Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

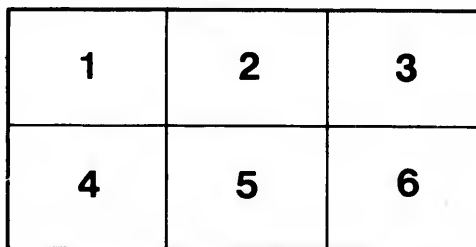

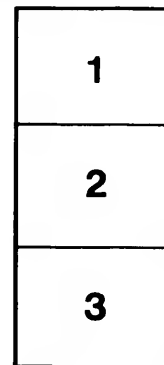

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

VALUABLE INFORMATION FOR BUSINESS MEN.

NOTES—Demand Notes are payable on presentation without grace, and bear legal interest after a demand has been made, if not so written. An endorser on a demand note is holden only for a limited time.

A Negotiable Note must be made payable either to bearer, or be properly endorsed by the person to whose order it is made. If the endorser wishes to avoid responsibility, he can endorse "without recourse."

A Joint Note is one signed by two or more persons, who each become liable for the whole amount.

Three days' grace are allowed on all time notes, after the time for payment expires; if not then paid, the endorser, if any, should be legally notified to be holden. Notes falling due on Sunday or on a legal holiday, are paid the day following.

Altering a note in any manner by the holder makes it void.

Notes given by minors are void.

The maker of a note that is lost or stolen is not released from payment, if the amount and consideration can be proven.

An endorser has a right of action against all whose names were previously on a note endorsed by him.

CANADIAN BANK NOTES.

Under the Banking Act, which went into effect 1st July, 1891, the Bank Notes of any Canadian Bank are redeemable at par in any part of Canada. Previous to this it was the custom of the Banks in one Province to charge a small commission for cashing the Notes of Banks in distant Provinces; this is now done away with.

Another important point is that under the new law, it is impossible for the holders of Notes of failed or suspended Banks to lose by them, for a fund has been established, and is now in the hands of the Government at Ottawa, amply sufficient to pay the notes of any suspended Bank. This fund, which is known as the "Bank Circulation Redemption Fund," was formed by a contribution from every Bank, graded according to circulation, and should it fall below a specified amount, owing to the payment from it of the notes of a failed Bank, the other Banks of the Dominion, must again contribute to make up the deficiency. In fact, strange as it may appear, such notes would be very likely to go to at premium at once, as by law they bear six per cent. interest from the time of the Bank's suspension until the day named for payment.

The amount of notes of any Bank in circulation at any time shall not exceed the amount of its unimpaired capital, subject to penalties varying with the amount of such excess.

The payment of notes issued by any Bank for circulation shall be the first charge on its assets in case of insolvency, any amount due to the Dominion Government shall be the second charge, and any amount due to the Provincial Government shall be the third charge.

Any Bank, when making payment, is compelled, if requested, to pay the same, or part thereof, not exceeding one hundred dollars, in Dominion notes, for \$1, \$2, or \$4 each.

TIDE TABLES FOR HALIFAX.

These Tide Tables, for Halifax and Quebec, with tidal differences for other places, are supplied by the Tidal Survey Branch of the Department of Marine and Fisheries of the Dominion of Canada. They are based upon direct observations of the Tides obtained by means of self-registering gauges which are kept in continuous operation day and night throughout the year. The records are reduced by the latest methods of analysis, and the computation of the Tables is made by Mr. E. Roberts, F. R. A. S., of the Nautical Almanac Office London. The Tidal Differences when applied to the Tide Tables, give the time of high and low water at other places in Standard Time. The differences applicable to the HALIFAX TABLES are derived from the Establishments given in the Acmiralty list. They will, therefore, be correct at full and change of the moon, approximate only at other times in the month.

TIDAL DIFFERENCES for the Atlantic Coast of Nova Scotia. These differences when applied to the Halifax Tide Tables, give the time of High and Low Water at the places named, in Standard Time, for the 60th Meridian; which is four hours slower than Greenwich Mean Time.

F. A. BURNHAM,
President:

The Motto of the Management is and will continue to be _____

“Good Work at Honest Cost; True Economy, and not its Shadow.”

Why you should insure in the Mutual Reserve

Its new Policy, with rates about 40 per cent. below the Old System, contains all the essential features of Life Insurance, viz.: In case of total disability half the face of the policy will be paid, a cash surrender value or extended INSURANCE after five years, premiums reduced by dividends after the eleventh year, &c.

It has a record unparalleled in the history of Life Insurance.

It has been the best abused Company in the world by its competitors, because it has saved its policy holders nearly fifty million dollars they would have had to pay the Old Line System, and gives infinitely better security.

SUCCESS IS THE ART OF SUCCEEDING.

Insurance in force,	\$330,000,000
Amount held in Canada,	37,000,000

The largest amount with a single exception of any Company on any plan in the Dominion.

WEATHER GUIDE.

The following Table (the result of many years' actual observation) is ascribed to Dr. Herschel. It is constructed upon a due consideration of the attraction of the Sun and Moon in their several positions respecting the Earth, and serves to show what kind of weather will most probably follow the entrance of the Moon into any of her quarters :—

Moon.	Time of Change.	In Summer.	In Winter.
If New Moon, First Quarter, Full Moon, or Last Quarter, happens	Between midnight & 2 A. M.	Fair.	{ Hard Frost unless wind be S. or W.
	" 2 and 4 A. M.	Cold with showers.	{ Snow and stormy.
	" 4 " 6 "	Rain.	{ Stormy and rainy.
	" 6 " 8 "	Wind and rain.	{ Stormy.
	" 8 " 10 "	} Variable.	{ Rain if wind W.
	" 10 " 12 "		{ Snow if E.
	At 12 Noon, and to 2 P. M.	Showery.	{ Cold and high wind.
	Between 2 and 4 P. M.	Very rainy.	{ Snow or rain.
	" 4 " 6 "	Variable.	{ Fair and mild.
	" 6 " 8 "	Fair.	{ Fair.
" 8 " 10 "	} Fair if wind be N. W. {	{ Frosty if wind N or N E.	
" 10 " midnight.		{ Rainy if S. or S. W. {	
		{ Ditto. Ditto.	
		{ Fair and frosty.	

The nearer midnight any of the Moon's changes occur, the finer will be the weather during the succeeding week; the nearer noon any of those changes happen, the more foul and wet will be the weather that will follow.

The Astronomical day is reckoned from Noon to Noon through the 24 hours. Thus July 21, 9h. is 9h. A. of July 21st, and July 21st, 15h. is 3h. M. of July 22.

The Sun's Declination and Equation of Time are given for Noon at Halifax, Apparent Time, *i. e.* when the True Sun is on the meridian.

The Moon's Southing is given in Astronomical Time for the Meridian Passage at Halifax; and her declination when on that meridian.

Both the rising and setting of the Moon are given for every day in the year.

To find the length of the day—subtract the time of sunrise from 12 hours, and to the difference add the time of sunset.

To find the length of the night—subtract the time of sunset from 12 hours, and to the difference add the time of sunrise next morning.

In this Almanac all the times except for Moon's Southing are Mean Time at Halifax, *i. e.*, Civil Time. The Moon's Southing is given for Astronomical Time at Halifax.

Standard time is 15 minutes earlier than Halifax Mean Time, and the Railway Time one hour later than Halifax Standard Time.

WEATHER GUIDE.

An observation said to have been made in London and Florence, extending over a period of fifty years, and observed in Halifax for the past thirty years, shows the weather will be the same as the last three days of the moon through the first three quarters taking a day for each quarter of the moon. It is necessary to make a calculation of the exact time of the beginning of each of the three days, making due allowance for difference of time between the lunar and solar day.

The weather will remain the same during the whole month as it is on the 5th, if it continues unchangeable on the 6th, and like the 4th day if the 6th resembles the 4th. Due observations must be made as to when the day begins, allowing for the difference of time as in the above.—*Com.*

APOTHECARIES HALL, 7 and 9 GEORGE ST., HALIFAX.

