The Former Will Run Over the London and Port Stanley Railway.

For 18 Years-Good News for the Business Community.

(Special to the "Advertiser.") St. Thomas, Ont., July 15 .- Your correspondent learns today that the longpending negotiations between the Michigan Central and Canada Southern Railways on the one side and the Lake Erie and Detroit River Railway on the other, concerning running privileges over the London and Port Stanley Railway, have come to a satisfac-

tory issue. As a result of long and careful arbitration, an agreement has been arrived at between these corporations, by which the Michigan Central Railway secures running powers over the Lonthe whole term of the Walker (L. E. and D. R. R.) lease, which has yet eighteen years to run.

This will be pleasant news to the business communities of both London and St. Thomas, particularly of London, as it practically means permanent connection with the Michigan Central ing his hope that there would be a

Important Meeting of London Presbytery.

Induction at King Street Church, August 11-Rev. J. A. Macdonald's Resignation Accepted.

An important meeting of the London Presbytery was held yesterday at Port Stanley, presided over by the moderator, Rev. James Little, of Birr.

The most interesting feature was the presentation of a call to Rev. Thomas Wilson, of Dutton, from the King Street Presbyterian Church, of London, which was represented by Messrs. Cheesebrough, Black, McLean, Edy, McHattie, Patterson and McKay. Eight commissioners from the Dutton congregation also appeared to oppose the acceptance of the call-a high tribute to Mr. Wilson. Very effective speeches were made on both sides, particularly by the Dutton commissoners. The call from London was signed by 33 members and 48 adherents of the King Street Church, and bytery sustained it. The induction Little to preside, Rev. Malcolm Kay

f the commissioners to the General attending to them. Assembly was received and a motion made to the effect that those who have not reported were expected to do so in person or by letter at the pext meeting of the Presbytery. Rev. J. A. Macdonald, of Knox Church, St. Thomas, was then pre-sented. D. K. MacKenzle and other representatives expressed their sincere regret at the severance of the pastoral tie, yet on account of the honorable position to which Mr. Macdonald had | been appointed as editor of the Westminster and principal of the Presby-terian Ladies' College, Toronto, they acquiesced in his desire to be released from his charge. The Presbytery con-curred. Rev. John Currie, of Belmont, was appointed to preach the pulpit vacant and act as interim mod-

erator. Mr. George Gilmour, B.A., of the North End Mission, London, then passed a most creditable examination before the Presbytery, and was duly licensed and received the same as a minister in the Presbyterian Church. Commissioners were appointed to visit the augmented charges.

Rev. Thomas Wilson, the latest acquisition to the London Presbyterian oulpit forces, is a young man, and graduated ten years ago from Knox College. Dutton was his first charge. It was then only a mission, but he has built up a flourishing congregation, the best evidence of his ability and success. He and Mrs. Wilson are both highly spoken of and their flock We were loth to part with them.

> MARRIAGE LAWS AMENDED. Berlin, July 15 .- The Federal Council has rejected the Oleomargarine Bill, which was recently passed by the Reichstag. This bill, had it become law, would, in effect, have prohibited the importation of oleomargarine from the United States. The council adopted the Civil Code Bill, relating to civil marriage and the property rights of married women. This bill was passed by the Reichstag on July 1. One provision of this law makes a civil ceremony compulsory, and another makes 21 years the limit of age at which parental consent is requisite. In the preliminary stages of the bill a clause was stricken out which makes incurable insanity a ground for divorce.

# THE PARIS SENSATION.

President Faure's Assailant Probably a Innatic-Says He Used No Bullet

Paris, July 15 .- It is stated that the man who shot at President Faure yesterday at Longchamps is Francois. the same lunatic who recently threw a bundle of petitions from the gallery of the Chamber of Deputies into the body of the House, thereby causing a semi-panic among the members, who imagined that the bundle was a bomb. Francois, when examined by Prefect Peine, said that in discharging the revolver he merely

wished to attract attention. He reiterated his statements that he had no wish to injure anybody, and that the weapon was loaded with only blank cartridges. Francois was formerly a street surveyor, employed by the municipal council of Paris, but was discharged owing to his presumed Anarchist tendencies. The special offense which led to his discharge was the publication of revolutionary verses. His residence was searched by the police, but nothing of a suspicious nature was found. The officials believe that he is insane. During the commotion which followed the firing a reputed Anarchist named Boulant was arrested for saying, "That's the sort of fellow for me. He has done the proper thing." This approval of the outrage is a penal offense under the anti-anarchy laws, and Boulant stands a good chance of spending a few years in prison. The feeling of the crowd at the reviewing ment of a waiter at the cafe at the Grand Cascade. In some way this man was mistaken by the crowd for Francois, and a savage attack was made upon him. One of his eyes was torn from its socket, and he was almost lynched before the police were able to rescue him. The news of the shooting had preceded the President to Paris, and as he was recognized by the people on the streets, through which he passed on his return, he was greeted with cheers and congratulations. In the evening the diplomats and a large number of prominent men called at the palace of the Elysee and congratulated M. Faure. Several sovereigns sent telegraphic

messages of congratulation. Many persons believe the story of the prisoner that he had no intention of harming the President. It is evident from the facts that have been learned that M. Faure would not have been in any great danger, even if Francois had used ball cartridges. Francois stood behind the troops, who lined the wide road, and at the time the President's carriage were trotting fast. The carriage was surrounded by a cavalry escort, who raised a cloud of dust, which obscured the carriage and its occupants from view. Had ball cartridges been used it is probable that one of the cavalrymen, rather than the President, would have been

shot. The incident did not check the gaieties of the fetes, which were progress in the sity and suburbs in

