PRICE TWO CENTS

GERMANY DECLARES WAR ON PORTUGAL; FURTHER PROGRESS FOR THE FRENCH

PORTUGAL NOW IN THE WAR MAKING IT THIRTEEN

War Declaration Issued Yesterday Declares Step
Made Necessary by Recent "Illegal" Seizure
of German Vessels in Portuguese Port.

PORTUGAL'S TOTAL
AVAILABLE STRENGTH
PLACED AT 870,000 MEN.

Portugal is the thirteenth
nation to enter the war. Her
regular army consists of 300,
000 men with 230,000 reserves.
She is credited with a total
available strength of about
870,000 men. Her navy is com-
paratively negligible, consist-
ing principally of five second-
class cruisers and some gun-
boats and smaller craft.

MORE SUCCESS FOR BRITISH IN EAST AFRICA

Gen. Smuts, with Small Losses,
Seizes the Crossings of
the Lumi River.

Berlin, March 9, by wireless to Sayville.—The German government considers itself from this time at war with the Portuguese government. It is the conclusion of a declaration made today by the German minister at Lisbon to the Portuguese government, and in Berlin to the Portuguese minister, the Overseas News Agency announces.

"The German declaration," says the News Agency, "emphasizes the fact that this step was made necessary by the recent illegal seizures of German ships in Portuguese ports, which is the gravest sort of breach of neutrality, and of special treachery."
Germany, therefore, is obliged to give up her former attitude of forbearance, which she had maintained because of Portugal's awkward situation.

The declaration enumerates a long series of breaches of neutrality by the Portuguese government, such as the permission of free passage to ports for a time exceeding that given neutrals; the permission given the English navy to use Madeira as a naval base; actual engagements between Portuguese and German troops on the frontier of German Southwest Africa and Angola; frequent insults to the German nation by members of the Portuguese parliament, who never were reprimanded.

The declaration further points out that the seizure of German ships in neutral Portuguese ports on February 23 was an act against the law and the treaties concluded between Germany and Portugal.

"The declaration states," says the News Agency, "that according to the treaty between the two nations the seizure ought to have been preceded by an agreement regarding the price to be paid the owners, and that the seizure was only justifiable in case of public necessity in Portugal, where the tonnage of the ships was evidently larger than that needed to remedy the scarcity of the tonnage at Portugal's disposal. It is further stated that the Portuguese government did not even try to enter into communication with the German owners on the German government."

"The Portuguese government," by these acts, openly gave evidence that Portugal considers herself England's ally, for whom England's interests and wishes are paramount, in comparison with other considerations. The Portuguese government seized the ships in a fashion which must be considered as an international provocation of Germany. The German flag was hauled down on board the ships, and the Portuguese flag, with the war emblem set, while the Admiral's ship fired a salute.

JAIL TERM AND FINES FOR FICTON HOTEL MAN

Special to The Standard.
Fredericton, March 9.—Ernest Howes, proprietor of Long's Hotel, was before the court today in four Scott Act cases. He was found guilty in all four. In two which were first offences a fine of \$10 was struck in each case. In one which was a first offence in which it was proved that a soldier was in the bar, he was sentenced to one month in jail without the option of a fine. In the other which was a fourth offence, he was sentenced to one month in jail. There were also two cases against William Alken, the clerk of the hotel; one first and one a third in which judgment will be given tomorrow.

London, March 9.—The following official communication concerning the operations of the British in East Africa was issued today:

"Troops under command of Lt. Gen. Smuts have advanced against the German forces in the Kilimnjaru (north-eastern boundary of German East Africa) area. On March 7, Gen. Smuts seized the crossings of the Lumi river with an insignificant loss. Several counter-attacks by the enemy were successfully repulsed."

Tonnage Increased Despite War.
London, March 9.—The total net British mercantile tonnage on register at the end of 1915, was 12,416,408 tons, as compared with 12,119,891 at the end of 1913.

This statement was made in the House of Commons today by Reginald McKenna, Chancellor of the Exchequer, in answer to a question on the subject.

British Operations in Mesopotamia.
London, March 9.—The war office issued tonight the following statement on the campaign in Mesopotamia:

"General Lake (commander of the British forces) reports that Gen. Aylmer (in command of the relieving force) advanced on March 8, and, moving by the right bank of the Tigris, rushed Esnan, a position about seven miles east of Kut-el-Amara. This position was attacked March 8, but Gen. Aylmer was unable to dislodge the enemy."

"General Aylmer states that the enemy suffered very severely, and, beyond strengthening his position, has shown no activity. Our casualties were not heavy, and in the majority of cases were very slight."

Gays French Losses 70,000 to 80,000.
Berlin, March 9, by wireless to Sayville.—Major Morant, military expert of the Vossische Zeitung, estimates that the French losses in the fighting around Verdun total between 70,000 and 80,000. Major Morant says that more than 20,000 French soldiers have been made prisoners.

CHIEF OF FORESTRY SURVEY APPOINTED

Government Confirms Selection
of P. Z. Caverhill, Recently Returned from British Columbia.

Special to The Standard.
Fredericton, March 9.—The provincial government this morning held the first of its daily meetings to be held during the session of the legislature. Delegations are to be heard between 11 and 12 noon daily, and at no other time.
This morning the government confirmed the appointment of Mr. P. Z. Caverhill, of Southampton, who recently arrived from British Columbia, as chief of the forestry survey and classification of crown lands, and Mr. P. W. F. Brewster as supervisory magistrate of Hampton, to succeed John March, deceased.

HUNS MOWED DOWN AS THEY ADVANCE AGAINST FRENCH IN SOLID FORMATION AT FT. VAUX

Driven Back with Enormous
Losses by French Curtain
of Fire.

CORBEAUX WOOD ALMOST
CLEARED OF THE ENEMY

Attacks at Douaumont and
Village of Vaux Repulsed —
Russian Steam Roller Again
on Move in the East.

Paris, Mar. 9.—Further progress for the French in the Corbeaux wood is reported in the official statement issued by the war office tonight, as well as a German repulse along the front of the Douaumont to Vaux.

Fighting between the French and the Germans northwest and north of Verdun has in no wise slackened. Particularly violent have been the attacks of the Germans to the north of Verdun, around Douaumont, the village of Vaux and Fort Vaux, but, according to Paris, they went for naught.

Germany Moved Down.
The Germans were thrown in solid formation against trenches of the French bordering the foot of the slopes of the ridge dominating Fort Vaux, which the latest German official reports said the Germans had captured, but the French brought their curtain of fire into play and drove back the attacking forces with "enormous losses."

Northeast of the fort the Germans essayed an assault against the village of Vaux, from which they had previously been driven by the French, but here also they were repulsed with heavy casualties. An attack on the outskirts of the village of Douaumont was similarly put down by the French artillery and infantry fire.

To the west of the Meuse, midway between Bethanourt and the river, the French have continued on the offensive against the Germans in the Corbeaux wood, and are officially reported to have driven the Germans from almost all of that important salient.

To the east and southeast of Verdun, only intermittent bombardments of opposing positions have taken place. Several fights in the air between French and German aviators have occurred in the neighborhood of Verdun.

In Champagne, the French have captured a trench near Malson De Champagne and are shelling the German positions near Navarin, the Butte Du Meunil and Massiges. In Upper Alsace a section of a German trench to the east of Seppois has been taken by the French.

In the eastern theatre the Russians at various points have taken the offensive against German advanced positions, but Berlin declares they nowhere met with success. In the Austro-Italian zone the bad weather again has almost stopped operations.

Steam Roller on Move.

The Russians on the Black Sea coast continue to press on towards Turkey's principal port, Trebizond, and also are making progress against the Ottomans in the Persian sector.

The Russian Foreign Office categorically denies that Turkey has made peace proposals of any kind, the chief of the department of the Near East saying: "No overtures, official or semi-official, directly or indirectly, have been received."

A despatch from Rome says Austrian warships, in the Adriatic Sea, are preparing for a dash through the Dardanelles to the Black Sea, to help the Turkish navy against the Russians. This may account for the reported removal of the mines in the Dardanelles.

Turkish Troops to Western Front.

Odessa, via London, March 9.—It is reported here that Germany has given formal assurance to Turkey that she will not make a peace without compensation to Turkey, and that Turkey has consented to send Turkish troops to assist the Germans on the western front. Several engineering regiments have been withdrawn from Asia Minor to Constantinople.

HOW CARVELL HAS PLATED INTO OUR ENEMY'S HANDS

R. B. Bennett in Slashing Reply Shows How Carleton Co. Grit's Speeches Gave Our Enemies Valuable Information — Carvell Delivers most Abusive Speech of His Career.

Special to The Standard.
Ottawa, March 9.—Because of the damning done to the Canadian boots by opposition members like Pugsley and Carvell, Canadian boots and shoes are not held in high esteem in France, and France has not bought what she otherwise would have bought gladly. Not less than ten million dollars has been lost to the people of Canada as a result of this shameful attack made upon Canadian manufacturers by the opposition members since the war began.

This was one of the serious charges brought against the members for St. John and Carleton tonight by R. B. Bennett, the brilliant member for Calgary, himself a New Brunswick boy. Mr. Bennett made a powerful impression, and he deliberately accused two members mentioned of lack of patriotism, and of assuming an attitude harmful to the Canadian people and helpful to the German enemy. Parliament has been seriously disturbed by the harm that Carvell did on Tuesday when he gave facts and information to the House that will find their way to the nations that are fighting the brave Canadian troops on the battle fields of Flanders—facts and information that will aid the enemy against Mr. Carvell's fellow Canadians. When Carvell interjected the prime minister had moved for the appointment of the committee which inquired into the manufacture of Canadian boots for the soldiers and which had done such harm to Canadian credit. Mr. Bennett said that he had done so at the persistent importunities of the members for St. John and Carleton and other Liberals. "But," he added, "if I know the truth he is not going to see his country vilified a second time."

Sacrificed Patriotism for Partysim.
Mr. Bennett was speaking in the debate on the motion of Sir Wilfrid Laurier to hold an investigation into the work of the old shell committee, or, as the member for Calgary described it, a post mortem upon that body, for there is no effort on the part of the Liberals to inquire into the work of the imperial munitions' board, its successor.

"I know," said Mr. Bennett, "the people that an inquiry into the shell committee would give pleasure to—the people of the central powers of Europe."

"The member for Carleton," he went on, "has given to our enemy a knowledge of our secrets that should never have been given; he has given prices that should never have been given, and our work has been revealed to the enemy."

The air was tense as Mr. Bennett laid bare that Carvell and Pugsley had helped the enemies of the people of Canada. The fact is that since the war began, two of the men who have been most disloyal to the interests of the land of their birth are the members for St. John and Carleton. They have sacrificed patriotism for partysim of the most despicable type. They have done what no others of their party can be induced to do. From New Brunswick has come the only rift in the lute of Canadian unitedness, of brotherly patriotism, of loyal co-operation, and the cry went up from Mr. Bennett "why are they not good enough Canadians to be proud of what has been done?"

A purchasing agent for the allies told Mr. Bennett when he was in Europe last year that Canadian manufactured goods were better than any produced on the American continent. The only purpose to be served by the vilification of the Canadian manufacturers, the member for Calgary pointed out, was "a little cheap glory for a man like the member for Carleton."

But on the other hand the credit of Canada abroad had been injured, and they were being described as a nation of grafters, while their brave sons were laying down their lives on blood-drenched battlefields fighting for all that free men deem dearest.

When the war is over we shall have all the investigations that are required, was the argument of Mr. Bennett, and he ventured the prediction which

he declared to be his profound conviction, that some reputations that are great at the present time would fall, and that men who had washed their hands in the blood of their fellow-countrymen, they and their children's children would be cursed by generations to come who would know they had made inordinate profits out of the war of the nation. Meanwhile it was the duty of parliament to leave this alone until the enemy had been defeated and there was peace once more upon the land.

Carvell Excels Himself.
The speech of Mr. Carvell was one of the most bitterly partisan which even he has made in the house. It was also full of absurdities. For instance, he accused General Sir Sam Hughes of cowardice. The Minister of Militia has left for France, where he is going upon service in the interests of Canada and the Allies, and he was described by the member for Carleton today as "the man who has not enough manhood to stand here and answer these charges that I am making."

He also said that he did not believe that General Hughes was going across the Atlantic to go to the firing line, but to induce Lloyd George to disband the imperial munitions board in order that the government might work out "their nefarious schemes."

Now, who is Mr. Carvell that he should accuse a soldier going to the front of cowardice? Who is he, that he should demand that Canada's greatest soldier should stay to hear his abuse and reckless language. Mr. Carvell's talk is not helping his country. General Hughes' actions are.

In violence of vituperation Mr. Carvell out-ripped Carvell, but he went too far to carry conviction, and it is quite evident that Ontario at any rate is getting too much of him. There are not many Liberals from Ontario in being a hate of his in the house, to realize that Carvell is injuring them. They are saying so quite freely tonight.

While he was vilifying the government J. H. Burman asked him if it were true that the government was torn to pieces. "Yes," replied Carvell.

Whereupon Mr. Hasen remarked—"It would be good news for Germany, and would mean a job for Mr. Carvell."

This hit the nail on the head. Mr. Carvell gives one the impression of being a hater of his native land. He acts like that.