JANUARY —The modern farmer of the present day rarely fails in receiving a good return for his labour. This is the season to lay out his plans for spring crop. Potatoes and Indian corn yield best in a hot season, and not too wet, while oats, barley, peas, turnips, mangles and grass make most growth in comparatively cool weather and moist atmosphere. The occasional loss of the hay crop from drought shows that it is of the greatest importance for a farmer not only to make a judicious choice of crops suitable to the climate, and to the soils and exposures of his fields, but also to have sufficient variety in his crops, so that whether the season should prove a hot and dry one, or cold and moist, or of a medium or average character, he may fairly expect a profitable return. Other kinds of torage should also be sown, so that reliance may not be placed entirely

upon the hay crop for the winter feed of cattle. Let it be remembered that a moderately cool wet season will give a good hay crop, while a hot dry one will ensure scarcity of this most important article of fodder. To meet this a reasonable plot should be sown or planted with mangolds, turnips, or Indian corn. The latter is always advisable for ensilage in our varied climate and soils. No farmer should depend on hay alone for winter feed. All modern farmers in Great Britain, as well as many in Canada and the United States, use a mixed feed, or mashley as it is called, in the green state in summer time, and dried into hay, or for ensilage, in the winter. The following is a good mixture of seeds for mashley:—1 bushel broad horse beans, 1 bushel small peas, ½ bushel vetches, 1 oats. Or, 1 bushel peas, 1 bushel tares or vetches, 1 bushel oats. Or, peas, oats and wheat make an excellent mixed feed, to be cut quite green while the milk is in the kernel, for ensilage corn should be planted thin; twelve quarts (12) of seed is ample for one acre.

WOODILL'S LIVER, GOUT and RHEUMATIC PILLS

FEBRUARY is the most trying month for cattle; we cannot too strongly impress the necessity of care in their feeding, watering and general treatment, at this season of the year. In order to overcome the many difficulties that appear in February, it is a good rule to give extra time and attention to the stock. In feeding grain and meal always mix them into cut hay, moistened,—and season with common salt. Cut hay does not digest any more rapidly than uncut, but it enables the meal or crushed grain fed with it to be more perfectly digested. Our farmers still suffer immense loss every year in striving to fatten cattle on meal, bran and middlings fed alone, without being mixed with cut hay as here described. When fed alone the meal simply passes through the animals in an undigested form, and is thus lost. In districts where an Agricultural Society does not already exist this is a good time to organize; farmers have leisure to attend a meeting and take steps for organization. Notification has to be made to the

MARCH.—The kitchen garden, requiring but a small piece of ground, and yet one of the most valuable crops for the comfort of the home,—instead of finding on every farm a well-furnished kitchen garden, filled with vegetables and small fruits, sufficient for the family wants during the year and some to sell, such a luxury is the exception rather than the rule. There is no reason why every farmer's family should not be provided to a large extent with supplies from the garden, such as salads, rhubarb, early green peas, lettuce, radishes, cucumbers, early cauliflowers and cabbages, early beans, gooseberries, currants, strawberries, raspberries, winter radishes, turnips, beets, parsnips, artichokes, seasoning herbs, melons, squashes, and dozens of other delicious and substantial articles of food that cost nothing but foresight and some agreeable labor. Woodill's Pills for Rheumatism, G. A. STERNS, George St.

our climate necessitates the use of hot-beds for raising seeding plants for those crops that require a long season to mature. A hot-bed is made by piling on successive layers of fine, fresh horse dung, obtained from a stable where oats are freely fed. The manure may be raised to a height of two or three feet above the surface of the soil. On top, spread four or five inches of very fine and rich soil mixed with sand; this should have been prepared in the fall, and kept dry under cover all winter,— otherwise it is likely to become a hard frozen lump or mass. Glass sashes are then put on and kept close till the hot-bed heats. The steam and heat will soon start the seeds and growth will be rapid. In this way lettuce, radishes, etc., may be ready for the table quite early in the spring.

APRIL.—This is the month to begin seeding as soon as the soil is fit, and this can be done much earlier and more rapidly where the land has been ploughed in the fall. The farmer should be ready to avail himself of the early opportunities presented by the varying years. It is not wise to seed till the soil is comparatively dry, and little is gained by early sowing until the ground is warm. In fields seeded down with timothy last fall, it will now be time to sow clover,—a mixture of red and alsyke is the best for hay. Where early potatoes are required, the seed should be kept in a warm place so as to start the eyes, and, wherever the ground is dry enough, they may be planted. This advice if not

heeded will lead to potatoes coming up scantily, many rotting in the ground. If farmers instead of planting inert seed potatoes, taken out of a cold cellar, would first allow the eyes to start, there would be fewer complaints of the seeds perishing in the soil. Last year (1897) the spring opened early, but heavy and continuous rains through April, May and the greater part of June kept seeding back until very late from one end of the Province to the other, and as many farmers neglected the important matter of fall ploughing seeding was late, and in some parts farmers were unable to get the usual amount of seed in the ground.

A SURE CURE for RHEUMATISM are WOODILL'S PILLS.

MAY.—In most parts of the Province ploughing will still have to be done; let it be done as soon as the land is fit; if manure has to be taken out for crops, don't wait for a more convenient season; if the weather is not all that is desired proceed nevertheless with your work, vary it to suit the state of the soil and atmosphere. Men cannot fight successfully against the operations of nature, but they can very often turn them to advantage by consideration and forethought. What has to be sown and planted this month? *Everything*, except what has either already been committed to the soil, or requires a warm seed bed like the turnip. Exceptional crops also are bush beans, pole-beans, corn, tomatoes, cucumbers, squash; it is only in warm, sandy soils, and in districts not subject to night frosts in spring time, that such things can safely be put out before the

end of the month. One of the principal marketable crops in Nova Scotia is the potato. It has been found advantageous of late years to plant as early as possible; as soon therefore as the ground is in a fit condition, commit the potato to it; see, however, that the eyes of the seed have started into growth, otherwise it will be apt to rot in the cold seed bed. Neglect of this point, which has been urged again and again in the Farmer's Calendar of this Almanac, has caused the loss of countless thousands of dollars to our farmers. So important is the sprouting of seed potatoes before planting regarded in England that the seedmen have instructions thereanent printed on the labels, which they send out with the seed, assuring their customers that this is necessary in order to obtain

a satisfactory crop. In light lands the manure (old and well rotted) may be ploughed in before planting. In heavy soils, put the manure in the drills, so that the warmth of the air may counteract the deadening effect of the cold wet clods. Superphosphate and other artificial fertilizers may also be used.

JUNE.—Planting and sowing will still continue. Corn for ensilage should now be sown. But, while spring operations have to be continued and finished this month, there are others appertain'g more especially to the summer that have to be attended to. Garden crops will require hoeing and weeding; potatoes also when sufficiently advanced. It should not be forgotten that we have not only to sow and cultivate, but to protect our crops, if we would gather a profitable harvest. In localities subject to late spring frosts, it is easy to protect early

crops by throwing some spruce or other brush over them on cold nights method much used in France, and which may easily be adopted in this country is to burn brush to windward so as to cover the field in a cloud of smoke. Attention has often been called to such simple and costless devices, and yet year after year we hear of the loss of early crops: it is said "by frost;" we should "be neglect." The Colorado or potato beetle now challenges attention. The green and London purple are undoubtedly efficacious, but they are harmful as well as insecticides, and every precaution should be observed in their use by farmers, and in their sale by apothecaries and store-keepers. The poison is applied in mixture of ground plaster. Hellebore is also effective and less dan-

us, but too expensive where large fields have to be poisoned. As soon as the currant and gooseberry bushes have pushed out their first leaves and blossoms, it will be found advantageous to give them a sprinkling of white hellebore powder in the morning before the dew is off. This will destroy the first crop of currant worms, and thus preserve the bushes and the fruit crop for the season. The objection to the use of white hellebore on currant bushes (if used early enough in the season) is by no means so strong as to the employment of arsenical poisons, as the white hellebore being organic, decays, and is thus speedily rendered innocuous, by exposure to rain and air. Summer bedding plants are set out in the flower garden as early this month as the weather will allow; verbenas may be put out very early, and they thrive better in the moist, cool weather of early June than later, when the soil is apt to be baked by the sun.

Woodill's Pills for Rheumatism, G. A. STERNS, George S

Stocks are also very hardy and rejoice in hot, dry weather, if they are in good soil. Balsams, Phloxes, Petunias, Geraniums, Heliotropes, and other tender things need not be put out so early, as they will make no progress in cool weather, and the slightest approach to frost will kill them for the season.

