Journal," " Woodstock

Is an sight-page weekly newspaper, devoted to the in-terests of New Brunswick, and particularly to those of the Counties of Carleton and Victoria.

The primary objects at which The Journal aims in the present circumstances of the country are principally

present circumstances of the country are principally these.:

1. The Premotion of Immigration and Settlement of the Wild Lands. Its maxim in this matter is Cheap or Froe Land for the actual Settler! Dear Land, or none at all, for the Speculator. It is far more important for the country to have the wild lands settled by giving them away than so get half a dollar an acre for them.

2. The opening of the country, and facilitation of intercourse, by the imprevement of the means of intercourse, by the imprevement of the means of intercourse, by the imprevement of the means of intercourse, by the imprevement and facilitation of intercourse, by the imprevement in order to prevent jobbing, specialtion and shi the other evils which accompanies and not by Government in order to prevent jobbing, specialtion and shi the other evils which accompany the construction of public works by Government.

3. A system of Free Education for all,—schoo's of all grales, from the Parish school to the Provincial University, being open to all without money and without price, and supported by Direct Texation. If there is any one thing which will wike the whole people from thoir apathy with respect to Education, and give them a living, feeling interest in it, it is Direct Texation for its any port.

4. An increase in the Representation in the Hopse of Assembly, in order to destroy the illegitimate influence of the Executive, and cheek the degrading and noxious strife between the outs and the ins.

5. Looking to the future, wanter decidedly in favor of a Legislative union of the I ower Provinces—New Bruniwick, Nova Scotia, and Prince Edward Island, as opposed to a federal union which would include Canada, and to a reliminishment of a distinctive nationality in a representation in the Imperial Parliament. We hold that such a legislative union would remove many of the political evils and difficulties ander which all these Provinces now labour—would give them increased strength, importance and influence—would tend to a more rapid fevolopment of

progress of these colonies than any other political movement whatever.

Though these primary objects are never lost sight of, there are other things for which we labour. We have there are other things for which we labour. We have always endeavoured, and hope that we shall, ever continue to endeavour to introduce and support in the areas of political, social and moral discussion a boll, generous, and manly tone. We shall endeavour to promote unity and good feeling among all parties, classes and creeds of men. We shall give, an unfinehing, support to free inpairy into whatever is within the bounds of human intellect, and a free discussion of whatever subjects it is possible for the human mind to app ehend. Nor shall we forget to inquisate in our people not only that feeling of independence and seif reliance which is of the essence of individual and national noblity, but also that love of order and subordination which makes the fullest practical recognition of the great truth that the Law is superior to all, and that freedom to be Freedom indeed must go hand in hand with Order.

Shipping Gazette has article on the question

Shipping Gazette has article on the question of our earn supplies. In event of war with United States it does not regard our future prospects with feelings of alarm.

Order for purchase of nearly five hanhundred thousand quarters of wheat had been sent within last few days to Black Sea ports for present and future shipment. Immediate exports would not of course be made, but eventually there would be no want of vessels to bring all corn we require and vessels trading to America would be released to bring grain from South of Russia.

Shipping Gazette is perfectly certain that our importations of food during coming years will equal in extent those of fast four or five seasons. Daily News correspondent says very general opinion is that Patrie was very imperfectly informed of intention of French Government when it spoke of France joining England in an armed mediation. Effect of war feeling in American shipping interest in already most disastrous. No charters are now taken for their vessels, and as for passengers and cargo little or nothing is deing—such a state of things in this respect that no insurances of this class had been offered ing was useless and needless.

FROM THE DELEGATION.

We again received letters from England by mail yesterday afternoon, respecting the exertions being made by the Colonial Delegates in London. Things were not sufficiently matured when the steamer left to warrant anything being with the decision of the spaces likely to attend said as decisively to the success likely to attend the mission. But we may remark that the prospects are by no means discouraging. The most powerful influences in England are being brought to bear upon the Government. The Delegates have already addressed large and highly influenhave already addressed large and nighty influen-tial assemblages of the people in different parts, and the expression of opinion in favor of the project had been unanimous in every instance. The majority of the British Government are known to be favorable, and the minority have only to be convinced that no burdens are to be imposed upon the British tax payer, when no doubt the propositions will be adopted and sub-mitted to Parliament. The Delegates think they will be able to convince them that England is going to gain and not lose anything by giving the guarantee asked. It is thought that the Trent difficulty will not lessen their chances of success, as it furnishes a powerful argument in favor of an inter-Colonial road. Our friend says that the excitement respecting the recent outrage cannot be expressed in words. "Consols have county under a constitutional Government.