# Our I's and.... .... Other Eyes.

Our I's are just as strong as they were fifty years ago, when we have cause to use them. But we have less and less cause to praise ourselves, since others do the praising, and we are more than willing for you to see us through other eyes. This is how we look to S. F. Boyce, wholesale and retail druggist, Duluth, Minn, who after a quarter of a century of observation writes:

"I have sold Ayer's Sarsaparilla for more than 25 years, both at wholesale and retail, and have never heard anything but words of praise from my customers; not a single complaint has ever reached me. I believe Ayer's Sarsaparilla to be the best blood purifier, that has been introduced to the general public." This, from a man who has sold thousands of dozens of Ayer's Sarsaparilla, is strong testimony. But it only echoes popular sentiment the world over, which has, "Nothing but words of praise for Ayer's Sarsaparilla."

Any doubt about it? Send for"Curebook" It kills doubts and cures doubters.

AQUATIC. CANADIAN YACHTS WIN. Detroit, Mich., July 15.-One of the best races ever sailed on the Detroit River and Lake St. Clair was that in which the Alborake, Surprise and Josephine were factors in the second regatta of the Citizens' Yachting Association. The Alborake, a Canadian yacht, owned and sailed by Major Beattie, Windsor, won the race. The finish was processional, the Surprise being first, but, boat for boat, she only beat out the Alborake about five miles, while the time allowance was double that. The Josephine was third among the Center Island, Oyster Bay, July 15 .-

A hot sun and a bright sky, with scarcely a puff of wind, greeted the many yachitismen who assembled here this morning to witness the second trial of the Canadian and American half-raters, the El Heirie and the Glencairn, for the Seawanhaka international challenge cup, the Canadian entry, Glencairn, again landing a winner in 8 hours, 18 minutes, 16 seconds, defeating the American representative by 6 minutes, 22 seconds.

Tell the Truth and Nothing But the Truth.

817 Citizens of London Called Yesterday at the Wholesale and Retail Drug Stores and Purchased Munyon's Remedies.

Where can you find in the annals of medicine such a complete victory over evolent purposes and determined character, unfolded his new school of medicine through the medium of the press to the public. Confident of the honesty of his mission, he asked the citizens of the United States to test his remedies, "absolutely free," and therefree from pain will bless the name of Munyon, the modern benefactor of the human race.

The unquestionable merit of Prof. Munyon's remedies has stood the test for the past five years, and now the name of Munyon is a household word in every family in the United States and rapidly becoming so in Canada, proving without doubt the efficacy of his cures, and the honest victory he has won against overwhelming odds. To the skeptical we would say: If you are careless regarding your own health have mercy on the little ones who know no better, and do not commit the sin of neglect by continuing to give remedies that will doubtless harm them in after life, when you have within your reach, at a nominal price, cures that will effect the desired result without injury to the system.

THE BARNES MURDER.

Smith's Falls, Ont., July 15 .- The adjourned inquest in the Barnes murder case was resumed yesterday, and as no further light has been revealed, it was decided, on consultation with the county attorney, to close the matter. The jury, before dismissal, ren-dered the following verdict: "That the deceased, Thomas Barnes, came to his death by a pistol shot at the hands of some person or persons unknown." This concludes the case for the present.

The average age of the Cabinet Ministers is 551-2 years. Sir Oliver is the oldest, being 76; Hon. Mr. Scott is 71; by worry over his son's proposed mar-riage to Miss Wilson. So ill was he Hon. Mr. Laurier is 55. It is noticeable that of the four Cab-

inet portfolios assigned to Quebec two ed with his father. Mrs. Vanderbilt have been given to Protestants. In the Thompson Ministry there were six Catholics in the Cabinet, and five in the Tupper Ministry. There are only four in the Laurier Cabinet out of a total of sixteen. The following table shows the num

ber of Cabinet portfolios held by On-

tario and Quebec in each of the several

Ministries since Confederation:

-Macdonald, 1867 .....4 2-Mackenzie, 1874 ......4 -Macdonald, 1878 ...... 4—Abbott, 1891 ..... —Thompson, 1892 ......3 3—Bowell, 1894 ......3 7—Tupper, 1896 ......3

B—Laurier, 1896 ..... If the Controllers and Solicitor-General are counted, though they were not of the Cabinet proper, the figures would stand as follows:

Thompson ......5 Bowell ......5 Tupper .....4

Laurier ..... None of the above figures include Ministers without portfolios and consequently without salary, without departments, and without patronage. They show that of salaried men with departments and patronage Ontario has been given one more than in the Tupper Cabinet and Quebec the same number as in the Tupper Cabinet. But more than this, these figures, taken from the official records, show that for the first time since 1878, when Sir John Macdonald gave Ontario five portfolios, has Ontario received the same number. No Premier has treated Ontario so generously since the time of Sir John Macdonald as has Mr. Laurier. He has not degraded the Ontario Ministers to the rank of Con-trollers. The critics who are straining for points to make against Mr. Laurier say that it is a great pity Ontario has no great spending department. Whether it should be a great pity or not, Ontario has, as a matter of fact. The department presided over by Mr. Mulock, of Toronto, spends more than all the four departments combined which are assigned to Quebec. The figures in the public accounts for 1895 show that the total expenditure under the control of the de partment assigned to Ontario was \$5,-50,000, and that of the departments al lotted to Quebec \$3,521,000. Ontario, therefore, as the premier Province, has the largest number of first-class Cabinet portfolios since 1878, and is given the most important Departments of Justice, Trade and Commerce, Postoffice and Customs, in addition to the office of Secretary of State. Quebec has

been content with two important departments and two minor ones. The Ottawa correspondent of the Toronto World says: "One of the cooles men around Ottawa during the past few days has been Jim Sutherland The chief Ministerial whip has had as much to do in the formation of the Government as any other man except the Premier. Jim is a devoted followe of Hon. Wilfrid Laurier. It is said he is not in politics for what can be made out of the game; he is there from conviction. And when Mr. Laurier offered him a portfolio, Jim magnanimously stood aside and suggested to his chief to look elsewhere."