JULY.—This month is especially devoted to the cultivation of the various field crops. Cultivation, in this restricted sense, means the hoeing of crops, stirring by cultivators and harrows, and such like implements, between or over the drills, hilling up and moulding. The object of these operations are not merely to destroy weeds, as is commonly supposed by many, but to keep the soil open, and thus promote the decomposition of the manure, to enable the soil to retain moisture.

ture, allow the free access of air to it, bring it well over and around the roots and stems, and, by those several means, to promote vigorous growth. The sowing of turnips is usually recommended for the month of June, but as the ground has to be remarkably fine for this crop, and as turnips are often put in to fill up land that was originally intended for the earlier sown roots, it frequently happens that turnips have to be sown in July. In fact, if turnips are sown early in June, they are apt to run to seed, instead of forming bulbs. Some even prefer to sow their Swedes early this month instead of June, so as to avoid the well-known "fly" which attacks the young seeding plants, and the soft turnips for immediate feeding need not necessarily be sown till the end of July, although if they get warm, genial weather to start with they do much better earlier. Late sowing while it is apt to give a small yield, ensures excellent quality and freedom from

fibre, so that turnips intended for table use in winter should never be sown early. The ground should have undergone a thorough pulverization. Light sandy soil is the best for turnips. They start better after the ground is warm, but the bulbs swell most rapidly during the cold dewy nights in Autumn. The soil cannot be worked too deep, nor made too fine, for turnips; the surface soil must be made fine for a seed bed. Fown manures are valuable for this crop, and crushed bones have been applied with best effects, either when covered in the drill's in the manner of ordinary dung, or preferably, when sown by machine along with the seeds, so as to be in immediate contact with the latter. WOODILL'S LIVER, GOUT and RHEUMATIC PILLS

every season, and this necessarily employs for the time a large amount of labour. However, where suitable implements and appliances are used there is now no difficulty in securing the crop. After haying there will be work in top-dressing the hay-fields, and in the garden and orchard. Where the trees are in grass they will benefit by a rich top-dressing around their roots. Look after the ripening fruit, destroy the caterpillars, if any still remain; pick the early August apples, and send them into a local market or to the picnic. When the rain comes beds of strawberries may be made up. See that the ground is well drained and enriched with old manure. Mushrooms now appear in horse pastures, house flies become troublesome, and the swallows congregate in flocks and leave us.

SEPTEMBER.—Grain has to be harvested. Late in the month Indian corn will have to be cut and put into the siloes. The ensilage forms an excellent supplement to the hay and roots, but ensilage is still used to only a very limited extent. Later in the month, potatoes of the earlier kinds, and earlier planted, will be ready to be taken up, but while the weather remains warm they should be well aired before being put into the cellar, and only in small quantities at a time. The most experienced farmers usually wait for cold weather before taking up their fall crop. The farmer's year is a complete cycle, and before one year's annual harvest is taken in it is needful to be preparing for the next. In fact it is already time, in September, to sow Winter Rye, which is a favorite crop with farmers who have suitable, light, sandy soils. It is also a valuable crop for yielding green feed in the month of May, when it is much required. This is the month

OCTOBER.—The apple crop is yearly acquiring increased importance in Nova Scotia, and our apple orchards are annually extending. But there is still plenty of room, and no farmer who has suitable land, and is willing to take the necessary care, can make a better permanent investment than by planting an orchard. The best market varieties, at least those that appear at the present to be most in favor among our fruit growers in the counties of Kings and Annapolis, where

admitted. No fees are charged, and students are paid for their work on the farm. Students are not boarded on the farm, but can obtain comfortable board and lodging in Truro at very reasonable rates. The School of Agriculture, which is also aided by the Provincial Treasury, is situated at Wolfville, under direction of N. S. Fruit Growers' Association. Here the several gardening operations, propagation of plants and management of orchards are taught.

NOVEMBER.--To ensure the improvement of cattle, every Society keeps or ought to keep a sufficient number of male animals for the use of members. For beef cattle grades of the Short Horn Durham, Polled Angus, Galloway, and Hereford are used. For milk alone, or the cheese factory, Ayrshires are to be pre-

ferred. Devons make the best working oxen, are quick, active and easily fed, and soon fatten in the wild pastures for beef. For domestic cows, and butter making, Guernseys or Jerseys are the most suitable. The Jerseys have been great favorites, and the increase will promote the manufacture of butter, but it threatens to lessen our capacity for beef production. Fall ploughing will be the principal field work this month. After ploughing do not forget to go carefully over the water furrows to make way for the exit of the rain and melting snows that are sure to flood your fields before seed time. A well ploughed, well drained field may be sown in spring as soon as the frost is gone, while one that is irregularly ploughed or has no water furrows, may long remain a puddle, defying every attempt to improve its condition, until the season is so far advanced as to reduce very much the prospect of a crop. The best part of what is too often left to be "Spring work," can be done in the month of November. At the same time care should be taken not to open up gravelly banks or hilly land, subject to be scoured by the Fall or Spring rains, or melting snows. Every season brings loud complaints of the winter-killing of grass in the hay fields. It may possibly be of use to some farmers to say that the winter-killing is merely

another name for neglect. If a hay field not on a dead level is drained simply by running water furrows with a plough to carry off surface water there will be no winter-killing. Where land is perfectly flat a more effective system of draining must be adopted. The want of the simple water-furrow costs the farmers of this province many thousands of dollars every year, and is often the real cause of the burnt up hay fields that are attributed to drought. Too much importance cannot be laid on fall ploughing; it enables farmers to get in larger crops, and much earlier, and the winter action of frosts has a decided tendency to increase the yield.

DECEMBER.—Agricultural improvement is encouraged and promoted in various ways by the Provincial Legislature in aid of Agricultural Societies throughout the Province, with a membership of about six thousand farmers; each society is entitled to draw from the Provincial Treasury an annual grant in

aid to promote its operations. The special purpose of a Society is to improve the live stock of the district, which is accomplished by obtaining and keeping for the use of its members superior male animals, such as bulls, rams and boars. Societies may also, by permission, introduce seeds of new varieties of grain, roots, and also improved implements, and sell them to members at cost and charges. The whole of the Societies of the Province meet annually on the first Tuesday in November, each in its own district, when the members of each Society receive their Director's report, and elect officers for the ensuing year. Full information as to the method of organizing societies, the grants given in aid, and other particulars, may be obtained on application at the Office of Agriculture, Old Province Building, Halifax. In addition to these organizations there is the Nova Scotia Farmer's Association, which meets once a year with delegates from all the Societies of the Province. A register of thoroughbred cattle is kept at the Office of Agriculture, where blank forms of application for registry can be obtained. The printed Herd Register of Nova Scotia Cattle can be obtained from any bookseller for a dollar.

Nova Scotia Game Laws.

The Nova Scotia Game Society has issued an abstract of the game laws of the Province. Sportsmen would do well to peruse them carefully. They are as follows:

MOOSE, CARIBOU.

Close season from January 15th to September 15th.

No person shall kill more than two moose and two caribou.

Meat must be taken out within ten days from killing.—Penalty for breach of foregoing provisions, \$50 to \$200.

No person shall have in possession any green hide or fresh meat from January 20th to September 15th.—Penalty \$25 to \$50.

No person shall set any snare or trap for moose or caribou.—Penalty \$50 to \$100.

No person shall hunt moose or caribou with dogs.—Penalty \$50 to \$100.

All dogs so hunting may be destroyed by any person.

Close season for American elk or red deer till October 1st, 1904.—Penalty \$50 to \$100.

Provision protecting cow moose, repealed.

Any person bringing moose or caribou meat to Halifax, or any incorporated town, for sale, shall bring neck and forelegs and keep them exposed till all meat is sold. Penalty \$50. Any member or agent of Game Society, game commissioner, police officer or constable is authorized to examine or mark game, and resistance to him is a violation of the law.

BIRDS.

Partridge—Close season Dec 1st to Sept. 15th. Woodcock, snipe, teal, blue-winged duck, wood duck: close season March 1st to Sept. 1st, Save in Cape Breton, where close season for all birds except partridge is March 1st to August 20th. Partridge same as in N. S.