Ottawa, March 9.—Resuming his speech on Sir Wilfrid Laurier's shell inquiry motion today Mr. F. Carvell claimed that Gen. Sir Sam Hughes departed from the Canadian capital too soon and should have waited to meet the serious charges against the shell committee and do his responsible part in trying to "clean up the mess and deal with the offenders."

He accused Sir Sam was the victim of Col. J. Wesley Allison, who is playing sick in New York and expects to tomorrow evening to meet the man primarily responsible for much that has taken place, but has not the manhood to stay and meet the charges.

Mr. Carvell charged that Premier Borden and Gen. Hughes made explanation in the House not in accordance with facts.

Mr. Carvell charged Premier Borden with mis-statement when the latter told the House that the policy of Britain was to conduct investigations "when the war was over and not before," and dealt with Sir Robert's reference to the Crimean and South African wars.

RUSSIANS PREPARE BLOW AT TREBIZOND, TURKEY'S CHIEF BLACK SEA PORT

Capture of Riza Clears Road
and Enemy Not Able to
Withstand Attack — Complete
Collapse of Turkish Campaign in East Expected
in Spring.

Petrograd, via London, March 9, 5.57 p. m.—The final collapse of the Turkish campaign in the early spring is confidently predicted by the Russian military critics, who base their assertions upon the remarkable progress the Russian army is making along the Black Sea coast and in Persia. The critics find increasing evidence of demoralization among the Turks and inability to continue their organized positions.

The past week has brought the northern and southern Russian Caucasian armies considerably nearer their immediate objectives. The recent victories in Persia will enable the Russians to push forward over the mountain range, hitherto considered impassable, to a point within 25 miles of the Mesopotamian border, while the troops moving along the Black Sea coast, under the protection of the Russian fleet, are within now a like distance of Trebizond.

The capture of Riza leaves no important coastal defense on the way to Trebizond, and a combined land and sea attack on Turkey's most important Black Sea port is now being prepared for.

According to all reports the Turks have done everything they could to improve the fortifications at Trebizond, but it is believed here that they have not had sufficient time to bring up the necessary reinforcements to withstand a sustained Russian assault.

British Repulse Attack.

London, March 9.—The British official communication issued tonight says: "Last night we repulsed a small attack near the Hohenzollern redoubt. Today the enemy sprang a mine near Ginchely, but made no infantry attack."

"There has been considerable artillery activity by both sides about Ypres."

SEVERAL IMPORTANT MATTERS WILL OCCUPY ATTENTION OF THE LEGISLATURE

Opening Ceremonies Yesterday—House Will Sit Four Afternoons and Four Evenings a Week—Programme for Session Outlined by Acting Premier Hon. J. A. Murray.

Special to The Standard.

Fredericton, March 9.—New Brunswick legislature's session got underway this afternoon after the military display and other ceremonials attending the opening had been concluded, including the election of Hon. O. M. Melanson to speakership.

Five speeches were made and the debate on address in reply to the speech from the throne has not yet been completed.

Mr. Carter, of Victoria, moved the adjournment of the debate which will be continued tomorrow and there will be an adjournment until Monday evening. By sitting four afternoons and four evenings each week and allowing members to go home for week-ends the government expects to be able to make such progress with the business that prorogation can be reached early in April.

Hon. Mr. Murray outlined this programme in concluding an admirable speech in the House this afternoon, in the speech from the throne and pointing out the strong position which the government was entitled to have in the opinion of the people for the businesslike administration it had given of the province's affairs. He touched on the prohibition question, and

VILLA LEADS RAID ON U.S. TERRITORY

With Band of 500 Attacks
Town of Columbus—Sixteen
Americans Killed and Build-
ings Fired.

Columbus, New Mexico, Mar. 9.—Francisco Villa, outlawed Mexican bandit, raided United States territory today. With 500 men he attacked Columbus, killed at least sixteen Americans, and fired many buildings before he was driven back across the international border.

At least 250 troopers of the Thirtieth United States Cavalry followed the Villa band into Mexico. Reports to Col. H. J. Slocum, commanding United States troops at this point, late today stated that Villa had made a stand five miles south of the border, where spirited fighting ensued.

The bodies of eighteen of the bandits, including Pablo Lopez, second in command, had been gathered and burned before noon, and troopers reported an undetermined number of dead still lying in the brush. Led to the attack under the slogan: "Death to the Americans" Villa's followers fought with desperation. Just before dawn they crept along ditches skirting the U. S. Cavalry camp, and rushed the sleeping town, firing heavily.

Stores and the post office were looted, oil was poured upon frame structures, and the match applied by still other bandits.

The fighting in the town ended almost as suddenly as it began. Less than two hours after the first shot was heard, Villa's buglers sounded the retreat, and the raiders began a disordered flight, closely followed by American troopers.

MR. CARVELL HAS PLANNED INTO OUR ENEMY'S HANDS

Continued from page 1. turned out in England at \$1.05, while Canada had purchased a large number just before the war from the Vickers Company at \$2.28.

Mr. Carvell had seen Mr. T. A. Russell, of Toronto, yesterday and he had told him that the Russell Company, which had a contract at \$3 and \$3.50 would fill that contract and fill it ahead of time.

If the government had mobilized Canadian manufacturers and industrial ability and energy and given Canadian enterprise an opportunity, Mr. Carvell believed that there would now be from one to five hundred factories, employing tens of thousands of Canadians.

Mr. Carvell told the House that "a number of the political friends of the government who had secured munition contracts" had come to see him with a view to explaining their position.

Another Role He Thinks He Could Fill. "I looked the creation over," said Mr. Carvell, "I am satisfied that with a piece of sheet metal, a hacksaw, a file and a soldering pot I could make it myself in two hours."

He had referred to the contracts Mr. Kemp's firm had secured from the shell committee and he sincerely trusted there was nothing in the report that Mr. Kemp was under the circumstances to be made minister of munitions.

Mr. Bennett then went on to defend the Minister of Militia. He had himself on occasion referred from him, but it must be acknowledged that he was at least a dynamo of human energy who had accomplished what he had.

Mr. Bennett said that the shell committee had distributed orders in various localities because those committees had done nobly in the war and they thought men too old to fight might engage in shell making.

FUNERALS

The funeral of Mr. John P. McGloane took place yesterday morning at 8.30 o'clock from the residence of his parents, Bellevue avenue, to St. Peter's church.

DAUGHTER OF PREMIER CLARKE TO WED AN OFFICER OF THE 115TH

St. Stephen, March 9.—The engagement is announced of Miss W. L. Jarvis, of the 115th Battalion, St. John, and Miss Doris Clarke, daughter of Hon. George J. Clarke, premier of the province.

WANT SOME MODIFIED FORM OF CONSCRIPTION

Hamilton, Ont., March 9.—The Grand Orange Lodge of Ontario West this afternoon unanimously passed a memorial, to be forwarded to the Dominion government, asking for the immediate adoption of some modified form of conscription.

COLONIES WELCOME AT EMPIRE'S COUNCILS

NOTHING OFFICIAL, BUT SIGNS POINT TO TURKEY ASKING SEPARATE PEACE

London, March 9.—The Foreign Office has received no official advice that Turkey is seeking peace. However, the impression prevails, from what is known of conditions in Turkey, that there is a strong probability of an early move in that direction.

WAR WILL RESULT IN AN EMPIRE ONE IN SPIRIT AND ACTION

British Gov't and people ready to welcome Dominion to their Councils, Bonar Law says.

London, March 9 (5.04 p. m.)—An invitation to the British colonies to share in the councils of the Empire was extended today by A. Bonar Law, colonial secretary, at a luncheon given in honor of Premier Hughes, of Australia.

SAYS FURTHER WARNING IS UNNECESSARY

Washington, March 9.—Senator McCumber, Republican of North Dakota, today withdrew his resolution to warn American citizens of armed ships, stating he thought that Americans had been effectively warned and that the pendency of his resolution might embarrass diplomatic negotiations.

MANY JEWS ENLISTED WITH CANADIANS

Government has under consideration question of members of house in Khasi drawing double pay.

Ottawa, March 9.—In the House this afternoon, Hon. Robert Rogers told Mr. E. M. MacDonald, of Pictou, that A. Kastella was appointed superintendent of dredging for the Public Works Department on May 28, 1914, and resigned the position on February 15, 1916.

Throw Away Your Eye-Glasses!

A Free Prescription You Can Have Filled and Use at Home. Do you wear glasses? Are you a victim of eye-strain or other eye-weakness? If so, you will be glad to know that there is real hope for you. Many whose eyes were failing, say they had their eyes restored through the principle of this wonderful free prescription. One man says, after trying it: "I was almost blind; could not see to read at all. Now I can read everything without any glasses and my eyes do not water any more. At night they would pain dreadfully; now they feel fine all the time. It was like a miracle to me." A lady who used it says: "The atmosphere seemed hazy with or without glasses, but after using this prescription for fifteen days everything seems clear. I can even read fine print without glasses." It is believed that thousands who wear glasses can now discard them in a reasonable time and multitudes more will be able to strengthen their eyes so as to be spared the trouble and expense of ever getting glasses. Eye troubles of many descriptions may be wonderfully benefited by following the simple rules. Here is the prescription: "Go to your nearest drug store and get a bottle of Bon-Opto tablets. Drop one Bon-Opto tablet in a glass of water and allow to dissolve. With this liquid, bathe the eyes two to four times daily. You should notice your eyes clear up perceptibly within a few days. If your eyes are bothered even a little, take care to save them now before it is too late. Many hopeless cases have been saved. If they had cared for their eyes in time, the Valms Drug Co. of Toronto will fill the above prescription by mail, if your druggist cannot.

FINE SHOWING IN CROWN LANDS DEPT FOR YEAR 1915

Income, Notwithstanding War Conditions, Largest on Record—Stampage Receipts \$422,909.26 for Year—Smaller Lumber Cut Expected this Year.

At the opening of the Legislature, yesterday, the annual report of the Crown Lands Department was placed before the members. This report follows the usual lines. From it is seen that the receipts from territorial revenues for the year ending October 31, 1915, were \$554,261.01 net, and for 1915 \$591,905.14. Stampage receipts for these years were, for 1914—\$485,624.84, and for 1915—\$422,909.26. The 1915 income showed, notwithstanding conditions created by the war, the largest recorded in the history of the department. It is pointed out, however, that because of scarcity of tonnage, the quantity of lumber cut was greater than could be marketed and large stocks have had to be carried over. The quantity of timber cut on Crown Lands during the past eleven years is as follows:

Year	Super. ft.
1905	107,705,676
1906	141,449,449
1907	149,610,471
1908	132,218,333
1909	205,761,583
1910	281,716,402
1911	309,883,428
1912	282,893,141
1913	276,221,156
1914	270,234,773
1915	290,120,823

Smaller Cut Likely This Year. It is intimated that the present year will not see anything like the cut of 1915, but that there will be a reduction of at least one-third. However, the prospects for the satisfactory collection of stampage charges are good. Particular attention is paid to the commencement of reforestation by the Pejeper, Paper Company holding Crown Licenses on Salmon River, St. John County. Seedlings and transplants of Norway spruce three years old are being used, the transplants being procured from New Haven and the seedlings raised on the premises at Salmon River. Nothing has been done in the matter of a survey of the Crown Lands as the Chief Forester, who was selected, has not been able to take up the work. Statement is made that the hunting season was successful largely because of the fine weather, that there was no scarcity of game, that the laws as they now exist seem to the whole satisfactory to sports-

COWAN'S Supreme Chocolate

A pure, unsweetened, cooking chocolate. Easily melted and mixed, containing that rich chocolate flavor that can only be obtained from the finest and most expensive cocoa beans. For years the most satisfactory cooking chocolate in Canada. Sold everywhere. Made in Canada.

ular and Oriental steamship Nellore, (The Nellore was built in 1913, at Greenock and is 6,553 gross tons and 450 feet long. She was last reported passengers and mails have been re-moved, in shipping records as having sailed from Penang on February 12.

DRINK HOT WATER AND RID JOINTS OF RHEUMATIC RUST

Why rheumatism and lumbago sufferers should drink phosphated hot water each morning before breakfast. RUST OF IRON. RUST OF RHEUMATISM.

Just as cool, when it burns, leaves behind a certain amount of incandescent material in the form of ashes, so the food and drink taken day after day leaves in the alimentary canal a certain amount of indigestible material, which, if not completely eliminated each day, becomes food for the millions of bacteria which infest the bowels. From this mass of left-over waste material, toxins and poisonous-like poisons, called uric acid, is formed and then sucked into the blood where it continues to circulate, collecting grain by grain in the joints of the body much like rust collects on the hinge as shown above. Men and women who suffer from lumbago, rheumatism or sore, stiff, aching joints should begin drinking phosphated hot water, not as a means to magic relief from pain, but to prevent more uric acid forming in the system. Before eating breakfast each morning, drink a glass of real hot water with a teaspoonful of limestone phosphate in it. This will first neutralize, attacks, salivary, nasty breath and then wash out of the stomach, stomach acidity.

WRIGLEYS

From the tropical tree to the perfect package no pains are spared to make it pure and wholesome, for you. Buy no other - get WRIGLEYS.

It slacks the thirst, steadies nerves, soothes and refreshes. A delicious aid to appetite and digestion. A constant friend to the teeth. After every meal.

