Mr. Powell stated that before any-

thing could be done in the matter, it would be necessary to get the parmission of the Ontario Railway and Municipal Board to use the Papa avenue rails for this purpose. The board might decide that the Pape avenue line was the more important of the two. While he could not say just when the board would meet, the department would do its best to have the session arranged for the earliest possible moment.

Missionary Auxiliary of the Eglinton Methodist Church, was held in the church parlors yesterday. The society has had a very successful year as the reports in-

Not only was the report of the auxiliary progressive, but that of its branches, the The annual election of officers was held, the following being elected for the James: first vice-president, Mrs. Magee; second vice-president, Mrs. G. H. Bowsecond vice-president, Mrs. G. H. Bowman, secretary; Mrs. Robert Shaw; corresponding secretary, Mrs. J. W. Browntoe; treasurer, Mrs. E. Westman; assistant-treasurer, Mrs. Bridgeland; superintendent of circles, Mrs. G. A. Macfarlane; superintendent of bands, Mrs. J. H. S. Kerr; superintendent of little light bearers, Mrs. E. Heywood; systematic giving, Mrs. John Sirrs.

The society has 69 annual and 26 life members, besides a large mission band, mission circles, and cradle roll.

The total funds contributed by the society during the year were \$1066, made up as follows: W.M.C., \$652; mission circle, \$314; mission band, \$90.

Many expressions of regret were heard on all sides at the retirement from office of the late treasurer, Mrs. Bridgeland, who has so capably filled the position of treasurer for 14 years. That the annual returns have increased from \$55, ten years ago, to \$1,056, under her tenure of office, is largely due to her indefatigable efforts to further the cause of missions in the church.

# EXEMPTION REFUSED

Only Twenty Out of Seventy-Six Have Their Applications Granted:

Toronto exemption tribunals dealt with the cases of 76 men yesterday, granting exemptions to 20 of them and refusing the other 56 applications. Thomas Cowling gave four reasons for his exemption: Being a dental surgeon, college professor, examiner Toronto University and contributing editor of Oral Health. The Royal College of Dental Surgeons also wrote to the tribunal stating that he was professor of metallurgy and associate professor of chemistry, that he was arsolutely necessary, and could not be replaced. In spite of this the court refused to grant him exemption from military 'service, exemption from military 'service. James A. Macdonald, chief dispensing

### Dizzy Spells, Indigestion

Napanee Man Could Scarcely Walk at Times, He Was So Dizzy - Indigestion and Kidney Trouble Overcome By This Treatment.

Napance, Ont., May 8 .- The experience of Mr. Nolan of this town will interest all who suffer from indigestion and accompanying derangements of the liver, kidneys and howels.

ble that many suffer for years without knowing how readily they could obtain relief by using Dr. Chase's Kidney-Liver Pills to arouse the action of the liver, kidneys and bowels. and thereby remove the cause of much discomfort and suffering. Mr. John P. Nolan, Dundas street

west, Napanee, Ont., writes: some time I was troubled with weak kidneys, and used to have a scalding, burning sensation in my stomach. This was accompanied by dizziness, and occasionally it would be so severe that I would stagger while walking. I commenced using Dr. Chase's Kidney-Liver Pills, and in a very short time my kidneys were in normal condition. Then I tried Dr. spells, and am glad to say that under this treatment they gradually disappeared. At present I am enjoying good health, and am pleased to regrievances of the street cleaners a few commend Dr. Chase's Kidney-Liver months ago.

TODAY is the last day of the canvass being made to raise \$500,000 in Toronto for the Red Triangle Fund. While many have given, and given generously and promptly, many more can give and should give. The per capita assessment for Toronto is an even dollar. One dollar counts big: it provides the ministry of the Y. M. C. A. for 50 men for a single day.

> If you saw 50 men sitting in a "Y" hut writing letters home, and reflected that these fifty men were there and writing letters because of your gift of \$1, you would gladly give a dollar.

If you saw 50 wounded men returning from the battlefield in charge of Y.M.C.A. men, and aided by them, you would be glad to give the dollar that makes this service possible.

If you saw 50 men engaged in games to recreate themselves for the fighting that lies ahead, or to restore themselves after a long period of strain, then you would gladly give the dollar to pay for this

But do not stop at a dollar if you can give \$5, or \$10, or more. Every dollar does big work. This is the main thing. If no one calls on you today, or it suits you better, give in your money to head-quarters—14 King St. East—the headquarters of

### LEND VACANT LOTS TO PRODUCE FOOD

If you own a vacant lot any where in Toronto and you are not going to grow vegetables on it yourself, loan it to the organization of resources committee, who will put it under cultivation immediate-ly if suitable. Of course, if you wish to sell the lot or build on it before they take off the crop in the fall they take the risk of losing the crop. So, then, if you have a lot write and tell them where it is and what size it is, and give them permission to use it. Address, Organization of Resources Committee, 15 King street east, Toronto.