No person shall kill woodcock between sunset and sunrise. No person shall have any bird in possession in close season.

No snare, trap or net shall be used for partridge or any other game bird, at any time.

Any snare for hares or rabbits shall be of "rabbit wire," not slighter than number 21.

Penalty for breach of provision as to birds \$5 to \$10 for each bird.

Pheasants, spruce partridge, &c.—Unlawful to hunt, kill, or have in possession, pheasants, spruce partridge, blackcock, capercaillie or sharp-tailed grouse.—Penalty, \$5 for each spruce partridge, \$25 for each of the other birds. Unlawful to have in possession, buy or sell eggs, or injure or destroy the nests of any native birds.—Penalty \$5 to \$10.

RABBITS, HARES.

Close season from February 1st to October 1st.

No person shall have them in possession from February 5th to October 1st.

No snares shall be set for rabbits or hares in close season.

Clear space of 100 feet must be left between each hedge and the nearest hedge. All snares or hedges unlawfully set may be destroyed. No hedge shall exceed 50 feet in length.—Penalty for each offence, \$5

No person shall hunt or kill at any time any Newfoundland hare or rabbit.—Penalty \$10.

BEAVER.

No person shall hunt or kill any beaver until after the 1st day of November, A. D. 1900.—Penalty for each offence, \$100.

OTHER FUR-BEARING ANIMALS.

Mink.—Close season March 1st to November 1st. For all other fur-bearing animals, except bear, wolf, loup-cervier, wildcat, skunk,

All goods not enumerated as charged with any duty of Customs and not declared free of duty, shall be charged with a duty of 20 per cent.

ad valorem, when imported into Canada, or taken out of warehouse for consumption therein.

The following articles, being the natural product of the manufactures of the colony of Newfoundland, are exempted from Customs duty when imported into Canada, viz. :

Fish and other product of the fisheries.

SHIPS' SUPPLIES.

The following list comprises the articles which may be entered ex-warehouse, free of duty, as ships' stores for vessels leaving a Canadian port to a port outside the Dominion on a voyage which is not supposed to last less than 30 days out and home :

The privilege is extended to fishing vessels, when engaged in the Gulf or deep sea fisheries.

Bread and Biscuits, Butter, Coal for steamers on outward voyage to British or foreign ports, Coffee, Cocoa or Cocoa Paste and Chocolate, Dried or Canned Fruits, Flour and Meal, Lard, Meats salted, dried or canned, Molasses, Rice, Split Peas, Sugar, Syrups, Tea, Vinegar, Coal Oil and Tobacco.

Quantities so entered to be whole packages and carefully proportioned to the length of the voyage, and the number of hands to be supplied, in accordance with the ordinary rate of rations allowed in merchant ships.

ARTICLES PROHIBITED.

The importation of the following articles is prohibited, and any such goods, if imported, shall thereby become forfeited to the Crown, and may be destroyed, and any person importing any such goods, causing or permitting them to be imported, shall for each offence incur a penalty of two hundred dollars.

Goods manufactured or produced wholly or in part by prison labor, or which have been made within or in connection with any prison, jail, or penitentiary. Also, goods similar in character to those produced in such institutions, when sold or offered for sale, by any person, firm or corporation having a contract for the manufacture of such articles in such institution, or by agent of such person, firm or corporation, or when such goods were originally purchased from or transferred by any such contractor.

Oleomargarine, Butterine, or similar substitute for butter.

Books, printed papers, drawings, paintings, prints, photographs or representations of any kind of a treasonable or seditious, or of an immoral or indecent character.

Coin, base or counterfeit.

Reprints of Canadian Copyright Works, and reprints of British Copyright Works, which have been also Copyrighted in Canada.

Tea adulterated with spurious leaf or with exhausted leaf or containing so great an admixture of chemical or other deleterious substances as to make it unfit for use.

EXPORTS PROHIBITED.

The export of Deer, Wild Turkeys and Quail, partridges, prairie fowl, and Pheasant, in the carcase or parts thereof, is hereby declared unlawful and prohibited and any person exporting or attempting to export any such article shall, for each such offence, incur a penalty of one hundred dollars, and the article so attempted to be exported shall be forfeited, and may, on reasonable cause of suspicion of intention to export the same, be seized by any officer of the Customs, and if such intention be proved shall be dealt with as for breach of the Customs Laws, provided, that this section, shall not apply to the export, under such regulations as are made by the Governor in Council of any carcasses or part thereof of any deer raised or bred by any person, company or association of persons upon their own lands.

RECIPROCAL TARIFF.

On all the products of countries entitled to the benefits of this Reciprocal Tariff, under the provisions of Section 16, the duties mentioned in Schedule "A" shall be reduced as follows:—

On and after the twenty-third day of April, 1897, until the thirtieth day of June, 1898, inclusive, the reduction shall be in every case one eighth of the duty mentioned in Schedule "A," and the duty to be levied, collected and paid shall be seven-eighths of the duty mentioned in Schedule "A."

On and after the first day of July, 1898, the reduction shall in every case be one-fourth of the duty mentioned in Schedule "A," and the duty to be levied, collected and paid shall be three-fourths of the duty mentioned in Schedule "A."

Provided, however, that these reductions shall not apply to any of the following articles, but such articles shall in all cases be subject to the duties mentioned in Schedule "A," viz.:—wines, malt liquors, spirits, spirituous liquors, liquid medicines and articles containing alcohol, sugar, molasses and syrups of all kinds, the product of the sugar cane or beet root; tobacco, cigars and cigarettes.

All articles, excepting those enumerated in the last paragraph, being the produce or manufacture of Great Britain and Ireland, and of New South Wales, when imported direct therefrom, are entitled to the benefit of the Reciprocal Treaty. One-eighth until 1st Aug., 1898, to Belgium, Germany, France, Algeria, the French Colonies, Argentine, Austria, Hungary, Bolivia, Columbia, Denmark, Persia, Russia, Sweden, Tunis, Venezuela, and Switzerland as well as Great Britain and Ireland.

FRANCO-CANADIAN TREATY.

The Franco-Canadian Treaty went into force on the 14th October, 1895.

It provides, that the advantages granted to France, Algeria, and the French Colonies, shall be extended to Great Britain, to the several British colonies and possessions, as also to the following foreign countries with respect to their commerce with Canada, provided that satisfactory proof of the origin of the article imported is given to Collectors at the time of entry, viz.:—

Argentine, Austria Hungary, Belgium, Bolivia, Chili, Columbia, Costa Rica, Germany (Zollverein, Muscat, Norway, and Sweden, Russia, Salvador, and Spain.

The following are the articles mentioned in the Treaty, with their respective duties, viz.: -

LOUISBURG RANGE LIGHTS.—It is proposed to establish two small towers for range lights to lead in through deepest water in the channel. They will be built on the low land, N. 67° W from the entrance.

NAG ROCK, Louisburg Harbor.—A conical iron buoy, painted red, is moored in 30 feet water, on the W extremity of the shoal extending from Nag Rock to mark the turn in the deepest channel.

The two red spar buoys marking the shoaler water channel off Nag Rock, are distinctively marked as follows:—The outer or more southerly buoy has a cone shaped top mark, and the second or more northerly buoy has a spherical top mark.

A bell buoy is placed at the entrance to Louisburg harbor; it is black with "LOUISBOURG" in white letters on the deck; moored in 13 fathoms, and is $1\frac{1}{2}$ cables east from centre of harbor shoal. Lat N. 45° 54' 13", lon W. 59° 56' 30". From the buoy, light bears N. W. by N $\frac{1}{2}$ N six-tenths of a mile. Leaving the buoy $\frac{1}{2}$ cable on the port hand, a N W by W. course will lead in through mid-channel.

LOUISBURG Automatic Whistling Buoy, in 36 fathoms water, 3 miles S. E. by S. $\frac{1}{2}$ S. from Louisburg lighthouse. lat N. 45° 52' 43", lon W. 59° 53' 44". From the buoy a N. W. by N. $\frac{1}{2}$ N. course leads direct for the lighthouse and will bring a vessel to the Bell Buoy, which she should round, leaving it on the port hand.

