The Queen's Birthday.

To-day is the Queen's Birthday, and Her Majesty enters upon her 76th year. Long may she continue to reign—the best sovereign of the greatest empire of the world, and on her merits, as an individual, in her domestic as well as public life, a credit to her sex.

The Electoral Lists.

Our Ottawa correspondent says it is understood that the government will introduce a bill to simplify the franchise act, which will very greatly reduce the time required for the revision, and as a natural consequence materially lessen the cost of revision. The preliminary revision now required will, it is said, be dispensed with. The revising officer will make his lists from the provincial lists and then appoint a day for each division on which he will hear complaints for striking off names and receiving applications for placing names on the list.

The Tariff.

It is claimed that the manufacturers have the best of it in the tariff changes, and that under the revision made by Mr. Foster, and the changes therein which he has been persuaded to adopt, the duties have actually been increased so far as general imports to the Maritime provinces are concerned.

This will tell against the government in the next Dominion election.

Mr. Ellis is Still Working.

Mr. John V. Ellis, proprietor of the St. John Globe, reported at Ottawa where he proposes to have himself advertised as one of the candidates for St. John in the next Dominion election. The papers in accord with the Globe's views on the subject say, very innocently, that he is at the political capital to await the discussion in the commons upon a resolution condemning the action of the New Brunswick Supreme Court in sending him to prison for contempt, which resolution Mr. Davies introduced.

IT'S A WAY THEY HAVE.—Lessened work appears to require an increased official force, according to Ottawa views, for Judge Wells is to be appointed revising barrister for Westmorland County, and Mr. Robert Hatchison, of Richibucto for Kent County. Formerly one revising barrister was appointed for the two counties.

We are Progressing.

The following is from the Miramichi Gleaner of Sept. 1st, 1893:—

"A CONTRAST.—A gentleman belonging to New York, a passenger on board the steamer 'Great Western' during her last trip, stated that a few days previous to his arrival he had been looking over a file of old papers published in New York, where it was stated that intelligence of the coronation of George III had reached the city by a vessel which had a passage of 40 days. Information of the coronation of Queen Victoria was received in that city by the steamer in a passage of four weeks and a half days."

As a further contrast we may add that information of any event happening in Great Britain may now reach New York by steamer in five days and eighteen hours after, and by telegraph in four hours before the event has taken place.

A Heavy Loss by Fire in St. John.

The wholesale department of the building was established by W. H. Thorne & Co., on Prince William Street, has been destroyed by fire. The building contained about \$60,000 worth of stock, the insurance on which is \$40,000. It will now be in order for the insurance speculators to raise the rate in Chatham as, we observe, they attribute the origin of the fire to "speculative combustion" and also to electric lights.

Fifty dollars would have been accounted for in the same way as unexplained sudden deaths, which were attributed to "visitation" of the Supreme Being. Talmage appears to have not lived in vain.

The Norwegian System.

The Massachusetts House of Representatives by a large majority a few days ago passed what is called the Norwegian bill, which appears to be an adaptation of the Gothenburg system of dealing with the liquor traffic, and the subject is to be debated in the Senate this week. Naturally, it is being much discussed, the Boston Globe devoting nearly the entire editorial page of one day's issue to the merits and demerits of the plan. It is a local option measure. Under the law, if agreed to, cities and towns that favor the granting of licenses, can take a vote to decide whether or not the licenses shall be granted under the Norwegian system. The majority of the states that wish to do so have voted to do so in order to grant a license to corporations to do the liquor selling in the city or town, and this corporation, after deducting five per cent. of its capital, must spend the profits in "objects of general public benefit and utility." The provision in this respect is as follows:

No shareholder shall receive more than an annual dividend of 5 per cent on the par value of his paid-up shares, and the excess of the bonus and the dividend have been paid there shall first be established a reserve fund equal to one-half of the amount of the payment of said dividend and the establishment of said reserve fund the remainder of the net profit, if any, at a fixed percentage for one or more objects of general public benefit and utility, such as industrial education, coffee houses and libraries, parks, playgrounds, baths and sanitary improvements. The objects of such expenditure in each year and the amount to be expended on each object selected for payment by the shareholders shall be determined by the shareholders at a meeting called for that purpose.

Provision is made that every corporation shall annually, within ten days after the last day of the fiscal year, make a return, which return shall specify details of its business, and shall include the names and number of its employees and the salaries paid to each, and the salaries, if any, paid to any officers of the corporation.

