The Globe Preferes Railways to People

The Globe newspaper, driven into a corner on the matter western freight rates, is making an exhibition of itself. It inders how papers like The Winnipeg Free Press, a most mest advocate of railway reduction in the west, and The Toto World, which has some record in that respect also, and er papers, can misrepresent, even maliciously misrepresent, views.

We have already stated that The Globe has a trick of writon both sides of the question, like the ancient oracles, and wing the reader in doubt. But at last The Globe has come and said that it is not in favor of any freight reductions ich the country is entitled to receive from the Canadian Pac Railway by law or otherwise if the effect of such reducns is to jeopardize the payment of the interest on the bonds ued in connection with the construction of the Ganadian thern and the Grand Trunk Pacific.

Our first answer to this peculiar doctrine is that the bonds resaid are guaranteed by the governments of Canada and of e provinces of the west.

Our second answer is that the people are entitled to full measure of the bond, whatever it may be, in the original agree-ment with the Canadian Pacific and which to our mind is in force to-day, notwithstanding the pretension of lawyers that by implication, in the passing of the railway act, the original C. P. R. contract has become invalid as far as railway rates are concerned. Our third answer to The Globe is that it professes to be a be-ver in free trade and the absolute right of the law of compeition to prevail. Therefore the devil take hindmost.

Our fourth answer is that nearly every railroad in the United States has defaulted and has passed thru the receiver's ands, sometimes by reason of mismanagement, others by overloading, sometimes by competition and has had to take the conuence; and the same thing has happened in England and in many other countries, and no harm has come to any such country in so far as railway competition and service is concerned. In fact there are people who believe that the best possible thing that can happen to railroads that are overloaded by unnecessary expense and wastefulness, or by other means, is to be cleaned up by a receiver taking charge and selling them off for what they are actually worth and then giving them a chance to do service and earn something on their actual worth.

And our fifth answer is that when parliament was asked to guarantee the bonds and to give other great concessions that were given to both the Canadian Northern and the Grand Trunk Pacific, the country and the people were assured that in consequence of these grants and these franchises the effect would be to bring about such an improved railway and such a high-class competition that the old and obsolete Canadian Pacific would be forced to reduce its rates, and for this reason the people voted the money.

shaded osprey. Mr. and Mrs. Albert

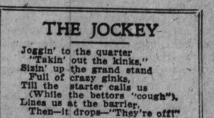

Hoarding Idle Gold The Dominion Government has in its vaults at Ottawa and in the custody of First Time in History of Track That Royalty Has Been Present-Large Crowd and King's Weather For the Contest For His Majesty's Guineas.

Historic Woodbine looked its best for the opening of the spring meet. It was an ideal day for the kingly sport, and as many as 15,000 people swarmed into the grounds. The procession began before mid-day and lasted night until the great feature event, the King's Plate. The sun brightly shone intermittently during the afternoon, and from the lake came an exhibit at the breeze that made things favorable to a big sporting day. The track was what the wiseacres called "slow." The heat of the sun soft in some splendid work during the past day or so, but the drying-out process of the track, which three days ago was a sea of mud, needed more time. However, the clockers, tipsters, railbirds and others figured on a heavy track in their calculations as to the possible winners, so the predic-tions may not be awry. tions may not be awry.

tions may not be awry. Royalty Arrives. Shortly before the opening race—at 2.30 p.m.—the arrival of the royal party in state was heralded by the Royal Grenadiers' Band, which struck up "O, Canada." Headed by a squad of mounted policemen and a detachment of the Royal Canadian Dragoons, whose glistening helmets and flashy tunics fairly dazzled the eye, the ducal party entered the eastern gate. The huge multi-tude of people arose as in one mass and stood, the men bareheaded, as the royal carriage, drawn by fours, passed by to the entrance of the green sward which fronted the members' stand, in which was located the royal box. The Duke and Duchess of Connaught and Col. Lowther, A.D.C., occu-pied the first carriage and Princess Patricia, Miss Pelly and Capt. Brickeley rode in the one following. As the royal party and suite strode along the green enclosure to the

rode in the one following. As the royal party and suite strode along the green enclosure to the royal box, they were a cynosure for all eyes. The Duke, in his strictly democratic and characteristic manner, nodded and spoke to many. The box, in the centre of the big stand, the boards of which had under-gone a new coaling of paint, was a profusion of flowers of all kinds. It was built since the last meet for to-day's suspicious occasion. Among Those Present. Among those seen in attendance were: Hon, R. L. Borden, Hon, W. J. Hanna, T. L. Englehart, Noel Marshall, Judge Teetzell, Judge Riddell, Sir Edmund Bristol, Hon. J. S. Hendrie, Mayor Geary, Sir William Mackensie, Judge Monck (Hamilton), Senator Cox, Peter Ryan, Col. Hemming, R. R. Gamey, M.L.A., Hon. Dr. Pyne, H. L. Drayton, K.C., Col. G. T. Denfson, Judge Meredith (London), Brig.-Gen. Cotton, Hon, Adam Beck, A. E. Donovan, M.L.A., (Brockville), Senator Jaffray, J. G. Kent, W. R. Smythe, M.P., E. J. Lennox, Hon. George P. Graham, Hon. A. E Kemp.

Magnet For the Big Crowds. The most historic race on the coninent was a magnet for dense crowds which came by motor, street cars and on foot. The lawn fronting the grandstand was simply jammed with enthuslastic crowds of young and old. Dame Fashion contributed her share to make the scene spectacular and the Woodbine itself was as splendid as ever, Springin' in the stirrup, Knees beside my ear, Harkin' to the hoofbeats Front o' me-an' rear, Coaxin' him a little, Kinda holdin' back, Keepin' with the leaders Round the heavy track! with the silver waters seen across the green sward shimmering and glistening like brilliants. The huge string of motors stretched from all entrances on roads leading to Quarter, half-three-quarters! Here begins the row; This is where the race starts, Gotta huatie now! Whippin', talkin', swearin' (Hear the people yell) Whoop-you watch us boomin' Down the stretch-pell-mell! every angle. Crowds began to stream thru the gates soon after noon and they continued to do so until long after the first race was run. Railbirds, as during the past few mornings since the

e-fibred muscles a ey come into open ekey intimates to ist quicken his str is called "a reserve upon. But if there s, there can be horse whose muse dark and pale fib ortion that makes true-run race, of g-taken for gra are not correct, then stamina or a lack of

And our sixth answer is that there is so much business in the west that if the rates were cut in two to-morrow, the railways would have so much to do-everyone of them-that they would make big dividends on the business.

Now The Globe says there must be no reduction because somebody may be hurt by it. It has not a word to say for the people who are entitled to a reduction of rates and it has not a word to say that solemn agreements should be observed before anything else. The Globe is making the fight of the railways and it is not making the fight of the people. It talks about confisca-tion. It is confiscating the rights of the people which to our mind are the most sacred thing we know of, and to this end it invents a cheap bogey man.

While many distinguished persons backed on and over 100 children from the Alexander Muir School sang the masterpiece, "The Maple Leaf Fordver," Ligut-Col. J. H. Scott, K.C., of Walker-ton, grand master of the Orange As-socistion, unveiled a memorial to the memory of the late Alexander Muir memory of the late Alexander Muir

his own life, it'is thought, as the re-volver with which the deed was committed was found on the wharf near the village this morning, together with blood stains, which indicate the probability of his suicide and drowning Searchers are at work with grappling trons endeavoring to recover the body. Mystery Surrounds Affair.

An element

An element of mystery surrounds the whole affair. Gordon Hodgins, a handsome and popular young man of 24 years, holding a good position in a bank at Shawville, has been attentive to Miss Dolan for several years. Late last evening he arrived at Portage du Fort, presumably to call on her. Together they spent the evening in the parlor of her father's hotel, the young lady being an accomplished planist and he the possessor of a splendid voice, and were heard by those in the

hote! singing and playing. About 11 o'clock three shots rang out and Hodgins dashed out of the ho-tel bareheade, leaving his hat and overcoat hanging in the hall, where he had deposited them on arrival. Relatives rushed to the parlor and discovered Miss Dolan unconscious, shet three times in the head. One wound

Welland--

About

Verify

Men and women working on a salary-people who have a small steady income any person who can make a small deposit and a small monthly payment can make their savings multiply by buying a lot in "Rosedale."

MAD

WELLAND

Welland is attracting manufacturing industries, and growing in a way that is well worthy the attention of people who would consider an investment that cannot help but bring good returns.

Think of a growth in population of from less than 1,700

to more than 6,000 people in 5 years. That is Welland's record for the five years just past, and it beats that of all other Ontario towns. More branches of United States industries located in Welland in the last two years than in any other Canadian city.

