luctant au revoir. Mr. Carrol caught his train for London, where he arrived some hours hausted by pain; for the twinges which the surgeon had prophesied Dad overtaken him with a venganes, He proceeded directly to a lodg-ing house, where he had stopped once before, and engaging his old room, went directly to bed, where he remained most of the time for the next three days; his arm and shoulder growing continually worse from the bruise he had received. The broken bone, however, was doing

nicely.

The chambermaid suggested that he should consult Dr. Field, a lady doctor and a Christian Scientist, who had rooms in the house.

Mr. Carrol was not disposed at first to act upon his suggestion, but he eventually made up his mind to see the mental healer.

He went to her room and found her a sweet-faced woman, with the most musical voice he had ever heard.

ed dizzily.
"Uncle—auntie, come!" cried Florence, wildly, fearing he would fall prone upon the deck.
But Mr. Seaver was already at her side having bounded forward the model. Laving bounded forward the model.

soundly and peacefully.

It was late in the afternoon when ever.

He could hardly credit his senses.

He could hardly creat his senses.
He felt as if suddenly released from
a bitter bondage—as if galling
chains had been mysteriously
stricken from him.
To be brief, three treatments from
Dr. Field utterly annihilated all dis-

comfort from that terrible bruise. He was directed to throw aside his bandages and splints at the end of a having been broken, while he had received a very bad bruse on the shoulder.

He was very brave, however, during that the break was a very little matter, although his wh to lips and the beads of perspration which stood on his face belied every word that he uttered.

"Pray do not underrate what you have done, my dear fellow," said

store on the corner of a street near his home. "What has happened?" he in-quired of a bystander.

Mr. Carrol forced his way into

ed to be about eight years of age. He was as colorless as a piece of marble except where the grime and filth of the streets lad left their

mark. He was ragged and povertymark. He was ragged and poverty-stricken beyond description, bare-headed and barefooted, and his feet and legs were badly scarred, as if from some accident—the blue veins showing Yividly beneath the tightly drawn skin upon his face and tem-ples, the cords standing out, with ghastly distinctness, on his thin neck, while the pinched and sunken look about his mouth was pitiable in the extreme.

"Is it possible that no one here knows who this child is?" Mr. Carrol inquired.

No," replied the physician who had chanced to be on hand, looking at him, but no one could tell him anything about him, "there has been a crowd in here."

"Then I would like to take charge "Then I would like to take charge of the poor little walf and see what I can do for him," Mr. Carrol observed. "I will take him to my lodgings and look after him until there is a change either for better or worse. Here is my address if there should be any inquiries," concluded Mr. Carrol, who had been writing while he talked.

writing while he talked.
Then he gathered the child into
his arms—he was very fragile and
light—and bore him quickly from light—and bore him quickly from the blace, a womanly tenderness shining in his face. He proceeded straight to his lodg-ings, and, entering, went to the groups of Dr. Nied

"I have brought you another patient," he remarked, as he entered and deposited his burden upon a couch. "Do you think you can do anything for him ?"

L3 SHET LIES

him—they were on the point of sending him to the morgue when I interfered and brought him to you."

Not a word was spoken after this for nearly half an mour, but alleyoung man, a was early watching his protege, observed that, after some if fleen or twenty minutes, the blue look about his mouth began to fade out and the inps grew less livid. Then the hollow cheet began to leave more naturally and regularly, until finally the almost transparent of beautiful wine-brown eyes, that had a look of pathetic yearning in their depths.

"Please go and get a glass of milk," said Dr. Field in a low tone, but without changing her position, and lier compan of awe stealing over him in view of the scene that he had just witnessed.

Five minutes later he was back again, bearing the required glass of milk and some delicate sices of bread and butter. Dr. Field smiled as she observed the latter.

"Your understanding is increasing," she quietly remarked.

Five minutes later the little gamin was asleep, and slept for almost an hour, and when he awoke he was allowed another glass of milk and a nor, and when he awoke he was allowed another glass of milk and a nor, and when he awoke he was allowed another glass of milk and a look of the scene hat he hid just witnessed.

After making him comfortable upon a couch and covering him lightly, he went out to a neighboring furnishing store, where he procured a full suit of inexpensive but neatly made clothes, with suitable undergarments, stockings, shoes, etc., and then returned, intending to see what soap, water and clean attire would do for his protege when he should be able to be dressed.

(To ne Cortinued.)

IN MODERN DAYS.

The Ways of Doing Things Have Greatly Changed.

No Branch of Science Has Made Great er Advancement Than That of Medicine—Thousands of Lives Prolonged by Modern

"Few things have develoued as rapidly "New things have develoued as rapidly during the past quarter of a century as the science of medicine," said a well-known practitioner recently. "And undoubtedly the most striking phase in its progress is its treatment of the blood. In the old days it was thought that opening a vein and letting the blood out opening a vein and letting the blood out has a cure for most diseases. The utter fallacy of that theory was discovered after a while. Then the symptoms of the disease were treated and the blood disregarded. That also has been shown to be a wrong practice, for, though driven away for a time, the symptoms along ways return if the cause is not removed; and the disease is worse than before. It is the root of the disease that must be that attacked, and the most important develis the root of the disease that must be attacked, and the most important development of modern medical science has been in discovering that, in most disease, this lies in the condition of the blood. If the blood is thin and poor, the nerves and vital organs cannot receive their proper nourishment, the system becomes run down, and in a condition to invite disease. Build up the blood, restore the worn out nerves and you remove the cause. When the cause is gone, the disease will vanish.

An instance of the truth of this is

the disease will vanish.'

An instance of the truth of this is given by Miss A. M. Tuckey, Oxdrift, Ont., who says: "I do not know what would have become of me had it not been for Dr. Williams' Pink Pills. My blood seemed to have turned to water, and I was troubled with dizziness, headaches and general prostration. I tried several medicines hut instead of the several medicines hut instead of

Indigestion, neuralgia, heart trouble anaemia, kidney and liver complaints, rheumatism, the functional ailments of women, and a host of other troubles a thin all a disease of the blood, and that is unken why they are always cured by the use of tiable Dr. Williams' Pink Pills, which actually make new, rich, red blood, thus reaching the root of the disease and driving

THE WORLD'S EBB AND FLOW. An Austrian has invented self lighting

An Austrian has invented self lighting ing eigars and eigarettes. Tipped with a chemical mixture they ignite on being struck against anything.

Stunted dogs are very much admired by Parisian ladies. The demand for them is met by at least forty professional "dog dwarfers," who bring up the pups on an alcoholic diet, which has the effect of checking their growth.

A new line of steamers is projected for the trade with South Africa. Two steel ships of 5,500 tons each are being built

POULTRY FATTENING STATIONS:

WHAT THEY ARE DOING AND WHERE THEY ARE SITUATED.

down, and was soon in a deep slumber.

The young man lifted the boy gently in his arms, without waking him, and bore him away.

After making him comfortable upon a couch and covering him lightly, he went out to a neighboring furnishing store, where he procured a full story, where he procured a full story of inexpensive but neatly made ing, plucking and marketing. The work of each stations is confined to fattening enough chickens for illustration pur-pose. About 200 is the maximum num-ber kept at one time. The operator is not allowed to be a competing buyer with others who have begun to fatten chickens as a private enterprise. If the farmers are already getting a fair price for their poultry, the station will con-fine its efforts to illustration or experi-mental work with even less them 200

birds. Those who are carrying on the work for themselves will be considered not rivals but friends, and will be offered assistance where possible.

Special attention is being paid to choosing the right sort of bird for fattening; for instance, the blocky type of Plymouth Rock or Wyandotte is recommended as suitable for the purpose. The operators are required to spend as much of their time as may be required in assisting those who are engaged in or entering the business, by giving instruction in buying the proper type for fattening, in killing and plucking, packing, shipping, etc.

in killing and plucking, packing, shipping, etc.

Only birds of the proper type will be bought this year, and seven cents per pound will be paid for these at the stations. An extra good type might well be worth eight cents, while another type of the same breed would be too dear at five cents a pound.

Bach operator is considered responsible for the work and success of his own station. He is expected, as far as possible, to find a suitable market for the birds fattened at his station. The Department will, however, endeavor to provide a market for any surplus stock above local requirements. Each station will be conducted as much like a private enterprise as posible, the Department assisting the operator in marketing, etc., as it would a private firm initiating a new business. The demand for chickens fattened at the Government stations is very brisk this season, and from the offers already received it is expected that the ruling price will be from 11 to 13 cents per pound. Parties fattening chickens according to the methods recommended by the Poultry Division, who may wish assistance in marketing, can obtain, on an-

the Poultry Division, who may wish as-sistance in marketing, can obtain, on ap-plication to Mr. Elford, a list of dealers who will be glad to purchase their birds. Yours very truly, W. A. Clemons, Publication Clerk.

he heard a cry for help and hastily opening the cofin, found the occupant alive. If the ocean were dried up all the water passing away as vapor, the amount of salt remaining would be enough to cover 5,000,000 square miles with a layer one mile thick.

Germany is probably the most densely wooded country in Europe. Over one-quarter of the entire area of the empire quarter of the entire area of the empire is covered with forest.

Treasure hunting has become the principal occupation of the islanders of Martinique. They dig day and night among the ruins caused by the eruptions of Mont Pelce for gold and other valuables.