Write for free copy of "Wrigley's Mother Goose," quaint Spearman booklet for kiddies and grown-ups. WM. WRIGLEY JR. CO., LTD. Wrigley Bldg., Toronto

The Perfect Gum in the Perfect Package

Women Once Invalids

Now in Good Health Through Use of Lydia E. Pinkham's Vegetable Compound. Say it is Household Necessity. Doctor Called it a Miracle.

All women ought to know the wonderful effects of taking Lydia E. Pinkham's Vegetable Compound even on those who seem hopelessly ill. Here are three actual cases:

Harrisburg, Penn.—"When I was single I suffered a great deal from female weakness because my work compelled me to stand all day. I took Lydia E. Pinkham's Vegetable Compound for that and was made stronger by its use. After I was married I took the Compound again for a female trouble and after three months I passed what the doctor called a growth. He said it was a miracle that it came away as one generally goes under the knife to have them removed. I never want to be without your Compound in the house."—Mrs. FRANK KNOW, 1642 Fulton St., Harrisburg, Penn.

Hardly Able to Move. Albert Lea, Minn.—"For about a year I had sharp pains across my back and hips and was hardly able to move around the house. My head would ache and I was dizzy and had no appetite. After taking Lydia E. Pinkham's Vegetable Compound and Liver Pills, I am feeling stronger than for years. I have a little boy eight months old and am doing my work all alone. I would not be without your remedies in the house as there are none like them."—Mrs. F. E. Yost, 611 Water St., Albert Lea, Minn.

Three Doctors Gave Her Up. Pittsburg, Penn.—"Your medicine has helped me wonderfully. When I was a girl 18 years old I was always sickly and delicate and suffered from irregularities. Three doctors gave me up and said I would go into consumption. I took Lydia E. Pinkham's Vegetable Compound and with the third bottle began to feel better. I soon became regular and I got strong and shortly after I was married. Now I have two nice stout healthy children and am able to work hard every day."—Mrs. CLEMMENTINA DUEBBERG, 34 Gardner St., Troy Hill, Pittsburg, Penn.

All women are invited to write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for special advice.—It will be confidential.

HER LITTLE BOY HAD PNEUMONIA

NEARLY LOST HIM. DR. WOOD'S NORWAY PINE SYRUP SAVED HIM.

The slight cold, the irritating cough, the tightness of the chest, if not attended to or 15 pounds of later develop into a serious lung or bronchial trouble. Get some advice to you is that on the first intimation of a cough or cold "Get Dr. Wood's Norway Pine Syrup." Mrs. H. Washburn, Coopersburg, Station, N.B., writes: "I thought I would write and tell you just how much I appreciate Dr. Wood's Norway Pine Syrup. For I would not be without it in the house. Twice my little boy, now four years old, has had pneumonia, and nearly died, but since using Dr. Wood's Norway Pine Syrup I have kept him clear of even a cough. I often say that if it had not been for "Dr. Wood's" I would have lost him."

My little girl, ten months old, is subject to bronchitis. I have used Dr. Wood's Norway Pine Syrup for her, and in a very little while she is all well. In fact, on the first signs of a cold or cough we all fly for "Dr. Wood's" I would have lost her."

You can procure Dr. Wood's Norway Pine Syrup from any druggist or dealer, but be sure and get "Dr. Wood's" when you seek for it, as there are many imitations on the market.

The genuine is put up in a yellow wrapper, three nine tress the trade mark, price 25c and 50c.

Manufactured only by The T. Millers Co. Limited, Toronto, Ont.

Thin People Can Increase Weight

Thin men and women who would like to increase their weight with 10 or 15 pounds of healthy "fat" should try eating a little Sargol with their meals for a while and note results. Here is a good test—worth trying. First weigh yourself and measure yourself. Then take Sargol one tablet with every meal—for two weeks. Then weigh and measure again. It isn't a question of how you look or feel or what your friends say and think. The scales and the tape measure will tell their own story, and many thin men and women we believe can easily add from five to eight pounds in the first fourteen days by following this simple direction: And best of all, the new flesh stays put. Sargol does not of itself make fat, but mixing with your food, it aims to turn the fats, sugars and starches of what you have eaten, into rich, ripe fat producing nourishment for the muscles and blood—preparing it in an easily assimilated form which the blood can readily accept. Much of this nourishment now passes from your body as waste. But Sargol works to stop the waste and to get quickly and to make the fat producing contents of the very same meal you are eating now develop pounds and pounds of healthy flesh between your skin and bones. Sargol is safe, pleasant, efficient and never habit forming. It is an easily assimilated form which the blood can readily accept. Much of this nourishment now passes from your body as waste. But Sargol works to stop the waste and to get quickly and to make the fat producing contents of the very same meal you are eating now develop pounds and pounds of healthy flesh between your skin and bones. Sargol is safe, pleasant, efficient and never habit forming. It is an easily assimilated form which the blood can readily accept. Much of this nourishment now passes from your body as waste. NEW BRUNSWICK LEGISLATURE OPENED YESTERDAY

Speech From Throne Forecasts Legislation to Provide for Referendum on Prohibition, Bill to Amend Elections Act and Legislation for Early Completion of Valley Railway --- Hon. O. M. Melanson Elected to Speakership.

(Continued from page 1)

Frederickton, N. B., March 9.—The fourth session of the sixth Legislative Assembly of New Brunswick was opened this afternoon with a military display that eclipsed anything of the kind ever seen here.

Active service troops now in training to join the Canadian Expeditionary Force on the firing line in the great world war, composed the guard of honor, while returned soldiers who have been invalided home from the trenches, acted as guards about the legislative building to keep all unknown persons away, as one of the precautions in connection with the opening of the second wartime session of the provincial parliament.

The exigencies of the war made it necessary to dispense with the customary artillery salute that has always featured the opening of the House, but officers who will command troops going on active service at any time now, as well as some who have been invalided home, composed the personal and military staff of Lieutenant Governor Wood. His Honor's two A. D. C.'s—Capt. H. E. Osborne and Lieut. F. de L. Clements—are to go to the front with the infantry now stationed here, while the twenty odd officers who composed His Honor's staff, are all actively engaged in military work and included Colonel H. H. McLean, M. P., the Brigadier in command of the New Brunswick Militia District; Colonel Powell, A. A. G., the officers commanding and members of the staffs of several of the units now being raised in New Brunswick.

House met at 3 o'clock. Hon. Mr. Murray said that the circumstances under which Premier Clarke was absent from the House would be deeply regretted by all members. For some time he had been in ill health, and was advised by his medical attendant to take a rest from which he was not yet able to back. Members would be glad, however, to learn that his health was greatly improved, and that he hoped he would be able to back in his place before the session closed.

Last session when the members would remember that the then Speaker, Hon. Mr. Dickson, was unable to be present on account of ill health, and while they regretted his absence, they nevertheless hoped for his early recovery and speedy return to his duties, and he was sure it was with feelings of great sorrow that they all learned of his untimely death a few weeks ago. The late Mr. Dickson was a gentleman in the truest sense of the word. His was a character that those who knew him soon learned to respect and admire, and through many good qualities to the duties of his office in the carrying out of which he earned the respect and esteem of all. He (Mr. Murray) felt sure he had voluted the sentiments of all members of the House when he said his death had caused the loss of a great friend.

Premier, who is leading the Government forces until Premier Clarke recovers at Clifton Springs, N. Y., where he was forced to go for a rest as a result of his recent sudden illness. Mr. Dugal, of Madawaska, as leader of the opposition, seconded the motion electing his compatriot, Hon. Mr. Melanson, and in so doing briefly expressed his congratulations to the new Speaker.

Hon. Mr. Murray proved a capable leader of the Government forces and the business of the House in connection with the opening of the session went along smoothly, while it was always evident that he has the complete confidence of his colleagues in the Government and the supporters of the administration in the House. Mr. H. B. Rainsford, the veteran Clerk of the House, who, after twenty-eight years of service, was prevented by illness from attending the last session, was on duty again, while the Clerk Assistant, Mr. George Y. Dibble, who also has unfortunately been prevented by illness from attending the session, is also assisting in the work of the Clerk's office.

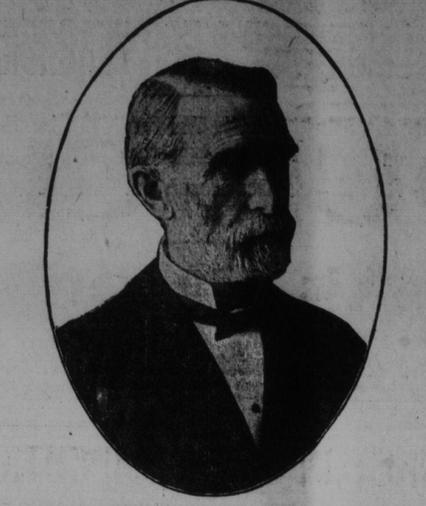

I desire to express my deep sense of the loss which the house has sustained by the death of the Speaker of the Legislative Assembly, the Honorable Walter Britain Dickson.

When the legislature prorogued last year we were under the shadow of a great war. It is a matter of great regret that the time has not yet passed, but rather increased in intensity. The citizens of New Brunswick, in common with the rest of the empire, are now engaged in reviewing troops in an abiding faith in the triumph of the cause of righteousness and justice. The people of the province have responded generously to the many calls made upon them for assistance in the different objects relating to the prosecution of the war. I am glad to know that many of the county councils throughout the province have responded to the call for assistance in the form of contributions to the Patriotic Fund. The province has also rendered financial aid, and her sons have continued to join the colors until a large representation of the province is now in the front of the war.

The financial position of the province is sound, and bond issues, which my Government have had occasion to make during recess, have been made on a highly satisfactory basis.

A bill will be introduced during the session enabling the electors of the province to adopt a measure providing for the prohibition of traffic in intoxicating liquors.

Legislation will also be presented providing for the early completion of the St. John and Quebec Railway and the prohibition of traffic in intoxicating liquors.

LIEUTENANT-GOVERNOR WOOD.

Speech From The Throne.

After the military and other formal proceedings, including the election of Hon. O. M. Melanson as Speaker, His Honor Lieutenant-Governor Wood opened the legislature with the following speech:

Mr. Speaker and Gentlemen of the Legislative Assembly: It affords me great pleasure to welcome you on again assembling for the discharge of your legislative duties. It is to be regretted that Honorable Mr. Clarke, Premier of the Province, is unable, by reason of illness, to be present, but I am glad to learn that he is expected to resume his duties at an early date.

The financial position of the province is sound, and bond issues, which my Government have had occasion to make during recess, have been made on a highly satisfactory basis.

A bill will be introduced during the session enabling the electors of the province to adopt a measure providing for the prohibition of traffic in intoxicating liquors.

Legislation will also be presented providing for the early completion of the St. John and Quebec Railway and the prohibition of traffic in intoxicating liquors.

Legislation will also be presented providing for the early completion of the St. John and Quebec Railway and the prohibition of traffic in intoxicating liquors.

of the public welfare than that which I have heard today.

"I am sure all will regret the Honorable Mr. Clarke's indisposition, but are pleased to know that he will soon return and resume his duties."

"Mr. Speaker, I note that the clerk of the House no longer announces the unavoidable absence of the Hon. Walter Britain Dickson, whose illness prevented him from attending to his duties during the past session. Speaker Dickson has passed away, and while the members generally will regret his demise, the younger members particularly will miss him, owing to the kindly manner in which he always rendered assistance to the beginner, in fact he always seemed to anticipate the difficulties with which the uninitiated member would meet and sought to forestall them. He graced the office of Speaker in a dignified and pleasant manner, and was always most considerate of a fellow member's feelings. In his home he was a kind and loving father, always cheerful and most entertaining. Albert County has lost a good friend, and a most energetic representative, who looked well after the needs of his constituency. During the late Speaker's absence you, Sir, presided over the house in a highly satisfactory manner, and I congratulate you upon having been selected as Speaker for the present session."

"This, Sir, is a speech making time in the world's history, and Canada is playing not the least important part. Aside from the war, the passing of Sir Charles Tupper, the last father of Confederation, and the burning of the Parliament Buildings to the great fathers of Confederation, are occurrences, which will be largely featured in the writing of Canadian history. One by one the grand old fathers of Confederation have passed to the Great Beyond, but one survived to tell the tale of early struggles under adverse circumstances, and to see the obstacles conquered to this country's progress. Sir Charles Tupper lived to the age of ninety-five years, and his death at Bexley Heath, England, on October 30th, 1915, caused widespread regret, not only in his native province of Nova Scotia, but throughout the British Empire. His life was one of perseverance, fortitude and accomplishment, and he lived to see many of his visions realized. Having been most prominent in bringing about the Confederation of the British North American Provinces, in 1867, he became one of Sir John A. McDonald's most intimate friends, and chief adviser, and was largely instrumental in causing the construction of the Canadian Pacific Railway. When Sir Richard Cartwright, as Finance Minister in the Mackenzie Government, announced the liberal party's adherence to the free trade system, Sir Charles immediately denounced it, and proclaimed for a National Policy, which the people of this country are proud to have adopted. His life was a policy of both political parties. When the Boer war broke out he advised the then Premier, to not further delay, but to send troops with all speed to the assistance of the mother country. The history of Sir Charles Tupper is the history of Canada, and today, as in his time of activity, the essential material which goes to make up the backbone of our Federal Government, is largely obtained in the Maritime Provinces."