Profit by Welland's growth. Consider the wisdom of making a small, sound, modest investment in a lot in 'Rosedale." Put aside a few dollars each month in a "Profit" account by buying in "Rosedale," where the values increase daily as Welland continues to grow.

\$95.00 upwards each. 10 to 15 per cent. down. \$5.00 to \$10.00 per lot per month. No interest. No taxes for one year. Free deed in case of death. On June 1st prices advance 10 per cent.

"Rosedale" has more to commend itself to small investors than any other property we know. Let us tell you about it. Then, come over to Welland if you wish—or get the opinion of Welland people. We know that "Rosedale" will appeal to your best judgment as the best Welland buy on the market. The Street Railway, which we own, will soon be extended into "Rosedale." "Rosedale" has almost every good feature you could wish for in a property investment. Come over on our Salesmen's Excursion May 24th—witness the Big Barbeque—See "Rose-Messrs. Laughlin Realty, Limited, 32 Adelaide St. East, To-

dale" for yourself. Call, 'Phone, or send in the coupon for information.

nel. The German press has done liftle in the way of dispeling the clouds of mis-understanding which prevent the German people from clearly under-standing the British views, and pre-clude the proper light from shining upon the British policy. Many of the leading papers treat the recent negotia-tions for a better entente cordiale as tho success were neither likely nor desirable. an automobile manufacturer in discuss-

mobile. Who ever heard of a man bedesirable The Berlin Post expresses its dislike ing extravagant because he owned a and mistrust for Britain and says that "Germany can live with England only" horse? As far as I know a man always on the footing of being strong as an bought a horse because he needed it. enemy, and, if possible, still stronger and because it was a profitable investas a friend." as a friend." The Hambourger Nachrichten de-monstrates its antipathy for anything British by asking the German Govern-ment "not to allow Germany's hands to be tied in respect either of her naval armament or of the pursuit of the aims of her neuser and has a chauffeur should to be because it is a profitable invest. ment. Why an automibile should be

armament or of the pursuit of the aims of her oversea policy." As Dr. Dilion states. "It should be the intense desire of those who clearly discern the gravity of the issues that the efforts of the statesmen of both empires should not be put forth in vain. Relations on a footing of good neighborliness, and un-impaired by misgivings and distrust, may need a miracle to establish. But they are so desirable, so indispensable to the cause of humanity, that one hopes for, nay, one almost believes in, the miracle." A WARREN INTERVIEW. Foreigners who have from time to time criticized our roads are perfectly

time criticized our roads are perfectly justified, no doubt, especially if they base their criticism on what they see their criticism on what they see base their criticism on that they see ticular consideration of what their inat this time of the year. It is more to the point, however, when the ob-servations along this line come from automobilies increase their income

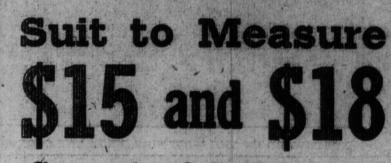

servations along this line come from home sources. One of the recent com-m ntators on road conditions is Lucius E. Wilson, general manager of the Warren Motor Car Company, who has just returned to Detroit from an ex-tensive western trip. Mr. Wilson re-ports the roads as "horrible." This, he admits, is the only drawback to the automobile business, for otherwise the conditions are exceptionally bright. Mr. Wilson visited Warren dealers in De- Mo'nes. Milwaukee, Chicago and various points thru the State of Illino's. He declares that more cars will be sold thruout the middle west during the season of 1912 than ever before. during the season of 1912 than ever before. Mr. George D. Wilson has just re-turned from a hurried business trip to Buffalo, Rochester, Syracuse and Cleveland.

strange that the people who need an automobile. and do not have one. should be looking at the matter from the same standpoint." Smallpox in New Brunswick,

Smallpox in New Brunswick. ST. JOHN, N.B., May 18.-Dr. E. B. Fisher, secretary of the provincial board of health, has been called to Deer Is'and, off Charlotte County, on the coast of New Brunswick, because of an outbreak of smallpox. He re-ports seven cases, some zerious, Quarantine has been established and he thinks there is no danger of the spread or of any cases proving fatal.

If you deal with a 'slack hand,' if you don't care whether you save money or not, then de-

pend upon it you will never be rich. These prices offer you a distinct saving of at least \$10:

**Guaranteed Satisfactory** 

The values are unquestionably the greatest in Canada. If you have a prejudice against clothes of moderate cost, and don't believe we can satisfy you, remember our guarantee, which is your protection. You are protected against any loss whatever. Come in now and put us to the test. You will find some very fine fabrics for summer wear, beautiful goods imported from Britain, many of them exclusive. Begin your career toward independence, if you have not already begun it, by saving

REAL ESTATE Realty Market News and Comment REAL ESTATE Handsome Stores and Buildings Mark Marvellous **NEW C.P.R STATION** Retail Trade Expansion at Bloor and Yonge Corner

Best Residential Districts of the City Are Tributary to Meeting Point of Canada's Two Greatest Streets.

Even the magic-made cities of the vest cannot claim a more wonderful dvance in population, in financial and uilding growth, than Toronto. And the movements of this growth are on the most interesting features of the city's life.

We have seen the financial district entre along King-street between Yonge and Bay with the consequent develop ment of a skyscraper patch. We see the retail stores gradually leaving King-street, and spreading themselves ong Yonge, and their places being taken by banks and brokers on we are to see the most wor ful change of all. We are to see the big stores jump from what we know as down-town right up Yonge-street The biggest will stay at Carlton-street. but many will make Bloor and Yonge their abiding place, and some of the ters will move right up to the ay crossing, where the C.N.R.-R. union station will be built. ess' always co

a while had everyone guessing until The World told about the Eaton plans. Now everybody knows that this corner properly discovered.

Now everybody knows that this corner is to be a great retail centre. But it will be three or four years yet. And in the meantime the Bloor junction will grow up into the most fashionable shopping point of the city. Already it is quite a place. The stores have that prosperous ap-terance that comes with expensive

office)

The stores have that prosperous ap-pearance that comes with expensive fronts and cozily fittings. And they are really properous. Two of the stores at this corner do the biggest turn-over in their particular line in the entire city. One of them does the second b'st. and it's the most elaborately fit-ted store of its kind in town. The reason for this evident prosperity is easily seen. Bloor-street touches the stores at this extent touches the stores at this corner, with a two-

Values on the Rise.

A Fashionable Shopping Point. But the purpose of this story is to tell about Bloor and Yonge. The Carl-ton corner has had a great share of attention. The mysterious block for a while had everyone guessing until a while during the daytime there is a great difference between the number of people on the street at this corner and particularly on Saturday night, the a great corner, but it has yet to be a while had everyone guessing until

The joining up of Danforth and Bloor by the viaduct, the construction of street railway lines west of Dundas on B oor to the Humber, will make it the greatest street in Canada. And where it meets with Yonge-street, the richest street in the country, there will be another big retail district. It is na-tural that there should be. Many see it coming, but few fully realize the sign ficance of it. This article is not a boost, it is the story of another roman-

pretty much of a prophesy.

All Yonge Is Active

life of that once dead section of Yonge-street between Carlton and Bloor. The Property sales are going thru daily, they range even midway between the big than \$2000 a foot. And all these many, many property transfers, these an-nouncements of new buildings and im-provements to old, are but precedent to the lining of Yonge-street on both sides from Queen for a mile and a half north, with well-doing stores. junction of the cross-town streets. Five years from now Queen-street will be given over to the merchants who catch the quick day-time trade; Carlton and College will be the mecca of the departmentials, and the hosts of wom n-hoppers, and Bloor corner will be a place of high-class retail s ores, catering specially to the resi-derts of the high-class districts of Rosedale, of the "Hill" and of Lea-