In Anglesey, Wales, there are thirty-five parisnes, containing nearly 7,000 inhabitants, and in Carnarvonshire 32 parishes, with a population of 3,500, without a single public house.

the root of the disease and driving it from the system. The great success of this medicine has induced some unscrupulous dealers to offer some pink colored imitations. You can protect yourself against these by seeing that the full name, "Dr. Williams' Pink Fills for Palc People," is printed on the wrapper around every box. Sold by all medicine dealers, or may be had direct from The Dr. Williams' Mediciae Co.. Brockville, Ont., at 50 cepts a box, or six boxes for \$2.50.

The three animals that are most wide by spread over the earth are the cow, the low spread over the earth are the cow spread into the spread over the earth are the cow spread into the spread over the earth are the cow spread into the sprea The three animals that are most wide

ox and horse as draught animal and burden carrier; it is of high food value; it gives excellent milk; its demands in the form of food and water are exceedingly modest, and its hair is of great value. While the camel could not probable be a support of the country of the ably bear all the extremes of climate that the horse or cow can bear, it is by no means a difficult animal to acclimate, as is shown by the fact that it is used as a draught animal in the colder parts of Siberia on the Russian and Turkestan steppes, in the Himalayas, in Africa and in Australia.

It is well known that wild camels, which descended from domestic camels, which descended from domestic camels that had been turned loose were to be found in some of the western sand plains of the United States until recent years, and occasionally there are stories of a herd of them exists in Arizona.

The dromedary is the plains comel.

The dromedary is the plains camel, while the beast with two humps is the favorite for mountain use. In Sokotra the latter camel climbs up steep steps hewn into the face of the rock, and in newn into the face of the rock, and in all places where tney are used as mountain climbers they are almost as surefooted as mules. Preshewalski, the Russian explorer, found wild camels in the worst mountain regions of Asia, in places so dangerous that the human foot could not find a hold.—Pittsburg Leader.

HEALTHY BABIES.

Healthy babies are always happy babies. If the stomach and bowels are kept right the little ones will be healthy and happy. Baby's Own Tablets are the best thing in the world to accomplish this purpose. The Tablets are the favorite prescription of a doctor who for years made the ailments of little ones a specialty. They are used in thousands of homes, bringing, bealth to little are and headaches and general prostration. It was tried several medicines, but instead of getting better I was gradually but surely growing worsme. I became so weak I could no longer work, and it was while in this condition I was advised to try Dr. Williams' Pink Pills. After using the pills for a few weeks I began to gain strength; my appetite returned, the headaches and dizziness vanished, and before long I was enjoying as good health as ever I had done in my life. Cannot thank you enough for the good the pills have done me, and I hope they will long continue to help other sufferers."

Indigestion, neuralgia, heart the seet known as the Jains, in India, is far ahead of all rivals. Fasts of from thirty to forty days are used in thousands of homes, bringing health to little ones a specialty of the downth this.

In fasting feats the seet known as the Jains, in India, is far ahead of all rivals. Fasts of from thirty to forty days are very common, and once a year the people abstain from food for seventy-five days.

Appendicitis has caused the death of a chimpanzee at the Pasteur Institute in Paris.

Great Britain, France and Germany produce 65,000,000 pins every doy, according to last year's statistics. Of this number Great Britain alone manufactures 53,000,000.

In Denmark there is what is called "old maid insurance" Brockyille, Ont.

GLOBULAR LIGHTNING.

Queer Freaks of Electricity After Striking a Church Spire.

The form of lightning which is unusual and outside the average experience is the globular or fireball manifestation. These so-called fireballs do very surprising "stunts." When the writer was a boy, and was summering in Morristown, N. J., he saw, or with others thought he saw—a manifestation of lightning. The bolt struck the the old First Church, facing the green, and knocked its weather vane away. It massed down the outside of the spire, and knocked its weather vane away. It passed down the outside of the spire, bobbing from point to point dropped to the steps leading to the front door, rolled down them about as rapidly as a

the steps leading to the front door, rollico, which offered ideal conditions for them. From Mexico they spread into Texas, where the new conditions of range and feeding developed a race of cattle that became known as Texas cattle, and these animals are typical of range bred cattle of America now.

The pig had its origin in India, and its first conquest was that of eastern Asia and the archipelagoes of the Eastern as as. China fell an early vietim to the cultivation of the grunting porker was a high art in that land as long ago as a 3,000 years beofre Christ. One of the greatest of the Chinese feast days is known by the name of "Pig."

The Koran forbids the use of pork, just as the Mosaic law does; hence the pig is not raised in countries where the Mohammedan law rules. But in all other parts of the world the porker is as popular as the cow or the horse; and the rare as many varieties of pig, due to local causes and to different ways of breeding in different countries, as there are varieties of horses and cattle.

It has always been a matter of wonder to naturalists and economists that the color of the and passed out by way of a fellowed not in line with the hall. A new line of steamers is projected for and deposited his burden upon a couch. Do you think you can danything for him?"

The woman arose, and, going forward, knelt down by the child, her face calm and serenc, her wanner gentle but assured.

What has happened to him?—

What has happened to him?—

What has happened to like this?" she inquired, although her eyes did not once leave the white face upon the pillow.

Who doctor who saw him in the drug store on the next corner said that he is dying from starvation." Mr. Carr.l explained, as he too the char his compan of indirated for him. No one seemed to know anything about the confin of a moman who had been buried.

A new line of steamers is projected for lowed such that sounded and the trade with South Africa. Two steels this South of accounts and the rade with South Africa. Two steels this South of the trade with South Africa. Two steels this South of October, 1902.

The woman arose, and, going for this line. Both are to be the ground, anything for him?

The woman arose, and, going for this line. Both are to be the ground of mud from in the scale land of October, 1902.

The woman arose, and, going for this line. Both are to be the ground of outlet where the end of October, 1904.

The woman arose, and, going for this line. Both are to be the ground of outlet where the end of October, 1904.

The woman arose, and, going for this line. Both are to be the ground of the world the use of pork, in the Koran forbids the use of pork, list as the Mosaic law does; hence the scoped out a wagon load of mud from anything is not raised in countries where the side of the house, passed under the Mohammedan law rules. But in all other part of the world the porker is as for the October, 1904.

The woman arose, and, going for this line. Both are to be calm and serence, her want are gentle but as the Mosaic law does; hence the chief is house through the side of the house and the side of the house around its roots and plastered it against the Mohammedan law rules.

The woman arose, and s

"Something Doing"

all the time at

Frankville Fair

to be held on

THURSDAY AND FRIDAY, SEPT. 29 AND 30

That's what the posters sav, and judging from past experience, that's what every person expects to find at Kitlev's great annual fair—the best township fair in the country.

Frankville Fair has won its widening way by pure plack and push, and has gained a host of friends in town and country who stand loyally by the exhibition. The attendance is always gool, and the spirit that pervades the gathering is most cordial. Every visitor brings a full share of social sunshine and a luminous time is the result "Uncl." David Dawsley. Honorary President dent, has not go e away back and sat down, but will again figure prominently as one of the sports committee. His white hat may be seen absolutely free of charge, but his gold headed cane-well -to be on the sufer side, bring along a

Under President Richards the new board, compased chiefly of new me bers, has worked diligently and effectually, and the race track, grounds and buildings have received all necessary attention. With good weather, the fair on the 29th and 30th will be the best yet. Don't miss it.

On the the entertainment programme will be the following:-

First Day

Farmers' Race

1-An organ (\$25) given by G. L. Riches, of Brockville. 2-A box stove (\$8) given by Johnston & McGregor, Smith's Falls 3-A box of axle grease(\$4) given by Queen City Oil Co.

WHIKAK KAK KAK KAK

CANADA AT THE **WORLD'S FAIR**

HER EXHIBIT PROVOKES ADMIRATION FROM THE JEALOUS-MINDED.

al Exhibit Is Second Only to That of California, Which Spent \$350,-000 Upon It-"Gosht How Canada Is Herself'-Forestry, Fish and ne the Finest at St. Louis - Our

Canada has reason to feel proud of her display at the World's Fair, not only for the quality and extent of the exhibits, but for the example of the exhibits, but for the example of brisk business management which the Canadian Commission has shown to a country which plumes itself on its business ability. There is not a State Commission on the grounds that could not take a lesson in promptitude, efficiency, and intelligent contrivance from Mr. Hutchinson and his loyal staff.

Everything that Canada had to set up was there on the stroke of the clock. When the Fair opened the Canadian exhibits were in place and ready for inspection. Nothing had to be altered, or removed, or pulled down and put back again. Commissioner Hutchingor's experience led sioner Hutchinson's experience led him to adopt a general plan and to stick to it. Where the State Comstick to it. Where the State Commissions showed nothing but confusion and hesitation, the Canadian Commission went ahead, with such fine results in the way of continuity and harmonious effort that it provoked the admiration even of the jealous-minded. It was impossible for that to happen in regard to the Canadian exhibits which happened to many of the State exhibits.

Poor Kentucky!