# AN ALARMING INCREASE

The Prevalence of Female Complaints Found to Result Largely from the Kidneys.

Saginaw, Mich., July 13.—Doctors are beginning to turn their attention more exclusively to the causes for the great increase of what are known as female complaints during the past ten years, and to the remedies for the same. Many cases have been investigated, and among others that of Mrs. Reany, of Ashland, Wis., who was cured of this form of trouble by the use of a kidney medicine known as Dodd's Kidney Pills, which originated in Canada, but has now become wideknown and used throughout the Western States. This and other similar cases go to show that these troubles are largely due to the kidneys, and that the above-mentioned rem edy is likly to have a great effect in lessening the number of victims to this form of complaint.

Ontario's New Premier.

of the Dominion, Sir Oliver Mowat has resigned his position as Sturgis Hardy, his trusted for many years, has, at the bidding of the Lieutenant-Governor, Yormed a new Administration.

The new Premier of Ontario is a de scendant of the United Empire Loyal the Niagara River at the time of the The family settled on lew years later. Mr. Hardy's grandfather moved to Brant county, and at on Dec. 14, 1837—the day the column of royal troops, under Sir Allan McNab, marched through the viltarlo was born. He received a good Rockwood Academy, and was appren-Hon. E. B. Wood, John Hilliard Came-Ton, M. C. Cameron, S. B. Freeman the Blakes, Chief Justice Harrison, B. B. Osler and others.

Having served his apprenticeship in advocating the cause of others, Mr. Hardy proved a strong candidate when, in 1873, he ran for the Legislature, and carried South Brant in succession to Hon. Mr. Wood. From that time till now, Mr. Hardy has been retained as member for South Brant, sometimes by acclamation, but always by large majorities. In 1877 Sir Oliver Mowat invited Mr. Hardy to join his Cabinet, and for the long period of Sincteen years he has remained a bulthe Administration, doing good service for his native Province for twelve years of that time as Prowinchal Secretary, and for the remaining seven years as Commissioner of Crown Lands.

The new Premier has been a hard worker. He is a model executive offiver, and has always managed his department with scrupulous fidelity. But, while making a record as an administraftor of a high order, Mr. Hardy has also promoted very many valuable reforms that have been productive of benefit to the people. Mr. an excellent debater, whether in the House or out of it. No public Mever in popular, progressive Government, but has always held to the precaution, "Be sure you are right before the recent election? you go ahead."

The elevation of Mr. Hardy to the Premiership causes little change in the Administration. In the new Cabinet the strong men of the Mowat Ministry-Messrs. Ross, Gibson, Harcourt, Dryden and Bronson-are to be found, such a start, Mr. Hardy's Premiership should be long, successful and beneficial to the Province.

Philadelphia Record. Major Sanders, of Louisville, who calls that in January, 1865, he tried to buy a handkerchief in Meridian Mass., but found he could not afford it, the price (in Confederate money) having been \$360, and as a compromise he bought a paper collar for \$125. With gentlemen to whom collars and handkerchiefs are a superfluity, have very little weight. The marve is that the inflation craze should have got such a hold upon the people of the south, where the bitter experience with Confederate money should have lasted for the present generation at

Mr. Dobell was educated at Liverpool College, and came to Can-ada in 1857, when he was 20 years of age, and settled in the city of Quebec. For many years Mr. Dobell was associated with the Conservative party in politics, but on the occasion of the bye-election in Quebec West in April, 1895, he signalized his defection from that party by standing as an in-dependent candidate against the Conservative nominee, Mr. Thomas Mc-Greevy. The contest was very close, Dobell, who was in England time, was at first reported by a majority of seven. The recount, however, gave a similar ma-jority to Mr. McGreevy. At the re-cent election Mr. Dobell was again a candidate, and on this occasion he was successful. Mr. Dobell is a member of the Church of England. # NOT REAL COAL

Supposed Coal in Algoma Proves or Analysis to be Something Else. Some two weeks ago the Bureau

tler of the township of Balfour, some fifteen miles west of Sudbury staion, that he had discovered a deposit of what he termed smokeless coal. He had the idea that the Government of Ontario had a standing reward for the discovery of coal in the Province and wished to know if impression was correct. He was told that there was no reward offered by the Government, and doubt was expressed as to the existence of coal in that locality. A sample of the mineral was asked for, and with it came a letter describing the posit as being about ten feet wide at the surface, and extending for a was shown to Dr. Coleman, who said that it was strange to him, that it not true coal. A sample was was sent to Prof. Ellis, of the School of Practical Science, to be analyzed, and another was forwarded to Ottawa for examination by Dr. Dawson, director of the geological survey. Dr. Ellis has not had time to analyze it so far, but Dr. Dawson reported the was anphraxolite, which is known to occur in some of the older rocks in Quebec and also near Port in this Province. Dr. Dawson had the sample analyzed by Mr. Hoffman, who described it as consisting of an association of anphraxolite and quartz, the latter forming about 60 per cent of the whole. The large percentage of quartz essen its value as a fuel to be used for smelting purposes, as after consumption the quartz would be de-posited as ash. The township of Balfour, according to the report of Dr. Robert Bell, of the geological survey, lies wholly in what is believed be the cambrian formation, and if real coal is found to exist there it will upset all the accepted views of geologists as to the coal age of the

At the justice works on Carling street this morning, business was a little slack. There were no desperate cases, and the court was short-lived. The reverend gentleman thought there was no need of talking of the difficulties connected with the church, but would simply say that all they needed was able and influential workers. Next week he intended to call a meeting of the different organizations within his charge to confer as to the best method of procedure. After the speech-making was over the congregation adjourned to the basement of the church, where ice cream and re-freshments were served.