An Automatic Signal Buoy in 30 fathoms $1\frac{1}{2}$ miles S. E. $\frac{1}{4}$ E. from light-house. From this buoy a course N. W. by W. will clear the Broad Shoal, and lead to the fairway of Louisburg Harbor. Taken up about December.

MAINADIEU, on south side of west point of Scatterie Island, lat 46° 0' 30" N., lon 59° 47' 30" W., fixed red catoptric light, 90 feet high, white square wooden building, height 40 feet, visible 10 miles.

SCATTARIE, north-east point of Trap Rock, lat 46° 2' 15" N., lon 59° 46' 15" W., white catoptric revolving light, visible a minute, eclipsed half a minute, visible 15 miles, 90 feet high, white octagonal building, height 70 feet. The light should never be brought to bear to eastward of N. N. E., or to southward of S. S. W., nor approached nearer than $1\frac{1}{2}$ mile. Life boat is stationed here.

Fog Whistle near the light-house. Sounds two blasts of 5 seconds, with interval of 10 seconds, in every minute.

COW BAY.—Light discontinued.

FLINT ISLAND, on island, lat 46° 11' N., lon 59° 45' 55" W., white, catoptric light, revolving every 15 seconds, visible 12 miles, 65 feet high, white octagonal building, height 43 feet. Visible around horizon.

LINGAN HEAD, north side of entrance to Bridgeport Harbor, lat 46, 14' 10" N., lon 60° 2' 10" W., fixed red catoptric light, visible 10 miles 50 feet high, white square wooden building, height 20 feet. For guiding vessels into Bridgeport Harbor.

LOW POINT, Flat Point, east side of Spanish Bay. Sydney Harbour, lat 46° 16' 20" N., lon 60° 7' 16" W., fixed white catoptric light, visible 14 miles, 70 feet high, building octagonal, red and white vertical stripes, height 51 feet. Marine Telegraph and Signal Station.

SYDNEY BAR, on west end of South Bar, lat 46° 12' 26" N., lon 60° 12' 30" W., fixed red catoptric light, visible 10 miles, 30 feet high, white square wooden building, height 20 feet.

CRANBERRY HEAD, fog horn, on northern side of Spanish Bay, entrance to Sydney Harbour, lat 46° 15' 53" N., lon 60° 12' 7" W. A steam fog trumpet sounds a blast of ten seconds duration every minute.

POINT ACONI, on high cape, north side of entrance to Little Bras d'Or, lat $46^{\circ} 19' 30''$ N., lon $60^{\circ} 17' 10''$ W., fixed red catoptric light, visible 11 miles, 91 feet high, square white wooden building, with dwelling attached, height 20 feet. For guiding vessels into Little Bras d'Or.

POINT ACONI BUOY, lat N. $46^{\circ} 21' 0''$, lat. W. $60^{\circ} 16' 27''$. An iron can buoy painted black with Point Aconi in white letters on top is moored in 7 fathoms water, $\frac{3}{4}$ mile E. by N. $\frac{1}{2}$ N. from the extreme of Point Aconi.

BLACK ROCK POINT, south side of entrance to Big Bras d'Or, lat $46^{\circ} 18' 30''$ N., lon $60^{\circ} 23' 20''$ W., fixed white catoptric light, 45 feet high, white square building, height 23 feet. White cross on red ground. Visible 12 miles.

CAREY'S BEACH, N side of entrance to Big Bras d'Or, $46^{\circ} 17' 45''$ N., lon $60^{\circ} 25' 0''$ W. Pole light red. Visible 5 miles.

MCNEIL BEACH, Big Bras d'Or, a pole light. Red. Visible 5 miles.

MCKENZIE'S POINT, N. side of Bras d'Or Lake, about 2 miles S. W. of Port Bevis, lat $46^{\circ} 7' 15''$ N., lon $60^{\circ} 39'$ W., fixed white catoptric light, visible 14 miles, 95 feet high, square white wooden tower. For guiding vessels through Bras d'Or Lake.

KIDSTON ISLAND, on N. E. Point, at entrance to Baddeck Harbor, N. side of Bras d'Or Lake, lat $46^{\circ} 5' 58''$ N., lon $60^{\circ} 44' 20''$ W., fixed red catoptric light, visible 7 miles, 31 feet high, square, wooden building, white.

LITTLE NARROWS, eastern entrance, lat $46^{\circ} 0' 0''$ lon $60^{\circ} 58' 25''$. One fixed white light, visible 10 miles, white, square, wood, 35 feet high. Catoptric.

"**WHYCOCOMAGH**," on **FRASER'S POINT**, north side of St. Patrick's Channel, lat $45^{\circ} 57' 57''$ N., lon $61^{\circ} 4' 30''$ W., fixed red light, shown from a dioptric lantern, hoisted on a mast 25 feet high, with a shed painted white at its base, visible 5 miles.

GILLIS POINT, on N side Little Bras d'Or Lake, and W side of entrance to Boulacut Harbour, lat $46^{\circ} 1' 32''$ N., lon $60^{\circ} 45' 18''$ W., dioptric, fixed, white, 74 feet above water, visible 12 miles, building wood, square, tower, dwelling attached.

GRAND NARROWS, Railway bridge with swing has been erected. Red light will show up and down Channel when swing is closed, green when open. Lat $45^{\circ} 57' 42''$ N, lon $60^{\circ} 47' 33''$ W. A white light is also shown, directly over the red and green lights, from a lens lantern hoisted on the bridge frame, visible 7 miles.

PIPERS COVE, on western bend of Derby Point, Grand Narrows, lat $45^{\circ} 56' 30''$ N, lon $60^{\circ} 47' 46''$ W, fixed red dioptric light, 77 feet above high water mark, visible 11 miles, white square wood. Building 38 feet high.

CAMPBELL ISLAND, on east side of I., N side of entrance to McKinnon Harbour, lat $45^{\circ} 54' 46''$ N, lon $60^{\circ} 55' 54''$ W, fixed white light.

SEAL ISLAND, south point, $\frac{1}{2}$ mile from shore lat $43^{\circ} 23' 34''$ N., lon $66^{\circ} 10' 52''$ W., fixed white light, dioptric, 2nd order, visible 18 miles, 98 feet high, white octagonal building, height 60 feet. The Blonde Rock lies S. by W. $3\frac{1}{2}$ miles from light house. Between this Rock and the Island there are some dangers, the ground is rocky throughout, and large vessels ought not to attempt passing between them. A fog whistle near light house, during fogs and snow storms, sounds in each minute a blast of 5 seconds duration, and after an interval of 5 seconds gives another blast of 5 seconds, with an interval of 45 seconds. Life-boat station.

BLONDE ROCK, an automatic whistling buoy has been placed in 13 fathoms water about $\frac{1}{2}$ mile S $\frac{1}{2}$ E from the Rock.

PEASE'S ISLAND, on the south point of Pease's Island, one of the Tusket Islands, Yarmouth County, Nova Scotia, lat $43^{\circ} 37' 35''$ N., lon $66^{\circ} 1' 40''$ W. The main or sea light is revolving catoptric, showing alternately red and white, each color visible for 15 seconds, with intervals of 45 seconds between the flashes. It is elevated 56 feet above high water mark, and in clear weather should be seen 12 miles from all points of approach from the southward, and also through the Schooner and Ellenwood Passages. A fixed red catoptric light is shown from a window in the tower, 16 feet below the main light. It is intended to mark the channel between the two dangers known as the Old Man and Old Woman Rocks, and is, therefore, visible between the bearings W. by N. $\frac{1}{2}$ N., and N. W. by W., and in no other directions. It should be visible 4 miles. The tower is a wooden building, painted white, and consists of a square tower 42 feet high from base to vane on lantern, with a keeper's dwelling attached. Hand horn answers signals from vessels.

CANDLEBOX ISLAND, N entrance to Schooner Passage, lat N. $43^{\circ} 39' 34''$, lon W. $66^{\circ} 2' 45''$, fixed red, dioptric, elevated 56 feet, visible 8 miles, white, square tower, with dwelling attached.

BIG MIMINEGASH, 500 feet south of breakwater, lat $46^{\circ} 53' N.$, lon W. $64^{\circ} 13'$. Fixed red and white catoptric light; 30 feet high, visible 5 miles. Lantern on a mast with white shed at base. Shows red from N. E. round through E. to S. covering Miminegash Reef, and white from S. to S. W. by W. which includes line of range. Vessels N. of reef bearing westward will be clear of it when red disappears.

