2. MILBURN & CO., Proprietors, Toronto.

General News.
-Terrorific prairie fires are raging east and south of Dickinson, N. D.
-A slight shock of an earthquake was felt at Point des Monts, Quebec last week.
-The astronomers on Mt. Wilson, Cal., report a snow storm on the planet Mars.
-The total assessed value of Toronto is \$148,000,000, and the population 167,000.
-A young woman at Ashland, Wis., after suffering four years from supposed consumption, has just coughed up a single nail.
-An inmate of Georgia Lunatic Hospital imagines that he is a grain of corn and will not go out into the yard for fear the chickens will eat him.
-A sergeant and corporal of the Mexican army were shot on the 2nd inst. the murder of a superior officer. Over 30,000 people witnessed the execution.

Statistics about the Echo.
Some one recently figured out the exact distance that a person may be removed from a reflecting surface, and yet hear the echo of his own voice. Five syllables a second is said to be the limit both of distinct pronunciation and distinct hearing. This gives one-fifth of a second for each syllable. When the atmospheric temperature is 61 degrees, sound travels 1,120 feet a second. In one-fifth that time it will cover a distance of 224 feet. Hence, if a reflecting surface is 112 feet distant the initial sound of an uttered syllable will be returned to the ear just as the next syllable starts on its journey. In this case the first fifth of sound is consumed in the utterance of a syllable and the next fifth of the second syllable and the next fifth of the second syllable would be echoed from a reflecting surface 224 feet distant three syllables from 336 feet and so on within the limit of audibility.

The Height of Waves.
It is a very common phrase to speak of the waves during a storm as running mountains high; this really means nothing. Accurate measurements made by Seelye proved that during storms, waves in the Atlantic rarely exceed 45 feet from hollow to crest, the distance between the crest being 550 feet and their speed 32 1/2 miles an hour. More recent observations in the Atlantic give from 44 feet to 48 feet as the highest measured waves, but such heights are rarely reached, and indeed, waves exceeding 30 feet are very seldom encountered. The monsoon waves at Kurrachee breakers were found to dash over the wall to the depth of 18 feet above 40 feet above the main sea level. The greatest heights of waves on the British coast were those observed in Wick Bay - so famous for the exceptionally heavy seas which roll into it - being 37 1/2 to 40 feet. Green seas to the depth of 25 feet poured over the parapet of the breakwater at intervals of from seven to ten minutes, each wave it was estimated being a mass of 40,000 tons of water and this continuously for three days and nights. During severe storms the waves used to rise high above the top of Smeaton's Eddystone tower, while at the Bell Rock the seas with eastward gale enveloped the tower from base to balcony - to the height of 400 feet.

The Human Mouth in Danger.
Chance of its Meandering Toward the Left Ear.
(From the Paris Edition of the Herald)
It has just been discovered that the human mouth has a steady motion toward the left of the face, which will in time bring it somewhere in the neighborhood of the left ear. Man has an invincible tendency to eat only with the left side of the mouth. This wears out only the left teeth, and this in turn gives the upper and lower jaw an inclination toward the left. It is the opinion of a learned scientific person that in the course of a million of years the human mouth will have completely changed its position and will be situated rather nearer to the left ear than to the nose. While no fault can be found with the train of reasoning that has led the scientific person to this conclusion, he would nevertheless possibly find it difficult to explain why the mouth should pause when it reaches the left ear. If the habit of chewing on the left side of the mouth can move it a fourth of the way around the head, it is evident that a continuance of the habit will in time cause the mouth to make a complete circuit of the head. Fortunately we can save our descendants from mouths at the back of their heads by resolutely eating on the right side as well as on the left side of our mouths, but unless we do this persistently the march of the mouth toward the left will continue with all its painful consequences.

