etermine is this :- How do we stand in relation to the difficulties with which the merican agriculturist finds himself face to face? If the truth were told we are not much better off than they. Our forests have been mercilessily hewn down, and although it may be pleaded that the demands of commerce justified this destruction, it cannot be denied that a great part of our timber is annually wasted through sheer carelessness. In fact, we have the authority of one of the foremost scientific men in the Province for saying that every year there is more timber wasted, either by being left on the ground to rot or by being burned. than there is cut down for commerci

THE NEW ROUTE FROM ENGLAND TO INDIA.- A new scheme accelerations traffic between England and India has come into prominence since the undoubt ed success of the Suez Canal; this is by connecting Egypt with the Persian Gulf. A railway from Ismailia to Bus sorah, through Syria and the Euphrate valley, besides shortening by five day the transit of mails between England and India, would connect Egypt with Persia or Africa with Asia, if larger terms are necessary. Ismailia is men tioned in preference either to. Port Said or Suez, because it is about midway through the canal, and is already in railway communication with Alexandria and is, moreover, in the direct line to Cairo. This scheme seems a triffe less delusive than its predecessors. A rail way passing through Palestine, to join the Suez Canal to the Persian Gulf uestion to the courts. might not be a good dividendal line, bu the expense would not be preposterous and the saving in time for mails and passengers would be important. If the in of twenty-four hours by the Mont lenis Tunnel has been felt as such mon in India, how much greater would be the rejoicing if the time becupied in transit was shortened by five days?