YEARSLEY** The republic of France is passing thru the throes of one of these great convulsions due to the concentration of wealth and power into the hands of the 83,514 413-414 CONFEDERATION LIFE BLDG. TORONTO, ONTARIO convulsions due to the concentration of wealth and power into the hands of the favored few. M. Francis Delaisi, in his remarkable book "La Democratie et les Financiers' shows that the whole finance of France is in the hands of about two hundred persons, and that some fifty financial families control nearly all the great in-dustrial undertakings; railway and other transport services, mines, in-surance companies, heating, lighting, food supplies, &c. Thus the three brothers of the Adam family are con-cerned in seven banks and ten in-dustrial undertakings; the three brothers Mirabaud in five banks and eighteen industrial undertakings; the three brothers Mirabaud in five banks and eighteen industrial undertakings; the three brothers Mirabaud in five banks and eighteen industrial undertakings; the three brothers Mirabaud in five banks and eighteen industrial undertakings; the three brothers Mirabaud in five banks and eighteen industrial undertakings; the three brothers Mirabaud in five banks and eighteen industrial undertakings; the three brothers Mirabaud in five banks and eighteen industrial undertakings; the three brothers Mirabaud in five banks and eighteen industrial undertakings; the free financiers have learned wisdom from their experience of the Second Empire; they are no longer in open alliance with the ciergy and they work behind the scenes. Their policy is to tolerate the republic in order to leave the people in the illusion that it governs thespeople in the illusion that it governs the people in the illusion that it governs the people in the illusion that it governs the set in the illusion that it governs the people in the illusion that it governs the set in the illusion that it governs a derelict. The mining market during the week just closing has maintained much the same appearance of depression which has characterized its being for so long a period now. Trading has been any-thing but active, and the net result of the transactions has been that many have sunk to levels not touched hither-to since the time of the mid-January slump. The buying demand in the meantime has dwindled to small pro-portions, in fact there seems to be an utter lack of enthusiasm at the lower quotations. That a change in this re-sard may occur at any moment is, of course, probable, and the turn when it comes will likely be a rapid one. That much improvement can be brought about in a few days is, however, un-likely, and after a sharp recovery, stocks are more probable to drift back into dulness than to maintain an ap-pearance of firmness. Meanwhile the bear coterie will continue its "knock-ing" procelivities, and may succeed in driving prices down to a still further extent. tort of Taf . 559,563 16,624,753 BERLIN SOLD C.P.R. sts \$40,000,000 8 **IN LARGE AMOUNTS** 000,000 Deficit at sevelt's Terms, FLEMING & MARVIN Members Standard Stock Exchange. # **AUDITORS**:

# Edwards, Morgan & Company.

In recommending the purchase of these Preference Shares to the conservative investor, we draw attention to the following :---

(1) Preference Shares are preferential both as to assets and cumulative dividend at the rate of 7% per annum, and share with the Common Stock up to 10% per annum:

(2) The first dividend on the Preference Stock will be paid on November 1st for the half-year ending October 31st. Thereafter all dividends will be paid half-yearly, on May 1st and November 1st.

(3) The Company has taken over all the assets, good-will, patents and busi-ness formerly owned by Mr. J. F. House, by the issue to him of \$54,000 in common stock of the company.

(4) The assets, comprising real estate, factory, plant and stock on hand, amount to \$57,000, not including good-will or valuable patents owned by the Com-party. The Preference Stock now being offered amounts to less than 43% of the physical assets.

(5) The Company has been engaged for the past seven years in the manu-facture and sale of cold tire setters and power hammers, all covered by patents. There is a wide and increasing market in Canada for these machines.

(6) For the past three years the average net earnings of the Company have been sufficient to pay an amount equal to 7% on the entire capitalization. The management estimates that with the new additional treasury capital the net earnings should show an amount equal to 10% on preferred and 21% on common shares. (7) We consider this one of the best small industrial issues ever offered to

the Canadian public. We cordially invite the inspection of the factory at 201

Ohurch Street, and the closest investigation into the proposition. Application to be accompanied by 10%, the balance of 90% to be paid on allotment of stock.

Further particulars and prospectus mailed ca request.

Herreshoff Beaten. LONDON, May 18,-Fred Herreshoff, runner-up in last year's American golf championship, competed in the match on the Sandwich links to-day for the St. Georges champion challenge cup, and took 14 strokes to compete the 36 holes. The winner of the St. George's Cup was Mich-ael Scott, formerly open golf champion of Australia, who finished the course in 166.

Australia, who finished the course in 16%. Australians Ahead. LONDON, May 18.—The Australians in-creased their lead yesterday in the cricket match with the Surrey County eleven. When play ceased Thursday night the Antipodeans had scored 105 runs for the loss of 5 wickets, while Surrey made 139 in the first innings. The Australians added 187 runs before losing their last wicket, making the aggregate for the inning 292. Surrey replied with 206, leav-ing the colonials to get but 52 in their second effort. The match will be con-cluded to-day. The South Africans fared badly against Yorkshire, scoring 170 in their first in-nings. Yorkshire ran up a total of 296 for eight wickets, giving the county a lead of 126 and two wickets on the first innings.

the only law. Quality in the Plate. But to the sport, "Yours truly" has written so much about the King's Plate and its maiden candidates that he re-

Royal uncle and aunt and cousin, were decidedly above the ordinary in size and weight. They, too, were a healthy lot, free from blemish and physical defect. Their appearance and condition, indeed, abundantly proved the good work the O. J. C. is doing in encouraging home-breeding. Their class and character, too, were superior to what we were formerly accustomed. The best blood, both of England and America, was represented. Some old-timers may doubt whether the horse of to-day is the squal of his progenitor. He may not run four-mile heats as in ancient days his forefathers did, but he un-doubtedly possesses the looks and speed of improvement. If called upon I for one do not doubt that he would prove equal to the longer route. That, how-ever, is a matter for the imagination. The Coronation.

The Coronation. Leaving yesterday's races to the men on the spot it is worth while tak-ing a glance at the specially good things that will be on tap during the week. Every day has its stake and some days two or even three. To-morrow (Monday) the prime feature will be the Coronation Stakes for two-year-olds foaled in Canada, with \$2000 added to a stake of \$20 each. Originally thirty youngsters were nominated, of added to a stake of \$20 each. Originally thirty youngsters were nominated, of which probably about a third will go to the post." The blood of St. Simon, the greatest stallion of modern days, and of Ormonde, the greatest race-horse of modern days, is well represent-ed. Orme Shore, son of Orme, sire of Flying Fox, has four in the list, of whom probably, Robert Davies' ch. filly Meter, out of Mrs. Frank Foster, is the best. Imp. Bassetlaw, son of St. Simon, has five, of whom 'that bonniest of colts Hearts of Oak, out of the good old mare that gave us Wire bonniest of colts Hearts of Oak, out of the good old mare that gave us Wire In and War Whoop, stands out the most prominent. There are also in the quintet, Venus Urania and Ondra-mida, the former full sister to St. Bass and the latter half sister to Ondramon, last year's Coronation winner. Melton, sire of the prematurely deceased Sysonby has the prematurely deceased Sysonby has but one representative there, Ailes d'Or, in Hon. J. S. Hendrie's Golden Syrup, an emasculated son of the

his ankle, which is getting better, There are others which justify expec-tations, such as August Belmont's Rock View, by imp. Rock Sand, P. M. Cavili's La Sainreila, J. W. # MORNING

DITORIAL

# nd German Naval Rivalry

Thurchill's frank intimation to Germany that unances will the relative predominance of the British serman fleet be allowed to fall below its present amount will if necessary be increased, has already called for practical effect. On Tuesday the new naval bill received its second reading in the Reichstag and the claim that additional sums must be expended on naval construction has thus been affirmed. On the following day the first lord of the admiralty, speaking in the house of commons, announced that supplementary estimates would certainly be presented this year. That they will be passed is a foregoing conclusion, any effective criticism will be directed rather for their enlargement than their curtailment. Whatever may be said about the causes of the mutual suspicion that undoubtedly prevails among the people of these two leading European nations and the division of responsibility for that distrust, both British parties are at one on the absolute necessity of maintaining Britain's maritime supremacy. The prime minister affirmed this only the other day with unusual emphasis and no consideration of cost will interfere with this cardinal principle of Britain's naval policy. A strong navy-one sufficient to protect the country from invasion and from interference with its food supplies-is not an episode in the life of the United Kingdom but the only guarantee of its existence.

The new German naval bill provides for, first, a battle fleet, consisting of one fleet flagship, five squadrons of eight battleships apiece twelve large cruisers and thirty small cruisers and second, a foreign service fleet consisting of eight large cruisers and ten small cruisers. As regards ships in commission, the active battle fleet will consist of one fleet flagship, three squadrons of battleships, eight large cruisers and eighteen small cruisers, while the reserve battle fleet will number two squadrons of battle ships, four large cruisers and twelve small cruisers. All the battleships and cruisers of the active fleet and one-fourth of the battleships and cruisers of the reserve fleet are to be kept permanently in commission. The law, as explained by the Berlin correspondent of The London Times, thus provides for an increase of eight battleships, four large cruisers and six small cruisers in the total number of ships permanently in com mission in the active battle fleet. On the other hand, the number of ships which the law will require to be kept permanently in com mission in the reserve battle fleet is reduced in the case of battleships from nine to four, in the case of large cruisers from two to one and in the case of small cruisers from six to three. On balance therefore. the total number of ships to be kept permanently in commission wil be increased by three battleships, three large cruisers and three small cruisers.