Kentucky's is a typical case. Kentucky had appointed a Commission that knew more about politics than it did about World's Fairs. The out-come was that the appropriation was come was that the appropriation was exhausted by injudicious expenditures, and Kentucky had to withdraw her horticultural exhibit altogether and curtail her agricultural exhibit very largely. What money is left now is being spent on the State building, and the social functions that take place inside its walls. Many other State exhibits are incomplete for similar reasons. It might almost be said that Canada was the only nation on the ground that was ready to open out when the band began to play. This is one of the advantages of having an experienced commissioner, assisted by a staff that has been there before. The good example of Canada should staff that has been there before. The good example of Canada should teach the United States that expert commissions are the proper thing. The expert commission involves the idea of permanency, and permanency implies that the commission is given time to learn its book and to profit

Another advantage of the perma-nent commission seems to be that better results can be obtained for the MARK

A Land of Performance The magnitude of the Canadian exa moral support to the immigration literature which Mr. Sif-ton's department sends into the United States. The Americans are aware that many of their friends and kins-men are leaving the United States for the fertile plains of the Canadian Northwest. This exhibit tells them that the land of promise is a land of performance. The effect on the pub-lic mind may be gauged by the reperformance. The enect of the purpose lic mind may be gauged by the remark of an old Hoosier, who had gazed his fill on that wonderful kiosk of grains and grasses which is the centrepiece of our agricultural exhibit. "Gosh!" he exclaimed. "How Canada is spreading herself."

"Canada" and Exhibits. Commissioner Hutchinson's idea is that it's a good thing for Canada to spread herself at World's Fairs, if she does it in the right direction. Commissioner does not believe much in signs. A big sign with Canada on it affects an American in one of two ways. Either he is so posbessed of the exclusive greatness of his own country that he will not walk across the aisle to look at want goes with the sign; or he feels resentment at the country which is drawing off thousands of his best citizens, and views the exhibit with partisan alarm. In view of all the circumstances, Commissioner Hutchinson thinks it best to make the signs just big enough to assert our dignity, and to let the exhibits do the loud talking. For the rest, he depends on a color scheme of red and gold, by which you may pick out the Canadian exhibit in whatever building you may happen to enter; and he fills in the panels of his pillar decoration with chirpy statistics about the gold and wheat, and cattle and and cheese we produce every twelvemonth, not forgetting to mention those things in which we beat the world, and also the fact that something like fifty thousand Americans settled in Canada last year.

Canadian Hospitality.

madian building—a homely place, with comfortable verandahs, where people are allowed to sit in the shade and eat their lunches. This makes it one of the most popular buildings on the grounds, for in the State buildings this privilege is not allowed. There seems to be a conspiracy everywhere else than in the Canadian building to drive the Fair visitor to high prices and the rest-aurants. But in the Canada building everything is free—free chairs and free cushions, free sitting-rooms and toilet-rooms, and a piano that can be played on by whosever is musically inclined. The water is filtered and the water is free—anywhere else that kind of water is a cent a glass. The soft carpets and the pleasant coolness and the unobtrusive Canadian hospitality are all free to everybody, and no questions are asked. dian hospitality are all free to every-body, and no questions are asked. The building is always thronged, for it is on one of the busiest thorough-fares of the Fair.

The Attract the Farmers.

The building is on the road to the Agricultural building, which everybody goes to see, and particularly the farmers. Now, the farmers are the people that Canada wants to attract, and if a tired gcanger and his tired wife drops into the Canada building who knows what may happen? There is a little room at the back of the building, and it is brilliantly lighted. The farmer, being curious, steps in ther, and is confronted by an object lesson—a series of pictures illustrating life in the Northwest, the frames composed of the grains and grasses of the country. The pictures show a Northwest farm at various stages of development, from the prairie to the cultivated steading, with the home lot, the brick house, and the green orchard. One of these pictures represents a Northwest settler signing the patrol sheet of a Northwest Mounted policeman, who is on horseback.

Yankee Delusion Dispelled.

"I suppose," said a swarthy old farmer, as he stroys to comprehend. To Attract the Farmers.

"I suppose," said a swarthy old farmer, as he strove to comprehend it, "that that's the downtrodden Canadian paying his taxes to the Brit-ish soldier."

Ish soldier."
Whereupon one of the Commissioner's staff who was standing near found it incumbent on him to dispel the delusion which Yankee politicians would keep alive. He explained that we are not an oppressed race, and that more true liberty and better protection to life and property may be found under our flag than there is in the land of the free and the home of the brave.

And so the good seed is sown.

The American is impressed with the calm and abiding democracy of the Canadians, not the kind of democracy that finds expression in stilted platitudes, but the kind that displays itself in courteous manners and good works. good works.

Canadian Building Free.

The Canadian building is the first of a series of object lessons. Everything, as I have said, is free. Unlike other State buildings, it is never closed to the public for receptions or social functions. It has no catchpennies. It is the people's house, and the people are allowed to use it without vexatious restrictions. It reads a lesson to the nations of Europe. Go to the British building; you will find there an English accent and a cold stare; all the doors are marked private; the chief object seems to be to keep the crowd out and to maintain a haughty exclusiveness. Go to the Austrian building. Closed. Cardinal Satolli is inside, and needs the whole building to see things. Go to the French pavillon—a pretty place, with a pink marble effect. A notice is posted on the gate—passes must be procured in another part of the grounds, a mile distant. Drop into the Holland building. The only thing worth while is the Vandyck room, for which the Government of Holland charges ten cents admission. Go to Italy—chains across the door—not ready for a week yet. Here is a little palace—Ceylon. The Government of Ceylon is evidently engaged in selling tea—it costs five cents a cup. of Ceylon is evidently engaged in selling tea—it costs five cents a cup, and Ceylon will make expenses. All this, while the Canadian building yearns for you. The doors are wide open; you enter without money and without price; and it costs you nothat price; and it costs you noth-

ing to get out. Forestry, Fish and Game

In the Forestry, Fish and Game building Canada has the finest exhibit. California has a better display of polished woods, but Canada excels in general character and scope. The collection of stuffed animals—bears, musk oxen, wolves, and so on—is admittedly the finest at the Fair. The polar bear is a magnificent specimen, just about three times the size of the big fellow at Riverdale Park. Some of the other exhibits in the building derive a great deal of their; attractiveness from the products of the Canadian forests. For instance, the central decorative feature of the Winchester exhibit of firearms is a moose head, exhibit of firearms is a moose head, splendidly antiered. That particular mooke was shot by a Canadian in the woods of New Brunswick, and it cost the Winchester people five hun-dred dollars to make it their own. dred dollars to make it The colony of beavers, The colony of beavers, which is a special feature of the Canadian exhibit, draws great crowds. Our national emblems are thriving. Only one accident has happened, and that befell when two of the ferocious males got together and destroyed each other. Put two male beavers together and they will behave worse than a Democratic convention. It is worth remarking that only two railways have had the enterprise to make exhibits in this building, and they are both Canadian-the Inter-colonial and the Grand Trunk.

Our Agricultural Exhibit,

But it is on the agricultural exhibit that the Commission has lavished the most pains. It is, as I have said before, the most complete, the most attractive, and the most instructive agricultural exhibit at the Fair. There is a toothsome discovered from the surger with a sugar with a sugar with a sugar to the surger with a sugar to the play of maple sugar, with a sugar bush in small in active operation. There is also a fine display of cheese The loyal Canadian begins his tour and horey, which proves to all and of the Fair with a visit to the Ca-

milk and honey which is mentioned in the Bible. The centrepiece of the exhibit, however, is a huge kidak made of grains and grasses, artistically conceived and carried out with splendid attention to detail. The klosk illustrates the products of the splendid attention to detail. The kiosk illustrates the products of the country through which the new Transcontinental Railway will run; it also represents the cereal products of the settled lands of Canada from Nova Scotia to British Columbia. It is so well arranged that the casual observer can follow the lesson with his own ever and in this way casual observer can follow the lesson with his own eyes; and in this way it combines beauty and utility in the most effective manner. The grains and grasses are handled so as to make frames for painted panels which depict the cattle fed on these precipies grassed.

Mr. Turpin, who is the cicerone, does not fail to impress the questioner that these cattle live on the grasses which Nature sows, and not on grasses sown by hand as in the United States. Another lesson of the kiosk is that wheat can be grown all over Canada; another that cattle can be fed with the best results on page barley oats and sults on peas, barley, oats, and grasses. There are little points of details about the kiosk which will dazzle the beholder, as, for instance, a sample of oats grown in Alberta a sample of oats grown in Alberta which ran 140 bushels to the acre. The gold-lettered pillar panels do not forget to press home facts like these, for example—that during the year ending June 30, 1903, fortynine thousand four hundred and eight settlers came to Canada from the United States.

Best Apples in the World.

The horticultural exhibit, which is second only to that of California, demonstrates that Canada grows the best apples in the world for texture and flavor. Our Northera Spies, our McIntoshes, our Golden Russets, are quite unapproachable. The exhibit is tastefully displayed and carefully kept. No spotted or blemished fruits are allowed to remain on the trays, which is an example that might be Best Apples in the World. which is an example that might be which is an example that highe the followed to advantage by the various States. Mr. Race, the head of this department, states that it is a matter of constant surprise to the visitors that Canada, which they have considered a bleak and inhospitable wild, can produce such splen did plums, grapes and peaches.

Finest Display of Economic Minerals.

Prof. Day, the Government expert
at Washington, concedes that Canada has the finest display of economic minerals at the Fair. Neither in extent nor arrangement does any other exhibit in the Mines and Metallurgy building approach it, except that of Colorado, which is incept that of Colorado, which is intended for a college museum when the Fair is over. The Canadian exhibit are in knock-down cases, ready for some other fair, but only to that extent does the display suffer by comparison. It is a great source of satisfaction to Mr. Broadbent that in the United States, where they make a boast of having the biggest of everything, Canada can show the biggest' features in this particular building. We have, for instance, the largest exhibit of minerals of mica, of corundum, of graphite, of nickel ore, of cobalt, and a nine-ton pyramid of iron ore from Londonderry, N.S.

