The Function

of the kidneys is one of the most important in the human economy. Into everything we eat and drink, no matter how "pure" the food is labeled nor how careful we are, poisons enter. Were we not provided with organs especially designed against these poisons, human life would soon perish. The kidneys are the filters of the blood. They catch the poison in the food and expel it from the system. To do this they must be healthy and vigorous. When they are weak, or overworked, or clogged, or handicapped by disease in even a slight degree, they work imperfectly, or nor at all. The best remedy for disordered kidneys is

DR. SHOOP'S Rheumatic Cure Costs Nothing If It Fails.

Any honest person who suffers from rheumatism is welcome to this offer. I am a specialist in rheumatism, and have treated more cases than any other physician, I think. For 16 years I made 2,000 experiments with different drugs, testing all known remedies while searching the world for something better. Nine years ago I found a costly chemical in Germany, which, with my previous discoveries, gives me a certain cure.

I don't mean that it can turn bony joints into flesh again; but it can cure the disease at any stage, completely and forever. I have done it fully 100,000 times. I know this so well that I will furnish my remedy on trial. Simply write me a postal for my book on rheumatism, and I will mail you an order on your druggist for six bottles of Dr. Shoop's Rheumatic Cure. Take it for a month at my risk. If it succeeds the cost is only \$5.50. If it fails I will pay the druggist myself—and your mere word shall decide it.

I mean that exactly. If you say the results are not what I claim, I don't expect a penny from you.

Abolition Will Not Come Into Effect Until June 30.

London, April 28.-It is announced that the abolition of the grain will not come into effect until June 30. This will give the Chancellor of the Exchequer revenue, but shipping men fear that it will have the effect of rendering the shipments of grain from America very light until July. As many shippers as possible will store their grain in the United States and Canada in order to avoid payment of the taxes, and the result will probably be that grain cargoes from west to east will be a great deal lighter than usual this spring.

NIP DISEASE IN THE BUD.-It is difficult to eratideate a disease after it has become seated, therefore it is wise to take any ailment in its initial stages, and by such remedies as are sufficient, stop it in its course. Cold is the commonest complaint of man, and when neg-

There is plenty of water around London. How much more is available thorough search has been made. Probably not a great deal; but whatever can be found must be collected into our present system. But there is always the river nearby, and available for all purposes. That there should be a prejudice against its use for domestic purposes is very natural. The idea of drinking river water is not agreeable. It is not considered pure enough for the purpose. But the fact is too well established by chemical experiment, as well as by the experience of many cities in Europe and America, that the water from sources much more foul than our river is, or possibly can be, may be easily purified by filtration to a degree fully equal to any spring water. Mr. Sutherland pointed out how the manufacturers have prospered under the present tariff. He quoted Sir Charles Rivvesting their money extensively in new enterprises. The policy of the Governwould yet do much more to promote the development of Canada.

Dr. Roche, Marquette, charged Mr. Sutherland with bad taste in his remarks respecting Mr. Borden's acting as his own financial critic. It was in some respects fortunate for the country that the Conservatives now stituted the Opposition. Had the Liberals been in Opposition when such vast increases of expenditures were taking place there would have been such calamity howling as would have seriously worked against the prosperity of the country. GETTING MANY RECRUITS.

The approaching visit of the Seventh o Sarnia for Victoria Day, and the erection of the new armory, are supposed to be largely responsible for the addition of many recruits during the last few weeks. Every night that the regiment or an individual company has been on parade the officers have had applications from young men who desire to become members, and a large number have been taken on. To keep the regiment up to a high level, howthe officers have evercised the greatest care in selecting the recruits, thus insuring a better class of soldiers of the King. Last night there were upwards of 40 new members at the drillshed, and as they were not well posted in their drill they were ordered to remain behind for instruction by Lieut. Gregory. The latter is one of the best instructors in Canada, having been for some years attached to force at Wolseley Barracks.
