STORM DOES BIG DAMAGE

The Elements Play Havoc In The District Around Petrolia

CROPS ARE AFFECTED

Petrolia, Ont., Aug. 22.—The severe electrical storm which passed over this part of the country did a lot of damage that will be expensive to the farmers.

Douglass Reader's barn on the 4th concession was wholly destroyed, the loss amounting to \$5,000. Douglass McKellar's, on the 7th concession, was burnt, with a loss of \$5,000.

In both instances a great deal of produce was destroyed, together with farm implements.

COUNTRY FLOODED.

The country lying between Inwood and Petrolia has been flooded, in some places to a depth of over two feet. Oats in shock are under water and the roads are almost impassable. The rain was especially heavy, and that portion of the district being low proved a veritable receptacle for the streams that came from the hills.

The farmers are in a quandary just how to prevent further disaster. The extent of the losses resulting from crops being ruined amounts to a big sum.

The clay in the soil causes the water to stay on the surface for a long time.

NEGRO SHOT DEAD

Father takes Revenge For Attempted Assault On His Young Daughter

Columbia, S. C., August 21.—"Bob" Etheridge, the negro who on Thursday last attempted to criminally assault the 7-year-old daughter of T. H. West, a well-to-do farmer of the Mount Willing section of Saluda county, was taken to-day by the girl's father to the scene of the crime, where he was shot to death to-night.

West lives eighteen miles in the country. Etheridge was employed at the home of West. Thursday afternoon he asked the child to accompany him to feed the stock, and while at the barn he attacked her. The child was horribly bruised. Although it was reported that the girl's death was momentarily expected a message from the attending physician to-night stated that there was some hope of her surviving.

A SUDDEN DEATH GAME

The Chippewa Lacrosse team leave on Friday on the 8:30 G. T. R. train for London, where they will play the Beavers of Brantford, a sudden death game, at 8:30.

This is a semi-final game, and it is expected to be a fast one. A large crowd of supporters leave with the team.

The following is the lineup:
Goal—Chandler.
Point—Farby.
Cover point—Bounsaal.
First home—Cradock.
Second home—Farby.
Third home—Boyd.
Centre—Santury.
Third home—Munro.
Second home—Martin.

Outside—Stringer.
Inside—Sheldrick.

AUTO'S AND LAUNCHES

Owing to the increase in the number of automobiles being purchased by the citizens of Chatham, and the thirty-eight gasoline launches in the River Thames, Brisco Bros. are having a busy season supplying gasoline, oil, launch and auto supplies.

This enterprising firm carry in stock special oils for launches and autos, and all purchasers are in praise of the quality of gasoline sold by them. On Saturday last over 200 gallons of gasoline was put in launches and automobiles from Brisco's oil tanks. Chatham is becoming noted for the finest automobiles and launches in the province having two firms manufacturing launches and one firm manufacturing automobiles.

The trouble with finding fault is that you lose so much time.

Good deeds grow in places where they are looked for the least.

IN HIS NEW POSITION

W. N. Warburton has assumed the management of the Windsor, Essex & Lake Shore Rapid Railway and will superintend the completion of the road.

Mr. Warburton comes to Windsor highly recommended as a successful railway man. His first venture was with the Erie & Huron railway, running from Sarnia to London. When this line was absorbed by the Lake Erie & Detroit River railway he went to Hamilton, where he managed the construction of a number of suburban lines. Returning to Chatham he superintended the work on the Chatham & Wallaceburg railway, and he resigned his position with this road to accept the managerial berth in Windsor—Detroit Free Press.

LOVERS MEET AT THE BOAT

The Crowds Which Meet The "City" Every Night Are Growing

A BIG PUBLIC NUISANCE

A stranger in the city last evening was surprised to see so many people on the street evidently on their way home, about nine o'clock. After a series of questions he found that the people were coming from the Rankin dock. The "City of Chatham" had just got in.

After another look at the crowd on the street he said:

"That City of Chatham must be a big boat. Is it an ocean liner?"

After he was informed of the size of the boat he exclaimed that certainly must have been overloaded yesterday.

But all of those people did not get off the boat. In fact only a very small number of them saw Detroit yesterday when the steamer was in the city. The rest of the people were coming from the Rankin dock. The "City" must be a boat which makes a round trip once a year, to cause such an excitement when she appeared at the Rankin dock.

The practice of "meeting the boat" is one which should be associated with the ancient history of Chatham, and the people of to-day should be content to let the habit drop. There is some excuse for those who are expecting friends or relatives coming in on the boat, but for the many people, especially the young, who make regular trips to the Rankin dock whenever the boat is due, there is no excuse. Many of them make the Rankin dock a rendezvous for lovers' meetings.

Of late years it has been found necessary to send a policeman down to the dock to keep the people back far enough to allow excursionists to get on the boat. These crowds of inquisitive spectators reach from the dock up to the top of the bank, and it is with the greatest difficulty that men and women make their way to the top. Even the streets at the top of the bank are blocked with loafers. When the boat is unloaded the crowd soon disperses and the excitement is all over.

The authorities should take steps to overcome this nuisance, and if under present regulations they have not the power, something should be done to strengthen their hands in the matter.

A NEW CLUB

A largely attended meeting of the shareholders of the Country Club was held at the Golf Links at 4:30 o'clock Thursday afternoon.

Mr. R. O. McCulloch, president of the club, read a copy of the club's proposed constitution, and by-laws, which have been carefully and judiciously formed, and which were unanimously signed by the shareholders. The by-laws are very comprehensive, and are very much after the style of those in vogue with the Lambton and other large Country Clubs.

The plans for the proposed club house, which were submitted at the last meeting of the directors, were examined and the board of directors authorized to proceed with the matter, as expeditiously as possible.

The meeting broke up shortly before six o'clock, the shareholders returning via G. P. & H. to their respective homes in Galt, Preston, Hespler and Berlin—Galt Reporter.

The plans for this new club house were prepared by J. L. Wilson & Son, architects, of this city.

GOOD GROUNDS.

You are charged, said the police justice, with violating the smoke ordinance. What have you to say?

I have not violated any ordinance, your honor, protested the accused. My factory has a smoky chimney. It is true, but it has a right to have it.

On what ground?

It's a tobacco factory, your honor.

The world is good for bad just as you feel disposed to make it.

THE CROPS IN ONTARIO

Department Of Agriculture Issues August Bulletin Fall Wheat Good

THE ESTIMATED YIELD

Toronto, Aug. 22.—The Ontario department of agriculture in its August crop bulletin gives the estimated yields of the principal crops in Ontario based on the returns from two special correspondents reporting on August 1.

Fall Wheat—737,287 acres, estimated at 199,069,633 bushels, or 24.2 per acre.