Today's Opening of the Grand Lodge at Belleville.

Grand Master White's Interesting Annual Address.

London Man in the 'ace for the Deputy Gand Maste 's Chair.

The Collapse of the So-C led Ontario Grand Lodge Officially An iounced.

(Special to the "Advertiser.") Belleville, July 15 .- The 41st annual communication of the Grand Lodge of Canada, A., F. and A. M., opened here at high moon today, with a large attendance. Everything has been done by the board of general purposes and the citizens of Belleville to assure com fort to the visiting Masons.

This evening the visitors will be given a trip around the Bay of Quinte, after which a reception will be given in Massasagua Park.

The election of officers will take place at tomorow's session. The selection of R. W. Bro. W. Gibson, M.P., D.G.M., for the high office of grand master by acclamation is conceded. To succeed him as deputy the names of R. W. Bros. E. Malone, Toronto, R. B. Hungerford, London, and J. E. Harding, Q.C., Stratford, are being discussed each of whom have many friends. Among the past grand masters present are Daniel Spry, London; J. M. Gib-son, Q.C., M.P.P., Hamilton; Murray, Hamilton; J. Ross Robertson, M. P., Toronto.

At the opening ceremonies this afternoon, M. W. Bro. R. W. White, Q.C., grand master, presided, and thanked the civic reception committee for its courtesy to the visiting Masons.

THE GRAND MASTER'S ADDRESS followed. During the year he had had submitted for approval and had read, examined and approved the full revised bylaws of 18 lodges and amendments to the bylaws of 23. There had been a marked improvement in the manner of submitting these bylaws, and his labors had been somewhat lightened thereby. An unusual number of petitions for dispensations for lodges were presented to him during the year, and he had granted six and refused three. The receipts of the Grand Lodge showed an increase over any preceding year in its history. For first time the receipts exceeded \$20,000, and the expenditure was lower than last year—a very gratifying condition of affairs. The grand master recommenled most strongly that the Grand Lodge adopt one of two courses -either revert to the former system of granting the grand master an allowance of \$500, or let him pay his own expenses. He had during the past year to report an increased interest in Masonic work, and generally a very gratifying condition of the craft throughout the jurisdiction, and a satisfactory increase in both membership and in the number of new lodges.

called Grand Lodge of Ontario, the Grand Master said: "I am very much pleased to be able to report to this Grand Lodge that during the past year (pursuant to the authority grant-ed at our last meeting), such arrangements have been made with the members of this organization as effectually sweep this body out of exist-ence for I trust all time to come. ence for I trust all time to come. All members of this so-called grand body who have applied have been healed and declared their allegiance to this Grand Lodge. Many of them have applied for affiliation to our lodges, and are now ac tive and useful members of this grand body. The surrender is voluntary and complete—the only concession granted being that members of the extinct body holding the rank of past master therein are conceded that rank in any of our lodges with which they may affiliate or to which they may be ad mitted. I am sure every member of Grand Lodge will agree with me in congratulating the Grand Lodge of Canada upon the complete healing of

GOOD FINANCIAL STANDING. Concise reports were presented by R. Wor. Bro. J. J. Mason, Grand Secretary, and M. Wor. Bro. Hugh Murray, Grand Treasurer. They showed receipts during the year of Murray, \$20,215 17, and expenditures of \$15,-747 80. For benevolence \$8,523 was expended. The funds at the credit of the Grand Lodge now amount to \$90,986 38, of which \$76,564 63 belongs to the general fund, and \$14,421 75 to the asylum fund.

A Seat Stolen Outright by Conservative Manipulators.

Returning Officer Who Goes Off on Spree Before Returning His Ballot Box.

Toronto Globe. .-

If one method of subverting the will of the people can be more discreditable than another, fraudulent tampering with election machinery is unquestionably the worst. It pollutes representative government at its source. But it is not unnatural that men who have held office for years by deceiving the public should become liable to draw any fine distinctions between securing votes by impossible promises and by stuffing ballot boxes. That was shown by the methods adopted to perpetuate the Conservative regime during the recent election. With the deputy returning officers rests the responsibility of seeing that an election is fairly and properly conducted, that the electors make a free choice between the can-didates in the field. It is unnecessary to point out the importance of the office, or the need of extreme care in selecting thoroughly capable and trustworthy men. But we have had glaring instances of men appointed on account of a conspicuous fitness for the fraudulent work of the Government party. In several polling subdivisions the control of the election machinery was entrusted to men recommended only by a capacity for election frauds, and disclosures have already shown that the discreditable confidence was wisely or cunningly placed. In London, for example, Mr. William Peel, was ap-pointed a deputy returning officer. In accordance with the law he initialed the ballots as he gave them to the voters, identified his initials after the voters returned from the screened compartment, and then deposited the ballots in the box. No ballot was deposited or could be deposited that did not bear his initials, identified by himself. But when he came to count them he rejected 51 ballots cast for Mr. Hyman, the Liberal candidate, on the