"Reference has been made to the war which goes on with unabated fury. That the British Government intend that the war shall be fought to a finish may be found in Premier Asquith's statement. Asked as to peace possibilities, Premier Asquith replied: 'We shall not discuss the possibility of peace until we have won the war, which we have not lightly drawn into Belgium—and I will add Serbia—recover in full measure all and more than they have sacrificed, until France is adequately secure against aggression, until the rights of the small nations of Europe are based upon an unassailable foundation, and until the military domination of Germany is wholly and finally destroyed.' Nothing could be more positive than that Great Britain has determined on her course, and that course will be followed by her colonies."

"Sir Robert Borden's words of warning on December 5th, 1912, in times of peace, are just as applicable today in times of war. In introducing his naval proposals he said: 'But today while the clouds are heavy, and we hear the booming of the distant thunder, and see the lightning flashes above the horizon, we cannot, and we will not wait and deliberate until any impending storm shall have burst upon us in fury and with disaster.'"

"What has Canada done and what will she continue to do? This war found us unprepared, but no nation is on record as having accomplished within the short period of six weeks, what Canada accomplished. Within that time she trained and placed on transports, thirty-three thousand Canadian troops, the largest number ever set afloat in history. Compare this achievement with the attempt of our friends to the south, when calling for volunteers in 1898, during the Spanish-American war. With more than ten times the population of Canada, it took them three months and four days to raise a force of 100,000 men. It is to be hoped that there are certain sections in this province where people styling themselves as Canadians, are denouncing Canada's participation in this war, and talking against our enlistment, much to the discomfiture of our recruiting officers. I trust that those who are so obstructing the advance which is called

Dr. O. B. Price and A. J. Witzell, who Moved Address in Reply to the Speech from Throne, Deliver Eloquent and Well Thought Out Speeches --- Busy Session with Important Matters for Consideration.

culated to knit together in bonds of peace, all civilized countries, will be treated with that degree of recognition which they merit. A man who will accept, enjoy and profit by the freedom, liberty and advantages of our institutions in this country in times of peace, is a traitor of the vilest kind if he will not defend her in times of war. The call was answered by the boys of this country; boys to whom a military life had never appealed, but boys who had been brought up in homes of probity and patriotism. They had learned in the school readers of their time, the lessons of heroic and splendid life which have come down from the past. It was a serious and thoughtful time, they felt dimly but deeply that days of sharp struggle and high achievement were before them. They felt that a time was coming when to them should be addressed the stern admonition of the Apostle, 'quit you like men; be strong; and a fire had been kindled in their hearts that German tyranny and barbarism could never wholly extinguish. In later years, when men seek to draw the moral of this great war, nothing will seem more admirable than the way in which our boys responded to

this was that the Province benefited to the extent of some ten thousand dollars more than it would have received had the first scale been accepted. It was then claimed that the Province was not receiving any more than the amount due it for stumpage. Time has proven that this contention has been amply justified, as the following will show:

"Taking the years from 1902 to 1915, during the first period of seven years, the total stumpage amounted to \$1,000,000 superficial feet, and for the last period 1,910,000 superficial feet; the difference in which—estimated at \$150 per thousand would amount to nearly \$1,500,000 roughly speaking. The Department of Lands and Mines having gathered information compiled on the Custom Returns, prove that fully as much lumber was cut in former years as has been cut during the latter period."

Natural Gas.

"The returns from the natural gas industry have remained practically the same during the last two or three years, the royalty for 1915 amounting to \$2,822.17. That other gas wells exist in other parts of the province outside of Albert County, there is little doubt, and these areas are only awaiting development."

Manganese.

"In addition to the mining of the various minerals heretofore produced, Manganese has been mined in small quantities and shipped to the United States."

Valley Railway.

"All will be pleased to learn that legislation will be introduced looking to the early completion of the Valley Railway. The changes in its route have been made after very careful consideration and as Sir John is to have a direct connection with the east and west sides of the harbor, as well as an independent route from Charlottetown to the New England States, it is believed that that city will now be satisfied. That a territory will be covered which heretofore has been neglected and therefore unable to get natural products and the produce of the country to a suitable market, there is little doubt."

Public Works.

"The Government is to be congratulated upon the completion of the new bridge over the Reversing Falls at St. John. The bridge is of the span arch design, and is the largest bridge of its kind in the world."

Agriculture.

"One of the most important subjects referred to in His Honor's speech, is that of agriculture, and in this department great development has taken place in recent years. In fact New Brunswick leads many of the other provinces in this most important industry. In soil work, the province of New Brunswick is the first to import a limonite crusher for agricultural purposes. Tons of lime-

(Continued from page 4)

rock are being crushed and made ready for application to the soil, requiring it in the early spring. Rural Science School.

"In January of this year courses in elementary agricultural education were given in the Rural Science School at St. John. About one hundred school teachers took advantage of instruction in this branch. It is interesting to note that over 300 applications were received from each county desiring to take up this work, but owing to lack of accommodation, their wishes could not be met with. Agricultural and General Education.

"The following was carried on throughout the rural districts of the province, under the direction of Mr. R. P. Steeves, who is director of that department, and there is no doubt but what good results will be obtained. In view of the marked advance that has been made by the government thus far in dealing with school conditions, it occurs to me that the time has come when a more advanced step can be taken and provision made for medical, dental and optical inspection in our schools. Many school children today are laboring with a great disadvantage owing to some ailment which might very easily be corrected. Another most important question is that of the sanitary conditions about our public schools while the inspection as to the safety of these buildings in case of fire should not be further delayed."

Sheep Production.

Dr. Price is referring to the production of sheep called attention to the following statistics: "Sheep population of world—Five hundred and forty-six million head, producing 3,800,000,000 lbs. of wool. "Sheep population of warring nations of Europe—One hundred and sixty million head, producing 960,000,000 lbs. of wool. "Great Britain sheep population—Thirty-two million head, producing 302,000,000 lbs. of wool. "Canada's sheep population—About two million head, producing 12,000,000 lbs. of wool. "New Brunswick in the year 1901 had 182,524 sheep, and in 1914 had 142,141 sheep. Showing a decrease in fifteen years of nearly one quarter million pounds of wool; average weight of fleece 6 lbs. Opportunities for Sheep Raising. Continuing Dr. Price stated as follows: "England has used up to end of 1915 for war purposes: 109,000,000 yards of khaki cloth for uniforms; 3,900,000 under shirts; 15,200,000 trousers; 12,200,000 woolen blankets; 6,800,000 comforters; 5,000,000 pairs of Canadian supply? Golden opportunity for the raising of sheep are afforded in this province. Thousands of acres of land suitable for this purpose are available. That there will be great devastation in the sheep population of Europe because of this war is a certainty. A great demand for wool in European countries will follow the war. Let New Brunswick be prepared to take advantage of this. Sheep will add greatly to the productivity of our soils. In fact, if it were not for the sheep production in England, the soils containing chalk during the past season in procuring and placing with the farmers, small flocks of thoroughbred sheep specially selected for New Brunswick climate.

Bond Issue.

Acting Premier Murray Explains Position of Crown Lands and Announcement of Chief of Forestry Survey—Since is Richer by \$225,000 Annual Collection of Crown Land Revenue Way Referred To—A. R. Slipp Elected Matters in Province.

Mr. Witzell, in reply to the speech from the throne, delivered an eloquent and well thought out speech, in which he pointed out the many important matters for consideration which were before the legislature. He referred to the public works, the valley railway, and the sheep production, and also to the agricultural and general education of the province. He also mentioned the bond issue and the prohibition of traffic in intoxicating liquors.

Permanent Cure of Piles Certified by Minister

Sixteen Years Ago This Man Was Cured by Dr. Chase's Ointment—Had Suffered Keenly for Twelve Years.

You might almost say that there is only one actual cure for Piles and that is Dr. Chase's Ointment. Every day this conclusion is corroborated by reports from persons who had tried one thing and another without success. Some have even been operated on, only to have the old trouble return, and finally to obtain cure by use of this ointment.

ST. JOHN, N. B., FRIDAY, MARCH 10, 1916.

"We are fighting for a worthy purpose, and we shall not lay down our arms until that purpose has been fully achieved."—H.M. The King TO THE PEOPLE OF THE EMPIRE—Every fighting unit we can send to the front means one step nearer peace.

THE VALLEY RAILWAY.

To those who have carefully followed the criticism levelled by opposition newspapers against the new proposals of the St. John Valley Railway, and who, also, have some knowledge of the facts of the case, it is apparent that the whole purpose of the opposition is to distort and misrepresent the action of the Government and the causes leading up to it.

In the first place the criticism is inconsistent both in tone and contention. Up to a few weeks ago opposition newspapers were shrieking for the completion of the railway from Gagetown to St. John at an expenditure of millions of dollars and, at the same time, demanding that the Dominion Government should practice most stringent economy in connection with all public works during the period of the war. In one breath, calling for large and immediate expenditures of public money and in the next demanding that the financial resources of the country should be carefully husbanded. What could any government do to meet criticism so absolutely unreasonable?

It may be pointed out that the objects originally sought by the construction of the St. John Valley Railway were two-fold; first, to provide transportation facilities for the productive portions of the St. John valley not already opened to railways, and second, to secure an independent railway connection between St. John and the Transcontinental Railway which, at that time, was to be leased to the Grand Trunk Pacific Railway Company.

As to the first goal that has been very largely attained by the construction of the line from Gagetown to Centreville, which has been in operation for more than a year, and the most important thing to be done now is to secure connection with St. John. This the Government is arranging to do by the west side route to Westfield, not Westford as incorrectly stated by the opposition press, and from Westfield to St. John, over the rails of the Canadian Pacific Railway. The latter is but a temporary arrangement intended to provide connection with St. John until an independent entrance for the Valley Line can be built. It has already been pointed out that the routing of the line on the western river bank will provide connection with the docks at West St. John and, later, there will be the connection with Courtenay Bay terminals.

Those familiar with the situation know that the returns from that portion of the Valley Railway at present in operation have not been sufficient to meet the interest on the bonds. The extensions outlined will, it is believed, be profitable and to provide these is the most important and, consequently, the first thing to be done.

It has long been realized that the construction of the National Transcontinental Railway from Grand Falls to Moncton was the worst blow this province ever received, yet not a Liberal opposed it. It was the advertised platform of the late Laurier government that the N. T. R. in its entirety would be taken over and operated by the Grand Trunk Pacific Railway Company, but in its construction there was so much shameful graft, theft and waste that operation as a private road was impossible and the company repudiated the bargain. Consequently, operation and maintenance of that road have been thrown absolutely upon the country. Under war conditions it would be an inexcusable waste of money to saddle the country with another railway line which, except for a comparatively few miles, would tap practically the same territory. Whatever benefit St. John can secure by an independent connection with the N. T. R., will be attained by the connection being made at McGivney's Junction by the Canada Eastern with the Valley Railway at Fredericton and thence to St. John.

This benefit can be gained by the west bank route just as easily as by that originally selected and when it is known that the comparative statements of cost show a difference of some \$2,800,000 in favor of the west bank it is the plain duty of the governments interested to save that

money, particularly as it can be done without impairing in any way the efficiency of the road or its value to the country. Objections to such a businesslike proposal arise from some other consideration than that of the country's welfare.

A NEW METHOD NEEDED.

One of the speakers at last evening's recruiting meeting referred to the fact that the Province of Saskatchewan had been asked to introduce a conscription law and expressed it as his opinion that unless results in New Brunswick improve very materially it may be advisable to consider some such development here. An old and trite phrase has it that a bird that can sing and won't sing must be made to sing. Applying this principle to the matter of recruiting, it would be fair to say that a young man who can fight and won't fight should be made to fight. Whether conscription would be the best method of bringing about such a result is an open question. Certainly, it should not be suggested except as a last resort.

There is, however, another plan by which young men might be persuaded to don the King's uniform, a method which would exempt all married men or those with dependent relatives, to whose support they must contribute. If the large employers in this province would manifest sufficient interest in the cause of Empire to enforce a registration of their employees, select from the staff the young unmarried, physically fit men, and put the proposition squarely up to them that if they will not fight in the cause of Empire, they cannot expect to retain employment in an industry being operated under the protection of the Empire flag. The Standard ventures the opinion that there are, in the ranks of the clerks, mechanics and other workers in this province a sufficient number of physically fit young men without family ties to complete all the units now in formation or to be formed. It would not be necessary to take one married man or a man engaged in any undertaking the interruption of which would be a disadvantage to the community.

That the young men are not offering as they should, can be abundantly demonstrated by a visit to the rinks, theatres, bowling alleys, billiard halls, cafes and other popular places of amusement. In the Young Men's Christian Association, for instance, there are classes of young men engaged in physical training of a sort which would prove highly beneficial to them as wearers of the khaki. Why do they still wear gymnasium shoes rather than army boots? A visit to any large business house in St. John will reveal scores of physically fit young men holding positions which, temporarily at least, could be filled by women. The question may well be asked why?

What is the value of nightly recruiting meetings, of such organizations as citizens' committees and others similar in character, if the men prominent in the conduct of these meetings and at the councils of the recruiting organizations do not bring influence to bear on the eligible recruits in the ranks of their own employes or those with whom they are brought most closely in touch?