As each recipient was given the award, his excellency spoke a few words of sympathy and encouragement, and in concluding the ceremony said: "As the representative of the King, at is a great honor to present these medals for war service. I would ask you who have lost loved ones to accept my most sincere sympathy. They have given their lives for the noblest and most sacred cause, and remembrance of that will always be a comfort to you in your sorrow. Their names are written on the roll of imperishable fame that will be handed down to future generations as a most priceless national asset.

"I would like to say how proud and grateful we are for the service you have rendered, and I hope you will live long to look back upon the part you have played in the greatest struggle the world has ever known."

IMPRESSIVE FUNERAL CONDUCTED BY MILITARY

J. C. Forman, assessment commissioner for Toronto, stated yesterday afternoon that there was no grand for complaints over assessments upon vacant land in Ward Seven. "The fact of the matter is," he said, "that there was need of equalization as grands these properties, and we have done just that. When the complaints come before the court of revision we shall be able to demonstrate that the former assessments were insufficient. A military funeral of much pressiveness was that of the late Chas. D. Wilson, a Toronto veteran of the Crimea and Indian Mutiny, which took place yesterday afternoon to Mount Pleasant Cemetery, attend-ed with full military honors. In token of appreciation of the notable military service rendered to his country by the late Chas. D. Wilson, the funeral service was held under joint auspices of the Toronto military aucertain property should be assessed at far below the figures prevailing in regard to surrounding properties, even the it may be vacant. Land is assessed according to the general values assessed according to the general values in the district. So far as thorities and the Army and Navy Veterans' Association, of which he was a charter member. The funeral house assessments are concerned, one may safely say that these are based upon the nature of the dwellings or may safely say that these are based upon the nature of the dwellings or business houses. It stands to reason that an Eaton emporium at Dalforth and Greenwood would prove to be of little business value and might be an eyesore to the community. In

Marching in the funeral procession were 25 members of the army and navy veterans, headed by Major W. navy veterans, headed by Major W. H. Cooper and Lieut.-Col. Appropriate music was furnished by the brass band from Exhibition Camp. The services at the house and the graveservices at the house and the grave-side were conducted by Rev. Canon H. C. Dixon and Rev. Capt. Gilmour. There was a firing party of 19 men from the camp, and a rugler who

from the camp, and a rugler who sounded the "Last Post."

The service rendered by the late Mr. Wilson included participation in the engagements at Alma, Sebastopol and Balaclava as a member of the 42nd Black Watch, and also in the most notable battles of the Indian Mutiny campaign. He was 17 years of age when he joined the Black Watch. He died in his 81st year.

### lu the Temple of Janus.

All that has happened since the fourth of August, 1914, should not make us forget the way we lived, what we thought, how we regarded life, our outlook on the world, our aims and ambitions, our conceptions of the world and its civilization. If we forget these things we shall lose much of the value of the lessons we have been receiving for four years past. One of the things, perhaps chiefest of all, that we should remember was our un-Emited incredulity. It was sufficient for a man to suggest the possibility of a great European war to have people express doubts of his sanity, to refer to him as a crank or a faddist, and generally to have him regarded as unfit for society, which is indeed still largely considered to be the severest sentence of all.

People are now almost in the same crystalized condition of opinion, tho of wholly different opinions, as they were four years ago. There is little mobility of thought. little vivacity of observation, little response to new or unwelcome views, little disposition towards the adaptability and versatility which in this crisis of the world's affairs is more necessary than anything else. It took a cataclysm to change our minds in 1914. We jeered at the thought of preparing for war. War came like a thunder clap, and for months no one would believe in Kitchener's dictum about a three years' war. Anyone who rejected the theory that the war would be over at Christmas was cold-shouldered as unworthy of his race and nation. We have recast our views, reoriented our relation to human affairs, and now we are settling down to the same immobility of mind towards peace that we formerly had towards war.

I was busily thinking, while he worked. I remembered that peculiar flash that I had seen before, on my husband's face, when I had been able to hold my own with his women friends. Was it really true that even occasionally he was proud of me? Already, I had forgotten that I was ordered like a child—that I had been hurt and angry because of it. The tilt with Julia Collins in which I had NOT come off second best had raised my spirits, and with the resiliency of youth I made a silent vow to make him proud of me, in every way, before I finished.