The fraud was obvious, so much so that a man of peculiar fitness was required to perpetrate it. In Mr. Peel the Government party had such a man and they naturally availed themselves of his services. there are several records of being bound over to keep the peace, several of commitment for want of security, and several for commitment for The record contains some of threatening life; also trial. cases assault and wounding, assault to do bodily harm and assaulting a police constable. It certainly did not require keen political discernment to know that Mr. Peel was the man for the occasion. In Lisgar the same operation seems to have been performed in a different way. Although no polling booth was more than nine miles from a telegraph station, about two weeks elapsed after the election before the returns were published, Dur-ing the interval a deputy returning officer was in the Morden Hospital recovering from the effects of a spree and ballot-boxes were lying around hotels and livery stables. It was as serted by a disinterested spectator that balloting was still going on a week after the election. Where the deputy went off on a spree before returning the ballot-box and the unused ballots to the returning officer, and where the boxes and ballots were lying around accessible to anyone desirous of perpetrating a fraud, tampering with the vote would be almost

inevitable. In North Ontario the evidence has disclosed balloting after the election.
The official recount showed that in the ballot-boxes of five polling sub divisions the packages containing the ballots cast for the Liberal candidates were strangely at variance with the count recorded by the deputy returning officers after the close of the polls. Ballots had apparently disappeared, and their places had been filled by others marked for Major Mc-Gillivray, the Conservative candidate. The strange ballots bore no evidence of having passed through the hands of voters. They had not been even folded, a precaution the voter never overbooks, and which is, moreover, necessary when putting the ballots through the small opening in the box. They did not bear the initials of the deputy returning officers, although all the other ballots in those five subdi-

visions had been initialed. Only a few strange ballots appeared in each of the five boxes, the total number being 21. If allowed to Major McGillivray they would have changed his minority of 11 into a majority of 31. The county judge rejected the 21 spurious ballots, but, under the law, could do nothing to restore the 21 good ballots stolen from the package marked for the Liberal candidate. That left the fraud still successful, with a majority of 10 for Major McGillivray. In this case the deputy returning officers did their work properly, and the difficulty of detecting and punishing the real criminal will be greatly lessened in consequence. An era of corruption has by no means reconciled the people to election frauds, and no pains should be spared to discover the perpetrators, that their punishment may be an effective warning to others. petrators, that their punishment may, be an effective warning to others.

# TO STRENGTHEN ASPHALT PAVING Big Sheets of Expanded Steel Inserted in

the Concrete Base. A novel experiment in street paving is about to be made in South Park avenue, between Sixty-third and Sixty-sixth streets.

Some time ago an inventive genius Some time ago an inventive genius produced what is called "expanded steel." This is simply a thin sheet of metal with slits cut in and expanded lengthwise by forcing these slits into diamond-shaped apertures. It was at first used only as a substitute for lathing in the construction of buildings, but now it is to become part of a new method of laying aspart of a new method of laying asphalt pavements, and will be given its first trial on South Park avenue. It is proposed to have steel sheets of one-half inch in thickness cut into large-sized strips and then expanded under powerful pressure. These sheets will be inserted flatways in the concrete base by first laying four or five inches of the stone and cement mixture, and then covering the entire surface with steel, and over this steel in turn will be put the rest of the concrete. When partly dry the base will be compressed by ten-ton rollers and the concrete mixed forced into the interstices in the steel sheets, the whole, when solidly set, forming a foundation which will not only afford a much greater weight-resisting surface than the old system of asphalt paving, but furnish as well an effectual barrier to the picks and axes of

the vandals. Damage to the top coating of an asphalt pavement causes but small expense, or annoyance nowadays. Time was when repairs to the top could only be made by tearing up a good-sized section of the pavement and relaying it entirely, and even then the job was seldom satisfactorily done, as it was almost impossible to get an even surface on the patch.

Now, when the top coat needs fixing a man comes along with an ingenious gasoline contrivance, something on the principle of a plumber's blow-furnace, except that it is mounted on wheels. He shoves it along over the spot to be repaired, and the fierce heat, directed downward, quickly softens the asphalt so it can be readily smoothed over by the rolling machines or hand weights, and an even surface secured.

fame, been lit is only when the base or founda-tion of the pavement is cut through or disturbed that trouble is now found in replacing an even surface. His and this, it is expected, will be obforce the making of water, sewer and gas connections before the pavement it will be cheaper and easier to tunnel under the street from the sidewalk than to tear up the pavement .-

American Produce Markets. Chicago, July 14.—There was life in the wheat market today. It was a buil market throughout, the first news tending in that direction, being the weekly crop bulletin from North Dakota, which said the conditions were favorable for rust, and that there was a great scarcity of water. At noon Bradstreet's report on the world's visible supply was received, and on its showing of a decrease of 2,000,000 but he market broke, but almost immediately recovered. The market closed higher, but in a perturbed condition. Corn was firmer on the continued dry weather, and remained steady in sympathy with the advance in wheat. Poronto, July 14.—There was a very quiet tone at the Western Cattle Yards today, in spite of the fact that offerings were light. Forty-three carloads of stuff came in today, and there were ten carloads on the market from last week. The offerings today included 350 sheep and lambs, 950 hogs and 70 calves. For the week ended Saturday, July 11, total receipts at the two markets were: Cattle, 2,614; sheep and lambs, 2,907; hogs, 2,703; weigh fees, \$85 85. Hogs were firmer, but otherwise the market showed no improvement. Buying of butchers' cattle for Montreal was quiet, only about half a dozen carloads being taken.

Dickens and Thackeray.