Ontario shows the largest mineral map in the building, besides an impressive display of cobalt and silver from Lake Temiscamingue, nickel from Sudbury, gold ore from the Rainy River district, and graphite, accounting and folders from other corundum, and feldspar from other places in the north country. The exhibit includes coal from the Rocky Mountains and Nova Scotia, asbestos from Megantic, in Quebec, chromic iron from Quebec, silver and gold from British Columbia. A pet fea-ture with Mr. Broadbent is a perfect crystal of zercon, a curious gem em-bedded in apatite. The United Statbedded in apatite. The United States Government would like to buy it for the collection at Washington, but Canada will not let go. The largest sheet of mica that was ever mined was seven feet long. It was found at Sydenbern Frontague County and section of it is exhibited here. One crystal from Quebec weighs 1,200

Yukon Gold Cabin.

The most popular feature of this exhibit is the Yukon gold cabin. It is built of the characteristic minerals of the various Provinces, and is in that respect a well-contrived object lesson for those who are scientifical-ly minded. The cabin is lighted with electric lamps, and behind plate glass and iron bars is displayed a glitter-ing assortment of Yukon gold in grains, nuggets, and bars. The cabgrains, nuggets, and bars. The cab-in is guarded night and day, for the gold is worth fifty thousand dollars. The idea of the cabin is Commissioner Hutchinson's, who says he is content to leave the scientific part of the show to somebody else, so long as he can run what he calls the vaudeville end. By that he means that he will dig out the happy thoughts which will draw the crowds our way.-H. F. G., in Toronto Star.

Honors Fifty Years Ago. We learn that Mr. Chief Justice Robinson has received an intima-tion that it is Her Majesty's inten-tion to bestow upon him the title of Baronet. His Lordship, if we remember rightly, was offered Knighthood in 1837, but declined it. . . . We in 1837, but declined it. . . We presume that Mr. Lafontaine, Chief Justice of Lower Canada, will receive the same title as Mr. Chief Justice Robinson. Titles command little respect in this Canada, and in consequence do little harm.—From The Globe of 1854.

Edmund Burke once showed a painting to Sir Joshua Reynolds, whose opinion he invited. Sir Joshua looked long and attentively at it. "Well," he said, "I really don't know but whether there's sufficient mise in it to justify my advising the young man to adopt art as a calling I really cannot say." It was Reynolds' own work, done many years be-

Minard's Liniment Relieves Neuralgia.

Sex and the Bee.

At one time the bees were male and female in equal numbers. The irresponsible male buzzed about, simply getting his own living, marrying and dying. The responsible female not only got her own living, but that of her children. Somehow, by and by they same to see the how, by and by they came to see the the advantage of communal effort, and, just as women say to one another now, "If you'll wash the dishes I'll wipe 'em," one feminine bee said to the other, "I'll be mother if you'll get the living." It was a bargain, and the accommodating females took drones in to board.

The queen of a beehive does not rule, she lays eggs. She does not mind the does not even do her digesting, let alone getting the food. The attendants that surround her feed her with bee milk, secreted by glands in their heads. She has to be fed continually, for at certain periods she has the to three thousand eggs a day, twice her own weight—four times, indeed, for own weight—four times, indeed, for more than half her weight is eggs. In her lifetime a prolutic queen will lay fifteen hundred thousand eggs.

THE COST OF FIRING A CANNON

Modern naval warfare is one of the most costly things that can be imagined And a combat between two fleets means the expenditure of vast sums of money Some idea of the high cost can be ar-C. C. RICHARDS & CO. rived at by taking a Japanese warship like the Kasuga or Nisshin and calcllating the number of shots she would discharge, say, at Port Arthur. The first named ship carries four cannon which cost \$300,000 each. One of these guns can fire two shots a minute, and every shot costs \$400; thus in five minutes these four cannon can discharge utes these four cannon can discharge forty bombs at a cost of \$16,000. The smaller cannon cost each \$18,000, and it is estimated that in five minutes the twelve cannon could discharge shot to the value of nearly \$35,000.—Leslie's Weekly.

YOUNG LADIES MARRIED WOMEN

Mrs. Jno. C. Huffman Speaks to You All.

She Tells of her Troubles and Their Cure that you may be Benefited.

Queen had ruffs made of lawn and cambric for her own royal wearing there was no one in England could tell how to starch them, but the Queen made special inviting for some years, that could Napance, Ont., Sept. 12.—(Special)—
There are many women in Canada who will yet write letters of thanks to Mrs. Jno. C. Huffman, of this place. Mrs. Huffman suffered as they are suffering now. She discovered a cure in Dodd's Kidney Pills; and she is breaking the law of secrecy that binds the great majority of womankind to let her suffering sisters know where they may find relief. Mrs. Huffman says:

starch them, but the Queen made special inquiries for some woman that could starch, and Mrs. Guilham, wife of the Plasse, came to London and established there a school for the teaching of starching. The school succeeded, and the Flanders frau got rich. She charged £5 a lesson and an extra twenty shillings for a receipt for the making of starch

Mrs. Huffman says:
"I was troubled for about six years with Kidney Disease and the pain was so great I could hardly bear it. I could not entertain any company. One night when I was feeling very miserable I read of

Fome wonderful cures by Dodd's Kidney Pills and resolved to try them. "At that time my urine was something terrible and at times very disrepeable to pass, but Dodd's Kidney Puls soon brought me relief from all my-troubles and by the time I had taken six boxes

I was completely cured.

"I am making this statement to the public in the hope that it may help other young ladjes or married women."

The Japanese Alphabet.

Japanese system of letters is called Iroha, from the names of the first three letters, "i," "ro" and 'ha," on preceedy the same principle as that which gives to our own system the title "alphaber.

The Commercial Use of Worn-Out Galo shes-An Increasing Industry.

VALUE IN OLD RUBBERS.

Not one in a thousand New Yorkers is aware that one of the big industries of this country is the importation of old rubber shoes and goloshes, Yet it is a feet that these seminals worthless di-

rubber shoes and goloshes, Yet it is a fact that these seemingly worthless disgarded articles of footwear from nearly every country of the globe are daily coming into the country in large quantities, carefully packed and stowed away as part of the big Transatlantic liners.

This importation has been going on for several years, and yet it has seemingly never attracted the attention of the alert chroniclers of interesting events, for the old shoes and goloshes have slipped into the country silently, hidden away on the manifests of the steamships and quickly sent to the consignees, who

away on the manifests of the steamships and quickly sent to the consignees, who have eagerly paid the freight. Primarly the cause for this strange industry is the ever-increasing demand for rubber in America, which has prac-tically exhausted the South American rubber industry. Every year new uses er industry. Every year new uses been found for the stretchable arhave been found for the stretchande ar-ticle. A few years ago, when electricity was not in so general a use as it is to-day, the demand from electricians for rubber was not very heavy. To-day, when every modern apartment house has electric light installation, the demand for rubber for insulation purposes is something enormous. The ever-increasing number of electric traction routes, elecfor rubber for insulation purposes is something enormous. The ever-increasing number of electric traction routes, electric elevated railways, electric locomotives, electric elevated railways, electric locomotives, electric elevators, have added to the demand for gutta percha, and then the automobiles with their huge rubber tires, compared to which the rubber tires are then drawn tight, and then made the rubber tires are then drawn tight, and then made the rubber tires are then drawn tight, and then made the rubber tires are then drawn tight, and then made the rubber tires are then drawn tight, and then made the rubber tires are then drawn tight, and then made the rubber tires are then drawn tight, and then made the rubber tires are then drawn tight, and then made the rubber tires are then drawn tight, and then made the rubber tires are then drawn tight, and then made the rubber tires are then drawn tight, and the rubber tires are the rubber tires are then drawn tight, and the rubber tires are the rubber tires are then drawn tight, and the rubber tires are the rubber tires are then drawn tight, and the rubber tires are the rub the demand for gutta percha, and then the automobiles with their huge rubber tires, compared to which the rubber tires of the old bicycle is an nothing

ENGLISH SPAVIN LINIMENT

Nearly Succeeded.

One very cold winter night a kind old lady suddenly recollected that ner maid lived in an unheated room. "Mary," she said, remembering the good old custom of her own girlhood, "it's going to be pretty cold to-night. I think you had better take a flat iron to bed with you." "Yes, ma'am," said Mary, in mild and the sum said finally the gather are summed to which the rubber tires of the rubber tires as nothing, and which brought the demand for rubber far and away above the supply at hand. When the supply available from South America seemed to be getting seriously low, the rubber men got their heads to ground, thus raising the skin about four feet. The skin thus becomes a platform some eight or ten feet square, which serves as a sort of movable stage on which ther rubber can be the drawn tight, and then made of the ropes tires, compared to which the rubber tires of the old bicycle is as nothing, and which brought the demand for rubber and above the supply at hand.
When the "Yes, ma'am," said Mary, in mild and expressionless assent. The old lady slept soundly and free from care, secure in the belief that the maid was comfortable. In the morning she again visited the soundy and free from care, secure in the belief that the maid was comfortable. In the morning she again visited the kitchen. "Well, Mary," she asked, "how did you get along with the flatiron?" Mary breathed a deep sigh of recollection. "Well, ma'am," she said, "I get it most warm before morning." rope is not one-tenth of what it is in America, and they have an idea there that rather than pay a stiff price for a rare article they can do without it. That is where they are different on this side of the Atlantic, for, the rarer the ar-ticle gets to be, the more the American

wants it.