As regards new construction the bill provided for three battleships and two small cruisers. One battleship will be added to the

# THE TORONTO SUNDAY WORLD

# **KEEPING AN EYE ON HIM**

# On Presenting Addresses.

Presenting a civic address to a distinguished visitor is an ancient custom, and within reasonable bounds a pleasant one. No doubt in the old days, especially during the Wars of the Roses, it was the part of prudence for a municipality to protest its loyalty to a visiting prince. The old City of London made some quick turns in order to land on the right side. Even to-day in a democratic country like Canada it is well enough to present an address to some distinguished stranger upon his first visit to the country or to some particular city therein. It certainly does seem, however, as tho Toronto should have presented an address to Mr. Borden long ago or have omitted so formal a ceremony the other day. Would it not be absurd to suddenly rush up with a civic address to Sir James Whitney? , Mr. Borden, as he himself protested, is no stranger in Toronto.

While the Titanic investigation is proceeding the steamship companies are profiting by experience and nearly all the big liners are running six the tragedy. As incident after inci-dent transpired, and the picture of to ten hours behind time.

construction program for 1913 and one battleship to the construction program for 1916. The government "holds up" the date of construction of the third battleship and of the two new small cruisers. The provision for personnel runs until the end of 1920 when there will be a total increase of 14,310 men, making an average annual increase of 1590 men. The additional expenditure is estimated at \$3. 750,000 in 1912; \$7,000,000 in 1913; \$9,500,000 in 1914; \$0,750. 000 in 1915; \$10,750,000 in 1916; \$10,500,000 in 1917. Besides these naval increases the bill proposes to add two new army corps, thus raising the total peace strength of the army from 515,321 to 544,211 men. This, it is calculated, corresponds almost exactly with the in crease of the population of the German Empire shown by the census taken in 1910. The total cost of the new defence measures up to and including 1917 will be roundly \$160,000,000, of which \$110,000,-000 is required by the army and \$50,000,000 by the navy. To meet this the estimates of revenue from existing sources have been largely increased and calculations have been prepared tending to show

position of the German Empire.

On the first of this month the secretary of the British admiralty issued an important statement in connection with the new organi zation of the fleet explained by Mr. Winston Churchill in his speech introducing the navy estimates. It comes into effect next month and is admittedly intended to meet the charged conditions brought about by the German proposals. When completed the six battle squadron of the British navy will be homogeneous. The first fleet will consist of four squadrons of the latest battleships, fully manned and self-contained. Eight ships of the dreadhought type form each of the first and second squadrons; the King Edwards are in the third squadron: and the Duncans in the fourth squadron. In its final form the new organization will give in home waters a fully manned force of 28 battleships of which 24 will have their bases at ports of the United Kingdom and four at Gibraltar. The second fleet, with nucleus crews will consist at first of eight battleships of one type based on the Nore and Portsmouth, but in time will have two squadrons each of that strength as newer vessels relieve those now in the fully commissioned fleet. Mr. Churchill explained that one-half of the ships of the second fleet will always be in port, while the other half is exercising at sea, so that there may be no delay in completing their crews to full strength from the shore educational establishments.

As compared with the German High Sea Fleet the United Kingm at present has 32 battleships in commission as against a German rength of 23 in commission. This gives the proportion of four ships to three and this will be maintained by the changes now being made for when the German third squadron reaches its full strength of eight ships making a total of 25 ships in full commission there will be eight battleships in all four British squadrons, making with the flagships a total of 33 ships, while the nucleus crew ships will number eight for Britain and six for Germany. Mr. Churchill will, however, introduce supplementary estimates this year and for such additional construction as may be considered necessary he has in reserve the \$32,500,000 surplus of last financial year's budget ear-marked by Mr. Lloyd George for this purpose. The position in the meantime is thus favorable for the United Kingdom. Stress has been laid by German critics on the fact that there are always warships on the stocks of British shipbuilders for foreign nations and that these may be commandeered should the emergency arise. But this should help to impress Germany with the conviction that it is hopeless to try and improve upon the relative proportion of the naval strength of the Lake Ontario to supply several people, even tho two countries

Generally speaking the presentation of addresses is a stilted and perfunctory performance. The address and the reply thereto are often in type for weeks and even months before they are delivered. The person addressed is usually given all the titles that can possibly be lugged in until so many letters like B.C.M.P.L.L.D., and etc., are strung out that he is tempted like Sir John Macdonald to cut in with a few letters himself and say "X.Y.Z."

# Mails By Air Route.

To carry mails from New York to Washing ton in three and a half hours is the proposal of that there will be henceforward a great improvement in the financial U. S. Postmaster-General Hitchcock and, of course, he is going to do it by the air route. At first sacks containing about 10,000 letters will be transported, but if the airship proves its worth machines of greater capacity will be added to the service, and should the new method prove a suc cess there will be no question as to its adoption.

> It will not be fair at this early stage of the development of aeroplanes to insist on a regular ity of runs. If in ordinary weather the heavier than-air machines can approximate their usual time of starting and finishing and can save time over that required for mail transportation by rai they should be considered successful. Occasiona dependence on the trains in rough weather should not react to the discredit of the aeroplanes.

The time is not far distant when practically all mail for all parts of the world will be carried in speedy airships.

# Stagnant.

Our city council seems apathetic to the poin of stagnation respecting all problems connected with the growth and development of a greater To ronto. Mayor Geary makes a good presiding officer, being grave, earnest and soft footed, a cross, between a floor walker and an undertaker, but he does not lead. Indeed the council seems to lack all leadership

The last meeting of the council was typical Many matters were discussed, few of them settled and nothing at all done with many pressing problems.

It seemed ridiculous to hear grown up men dis cussing how many buckets or gallons of water To ronto could spare to people living a few rods and in some cases only a few feet beyond the corporation line

One would think there was enough water in they all wanted a drink at the same time.

# More Parliament.

There is some talk of parliament not being and poor alike to the boats; the knightsummoned for despatch of business until after the new year. Thus parliament may sit for only three months in the calendar year. 1912.

Our constitution contemplates the frequent assembling of parliament and indeed that body is once put on a clean shirt with Sidney or Falkland before going to battle; the never prorogued for more than forty days at a brave Frenchman, an honor to his natime. One reading The Canada Gazette will find tion, bringing two boys to the boats about every six weeks a proclamation convening with a "Bless you, I don't want to go. parliament soon to be followed by another post- of the women themselves, one of them, poning the date. It is only when the proclamation a lady of rank, superseding a shivering summons parliament "For despatch of business" coward of a man, taking charge or the that the members pay any attention to it and pro- has no vote, and the shivering coward ceed to Ottawa.

There are many who believe that members of business of the country than at present. Members as they played away during those long who have taken a leading part in opposition find hours, the act of Nero at flaming Rome, who have taken a leading part in opposition find little to occupy them when they become govern-ment members, and welcome an appointment to the bench or nearly any change which will remove them from the house of commons. Naturally the government must be entrusted to a cabinet, but incouth as many of the phases of the much valuable information could be gathered by tragedy appear to be, as a whole it small select committees of the house during the re-cess on matters like the revision of the bank act, the best. Briton and American vied with revision of the railway act. etc. The Laurier Gov- each other in coolness and bravery. ernment might have avoided shipwreck had it con- without the law" were unable to reach sulted its supporters in parliament before, instead the same standard; and the whole ship of after the reciprocity deal was made. -ante - auna zaine Maran

Lady Duff-Gordon's new Paris establishment bring her into close touch with that centre of ashion.

By LADY DUFF GORDON ("Lucile") ONG, clinging lines are the principal feature of the two gowns illustrated in the sketches I am send-

ing this week. One of them is an afternoon gown of the new panier type. The lower part of the skirt is in iron gray draped chiffon over dull blue, and the panier effect, the coat and corsage, is of queer blue taffetas, with a mauve sash around the waist. A row of buttons which fasten the coat in front furnish the only trimming. The gown is attractive although quite simple. The hat worn with it is in violet with a dark gray algrette.

The other sketch shows a semi-tailored costume in white silk serge, which will no doubt be much worn at the races this season. The jacket is severely plain, owing its distinction to its lines.

It fastens on the left side and is extremely cutaway in effect. It shows that Paris still shows its preference for the one-piece wrap, for the sleeves are cut in with the body of the jacket. These sleeves, by the way, are the new, long. narrow sleeves edged with deep ruffles, recalling the fashions of the Directoire period. Similar ruffles finish the neck of the jacket.

The skirt is decidedly new. The front is straight and long. The back is a draped circular effect. The drapery is arranged just above the knees. Contrary to rumors, this skirt is very narrow at the feet and gives the so-called hour-glass figure.

There is a straight, flat girdle of white satin charmeuse with one end decorated with Persian embroidery. The hat is typical of those worn this Spring at the races. It is of supple straw, wide brimmed and low crowned, having a flat feather trimming.