Possibilities of the Telephone.
Though the telephone has long since ceased to be a wonder, its great powers and adaptability to various purposes as yet but hinted at, must still command attention, very much on account of their commercial aspect. This is evident on contemplating the work done by this instrument in the installation at the Lenox Lyceum, by which the "long distance" telephone company has placed before the public an exhibit of superb qualities. It seems strange indeed, that up to the present time, the telephone companies have not done more towards exploiting a field which could certainly be made a source of considerable revenue by the furnishing of musical and other entertainments by wire at the fire-side. But still more impressive than the musical part is the remarkable clearness of the long distance transmission, the mind can yet hardly grasp the reality of the enormous miles apart to maintain perfect oral intercourse. Yet we believe the time is not remote when even this will cease to attract even passing notice; when the "long distance" lines now mostly confined to the Eastern States, will cover the entire country with a vast network of "speaking wires". The "long distance" company is to be commended for the liberal policy adopted by it, in educating the public to the possibilities of the facilities available for it, and if we are not mistaken it will date one of its quickest and longest strides forward from the display at the Lenox - Electrical Engineer.

-The astronomers on Mt. Wilson, Cal., report a snow storm on the planet Mars.
-The total assessed value of Toronto is \$148,000,000, and the population 167,000.
-A young woman at Ashland, Wis., after suffering four years from supposed consumption, has just coughed up a single nail.
-An inmate of Georgia Lunatic Hospital imagines that he is a grain of corn and will not go out into the yard for fear the chickens will eat him.
-A sergeant and corporal of the Mexican army were shot on the 2nd inst. the murder of a superior officer. Over 30,000 people witnessed the execution.

Statistics about the Echo.
Some one recently figured out the exact distance that a person may be removed from a reflecting surface, and yet hear the echo of his own voice. Five syllables a second is said to be the limit both of distinct pronunciation and distinct hearing. This gives one-fifth of a second for each syllable. When the atmospheric temperature is 61 degrees, sound travels 1,120 feet a second. In one-fifth that time it will cover a distance of 224 feet. Hence, if a reflecting surface is 112 feet distant the initial sound of an uttered syllable will be returned to the ear just as the next syllable starts on its journey. In this case the first fifth of sound is consumed in the utterance of a syllable and the next fifth of the second syllable and the next fifth of the second syllable would be echoed from a reflecting surface 224 feet distant three syllables from 336 feet and so on within the limit of audibility.

The Height of Waves.
It is a very common phrase to speak of the waves during a storm as running mountains high; this really means nothing. Accurate measurements made by Seelye proved that during storms, waves in the Atlantic rarely exceed 45 feet from hollow to crest, the distance between the crest being 550 feet and their speed 32 1/2 miles an hour. More recent observations in the Atlantic give from 44 feet to 48 feet as the highest measured waves, but such heights are rarely reached, and indeed, waves exceeding 30 feet are very seldom encountered. The monsoon waves at Kurrachee breakers were found to dash over the wall to the depth of 18 feet above 40 feet above the main sea level. The greatest heights of waves on the British coast were those observed in Wick Bay - so famous for the exceptionally heavy seas which roll into it - being 37 1/2 to 40 feet. Green seas to the depth of 25 feet poured over the parapet of the breakwater at intervals of from seven to ten minutes, each wave it was estimated being a mass of 40,000 tons of water and this continuously for three days and nights. During severe storms the waves used to rise high above the top of Smeaton's Eddystone tower, while at the Bell Rock the seas with eastward gale enveloped the tower from base to balcony - to the height of 400 feet.

The Human Mouth in Danger.
Chance of its Meandering Toward the Left Ear.
(From the Paris Edition of the Herald)
It has just been discovered that the human mouth has a steady motion toward the left of the face, which will in time bring it somewhere in the neighborhood of the left ear. Man has an invincible tendency to eat only with the left side of the mouth. This wears out only the left teeth, and this in turn gives the upper and lower jaw an inclination toward the left. It is the opinion of a learned scientific person that in the course of a million of years the human mouth will have completely changed its position and will be situated rather nearer to the left ear than to the nose. While no fault can be found with the train of reasoning that has led the scientific person to this conclusion, he would nevertheless possibly find it difficult to explain why the mouth should pause when it reaches the left ear. If the habit of chewing on the left side of the mouth can move it a fourth of the way around the head, it is evident that a continuance of the habit will in time cause the mouth to make a complete circuit of the head. Fortunately we can save our descendants from mouths at the back of their heads by resolutely eating on the right side as well as on the left side of our mouths, but unless we do this persistently the march of the mouth toward the left will continue with all its painful consequences.