All the old rubber shoes are gathered and shipped to Liverpool, which is, so for, the only shipping point from which the rubber has come to this side although MENT is our remedy for sore throat, most of the old shoes have come in on German steamers.—Brooklyn Eagle.

The Largest Diamonds.

The eight largest diamonds in the world are what are known as crown jewels. Some of them are in an uncut state and others are carefully cut and others are carefully cut and finished, so that there is a wide difference in their value. The Kohinoor, the smallest in weight, has been thus reduced by cut-ting and is much the most valuable of the lot and has been estimated at less than \$500,000. The list is as follows: The Braganza, part of the Portugal jew-els, weighs 1,880 carats; Kohinoor, beeis, weigas 1,880 carats; Kohinoor, be-longing to the English crown, 103 carats; Star of Brazil, 125 carats; Regent of France, 136 carats; Austrian Kaiser, 139 green and blue. The effect of this was to fint delicately the white linen to which the starch might be applied.

Before Queen Elizabeth's time ruffles were made of fine holland, which required no stiffening. Then the ruffs of cambric came, and these must of necessity betarabed, It is recorded that when the carats; Russian Czar, 193 carats; Rajah of Borneo, 367 carats.

The harder you cough, the worse the cough gets.

FEAST OF THE WHALE.

An Interesting Incident of the Social Life Among the Eskimos.

The principal occupation of these Eskimos (of Arctic Alaska) during the spring is the hunting of the bow-head whale in the leads, or open water, and among the floe ice of the Arctic Ocean. The taking of a whale is always a time of great rejoicing with these people, for it means not only an abandance of food and fuel, but a large amount of valuable trading material.

After the whaling season is over, the

boats which have been used in the chase are gathered on the leads between the pack and shore ice, which is often some miles from shore, at the foot of some persons can correspond with each other road that has been cut through the before whose eyes the very letter is held, rough ice from the land to the water, The most successful boat's crew, with their umiak (a whaling boat covered with skins), takes the lead, followed by the other boats in the order of their success. The harpoons, floats, paddles risible, but by scattering coal dust or success. success. The harpoons, flouts, paddles and everything pertaining to the chase of the whale are placed in their respective positions. The umiak is then placed on a flat ivory runnered sled and lashed firmly in place. The owner, who is firmly in place. The owner, who is called omelic (head man), stands on the ice at the right hand side of the bow; the boat steerer stands at the stern and the paddlers stand at their respective places along the sides of the boat. When all is ready, the omelic gives the word to go forward, and each of the crew slips over his shoulder a broad breast strap of sealskin, which is attached to a short line made fast to the thwarts of the boat. When all is ready, the boat is pulled forward a few lengths, and the next boat in order goes through the same form, moving on in its turn, until all the umaks are strung out in a long line on the grounded ice, ready for their

return to land. At a signal from the head boat, all move forward, chanting weird songs of the goodness and power of the whale; ne of the superstitions of these people is that wherever working on any ob. Cuts.

ject to be used in wholing, or doing any-thing connected with whaling, they must constantly extel the merits of this great

animal. animal.

Long before the boats reach shore the entire population left in the villagemen, women, children and dogs—congregate on the beach to welcome the homecomers. Whenthe first boat nears land comers. Whenthe first boat nears land it is brought to a halt a few feet from the shore line, and its talisman, which is the shore line, and its talisman, which is always carried in a little pouch in the bow, and may be a wolf's head, the head of a raven, iron pyrites or any old thing, is lifted out by the omele and the shore, where stands the chief medicine man of the tribe, who pours over it a little fresh water to refresh it and thank it for the the scene of any mountaineering fatality. water to refresh it and thank it for the benefits given, if the boat has secured a whale; or if the boat has not been ulcky, to appease any slight that may have been put upon the talisman, in the hope that it will give them better luck in the

future.

After reaching shore, a day or possibly two may be given for preparation, and then the great feast begins. Each suc-cessful boat owner, beginning with the one whose boat secured the most whales, gives a feast, to which he invites all the one whose boat secured the most whales, gives a feast, to which he invites all the members of the tribe and any other people who may be in the village. First a wind break of umiaks, sails or skins is built to act as a shelter against the is built to act as a shelter against the chilly blasts of the polar winds. It is placed in the form of a large circle, if

The Religious of Japan.

Upon the restoration of the present Japanese Emperor to power in 1868, it was decided by the older statesmen—tho advisers to whose farsighted policy much of the present success of Japan in her struggle with Russia must be attributed —that it would be better to restore the ancient Shinto faith and get rid of Bud-hism as much as possible. In this way, Shintoism became the official national hism as much as possible. In this way, Shintoism became the official national religion of Japan, and its rites are followed in all cases where the government is responsible for the celebration, though the common people are, as a rule, buddhists, while many of the nobles are followers of Buddha at heart. In other words, there is no strict line of demarcation between the two faiths, and it is questionable whether the average Japanese individual could tell you to which seet he considered himself allied.

ese individual could tell you to which seet he considered himself allied.

The Emperor is the head of the Shintor religion, and is himself worshopped as being directly descended from the gods, and every Japanese subject pays him homage as such head, but this does not interfere with the subject's worship of multifarious other deities of the wind, the ocean, fire, food and postilence; of multifarious other detties of the wind, the ocean, fire, food and pestilence; of mountains and rivers, and of special objects in nature—more than eight hundred in all. It was very simple to add to all these the gods of the Hindus when Budddhism was introduced from China, through Corea, in the sixth century of the Christian era, but it was not so simple child independent of the command of ple to displace them at the command of the statesmen. So the Buddhist priests still flourish, though shorn of the power and grandeur which were theirs under the rule of the Sboguns.—William Din-widdie's Manchuria letter in Leslie's Weekly.

Origin of Ice Cream

Many barrels of ice-cream does the average man swallow with never a grateful thought of that benefactor of mankind who invented the stuff in the first place.

Bacon knew that by melting snow with salt congentation would occur in in any circumiacent liquid. But to him it was no more than an inedible, an extraordinary scientific fact. Further than that this noble seer never saw.

It was a Frenchman who, in all his humble namelessness, preparing for the Due de Chartres in 1744, a snow-like Due de Chartres in 1744, a stream. A dish, was the originator of ice-cream. A century and a half before the like was known in England epicures in France were partaking of ices and aerated drinks, and their start is not laid even drinks, and their start is not laid even in France, for the French are said to have caught the trick from travellers returning from the sherbets of the Turks and Persians.—Boston Transcript.

ALPINE FATALITIES.

Although Early, the List of Casualties is Already a Long One.

The gravest of the accidents on the Higher Alps has been that of the Ober-Gabelhorn. This great cone of reddish rock, familiar to all habitues of Zermatt, is not considered in these latter days a difficult ascent, provided it is climbed the scene of any mountaineering fatality. In this instance a party of Austrians were making the ascent from Zermattt, roped two and two, as is often the custometric and one guide roped two and two, as is often the custom on rocks, one tourist and one guide on each rope. Dr. Demelius was in charge of the guide Tembel, and was leading on the rope, when suddenly a great mass of rock which was serving as a foothold, gave way beneath his feet, carrying him and his luckless guide down with it to their death. The accident was

one of those rare events which the mountaineer must on occasions be prepared to chance, and against which, perhaps, no vigilance can guard. An accident of a quite different type was that by which in mid-July Miss Goodman lost her life. She was climbing with a party on the rope, when she slipped and fell. The rope broke, and the fall had fatal results. It is feared that this fatality was due to the employment of second-class cord. Otherwise it is most inexplicable, as the cases in which a rope of good quality has parted under the stress of a fall are few and far between. In the great and ever-memorable catastrophe on the Mat-terhern by which Lord F. Douglas and Messrs. Hudson, Hadow and Croz lost their lives, the rope which broke was a weak and inferior one, which the guide ought never to have used. The type of rope approved by the Alpine Club can be trusted in most emergencies if it be properly used.—London Mail.

ATTACKS ON PORT ARTHUR REPULSED BY THE RUSSIANS.

Russians Fortifying the Heights at Liao In Steamer Calchas' Cargo Tantamount to Stopping Trade With Japan. River and Tie Pass.

Jap Raiding Party Defeated by Russians on Kamchatka Peninsula.

patkin's latest report is regarded here as candid, soldierly and lucid, giving a clearer appreciation of the happeningthan the more graphic accounts of the correspondents. Nevertheless it does not affect the judgment of the critics." The result confirms in the holders of rival views here their respective opinions that the honors rest with Gen. Kouropatkin, whose retreat was one of the most skilful in history, and, contrarily, that the Russians suffered a severe defeat, which was prevented from being overwhelmwas prevented from being overwhelming by Gen. Kouropatkin's prompt order to retreat and his skill in conducting the withdrawal. It is held that Gen. Or-loff's failure at Sykwantun, or, as the Japanese call it, Heiyingtai, decided the result. It is remarked as strange that Gen. Kouropatkin does not refer to the dangerous position in which for a time his movements were placed by Gen. Ku-

Unofficial reports received from St. Petersburg attribute to the Cossacks an important part in repelling Gen. Kuroki's turning operations. They occupied a hill. They dismounted and drove back the Japanese with their lances.