Spring Wheat—A reduced area of 177,455 acres is expected to produce 3,348,193 bushels, or 19.5 per acre.

Barley—756,163 acres; 25,478,250 bu. or 33.7 per acre.

Oats—2,716,711 acres; estimated yield 111,356,914 bushels, or 41.0 per acre.

Rye—79,870 acres, estimated 1,370,898 bushels, or 17.2 per acre.

Peas—410,356 acres; estimated to yield 8,671,567 bushels, or 21.1 per acre.

Beans—51,272 acres; estimated yield, 1,034,113 bushels, or 20.2 per acre.

Hay and Clover—3,069,917 acres; estimated yield, 4,862,830 tons, or 1.58 per acre.

Apples—6,898,810 trees of bearing age are estimated to produce 34,302,292 bushels, or 4.97 per tree.

The area in other crops for which no estimates are made areas follow: Potatoes, 136,064 acres; mangos, 69,353; carrots, 4,980; turnips, 132,512; rape, 43,560; flax 6,902; hops, 1,732; tobacco, 8,087; orchard 352,506; vineyard 12,735; pastures (cleared land) 3,349,101.

Taken generally the Ontario crops are better than last year, fruit excepted.

A WIZARD TALKS

Thomas Edison Says The Miners Are Keeping Cobalt Prices Too High

Montreal, August 22.—Thomas A. Edison has arrived in Montreal from Orange, N. J. He left that city eight days ago on a month's automobile trip.

Mr. Edison spoke regarding his experiments with cobalt, which he instituted with a view to developing electricity and storing it so that it would enable automobiles to run 500 or 400 miles by this means instead of 75 miles, as is the case at present, that he could not afford to purchase the mineral at Cobalt, Ontario, as the miners were keeping the price so high that he could not buy the material and use it advantageously for commercial purposes.

This was the reason why he made his recent trip through the mineral regions of North Carolina. He owns considerable property near Cobalt, but says that he cannot get enough of the mineral to enable him to use it successfully for automobile purposes.

DRULARD FUNERAL TODAY

The funeral of Charles Drulard, the Windsor young man who shot and killed himself Monday evening, will take place this afternoon. Services will be held at the home of his grandfather, Matthew Drulard, at Janette avenue and Sandwich St.

Nothing more has been learned as to whether the shooting was accidental or intentional. The bullet entered the mouth and, passing through the brain, emerged at the base of the head. The bullet afterward was found embedded in the door.—Detroit Free Press.

CIGARETTE IS FATAL

Kalamazoo, Mich., Aug. 22.—George Redish, aged 10, colored, of South Bend, Ind., is dead here from burns received by the explosion of a gasoline tank. Sneaking into a shed to smoke a cigarette, the tank exploded when he struck a match. His cries as his clothes caught fire, brought Jacob Burton, whom he was visiting who battered down the door and rolled the boy on the ground. The boy lived eight hours.

THE DIFFERENCE.

I want to know, said the irate matron, how much money my husband drew out of this bank last week.

I can't give you that information, ma'am, answered the man in the cage.

You're the paying teller, aren't you?

Yes, but I'm not the telling payer.

An old dress, like a kind friend, sometimes does a woman a good turn.

\$500,000 CROP

Leamington, Aug. 22.—Tobacco cutting has commenced in the South Essex tobacco fields. The crop promises to be up to standard. A number of reports have been sent out from time to time to the London and Toronto papers that the crop this year was away below the average. These reports are absolutely incorrect. There are many poor fields, but the average is up to that of former years.

The unprecedented hot spell of the last six weeks has done wonders for the crop, and cutting is now becoming general.

The crop this year in the Leamington district will be worth at least half a million dollars.

LOOKING FOR A GREAT GAME

Local Football Enthusiasts Will All Be At The Fair Grounds To-morrow

CORINTHIANS COMING

The many lovers of good fast football are all looking forward to the contest to-morrow between the Corinthians, of England, and the All-Kent team.

The game will be called at five o'clock, and will be refereed by Will McDonald, of Detroit. The band of the 24th Regiment will leave King street for the grounds at 4:30. The Corinthians have been winning all along during their tour, and are playing the Seaforth team to-day.

The Detroit Free Press has the following to say of the game:

A great many local enthusiasts will go over to Chatham, Ont., next Thursday to see the Englishmen stack up against the All-Kent aggregation that has been selected from the east end of the Peninsular League. This is the team that beat the St. Andrews for the league championship a few weeks ago. The Chatham representatives are speedy and have been practicing hard for the past few weeks.

Charles Cummings is laying out grounds this afternoon according to the English regulations. The line-up of the teams will be as follows:

CORINTHIANS

Goal—Ronaldson.
Backs—Timmis and Page.
H. Backs—Willett, Wreford and Craig.

Right Wing—Hardie and Laing.
Centre—Foster.
Left Wing—Williams and Storey.

ALL-KENTS

Goal—Bass.
Backs—McKenzie and Pugh.
H. Backs—Fox, Bennie and Coulter.
Right Wing—Riseborough and Peck.

Centre—Langford.
Left Wing—Martin and Parrott.
The Corinthians go from here to Chicago.

THE TENNIS GIRL.

THE GIBSON WHITE LINEN TAILORED COSTUME STILL SMART.

To Dress Well For a Tennis Tournament Is Half the Battle—Never Wear Lace Trimmed Petticoats. Appropriate Neckwear and Hats.

The typical tennis girl, the sort of girl one would expect to find in a Gibson picture, is gowned in dazzling white linen of severe make and wears a shirt and a straw panama or linen hat. The only relief she affords herself is a hat-band and waist belt in colors which probably proclaim the college or the club of some masculine relative or friend. More becoming if less ostentatiously sporting is a ribbon of pale blue to match blue eyes or a pale pink to accentuate a delicate complexion. Per-

OWN OF LINEN AND EMBROIDERY.

haps most alluring of all is the entirely white ensemble. The tournament girl should remember to dress well for her matches. We all know what a tremendous incentive is the sympathy of on-lookers on such occasions. Indeed, on-lookers are quite as alive to the appropriateness as to the prettiness of a player's costume, and they give a perhaps unconscious backing to the girl who is clever enough to combine these desired objects. Not knowing either of the players, they want the one who looks the most charming to win. And she is swayed to her best exertions by this thought, probably openly expressed in applause of her good strokes.

For this girl the ideal apparel is that described above. Every garment must, of course, be of spotless freshness. Nothing is likely to prejudice the minds of an audience as any lack in this respect, and this means a clean white skirt every day of a tournament week. The underskirt also forms a consideration of essential importance. On no account should a lacey petticoat be worn for tennis. Great as is the attraction of such lingerie, there is danger of the foot catching in it. The embroidered substitutes are now so lovely that one can give up the less suitable alternative without regret. A white silk petticoat is likewise delightful for tennis, as it is so easy to move about in, and it may be made with an embroidered muslin overfounce, so that no effect of daintiness is lost.