When the war broke out The Standard office contained thirty-three adult males. To date The Standard's honor roll numbers eighteen names, and others are likely to be added. The departure of those young men has been a serious inconvenience to this newspaper, but in not one case was a dissuading word uttered when they manifested a desire to enlist. We regretfully parted with them and will hold their positions until their return, for this newspaper recognizes the futility of asking others to make sacrifices we are not prepared to make ourselves.

So far the great mass of the business men of St. John have shown lamentable lack of interest in the campaign to secure recruits for the Empire's armies. All the work in connection with the movement has been handled by a very few. And yet the business is one in which every man in this city and province should be vitally interested. Why the apathy?

Surely it is high time for a change of method. Round table conferences and entertaining meetings have failed in their purpose. The time is at hand to take the next step.

BAND INSTRUMENTS PRESENTED TO THE 115TH BATTALION

Interesting function in M. R. A.'s yesterday morning—Mrs. James F. Robertson officiated.

The presentation of the band instruments to the 115th Battalion, by Mrs. James F. Robertson, in a very bright speech, said, on behalf of my husband I take much pleasure in presenting to the 115th Batt., these band instruments. Col. Wedderburn wished that Mr. Robertson would have the presentation in the army where the public might be present and other nice plans were suggested; but Mr. Robertson preferred having those around him whom he said had helped him make his money, and so we are all gathered here as one large family.

Mrs. Robertson spoke of what great help a band was to a battalion and quoted an instance when at one of the battles where the soldiers returning from a long march weary and discouraged, when one soldier procured a toy bugle and drum, which at the sound seemed to put new vim in the men and they marched on and were victorious. It was the one wish of Mr. Robertson that the band should be played for the first time on Sunday at the march out to St. John (Stone) Church, where Mr. Robertson has for many years been a member, and that it would also be a dedicatory service for the band.

Col. Wedderburn, in a very clever speech, thanked Mr. Robertson on behalf of his, the 115th Battalion, and said, when scenes were not as bright to them as now, when they were far away the band would ever remind them of the kind donor and the well wishes that had been expressed. God Save the King was then sung in a very hearty manner and three rousing cheers and a tiser given for Mr. James F. Robertson and followed by, "For He is a Jolly Good Fellow." Three cheers were given for Col. Wedderburn and the 115th Batt. The band headed by Major Peters, with the new instruments, amidst great applause, marched out to German street and back to the army.

Amongst the guests were Mrs. T. E. G. Armstrong and Mrs. H. F. Puddington, daughters of Mr. James F. Robertson, Mrs. Richard Hooper and Miss Hooper.

CANADIAN PATRIOTIC FUND.

The following amounts have been contributed to the fund: Monthly: Wm. Barton, 50c; Rev. F. P. Dennison, \$1.00; H. J. Roberts, \$2.00; H. S. Bell, \$1.00; Mrs. P. Keen, 50c; Jas. EMMA ABBOTT. And Her Songs. The winsome and witching personality of Emma Abbott will always be associated with Balfe's "Bohemian Girl," although she made a great triumph in "La Traviata" and Meyerbeer's "Faust" in London and Paris. Emma Abbott was born in Chicago in 1849, and died in Salt Lake City in 1891. It was her delight to sing selections from "The Bohemian Girl," "I Dreamt I Dwelt in Marble Halls," "The Heart Bowed Down," and "Then You'll Remember Me."

These songs are contained in "Heart Songs"—a collection of 400 of the world's favorite songs. This paper endorses this book and is now distributing it. Read the coupon elsewhere in today's issue.

The Best Quality at a Reasonable Price. 'Phone For A New Lens. That's a feature of Sharpe's Optical Service you'll appreciate. When you break your glasses, if you secured them here, call Main 1677. We have the measurements on file and do not have to wait to see the broken lens before beginning to grind one exactly like it. We'll set a time—ordinarily within three hours—for you to bring the frames in. The new lens will be put in place and your glasses properly adjusted in a few minutes. The charge will be a very reasonable one. You'll like every detail of Sharpe's Optical Service.

A. B. LEGISLATURE OFFERED YES ERDAW

(Continued from page 5)

gratification, for a whole host of people would leave the battle-born fields of Europe to seek a home on this side and New Brunswick as the eastern gateway of Canada would surely welcome and hold a very large proportion of these home seekers.

Mr. Dugal.

Mr. Dugal said he wished to say he was in full accord with what was expressed on the death of Mr. Dickson. The nomination of a French-Canadian speaker was in keeping with the establisment cordiality brought about by events which had stirred the British Empire, and on behalf of his French compatriots he wished to express satisfaction, which he was sure would be felt by all of them.

He wished to express his regrets at the absence of the Premier and Hon. member for Northumberland, Mr. Stewart, through illness, and trusted they would soon be well enough to take their seats in the House. On behalf of the opposition he wished to extend his sincere congratulations to Lieut.-Col. Guthrie and Lieut.-Col. Black, members of this House, for the signal services rendered by them at the front, and in conclusion he expressed his regrets that owing to his lack of command of the English language he was prevented from commenting upon the address as he would otherwise wish.

Hon. Mr. Murray.

Hon. Mr. Murray said he wished to add his testimony to that of the speaker as to the admirable manner in which moved and seconder of the address had acquitted themselves.

Referring again to illness of premier, he said it had been apparent for some time to all those who had been in constant touch with him that he must either take a rest or break down. His high sense of duty, however, and his conscientious scruples would not permit him to give in until he was obliged to, and while it was satisfactory to learn that he was doing well and his health was being gradually restored, he was not yet fit to return to take up active work at the House. Everyone, he was sure, would express hope of premier's speedy return to health.

The late Mr. Dickson's death had also been very eloquently referred to and sympathy of all those who were privileged to know him would go out to his family and friends in the severest loss they had sustained. Members of the House would look back with pleasure to their association with him as one of their number.

Hon. Mr. Murray continuing said it was hardly necessary to refer to any length to the war. He desired to add his tribute to the worth of the services of those members who had been fortunate to return home from the front, and while those returned members would naturally appeal to them, as Mr. Witzell had said, they should not forget New Brunswick boys had gone forth in very large numbers and there was a feeling of considerable pride at their noble conduct. When war broke out, eighteen months ago from the first flung dominions of the empire came the refrain "Aid for England, aid for England." The call had gone forth in Canada for 500,000 men and they would be found just as readily in future as they had been in the past, ready to fight till the cause of right justice and truth should triumph.

The accident which befell His Gracious Majesty while inspecting troops in France was heard with deep regret all over the Dominion and he (Mr. Murray) was sure that in no part of those dominions was the knowledge that His Majesty had now recovered received with greater satisfaction than in New Brunswick.

The death of the late Sir Charles Tupper, though not unexpected, re-

moved an historic figure from the pages of Canadian history. In his time he filled a big place in the making of this country and his death would be felt in many quarters.

As to conditions in the motherland, Canadians should feel thankful that they live in Canada where, notwithstanding trouble and struggles going on in Europe, business goes on just as usual.

There could be no doubt that in the last few years interest in agriculture had developed tremendously, and in this province, particularly, great strides had been made. The loss of five officials of the department, who, from a sense of duty, felt that their place was at the front, had retarded the work somewhat; still, substantial progress had been made. Agricultural education had been developed, and as such education is the basis of agricultural prosperity, and as agricultural prosperity is the basis of all other prosperity, it is a matter for congratulation that interest in agriculture was so greatly increasing.

The activities of the Department of Agriculture have largely increased during the past several years, until today nearly every branch of agriculture is receiving a large measure of attention. From one year 1902 to 1907 inclusive there was spent upon agriculture by the provincial government the sum of \$220,516.11. From the years 1908 to 1915 inclusive there was spent the sum of \$231,107.46, an increased expenditure in the last named six years over the previous years of \$106,591.35.

These amounts were spent from the Dominion subsidy from 1912 to 1915 inclusive \$172,735.46, making a total increased expenditure of \$231,386.91.

For the first period under review, from 1902 to 1907, grants to agricultural societies never exceeded the sum of \$9,000. In the year 1907 the grant for this service was \$8,124.00 to fifty-nine societies. In the year 1915 there were 115 societies with a grant of \$17,000. In 1913 legislation had been introduced which provided for the classification of crown lands into fifty-nine classes, and an amendment to that Act made provision for money necessary for carrying out that work. It had been stated that three hundred million dollars were the amount of annual growth of timber on crown lands, and last year there had been collected stumpage on two hundred and ninety million feet of the province. The objects of the classification of crown land, he might briefly set forth to the house. Forestry survey was being undertaken to ascertain the actual quantity of timber on crown lands; determining rate of growth of different species growing under different forest conditions so that the annual increment may be ascertained; and classification of lands of the province into agricultural and timber lands, depending on whether the soil is best suited for production of farm crops or for timber.

The survey when completed will show areas of merchantable timber, young in growth, spruce, swamp, barrens, amount of timber of each species and an approximate annual growth for each area, or type, area of good agricultural land, land of doubtful agricultural value and land suitable for production of timber only.

A forester has already been appointed to take charge of the survey and the work of organization is going on. As soon as competent men with a necessary technical and field experience can be secured to take charge of parties in the field, actual field work will begin and continue throughout the year with exception of a short time during spring and fall, when field work is impossible. In the selection of men for this work it is the government's duty to secure as far as possible New Brunswick men. The war has drawn heavily on the ranks of trained foresters and it may be impossible to secure all party chiefs from the provinces, by holding crews at the beginning and increasing as new men are trained and become proficient in the work, a maximum of our own men can be utilized. During the present season three or four parties will be in the field employing in all some thirty or forty men, including office staff. These should cover from seventy-five to one hundred square miles per month. As new men are trained new parties will be organized until eight or ten are in the field and thus the work will be completed in from four to five years.

He made this definite statement, as he felt it was a matter of importance to the people and he wanted the House and country to have complete details. The work he felt was very much in the interest of the province of New Brunswick, and the public affairs where forest reserves should be located and would do much toward making it possible to preserve for the future of the province the full benefit which might accrue from its Crown Land wealth.

PROVINCE SOUND FINANCIALLY.

In moving the address in reply to the Speech from the Throne, Dr. Price had referred to the fact that during the last seven years from 1902 to 1908 there had been collected in revenue from Crown Lands \$1,820,368, while for seven years, from 1909 to 1915, inclusive, the amount of revenue received at the Crown Land office reached \$3,883,434. These figures meant that the average income of the Crown Land office during the last seven years of the old regime was \$274,336, while during the past seven years under this government the average income of the Crown Land office was \$551,919. This meant an increase in revenue every year for the province from this one source of \$237,583. In addition a sinking fund had been established consisting of bonuses paid on timber licenses and amounting to \$420,000. The figures confirmed the statement which had been made in the House by Hon. Mr. Grimmer in 1911, to the effect that stumpage was not being collected on the full cut of lumber on Crown Lands and from 1902 to 1908 the province had been losing between \$225,000 and \$250,000 yearly because the old administration had failed in its duty to collect revenue which was properly due the province. And these were the people who are now saying that this government was inefficient and incapable. Reference to the Crown Lands administration alone should be sufficient to convince any thinking man as to the superiority of the administration of the affairs of the province today, as compared with what had been and what would be if the same people were back in power again.

There had been published in the press opposing the government's rumour to the effect that an election was in the air. All he wished to say in this regard was that if that election did come now or a year from now the government would not be afraid to appeal to the people on its record of administration as compared with the failure of achievement of its predecessors. The province's financial position was sound. He would not deal with that subject at any length at the present time nor would he take away anything which might be expected to come from the lips of his hon. friend the Provincial Secretary Treasurer, but he would say that when Hon. Dr. Landry came to place the statement of the province's financial position before the House and a country it would show that by a prudent administration of public affairs this government had been able to satisfactorily carry on the public services and at the same time close the fiscal year with a good and honest balance on hand.

During the present session a bill would be introduced respecting the liquor traffic in the province. Prohibition was now a live question, not only in this country, but throughout the whole world and the government had taken what he believed to be a wise and prudent step in having prepared for submission to the House a bill enabling the electors of the province to adopt a measure providing for prohibition of traffic in intoxicating liquors. This question was above party politics and every hon. member of the House should feel himself in a position to approach it with thorough independent views. He himself believed that the great majority of the people of New Brunswick were in favour of prohibition. The government would bring down a bill that would prohibit the sale of intoxicating liquors in the province. This bill had been framed with the object of absolutely prohibiting traffic in intoxicating liquors and if the people favor it it would become effective on a date to be named.

The Valley Railway.

Respecting the St. John Valley Railway negotiations had been carried on with the federal government and these negotiations had been of a most harmonious character so that an agreement which would be highly satisfactory to the province was now being completed. A bill would be brought down providing for the early completion of the railway and affording not only direct connection with east and west side terminals of the harbor of St. John, but as well an independent route from that city to New England States and a new channel for export of forest products of northern and central portions of the province. Under the arrangement which was now being completed the Valley Railway would be a huge factor in the future growth and prosperity of the province and the development of the enterprise would be such as to redound to the advantage of the people of the province and a credit to this government.

In conclusion he wished to again express his congratulations to the mover and seconder of the address and also to voice his deep personal regrets that Mr. Clarke was unable to be present for the opening of the session, although it was hoped and expected that he would be in the House within a comparatively short time.