Possibilities of the Telephone.
Though the telephone has long since ceased to be a wonder, its great powers and adaptability to various purposes as yet but hinted at, must still command attention, very much on account of their commercial aspect. This is evident on contemplating the work done by this instrument in the installation at the Lenox Lyceum, by which the "long distance" telephone company has placed before the public an exhibit of superb qualities. It seems strange indeed, that up to the present time, the telephone companies have not done more towards exploiting a field which could certainly be made a source of considerable revenue by the furnishing of musical and other entertainments by wire at the fire-side. But still more impressive than the musical part is the remarkable clearness of the long distance transmission, the mind can yet hardly grasp the reality of the enormous miles apart to maintain perfect oral intercourse. Yet we believe the time is not remote when even this will cease to attract even passing notice; when the "long distance" lines now mostly confined to the Eastern States, will cover the entire country with a vast network of "speaking wires". The "long distance" company is to be commended for the liberal policy adopted by it, in educating the public to the possibilities of the facilities available for it, and if we are not mistaken it will date one of its quickest and longest strides forward from the display at the Lenox - Electrical Engineer.

General News.
-Terrorific prairie fires are raging east and south of Dickinson, N. D.
-A slight shock of an earthquake was felt at Point des Monts, Quebec last week.
-The astronomers on Mt. Wilson, Cal., report a snow storm on the planet Mars.
-The total assessed value of Toronto is \$148,000,000, and the population 167,000.
-A young woman at Ashland, Wis., after suffering four years from supposed consumption, has just coughed up a single nail.
-An inmate of Georgia Lunatic Hospital imagines that he is a grain of corn and will not go out into the yard for fear the chickens will eat him.
-A sergeant and corporal of the Mexican army were shot on the 2nd inst. the murder of a superior officer. Over 30,000 people witnessed the execution.

BIG RUSH PICKARD'S. THIS WEEK. For Fall DRESS GOODS AND MANTLE CLOTHS.

Persons wanting DRESS-MAKING done will have to leave their orders early.

Boots and Shoes. CHANGE OF BUSINESS.

Having bought out the entire stock of BOOTS and SHOES of Mr. A. G. Smith, In will offer for the

Next 30 days Special Inducements to Customers

Preparatory to a large and thoroughly assorted stock of New Goods which shall arrive in due time.

I shall always endeavor to keep in stock a full and varied assortment of Boots and Shoes in every line and by strict attention to business to give entire satisfaction to all who may favor me with their patronage.

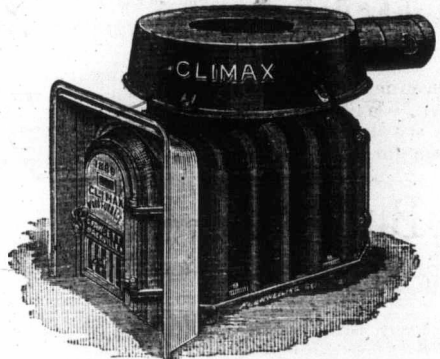

Intending purchasers will find it to their advantage to give me a call.

W. TURNER.

Powell's Block, Sackville, Sept. 25th.

"Climax Furnace" for Wood.

Is Admitted by All to be the Best Furnace in Every Way that can be Purchased in the Market.

The above Furnace with Radiator is made wholly of heavy cast iron and CANNOT POSSIBLY CRACK BY EXPOSURE TO HEAT.

The Fire Box or Dome, is made in one piece and heavily corrugated; thus giving it great strength and heat radiating surface, and so constructed that the joints cannot leak smoke, which is the great objection to every other Wood Furnace in use. The fire door is large and will admit of burning all kinds of rough wood, which, with the Check Dampers, controlling the fire, makes the Climax Furnace also the most economical. There being no thin plates or sheet iron used in its construction it will easily

Last for 20 Years Without Repairs.

I am prepared to contract for the heating of buildings at lowest possible rates for good work, and have secured the services of experienced workmen so that I can Fully Warrant every Furnace to give Complete Satisfaction.