The law declares that no sale of liquor shall be made on credit, and there are other stringent regulations dealing with the traffic. The measure is attacked by the extreme men on both sides of the drink question, and by the prohibitionists more violently than by other opponents.

OUR OTTAWA LETTER.

Ottawa, 14th May.—The past week has been essentially a quiet one in the House of Commons, and the progress made has consequently been very good. Friday may be said to have practically closed the committee stage of the tariff legislation. With the exception of about half dozen bills, the main amendment to the bill, the introduction of the Board of Trade and the insertion of the distinctive feature of most of the changes made by the opposition, has been passed through committee. There will be a little discussion on a few of the items in concurrence, and it is possible that an attempt will be made by the opposition to test the sense of the House by a division. The supporters of specific duties on iron and steel manufactures, cottons and woollens may, perhaps, make a final effort to get the duties on these articles still further revised than they have been in committee; but the government has probably gone as far in the direction of reverting to specific duties in place of ad valorem, as it can consistently do with its desire to reduce taxation. The bill, however, will not be passed until after the session.

SIR RICHARD AS A PROTECTIONIST.—Herefore the opposition has contended that the manufacturers of agricultural implements in Canada received altogether too much protection, and that the farmers were made to pay exorbitant prices for their implements, in order that the "robbers," as Sir Richard Cartwright styled them, may make exorbitant profits. This was when the duty on agricultural implements was 35 per cent. Friday, when the bill was under consideration, the manufacturers of the "woman's century" were held a meeting to protest against the proposed reduction of the tariff resolutions as they stand at present.

PROSECUTION OF PROSTITUTION.—With the tariff resolutions disposed of, there naturally begins to be some speculation as to the further duration of the session, and the impression generally prevails that Dominion Day will not find the House sitting. Indeed, amongst a large portion of the members there is an idea that prorogation will take place before the 21st of June. This is the date on which the conference between the government and the delegates from the Australian colonies will open in Ottawa. It would be manifestly inconvenient for Parliament to sit at the same time as the conference, as the members of the delegation would be entitled to vote.

This is the date on which the conference between the government and the delegates from the Australian colonies will open in Ottawa. It would be manifestly inconvenient for Parliament to sit at the same time as the conference, as the members of the delegation would be entitled to vote.

THE TARIF.—Sir Richard Cartwright found pleading scarcely for his old enemies the manufacturers, who, he claimed, had no protection at all. Regardless of the facts that was wantonly destroying his own theories, he held that government by a re-arrangement of the tariff was taxing the manufacturer of agricultural implements more on the raw material he used than on the manufactured article, to the detriment of the farmer.

There are, however, difficulties to be overcome in this matter, not only on account of the franchises being different in almost every province, and the electoral districts not being the same for as far as Dominion elections are concerned. The provincial voter's list will fix dates on which he will attend in the several districts for the hearing of applications for the addition of names or for striking off names which appear on the list. It is estimated that this change will reduce the cost of reduction of 30 per cent. to 20 per cent.

## Miramichi and the North Shore etc.

THE OFFICIAL BY-ROAD list for the current year is on our fourth page.

JAPANESE: Yes, it was a little "giddy" for the occasion, but it was all they had.

THE YOUNG COUPLE:—Governor and Mrs. Fraser celebrated the tenth anniversary of their marriage last Friday afternoon by having a dinner at their residence in the pleasant event. They were the recipients of a host of presents in tinware, and many of the guests took beautiful flowers. Hanlon's orchestra rendered music. The Ottawa Citizen says:—"We congratulate the sister Province of New Brunswick on the appointment of one of her sons to be assistant adjutant general of Her Majesty's forces in Scotland. The officer selected for this important post is Colonel Edward Lee Street, formerly in command of the 1st Battalion, Devonshire Regiment, and recently commanding the 7th and 57th Regiments. How Mr. Adams, M. P. is expected

undeserved. Since "she" magistrate is thus far was the weakest of the four that far heard, three by him and the other by another justice. In the last case the court was conducted in a most ridiculous way in some respects, the attorney for the prosecution appearing to have charge. It was, a peripetetic court and run on the lines of similes in England several hundred years ago, and the magistrate seems to have abdicated his functions, the cause failing upon the shoulders of the prosecuting attorney, who collected the fine and released the misdemeanant. In that court, as everybody knows, much depends upon who the parties to the proceedings are.
