such amore, from all parts where the Prils have been used, but evidence even more convincing than the certificates of these eminent paulic men it shown; in their effects upon trial.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical spicuse can afferd. They are compounded not of, the drugs themselves, bert of the inclinial virtues only of Vegstable remeties, extracted by chemical process, in a state of pirity and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in the Cherry Pectoral, and Pills both, to produce a more efficient remedy than had litherto been obtained by any process. The reason is perfectly orlong. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and foil roises qualities; by this, each individual virtue only that is desired for the curative effect in present. All the inert and obnovious qualities of each substance employed are left behind, the curative virtues only being retained. Hence the curative virtues only being retained. Hence the self-evident the effect should prove as they have proved more purely remedial, and the Pills a surer, more powerful antidote to discuss than any other medicine known to the world.

As it is frequently expedient that my medicine should be taken under the counsel of an attending Physician, and as he could not properly judge of a remedy without knowing its composition, I have amplied the accurate Formula by-which both my one who has not received them, they will be promptly forwarded by mail to his address.

Of all the Patent Medicines that are offered, how one who has not received them, they will be recomposition was known. Their life consists in their mystery. I have no exactive.

Their life consists in their composition was known, the result of the consists in their mystery. I have not easy teries.

The composition of my preparations is haid open to all men, and all who are competent to fudge on the subject, frealy acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many enacent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their shaticipations were more than realized by their effects upon trial. They operate by their effects upon trial. They operate by their powerful influence on the internal viscers to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting wherever they exist such derangements as are the first origin of disease.

Being sugar wrapped they are pleasant to toke, and being purely vegetable, on harm can arise from their use in any quantity.

For painted directions, see the wrapper on the Box.