The photograph shows a somewhat more elaborate creation of pink mauve chiffon over flesh color charmeuse and laces. The coat is of blue mauve taffeta with a silver blue waistband embellished with a cameo buckle. Worn with it is a hat of pale blue lined with blue mauve and trimmed with wood roses and mauve ribbon.

And now that you know all about the actual pictures, I want to give you just a word-picture of two costumes which represent the different extremes of the tailor-made models for the coming season, and which will show you to what sensational lengths it is possible to go, even if you restrict yourself to the coat and skirt form of attire, which-once upon a timewas typical of an almost severe simplicity.

First, then, please, imagine geranium pink eponge as fashioning a short cutaway coat, and a skirt whose scantiness is so extreme that walking is only made pleasant and possible by its slitting up at either side to the extent of five or six inches. The only trimming is a binding of self-colored braid and a few buttons of enamel in the same vivid pink, rimmed round with black, this one contrasting and relieving touch making it permissible and smart to wear black stockings and shoes, while for the further and absolutely correct completion of the costume there must also be added a tailor-cut shirt of white lawn, with just a loosely knotted scarl bow of black satin to finish off the slightly down-turned and entirely soft collar. For you must know-and you will surely be well pleased by the knowledge-that nowadays even the most sporting and simple of shirts are being made with this particu far and becoming form of neckwear. The women who have once realized what freedom for their throats means-both as regards comfort and charm-having found it so entirely impossible to revert to the old bondage of stiff and high collar, found that something had to be done to meet their wishes and thereby save the tailor-cut shirt from practical extinction. Well, now, this is the first and simplest form of the

coat and skirt costume, while, then, on the other nand, its most striking, not to say startling, development is represented by the union of a cutaway charmeuse and laces.

A semi-tailored costume of white silk serge, cut on severely plain lines. The sleeves are of the new long, narrow variety.

not eat enough fruit, as most persons do not drink enough water, for their health's sake, and nearly every one would be handsomer for a greater attention to fruit as an item of diet. Mme. Cavalieri tells in detail, and with her customary painstakingness, the value of certain fruits to certain organs and functions. This is one of the most valuable articles in a series rich in value.

# By Mme. LINA CAVALIERI.

TRAWBERRIES are nearly mouth by using a tongue scraper ripe. That thought brings an- and gargle. other that fruit is one of the A few drops of lemon juice J

best friends of beauty. Consider the strawberry, for instance, in its relation to beauty.

Famous beauties of the courts of Europe ordered quarts of crushed strawberries poured into their bathtubs to bleach their bodies to a beautiful whiteness. American wom-en are less luxurious but they are willing to apply the wisdom of ages to solving the problem of how to be more beautiful if they can use the remedies in moderation. Very well. then. While strawberries are plentiful and cheap, call in their aid.

A strawberry crushed against the cheek and passed over the face cleanses it of dust and helps to remove tan and freckles. Rubbing a crushed strawberry over the neck whitens it. A pretty girl always flings away the carmine of her dressing table in Summer and pinkens her nails instead with strawberry juice, simply applied by pressing the strawberry against each nail, allowing to dry, and afterward rubbing the nails with the paim of the other hand.

No toilet table nor shelf is com plete, nor bathrom well furnished, without its lemons. - Cut the lemon In half when you rise in the morning and press the juice into a glass. Add to this the same quantity of water and drink the mixture. Or, if you prefer, beat into this the lemon ulce and the white of an egg. Either of these mixtures is a tonic for the stomach. It cleanses it of mucous, clearing it for the day as the fastidious person does her

dealth and Motoring

The comment of the press on the sult of banishing depression and moodhealth-giving propensities of modern incess as well as soothing nerves. The fact that modern automobiles are of low design and safe construction con-

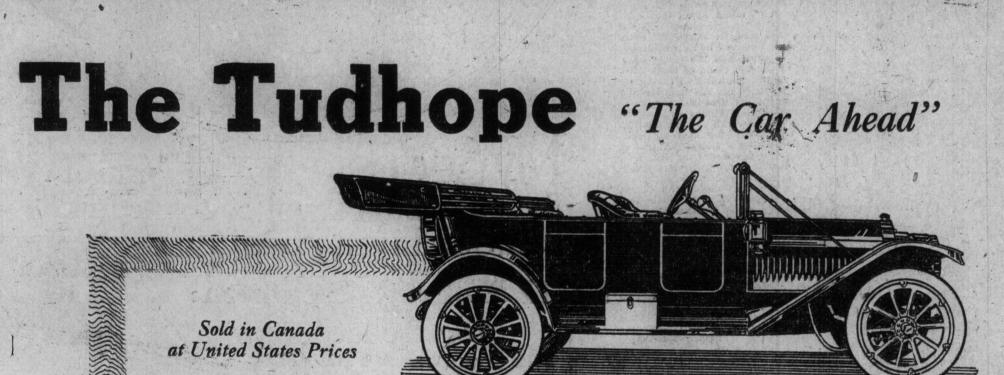

motoring has led to an investigation of the underlying causes. "As near as I can figure it out," says a London physician, in a report le-ceived at the Regal factory, "the scientific fact is that the circulation is stimulated by the increased pressure of the wind acting on the body, the effect being enhanced, moreover, by variations in its force. The effect is very similar to massage; the entire body yielding to the invigorating conbody yielding to the invigorating con-tact. The cheeks at first take on a lives of their natural vivacity and

tact. The checks at first take on a slightly white tinge, owing to the little blood vessels of the skin being somewhat constrincted; the color deependence of the vessels become enlarged in response to the increased supply of oxygen. Brain Affected. "This quickening of the blood affects the over-activity of the brain after the brain also and as it responds quick by the orein using the over-activity of the brain also and as it responds quick by the orein activity of the brain also and as it responds quick of or cygen in the system has the re-

toring affords is to bring them into closer harmony and induce perfect sleep.

Germ Allments. "Of the allments caused by germ that can be benefited by motoring there are many. Fresh air and sun toring. light are inimical to many germs and advantage of this fact is taken in the treatment of various diseases. It is treatment of various diseases. It is therefore, not surprising that motoring has proved a most useful agent in the treatment of these germ-produced dis-eases. The germs cannot live in a hu-man body that receives proper exercise, food and an ample supply of oxygen. As dandruff and baldness of the head are often produced by gorms, he trouble may not only be alleviated but often cured by open air driving in

motor car. "It must not be inferred that, toring is a cure for everything

# "Macushla" Is a Romantic Drama

Mrs. Rida Johnson's Novel Stands On its Own Merits.

a so man - have In "Macushla," which comes to the Princess Theatre for one week commencing Monday evening, Mrs. Rida Johnson Young has written a romanticdrama which stands on its own artistic merits, and she has fitted her dramatic garment to the manly form of Chauncy Olcott. Mr. Olcott seems to have come into his own as an actor, and he makes the most of every dramatic possibility the playwright has given him. As usual Mr. Olcott's play is hapdsomely staged. As a young Irish-American of the early nineteenth century period, the hero, Brian Fitzger-ald (Mr. Olcott) has opportunity to wear the tight trousers and gay silks of a jockey and needless to say he wears them becomingly.

ext of Mr. Olcott's play. Mr. Olcott's new songs are said to only strengthens her young lordling's

carefully designing for center control Our iron steed is tried and true. Its sinews all are bright and new, and then deliberately blocking one of We trust that it will never fail, As on we fly o'er hill and dale.

> Thru vales with towering hills on high We onward speed with ne'er a sigh, The river winds just at our feet With rippling waters pure and sweet,

A village in the distance seen, With children playing on the green. They give a cheer as we pass by, With childish twinkle in their eye. The elders stop to see our steed.

And in our faces pleasure read, As for one moment we're in view, Then speed away to scenes anew.

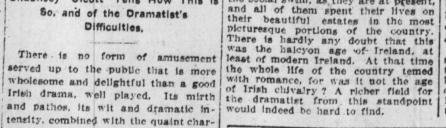

The city lures us with its light As falls the curtain on our sight,

It is not always easy to get a good play of this class, for the making of the Irish drama is a task that may not be attempted by many playwrights. Unusual qualifications on the part of the playwright are called for that few other branches of dramatic literature require. Let us analyze the making of a play. The plot is the first thing. That was the declaration of one of the old Greek authors who wrote comic opera libretto to amuse the theatresoers of Athens a couple of thousand years ago. As well as I remember my rehool books. I believe it was Aristo-phanes who said it. He knew, for he wrote more than Augustus Thomas. and made quite a few successes, too. At any rate, the saying holds as good to-day as it did in the days of that ancient Greek. The plot is the first thing, but it is not the main thing. While it is the first element in the play to be chosen. Its treatment is more important. Here is where the difference hetween the skilled and the amateur between the skilled and the amateur builder of plays first appears—usually to the disadvantage of the amateur. The plot of the story is like the theme of a song; almost anyone with music talent can invent a fairly good melody. but it takes a rare genius and a train ed che to develop it into the perfect song. So it is with the plot of a play. The experienced author takes a theme or plot and studies the dramatic poss!bilities of it with that keen sense of analysis developed by study and long

secondary plots and new incidental characters so as to bring about his imaxes in the most natural manner. The amateur, on the other hand, The amateur, on the other hand, flounders hopelessly thru the whole story trying to make climaxes out of the weak points, and often passing over concrunities for strong situa-With him the story is the whole thing and the telling of it a secondar

acterization, make it always interestng and refreshing.