Brockville, May 8.—Thomas A. Kidd, ex-warden of Leeds and Grenville, representative in the United Council for many years, and widely known thruout eastern Ontario, died today at his home in Burritt's Rapids. He was born in Mariborough Township in 1845, and for half a century conducted a general mercantile business at Burritt's Rapids in Grenville County. He was an ex-grand master of the Orange Lodge of Ontario East. He was on active service with the Canadian militia during the threatened Fenian invasion and in the Northwest Rebellion of 1885. Surviving are three sons and four daughters. One son is Major (Rev.) W. E. Kidd, who went overseas as chaplain of the 21st Battalion, and who has won the Military Cross. Another is Major T. A. Kidd, D.A. A.G., Kingston, who was wounded at the first engagement in which the Canadians participated in the spring of 1915. The late Edward Kidd, who, for many years represented the riding of Carleton in the Dominion Parliament, was a brother.

## MANY BOYS PLEDGE TO EARN AND GIVE DUFRENCE—On May 7, 1918, Phillip Dufrence, age 71 years.

Four Hundred Lads Are Entertained at Y.M.C.A. by Kiwanis Club.

Enthusiasm knew no bounds at Central Y. M. C. A. last night when the Kiwanis Club entertaned 400 boys at a supper, the object of which was to get an opportunity to interest the boys in the great "earn and give" the boys in the great "earn and give campaign. It is expected that there will be 6000 boys thruout Canada who will sign a pledge that they will earn and give \$10 each by October, 1918, eight of which will go to the Y. M. C. A. for its work among the soldiers at the front, \$1 to go for work among the children in India, and \$1 among the children in India, and \$1 for work among the boys of Canada. The supper was interspersed with

Their singing and whistling of the popular songs was enthusiastic.
Taylor Statten, who made the address of the evening, said it was not the getting of the \$10 that was the main object of the movement, but the creating of the spirit of service in the minds of the boys, and that it would bear full fruit in 15 years' time. He gave many illustrations from personal experiences among young men and boys who had shown this great spirit of service. He also likened lift to a great relay race, many of which had been lost in third relay, which he represented to be the age in a boy's life as from 14 years to 21 years, and so much depended on a good start. He drew a graphic picture of the boys who would make

the big men of the future. John G. Kent, chairman of "earn and give" campaign, said that there would be a parade before the grand stand at the Exhibition of boys of Toronto who joined the campaign, and said they had challenged Winnipeg, and Toronto must get at least 2500 boys to win.

The boys will pay \$1 at a time, for which they will receive a coupon. Ten coupons will entitle them to a bond signed by the governor-general, and a badge which will give them free admission to the Exhibition.
H. G. Hammond, secretary of the

oy Scout movement for the province, addressed the boys, telling them of things he had seen at the front, and greatly impressed the boys with the spirit of sacrifice going on there, and brought matters to a climax by asking all who intended to sign the

stage in Canada at the Royal Alexandra Theatre next Monday evening, with Edward H. Robins and his Players. This comedy is from the pen of a Cleveland newspaper man, Robert Housum, who has several successes to his credit, and when presented by Arthur Hopkins at the Plymouth Theatre was considered so good by the New York press and public that it was kept at this one theatre during its entire run. The story of "The Gipsy Trail" centres around a young man who has been most everything under the sun. He has built a bridge in the Andes, been an airman in France, and has also been a waiter in a cheap restaurant; when he is introduced to the audience he is a reporter after a story. Comedy and romance only belong to "The Gipsy Trail"—laughter, and more laughter. The reserve seats for next week are on sale today.

The David Belasco-Charles Frohman success, "The Heart of Wetona," is coming to the Grand next week. No play of recent years has excited such widespread discussion as "The Heart of Wetona." Men of eminence in the professions endorse it. Everybody goes to see it. There is not a discordant note in it. Every character moves and breathes and lives—lives a natural life. It is a play for the people who like their heartstrings played upon and who still cling to the old beliefs about rugged honesty and love for men and women.

Following an investigation into the fire which destroyed the stables of this Pecriess Milling Company, in the rear of 646 Dufferin street on Monday night, doing damage to the extent of \$10,000 and burning two horses to death. Romeo Farmer, a youth of 14, was arrested last night by Detectives. Nichols and Bain of Cowan avenue station on a charge of arson. The lad is alleged to have thrown a lighted match in the hay and then, the police say, was unable to put it out.