The question of hats and neckwear is not so easily disposed of. Some tennis players have never swerved from their devotion to the sailor hat, and custom has insured them to its weight and made them oblivious of any discomfort arising from its hardness. Others, however, have adopted the panama and linen hats, both of them preferable from the picturesque point of view. The Peter Pan waist is a popular sport model this summer. With its turnover collar, elbow sleeves and flaring cuff it is indeed both comfortable and becoming. Illustrated is the tennis costume illustrated is of white linen. The skirt is laid in box pleats and attached ten inches from the waist. The little jacket is on the kimono order and elaborately worked in English embroidery.

AMY VARNUM.

"Peter Pan" Things.

First came the "Peter Pan" hat, a queer little plaided Scotch affair, with quills. This was followed by the "Peter Pan" blouse, with low round collar, short sleeves and patch pocket. Now there's an entire "Peter Pan" suit, which young girls are wearing with immense delight, because of its simplicity and girliness. It's merely a shirt waist suit, the blouse whereof is like that described above, and the short round skirt plaited or plain. For country wear, morning, picnics, etc., it's a very pretty sort.

So far that's all the "Peter Panish" modes, though possibly those new belts of bright Scotch plaid silk belong to that category.

Winter Clothes.

When packing away winter clothes try dried lavender, cloves and other fragrant spices with them, instead of the inevitable camphor or moth balls. Pleasant odors will prevent the moths as effectually as disagreeable ones, provided they are sufficiently pungent.

For Fancy Work.

Large sewing bags to use for one's fancy work are made of wide ribbon and two small embroidery hoops are used for handles.

CARRIE NATION IN JAIL.

Charged At Denver With Disturbance and Inciting a Riot.

Denver, Aug. 21.—Carrie Nation spent Sunday night in the city jail. She addressed a meeting of women Sunday afternoon and asked for volunteers to accompany her to the tenderloin district in the evening. At 9 p.m. one hundred women, some carrying babies, followed her into Market street, and two hours of wild excitement followed.

Five thousand people gathered, blocking the street cars. Hoodlums began abusing the women, a cry of alarm caused a stampede in which many were injured, and the police interfered, locking up Mrs. Nation on charges of disturbance and inciting a riot, the latter a penal offence here.

Lightning Strikes Church.

Cornwall, Aug. 21.—During a heavy thunderstorm yesterday afternoon lightning struck the Church of Nativity (Roman Catholic), East Cornwall. Inside a couple of large pictures, standing on the cross, were knocked down, and two sections of plaster about six feet in diameter, were torn from the walls, leaving the woodwork singed. Fortunately the building did not take fire.

Are You Tired, Nervous and Sleepless?

Nervousness and sleeplessness are usually due to the fact that the nerves are not properly nourished; they are starved nerves. Dr. Pierce's Golden Medical Discovery makes pure, rich blood, and thereby nourishes the nerves. CHILD'S PLAY TABLE.

CAN BE TURNED FROM TABLE TO SAND BOX.

Invented by a Clever Kindergartner—It Is Little More Than Four Feet Long, Two and a Half High and of Lesser Width.

An ingenious play table for children which has been adopted by many kindergartens in this country and even in Germany is the recent invention of Miss Frances A. Greenlaw, a young

THE PLAY TABLE.

kindergarten teacher of Marinette, Wis. It saves space and time, serves as well in an ordinary nursery as in the school-room and amuses the little folk by its very capacity of transformation.

The table is a little more than four feet long, two and a half feet high and of lesser width. The varnished top is ruled in squares, helpful in dressmaking and exercises in measurement. When the small students weary of such lessons, the top is tipped over on its hinges, off regardless of the dolls that crash headlong to earth, and a large box of white sea sand is disclosed. This sight usually evokes the enthusiastic mariner's song, and then the children ply their spades in the hope of finding pearls or sunken ships. The wise teacher sees that there is something new to be found each time.

But the possibilities of the sand box are endless. Houses are built on the beach to the accompaniment of the carpenter's song, the forest sings and plants a grove of evergreens, the farmer builds his dwelling far inland, and the mother hangs out her clothes on the toothpick poles. The sand box is so much fun that it is a question

PLAY TABLE AS SAND BOX.

whether the students will ever be willing to have the top restored and go back to the common toils of dressmaking and designing. Miss Greenlaw is a most enthusiastic kindergartner. Having a practical knowledge of carpentry, she not only invented the play table, but built the first full size models herself. Her implements were saw, plane, turning lathe and a hammer, which never mistook the welder's thumb for a nail.

What the Baby Needs.

The least noise a baby hears, the less he is carried about and played with for the first six months of his life, the better it will be.

It is seldom necessary to take him from his crib except for his bath and meals. The habit of tossing him about and trotting him on the knee makes him nervous and wakeful and cannot possibly do any good.

His undeveloped system calls for rest, yet he is often denied that privilege. Children as well as older people are to a great extent creatures of habit, and they cannot acquire habits that are conducive to proper development and health of the body at too early an age.

It is during sleep that the building up forces work without interruption and the child gains in flesh and strength. Have regular hours for his naps and see that everything is favorable for sleep at that time. There should be no tight bands to hinder respiration.

Place his crib in such a position that the light will not shine directly upon his face, preferably in a cool, quiet corner. Do not cover him too warmly. Change his position occasionally, and he will sleep longer.

Slips For "Best" Blossoms.

Some girls with a love of pretty things hit upon the clever idea of making good bags and slips, with which she covered her best blouses and tuckers, of flowered stuff instead of the usual plain white muslin affairs. The open door of that closet reveals a pretty sight instead of a rather funeral effect the muslin shroudings are bound to give. Choosing a closely woven material, so that the dust is as safely defied as when a stout muslin is the shield, is the only point that need be looked to. Have some of the covers gay, sheet-like affairs. There are certain gowns which keep in better condition if something is folded carefully about them than if they are slipped into the roughest of bags. And put loops upon bags or wrapping sheet, so that their weight, little as it may seem, will bear directly upon the closet hooks instead of adding its mite to dragging the delicate skirt or blouse out of shape.

Still Waters Run Deep.

First Lady—That new household of yours seems a very quiet girl. Second Lady—Yes, she's so quiet that when she's cleaning out a room she doesn't even disturb the dust.

It's a "Hecla" Patent

And no other Furnace has it.

FUSED JOINTS are to be found only in Hecla Furnaces. In ordinary furnaces the joints between the steel and the cast iron parts are made with bolts and cement. Such joints are soon pulled apart by the unequal expansion and contraction.