# SIX BROWN BROTHERS

training. He skilfully leads into the channel where it will be best devel-ored, scene by scene, up to the grand elimax that thrills the audience, and is the culmination of the grand interest of the story. From this point on is only what might be called the compen-sating scene to finish the story satisfactorily to the audience. There is where the experienced dramatist shines. Having shaped up his mind theme in the rough, he adds the

matter. Not so with the professional writer. He may regard the story as

the intrinsic qualities of sex re-ance (head and chest), all interm iate voices being made up of an termixture of the two principals. If re-onance is characteristic of the d rest and recuperation will find it that necessary to go to distant resorts. A bubbling fountain has been in-stalled near the Bloor-street entrance opposite High Park for the benefit of the general public, and the management have in contemplation the con-eral. The deductions herein given are based of this in the male child voice of ing from effeminate delicacy of hood to masculine robustness, wh ment have in contemplation and the following scientific data: truction of a large outdoor swimming bath to utilize the waste water. The deductions herein site ata: on the following scientific data: That the fundamental principle of the truction caused by the yocal

is notably conspicuous that we fin such natural change in the f voice is vibration, caused by the vocal cords resisting breathe presure. That vibration, reflected into the hol-low spaces of the head, produces rechild voice. Scientific research in connection the register theory concentra point, that one of three dis

of muscles is brought into play vigorously than the other two at different degrees of the scale; bu two sets can act independently That resonance, being the product of two rets can act independently of other one, a fact which goes to p that these muscles must be free to unrestricted and unimpeded, other functional action, in bearing the gr er strain at their several degrees, be immunities

That the three principal organs of impossible. voice, viz., the pharynx (throat), larynx (vocal organ), and soft palate (the con-

That there are changes or tr of resonance is indisputable; I are not sufficiently preceptible troller of superior head resonance), do not act independently of one another, accentuated, to warrant the tern accentuated, to warrant the term re-ister or division; in many instan-only the most sensitive hearing co-distinguish them, and it is not u-common, especially in the untrain voice, to find such to be non-existen This latter may be attributed to central position of the larynx where it forms an excellence attributed to but conjunctly, forming a triple action directly under the influence of the pharynx (throat), which, in turn, is

retain their individual chara

ous that we find

That the depression of the larynx stretches the vocal cords, and that the elevation of that organ allows the na-tural action of cord contraction. it forms an equalizing adjustment tween high and low resonance, a important factor in the so-called of voice. That the larynx is depressed by the exaggeration of sombre tone quality,

exaggeration of sombre tone quality, and elevated proportionately as the quality becomes brighter. That the stretching of the vocal cords lowers pitch adjustment, and that the properties of the cords raises pitch while, if head resonance be of the cords raises pitch are not distinguished

contraction of the cords raises pitch adjustment. Therefore every tone color or quil-ty, which the vocal apparatus is cap-able of forming, is an individual pro-duction, embodying distinctive physi-ological action, under the direct con-trol of tone color, the influence being muscular action caused by the effort to form a given yowel or tog color

Voice is built on resonance, thirds of which are derived from cavities above, the larynx, the form a given vowel or tone color. cavity acting only as resonat transmitted resonance, from those Hence, physiological action does not control, but is controled by tone color, which is formed prior to vocalties, so, by training the voice d we develop the lower and lowest to on principal resonance, and not tial or reflection, each tone as it

The instant we think sombre tone quality we form physiological condi-tions for the production of that quali-ty, viz., the dilation of the pharynx, is the raising of the soft palate, and the decent of the larynx, as in yawning, while, if the tone quality of our in-tertion he bright the pharyny is conscends accumulating chest re accordance with the natural der of the individual organ.

It is the want of appreciation o intrinsic properties of the higher re ance, as a primary builder, that ve in general are so mediocre in qu and lacking in individuality, then in proportion to the degree of sombre-ness, or brightness of tone quality. Therefore, voice is breath pressure playing on an adjustment of the vocal taken character may also be taken character may also be attri-ed to the same cause. No great servation is necessary to noting the altitude of the superior voice far greater than that of the ordina and again, while it is the object of teachers to develop flexibility spontaneity in the voices of their plie, the majority endeavor to do thru the majority endeavor to do ords, formed not by any one organtic action, but by general muscular action of the vocal apparatus in forming the different vowels or tone colors. Perceptible transitions occur in the

bru the medium of the most sh female voice only. The tenor, the high-est degree of male resonance, can prodegree of the vocal scale. duce a cimilar effect by changing to "falsetto" (head or female quality); The conclusions are that registers, called, are in reality changes in the contralto, the lowest degree of fe-

conance quality, that interrupt tion and equalization are caused the introduction and deve esonance foreign to the sex con tion of the female organ.

SPARROW-CASWELL - On Sature May 11th, 1912, by the Rev. Canon Co Sadle Louise, only chughter of Mr. Mrs. Caswell, to William George Sp row, eldest son of J. W. Sparrow, to to masculine resonance in her lowest of Toronto.

Thomas Sackville and Francis Beau-mont are the only ones of the group who did not survive the poet. "Beaumont died one month before Shakspere, while Fletcher survived his brother poets by nine years. It is gen-erally admitted that Fletcher and Shakspere collaborated on several plays. The plays of Beaumont and Fletcher, during their day, were even more popular than Shakspere's, but are rarely seen on the stage of our time. In front of Beaumont we discover Francie harmonizing with the expression of his friend, the Earl of his friend, the Earl of his friend, the Earl of the latter phrase referring to Bacon's treatment of his friend, the Earl of Essex. Bacon outlived Shakspere ten years. As in so many ancient documents the northwestward by the Edgware-road.

stratford and Chandos portraits. In the latter, the poet, except for the mus-tache, is smooth shaven. While the Stratford and Chandos likenesses may be purely imaginary compositions, they better satisfy the mind; they are more agreeable and prepossessing. # OZONE THE MOST ENERGETIC DISEASE MAKER IS THE BAD AIR WHICH WE BREATHE

THE AIROZONE ELECTRIC VENTILATOR solves the problem of Ventilation and PURE AIR by introducing free OZONE, destroying all noxious gases and other impurities contained in the air, and giving an exact duplicate of the best atmospheric conditions, as found at the seashore, or in the mountains.

The apparatus can be attached to any electric light socket and turned on and off at will, the same as an electric light, and the cost for electric current is only one-tenth of one cent per hour.

The Airozone Electric Ventilator is successfully and efficiently employed for deodorizing and sterilizing the atmosphere in

# RIAGES.

ELL - On Saturde the Rev. Canon Cod caughter of Mr. an William George Spar J. W. Sparrow, bo

white paper. Pian out the route, and insist upon his traversing it with dignity. The instant he jumps, give a savage jerk to his chain, and compel him to commence again from the start-

ing-point. It takes, as a rule, several days be-fore the instinct to jump is completely conquered, but the time varies con-siderably. Scotch fleas are habitually dour and difficult to master, but they have great intelligence, and become very willing workers. The Yorkshire breed, quick and bright, but inclined to be a bit too tricky.

The only chap that could not be broken in came from Dublin. The trainer, when relating his ex-periences said:

periences said: Try as I would, I was rewarded by nothing but disobedience, when I was seized with a truly brilliant idea. I erected a miniature lamp-post on my show-ground, and tied him to it at per-formance-times. Here he vented his spleen in wild jumps and gesticulations, to the great amusement of the specta-tors, who read the tiny-notice, "Votes for Women," attached to the lamp-post. post.