At the time of the fire the flames spread with great rapidity and rapidly consumed 25 tons of hay and a large quantity of flour, which were stored in the warehouse. The two horses which were burned were valued at \$250.

Play of Bugs Hersche Third Notable Feature of Long Game.

three hours and forty-two minutes, the Binghamton and Toronto baseball teams played seventeen innings before Binghamton forged ahead one score in the lead and won the game. After two men ning, Oakes, local left fielder, singled sharply to left field with Barnes on second base, and Barnes scored the winning run at exactly 7.36 o'clock,

Justin and Barnes were engaged in a battle royal for pitching honors, with the advantage equal after the seventh inning, and the men went out in one two, three order from that time on until the final inning. Barnes had the better of the argument in the number of hits annexed during the time he pitched, but he entered the game in the seventh inning and was fresher than his rival Justin allowed ten hits in

seventeen innings and Barnes allowed

Bugs Hersche was one of the stars of the game. He played third base in the absence of the regular man, who is on the way, and held the position down to good advantage.

A big celebration preceded the game, in which all of the prominent civic organizations of the city participated. A gigantic parade, with thousands of cars in line, marched to the grounds, with the uniformed baseball players riding in cars at the head.

In the eighth inning Gingras was relieved by Barnes, and the new pitcher was somewhat wild at first. He walked Wagner and Warhop hit safely and then Hersche walked, filling the bases. The next two men filed out to the shortstop and Justin ended the inning by flying out to Riley. This was the only tight fix that the Bingo pitcher got in, and after that he had things all his own way.

The first inning saw all of the scoring that Toronto did. Lied, the first man up, singled. Thrasher sacrificed and Onslow hit a long three-bagger down the right field foul line, scoring Lied. Wagner then hit a long sacrifice fly, scoring Onslow. This ended the Toronto rally and saved the Binghamton team,

Barnes was liberal with his gifts and gave away five passes to the initial sack.

Binghamton score and also a Toronto score on as many occasions.

This evening the players were guests of the Armory Theatre at a box party to see the photoplay, "Over the Top." A prominent Binghamton merchant offered to give a \$50 Liberty Bond to any player of either team making a home run, but his offer was safe.

In the annals of baseball this is the longest game on the opening date that has ever been recorded and the 6000 that attended the game nearly all stayed until the last of the seventeenth.

BASEBALL IN KITCHENER.

Kitchener, May 8.—The Kitchener Baseball Club will not affiliate with the O.A.B.A. this season. The executive came to this decision tomight after fully considering the local situation, which is anything but bright for good ball. The Military Service Act has depleted the material to such an extent that a good team could not be fielded from the four local teams. Shirk, Coleman and Trüesch, the star pitchers, as well as several of the best batters, have been drafted, so the executive feel they are better out off the O.A.B.A. for this season at least. The depleted ranks of the four local teams will be filled with juniors and City League games will be played. The consensation of the four local teams on May 18.

Kingston, May 8.-There is a man here several days ago for violating his parole. His case was investigated and he was given a chance to go to work at the locomotive works, at the same time to be under the eye of the local police. He worked but one day, yesterday, and then suddenly his mind became deranged, and, running to the police station, he declared that he was responsible for the war and that a band of men were surrounding.

Therefore should not be tried for murder.

Dr. McCullough, provincial officer of health, and the jail surgeons at Toronto and at Parry Sound testified to his sanity. The jury agreed with these views, and Jung Sam will be tried today. Two charges of attempted murder, are also to be tried, and two civil actions heard.

### LONDON WORKERS MAKE NEW RIVETING RECORD

London, May 8.—The record made recently by Charles Schock, who at Baitlmore drove in 2720 rivets in nine hours, has been beaten in London. The workmen of Frazer & Frazer, engineers and boilermakers, asked the management to give them an opportunity of beating Schock's record, and the effort was made yesterday by a selected squad of riveters under Robert Farrant, aged 31. He is one of a family of eighteen, and his father, aged 67, is a riveter in the same yard. The yard set out to do 2850 rivets in nine hours, so as to beat Sshock's figures, but Farrant passed that total is six hours. Going on, he hammered in 4267 rivets in nine hours, an average of slightly less than 475 an hour, or one rivet every 7½ seconds. This is claimed to be a world's record.

BIG BATTLE IN COMMONS

Ministers' Statements Came From

War Department-Believe

Themselves Cleared.