There is a story of friction between Gens. Samsonoft and Orloff. During the battle it is alleged that Gen. Orloff asked Gen. Simsonoff to send Cossacks to his assistance. Gen. Samsonoff refused, partly owing to the untried character of Gen. Orloff's troops. The correspondent justifies Gen. Samsonoff's action, declaring that cavalry certainly would have been annihilated. Nothing has been received enabling a

harmonization of the conflicting reports concerning the Russian intention to hold Mukden or otherwise. It is anti-cipated that there will be no further serious operations for some days, the Japanese, apart from their exhaustion, being believed to be short of ammunition.

KOUROPATKIN'S REPORT.

Russian Commander Tells Story of Liao Yang Battle.

A St. Petersburg cable says: General Kouropatkin's official report, which was given out to-night, comes as a considerable relief as setting at rest a considerable relief as setting at rest alarmist stories of the loss of guns, the cutting of divisions, and the death or capture of prominent commanders, which have been freely circulated here. The report says that Gen. Orloff's fail-ure to hold the vital position at the Yen-tai mines was responsible for the break-ing down of the whole of Gen. Kouro-porthick plan of buttle and tennical patkin's plan of battle and turning a potential victory into defeat.

The report says in part: "On Aug. 26 the Manchurian army occupied three groups of positions, the first at Pettsu and Anping on the left flank; the second at Liandiansian in the centre, and the third at Anshanshan on the flank. The same day the Japanese assumed the offensive. At Liandiansian the attacks were repulsed, and on the left we retained our principal position Anping. After a desperate battle the Japanese however, secured the position at Pettsu. Simultaneously a turning movement was observed on the left flank at Anshanshan.

"I then withdrew from the advanced positions at Liao-Yang. The two days' march was most difficult, and some of the gans had to be carried through the mountains by artillery. The rear guard maintained a stubborn resistance to the enemy. Gen. Rutkovsky and Col. Raben were killed while covering the attempted extrication of guns, which were mired.
"On Aug. 29, the army reached Liao-Yang, and the next two days the Japanese attacked our advanced positions energetically, but were repulsed with great losses, the Russian reserves, beng utilized. On Aug. 31 it was the advance troops, resolving to attempt to hurl Kuroki's army back upon the river. This was achieved at certain points. All the troops intended for offensive operations reached the right bank of the Taitse on Sept. I, and the enemy occupied our abandoned positions—this eyening, opening an artillery fire upon

sykwantum was in our hands, thereby attaining the object of the operations of our right flank. As soon as the left flank in the vicinity of the Yentai mines, on Sept. 2 (Orloff's detachment), occupied the heights to the north of the mines. ne engaged the army in an artillery duel.
To aid our troops holding positions near Sykwantun, Orloff sent part of his force to attack the enemy toward Saldan out of the ring. The paper adds that the Telegraph's article reflects Britonian the opinion, the opinion the opinion of the ring. to attack the enemy toward Sakhumoon.

Our men i net with a frontal and a natural in an aller.

"The enemy was now established in an extremely strong position on the hills, and it would have been too hazardous for our left flank to attack them, in view of the losses sustained in the previous five days. We therefore withdrew to Talienko, and I decided to retire to Mukden, the retreat being accomplished on Sent. The evacuation of books in Joaquese 4 per cent.

tire to Makden, the retreat being accomplished on Sept. The evacuation of Liao-Yang was concluded Sept. 4. The commissariat reserves sufficient to last the army eight days were destroyed. The pontoon bridges were dismantled and carried off, while temporary pontoons were burned and the railway bridge wrecked. The enemy attempted to pursue, but were repulsed.

"Precautions were taken on Sept. 3 and 4 to prevent a turning movement from the east. The Japanese to the southward took no vigorous initiative, but Gen. Kuroki assumed the offensive to the castward. Our detachments at Talienko sustained a furious night attack, which was particularly desperate on Sept. 5. We retained our position, but suffered heavy losses, one regiment, which bore the brunt of the fight, losing 500 in killed or wounded.

"By evening of Sept. 5 the danger of

"By evening of Sept. 5 the danger of a simultaneous attack on our front and left flank had disappeared. The removal left flank had disappeared. The removal of our artillery, transport, and baggage trains was concluded in the face of immense difficulties. Our retirement on Mukden on Sept. 7 was covered by a strong fear guard of cavalry.

"We abandoned nothing from Aug. 30 up to the time of our arrival at Mukden."

AMMUNITION EXHAUSTED. Why General Nodzu Ordered Famous

Bayonet Charge.

cable: Field Marshal Oyama reports that some of the enemy, with a few guns, are posted in the direction of Sankeishi. They frequently fire at the Japanese. There is some Russian cav-Japanese. There is some Russian cavalry at Wulitatsu and Shuang-faitsu.
The enemy has also been seen in several places between Sinminting and Mukden.
Gen. Nodzu reports that the ammunigradually running out on Sept. 3, although the enemy's fire had not diminished. This decided Gun Nodzu to order isned. This decided GWn. Nodzu to order a bayonet charge. The Russian fire for some time, however, prevented the Japanese from getting in. It was only at 7.50 in the evening that the Twentieth Infantry succeeded in breaking through. Other charges followed. Position after position was rushed, but after the enternehments were occupied the Providence. position was rushed, but after the entrenchments were occupied the Russians fired fiercely from the walls of Liao-Yang. It was not until 10.20 that Gen. Nodzu's troops occupied the south gate of the city and bivouacked. The whole line of entrenchments and the northern city were not secured until half an hour after midnight. Gen. Nodzu sent a force east of the city at dawn on Sept. 4 to east of the city at dawn on Sept. 4 to pursue the Russians, but the destruction of the bridges prevented them from crossing the Taitse River.

ADMIT BRITISH CLAIMS.

issia Drafts Formula Defining is Seizable Centraband.

A London cable; A despatch to the Daily Mail from St. Petersburg says that a special meeting has been held at the Peterhof for the purpose of drafting a formula defining the lines on which naval formula defining the lines on which naval officers shall act in seizing contraband. The Czar presided. Naval Commander-in-Chief Grand Duke Alexis, Vice-Admiral Avellan, Minister of Marine; Count Lamsdorff, Minister of Foreign Affairs, Lamsdorff, Minister of Foreign Affairs, and several heads of departments at-tended. Everything turned on the right of seizing contraband consigned to private persons. It was decided that coal, provisions, and such articles so consigned are not seizable unless the captor can prove that they are intended directly indirectly for the enemy's army. y for the enemy's army. ndent says he learns that the British claims thus for were admit ted, and that the owners of confiscated ships will be paid.

DON'T LIKE BRITISH CRITICS.

They Deny That Kouropatkin Out-Gen-

eraled Oyama. evening, opening an artillery fire upon Liao-Yang."

Gen. Kouropatkin then describes the position taken up, and says:

"The night of Sept. I the commander of the corps on the right flank stated that the Japanese, having taken the offensive and occupied the district northward of our Sykwantun position, the Russians retired, and I changed my plans in order to retake the lost ground the following day. The evening of Sept. 2.

Sykwantun was in our hands, thereby attaining the object of the operations of

Our mend net with a frontal and a flank fire, and losing their bearings in the cornfields, began to retire. The troops in the hills also retired. Orloff bimself was wounded as also was Gendard was wounded as also was Gendard was seen as the content as the conte Fomin, who subsequently died.

"The Japanese then extended northward and occupied the whole range of hills and the Yentai mines. Samsonoff's sornia of Gossacks dismounted and defeated.

noting the decline in Japanese 4 per cent. bonds in London, remarks that the so-called maltreatment of foreign corre-spondents at the front seems to be prov-

g expensive. It is reported here that the First Mos-cow and Fifth Siberian corps are arriving at Mukden.

THE LENA.

Insurance Men Do Not Think There i

Danger of Her Seizing Vessels. New York report: Marine under-vriters are apparently not uneasy over the presence of the Russian cruiser Lena harbor of San Francisco, says the Journal of Commerce. They do not be-lieve that she is any serious menace to commerce, and war risks on vessels trading in the Pacific remain unchanged at former rates. It is not considered that for the present at least the danger of any vessel being captured has been increased by the advent of the Lena. It is stated by officials of the marine in-surance companies in this city that so far no application has been made on behalf of any vessel as involving any dan-ger from the Lena, and there is a general feeling that there is but little cause for uneasiness on that score. The rates re main unchanged at 1 per cent. on cargoes from ports on the Pacific coast bound to Japanese ports, and one-quarter of

1 per cent. from ports in Japan to the Pacific coast.

CONTRABAND OF WAR. The Lena Was Sent to the Pacific to

Check its Shipment. A St. Petersburg cable says: Felegraphic enquiries have elicited the nformation from Vladivostock that the Russian transport Lena was sent to the Pacific with the view of stopping the shipment of contraband of war. There is an intimation, also, but this is not official, that several other vessels. bably merchantmen purchased in Ger-many, and converted into armed cruisers, are in the Pacific on a similar mis sion. If the United States declines to per mit the Lena to have ample time in which to make complete repairs, without which she could not venture to undertake a long voyage either back to Vladivostock or home by way of Cape Horn, it seems probable that Russia will acquiesce to the decision to disarm her There is no disposition here to criticize the course of the United States so far as it is revealed in the press despatches. Ambassador McCormick has completed arangements to send about eight hundred Japanese refugees collected at Perm, Germany, whence they will be

TWO ATTACKS REPULSED.