Charles Dickens, even in the zenith of his fame, was never to be seen at London township, where the groom the houses of the great; and with the exception of Lord Lansdowne and the Baroness Burdett-Coutts he owned no intimate friendships among the Upper Ten. Thackeray, on the contrary, like Moore, loved the grace and delicacy and inborn amenities of what is called "good society." He was no more of a snob than Dickens, no more of a tufthunter, but he was more plastic, more frankly influenced by that kind of social sensuality which finds its enjoyment in good living, good manners, pretty women and refined talk. Dickens had no eye for beauty per se. He could love a comparatively plain woman-and did; but Thackeray's fancy went out to loveliness; and cleverness alone, without beauty—which ruled Dickens—would never have stirred his passions. Both men could; and did, love deeply, passionately, madly, and the secret history of their lives has yet to be written. It never will be written now, and it is best that it should not be. theories of Ruin and Restoration. His

Was there ever anything more romantic and chivalrous than the love been poor and crippled, and despised, and rejected. And that man who in this world is blind will better appreof David and Jonathan? At one time ciate the light of heaven than we Jonathan was up and David was who in this world had good eyesight. Jonathan was up and David was down. Now David is up and Jonathan's family is down. David and sic of heaven than we who in this world was deaf, will better appreciate the music of heaven than we who in this now that Jonatham is dead, David is inquiring about his family, that he may show kindness unto them for their father Jonathan's sake. Careful search is made, and a son of Jonathan by the dreadfully homely name of Mephibosheth is found. His nurse in his infancy had let Jonathan had made a covenant, and ly name of Mephibosneth is had let His nurse, in his infancy, had let him fall, and the fall had put both his ankles out of place, and they had never been set. This decrepit, poor man is brought into the palace of King David. David looks upon him with melting tenderness, no doubt seeing in his face a resemblance to his old friend, the deceased Jonathan. David's bearing seemed to say: made a bargain with your father and I am going to keep it with you. What can I do for you, Mephibosheth? I will make you a rich man; I will want to speak with you. Come over as you live, and you shall be seated at my table among the princes. "So Mephibosheth dwelt in Jerusalem; for he did eat continually at the King's table; and was lame on

both his feet."

There is so much gospel in this quaint incident that I am embarrassed to know where to begin. Whom do Mephibosheth, and David, and Jonathan make you think of? Mephibosheth, in the first place, stands for the disabled human soul, Lord Byron describes sin as a charming recklessness, as a gallantry, as a Don Juan; George Sand describes sin as triumphant in many intricate plots; Gavarni, with his engraver's knife, always shows sin as a great jocularity; but the Bible presents it as a Mephibosheth, lame on both feet. Sin, like the nurse in the context, attempted to carry us, and let us fall, and we have been disabled, and

in our whole moral nature we are

I do not care what the sentiment-alists or the poets say in regard to sin; in the name of God I declare to you today that sin is disorganization, disintegration, ghastly disfigura-tion, hobbling deformity. There is an old book that says: "The whole head is sick, and the whole heart faint." Our belief of the fact that sin has sacrificed and deformed our souls increases as we go on in years, and now we believe with the prophet, "The heart is decitful above all things and desperately wicked." Whatever you have believed before, now you believe that Mephibosheth is lame on both feet.

Mephibosheth in the text stands for the disabled human soul humbled and restored. When this invalid of my text got a command to come to King David's palace, he trembled The fact was that the grandfather of Mephibosheth had treated David most shockingly, and now Mephibosheth says to himself, "What does the King want of me? Isn't it enough that I am lame? Is he going to wreak on me the vengeance which he holds towards my grandfather Saul?" But go to the palace Mephibosheth must, since the King had commanded it. With staff and crutches and helped by his friends, I see Mephirattling on the tessellated floor of the throne-room. No sooner have these two persons confronted each other-Mephibosheth and David the Kingthan Mephibosheth throws himself flat on his face before the King, and styles himself a dead dog. In the East, when a man styles himself a dog, he utters the utmost term of

self-abnegation.
Consider the analogy. When the command is given from the palace of heaven to the human soul to come, the soul begins to tremble. It says: "What is God going to do with now? Is he going to destroy me? Is he going to wreak his vengeance upon There is more than one Mephibosheth trembling now, because God has summoned him to the palace of divine grace! What, are you trembling about? God has no pleasure in no authentic record of his ever having eaten enough. Bouton was too prudent to feed his braves all they could eat. He caused to be set besurance, \$1,500.

Again, Mephibosheth in my text stands for the disabled human soul lifted to the King's table. It was more difficult in those times even than it is now for common men to get ther sister, Mrs. Elizabeth Zlamker, might have come around the rail of aged 65, were burned to death by the the palace and might have seen the to one banquet, yet poor Mephibosheth goes in, lives there, and is every day at the table. Oh, what a time that will be, when you and I, by the grace of God, get into heaven, and are introduced to the mighty spirits there, and some one will say: "This is Joshua."

"This is Paul." "This is Moses."

"This is John Knox." "This is John Milton." "This is Martin Luther."