London, May 8.—As the result of the cabinet's decision to withdraw its offer to appoint two judges to enquire into the charges made by Major-General F. B. Maurice, former chief director of military operations at the war office, in which the veracity of ministers of the government was impugned, and the determination of the cabinet not to accept an enquiry by a select committee, as suggested in the motion made by former Premier Asquith, tomorrow's debate in the house of commons will probably range over all the old charges against the government in its relations with the army.

What will follow from the debate is still obscure. If Mr. Asquith presses his motion to a division the decision will depend largely upon the action of the older Conservatives, who, while anxious to give the government a knock, do not wish to bring about a general election during the war, and prefer the coalition government to the radical one which might result if the cabinet were defeated and forced to resign.

Nationalists Absent.

Th absence of the Irish Nationalists also will help the government, for, in addition to their dissatisfaction with the government's Irish policy, there are among them several severe critics of the war cabinet's relations with the army.

The situation that has been brought

The situation that has been brought about is absorbing public interest thruout the country, and both the London and the provincial newspapers are commenting upon it at great length.

are commenting upon it at great length.

The Liverpool Post supports Mr. Asquith's proposal for a select committee, saying that public opinion would strongly resent the establishment of the court suggested by Mr. Bonar Law. Advantage should be taken, it adds, of the opportunity to probe the whole mystery of the conduct of the fifth army in its relations to the "extension of the British line."

The Manchester Guardian says the government has no alternative but to clear itself completely in the eyes of the country. "for these statements went to the heart of the responsibility for our recent reverses."

### WILD FLOWERS

BY Rachael R. Todd, M.D.

TIARELLA. FOAM FLOWER, OR FALSE MITREWORT. Tiarella Cordifolia.

Where flower and leaf with trembling pearls are freighted; and all around a Paradise appeareth.

Surely the poet who wrote the words must have stood, some early dawn in springtime, with feet buried deep in ar-spreading beds of foam flowers, upon whose every leaf and misty blossom twinkled countless thousands of tiny dewdrops, and how like a Parafise indeed the lovely sight must have

To find even a single plant of the foam flower, is to find one of the most beautiful of all the wildflowers, for the blossom itself is a thing of transcendent loveliness; but to find some open woodland spot, thick carpeted with the feathery bloom, is a joy that delights the heart of every wild-Gower lover.

This dainty plant is not as wellknown as it should be, probably because it is so tiny, and because its true loveliness is not at once apparent. But a few moments' study of both leaves and blossoms will well re-

From quite early in March, if spring winds are warm, thru all of showery April, and well into May, where the tiarella thrives, usually along the fairly open borders of the woods, and tunning up the dry warm hillsides, the ground will be carpeted thickly with hundreds of the pretty heartshaped leaves, not unlike a maple leaf, both in size and shape and color. Rather sharply toothed, and deeply lobed (maple-like) the upper surface of the bright green leaf is thinly covered with thin rough hairs, while the under surface is soft with fine down. These leaves come up on a rather thin stiff leaf-stem from the root-stock and usually form a thick cluster for each plant.

The blossoms are many, borne on a long terminal spike, of wonderful grace, rising anywhere from six to ten inches in height. Each starry snow-white flower is made up of five little oblong petals, clawed, and grows to the central spike on a thread-like stem of exceeding fraility. The one note of color in the whole lovely foamy featherly spike is the golden orange that tips the ten stamens of each single blossom.

The whole plant is fragrant with that elusive perfume peculiar to the woodlands, and the blossoms are visited by countless bees who thus pollinate the plants.

The seedpods of the plants are peculiar, and so characteristic that it is easy to recognize the plant quite late in the season. The pod is notched, or cleft like a turban or tiarella, and thence the name.

Tiarella cordifolis belongs to the pay one.

thence the name.

Tiarella cordifolia belongs to the saxifrage family, and is very similar to the mitrewort, a close cousin for which it is often mistaken, and of I have spoken in another talk. he frequent name, false mitre-

As a rule, Tiarella grows in colonies, because the rootstocks are horizontal and easily running along the loose soil. The plant is very hardy and quite common here in Ontario, many fine specimens being found almost anywhere in woodsy places. High Park abounds in quite large colonies; the Humber valley slopes are carpeted in many spots. And, indeed, a keen eye that knows the plant may often spy good specimens along country roadsides, especially if the region is not swampy.

an exorbitant price, and seeking also to impose very onerous terms.