# Some Exclusive Effects.

But the flea is not a Marathon run-ner, and his pace must be accelerated before he can appear with distinction before the public. I make him walk across a plate held over a small gasstove. As the heat grows more intense. he starts hustling to get off. I allow him no short cuts, however, but insist on the straight road, which he takes at top-speed. If any sluggishness is sub-sequently shown, the hot plate will always effect a cure. The theatre proper for displaying the

dusky liliputians consists simply of a small table with white painted top, but the "props" and accessories are genuine little models, perfect examples of craftsmanship in miniature construction. I make all my own models, and create exclusive "effects." My fleas drive motors, fire off cannons, set windmills in motion, draw water, ring bells,

To be perfectly truthful, I must admit that most of the tricks are done merely by the fleas walking, and by taking advantage of their great strength; but. of course. during my lectures I am inclined somewhat to overstate their

"O, O, glory, what a feelin'! Wonderful what TIZ will do for your feet" Just take your shoes off, and then put pestered, bunior-tortured feet of yours in a TIZ bath. Your toes will wriggle with joy. They'll look up at you and almost takk, and then they'll take another dive in that TIZ bath! Yes, TIZ is life to feet! The man or woman who says there's had a foot in a TIZ bath. When your feet ache, get fired, swollen, tender or sore, just try TIZ. Your feet ill just feel fine; also your corns, bun.

right hand side of the stern, stern being itself a contraction of steer oar. The right hand side of the shin thus became the steer side, and as bord came to mean the whole side where the shields or bords were hung, the right side came to be the steer bord, star-board, side, and the lower or jurking

side became larboard.

"THE SWORD OF DAMOCLES." By Herbert Gandy By Permission of the Autotype Co., 74 New Oxford St., London

# How the English Husband of the Lovely Princess of Cooch-Behar Dares the Hanging Scimitar that Threatens, Like Damocles' Sword, the Holder of That Indian Throne

(Now Mrs. Lionel Mander.)

RINCESS PRETIVA of Cooch-Behar is a very beautiful daughter of the Maharajah of that curious little Indian State. Princess "Pretty," as she was known in England, has just married Lionel Mander, a very rich Engdishman of noble family Most of the English greatnesses were at the wedding, and so were Prince and Princess William of Sweden.

A! HA! CAN'T

A.)

S

TO ID IN

HE'S

G! -

SCA

It just happened, however, that, although, England liked this union of East and West, the nobles of Cooch-Behar are not at all pleased. The result may be a very uncomfortable quarter of an hour for Mr. Mander and his bride. Like the famous legend of Damocles, who sat beneath the sword which was suspended by a hair, so may the English bridegroom—when he goes to Cooch-Behar—have to sit beneath a sharp scimitar suspended by frail silken cords and hanging just above his head. If he refuses the test his wife will lose her caste and be exiled from her native state.

At the same time much disgrace in the eyes of his subjects will be the portion of her father, the Maharajah, her mother and, indeed, all her family.

The princesses of the reigning house of Cooch-Behar are known as the "Brides of the Sword." How this came about and how Mr Mander's predicament follows is one of the most curious things about mysterious India. Legend has it that Damocles was a rich citizen of Syracuse. Dionysius, the tyrant of Syracuse, became annoyed at Democles's growing pride. He invited him to a banquet. When Damocles was seated he saw above his head a sharp-pointed sword being suspended by a slender hair.

"This is to show you upon what a slender thread life, fortune and all other earthly things hang," said the tyrant, and so Damocles was forced to sit throughout that banquet, wondering whether the hair was going to break or not and the word descend upon him and kill him. There is nothing in the legend to show the interesting condition of Damocles's digestion the

next day. Now, Syracuse has nothing to do with Cooch-Behar, but the sword test is almost the same. Its reason lies in a very curious custom of ancient peoples. They thought that in their kings lived a part of their god's spirit. The deity looked after the crops, the rain, the flocks, increase in the family, and so on. Naturally they always wanted to have this protective spirit keyed up to its best standard of efficiency. They thought that if they let the king grow old the god within him would grow old, too, and would not be so capable of looking after the fortunes of the nation. And so they let the king reign for a certain period of years, usually not more than eleven, and then they killed the king. The spirit which was in the king was supposed to go to his successor, a younger man, and so the god spirit never grew old and tired and ineffective.

In Cooch Behar this right of sacrificing their kings has come down to a point where the nobles, if they wish, have the right to suspend over the

head of their Maharajah once every number of years, and for a certain number of hours, a sharp scimitar. The scimitar is held by fine silken threads. If the threads breaks the scimitar falls upon the head of the Maharajah and kills him. If the thread doesn't break he is not subjected to the test again. The nobles have the same right to subject the husbands of the princesses of Cooch-Behar to this test. Only once in 150 years has this test been made, and then with fatal results to the ruler. And so Mr. Mander, in taking Princess "Pretty" may have to take his chances with the suspended sword, especially if, as is reported, the nobles do not look with favor upon the marriage. If he refuses the test he will never be able to occupy a pleasant posi-tion in Cooch-Behar, and his wife will be exiled.

have to the susif, as is not look iage. If ill never ant posi-

religious and probably initiales the time has come to face this of eugenics, to cease bringing i (Copyrighted.) A good deal of prominence is being A good deal of prominence is being given in various literary publications to the Swedish critic, Ellen Key, and her opinions on love and marriage, and what might be called modern mor-slity. Ellen Key has stirred old-fash-

d people to anger by her passionate plea for a re-valuation of sexu-al morality. To the Swedish writer, as to most thinkers, what is called 'Eugenics," is the most vital question of the day. Our ideas about race need re-modelling. Our ideas regarding love and marriage are not advancing , step by step with the different conell as the little ditions which the various revelations of science are bringing about. In plainer hich of us has not at one tim bich of us has not at one tim other had our fortune told? ery fete you will find the pain om the most crowded. Ch e world's greatest palm-reader, ords while the world is progressing amble along in the old way which is that outside marriage there ould be no question of love between

holds that outside marriage there should be no question of love between the sexes. There is nothing neurotic or unit transmon sort of immorality known as the Social Evil. She is concerned en-tirely with the change which she per-ceives is going on in opr ideas of the morality of the sexual relations as they are upheld by our religions and laws. Her point is that the theory of evo-bution is no longer a religious but a moral question. Man is not perfect; was not created perfect, and is there-fore capable of being perfected. The Lutheran doctrine of marriage, which saw in wedlock the means given by fod to satisfy desire, is held by Ellen troin it to be not only ignoble but pos-litively harmful since marriage enter-ed into by unsuitable persons and from the lowest motives is "blass-ed" equally with the union which is not only sanctified by Love, but is on which, from the physical standpoint, is bound to beneft the race. This question of doing what is best for the new morality which is enquiring into many things, such as labor, education many things, such as labor, education the most vital question of any. There is nothing neurotic or un-them or a suce as more are and in the tow and or any. There is nothing neurotic or un-them or a new as more assessed to be as and dose to a suce as the such as labor education and crime, but by this vigorous writ-et, as by many thinkers, it is held to be the most vital question of any. There is nothing neurotic or un-

hat until March 21, 1915, whi unction of the stars will he or the betterment of the nay expect "black months," lisaster, tragedy, fires an don." And to cap the c column received a nameless atton the other data forete the most vital question of any. There is nothing neurotic or un-clean or even suggestive in the ideas put forth so powerfully by this able writer, who, in regarding evolutionism as only "continuous experience," in fact "revelation," is volcing a thought that appeals to reason and sanity. Na-ture is by no means perfect since it is subject to transformations. That man can develop himself is Madam Key's argument, "Marriage by capture was once "nature" as courtship is now." So was man when he wore hair instead of clothes. And the race is destined to undergo fresh changes, but not un-til we realize that love, and love only, is the true basis of marriage; not until we make laws barring procreation to the unfit. It has often been remarked that of all living things the human race is the one most neglected in the matter of sex-union. The sick and the well marry without thought of any duty to the race. The feeble-minded, who should be cared for by the state, are permitted to people the more wrecks at seden you will most surely hear of them, for everything for good or evil happens in threes." We can never tell when or where we may fall against a prophet. They are all

### SPIRIT MESSAGES. By Hiram Corson,

Professor Corson's name is known to nearly all students of English literanearly all students of English litera-ture. Many students sat under him and heard him expound this subject at Cornell University. Since the world of literature is largely a world of im-agination, it may not seem unnatural that Professor Corson should have be-come a believer in spiritualism. Here we have the record of that belief and a somewhat axtraordinary record it is.

By Kennedy and Noble. This is a novel of fire insurance, plot is woven about two insur-companies, and deals with the bi tained in the book describes a great fire which sweeps the congested district of Boston, and burns out the tangled threads of the tale. Slightly Henry-Jamesian in style, but certainly unique as to its background. (Macmillan Co., publishle. a Soule, a medium in Boston, why, de sages can be sent from spirit th these spirits do not speak direct-their friends, is something I ts t understand( not being a Spiri-t), but here we have the messages b Corson has said they were | ers.)