The Japanese Troops Got the Worst of the Fight on Two Occasions.

A St. Petersburg cable: The emper-or has received the following despatch from Gen. Stoessel, commander of the Russian military forces at Port Arthur, dated August 28: "I am happy to re-port to your majesty that at 3 o'clock in the morning of August 27, during a violent rain and thunderstorm, the Japanese again attempts to each ure our left flank positions, near number one fort and Udan mountain. Their at-tack was everywhere repulsed. Our osses were small, three men killed and wo officers and 98 men wounded. The two officers and 98 men wounded. The wounded were brought in and are being carefully tended. A number of Japanese corpses would have been picked up by us, but the enemy prevented from so doing by opening fire on the hospital attendants who had been sent out under the red cross flow." ler the red cross flag."

Another despatch from Gen. Stoessel to the emperor, dated Sept. 2, says:
"On the might of Sept. 1 the enemy attacked Visokaya and Dlinnaya mountains and the neighboring fortifications, opening simultaneously an artillery fire out he forts and mognatains. The leading files of the enemy, with the Japanese columns following them, were discounted by the stories of the second Another despatch from Gen. Stoessel covered in good time, and our batteries opened on them. The leading files fortunately encountered some automatic mines and many of the enemy were blown in the air. The attack was repulsed in an hour. Our losses were in-One officer and seven m

A GALLANT FIGHT.

Japanese Troops Fought With Great Bravery, Though Officers Were Killed.

A Tokio cable desptch says: Gen. Modzu reports that the heaviest fight-ing at Liao Yang occurred during the evening of September 3. The twentieth regiment, having previously lost successively two regimental and four pattal ion commanders, assaulted and dislodged the Russians from their redoubts at Yus There were no Japanese of fangmiao. There were no Japanese of ficers above the rank of captain. Captain Yogami, commanding the regiment led the charge and inspirited his men ward and occupied the whole range of hills and the Yentai mines. Samsonoff's sotnia of Cosssacks dismounted and defended our positions with the utmost sourage, but were gradually driven back.

Bitiam regarded the Russian Bear as a led the charge and inspirited his men. The reserves unhesitatingly filled the spanning for the charge in British opinion to uncent unmindful of wire entanglements and fended our positions with the utmost sored despatches from Shanhaikwan other obstructions, rushed up to the Russian works shouting "Bansia." One

battalion lost all its officers in the first clash, and a private subsequently com-manded it. One company was reduced to fourteen or fifteen men. The regi-ment's losses were from twelve to thir-

In spite of the fatigue at surrise Sept.
4, the Japanese continued the pursuit of
the Russians, but the lack of bridges
forced them temporarily to remain
south of the Taitse river.

PRIZE COURT DECISION.

A London cable: The Globe this af-ternoon says that the decision of the Vladivostock prize court to confiscate that portion of the cargo of the British that portion of the cargo of the British steamer Calchas consisting of flour, cotton and timber, consigned to Japan, if confirmed by the Russian supreme court, amounts to a complete ignoring of the protest lodged by Great Britain at St. Petersburg against the inclusion of provisions in the Russian list of contraband of war. The paper adds: "It has also been stated in behalf of His Majesty's Government in the House of Commons that raw cotton would only be regarded by Russia as contraband when destined to make explosives. The manifest shows there were 36 bales of cotton on board the Clacks consigned to trading comthe Clachas consigned to trading com-panies in Japan. The shipment from America was purely commercial. The decision of the prize court if allowed to pass unchallenged by Great Britain amounts to nothing less than a prohibi-tion of commerce between this country and Japan."

JAPS PLUNDERED VILLAGES.

Of Kamachatka Peninsula, But Wer Driven Out by Russians.

A Petropavlovsk cable (delayed in transmission.)—In the middle of June Lieutenant Gundusi, of the Japanese navy, with one hundred and fifty naval reserve men, landed on the west coast of Kamachatka, plundered villages, expelled inhabitants and issued proclamations declaring the sovereignty of Japan over the Kamchatka peninsula. A sailing vessel, with 100 Russian reservemen and a detachment of one hundred men and a detachment of one hundred militiamen, was sent from Petropavlovsk to the west coast to eject the Japanese. The Russians defeated the latter and captured their leader. The Russian force lost one man killed and four men wounded. The Japanese lost 17 men killed. The Russian naval detachment later burned five Japanese schooners killing seventy Japanese.

THE KOREA

Also Due at a U. S. Port—Russian Ships Ordered to Respect Neutrality Laws.

Paris cable: The correspondent of the Echo de Paris at St. Petersburg has telegraphed to his paper as follows: The ministry of marine tells me, regarding the arrival of the Russian transport Lena at San Francisco, that another ves-sel, the Korea, is also due at an Ameri-can port on the Pacific. Orders have been sont to the Russian ships to scru-pulously conform with the American neutrality rules, which are expected to permit them taking on enough coal to reach Vladivostock. I consider the situation very delicate, as there is evidence that the ships were destined to prevent the transport of contraband goods from the United States to Japan. of contraband and perhaps capture vessels carrying contraband.

An admiral on the staff of the Em peror, and closely related to Viceroy Alexieff, tells me that Alexieff eventual y will succeed Foreign Minister Lams-lorff, and that he will adopt a strong diplomatic policy.

TOKIO INTERESTED

n the Presence of the Russian Warship Lena at San Francisco.

involved the Lena, while engaged in scouting, called at Korsakoff, found the wreck of the cruiser Novik, learned of the scat-tering of the Port Arthur fleet and the defeat of the Vladivostock squadron, took the Novik's crew on board and fled to San Francisco. The telegraphic reports of the Lena's crew and number of guns on board indicate abnormal condi-

tions, for a ship of her class. The Japanese government, while watching the incident with close attention, has not expressed its attitude upor the case publicly.

FIGHT THEIR BATTLES O'ER AGAIN. Russian Troops Talk of Nothing but the Great Battle of Liao Yang.

A Mukden cable (delayed in trans-mission.)—Everything is quiet here. The Japanese have retired southward and it is even reported that they have evacuatis even reported that they have evacuated Yentai. The belief prevails here that the lull may continue for several weeks. Stirring events at the battle of Liao Yang are the sole topics among the officers and soldiers here. Heroic feats are recounted and the desperate nature of the Japanese charges south of Liao Yang and their incredible advance reportedly over the dead bodies of their poetagly. peatedly over the dead bodies of their comrades, are constantly alluded to. The Russians also made several bayonet charges, among the most brilliant being that of the Morshansk regiment, headed

by its wounded colonel.

The youthfulness of the Japanese liers surprised the Russians. Som diers surprised the Russians. Some of them are not more than 18 years old. The reports that the Japanese bolster ed up their courage with intoxicants are classed as nonsense, the best evidence to the contrary being the remarkable endurance they displayed.

Chicago, Sept. 19.—John Alexander Dowie, having transcended his prophet-tood, will declare himself to be not only Elijah the Restorer," but also "John Alexander, Divinely Commissioned First Apostle of the Christian Catholic and postle Church in Zion, with Authority Select and Ordain Eleven Other Apo thes When and Where God May Direct."
The announcement will be made formally at Shiloh Tabernacle, in Zion City, next Sunday. Extraordinary preparations are in progress. Departing from his customary rule, Dowie has invited the newspapers of Chicago to send representatives to the meeting.

BODY FOUND IN TRUNK AT CLEVELAND IDENTIFIED.

Was That of Mrs. Samuel Smith, Who Had Applied for Divorce.

Eugene Minor and Gertrude Smith Arrested on Suspicion,

young woman which was found yeserday crowded into a trunk, which was picked up in the water under coal dock on the Lake front has been dentified as that of Mrs. Inez Smith, this city. The woman disappeared on Sept. 16. That she was murdered and he body placed in the trunk and thrown into the river the police say is certain. Some time ago the woman applied for a divorce, alleging that her husband Samuel Smith, had another wife living, whom he married in 1892. Before her narriage to Samuel Smith the murderded woman's name was Inez Hall, and she lived in Zanesville, Ohio. The Smiths had lived in Cleveland about five years, but recently had not been living together. The police have arrested Eugene Minor, and Gertrude Smith. It is believed by the police that they know seemsthing the police that they know something of the case. A despatch from Zanesville last night stated that Samuel L. Smith, a colored waiter, and Inez Hall, a white

a colored waiter, and Inez Hall, a white chambermaid, employed at the Clarendon Hotel in that city were married there in Jan., 1889. The mother of the dead woman lives in Cambridge, Ohio. The top of her head had been crushed in, probably with some heavy blunt weapon. This must have been a fatal bluer. The back head these in the second of the second o low. The body had then been jammed into the trunk, a small affair. The head and feet were almost touching, so dif-ficult had it been to crowd it into the Letters addressed to Margaret Lyons,

Cleveland, O., Sept. 19.—The body of 279 St. Clair street, Cleveland, several books bearing the same name on the fly leaf, photographs of well dressed and respectable looking people and a few trinkets, buckles and clasps, were scattered over and under the remains. Over her body was a cheap quilt. This had been carefully tucked about her so that had the top of the trunk call, becauseful.

the top of the trunk only been unfast-ened it would not have been known that there was anything but ordinary mater-ial on the inside. It is the opinion of Capt. Motley that the body had been in the water from three to four weeks. So badly decomposed was it that the features are barely distinguishable. The remains were terribly bloated and all the hair had fallen from the head, The woman was dreslen from the head, The woman was dressed only in a cheap white wrapper. Her stockings were black and there were no shoes on her feet. Aside from the terrible gash on her head, a little to the center, there was no other mark of violence on her person.