There were a number of measures of importance to be considered by the House for its consideration this session and he hoped that these would be given the same careful attention which public matters had received in the House in the past. He believed if the business of the House was carried on systematically and regularly there would be no necessity for the session being unusually prolonged. The government proposed to have the

House sit four afternoons and four evenings each week—Monday, Tuesday, Wednesday and Thursday evenings and Tuesday, Wednesday, Thursday and Friday afternoons. This would make it possible for hon. members to return to their homes each week-end and he believed that the business of the session could all be completed and prorogation reached early in April. The Executive Council would hold daily sessions from eleven until twelve o'clock each morning and any matters for consideration by the government which were presented before eleven o'clock in the morning would receive attention that day. Delegations would also be heard at that time, and at that time only.

Mr. Slipp.

Mr. Slipp continuing the debate on the address congratulated Mr. Speaker upon his elevation to speakership and also mover and seconder of address upon the high order of their speeches. He had felt sometimes that it would be better if there was more discussion of matters which came before the House, and he believed all agreed that if there was more free and frank discussion of public affairs in the House it might be generally beneficial and he felt that he should break the silence.

An unusual situation existed in that one of the members of the House who had been on the firing line in the great war in which the Empire was now engaged was sitting here in council with the rest of the members. Never before, he believed, in the 122 years of the history of this province, had such a state of affairs existed where a veteran of any war had been sitting in the House as a representative of one of the constituencies. While there had been occasion when he and honorable member for York, Col. Guthrie, had not agreed, he wanted to be broad-minded enough to give to that honorable gentleman that very great amount of credit which was due him for all that he had done in enlisting for Empire service and fighting valiantly at the front and was now doing his part in recruiting work in the province. Another one of the members, one of the representatives of Westmorland, had also returned from the firing line for a short time and would, he understood, be here on Monday next and was entitled to the same credit.

He thought it only proper also to bear in mind that there were those unable to go to the firing line, because of physical unfitness or for other reasons, but who had been doing their part and in some cases a most important part. This House ought to keep in mind the encouragement of recruitment, increased production and also greater economy not only in public matters, but also on the part of the people themselves. He thought this was one matter which should be kept before the people, for while not a pessimist, he was one of those who believed that this country would feel the effects of the war much more than any other country, and he believed that the people of this country had risen to the occasion admirably and he had no doubt that they would continue to respond in the same satisfactory manner to the demands which might be made upon it.

Medical Inspection in Schools.

He agreed that as stated in the speech from the throne conditions on the whole had been good in this province during the past year. In his own county of Queens he knew the people had had a most successful year in their three chief industries and particularly was this true of mining and agriculture. In this connection he might mention that mines were being developed recently on a more extensive scale than ever before and that there was a great demand for soft coal for various purposes.

He had been particularly struck with the mention that had been made by the mover of the address respecting medical inspection in public schools. He recognized the fact that he had not been asked to make any suggestion, but even though a back-bencher he would be bold enough to give his views.

He had felt for some time that the school system was too intricate, that there were too many subjects in elementary classes. If the present system were all right it would not be injured by investigation by somebody who was independent of it and he believed that something of this kind should be done because the number of subjects was being steadily increased. Another matter with which he found fault was that there was too much of a tendency in cities to carry scholars along to preparation for universities instead of fitting young men who had to go from common schools to earn their living for their life work.

He would like to have seen some reference to technical education in the speech from the throne, and felt that it was regrettable that Nova Scotia had progressed further in this regard than had New Brunswick while Quebec and Manitoba were other provinces which were to the front.

He was glad to note the assurance that a forestry survey was to be taken up and executed and he regretted that this province was behind other provinces in regard to a modern forestry method. The government, however, was to be congratulated upon the selection of a chief forester to undertake this work. He was a young man well qualified for the task, having been engaged in important work of this kind in British Columbia.

Reference which the mover of the address had made to the sheep industry had been of very great interest to him and had showed that something should be done, not altogether perhaps by the government but by co-operation with the farmers to bring about a proper development of this industry. He believed the right kind of an educa-

tional campaign would soon show the farmers that it was more profitable to keep twenty or thirty sheep than one cow. He believed that there were fine opportunities for success in this branch of agriculture. While great progress had been made in agriculture in this province during the past few years, there should be a much greater development and he felt it was the duty of representatives of constituencies in this House to see what could be done. While he was pleased, as everybody in this province should be pleased, with what has been done, he believed honorable members should try to accomplish more and show the people that they were doing their utmost in the public interest.

Mr. Carter moved adjournment of the debate which was made the order of the day for tomorrow.

Hon. Mr. Morrissey submitted the report of the Department of Public Works.

Hon. Mr. Murray submitted the annual report on Crown Lands Department.

Hon. Dr. Landry submitted reports on schools, Hotel Dieu Hospital, Tracadie, St. Basil Hospital, and that of the chancellor of the University of New Brunswick.

Hon. Mr. Murray submitted a copy of an agreement with J. Douglas Black for reporting debates of the legislative assembly. The agreement was concurred in by the House and the official reporter assigned a seat on the floor of the House.

Hon. Mr. Murray moved that the committee to nominate standing committees consist of Hon. Messrs. Murray, Baxter and Landry and Messrs. Swin and Dugal.

The House adjourned at 5:15 o'clock State Dinner.

Covers were laid for 29 at the state dinner given this evening at the Queen Hotel by Lieut-Governor Wood in connection with the opening of the session of the Legislature. In conformity with the custom adopted last year, for during the war, there was no liquor served nor will there be at other gubernatorial functions during the present session of the House.

The complete list of those who attended tonight's function was Hon. Josiah Wood, D.C., LL.D., Lieut-Governor; Chief Justice McLeod, Hon. James A. Murray, Hon. J. B. Baxter, Hon. John Morrissey, Hon. Dr. J. V. Landry, Mr. Justice McKeown, Mr. Justice Barry, His Lordship the Bishop of Fredericton, Colonel H. H. McLean, M.P., Colonel Powell, A.A.G., Major C. G. Pincome, O. C. Guard of honor; Hon. O. M. Melanson, Dr. O. B. Price, M.L.A., mover of address; A. J. Witzell, M.L.A., seconder of address; Rev. Dr. W. W. Smith, chaplain of the Legislature; Dr. C. C. Jones, Chancellor of the University; Dr. S. Carter, Chief, Supt. of Education; His Worship the Mayor of Fredericton; Mr. W. A. Loudon, auditor general; Mr. J. Howe Dickson, clerk of the Executive Council; Lieut. Col. T. G. Lorge, Deputy Minister of Lands and Mines; Mr. R. W. L. Tibbats, Deputy Provincial Secretary; Mr. Wm. Cruickshank, Deputy Provincial Treasurer; Mr. H. M. Blair, Secretary for Public Works; Mr. J. B. Daggott, Secretary for Agriculture; Capt. H. P. Osborne, A.D.C.; Lieut. F. Dell, Clements, A.D.C.; Lt. Col. Geo. W. Fowier, Mr. J. Bacon Dickson, private secretary.

HOW TO CONTROL NERVOUSNESS AND REMOVE DEPRESSION

If you are constantly keyed up, nervous, perhaps depressed, looked at your over-worked nerves for the cause. They are starving for the nourishment that Ferrozene so quickly supplies. Besides its tonic action on the nervous system, Ferrozene has marvelous blood-forming properties. It thus supplies strengthening materials to every nook and corner of the body and brings the system to a condition of perfect health. To be strong, to eat well, and work long without fatigue, use Ferrozene; it is the best nerve system tonic known. At all dealers in 50c. boxes.

QUOTATIONS IN THE ST. JOHN MARKETS

There have been many changes in the wholesale prices of commodities during the present week, the most noticeable being a slump in flour. Manitoba was quoted yesterday at the rather low price, considering the state of the market, of \$7.35 per barrel. Ontario flour was sold at \$6.80. Sugar advanced 1/2c during the week in all grades. Beans have increased in both demand and price. Cream of tartar is dearer, as are cleaned currants. Molasses, now about as clear as fish, increased about 2c. Canadian mess pork is up 50c.; American clear \$1. Lard, both pure and compound, is on the up line. Cheese is a trifle dearer, price, but turpentine is down 5c. Late quotations are here given:

1915 HARVEST MORE THAN DOUBLE THAT OF PRECEDING YEAR

Final Crop Report Beyond Expectations of Most Optimistic.

TOTAL YIELD WAS 376,803,600 BUSHELS

Surplus for Export placed at 264,000,000 bushels—Acreage increased 26 per cent during 1915.

The January issue of the Census and Statistics Monthly issued by the Dominion Government contains the final estimate of the yield and value of Canadian Field Crops of 1915. These final returns show a market increase over previous estimates so that expectations which were formed of the abundant harvest have been more than realized. Preliminary estimates at the end of August placed the yield of wheat at 308,000,000 bushels. At the end of September this estimate was increased to 350,000,000 bushels, but the final return shows the splendid total of 376,803,600 bushels which is more than double the harvest of 1914, and nearly double the annual average yield for the five years, 1910-1914.

The official estimates of the Dominion government for the three North West provinces were in August 275,000,000 bushels; September, 304,000,000 bushels, and December, 342,485,000 bushels. The Canadian Pacific estimated in August 220,000,000 bushels, and the Western Canada Flour Mills placed the crop at 300,000,000. "The Grain Growers' Guide," evidently conservative, put the figure down at 212,000,000 in August, but in November jumped to an estimate of 342,000,000.

264,000,000 Bushels for Export.

In the light of these final returns the exportable wheat surplus of Canada is now placed at 264,000,000 bushels, which is more than 100,000,000 bushels greater than the whole production of 1914. It is a noticeable fact that for the first time the exportable wheat surplus of Canada is more than is necessary to supply the wheat deficiency of the United Kingdom. What Canada has done in 1915 by increase of acreage combined with an abundant harvest can be repeated in future, and the British Isles may reasonably feel secure in respect to a food supply within the Empire.

In wheat the increased acreage in 1915 amounted to 26 p. c. in oats there was an increase of 12 p. c. while smaller increases were also shown in barley, rye, mixed grains, fodder grain and alfalfa, while sugar beets of 48 p. c. There were also slight reductions in peas, beans, buckwheat, flaxseed, corn, turnips and hay. The average yield of all wheat in 1915 was 15.67 bushels per acre and 81.2 bushels, an 85 per cent. increase in production over 1914.

N.S. STEEL ACTIVE ON MONTREAL MARKET

Action of Market satisfactory yesterday and money offering freely—Some London Stocks offered.

(McDOUGALL & COWANS.)

Montreal, March 9.—The action of the market today was very satisfactory. N. S. Steel and Peter Laysal were more active. Steamships Pfd was in good demand selling up to 76. There was a good demand for bonds. Money is offered freely and will have to seek investments ultimately. The New York market was very strong in the early part of the afternoon, later reacted slightly although most stocks closed higher than last night. As we said in our morning message, earnings are bound to tell ultimately. Most of the companies today are working at full capacity and 1916 will be a banner year with most of them. London were offering a few stocks on our board today.

ENTIRE STOCK LIST SHARED IN THE ADVANCE

Trading Yesterday On Wall St. on the Largest Scale in Weeks.

GERMAN EXCHANGE SLUMPS TO 72 3-8

Steel shares rose two to five points, with advance of 7 in Bethlehem to 484.

New York, March 9.—Taking today's market as a criterion, Wall Street, or at least the speculative fraternity, seemed to have recovered from the alarm occasioned by recent political and diplomatic controversies. Trading was on the largest and broadest scale of recent weeks and almost wholly on a rising scale of values.

All quarters of the share list participated in the advance, which gathered force with the progress of the session, despite considerable realizing for profits. Specialties again scored the most substantial gains, the metal group being particularly prominent.

American Zinc rose five points to the new record of 88 1/2, and Greene Canada Copper also made a new maximum on its rise of 3 1/2 to 53 3/8.

Shares of the independent steel companies, as well as equipments, motors, oils, fertilizers and Mercantile Marine preferred, rose from two to almost five points, while various sundry issues of no special description were appreciably better. Lackawanna Steel was foremost of the war stocks, rising 3 3/8 to 78 1/2.

Perhaps the most impressive and helpful feature was the steady advance of United States Steel, which gained 1 1/2 to 84 1/2 on transactions ranging from 1,000 to over 4,000 shares. Steel's strength was attributed to yesterday's announcement of an expansion of the corporation's operations, and presumably in anticipation of tomorrow's tonnage statement for February, which is expected to show a material increase in unfiled orders. Incidentally, Bethlehem Steel on offerings rose 7 1/2 to 84.

Texas Company led the petroleum, which were unaffected by reports of further disturbances of Mexican origin. Ralls were higher by one to two points, with the exception of New Haven, which was weak in the early trading on suspension of its proposed freight rates by the Interstate Commerce Commission, (but recovered later).

Germany's declaration of war against Portugal became known in the final hour, and contributed to the general shading of prices toward the end of the session.

Total sales amounted to 710,000 shares. Exchange on Germany fell to the new low rate of 72 3-8, hardening a trifle at the close.

Bonds were irregular, with total sales, par value, \$2,400,000.

CLOSING LETTER OF N. Y. MARKET BY E. & C. RANDOLPH

(McDOUGALL & COWANS.)