If your Dealer cannot show you my Climax Furnace write direct to the Sackville Store Foundry for Description and Estimate of cost.

CHARLES FAWCETT.

SACKVILLE FOUNDRY.

Sackville, N. B., September 25th, 1890.

R. S. PRIDHAM, (THE ORIGINAL PRIDHAM.) Artist in Photography.

Studio opposite Brunswick House, Sackville, and Block's Store Building, Amherst. Until further notice the Sackville Studio will be open for business every day under the management of Mr. Trenholm.

Sackville, N. B., Sept. 11th, 1890.

EVERYONE ACKNOWLEDGES NOW THAT TREMAINE'S DRUG STORE AMHERST,

Is by far the Best Place in the Two Counties
TO BUY
DRUGS, PATENT MEDICINES or TOILET ARTICLES.

They do not pretend to carry the Largest Stock, but they DO Carry

The Freshest and Best

And a FULL ASSORTMENT. You can always depend upon what is at this store that Extra Attention is given to compounding Prescriptions, as they make a Specialty of such work.

There is some talk of organizing a Rugby foot ball team. The boys are greatly in favor of the idea.

On Saturday, a special car took a large number of both male and female students to the ship railway. The works were inspected, and a thoroughly good time enjoyed. At night, the different parties had a big supper to finish the day.

Dr. Smith, on Progress, visited the St. John exhibition in the capacity of judge. He returned on Saturday.

The attendance is increasing in all the departments.

It is rumored that the new Conservatory of Music is to be opened by a fancy fair some time in December, near Christmas.

On Friday evening, 17th inst., Prof. Andrews will deliver his inaugural address in Lingley Hall. Prof. Harrison will also make a short address.

There is some talk of organizing a Rugby foot ball team. The boys are greatly in favor of the idea.

A WATERY GRAVE.—News reached here Tuesday that the schooner Mary Jane, Capt. Clarke, was wrecked on short distance off Cape Jourdain and all hands lost. The Mary Jane was a vessel of about 55 tons register, and was owned by William McNab, of Wallace. She left Pictou on Saturday night or Sunday morning with a cargo of coal for Chatham, and was wrecked on the rocks off Cape Jourdain on Sunday. During the storm of Monday the poor sailors could be seen by persons on the Cape, clinging in despair to the rigging of the vessel; but nothing could be done to help them, and one by one, they succumbed to the cold and wind, and found watery graves. When the storm had subsided, parties managed to reach the vessel, but there was no trace of any of the men. The bodies of two of the men, one Franklin Seamen, of Wallace, and another, have been washed ashore. Mr. McNab, the owner, told a Post representative that there was but three men aboard the Mary Jane. Mr. McNab, Mr. Seamen, brother of one of the men found, and Mr. Clarke, brother of the captain, went to the scene of the wreck yesterday.

Board and Tuition in Primary Branches \$135.00; other branches extra, as per Calendar. For Catalogues or information with regard to rooms, etc., apply to

Rev. B. C. BORDEN, M. A., Principal.

Aug. 26. 11

Special Locals.

Pickard's for good value in Boas, and other Fur Goods.
Mantle Cloth—Cheapest at Pickard's big assortment.
English Walking Jackets, latest cut—Pickard's.
Boy's Overcoats—133 men's and youths and boys Overcoats—with caps and other wares.

Ladies College.—Parties wishing to join the classes in Singing or Shortland at the Ladies College should do so at the beginning of the term, as classes are now organized for the year.

Wanted.—GOOD COOK. Intercolonial Hotel, Good Wages.

New Hats and Caps cheap at Hickey's, D. & A. Corsets, full stock at Hickey's.

Call at Jos. W. Dobson's for your Nickel Driving Harness, Team Collars, and all other fittings in his line.

Finest line of Ulster and Jacket Cloths in town at Hickey's.

Hickey's for cheap Flannels and Underwear.

To TELEPHONE SUBSCRIBERS.—Subscribers are requested to notify Mr. Frank Harris, No. 25, when their instruments are not in working order.