Pullman Works Shut Down,

Chicago, Sept. 19.—The immense car works at Pullman are shut down to-day and practically everyone of the company's 7,000 employees is idle. The workmen were told to take their tools with them when they left the works, and from this it is inferred a period of idleness confronts them. The shut down came when the 1,500 workers in the repair department were laid off. That had been the only branch of the plant in opera-tion for some time. Complaints were made by the company, it is said, that high wages brought about the closing of the works.

REMARKABLE OPERATION.

Criminal Instincts in an Indianapolis Boy Are Corrected.

Indianapolis, Ind., Sept. 19.—The correction of criminal instincts by a surgical operation is the latest feat of the Juyenile court.

Jesse Beard, fifteen years old, was brought into the Juyenile court in March by his mother, Mrs. Matuda Beard, of No. 652 Arch street, and was Beard, of No. 652 Arch street, and was charged with being incorrigible. He had been away from home five days, and the mother and sister of the boy thought that he should be put in some institution where he could be managed. Pending an investigation of the case, Mrs. Helen W. Rogers, chief probation officer, and others of the court conceived the and others of the court, conceived the idea that a physical defect was re-sponsible for the lad's mental attitude. The mother and sister then remembered a fall received by the boy when three years old. He had struck his head on a rock in a stream where he was wading. Dr. Kohlmer's examination showed a concave formation of the skull where it should have been convex. Arrange-ments for an operation were made, but they were not carried out until July 5, as the boy had run away in the mean-

A Tokio cable says: the presence of the Russian warship Lena in San Francisco is exciting keen interest here, although the motive of the trip is not understood. One theory advanced is that Russia is endeavoring to test the attitude of America upon the legal questions involved. Another theory is that old surliness and ungovernable tempe

old surliness and ungovernable temper were gone; and he was perfectly amenable to the wishes of his mother.

The mind of the boy has cleared, and he seems extremely bright. It is believed that he will learn rapidly in school and make up for the worthless years. He understands what has happened to him and says he is yeary thank. ened to him, and says he is very thank

ful to the court and to the doctor.

He will enter a special school in connection with Shortridge High School maintained for truants and backward students, this week. The boy has not been in school for three years because of his incorrigibility, and at the time he was taken out of school he had reached only the second grade—the class of boys eight years old.

ROMANCE OF THE DESERT.

Sheikh Willing to Pay \$200 for Toronto

Toronto, Sept. 19.—A young Toronto lady has just become involved as the heroine of an adventureof an "Arabian Nights" flavor, and which contains the entials of an Oriental romance. lady in quetion is, not unnaturally, re luctant to allow her name to appear, She resides on Walmer road, however, and has recently returned from an extensive tour of Europe, Egypt and the Holy Land. It was in the last-named region Land. It was in the last-named region that the romance developed, and it was made clear that the graces of Canadian femininity are not less appreciated abroad than at home.

While in Jericho this lady became ac-

nainted with a Hebrew gentleman from erusalem, who had been converted to erusalem, who Christianity, and in addition to a thoroughly cosmopolitan culture, possessed a wide familiarity with the life of the Bedouin tribes of the desert. Through his introduction our Toronto tourist was enabled to visit a Bedouin encam near Jericho, and to see the details of life under the black tents as few foreigners have been privileged to do. And while she was observing these novel de-tails, the sheikh of the tribe was observing her wiht even greater interest. Jer-

icho succumbed to Toronto. The son of the desert promptly fell in love. The fair Torontonian, unconscious of the flame she had lighted, returned to the flame she had lighted, returned to latthough this itself is no task to be untable. The desert chieftain remained in his tent, presumably trying to think what to do. He could speak to think what to do. He could speak to the latthough this itself is no task to be undertaken lightly. The harbors visited included Work Channel, Portland Canal, Tuck's Inlet, Kitamaat, Bellacoola, Butte Inlet, Seymour Narrews, etc. to think what to do.

conceived the idea of making an ambassador of the Jewish gentleman who had introduced the lady to his camp. The lady had scarcely returned to Walmer Road when she was surprised

water Road when she was surprised to receive, through her Jericho acquaintance, a proposal of marriage from the sheikh. It was couched in Oriental elaboration of phrase, and was equally Oriental in substance. The sheikh offered a price of \$200 for the lady's hand, cash on delivery.

This however, was on condition that

This, however, was on condition that the future wife would consent to make the bread and churn the butter, which is done afresh for every meal in the Bedouin camp. In case she would be disinclined for this, the price would be only \$125, and the remaining \$75 would be used to buy a slave to perform these duties.

duties.

In any case the wife would be expected to perform the usual woman's work of drawing water from the wells and carrying wood for the fires. However, as the wells near Jericho were inconveniently situated, the sheikh declared himself willing to move his camp to any other bart of the desert that the lady should prefer. In fact, he was willing to make almost any concessions, and he hinted that his offer of \$200 might be stretched a little if it was too low. He was in no mood to stick at a few dollars more or less.

Accompanying the letter came a number of beautiful Oriental articles of clay and brass. These were sent by the gentlemans.

and brass. These were sent by the gen tleman of Jerusalem, and one, an Arabic coffee-pot of copper, had travelled, un-wrapped, through the mails from Jerusao Toronto without injury

Needless to say, the sheikh's offer will not be accepted. Lovers of the pictur-esque will perhaps regret this abortive ending to the romance. A Canadian princess of the desert would throw the the desert would throw the Am-"vicereine" of India into the

ROBBERS SURROUNDED

Big Reward Offered by C. P. R. and Express Company for Them.

press Company for Them.

Victoria, B. C., Sept. 19.—The vital arrests have been made in connection with the hold-up of the C. P. R. train on Saturday night, but it is thought that the robbers have ben surrounded by a posse of police just across the American side of the line, and their capture is expected shortly. The C. P. R. and Dominion Express Companies have offered a joint reward of \$5,000 for information leading to their capture, and the Proleading to their capture, and the Provincial Government has added \$500 ad ditional for each conviction. It is thought the Dominion Government will also offer a reward, as the mails were looted. Pinkerton's men have been called in to ad in the search.

G. T. PACIFIC PROBLEMS.

Mr. C. M. Hays and Party Return to Victoria.

Victoria, B. C., Sept. 19.—So far no counts in which British Columbia is interested with regard to the construc-tion of the Grand Trunk Pacific are left without illumination as the re-sult of the visit to the northern coast sult of the visit to the northern coast of British Columbia of Manager Hayes and party, who returned to Victoria this morning. They are not yet prepared to state where the terminus of the road to state where connect say whether conwill be; they cannot say whether construction will begin simultaneously at both ends, nor are they able to state whether a trans-Pacific fleet will be called into existence as the result of the building of the road. On this latter point, however, there seems to be among the members of the party less hesitancy than regarding the others. In the other two points alluded to President Hays is distinctly non-committal. He points out that it is not alone the question of good harborage which has to be decided, although this itself is no task to be un-

Rev. John Grenfell, daughter of the Rev. John formerly of Carleton Place, but now of Port Simpson, B.C., which occurred suddenly on Sept. 2nd.

A western Ontario farmer lost all his outbuildings the other day by a fire caused by friction in the shaft of windmill on the top of one of the barns. The application of a little oil would have prevented this loss.

The A. H. S Compensement will not be held until the completion of the town hall. This event usually takes place in October, but the impossibility of accommodating the large number who wish to attend has always seriously militated against its success.

-That a thorough business education pays is evidenced by the fact that the attendance at the Ottawa Business College, Ottawa, Ont. is four more than double that of last year for the same period. Oct. 3rd is a good time to enter. Wehave the school, we

The winter early closing by-law in Athens comes into force on Monday next, 26th. Its provisions are sum marized in the report of the village council meeting. The passing of such a law necessarily follows the presentation of a properly signed petition—the council has no option in the matter.

Delta Fair next Tuesday and Wednesday. Already the indications point to a great exhibit of all that is biggest and best in live stock, agriculers lined up as follows: ture, arts and manufactures. As a purely agricultural show, Delta is the peer of any county fair in the province, and as a good programme of sports and amusements is invariably Dowsley presented there is always a large attendance of visitors. Special rates on the B. W. & N. W.

Under the arrangement with Mr. Craddock pupils of the A. H. S. are privileged to take instruction in voice culture every Thursday afternoon, and it is probable that the same benefit will be secured for students at the A. M. S. Mr. Craddock's establishment of a studio here is viewed with pleasure by lovers of music in both village and country. The proposed choral society is regarded as likely to prove of very general benefit, and it should be heartily supported.

Despite threatening and unfavorable weather, Brockville Fair scored a great success. Fully 12,000 people were present on Wednesday. The bill of attractions was fully up to the mark, and in the halls their was a fine show ing, the exhibits made by Brockville business men being a particularly pleasing feature. The furnished rooms of Rob't Wright & Co. were universally admired, and G. L. Riches' display of musical instruments was constantly surrounded by a crowd. Those who did not see the Karn display will have an opportunity of viewing it at Delta.