Rix's Point, 1 mile S. $\frac{1}{2}$ W. from front light; fixed white catoptric light, 45 feet high. Lantern on a mast with white shed at base. Shows over a small arc on each side of the line of range. These lights in line lead to the outer end of N breakwater.

NORTH POINT, on point, lat N. $47^{\circ} 3' 46''$, lon $63^{\circ} 59' 10''$ W., white catoptric, revolving one minute; height 80 feet, visible 14 miles. White octagonal, wood, surmounted by a red iron lantern, dwelling near by.

ST. PETERS.—Two range lights, white, catoptric. Buildings white square wood. Out r 18 feet S. W. from outer end of breakwater. The back range light 1458 feet S. by W. from the front light. Buoys indicate best channel. Lat N. $46^{\circ} 26' 40''$, lon W. $62^{\circ} 44' 50''$.

SAVAGE HARBOUR.—Two range lights, white catoptric, shown from lanterns on masts with brown sheds at base. Outer light on McEachren's farm on inner shore of harbour, lat N. $46^{\circ} 25' 40''$, lon W. $62^{\circ} 48' 30''$. Lights in range lead to mid-channel buoy outside bar. Vessels open the lights on starboard bow, after passing buoy, until inner fairway buoy is reached, where channel leaves range. Only 5 feet water on bar at low tide. Outer light liable to be moved.

TRACADIE.—Two range lights, red lat N. $46^{\circ} 25' 35''$, lon W. $63^{\circ} 2' 30''$. Outer light on beach W. side entrance 1800 feet back from shore line. Open square frame work. Back tower, white, square wood 28 feet high, 1200 feet S S. W. from front. In one, lead in about S. W. by W. past the buoys, leaving the buoy outside bar on on starboard, buoy inside bar on port hand. Not more than 5 feet water on bar. Positions of both towers liable to be changed to suit the shifting of the channel.

COVE HEAD.—Two range lights, showing white lights from lanterns hoisted on masts, lat N. $46^{\circ} 26' 10''$, lon W. $63^{\circ} 8' 45''$. Front light close to edge of sand beach at entrance to harbour. Back light 600 feet from front.

NORTH OR GRAND RUSTICO.—Two range lights. Back light, west side of entrance to harbour, lat N. $46^{\circ} 27' 42''$, lon W. $63^{\circ} 17' 15''$, white square wood with dwelling attached, 35 feet high, shows fixed white light, catoptric, 40 feet above high water mark. Front range light 225 feet from main light, shows fixed red light from lantern hoisted on mast, 22 feet above high water. The alignment leads to black can buoy outside bar in 13 feet water, after passing which vessels must open lights leaving them on starboard side to clear breakwater on N. side of entrance to harbour. A small spar buoy marks outer extremity of breakwater, of which the part above water has been carried away. Outer light liable to be moved to suit channel.

NEW LONDON.—Two range lights visible over 110° between Sim's Point and sand hills on E. side of harbour. In range they show the entrance to the harbor. Outer range light liable to be moved to suit shifting of the channel. The outer light is a white square wood, open framework below, brown 21 feet high, showing a white catoptric light, elevated 24 feet above water. The back light is on beach 1500 feet S. W. of main light, building white square wood with dwelling attached. Iron lantern brown, height 35 feet from base to vane. Shows a fixed red catoptric light, elevated 45 feet above high water. Lat N $46^{\circ} 31' 10''$, lon W. $63^{\circ} 28' 52''$.

DARNLEY POINT, lat N. $46^{\circ} 34' 0''$, lon W. $63^{\circ} 39' 0''$. Two range lights, red, lanterns on masts with white shed at base. Diamond beacon extends from top of mast to roof of shed. Front range near shore line $6\frac{1}{2}$ cables south-easterly from C. Aylesbury. Back range 1341 feet S. W. by W. from front range light. Alignment leads to black can buoy at Eastern Passage over bar at entrance to Malpeque harbor.

Vessels entering keep the alignment until they bring the Fish Island lights in one.

FISH ISLAND, lat N. $46^{\circ} 34' 52''$, lon W. $63^{\circ} 42' 17''$. Entrance to Malpeque or Richmond Bay, white square wood with dwelling attached, on inside of island, 46 feet base to vane, fixed white catoptric light, 50 feet high. Front range 1200 feet S. E. by E $\frac{1}{2}$ E. from main light, open frame work, lantern white, fixed white light 18 feet high.

Darnley Basin range, 400 feet S. by E. $\frac{1}{2}$ E. from main light. Fixed red light, shown from lantern on mast, 18 feet high. The main light is a sea light, the smaller one in range with it shows the channel over the bar with 15 feet, and ranging with the fairway buoy inside the bar, whence the channel is marked by the harbour buoys. There is a 13 foot spot between the Eastern Passage buoy and the fairway buoy.

LITTLE CHANNEL—Two range lights, fixed white, lat N. $46^{\circ} 40' 0''$, lon W. $63^{\circ} 52' 40''$. Outer light on Conway Inlet, N. side, white square wood, with kitchen attached 30 feet base to vane, light fixed white catoptric 26 feet above water. Front range 200 feet from main light, open framework, lantern white, fixed white light, catoptric, 16 feet high. In one, lead through channel with 5 feet at entrance to harbour. There is a ballast heap in the alignment at the point of the S. sand hill, to pass this the front light must be opened to N. Outer light liable to be moved to suit the change in the channel.

SANDY ISLAND.—Coast light S. W. part of island, entrance to Cuscumpec, lat N. $46^{\circ} 48' 22''$, lon W. $64^{\circ} 2' 20''$. White square wood with dwelling attached, 41 feet base to vane, fixed white catoptric light, 45 feet above high water, visible 12 miles.

Northport Range Lights. The masts heretofore in use have been substituted by two open skeleton lighthouse towers. Each tower is an open framed wooden building surmounted by a square wooden lantern. and has its side facing the channel slatted to make it a more conspicuous leading mark. The whole building is painted white. Both lights are fixed red and should be visible 3 miles on the line of range. The front tower stands on a bank 990 feet W. $\frac{1}{4}$ N. from the position formerly occupied by the front range mast near the outer end of the Queen's wharf. It is 29 feet high from the ground to the vane of the lantern. The light is 31 feet above high water. Lat N. $46^{\circ} 48' 16''$, lon W. $64^{\circ} 2' 6''$. The back range tower stands 1125 feet W. $\frac{1}{4}$ N. from the front one and is 41 feet high and the light is elevated 42 feet above high water mark.

Vessels entering Cuscumpec harbour keep the Savage Island range lights in one until the Northport range lights are nearly closed when they should change their course for the Northport range, being careful not to overrun the line of range, as the channel at the point of intersection is narrow and the tide strong. The Northport range leads in to the wharf clear of all obstructions.

BIG TIGNISH.—Two range lights. Back range light on beach at inner end of N. breakwater pier. Lat N. $46^{\circ} 57' 35''$, lon W. $63^{\circ} 59' 20''$. Building white square wood, with a black horizontal band 33 feet high. Fixed white catoptric 35 feet high, visible 11 miles. Front light on outer end of N. breakwater pier 620 feet S. E. $\frac{1}{2}$ E. from main light. Fixed red light is shown from a lantern on a mast with white shed at base. Light elevated 18 feet above high water mark, and visible 5 miles. These two lights in range guide N. W. $\frac{1}{2}$ W. between the breakwaters.

The stamps issued by the Canadian Post Office Department, are of the following denominations, viz.: postage stamps, ½ c., 1 c., 2 c., 3 c., 5 c., 6 c., 8 c., 10 c., 15 c., 20 c. and 50 c.; 1c., 2c., 3c. letter cards and 1 c. and 3 c. envelopes are also supplied.

Post Cards are issued at one cent each, and may be sent to any address in Canada or United States. Reply Post Cards (2 cts.) may be sent to any address in Canada or the United States. Post cards are also issued at two cents each for transmission to the United Kingdom, Newfoundland, St. Pierre et Miquelon, and certain foreign countries. Post Bands are for sale at the rate of \$1.25 per hundred.

1st Class Matter.