In the Hecla this joint is made by fusing the two materials together at a white heat. This joint is everlasting and will never leak gas, dust or smoke.

"Hecla" Furnaces are the only ones with FUSED JOINTS—the only means of having a house free of dust, smoke and gas. Send me a rough plan of your home, and I will send you an estimate of the cost of installing the proper "Hecla" Furnace. Also a copy of new catalogue of Hecla Furnaces. MRS. DIXON'S LAW SUIT

Sensational Evidence of An Interesting Character Given

FACTS ABOUT THE BABY

Sensational disclosures about other prominent families were made when Senator Patrick H. McCarren, of the Ontario Legislature, was threatened by Mrs. Mary A. Dixon. The woman who has brought suit against McCarren for \$200,000 said last night that an amended complaint would be filed to-day which would lay bare several private lives.

Mrs. Dixon, when seen at her home No. 82 Lenox road, Flatbush, said that since serving the summons in her suit last June, she and her lawyer, Manton M. Nyvell, have been shadowing the senator and several of his political and business associates.

"This man who claims to be my husband, and who was unceremoniously treated by Senator McCarren," she said, "may or may not be Dr. Dixon. I do not know, neither do I care, for it does not interfere with my claim against McCarren in the slightest. I am suing him for damages for the desert he practiced upon me. He knows all about Dr. Dixon as I can prove, and he told me I was free to marry after not being able to find my husband for over five years. Then he deceived me into what he called a common-law marriage which he knew at that time was illegal."

"It is rather strange that this man who claims to be my husband must have left the city after having lived here for nine years. The fact of the matter is that a hearing before a referee has been arranged so that the Senator, with the help of this Dr. Dixon, can get his version of the case before the public just before the primary elections are held and in that way save himself from political ruin. But I will spoil this trick by the new complaint."

"They have me right in regard to my percentage. The marriage record is also correct as I was married under the name of La Ferte and as a widow, when in reality I was no such thing. That was Dr. Dixon's doing. When I became a reporter in Toronto I adopted the name of La Ferte as my nom de plume. Dr. Dixon, in Toronto, was engaged to a wealthy girl but he broke off the engagement and made love to me. He induced me to pose as Mrs. La Ferte, a wealthy widow, so that his people could not object to the money basis. Then he deserted me, leaving unbaptized our first child."

"When I came to New York to make a living I found a position as nurse in the Kings County Hospital. I met Senator McCarren in Judge Haggerty's office. He told me I was too well educated a person to be a nurse, and he would get me a position as teacher in the public schools. He then proposed that I become his private secretary, and I invited him to lunch to talk the matter over. When I told him my life's story he told me I was a free woman."

We lived at the Clarendon Hotel, and among those whom I met and was introduced as Mrs. Wilson, were men whose names stand high."

"Shortly before my baby was born he treated me cruelly. He appeared to love the child and would sit for hours on the floor trying to amuse it. It was at his wish that I had the boy christened H. McCarren, Jr."

The Non-Coms. of the 24th Regiment have received an invitation from the 38th Dufferin Rifles, of Brantford, to send a representative to their camp at Niagara, which will be pitched Sept. 1, and will continue for the following two days. The Non-Coms. will meet in their mess rooms this evening to appoint a representative.

The Property Committee held a meeting in Harrison Hall yesterday afternoon, and at the meeting of the Council this evening, they will bring in a recommendation that the work of renovating the old market front be gone on with. Ald. Potter says that from the appearance of the plans, the new building will add greatly to the appearance of the city in that vicinity.

Mr. and Mrs. Geo. A. Gray have returned from a trip across the great Canadian West as far as Victoria and back. Mr. Gray says that the trip was greatly enjoyed and that they had a very pleasant time. They met a number of ex-Chathamites while away, among who was Mrs. Link Wilson (nee Miss Hayton) a former Chatham girl. Mr. Gray was greatly impressed with the number of Gray wagons and carriages made in this city, which he saw en route.

Edward G. Scott, who for some time past has been a popular and obliging salesman at Turner's drug store, has severed his connection with the firm. Mr. Scott intends launching out in the drug business for himself in Georgetown, which is his home town. Before going to Georgetown he will visit friends in Toronto, Hamilton and St. Catharines. He was for five years connected with Spackman's drug store, of Hamilton.

Mr. Scott will be succeeded in the Red Cross Drug Store by Adam Bruce, of Sarnia.

Mr. and Mrs. Geo. F. Ludlow, Mr. F. Addyman and Master W. R. F. Addyman, who have been guests of Mrs. Terry, Harvey St., have departed for points in the East—Mr. and Mrs. Ludlow to Toronto, Montreal and Winnipeg; Mr. Addyman and son to St. Thomas, Ont. It is of interest to know that the visitors mentioned above expressed the keenest regret upon their departure, after having experienced the most remarkable kindness, not only from their hostess and family, but from many of the citizens of Chatham.

The funeral arrangements had not yet been made this morning.

The deceased was 86 years of age, and was one of the pioneers of this city. Her husband was at one time engaged in the produce business in this city, and conducted quite an extensive store.

BOWLING ON THE GREEN

Englishmen Will Arrive In Chatham Tonight on Special Train

PLANS FOR TOMORROW

The British Bowlers are playing in Ridgetown to-day. They will be in Chatham to-night, and will enter into a friendly contest with four rinks of Chatham bowlers to-morrow.

The English visitors will arrive in this city this evening on a special train at six o'clock, and will be met by a reception committee composed of the local bowlers. They will then be escorted to their respective hotels.

To-morrow morning they will be entertained to a trip down the river on the steamer City of Chatham, accompanied by the local club and their friends. The boat will leave the Rankin dock at nine o'clock in the morning. Music will be furnished during the whole trip, and a luncheon will be served. The boat will arrive back at two o'clock in the afternoon, when adjournment will be made to the bowling green, where the games will be played.

Games will be played with four rinks of Chatham bowlers, and one rink each from Dresden, Ridgetown, Thamesville and Blenheim. After the games the visitors will be driven around the city in carriages, and shown what an up-to-date place Chatham is.

The following are the names of the Chatham players: Rink No. 1—Messrs. McCorvie, Gosnell, Hodgins and N. H. Stevens. Rink No. 2—Messrs. Walker, MacGillivray and R. G. Fleming. Rink No. 3—Messrs. Thomas, McGregor, McDonald and Dr. J. L. Bray. Rink No. 4—Messrs. W. Merritt, Austin, Montgomery and L. E. Tillson.

The last named in each case will be the skips.

LIGHTNING'S WORK

Giri and Man in Eastern Ontario Are Victims of Storm.