New York, March 9.—The market continued active and strong through out the day with only slight recessions from the high prices in the late trading. Steel common was the leader and advanced a point on the announcement of liberal construction plans in the morning papers and the expectation that a good showing will be made in unfiled tonnage which will be reported at noon tomorrow. The Steel Corporation now has the largest amount of orders on its books in its history, and is operating at full capacity.

A better feeling in regard to the international situation although there was no additional news from Washington, was generally considered the cause of the up-turn in prices. There is no doubt that the uncertainty in this matter has been a restraining factor in the market for a long time past, but it is also probable that accumulated evidence of business improvement in practically all lines and the expectation that large additional war orders will be placed before very long are market factors that cannot well be disregarded.

Sales, 702,262. Bonds, \$2,365,000.

Thursday, 1916, were \$1,675,824; for the corresponding week last year, \$1,696,732.
 Winnipeg. Winnipeg, March 9.—Bank clearings for the week ended today were \$30,013,342; for the corresponding week last year, they were \$24,216,611 and in 1914, \$21,946,503.
 Toronto. Toronto, March 9.—Clearings of banks in Toronto for the week ended today, with comparisons, were as follows: Week ended today, \$42,092,332; last week, \$43,492,729; corresponding week, 1915, \$33,950,103; corresponding week, 1914, \$38,810,715.
 Montreal. Montreal, March 9.—Bank clearings in Montreal for the week ended today were \$58,130,283 as against \$45,026,738 for the corresponding week in 1915, and \$50,735,239, in 1914.

WILSON'S "The All-Time Favorite"
BACHELOR CIGAR
 Can you tell a really good cigar? Most men can. That's why the "Bachelor" enjoys the largest sale of any high-grade cigar in Canada. Quality tells.
 For Your Protection Every "Bachelor" Cigar is stamped as above.
(ANDREW WILSON & CO. TORONTO MONTREAL)

THE BOAT POSTPONED.
 March 9, 1916.
 To Sporting Editor—Manchester.
 Sir—I wish to notify the sporting public of St. John, that owing to a heavy cold which I contracted during my training for my bout with John Sullivan on the 12th inst., that I will have to postpone it till a later date. A lot of people may think the cold is in my feet. But no, I want to be in good condition so as to give people a run for their money, and also be able to say Sullivan is the best man if he wins, and not blame my condition for it.
 I remain yours truly,
 KID BURNS.

A Column Which Is Supposed To Be Of Interest To Women

Herein are Related Facts and Fancies Concerning the Activities of Individuals and Organizations, the Home, Fashions and Other Matters.

NEWS OF WOMEN'S CLUBS.

We are always pleased to receive any news of Women's Societies, fashion notes, new or tried recipes, etc., which may be of interest to our readers and we will publish same when suitable. All communications for these columns to have name and address (not for publication), and to be addressed to the Editor, Women's Column, The St. John Standard, St. John.

Art Club.

Last evening Mrs. John M. Lawrence read a most interesting paper before the Art Club in their rooms. Peel street, on The Louvre. The evening was to have been devoted to French art but falling the lecturer, on the subject Mrs. Lawrence kindly consented to read a paper written on this subject and a very full and comprehensive paper it was. Having seen the pictures the lecturer was able to describe them in detail and appropriate quotations were introduced. Mrs. Lawrence gave a history of the Louvre, saying that the origin of the name is not known and tradition gives several different ways that it may have originated. Its authentic history begins a half century before the Cathedral of Notre Dame was finished. Built by King Philippe Auguste and in the 14th century used by Charles the Wise as a palace, lived in by kings, added to and finally used as a stable in the revolution. It has seen many changes. It was restored by Napoleon the Great and today is the greatest picture gallery in the world containing 3,000 pictures. The beauties of the buildings were illustrated by views, one particularly lovely one being the gallery of Apollo, said to be the most resplendent interior in the world. The Winged Victory niche is seen as one ascends the grand staircase. Views were shown of pictures by Botticelli, Da Vinci, Raphael, Van Dyke, Velasquez, Murillo and painters of the French school as Watteau, Nattier, Greuse, David. The last picture shown was the Venus de Milo. The audience were most appreciative and Mrs. Lawrence was heartily thanked for her delightful "talk" on the Louvre.

W. C. T. U.

The weekly meeting of the St. John Women's Christian Temperance Union was held in the room at the Germain street, on Tuesday afternoon, and in spite of the storm there was a good attendance. The devotional exercises were conducted by our president, Mrs. Hipwell, whose subject was taken from the 13th chapter of 1st Corinthians. Roll call was answered by verses of scriptures, the minutes of last meeting were read and approved, followed by reports from hospital and other committees. A poor family had been provided with coal and groceries. We were privileged to have the Rev. W. D. Wilson, field secretary of the Provincial Temperance Alliance, with us. He gave us a very interesting address on the object of his work. Mr. Wilson is a very pleasing speaker. He told us he remembered as a boy seeing his mother going to the union at his old home in Scotland. The union resolved to help our brother worker in every way possible. A communication was read, asking the union to send themselves as an auxiliary to

help work of the citizens' committee, and the St. John Temperance Alliance. It was resolved to form such an auxiliary. The meeting closed with the Miraph benediction.

Good Food for Children.

Occasionally we hear a mother say, "I simply cannot persuade my children to drink milk, and I have given up trying to force them." She is right, forsake the forcible methods, but if others realized the value of milk in their children's diet they would never cease contriving ways and means to get this most valuable liquid into their stomachs.

Milk contains all of the ingredients needed, for nourishment—that is, it contains the materials which build up the little bodies, repair the waste which goes on, keep them warm, furnish them with power to play and do their school work when that time comes.

Very rarely we find a child who cannot digest cow's milk, but ordinarily the distaste is due to some fancy or notion which may be readily overcome.

One wise mother tried the plan of buying a soda water, glass and some straws and the milk drinking instantly assumed the form of a favorite beverage, and tasted "just loads better."

Often a child will rebel against plain milk, but will eat custards, corn-starch, puddings, junket and will not object to an abundance of milk or cream on cereals.

Here are menus for the growing child, furnished by a food expert, which may be helpful in selecting and balancing the diet:

Breakfast—A plate of well cooked cereal with sugar and cream. Then a soft boiled egg, a couple of slices of bacon, or a bit of creamed codfish, with plenty of whole wheat bread and butter, a little jam or marmalade, milk or cocoa, made with only enough of the cocoa to color, and lastly fruit, which is best in the form of apples, oranges or grapes, according to the season. The starches, food or cereal should be served first and the fruit last.

Dinner—Soup made with meat stock if the stock is allowed to stand and all the fat skimmed off when it is cold, otherwise cream soups are better; meat, preferably chicken, chop, or fresh fish (as these are not so stimulating as beef) cooked without grease, a baked potato, a fresh vegetable (green vegetables should be given in abundance), with a simple sweet dish as dessert. Sweets should always be given at the end of the meal.

Supper—Whole wheat bread and butter, stewed fruit or some simple preserve, milk or cream. For variety gelatin puddings, such as custards of gelatin puddings, sponge cake or oatmeal cookies.

Wings are used to trim the smart silk or linen-covered suitors.

The simple standing collar appears in lace as well as silk.

Wide taffeta ribbons are gathered in countless ruffles and puffs.

Large hats are likely to be popular rivals of the little hats.

All afternoon and motor coats are very wide around the foot.

A great deal of floral and ribbon garniture is seen on millinery.

Large flat collars of the sailor and Puritan variety are in vogue.

Very long, close-fitting sleeves are finished at the cuff with a white lingerie frill.

The British Army.

The members of Alexandra Temple of Honor No. 6 heard two good papers last night on the British army. One by S. C. Webb on the army since its inception until the present, and the other by Lieut. Roy F. Bell on the make-up of the army as it exists today. Lieut. Bell took up the different branches of the service and gave the numbers comprising each unit and the nature of the work they had to do. He dealt with the engineers with their two classes, field and bridge train. He next described the various artillery units and their work, the cavalry, the infantry and the Army Service Corps.

Feet Aren't Aching Or Tired Now--"TIZ"

Use "Tiz" for tender, puffed-up burning, calloused feet and corns

"New TIZ" does help sore feet.

People who are forced to stand on their feet all day know what sore, tender, aching, burning feet mean. They use "Tiz" and "Tiz" cures their feet right up. It keeps feet in perfect condition. "Tiz" is the only remedy in the world that draws out all the poisonous excretions which puff up the feet and cause tenderness, sore, aching feet. It instantly stops the pain in corns, callouses and bunions. It is simply glorious. Ah! how comfortable your feet feel after using "Tiz." You'll never limp or draw your feet in pain. Your shoes won't tighten and hurt your feet.

Get a 25-cent box of "Tiz" now from any druggist. Just think, a whole year's foot comfort for only 25 cents.

Wordly Wisdom.

A winter imperialist—Old King Coal.

If you are in a hurry avoid the train of thought.

Some men value outward show more than inward worth.

Envy is an acknowledgment of the good fortune of others.

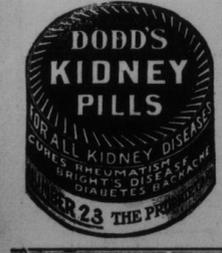

The plain, unvarnished truth is better than questionable rhetoric.

Style Notes.

A few styles of button-in-the-back waists are shown.

Bows and floating ends appear on some of the new hats.

Sometimes both the coat and skirt of a suit are box plaited.

SEATS ON SALE NOW

CHILD'S STOMACH BECOMES COATED, IF CONSTIPATED

When cross, feverish and sick give "California Syrup of Figs."

Children love this "fruit laxative," and nothing else cleanses the tender stomach, liver and bowels so nicely. A child simply will not stop playing to empty the bowels, and the result is, they become tightly clogged with waste, liver gets sluggish, stomach sour, then your little one becomes cross, hot, sick, feverish, don't eat, sleep or act naturally, breath is bad, system is full of cold, has sore throat, stomach-ache or diarrhoea. Listen, Mother! See if tongue is coated, then give "California Syrup of Figs." and in a few hours all the constipated waste, sour bile and undigested food passes out of the system, and you have a well, playful child again.

Millions of mothers give "California Syrup of Figs" because it is perfectly harmless; children love it, and it never fails to act on the stomach, liver and bowels.

Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which has full directions for babies, children of all ages and for grown-ups plainly printed on the bottle. Beware of counterfeits sold here. Get the genuine, made by "California Fig Syrup Company." Refuse any other kind with contempt.

Death of Little One.

Victor Norman, infant son of Mr. and Mrs. Andrew Babin, died at his parents' home in Canon street on Wednesday afternoon. The funeral took place yesterday afternoon at 2.30 o'clock. Interment took place in the new Catholic cemetery. The sympathy of many friends will be extended to the bereaved parents.

J. T. Currie.

The death of John Thomas Currie occurred yesterday morning at his residence, 65 Richmond street. Mr. Currie was 67 years of age. He was a native of Scotland and came to St. John over thirty years ago. He was a staunch member of the Presbyterian church in West St. John, and a member of the choir. He was also an active member of the Carleton Curling Club. He is survived by a wife, four sons, three daughters and one sister, Mrs. Charles McCluskey of East Boston.

William Ruddock.

Many will learn with regret of the death of William Ruddock, which occurred at his home in West St. John. The deceased, who conducted a carriage business in West St. John, was a native of Scotland and came to St. John over thirty years ago. He was a member of the Presbyterian church in West St. John, and a member of the choir. He was also an active member of the Carleton Curling Club. He is survived by a wife, four sons, three daughters and one sister, Mrs. Charles McCluskey of East Boston.

END INDIGESTION OR STOMACH PAIN IN FIVE MINUTES

"Pape's Diapepsin" makes sick, sour, gassy stomachs feel fine.

Time it! In five minutes all stomach distress will go. No indigestion, heartburn, sourness or belching of acid, or eruptions of undigested food, no dizziness, bloating, foul breath or headache.

Pape's Diapepsin is noted for its speed in relieving upset stomachs. It is the surest, quickest and most certain indigestion remedy in the whole world, and besides it is harmless.

Millions of men and women now eat their favorite foods without fear—they know Pape's Diapepsin will save them from any stomach misery.

Please, for your sake, get a large six-cent box of Pape's Diapepsin from any drug store and put your stomach right. Don't keep on being miserable—life is too short—you are not here long, so make your stay agreeable. Eat the way you like and digest it; enjoy it, without dread of indigestion or stomach pain.

Pape's Diapepsin belongs in your home anyway. Show one of the family out something which don't agree with them, or in case of an attack of indigestion, dyspepsia, gastritis or stomach derangement at day-time or during the night. It is handy to give the quickest, surest relief known.

OBITUARY.

George F. Morris.

The death of George F. Morris, for some years engaged in the provision business, occurred yesterday at his residence, 17 Winslow street, West St. John, after about six months' illness. Mr. Morris came to this country from England about twenty years ago and had resided here since. He leaves besides his wife, four brothers and three sisters, only two of whom are resident in Canada. Fred Morris, a brother, lives here, and a sister, Mrs. Edward Simmons, resides in Toronto. The late Mr. Morris was in his sixty-sixth year.

Mrs. Catherine Scott.