I control help looking back at the noble company in the "Houseboat on the Styr" that humorous fantasy by John Kendrick Bangs, and I fear that I cannot take "spirit messages" much more seriously than the records of the meetings of Noah Munchausen and others of the Houseboat on the Styr. However, you may want to know By W. J. Henderson. Beginning with an account of the system of St. Ambrose, A.D., 284, this book traces the development of vari-ous scales and musical conventions. Then it discusses "Art Melody and Secular Music," "Instruments," "In-strumental Writers," concluding with a chapter on "Contemporaneous In-strumental Music." (Published by Longman Green and Co. New York.)

Howevek, you may want to know what hese messages are. The sad part of it is, that these great ones, once they cross the borderland are given to talk-ing vague, unintelligible generalities that bear little resemblance to their the strumental Music." (Published by Longmans, Green and Co., New York.) ties of mind while upon this A HOOSIER CHRONICLE.

Still these messages are slightly satisfying. We are usually wondrous to know just what is the occupation of our friends in spirit land. Evidently they continue at their former occupa-tions, at any rate Browning says he is still writing, more for Elizabeth's sake than any one else's, tho if you read the extract which he sent across the wireless path and which I quoted in a previous issue, I think you will agree with me that he has "fallen off" greatly since he left. Walt Whitman, too, continues to write, also Tennyson, while Long-fellow romps round with an attendant band of Indian spirits (playing Hi-swatha occasionally, I suppose). Goldwin Smith's message is summed up in the advice: "Keep busy, keep busy-work is the salvation of the race." Gladstone admits that his theology was wong. these messages are slightly Meredith Nicholson. Leaving the field of the light modern of novel. Nicholson attempts here to give y a chronicle of the politics of an Ameri-can state-Indiana. It is chiefly the Bassett, climbing the can state—Indiana. It is chiefly the career of Morton Bassett, climbing the ladder of popularity, latting few things hinder his progress. The author just saves him from becoming the out-and-out unscrupulous U. S. politician. The book is much better than anything Nicholson has yet produced, but falls short of the best that has been done in the same class by other U. S. writers. (Wm. Briggs, publisher.)

tific treatise of the problem, and in written in novel form, and whether the reader is interested in temperance or not, he will be enthralled by this en-grossing tale.

THE STORY OF MUSIC.

### ELECTRIC FARMING A notably successful experies

lectrical farming has been m William Stahl of Evanston, Ill., on his farm adjoining the Northwestern) University athletic field, and the results more than justify the added troub and expense.

The arrangement of the lectrifying the soil and plants ve the record of that belief and ewhat extraordinary record it is, tains a series of messages from irit world by members of a spirit among whose members were ing. Tennyson, Gladstone, Whit-Longfellow, Goldwin Smith, and wbo has been acquaintances of sor Corson upon this earth, was at together by Mrs. Corson within ears after her decease in May. This is a novel of fire insurance. The feet in height are set at intervals and is supported. This network is one side of a high voltage direct current cir-

of a high voltage direct current cir-cuit. For the other side of the cir-cuit a conductor is buried every 30 feet in the soil, the assumption being that with the overhead network a sin-sle grounded conductor would take cars of an area of soil 30 by 30 feet. At the power house, as the building containing the apparatus is called, cur-rent is taken from the alternating cur-rent lines of the lighting company and before being rectified is stepped up to 200,000 volts or more and sent out to produce its magical growth effects. A double throw switch enables the sardener to change the polarity, that is, make the overhead network positive a portion of the time and then by throw-ing over the switch make the soil the positive terminal. The results achieved if told in words or written might cause the credulous to doubt, but Mr. Stahl has taken num-erous comparison photographs of the

to doubt, but Mr. Stahl has taken num-erous comparison photographs of the crops on his farm. These comparison pictures are of plants grown under the same moisturs and soil conditions ex-cept that the plants are electrically treated in one case and not in the other. The corn field, which shows a good healthy growth, was planted June 5 and the picture taken August 15. An area 30 by 20 feet planted to melons yielded 360 sweet, juicy (Rockyford melons. One striking observation made was that the foliage of all the crops pre-May 13, fol pendicitis.

## CREATING A MARKET.

Sy George J. Thiessen. For years I struggled to place a

AGNES DEANS CAMERON manuscript. Every time I looked over the corps of brilliant writers which every magazine seemed to have, I grew more and more discouraged, for knew I could not compete with [ holds a wealth of material which pen can portray in such a manne-to interest not only its own people, those of other lands. Miss Cameron's "New North," scribed a 10,000 mile journey from o caso to the Arctic Ocean and re-by way of the Mackensie River. journey was accomplished in comp with her niece and secretary. I Jennie Brown, and material for cellent illustrations secured by c era. Miss Cameron afterwards w to Great Britain, where she spent years as a writer and lecturer in them. Finally, just as I was about to rive up, a happy thought struck me.

Why not write about something different from the rest? I knew, of rse, that this subject, whatever it ight be, must first of all be prac-

might be, must first of all be prac-tical-helpful to some one.' After days of hard thinking, I decided I would write upon trapping fur bearers. During the next few months I fur-nished material to magazines devoted to the interests of pelt hunters only. The literary standards, to be sure, were not high and the pay correspond-ingly low. I learned considerable, how-ever, and before the year was over "landed" a contract to write a trap-per's guide for a large fur firm in St. Louis. Immediately afterward I was asked by the editor of Successful Farming, Des Moines, Ia., to furnish his magazine with a series of articles. The work brought me fifty dollars. Since that time I have had hundreds of manuscripts accepted by agricultural to Great Britain, where she spent two years as a writer and lecturer in the interest of immigration to her native land. She died at Victoria, B.C., on May 13, following an operation for ap-Ontario Game and Fish-on. "An Ideal Canadian anuscripts accepted by agricultu apers all over America. to look after the best interests of two very lovely cousins, even tho the cous-inship be some twenty degrees re-moved. There is romance, it goes with-out saying, and the book is made of pages upon pages of those sprightly frivolities that have recently become Mr. Chambers' pet indulgences. As with The Common Law, the story be-comes a means of inspiration to a somewhat wholesale display of the facile pen of Charles Dana Gibson, and it speaks rather well for Mr. Chambers' powers of selling that his publishers are able to afford so many Gibson sketches for his books. A good sample of brillantly colored, delicate-ly flavored soda-water fiction. (Mc-Leed and Allen, publishers.) SALLY SALT.

ly flavored soda-water fiction. (Mc-Leod and Allen, publishers.) SALLY SALT. By Mrs. Wilson Woodrow. sequency found half-full of water and with their crews and passengers, num-bering in all one thousand four hun-dred and fifty-three. At a very mod-erate estimate, the value of these vessels with their cargoes could not have been less than five million pounds. The sum of human agony involved is terrible to contemplate. And every year vessels are posted as missing. The President, one of the earliest At-lantic liners, was the first steamer to be lost and never heard of again. She sailed from New York on March 11, 1841, with one hundred and thirty-six souls on board. She was a nearly new vessel, having left the Mersey or her first voyage on July 17, 1840. The

The President, one of the earliest At-lantic liners, was the first steamer to be lost and never heard of again. She salled from New York on March 11, 1841, with one hundred and thirty six souls on board. She was a nearly her first voyage on July 17, 1840. The commander was Lieut. Roberts, R.N., a man of iron will and resource. He had taken the Siris on her first voyage from Queenstown to New York in 1888 in eighteen and a half days. The Sirus was the first steamer owned by an English company which crossed the Kilantic, and but for the determina-

with an losberg or with a derelict hulk; and mysterious causes. In reference to explosions, there are two possible causes. One is due to the steamboliers, the other to coal-gas senerated in the bunkers. Accidents from both causes have frequently oc-turred; and the it is not easy to see here to rend a vessel asunder without affording time for the use of boats or life-saving appliances, yet the possi-always in the bottom of the vessel, and it is quite conceivable that one or more boller-explosions would rupture the sides and let in the water in large volumes. In the case of a tug in Car-diff Harbor this actually happened. And althor the loss of no big vessel has been traced to this cause, it must be admitted that the cause would be suf-clear. Explosions of coal-gas have occur.

duty is to convey messages from the body to nerve centres. The rate of impulse in the sense nerves is quicker than in the moti-nerves. Investigators give varying rates, from about 165 feet to 675 fe per second, an average rate being 2 feat

rates, from about los lost to the larger per second, an average rate being 22 feet. Physiologists have made careful calculations regarding what is called to calculate the interval which elepses between the impression made on our organ of, sense and the giving of the signal which registers the impression as received by the brain and translated into terms of consciousness.

Different results, due, no doubt, to the varying nervous capacities of the individuals, have been obtained. In one series the interval averaged .1087 of a second, and in another .1911.