Ottawa, Aug. 22.—Monday's electrical storm did considerable damage along the Ottawa Valley. Several points being struck in the Ottawa district. Laura Moore, aged 21, was washing clothes in the Ottawa River when the storm burst. With her mother and sister, she sought shelter under a neighboring tree. Miss Moore was killed instantly by a lightning bolt that also prostrated her mother and sister.

Fraser's sawmill, near Aylmer, was hit and three workmen rendered unconscious. Several barns were burned. At Lennox, William Bradford, aged 45 years, of the Township of Darling, farmer, and postmaster of White, was struck by a bolt of lightning while sitting reading a newspaper at his home.

Heavy Struck at Galt.

Galt, Aug. 22.—Lightning struck a huge willow tree on the premises of the Victoria Wheel Works. In an out-building close by was Thomas Kempthorne, an employee. The violence of the bolt overturned the building and flung Kempthorne to the ground, severely stunned. Ernest Rowe, a fellow-workman, standing nearby, also suffered from the stroke.

Fire Chief Richard Pritchard is in receipt of the following complimentary letter, which was accompanied by a box of choice cigars:

THOMAS LODGE, No. 101, S. O. E., Chatham, Aug. 21, 1906.
Richard Pritchard, Esq., Fire Chief, Chatham:

Dear Sir,—Allow me, on behalf of Thames Lodge, No. 101, Sons of England Benefit Society, to thank you for the exhibition fire run, on the occasion of our S. O. E. convention, which was much admired and very favorably commented upon by the visiting delegates; also for the loan of the flag.

Please convey our thanks to the men under your command. Wishing all of you prosperity. Yours sincerely,

ANNOUNCEMENTS

At the Chatham Grand—Just Struck Town—Aug. 25.

JUST STRUCK TOWN.

Several thrilling effects are promised on the presentation of Elmer Walters' great comedy-drama, "Just Struck Town," at the Brisco Opera House on Saturday.

This play is said to be quite unique in its construction, with some very laughable situations. Chief among the comedy parts is a Swedish servant girl and a blarney country constable lover—the latter is an uncommon youth, though serving in an official capacity for the county in which he resides he has never allowed the taste of liquor to pass his lips. After his first arrest his associates prevail upon him to smoke his first cigar, which brings forth much fun, as does also the lovers' quarrel in the fourth act.

The scenery is said to be quite attractive and the company bears evidence of being a painstaking one.

Dr. Chas. H. Vrooman, at a pleasant gathering of thirty Winnipeg medical men at the Royal Alexandra hotel on Wednesday night, was made the recipient of a handsome presentation to mark his approaching marriage. The event was made the excuse for a quiet and pleasant dinner, which was provided over by Dr. H. Crown. The present took the form of a magnificent set of silverware. It was jokingly suggested that the set would be sufficient to set a table for a score of people. The marriage will take place on August 28, in Ontario. The bride to be is Miss Blanche King, a graduate nurse, and a great favorite at the Winnipeg hospital. The doctor and his wife will reside on William avenue after the honeymoon is over. Judging by the kindly wishes of those who wished the bridegroom "God speed" there is indeed a happy future in store, ever surrounded by a host of loving friends.—Manitoba Free Press.

HEALTH AND BEAUTY.

Some Helpful Hints—The Girl Who is Gaining Flesh.

A splendid laxative sirup may be made as follows: Put a half pound of raisins, prunes and figs to soak in three pints of cold water. Bottle the sirup after two days and take a table-spoonful night and morning.

Raisins are extremely nourishing, especially the sun dried Malagas, which are full of grape sugar. That they should be thoroughly masticated goes without saying. A nutritious and palatable mixture for sandwiches may be made from blanched almonds and raisins that have been put through the mincing machine.

Treatment for pimples and black-heads calls for absolute cleanliness of the body, externally and internally. Pimples show that the body is absorbing poisonous substances that it should be throwing off freely. Keep the intestinal tracts, the kidneys and the skin all active by drinking plenty of water, eating fruit and bathing daily. At night scrub the face well with hot water.

The girl who is gaining flesh rapidly must keep out of doors, doing plenty of good hard work, playing golf or tennis, rowing or walking and so helping that fat to turn into firm, slender muscle. Avoid bread and butter, taking salted toast instead. Live mainly on fruit, vegetables and lean meats. Never take butter, cream, eggs, cereals or fat meats. Make it a habit to take lemon juice in a little water before breakfast every morning. It will be good for you. Do not sleep too much and keep busy all the time.

When a Woman Nags.

A doctor expresses the opinion that nine times out of ten the woman who nags is tired. One time out of ten she is hysterical. Times out of mind her nagging is to blame.

The cases that come under the physician's eye are those of the women who are tired, and who have been tired so long that they are suffering from some form of nervous disease.

They may think they are only tired; but, in fact, they are ill. In such cases the woman often suffers more from her nagging than her husband or the children with whom she finds fault.

She knows she does it. She does not intend to do it. She suffers in her own self respect when she does it, and in the depth of her soul longs for something to stop it. The condition is usually brought on by broken sleep, improper food, want of some other exercise than housekeeping and practical objectivity thinking.

It is often the most unselfish and most affectionate of women who fall into this state. They are too much devoted to their families to give themselves enough of any healthy exercise and diversion, enough of naps perhaps or concerts.

For the Mattress.

The daily turning over is not the only necessary attention for the proper treatment of a mattress. This operation itself is liable to strain the ticking and pull the stuffing out of shape in course of time. To avoid this handles may be sewed to the sides, so that the unyielding surface of the mattress itself need not be grasped. These can be made from webbing or a crosspiece of ticking and sewed as firmly as possible to the sides.

Girl's Gabrielle Dress.

A decidedly novel use for the gumpie is given in the gabielle dress here shown in a new form. The gabielle, or overdress, which may also serve as a princess, is fashioned of seven pieces, cut in deep round outline at the top, and at each side it is shaped to form two straps. The closing is arranged at the back, where an inverted box plait disposes of the extra fullness allowed in the skirt. A wide hem and three tucks finish the lower edge. The

GABRIELLE OR PRINCESS MODE.

gumpie is made with the regulation seams and a group of lingerie tucks to yoke depth at the center of the front and at each side of the back closing. A standing collar finishes the neck. The sleeves in shorter length terminate in wide bands, while those in full length may have deep cuffs or narrow bands. English cashmere with embroidered batiste and insertion and panama with dotted swiss, needlework and velvet are nice fabrics for the frock. Other suitable materials include pongee, shantung, taffeta, laundowne, albatross, linen, duck, mohair, scilleenne, etc.—Delineator.

THE WATCHTOWER OF WOMEN.