The reputation of the district rests almost entirely on Mr. Loring's report, based on an examination during the Christmas holidays when work was not only handicapped but rendered more or less uncertain by three feet of snow. Prior to this the region had not aroused a great deal of interest, nor had somewhat similar formations in the townships of Bristol and Denton respectively, from six to twelve miles southwest of the Town of Timmins. In these townships granite porphyries almost identical with those at Matachewan are also reticulated with veinlets of quartz carrying gold, and in all these cases the precious metal seems to have come in with the quartz, so that the question appears to be the

Keewatin Blanket

The Adanac development drift is at the 310-foot level, and is in the keewatin formation. The keewatin nes tike a blanket over the underlying diabase. The latter is seldom found to be lying flat, but is generally rolling. At the north end of the Adanac property the diabase comes close to surface, while a few nundred feet south on the Adanac property it attains a depth of about 470 feet as nual reports of various companies—determined by diamond driling. The reason for this is that the disgreat stretch of the imagination to turbance which at one time took place, causing the shearing of formations which permitted of the silver / being carried in and deposited in the veins, was to the north.

At the Adanac north boundary the diabase dips sharply southward into pears to have been forced from the The shearing already countered as the development drift is approaching the southward slope of the diabase is very pronounced. A11 these factors combine to make the situation at the Adanac decidedly favorable for the deposition of silver in large quantities.

Operations in April.

During April approximately 100 feet of work was done in the north development druft. The same force is employed this month and a similar fcotage is expected, during the course of which the works will have attained a point above the diabase slope and will probably have encountered the downward continuation of the thirty States would fix a price which "would inch vein in evidence on surface

The reasons are three: First, a comprehensive study of the geological structure in evidence on the property has been made by one of the leading geologists of the country, and the report is favorable. Second, the main development drift now over one-eighth of a mile long is just entering the zone where silver deposits in commercial quantities are most likely to occur. Third, a large calcite veln, some 30 inches in width on the surface and carrying a considerable quantity of cobalt, is plainly evident on the surface, and running at such an angle that it should be encountered this month.

### SIMPLER MINING LAW REQUIRED IN ONTARIO

Prospectors Should Be Under Less Trouble and Expense in Order That Mining Industry May Be Fostered, Not Hindered.

Prior to the discovery of Cobalt the mining law of Ontario was a very simple affair. The province had not been divided into mining divisions, and we had no inspectors, recorders or commissioners. Grants of mining lands were made by and thru the crown lands department. After the discovery of valuable mineral in place the discoverer made application to the department, setting forth the fact of discovery, the kind of mineral and the place where it was located. A sketch or plan of the locality was generally sent with the application for title, together with a payment on account.

The department then usually preserved the prospector's rights until a survey could be made and filled and the patent secured. There was no preliminary staking or license, tho the discoverer usually blazed trees in the vicinity of his find and in other respects identified himself with the locality.

Present Law Cumbersome.

This law was defective in not imposing any working conditions, but in other respects it was a great improvement on the present cumbersome method of securing title. Experience has shown that it has not accomplished the objects in view. It has rather tended to diminish the interest in mining; in short, it seems to

## SKEAD TOWNSHIP ROAD IS VERY MUCH NEEDED

New Discovery of Gold on Crawford Claims Draws Attention to District.

Another discovery of gold has been made on the Crawford claims in the Township of Skead. On other properties in that district considerable work is planned for this summer provided better transportation is forth-

coming.

The road to Skead from Englehart is about 26 miles long and passes thru more or less rough country. At the present time about half a ton is all that can be hauled by a feam in one load. As high as \$15 is being charged passengers for riding from Englehart to the centre of activity in

Skead.

Interested mining men and prospectors have appealed to the government for ausistance, requesting that a road be built from the gravel pit at Boston Creek and the distance thus reduced from 26 to between 12 and 14 miles. Despite the fact that reports have been published to the effect that the road was indeed to be built, nothing definite appears to have been done.

# GOLDEN **OPPORTUNI**

Just as the sailor looks ahead to the time when he will have reached port with his valuable cargo. and the farmer to the harvest time, so does the miner bend his indefatigable efforts towards the time when his one-time virgin claims will yield their hidden treasure, and the property will become a producer. The producing stage is the goal of every miner, whose untiring labor results in the creation of new wealth to the country. And from the time that the prospector's pick uncovers traces of the precious metal, every move is a scientifically developed step towards this end.

Just as the sailor is buffeted about by storms and is met by contrary winds, just as the farmer suffers from adverse weather conditions, so the miner has his vicissitudes, some of which are lack of capital, scarcity of labor, and difficulty of getting supplies, not to mention the puzzling vagaries of nature in her deposition of what to the miner is "ore."