Includes Letters, Post Cards, Legal and Commercial Papers wholly or partly written, (with the exception of those specially exempted,) and all matter of the nature of a letter or written correspondence.

174

POST OFFICE DEPARTMENT.

The letter rate for Canada, Newfoundland and the United States is 3 cents per oz., and for other countries 5 cents per $\frac{1}{2}$ oz.

Letters addressed to any place in Canada upon which any postage has been prepaid by stamp, are to be forwarded to their destination charged with double the amount of the postage thereon not so pre-paid, which amount is to be collected on delivery.

Letters addressed to places in Canada or in the United States, wholly unpaid, and letters addressed to the United States on which at least one full rate (3 cents) has not been prepaid, are sent to the *Dead Letter office*.

RE-DIRECTED LETTERS.

Letters re-directed to places in Canada, the United States and Postal Union Countries, *without being taken out of the post office, or if handed back to post office as soon as possible after delivery therefrom*, are not liable to any additional postage.

REQUEST AND ADDRESS LETTERS.

Letters for places in Canada, Newfoundland and the United States sent in envelopes having printed thereon a **REQUEST** that the letters be returned to the sender, or bearing on the corner the printed address of the sender, will be returned direct to the senders instead of being sent to Dead Letter Office.

POST CARDS.

For Canada and the United States, one cent each. For Great Britain, Newfoundland and all Postal Union Countries, two cents each. Reply cards, for Canada and the United States, two cents each. A post card may be addressed by means of an adhesive tag, but nothing else must be attached to it, except, of course, an additional stamp when necessary, nor must the card be cut or defaced in any way.

Private Post Cards may be sent under the following conditions—The words "Private Post Card" must be distinctly printed or written on the address side near the top. The name and address of the sender may be printed on the face of the card, but the face of the card is not to be used for advertising purposes. Private Post Cards must not exceed a size of 6 inches in length by $3\frac{1}{2}$ inches in width and must not be less than $3\frac{1}{2}$ inches by $2\frac{1}{4}$ inches. Cards not complying with these regulations will be treated as insufficiently paid letters.

2nd Class Matter.

Newspapers and periodicals posted from the office of publication, and authorized to pass free of postage to regular subscribers in Canada Newfoundland and the United States.

3rd Class Matter.

NEWSPAPERS AND PERIODICALS.

Transient newspapers within the Dominion and the United States, 1 cent per four ounces or fraction thereof—but a single paper weighing not more than one ounce will be forwarded for $\frac{1}{2}$ cent. For the United Kingdom and all Postal Union countries, the rate is 1 cent per two ounces, or fraction of two ounces.

A newspaper or periodical must have no cover which can not easily be withdrawn. It must contain no enclosure. It must have no writing thereon but the name and address of the person to whom it is sent.

BOOKS, CIRCULARS, ETC.

The postage on printed books, pamphlets, circulars, occasional publications, etc., addressed to Canada, is 1 cent per 4 oz. To the United

States, Newfoundland, Great Britain and all European countries, 1 cent per 2 oz. The postage on blank books, printers' proof sheets, maps, prints, drawings, engravings, lithographs, photographs, sheet music, printed forms, entirely blank, and printed stationary, etc., addressed to Canada and the United States, is 1 cent per 2 oz. No package must exceed in length 2 feet by 1 foot in width or depth. The limit of weight for Canada, United States and Great Britain is 5 lbs.

Seeds, cuttings, bulbs, roots and scions or grafts can only be sent to the United States as 5th class matter; when posted for delivery in Canada, the postage is 1 cent per 4 oz., and the limit of weight 5 lbs.

Commercial papers and legal documents may be sent to Great Britain, all European countries and United States, at 5 cents for the first 10 oz., and 1 cent for every additional 2 oz. These papers, when posted for delivery in Canada, must be prepaid at Letter or Parcel Post rates—but deeds and insurance policies may be sent if prepaid 1 cent per 2 oz.

PATTERNS AND SAMPLES.

Bona fide patterns and samples of merchandise, not exceeding 24 ounces in weight, may be sent to any place in Canada at 1 cent per 4 ounces. Must be put up so as to admit of inspection. Goods sent in execution of an order, however small the quantity may be, or articles sent by one private individual to another, *not being actually Trade Patterns or Samples*, are not admissible as such. The limit of weight to United Kingdom is 5 lbs., and the limit of size 2 ft in length by 1 in breadth or depth. Postage, 2 cents for the first 4 ounces, and 1 cent for every additional two ounces.

4th Class Matter.—CLOSED PARCELS.

Closed parcels may be sent to places in Canada. They must be plainly addressed and should have the sender's name on the lower left hand corner. No correspondence must be enclosed.

Parcels for Canada must be prepaid 6 cents for 4 ounces, and must not exceed 5 lbs. in weight nor 2 feet in length by 1 foot in width or depth. They may be registered for a fee of 5 cents.

5th Class Matter

comprises such articles of general merchandise as are not entitled to any lower rate of postage. Postage 1 cent per oz., or fraction of an ounce. Limit of weight 5 lbs., of size, two feet in length by one foot in width or depth. Matter claiming to be 5th class *must be open to inspection*, and there must be no correspondence enclosed. Packages of 5th class matter may be sent to the United States for the same prepayment as is required within the Dominion, but the contents will be liable to customs inspection and collection of duty in the United States. Sealed tins containing fish, lobster, vegetables, meat, etc., if put up in a solid manner and labelled in such a way as to fully indicate the nature of their contents may be sent as 5th class matter within the Dominion, but no sealed matter can be forwarded to the United States under this head. Liquids, oils and fatty substances may be sent to places in Canada and the United States as 5th class, if put up in accordance with the ruling referring to such articles in the Canada Postal Guide.

FOREIGN PARCEL MAIL.

A parcel post mail for the United Kingdom and certain other countries, is made up weekly at the Halifax P. O. for transmission by Canadian Packet. A parcel for the United Kingdom must

LARGEST CIRCULATION IN NOVA SCOTIA.

not exceed 11 lbs. in weight, nor two feet in length by 1 foot in width or depth. The postage is 16 cents for the first lb. and 12 cents for each additional lb. or fraction thereof. Parcels can be sent to all the countries and colonies with which the United Kingdom maintains a parcel post. Information as to the principal places, and the rates applicable, can be obtained at the delivery wicket.

A Customs declaration form giving an accurate statement of the contents and value of the parcel, etc., must be filled up by the sender. This form must be affixed to the parcel. The forms can be obtained at the delivery wicket of the Post Office.

REGISTRATION.

Every article intended for registration must be handed in at the Post Office, and a receipt obtained therefor. On no account must it be dropped into a letter box. The registration fees on letters to places in Canada, Newfoundland, the United States, Great Britain and all European countries, is 5 cents.

All classes of matter may be registered to all destinations in Canada and throughout the Postal Union; and letters may be registered to most of the countries not included in the Union.

MATTER WHICH CANNOT BE FORWARDED THROUGH THE POST.

Any explosive substance, liquid; etc., not properly put up, and other matter likely to entail risk or injury to the ordinary contents of the mail, will be sent to the Dead Letter Office, Ottawa.

Glass in any form is also inadmissible, except eye-glasses, spectacles and microscopic slides, which properly put up and prepaid at parcel post rate or 5th class matter rate.

No immoral publication, and no letter or post card bearing injurious words, devices, etc., can be forwarded through the mails.

Letters containing gold or silver money, jewels or precious articles, or anything liable to customs duties, cannot be forwarded by post to any of the Postal Union Countries, except to the United States.

SIGNAL SERVICE, PORT OF HALIFAX.

Superintendent, Capt. H. V. Kent, R.E. Director, Company Sergt.-Major, W. Allen, R. E. Telephone, No. 45.

EXPLANATION OF SIGNALS.

Made on Main Signal Staff at Citadel Hill, when Vessels are seen from the Citadel or reported from Camperdown Signal Station.

The approach of all vessels is reported from the Lookout Station at Camperdown to the Signal Station at the Citadel, a man being on watch at either place day and night. These stations are connected by a Military Telephone line, and as the Citadel Station is connected to the Civil Exchange, information regarding any vessel can at any hour be obtained by subscribers on the Civil Exchange.