SACKVILLE TELEPHONE CO.

Ladies Rubber Gossamers, "New Market" the latest thing out at Hickey's.

Hickey's for pure Malt white Wine and Chablis Vinegar.

Hickey's for pickling Spices.

Around Town.

STONE.—32 cars of stone were shipped to Toronto last month from Sackville.

Rev. D. C. Lawson, will preach in the hall at Westmorland Point, next Sunday the 12th at 2.45 p. m.

METHODIST SERVICE, SUNDAY Oct 12th.—11 a. m., P. W. Harrison, 7 p. m., O. Gronlund. Upper Sackville 3 p. m., F. W. Harrison.

BASE BALL.—The Mt. Allison nine and a picked nine from the village played on the Academy grounds on Thursday afternoon last. The former won by a score of 16 to 8.

FIRE AT CHERRYVALE.—On Thursday night the school house on Aboushagan Road at Cherry Vale was burned to the ground. There had been no fire in the building all day and the burning looks like the work of an incendiary.

—Mr. Wood, M. P., was at Port Arthur on Friday en route to Prince Albert. He may extend his trip to the Pacific coast. Mrs. Wood and her sister, Miss Annie Treuman, are visiting their brother, Albert Treuman, Boston. Mr. Wood will join them there on his return from the West.

GAME.—Horatio Nelson Wallace Esq. of the Halifax Banking Co., and Major Maycock of the Royal Engineers, Halifax, were scouring the marshes the past week for snipe. They were quite successful. On Saturday, Messrs. Murray and F. McDougall got 25 birds on the D. Sears bog.

PROMENADE CONCERT.—The promenade concert given in Music Hall last Friday evening by the members of the Cornet Band, was listened to by a large audience. The band played several new selections in its usual good style, and the booths presided over by two lady friends of the band, dispersed material for the refreshment of the inner man. About \$50 was cleared for band purposes. There will be no more open air concerts this season.

PERSONALS.—Hon. Senator Dickey returned a few days ago from a trip to British Columbia. He is enthusiastic over the evidences of progress he witnessed in the west. All the towns along the C. P. R. west of Winnipeg are developing with astonishing rapidity.

Three years ago when he visited the city of Vancouver, it had only about 60 houses. To-day it has a population of 10,000 people, with many handsome streets, containing specimens of the most substantial architecture. He states that the generally accepted opinion west is that there will be 15,000,000 bushels of wheat for export this year—double that of last.

MR. ALLISON NOTES.—On Saturday last, Prof. Andrews and about fifty of the students of the college and academy went for a geological trip to the Joggins, where the day was spent in collecting fossils of that rich carboniferous formation, and in studying the strata and escarpments in the locality. Other trips to the same places are looked for in the near future. The class is greatly indebted to Mr. W. C. Milner, of the Joggins Ry., for his kindness during the trip.

On Saturday, a special car took a large number of both male and female students to the ship railway. The works were inspected, and a thoroughly good time enjoyed. At night, the different parties had a big supper to finish the day.

Dr. Smith, on Progress, visited the St. John exhibition in the capacity of judge. He returned on Saturday.

Local Matters.

A Ripe strawberry was picked near Moncton on Thursday last.

There were flurries of snow in Moncton and Elgin on Monday.

The Maritime Presbyterian synod is holding its annual at Moncton.

Rev. Dr. Hartley, of Amherst, is writing a book about "Secret Societies."

SAMUEL POWERS, of Pugwash, has been fined \$50 and costs for violating the Scott Act.

THOS. HENNESSY and Chipman have been nominated for councillors for the parish of Moncton.

Mr. BROS. has entered suit against the Ship Railway for damages done his property at Fort Lawrence.

Two boys found the body of a child near Amherst, on Thursday last. It had evidently been strangled. There is no clue as to the mother of the child.

DORCHESTER parish exhibition will be held at Memramouc Corner on the 14th inst. There will also be horse racing. Our local sports are preparing for the event.

Two tramps have been arrested in Moncton, charged with attempting to wreck a train on the I. C. R. on the 29th inst. There is a reward of \$200 for the guilty parties.