Madam! woman's watchtower. Whatever threatens her delicate sense of modesty, frightens her. For this reason many women permit diseases of the delicate womanly organs to become aggravated because she cannot bring herself to submit to the ordeal of unpleasant questioning, offensive examinations, and obnoxious local treatments, which some physicians find necessary. Doubtless thousands of the women who have taken advantage of Dr. Pierce's offer of free consultation by letter, have been led to do so by the escape thus offered from a treatment repugnant to modesty. Any sick woman may write to Dr. Pierce, Bala, N. Y., in perfect confidence; all letters being treated as strictly private and sacredly confidential, and all answers being sent in plain envelopes with no advertising or other printing upon them. Dr. Pierce's Favorite Prescription has been long hailed as "a God-send to women." It makes weak women strong and sick women well. "Favorite Prescription" contains no alcohol, no opium, cocaine or other narcotic.

TRIPS TO GHOSTLAND

HAUNTED HOUSES INVESTIGATED BY LOMBROSO.

Psychic Phenomena Which Proved to Be Beyond Solution by Any of the Known Laws of Physical Science—A Puzzled Physicist.

Professor Lombroso, the Italian physicist, contributed to the *Annals des Sciences Psychiques* an account of two psychic phenomena which he investigated purely in the interests of material science. The article is entitled "Haunted Houses Which I Have Studied," and the professor confessed that he set about his investigations with nothing to be desired in the completeness of his skepticism.

The phenomena in question, however, proved to be beyond solution by any known laws of physical science. Frankly, the great criminologist admitted that for the first time in his life he was in the presence of the intangible and that he was worsted in his attempt to grapple with the unsubstantial.

"I was asked in November, 1900, to investigate some strange occurrences which had taken place at the house of Signor Pavarino by way of Pescatore, Turin. One phenomenon I was asked to explain was the mysterious overturning of cups and jugs, which were precipitated to the ground by some unseen agency.

"These occurrences were accompanied by loud knockings on the walls and the pulling of bells in various parts of the house. The youngest daughter was awakened on several occasions by blows aimed at her by some unseen hand, and her body on examination was found to be covered with bruises, the result of severe pinches. Her sister, who slept in the same bed, felt nothing and was not disturbed in any way.

"The clash of rapiers was heard in the house at another time, accompanied by cries of anger and groans of anguish. Lights were also seen passing to and fro in unlighted rooms. An Alpine hut was continually moving about the room, and even when it was deliberately nailed to a chair an invisible hand precipitated it to the ground. All these mysterious happenings went on for eight months, and in regard to them I took the evidence of reliable persons, who testified that they had been eyewitnesses of the phenomena. Even when the bell ropes were removed from the bells the tinkling continued at all hours of the day and night.

"The scene changed to a house in the next street, by way of Bava, adjoining by way of Pescatore, where the newscaster of Turin began to chronicle mysterious occurrences of almost a similar nature to those which occurred in by way of Pescatore, cups and saucers, pans and kettles being juggled about by an unseen agency and causing at the time a most infernal row.

"In particular, one circumstance was most noteworthy. In the cellar, filled with full and empty bottles, much loss and willfulness in the way in which the breakage occurred. On my entrance into the cellar I lighted five candles, thinking that a supernatural spirit would avoid the light. On the contrary, I saw three empty bottles roll about as if pushed by a finger and break close by me. I made every possible investigation to discover a hidden trick, but to no avail. Several bottles were taken up in the air as if lifted by the hand and dashed to the ground.

"The wife of the proprietor left about that time for a visit to her father's. While she was away the occurrences ceased, only to break out again immediately on her return by way of Bava. The waiter of the house was then removed, and the occurrences ceased altogether, leaving it to be supposed, as no other hypothesis is probable, that he was the medium through which the phenomena were rendered possible.

"In May, 1903, I was asked to investigate another mysterious affair which happened in the family of a printer named Mignotti, also in Turin. It was noticed that when one of his children, a little boy, went to bed at night loud knockings began to be heard on the wall next to which he lay. A doctor, the police and myself were called in. We examined the walls and the rooms with great care.

"As soon as the boy was placed in his bed the knocking began. It was evidently conducted in an intelligent manner, and it was possible to establish some sort of communication. It was only, however, when the boy lay awake that the phenomenon occurred. As soon as he went to sleep the knocking became very vague and indistinct. He was clearly the immediate cause, though beyond a high fever, when the phenomenon was most frequent, he was in other respects a normal child. I state these facts clearly and absolutely, as I witnessed them and confess my total inability to explain them."—Public Opinion.

Japanese Lacquer.

Japanese lacquer is a very curious substance. A simple tree sap, like maple sap, it is, yet when applied to wood or metal quite indestructible. A coat of lacquer is proof against alcohol, against boiling water, against almost all known agents. The lacquer tree of Japan is very large. It is always cut down at the age of forty years, as thereafter it begins to dry up. Each tree yields on its demolition about six barrels of lacquer sap. The Japanese are very careful not to let foreigners into the secrets of lacquering.

An Absolute Cure For DYSPEPSIA

Dyspepsia, Indigestion, Belching of gas after eating, mean weakness.

By means of its muscles, the stomach should churn the food—changing solids into liquids—mixing in the gastric juice to start digestion.

If the stomach is weak—then food is not properly churned and mixed with enough gastric juice. Then you have indigestion and then dyspepsia.

Fruit-a-tives

Roosevelt on Tariff and Trusts.

New York, Aug. 21.—A letter written by President Roosevelt to Congressman Watson of Indiana was given out by the Republican congressional campaign committee yesterday. The letter is regarded as an important campaign document, outlining President Roosevelt's views on tariff revision and the trust question. In it he says: "We stand unequivocally for a protective tariff," and concludes that "the only way in which it is possible to deal with those trusts and monopolies and this great corporate wealth is by action along the line of the laws enacted by the present congress and its immediate predecessors."

Lightning Kills Sheep.

Milverton, Aug. 21.—A severe electrical storm passed over here Sunday damaging Mr. Pugh's house and killing a number of sheep.

—When a woman suffers from depressing weaknesses, she then keenly realizes how helpless—how thoroughly worthless she is. Dr. Shoop has brought relief to thousands of such women. He reaches diseases peculiar to women in two, direct, specific ways—a local treatment known by druggists everywhere as Dr. Shoop's Night Cure, and a constitutional or internal prescription called Dr. Shoop's Restorative. Dr. Shoop's Night Cure is applied locally, and at night. It works while you sleep. It reduces inflammation, it stops discharges, it heals, it soothes, it comforts, it cures.

Dr. Shoop's Restorative (tablet or liquid form) is a constitutional nerve tissue tonic. It brings renewed strength, lasting ambition and vigor to weak, lifeless women.

These two remedies, singly, or used together, have an irrefragable, positive helpful power. Try them a month and see.

MR. WHITNEY'S REASONS.

For Supporting the Work of the Salvation Army.