"This is George Whitefield." Oh, shall we have any strength left after such a round of celestial introduction? Yea! We shall be potentates ourselves. Then we shall sit down at the King's table with the sons and daughters of God, and one will whisper across the table to us and say, "Behold what manner of love the Father has bestowed upon us that we should be called the sons of God!" we should be called the sons of God!' Washington, D. C., July 14.—Dr. And the wine at the banquet will be old wine, that was trodden out from the red clusters on the day when Jesus trod the winepress alone. The kidneys cannot talk, and the only way they have of letting us know when they are sick is by making our backs ache. If it is only a little ache the kidneys are only a little sick. If it is a big peace-destroying, nerve-racking ache the kidneys are more than a little sick. In either case it

must be attended to at once. Doan's Kidney Pills act directly on the kidneys, make them strong and healthy, stop aching backs in every case. Here is a sample case. Mr. Charles M. Allen, 412 Richmond street, London, Bank of Commerce Building says:

"I have been ailing for the past eight months with kidney troubles. I had severe pain across the back and between the shoulders, neuralgic pains across my eyes, so much so that I thought something was the matter with my eyes that would com-pel the use of spectacles. I felt unnaturally tired and weak all the time, seemed to have no ambition, my head felt heavy and my sleep was poor; I did not rest; sometimes I could not sleep one hour all night. The urine was red-colored and unnatural in flow, and I had scarcely any appetite. I felt

really miserable day in and day out.

"The one box of Doan's Kidney Pills, which I got at Strong's drug store gave immediate relief from all depressing troubles. I am now free from all of the terrible symptoms which afflicted me. I feel splendid, have vigorous health, have gained four pounds in weight, and am certain that no other remedy could have produced the effect which Doan's Kidney Pills have in my case, for I had previously tried almost every other remedy on the list.

NEWFONUDLAND FISHERMEN'S HARDSHIPS.

St. Johns. Nfld., July 15. - The French shore trouble continues to be a prolific subject of discussion, show-ing the hardships the local fishermen abor under this season, owing to the vexatious French encroachment and the repressive measures enforced by both the British and French warships.

Kindness for the Sake of an Old Friend.

David's Chivalrous and Romantic Love for Jonathan

The Subject of a Characteristic Discourse by Rev. Dr. Talmage.

Washington, D. C., July 14.-Dr. a vivid and novel presentation of the theories of Ruin and Restoration. His text was II. Samuel 9, 1 and 13, "Is there yet any that is left of the house

Was there ever anything more ro-Jonathan was up and David was down. Now David is up and Jonathan's family is down. David and Jonathan had made a covenant, and now that Jonathan is dead, David is inquiring about his family, that he may show kindness unto them for their father Jonathan's sake. Careful search is made, and a son of Jonathan by the dreadfully homely name of Mephibosheth is found. His nurse, in his infancy, had let him fall, and the fall had put both his ankles out of place, and they had never been set. This decrepit, poor man is brought into the palace of King David. David looks upon him with melting tenderness, no doubt seeing in his face a resemblance to his old friend, the deceased Jonathan. David's bearing seemed to say: made a bargain with your father and I am going to keep it with you. What can I do for you, Mephibosheth? I will make you a rich man; I will restore to you the confiscated property of your grandfather Saul, and you shall be a guest of mine as long as you live, and you shall be seated at my table among the princes." "So Mephibosheth dwelt in Jerusalem; for he did eat continually at the King's table; and was lame on

There is so much gospel in this quaint incident that I am embarrassed to now where to begin. do Mephibosheth, and Day Jonathan make you think of? Mephibosheth, in the first place. stands for the disabled human soul, Lord Byron describes sin as a charming recklessness, as a gallantry, as a Don Juan; George Sand describes sin as triumphant in many intricate plots; Gavarni, with his engraver's knife, always shows sin as a great jocularity; but the Bible presents it as a Mephibosheth, lame on both feet. Sin, like the nurse in the context, attempted to carry us, and let us fall, and we have been disabled, and in our whole moral nature we are

I do not care what the sentimentalists or the poets say in regard to sin; in the name of God I declare to you today that sin is disorganization, disintegration, ghastly disfigura-tion, hobbling deformity. There is an old book that says: "The whole head is sick, and the whole heart faint." at once beached her our belief of the fact that sin has sacrificed and deformed our souls increases as we go on in years, and were landed in sa "The heart is decitful above all things and desperately wicked." Whatever believed before, now you believe that Mephibosheth is lame on

Mephibosheth in the text stands for the disabled human soul humbled and restored. When this invalid of my text got a command to come to King David's palace, he trembled The fact was that the grandfathe of Mephibosheth had treated David most shockingly, and now Mephibosh-eth says to himself, "What does the King want of me? Isn't it enough that I am lame? Is he going wreak on me the vengeance which he holds towards my grandfather Saul?" But go to the palace Mephibosheth must, since the King had command-ed it. With staff and crutches and helped by his friends, I see Mephi-bosheth going up the stairs of the palace. I hear his staff and crutches rattling on the tessellated floor of the throne-room. No sooner have these two persons confronted each other-Mephibosheth and David the Kingthan Mephibosheth throws himself flat on his face before the King, and styles himself a dead dog. In the East, when a man styles himself a dog, he utters the utmost term of self-abnegation.

Consider the analogy. When command is given from the palace of heaven to the human soul to come, the soul begins to tremble. It says: "What is God going to do with me now? Is he going to destroy me? Is he going to wreak his vengeance upon me?" There is more the me?" There is more than one Mephi-bosheth trembling now, because God has summoned him to the palace of divine grace! What, are you trem-bling about? God has no pleasure in death of a sinner. He does not send for you to hurt you. He sends for you to do you good. If you want to get to the palace you may get there. Start now. The Holy Spirit will help you. All you have to do is just to throw yourself on your face at the feet of the King, as Mernikhesheth did

phibosheth did.