Mr. W. D. Dimock, agent of the Jamaica exhibition, was in Amherst this week. The Amherst Boot and Shoe Co. and Messrs Rhodes, Curry and Co. will send exhibits of their manufactures.

There is a probability of a contest in municipal politics at Amherst. Councillors W. A. Russell and Calixte Gallant, who seek re-election, are to be opposed by Philip F. Boudreau, of Upper Aboushagan.

The late storm was severely felt at Shediac. Several small boats have been wrecked, and a barque loaded with deals for J. L. Black, Sackville grounded and was badly strained. Her cargo will have to be moved before she can be made sea-worthy.

We would direct the attention of those of our readers who desire to buy a first class farm, to the notice of the property of the late Daniel Hamilton, Esq., situated at Shediac. This is one of the finest farms in the province and is a valuable property.

Messrs A. F. Gault and D. Morrice, of Moncton, are preparing the proposed cotton syndicate, were in Moncton last week, and met the directors of the Moncton Cotton Co. in connection with the proposal to sell or lease the mill.

Nearly 200 students are now attending Memramouc college. The upper story of the gymnasium is being converted into a dormitory, which will accommodate 30 to 40 students. There was never such a number attending college at one time since it was opened.

REV. H. N. S. Starr, Mr. Nichols, of Somerset, was in town yesterday looking for parties to invest spare capital in a little invention he claims to have discovered by which any kind of craft can be propelled in the water.

Is he a crank, or not? We will await developments.

A MAN named Clancy was before a magistrate on Saturday being charged with committing an indecent assault on a widow woman named McFarlane, formerly a resident of Salisbury. The disclosures were of a rather sensational character, but it is asserted by the friends of the defendant that the case is one of black-mail.

Mr. J. McC. Snow is a general insurance agent. Moncton a few days ago he received the following letter from a Frenchman at the North Shore:—"Mister Snow, I write to let you know I burnt my house last week. I have her insured. Come up and pay me my money. It is not definitely known whether Mr. Snow hired a special train for North Shore when he received the above."

THE schooner Annie Gale, Captain Dolf, which sailed from Shulee a few days ago with a cargo of boards for Vinyard Haven, was dismantled. While at sea and was obliged to put into Gloucester for repairs. The cargo will have to be taken out and a new mast put in. The owners are B. Young & Co., Capt. Wolf, and Dr. Hewson.

Says the Record: Councillor A. Wilson, who is doing much to improve the live stock in the eastern part of the county, has been adding to his stables a beautiful bay filly, which he bought from Mr. McLellan, of St. John. The Sun of that city, in referring to the purchase gives the pedigree which shows very fine breeding, viz: Dam Mistleton, by King Alphonso, dam Bombazie by Bonny Scotland.

DENNIS ARNEAU, of Minidie, N. S., while walking near Black Point a few days ago, saw some sticks sticking out of the earth which attracted his attention, and upon digging away the earth, he brought to light two small cannon lying near together, each about 2 ft. 6 in. long, with a bore 1 1/2 inches in diameter. The outside part of the metal had so corroded that it could be cut almost as easily as a lead pencil, which it resembled in color. A piece was broken from one of the guns in taking it from the earth.

Gilmour's Sale.

W. E. Gilmour whose advertisement appears in this issue is conducting a grand cheap sale at Amherst. Music Hall is filled from top to bottom with dry goods of every description, which are being offered at prices to suit everyone. The building is crowded every afternoon and evening and the goods are going off in quick order.

Says the Post: The big sale of dry goods and millinery by Mr. Gilmour, in Music Hall is proving a great source of attraction to customers. The great range of tables and the immense display of goods, handsomely displayed, remind one of the large establishments in our chief cities. With a good staff of salesmen, the sale is a success. The sale and part of the flesh was torn off but the bone was not injured sufficiently to make amputation necessary. Dr. Thorne dressed the wound.

ACCIDENT.—While coupling cars at the station here on Thursday last brakeman Scott of Moncton had the forefinger of his left hand smashed. The nail and part of the flesh was torn off but the bone was not injured sufficiently to make amputation necessary. Dr. Thorne dressed the wound.