London, Aug. 21.—(C. A. P.)—Hon. J. P. Whitney, Premier of Ontario, speaking at Bath, gave two reasons why he supported the Salvation Army, both in his individual and representative position. First, he believed in the good influences of the Army; second, because in its emigration work, instead of dumping them down in docks the Army saw them straight into situations. The Army had a smaller percentage of failures than any other organization engaged in the work. This being the truth, it was right the truth should be told.

Mr. Whitney referred to the importance of the work as it affected Canada, which he described as the great auxiliary nation of the British Empire.

Dr. Pyne accompanied Premier Whitney on his visit to Crew and Bath.

DEAFNESS CANNOT BE CURED.

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rambling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

TABLE DECORATIONS.

The Rose Favorite Flower Scheme For July Dinners.

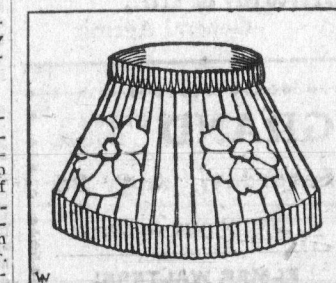

The rose provides at this time of year the favorite table decoration, and year by year some new variety or some improvement on one of the already existing varieties makes its appearance and for a time is sure of a welcome.

The design seen in the illustration of rose decoration shows the queen of flowers to admirable perfection. Surrounding the candelabrum in the center of the table, four graceful arches formed of green wire frames are deftly arranged, intertwined with fine smilax strands, two of the foliage arches being somewhat smaller than their fellows. From each of the corners spring beautiful roses without any other foliage than their own fine leaves, among which are introduced some of those sweet rosy tinted young shoots of foliage. Arches of exactly similar nature, but of slightly smaller dimensions in proportion, are placed around the single candlesticks on each side of the central decoration, while very full trails of smilax appear through the arches and surrounding the base of the lights, being arranged in conventional artistic scrolls upon the tablecloth.

liage than their own fine leaves, among which are introduced some of those sweet rosy tinted young shoots of foliage. Arches of exactly similar nature, but of slightly smaller dimensions in proportion, are placed around the single candlesticks on each side of the central decoration, while very full trails of smilax appear through the arches and surrounding the base of the lights, being arranged in conventional artistic scrolls upon the tablecloth. The dainty finger bowls, each shaped like a full blown rose of the most delicate pink shade, contain floating in the water a tiny rosebud and a few petals of roses similar to those on the table. One of the charms of this particular decoration lies in the fact of its being entirely innocent of wiring. Not a wire is used to keep the roses in position, and all who have experienced the tedious but hitherto necessary preliminaries of wiring roses will appreciate this point. Another charm in connection with this scheme is that every flower is in water. The secret, a very simple one, is that a new and ingenious little receptacle is used at the base of the foliage arches, which, only about an inch in depth, is so contrived that it not only keeps the stalks of the flowers firmly in their place, holding the blossoms well up, but at

HAND PAINTED SILK CANDLE SHADE.

the same time allows the flowers the untold advantage of being in water the whole time.

The character of this rose scheme is maintained throughout in the dainty accessories, candle shades, menu and guest cards and dessert doilies, all representing in one form and another the same flower.

Dishwashing a Pleasure.

Do not get discouraged about having to wash dishes 365 days in the year. Dishes must be washed, and of all the many duties that fall to woman's lot this seems to be the most disliked. But there is an ideal way.

The chief things required to make it a pleasure are care, order, plenty of good hot water and a stack of dry tea towels, two dishcloths and a large enameled bowl. The dishes, when removed from the table, must have each of its kind put together. Put all the cooking utensils on the range and fill them with water until the time comes to clean them.

Have a receptacle in which to place all the scraps that come from the dishes, plates, etc. The most important thing is to have plenty of hot water—not merely warm, but hot—and use some of the water in the water to make your suds. It cleans the greasy metal dishes and plates twice as quickly. Have your mops with handles for deep mouthed jugs and have nice dishcloths made of cheesecloth.

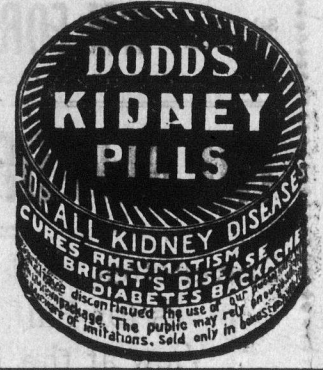

Begin with the glassware and next china and follow with spoons, forks, knives, etc. Never use a wet towel.

A Year Long Present.

Three girls have hit on a novel remembrance for a mutual friend who was miles away from her "ain coun-tree."

They made twelve envelopes varying in size and labeled each with the name of the month. They then each wrote an appropriate little choosing small gift to the loved one. The envelopes were ready the first of June one, redolent of roses to array sweet. And a velvet were ready the "Not to be opened until of" (whatever the month) then they were all put in a gift envelope, which represented the month on which the gift was first.

These girls had no end of fun in arranging the big parcel, they enjoyed the monthly letter a told them the surprise and please each new gift occasioned.

CROSSING SAHARA.

The Costliness of Caravans and the Mortality of Camels.

The merchants who fit out a garga (caravan) must stand all losses; consequently great care is given to the selection of both the camels which carry the valuable merchandise and the men who accompany them. The tall and swift riding camel known as the mehari is seldom met with in northern Tripoli. The finest male draft camels, the Jamal, costing from \$50 to \$80 apiece, with a carrying capacity of about three hundredweight, are used for transport. From consumption or the effects of the long strain scores often die by the way and many others at the end of the "voyage." The wages of the men for conducting a return cargo are sometimes as high as \$5,000. Not only must the garga sheiks have great courage and endurance, but must be trustworthy traders and shrewd diplomats of no small caliber. Many of the sultans and chiefs, particularly the Touaregs, through whose territories lie the garga routes, exact not only homage, but tribute from the garga sheiks. To bring this tribute within a reasonable sum and secure a safe conduct requires extraordinary skill and tact. The opportunities for dishonesty afforded the garga men are many, and occasionally men and goods are never heard from again.—Charles Wellington Furlong in Harper's Magazine.

It is just as well to think your own ideas can occasionally be improved upon.

3000 PERISH IN EARTHQUAKE

Latest Estimate Of Number Of Valparaiso Victims

60,000 ARE HOMELESS

Valparaiso, Aug. 22.—The loss of life by the earthquake of Thursday, Aug. 16, probably will not be short of 3,000, while the property destroyed is estimated at \$1,000,000,000, and possibly is far in excess of that sum.

60,000 Homeless.
London, Aug. 22.—A cable despatch from Chile yesterday afternoon says that a conservative estimate places the number of homeless people at 60,000 and adds that the distress is increasing.