As soon as a vessel is perceived by the man on watch at Camperdown, he at once reports the fact to the Citadel, stating whether she is a steamer or a sailing vessel; if the former, she is signalled at the Citadel by a cross, (signifying unknown steamer) hoisted at the extremity of the upper yard, on the east side, if she is reported to be approaching from that quarter, on the west, if she is approaching from the other direction. This first report is usually made on first sighting the smoke of the steamer on the horizon; as she gets nearer, the man on watch observes whether she is a first class (or ocean going) steamer, or a second class (or coasting) steamer; if he reports her as first class, the cross is hauled down and replaced by a large ball, if second class by a small ball.

As soon as the identity of the steamer is ascertained her name is reported, and if she is a mail vessel the proper mail flag is hoisted half way out on the lower yard, while the house flag of her owners is hoisted on the private staff near by.

Should the vessel, however, be reported to be a man of war, or one of the Dominion Government Vessels, the cross will be lowered from the end of the upper yard, and a ball or cross will be hoisted half way out on the upper yard, a large ball denoting a Flag Ship: a small ball denoting a Cruiser; and a cross denoting a Gunboat, or Torpedo Catcher, or Torpedo Boat, or else a Dominion Vessel, in which latter case the Dominion Ensign will be hoisted half way out on the lower yard. In all other cases the National Ensign of the Country to which the Warship belongs will be hoisted half way out on the lower yard. A further report is made from Camperdown when any vessel crosses the line between Devil's Island and Caebueto Head, and on this report the ball or cross denoting the vessel, is lowered and a pennant is bent on under it, and the signal is rehoisted, signifying that the vessel has entered the Harbor.

It is thus obvious that when the pennant (in the case of a steamer it is white with a blue ball) is seen flying beneath a ball or cross, it means that:—The vessel signalled has entered the Harbor, but as long as the ball, or cross has no pennant below it, the vessel is still outside the line above mentioned.

There is one exception to this rule, namely, in the case of a fleet entering the Harbor, when one pennant beneath the group of balls, or crosses representing the fleet is sufficient to denote that the fleet has entered. For Merchant Steamers and Sailing Vessels each ball or cross will receive its distinctive pennant as each vessel enters. The distinctive pennant of a Troopship is a white flag with two blue crosses.

Sailing Vessels are signalled in the following manner. —

On being first sighted by the man on watch at Camperdown he reports whether the vessel is square rigged, (and if so how many masts she has) or schooner rigged. If she is square rigged, and has three masts or more, she is signalled at the Citadel by a large ball on the end of the lower yard. If she is square-rigged and has only two masts, a small ball is hoisted; and if schooner or cutter rigged, a cross is hoisted.

As she approaches the mouth of the Harbor, the man at Camperdown will ascertain her rig definitely and report whether she is a Ship, or Barque, or Brig, or Brigantine, and when she crosses the line between Devil's Island and Chebucto Head, he will report the fact to the men at the Citadel, who will haul down the ball, or cross, and bend beneath it the descriptive pennant and rehoist.

The descriptive pennants for the various rigs, are as follows:—

Ship, blue; Barque, blue and white; Brig, red; Brigantine, red and white; Schooner, white; Cutter or Sloop, white with red ball.

As in the case of Merchant Steamers, the house flag, if kept at the Station, will be hoisted on the private staff, when the vessels identity is known. If the vessel is a private yacht, a blue swallow-tail burgee will be hoisted on the private staff.

The following are the distinctive Mail flags employed:—

Weekly Mail from England . . . Blue flag with white centre.

“ “ for “ . . . Blue to white flag quartered.

Fortnightly from “ . . . Red flag with white centre.

“ for “ . . . Blue and red flag quartered with white ball in first quarter.

New foundland Mail White flag with Blue centre.

Bermuda “ “ “ “ Red “

Should the direct Mail from England, arrive during the night, a red triangular flag is hoisted half-way out on the lower yard (east side) from 7 a. m. to 9 a. m.

When the mail from England is reported to have arrived at Rimouski, a blue flag with white “ R ” in centre is hoisted half-way out on lower yard (west side), for one hour. When the news is received during the night, this flag will be flown from 8 a. m. to 9 a. m.

It will be noticed that the upper yard is reserved for steamers, the outer halliards being for merchant steamers, and the inner for men-of-war.

The outer halliards of the lower yard are reserved for sailing vessels, and the inner halliards for mail flags and national ensigns of men-of-war.

Steamers only are signalled at night in the following manner:—

A steamer approaching from the west will be signalled by hoisting a green light on the end of the west lower yard arm, and a steamer approaching from the east will be signalled by a red light on the end of the eastern yard arm.

If two steamers are approaching from the east, a second red light will be hoisted close beneath the first and so on, one red light for each steamer from the east, and one green light for each steamer from the west.

When a Steamer enters the Harbor (*i. e.*, passes the line between Chebucto Head to Devil's Island) a white light will be hoisted close beneath the colored light which denotes her approach, thus corresponding with the steamer pennant hoisted by day beneath the ball when a steamer enters the Harbor.

When two Steamers from the east have entered, the white light will be hoisted close beneath the two red lights, but if one steamer has entered and the other is still outside, the white light will be hoisted

beneath the upper red light and above the lower one which denotes the approach of the second steamer. The same with two steamers from the west.

Night signals for Mail Steamers, and Men-of-War will be made as hitherto, the vertical intervals between those lights being 12 feet.

MAIL SIGNALS.

The following are the signals made by Royal Mail Steamers when entering Halifax Harbor, between Chebucto Head and York Redoubt.

Description of Mail.	Day Signals.	Night Signals.
English outward . . . (Fortnightly)	The American Ensign at Fore.	Blue, White and Red Rockets and Blue Light.
English homeward . . . (Fortnightly)	English red Ensign at Fore.	Blue, White and Red Rockets.
English outward . . . (Weekly)	Fires two guns, Bomb rockets and fly's letter "N" at Fore.	Or fires two guns or Bomb Rockets and burns blue light.
English homeward . . . (Weekly)	Fires 1 gun or Bomb rocket and fly's Canadian Ensign at Fore.	Fires 1 gun or Bomb Rocket and burns blue light.

It is also customary when Steamer is abreast of George's Island to fire two bomb rockets on passage from England, and one bomb rocket on passage from United States or Portland.

Directions to Mariners with Reference to Canadian Storm Warnings issued for Quebec and the Maritime Provinces.

I.—Cone, hoisted with the apex downwards, indicates "moderate gale is expected," probably at first from an easterly direction.

II.—Cone, with apex pointing upwards, indicates "moderate gale is expected," probably at first from a westerly direction.

III.—Drum, with Cone underneath, the apex pointing downwards, indicates fresh to heavy gale is expected, probably at first from a easterly direction.

IV.—Drum, with Cone above, the apex pointing upwards, indicates fresh to heavy gale is expected, probably at first from a westerly direction.

The Cone, when hoisted by itself, indicates that it is expected that the wind will obtain a velocity of 30 miles an hour, but will not exceed 40 miles; and it is not intended that an ordinary well found vessel should stay in port, but simply as a warning to mariners that strong winds are expected from the quarter indicated.

The Drum will always be hoisted when the velocity of the wind is expected to exceed 40 miles an hour.

The night signal, corresponding to Nos. 1 and 3, is two white lanterns hanging perpendicular.

The night signal, corresponding to Nos. 2 and 4, is two white lanterns hanging horizontally.

NOTES.—Mariners will be able to obtain further information from Drum Agents or by consulting the daily probabilities. Mariners should always bear in mind that the storm signals are merely cautionary, and do not necessarily mean that a storm will occur at the place where the signal is displayed, but that one is expected either there or within such a distance that vessels leaving port would be liable to be caught in it.

The storm warnings issued for Nova Scotia, are received from the Central Office, Toronto, Ont.

SYDNEY COAL.

This Celebrated Coal, mined by the General Mining Association, Ltd., of London, G. B., at North Sydney, Cape Breton, has long been generally known under the name of Sydney Coal, and this name is registered as a Trade Mark. To guard against deception from other coals being sold with the prefix of "Sydney," or as "Sydney Coal," a Certificate is issued with each cargo of Genuine Sydney Coal Shipped. "Sydney Coal" stands at the head of all Nova Scotian and Cape Breton Coals in its reputation for House Use. It is also an excellent Steam Coal.