Again, Mephibosheth in my text stands for the disabled human soul lifted to the King's table. It was more difficult in those times even than it is now for common men to get into a royal dining-room. The subjects might have come around the rail of lights kindled, and might have heard the clash of the knives and the rattle of the golden goblets, but could not get in. Stout men with stout feet could not get in once in all their lives to one banquet, yet poor Mephibosh-eth goes in, lives there, and is every day at the table. Oh, what a getting up in the world it was for poor Me-phibosheth! Well, though you and I

may be woefully lamed with sin, for our divine Jonathan's sake, I hope we will all get in to dine with the King. Oh, what a time that will be, when Oh, what a time that will be, when you and I, by the grace of God, get into heaven, and are introduced to the mighty spirits there, and some one will say: "This is Joshua." "This is Paul." "This is Moses." "This is John Knox." "This is John Milton." "This is Martin Luther." "This is George Whitefield." Oh, shall we have any strength left after shall we have any strength left after such a round of celestial introduc-tion? Yea! We shall be potentates ourselves. Then we shall sit down at the King's table with the sons and daughters of God, and one will whis-per across the table to us and say, "Behold what manner of love the Father has bestowed upon us that we should be called the sons of God!' And the wine at the banquet will Washington, D. C., July 14.—Dr. be old wine, that was trodden out Talmage's sermon on Sunday was from the red clusters on the day when Jesus trod the winepress alone Wine already more than eighteen centuries old. No one will ring up our imperfections here, our sins here. All our earthly imperfections completely of Saul, that I may show him kind-ness for Jonathan's sake? . . . So eth's feet under the table. Kingly mess for Jonathan's sake? . . . So fare. Kingly vesture. Kingly com-Mephibosheth dwelt in Jerusalem; for panionship. We shall reign forever and ever. That banquet in David's table; and was lame on both his palace meant more to Mephibosheth than to anyone else, because he had been poor and crippled, and despised, Was there ever anything more ro-mantic and chivalrous than the love and rejected. And that man who in this world is blind will better appreof David and Jonathan? At one time ciate the light of heaven than we who in this world had good eyesight. And that man who in this world was deaf, will better appreciate the music of heaven than we who in this world had good hearing. And those

Probable Loss of the P. M. Steamer Columbia,

The Colorado Sunk While Entering the New York Harbor-No Lives Lost.

San Francisco, Cal., July 15 .- The steamer Columbia, of the Pacific Mail Steamship Company (Capt. Clarke) went ashore about 8 o'clock yesterday morning during a thick fog at Pigeon Point, a rocky projection, about halfway between San Francisco and Santa Cruz. The big steamer was on her way from Panama to San Francisco. The latest advices from the scene of the accident state that the Columbia is in a very dangerous position, severely pounding the rocks, and if she is not soon lightened will go to pieces. The Columbia is a new ship, and one of the latest additions to the Pacific fleet of the mail company. She was built in Chester, Pa., in 1892, and is

of 3,296 tons burden. A brief dispatch from Picadero states that the Columbia's passengers, 63 in number, and her crew of 90, had all been safely landed. The ves sel is pounding on the rocks, and will in all probability be a total wreck. She has on board a mixed cargo, the value of which cannot be ascertained until the bills of lading arrive,

SUNK IN PORT. New York, July 15 .- The Mallory Line steamer Colorado, from Brunswick, Ga., while proceeding up the main channel yesterday, struck a mud scow in tow of a tug bound out, and damaged the steamer's bow. Capt Burrows found his vessel sinking, and at once beached her on the west bank

All the passengers, 23 in number, were landed in safety.

must be attended to at once. Doan's Kidney Pills act directly on the kidneys, make them strong and healthy, stop aching backs in every case. Here is a sample case. Mr. Charles M. Allen, 412 Richmond street, London, Bank of Commerce Building says:

"I have been ailing for the past eight months with kidney troubles. I had severe pain across the back and between the shoulders, neuralgic pains across my eyes, so much so that I thought something was the matter with my eyes that would compel the use of spectacles. I felt unnaturally tired and weak all the time, seemed to have no ambition, my head felt heavy and my sleep was poor; I did not rest; sometimes I could not rest; could not sleep one hour all night. The urine was red-colored and unnatural in flow,

and I had scarcely any appetite. I felt really miserable day in and day out. "The one box of Doan's Kidney Pills, which I got at Strong's drug store gave immediate relief from all depressing troubles. I am new free from all of the terrible symptoms which afflicted me. I feel splendid, have vigorous health, have gained four pounds in weight, and am certain that no other remedy could have produced the effect which Doan's Kidney Pills have in my case, for I had previously tried almost every other remedy on the list.

Which Mr. Powell Will Build at Springbank.

He Wants Some Modifications in th Agreement-A Double Track.

Mr. Powell, the electric incline railway man, was again before the water commissioners yesterday afternoon. 'At the last meeting he agreed to build a fence around the reservoir, at a cost of \$3 per rod, but thought now that the price was too high, and that a fence could be built for \$1 25 per rod.

The mayor thought that the fence was the only guarantee that the commissioners had that the contract would be carried out. He suggested that Mr. Powell put up \$300 and let the city build the fence, and if the agreement was carried out, the money would be returned to him, he, of course, having to pay for his portion. If he would consent to this, the mayor also thought that an option could be given him at once for a stated time. He could then go on and organize his

Mr. Powell said he had several applications for shares in the company. It had been decided to locate the track on the west side of the path. where a survey had been made. The roadbed was to be 28 feet wide, with a double track, 16 feet wide. This would leave a margin of 12 feet. Mr. Powell also free with every pair of about a pavilion he p. sed erecting at Springbank for shelt and amusewanted to talk to the commissioners ments. He expected to have the privilege to sell refreshments. Nothing was done in this matter, but

the question of fence, guarantee and option was referred to Chairman Judd and the solicitor, with power. The chairman will arrange a meeting shortly. Engineer Moore's weekly report of