The bankers here of Huth & Co., an important house of Valparaiso, have received the following cable despatch from that port:

"The town, from Victoria square east to Brazil avenue, is completely destroyed. The commercial portion suffered less. It is premature to estimate the damage done. A rough estimate places the number of killed at 3,000. In our opinion the damage done by the earthquake here exceeds the damage done by the fire. Santiago, apparently, suffered much less."

More Earth Shocks.
Lima, Peru, Aug. 22.—There was another heavy earthquake shock at Valparaiso Monday night.

According to the latest reports received here from the scene of the earthquake, the Town of Quilotoa (situated about 26 miles from Valparaiso, and having a population of some ten thousand), has been completely destroyed.

At Lima yesterday morning there was a slight shock and Huachu was shaken by an earthquake Monday.

Another Estimate of Killed.

Buenos Ayres, Aug. 22.—The Nation yesterday published a sensational despatch from La Paz, Bolivia, announcing that 2,000 persons lost their lives as a result of the earthquake shocks and fires at Valparaiso, that 170 deaths from the same causes occurred at Lima, 40 at Quilotoa, 35 at Conchali, 11 at Peracca, 9 at La Piedad, and 6 at La Calera.

At Colima, Batucio, Polipolip and Tili, the railroad stations, stores and dwellings have all been destroyed.

Large parties of convicts, who escaped from the prisons in Chile, have been committing robberies and other crimes at Valparaiso, Asistencia and Vina del Mar, but the majority of them have been captured and summarily dealt with. Upwards of fifty have been publicly shot.

It is reported that the Chilean Government will introduce a bill in Congress, providing for the emission of \$80,000,000 in paper notes.

Modern Houses Are Unsafe.
Santiago, Chile, Aug. 22.—Only now can the seriousness of the catastrophe begin to be appreciated. The greater part of the modern houses here are unsafe for habitation, and the authorities have organized a special corps to pull down the tottering buildings. It is not safe to walk in most of the streets owing to the falling debris.

Santiago resembles a city of the dead. The public squares and the principal avenues are crowded with people sleeping in the open. All kinds of carriages and carts have been requisitioned to sleep in, or even under them.

The state of affairs existing at Valparaiso furnishes a serious outlook for Santiago, since many of the homeless people at the former place will undoubtedly make their way here, and there is not sufficient accommodation or food in this city for the destitute people of Santiago.

Some Fighting in Cuba.
But indications are that Revolution has Reached Maximum.
Havana, Aug. 22.—The indications last night were that the revolution in western Cuba already has practically reached its maximum.

On the other hand one thousand insurgents are tending to concentrate in the Province of Pinar del Rio upon towns inadequate guarded.

There was some fighting yesterday in Havana province.

A detachment of rural guards and countered a portion of Bander's band, with which shots were exchanged.

One insurgent was killed and the others scattered. Fifty rural guards are in pursuit of the main band.

It is reported that Guinea, 20 miles south of Havana, last night was peacefully occupied by a band of insurgents.

Plaining Mill Burned.
Creemore, Aug. 22.—The planing mill and residence of Mustard Bros. at Websterville, were burned to the ground at noon yesterday, together with a large quantity of lumber. The loss is estimated at \$12,000, with insurance of \$6,000.

Clerk Skips, Is Arrested.
St. Thomas, Aug. 22.—Bert Biddle, clerk for Henry Roe, city agent Southwestern Traction Co. was arrested in Windsor Monday night and charged with stealing \$40 receipts for tickets sold on Monday. He has a wife in Hespeler.

Drowns in Sight of Wife.
Quebec, Aug. 22.—Oscar Larochelle, son of E. Larochelle, pilot, of St. Michel, Bellechasse, fell from the steamer Champion yesterday and was drowned before the eyes of his wife and young children.

Ice-Breaker Launched.
Barrow-in-Furness, Eng., Aug. 22.—The ice-breaker, Lady Grey, built for the Canadian Government, and intended for use in the Gulf of St. Lawrence in winter time, was launched here yesterday.

Body Found in Ravine.
St. Thomas, Aug. 22.—The body of a man minus head and one arm was found in a ravine on the farm of Nelson Parker, near Port Stanley.

WORK OF FIRE FIEND

Town Of Haileyburg Swept By Disastrous Fire Yesterday

LOSS IS A HEAVY ONE

Haileyburg, Aug. 22.—The business portion of the Town of Haileyburg was practically wiped out by a fire of incendiary origin at an early hour yesterday morning. The fire started in the McCabe Building in the centre of the business district. The loss is estimated at \$150,000. Over twenty business places and ten residences were gutted. The main business places burned were:

McCabe & Stimson's block, occupied by Paul Cobbold as a general store, Budd & Ramshaw, E. & S. Atkinson, Hudson Bay Co.'s store, Maple Leaf Hotel, Mining Recorder's office, Bank of Ottawa, The Haileyburgian, Union Bank, Matabanick Hotel, J. H. Bell & Co.'s hardware store, S. Pierce, dry goods.

No Lives Were Lost.
No lives were lost. Two persons were rescued with difficulty from the third storey of the Maple Leaf Hotel.

Sam Singlehurst, mining expert, was found in his room in The Haileyburgian building two hours after the fire began, and if the original intention of blowing up the building had been carried out, undoubtedly he would have been killed.

There is no doubt of the origin of the conflagration. Dr. Jackson extinguished a fire in a box of shavings under the McCabe Building at 11 o'clock last night, but it is evident the incendiary returned later and restarted the fire. The flames spread rapidly to the premises of Budd & Ramshaw, and E. & S. Atkinson, and from there crossed the street to the Hudson Bay Co.'s store.

Fire Engine Useless.
The fire-fighting appliances of the town were practically useless. The gasoline engine would not work, and aid was called from New Liskeard.

A steamer and company arriving from that town at 7.15. With the assistance of the Liskeard brigade, the fire was stopped at Broadway.

It is a sad blow to the town, but a determination expressed on all sides to rebuild on a more substantial basis. The town's growth may be retarded, but it will not be stopped.

Losses and Insurance.
The chief sufferers are: E. and S. Atkinson, general merchants, loss \$30,000, insurance not known; the Maple Leaf Hotel, \$15,000, \$6,000 insurance; H. Bell & Co., loss \$6,000, insurance not known; Matabanick, \$16,000; S. Pierce, dry goods, loss \$10,000, insurance \$6,000; Norfolk & Co., hardware, loss \$7,500, insurance \$5,000; Hudson Bay Co., \$12,000.

The chief companies affected are: Anglo-American, \$14,200; Standard, \$85,000; Montreal, Canada, \$7,200; Ottawa, \$7,000; Northern, \$6,500; Metropolitan, \$5,300; Commercial Union, \$3,800; Manitoba, \$10,000, and others.