The Wasapika, the premier property of the West Shiningtree gold camp in Northern Ontario, has successfully graduated through the various stages of development common to all mining properties. From a raw, undeveloped prospect, it became a developed prospect, and through the patient, diligent labor of Manager Rogers and his staff, it has now reached the stage which may aptly be termed a "near producer."

In order to reach the goal—the producing stage -it is necessary to construct a mill on the property for the purpose of treating the ore which, during the months of development, has been uncovered. And in order to provide funds with which to go ahead with this undertaking, the directors of the company have found it incumbent upon them to make an issue of treasury stock, 150,000 shares in all, which is to be sold.

As has already been stated, the Wasapika is the foremost property in the promising West Shiningtree camp, from which samples of goldbearing quartz, equal in richness to any taken from other parts of the north country, have been forthcoming from time to time.

Three forty-acre claims, amounting in all to 120 acres, are owned by the Wasapika, and surface work has discovered the existence of what is locally known as the Ribble vein. This vein, of a peculiar folding character, has been traced for a distance of over two thousand feet across the Wasapika property, and thorough sampling by Manager Rogers has shown that average values over the full width of the ore body, which is forty feet wide, will run above \$10 to the ton. Even should this ore body persist only to the 100-foot level, an immense amount of ore has been located, but the management, by reason of its careful study of the geology of the district, is confident that the vein goes to great

In order to gather more exact information concerning this ore body, and also to develop ore for the mill, a shaft is being sunk which is almost down 100 feet. When this point has been reached, it is planned to drift both ways on the vein, from which operation an approximate idea of the size of the mine may be deduced.

To facilitate mining operations, a complete mining equipment is being installed, consisting of a compressor plant to run the drills, boilers, a hoist,

To sum up, Wasapika is a rapidly developing gold mine of no mean calibre. Under careful and efficient management, it has survived the trials and tribulations common to all prospective gold mines, and is blossoming into a producing mine.

As an investment, Wasapika stock holds out a promise which no fully developed mine stock can offer. Its market possibilities are almost unlimited. For the purpose of raising the wherewithal to erect the mill at the Wasapika, we are offering this block of stock for public subscription. The shares will be sold below the present market price, 38c to 40c per share, and they will be pooled till January 1st, 1919. In the intervening months, the mill should be built and put in operation, the property developed underground, and by the time the pool is dissolved, the market value of Wasapika shares should undoubtedly be double or treble what it is today.

SELDOM HAS SUCH AN OPPORTUNITY OFFERED FOR PROFITABLE INVEST-MENT IN A GROWING GOLD MINE. WE WILL BE GLAD TO FURNISH FULLEST DETAILS UPON ENQUIRY.

Numerous secondary or low-priced rails, including New Haven, grangers and ection carriers, participated in the general advance of transportations, and the so-called Harriman and Hill groups derived stimulus from crop prospects and better March earnings.

The old board was war-weary and more or less stale following a series of desultory encounters with the people of Toronto and their civic representatives. Fresh purpose and keen desire to accomplish something for both patrons and shareholders on the part of the new representatives, coupled with the new members previously added from fais province, will doubtless have a beneficial effect thruout the board. greatest strength was shown by the steel stocks, which was natural in view of the manner in which United States Steel had dominated trading in Wall Street during the week, but general firmness rather than sharp advances in any particular issues marked the list yesterday.

Steel of Canada and Dominion Iron are again running neck and neck, each touching 611-2 yesterday, and closing at 611-4. The former was much the more actively traded in, and exhibited a gain of 5-8, while the latter was 13-8 higher than the previous sale on Monday. Steamships had a small flury, selling up to 40, an advance of 1-4. Brazilian was 3-8 better at 34, and Cement 1-4 higher at 601-4. Canada Bread continued active at 18, the high level of the movement to date, and Maple Leaf remained firm at 98. The first sale of F. N. New Directors Will Give Fresh Purpose, Says Montreal

Nontreal, May 8.—Dealings in the steel leaders in the local stock market developed on much broader lines to day than for a good while back, the demand being responsible for a higher range of prices, likewise the best for several weeks.

Steel of Canada and Iron absorbed the bulk of attention. The balance of the shares traded in was well scattered thruout the list, the most active being Wabasso, Coston, Cement, Lyall, Spanish River and Ames preferred.

The activity in the steel group naturally aroused much interest in the street and gave rise to rumors that some bullish news might soon be expected concerning the situation in Steel of Canada, but there was nothing approaching the definite in that connection.

## RALLY AT CHICAGO IN CORN AND OATS

Government Report on Winter Wheat Not as Good as Had Been Hoped.

Chicago, May 8.—Correct anticipa-tions that the government crop re-port, while indicating one of the three

tions that the government crop report, while indicating one of the three largest wheat crops ever grown, would not prove altogether as bearish as had recently been looked for, had a good deal to do today with rallying the corn market from temporary sharp declines. Prices closed unsettled in the lower to it advance, with May 127½ and 146 to 146½ July. Oats gained it to 1c net, and provisions 17½ to 57½c.

Inasmuch as private estimates within the last week have placed the prospective winter wheat crop at 600,000,000 bushels to 650,000,000 bushels, the official figures indicating a total of about 573,000,000 bushels were not up to expectations, although the cidedly better than the average. Prospects of unseasonably low temperatures by Friday or Saturday tended also to handicap the corn bears. During the first part of the day, however, bulls were at a disadvantage owing to government figures showing that commercial stocks of corn were much larger than a year ago. The fact that the weather had continued auspicious for farm work and pastures counted, too, as a temporary bearish factor.

Oats responded to the same influences that governed corn.

Good-sized government orders and hogs at the topmost figures of the year strengthened provisions. Pacific and Southerns—

Galt, May S.—Despite the war, prospects are that Galt will enjoy a good building year, and already two local firms have had plans prepared for substantial additions. The Galt Brass Company is going into the manufacture of vitro tanks, and the plant of McCluff Bros., Toronto, is being transferred to local works. An addition to be built to accommodate this new department, will consist of a two-storey building 22 feet square for elevators; finishing room 100 by 52 feet; single storey and press room, 40 by 42 feet; single storey, all of brick construction. Montreal, May 8.—Early today the May option in oats broke to 78%c and July to 77%c, but later the market reacted and prices closed 1/2c to 5/2c per bushel higher than yesterday. On the break a good demaind developed here from local buyers for supplies en route and for shipment from Fort William, and a more active business was done than for some days past, sales being made of fully 50 cars. There was no change in prices on spot today, No. 2 C.W. at the close of the market being quoted at 96c; No. 3 C.W. and extra No. 1 feed at 82c; No. 1 feed at 89c; No. 2 feed at 86c and Ontario No. 3 white at 92c per bushel exstore.

There was no change in the local market for spring wheat flour today, business being quiet, with car lots of gowernment standard grade quoted at \$10.95 per barrel, in bass, Lo.b. cars, Montreal, and to city bakers at \$11.05. delivered. The demand for winter wheat flour was also limited and prices were unchanged with broken lots quoted at \$11.40 to \$11.50 per barrel, in new cotion bass, and at \$11.20 per barrel in second-hand jute bags, ex-store. A steady trade is reported in substitutes in a wholesale jobbing way. The market for rye flour is easier, with offerings to arrive at \$15.50 per barrel, in bags.

The feature of the market for millifeed is the easier feeling, and the prospect is that prices will be reduced in the near future, but there was no change announced today.

The trade in baled hay continues rather quiet, owing to the poor condition at present of the United States markets, and the fact that the government are not taking any more from dealers than their contracts call for, while the demand for domestic consumption is somewhat limited. There is no change in prices, but the feeling is easy, with car lots of No. 2 hay quoted at \$1.70 No. 3 at \$15.50 and clover mixed at \$1.70 No. 3 at \$15.50 and clover mixed at \$1.70 No. 3 at \$15.50 and clover mixed at \$1.70 No. 3 at \$15.50 and clover mixed at \$1.70 No. 3 at \$15.50 and clover mixed at \$1.70 No. 3 at \$15.50 and clover mixed at \$1.70 No.

The butter receipts were 625 packages, as compared with 652 last week. There was no actual change in the market today, the feeling being steady, owing to the fact that supplies coming forward are not excessive.

In sympathy with the higher prices for eggs, which have prevailed in certain sections of the country of late, a stronger feeling developed in the local market at the close today and prices for all grades were advanced 1c per dozen, in a wholesale jobbing way. Egg receipts were 1480 cases, against 1668 a week ago.

Of vital interest to home-makers and home-furnishers is the fact that many factories for furniture and mills for rugs have had to curtail their production. Others are engaged on war orders for the United States and Canadian Governments. Thus a new situation has arisen, and though our buyers are doing their best to meet it, everything points to higher prices. The stocks we have on hand are large and well assorted. So far we're lucky, and if you supply your home needs at present prices you'll be lucky. We invite and urge you to do so, and are ready to help further if necessary by our Home-Lovers' Club plan, which makes it easy for Home Owners to anticipate their requirements. Deferred payments. No interest or other expense. Consult Club Secretary, Fourth Floor.