Ellsworth P. Scott, of 212 Millidgeville avenue, this city, received a telegram Wednesday announcing the death of his mother, Mrs. Catherine Scott, at the home of her daughter, Mrs. Alvin Sheridan, Cambridge, (Mass.), with whom she had spent the winter. Besides Mr. Scott and Mrs. Sheridan, Mrs. Scott leaves seven children. They are Charles, Hedy and Lester, of Portland (Me.); Melbourne, of New Haven (Conn.); Robinson, at Sumnerville, Queens county; Mrs. Berkeley Morris, of New Haven; and Mrs. Fred Purvis, of Fredericton, J. M. Queen and Wendell Queen, of St. John, are nephews. Mrs. Scott's husband died nine years ago.

The body of Mrs. Scott will be brought to St. John and taken to Summerhill, Queens county, for burial. She had a great number of friends, who will hear of her death with keen regret.

James Brayden.

Many friends in St. John will learn with regret of the death of James Brayden, which occurred Sunday,

NEWS OF THE ST. JOHN THEATRES

Who's Who and What's What in the Picture Game and on the Stage—Film Favorites and What They Say and Do.

Damon and Pythias.

Damon and Pythias at the Opera House yesterday portrays the story of the world's greatest friendship. These two names with David and Jonathan have become synonyms for friendship and this picture could easily have for its title "Greater love hath no man than this." Each man might stand for Kipling's "Thousandth Man." It is a magnificent picture, well acted and wonderfully staged. All the principal characters are well taken, even to Damon's little son. The stage and battle scenes are as good as those in "Judith Bethulia," and that is saying a good deal. There are anxious moments when the audience fears that Damon will not return in time, or rather will be prevented from returning, for it is their mutual love and devotion that is so inspiring. It is a good picture for everyone to see.

CURTAIN FLASHES.

Ahnetta Kollerman's latest hobby is hydro-aeroplaning.

J. Warren Kerrigan has a postage bill of about \$100 a month.

Cleo Ridgley and Wallace Reid have gone to the Mojave desert with Paul Dickey, director, to film scenes for the Jesse L. Lasky production of "Under the Mask," written by Cecil B. De Mille and Jeanne Mather.

Moving pictures have taken well in Australia, and two new film productions, concerns have been formed in Sydney, N. S. W.

"Macbeth," which John Emerson is directing at the Fine Arts studio, with Sir Herbert Beerbohm Tree and Constance Collier in the leading roles, will probably be completed in eight or nine weeks and handled as a special feature, independent of any programme.

Many people will be glad to see the stage instead of the screen at the Opera House next week, and "Bring Up Father" will doubtless attract many. It will be interesting to see how the creations of an artist are portrayed in real life.

Alexander Gaden, of the Gaumont Company, who played The Drifter at the Lyric, had played over 500 parts on the legitimate stage before going into pictures.

Theda Bara received 91,250 letters during the last year. Hereafter she is going to file all letters received alphabetically in two divisions—one for love letters, the other for humorous ones.

Humorous might describe them all, we would think.

Robert B. Mantell's favorite form of exercise is horseback riding.

Blanche Sweet, who has appeared as a ragamuffin, an anarchist, a drug fiend and a mesmerist's subject, among other roles, is to be "a lady" in the coming Lasky adaptation of Henry Seton Merriman's novel, "The Sowers," a Russian political story.

A Japanese merchant, charmed by Margaret Gibson, whom he saw in "The Soul's Cycle," sent her a little yellow ivory elephant with diamond eyes and gold tusks.

Virginia Pearson's book "The Book of Knowledge of the Movies," will soon be completed and will be distributed free among young people with photoplay aspirations.

"I'm willing to take chances, and I'm willing to do anything for the sake of realism," said Agnes Vernon (we quote the University City facilitator of publicity) and as she said it she splashed another god of blue and yellow paint on her face.

In many of the scenes the big tramped lion Leo, of the E. & R. Jung Film Company's zoo, plays a very important part. It required but a short time for the king of the jungle to be acquainted with Mr. Hopper, Fay Tincher and other members of the "Sunshine Dad" cast, and they have appeared in scores of scenes since. Leo took a decided liking to Direc-

CHILD'S STOMACH BECOMES COATED, IF CONSTIPATED

When cross, feverish and sick give "California Syrup of Figs."

Children love this "fruit laxative," and nothing else cleanses the tender stomach, liver and bowels so nicely. A child simply will not stop playing to empty the bowels, and the result is, they become tightly clogged with waste, liver gets sluggish, stomach sour, then your little one becomes cross, hot, sick, feverish, don't eat, sleep or act naturally, breath is bad, system is full of cold, has sore throat, stomach-ache or diarrhoea. Listen, Mother! See if tongue is coated, then give "California Syrup of Figs." and in a few hours all the constipated waste, sour bile and undigested food passes out of the system, and you have a well, playful child again.

Millions of mothers give "California Syrup of Figs" because it is perfectly harmless; children love it, and it never fails to act on the stomach, liver and bowels.

Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which has full directions for babies, children of all ages and for grown-ups plainly printed on the bottle. FEET AREN'T ACHING OR TIED NOW--"TIZ"

Use "Tiz" for tender, puffed-up burning, calloused feet and corns

"New TIZ" does help sore feet.

People who are forced to stand on their feet all day know what sore, tender, aching, burning feet mean. They use "Tiz" and "Tiz" cures their feet right up. It keeps feet in perfect condition. "Tiz" is the only remedy in the world that draws out all the poisonous excretions which puff up the feet and cause tenderness, sore, aching feet. It instantly stops the pain in corns, callouses and bunions. It is simply glorious. Ah! how comfortable your feet feel after using "Tiz." You'll never limp or draw your feet in pain. Your shoes won't tighten and hurt your feet.

Get a 25-cent box of "Tiz" now from any druggist. Just think, a whole year's foot comfort for only 25 cents.

High School Alumnae.
The High School Alumnae met last night at the residence of Mrs. J. V. Ellis, Princess street. It was an evening in France, and one of the members delivered an interesting lecture on that nation. The lecture was illustrated with views shown by Frank B. Ellis. The alumnae is planning to hold a tea in the near future, the proceeds to go in aid of the prisoners of war in Germany.

Y. M. C. A. Directors Meet.
The regular monthly meeting of the Board of Directors of the Y. M. C. A. was held last night. The president, F. A. Dykeman, was in the chair and a goodly number of the directors were present. Reports of an encouraging nature were received from the different departments and several matters of a routine nature were discussed. The report of the committee who had in charge the special effort to raise \$5,000 showed that about one half that amount had been secured and it was proposed to make an effort in the near future to secure the balance.

Soldiers Entertained.
Last evening in the social room of St. Andrew's Presbyterian church about two hundred members of the 115th Battalion were entertained by the Men's Association. The following musical program was thoroughly executed after which refreshments were served to the boys of the 115th.

Recovered Stolen Goods.
Detectives Barrett and Briggs have never let up on the Moore case, where it is alleged that John Moore stole a large number of articles from Joseph Williams, a blacksmith on Bridge street. Yesterday they recovered a number of articles from the blacksmith shop of David Arbo, which is situated near the Williams shop. It is alleged that these articles have been stolen from the Williams shop by Moore. Moore has been committed for trial and he is now facing another charge, that of collecting \$50, the property of Williams, and not turning it over to the owner.

Farewell to Soldiers.
There was a happy gathering at the home of Colin C. Corkum, 165 St. James street, last night. C. Fraser McTavish was chairman, and the occasion was a farewell to Gunners Corkum and Holder and Bombardier Troop of the Siege Battery, who have enlisted and are in training for overseas duty.

The Police Court.
In the police court, yesterday afternoon, Private Raoul Goyette, charged with raising a pay cheque from \$5 to \$15, pleaded not guilty, stating that he was intoxicated at the time and knew not what happened. The prisoner was sent up for trial. At the morning session of the court Private Frank Doucette was fined \$20 for fighting in the Union Depot. Carroll Johnson and Wm. Bladden, two seamen, charged with desertion from a steamer in port, were ordered on board. A case could not be proved against a Newcastle woman charged with a statutory offence, and she was allowed her liberty, to return home with her husband and two children.

You should skate at the big carnival next Tuesday and win a prize. Last carnival this season. Get ready.
Band at the Victoria rink tonight.

PILOT BOATS HAD TERRIBLE NIGHT IN BAY

"Howard D. Troop" and "David Lynch" Out in Heavy Storm.

Reached port in safety yesterday, but it was only after night of grave peril.

When persons on the harbor front see pilots of the port of St. John entering harbor in charge of a ship, they little realize the dangers and hardships which these men have to experience while in the Bay cruising about looking for ships.

The winter months are the most trying on the nerves of these hardy mariners, and this winter has proven the worst for many years. All hours of the day and night, during calm and rough weather, snow, rain or gales of wind, the pilots cruise about the Bay, principally in the vicinity of Bear Island, keeping a sharp lookout for incoming ships.

When one is sighted and signalled, a small boat is launched from the pilot schooner, and on nearly every occasion, during rough weather, the task of boarding a ship is most dangerous.

The pilot schooners Howard D. Troop, and the David Lynch were out in the Bay Wednesday night, and those on shore who had occasion to leave their homes during the time that there was a heavy snow storm, driven by a gale of wind, will readily realize what kind of weather it would be in the Bay of Fundy. The two pilot boats mentioned were out in the storm all the time. In fact it is stated that their crews never before experienced such weather, and when they entered port yesterday morning the pilots and crews were almost worn out by the hardships they had been forced to endure.

With a thick blinding snow storm those on board the pilot boats could see but a few yards ahead of them. The gale lashed the seas in the Bay into mountains of water, and so fierce was the storm that it was only by the most careful handling the pilot boats managed to weather it.

Sea after sea would break over the vessels, but those on board were experienced, and handled their craft well. Anything that was not lashed down on deck was soon washed overboard, and under short canvas the pilot boats plunged and tossed, but both the Troop and Lynch were staunch and fought their way through the storm. One particularly large sea broke over the Lynch, and when the vessel shook herself clear of the tons of water it was found that a small boat and two casks of gasoline had been torn from their lashings and had been washed over the side and lost. The vessel also lost one of her jibs. The Troop did not lose anything, but a mountainous sea that crashed aboard flooded her cabin and soaked everything in there. It was certainly an awful night at sea, but the two schooners weathered the storm and arrived in port safely.

EIGHT MORE NAMES ON THE HONOR ROLL

American who has donned King's uniform chief speaker at last night's meeting.

Others join The Standard in complaint against postal service.

Additional instances where money sent to this office failed to reach destination.

A man came into The Standard office yesterday and said that for months there has been scarcely a day on which he had not heard some kick about the postal service. A lady who has occasion to use the mail service to a very considerable extent states that when we run out of ammunition on our own account she will be pleased to furnish us with interesting particulars of bungling in the service which has caused her considerable inconvenience and annoyance.

In the meantime Mrs. John Miller of Bristol writes under date of March 8th: "I mailed a letter on Feb. 22nd, enclosing a post office order for \$1.15 and five coupons for a copy of Heart Songs. I have not received the book. Will you kindly send it at once or let me know the cause of the delay."

The cause of the delay is that Mrs. Miller's letter has never reached The Standard office, her request for the immediate despatch of the book being the first communication this paper has received.

Continuing the good work referred to yesterday, Mrs. Bertha Waite of Andover, N. B., mailed to The Standard on Jan. 24th a letter containing \$1.35. This letter has not been received. Nor is there any word whatever of a letter mailed on Jan. 22nd, by Mrs. Hazel I. Carroll of Carroll's Crossing, N. B. This should have reached The Standard on the following day and The Standard would of course have been pleased to get it for it contained \$1.13, but it has not come to hand. There Mrs. J. E. Fowler of The Narrows, Queens county, not a very great distance from St. John, also mailed on Jan. 28th a letter containing money which has never been received.

Going back a little further, H. C. McKay of Penfield, for many years a subscriber to The Standard, mailed on Nov. 8th a letter containing three dollars to renew his subscription. This letter is somewhere on the road, at least no other inference can be drawn, for it has not yet come to the office to which it was addressed, and Mr. McKay is out three dollars. On Nov. 18th, Thomas Lison of Sussex, forty-five miles away from St. John, mailed a letter to The Standard containing three dollars which has evidently gone in the same direction as Mr. McKay's. The same thing happened in the case of P. J. McIntyre of Chatham, who on another day in November mailed a letter to The Standard containing three dollars. Mr. McIntyre's letter is no doubt earnestly chasing those mailed by Mr. McKay and Mr. Lison. This list of missing remittances will be continued tomorrow and the next day and for a considerable number of days thereafter, for enough of these incidents have occurred during the past few months to make a readable report every day for quite a while.

MORE LETTERS THAT HAVE NOT COME TO HAND

WINNIPEG BIGAMIST WILL BE TAKEN BACK

Officer arrived yesterday for Arthur William Poulton, arrested here some days ago.

A police constable from Winnipeg arrived in the city yesterday with a warrant for the arrest of Arthur Wm. Poulton, charged with bigamy. The western official has his warrant backed and will leave on the express this afternoon for Winnipeg, taking Poulton with him.

Chief of Police Simpson recently received a telegram from the provost marshal of Winnipeg stating that Poulton was bound east and almost due to arrive in St. John, and if he could be placed in custody on the charge of bigamy, and a constable would be sent after him. On Wednesday, March 3rd, Poulton arrived in West St. John with a company of soldiers. Acting on instructions from Chief Simpson, C. P. R. Sergeant Stevens placed Poulton under arrest, and handed the prisoner over to the local officers. Poulton admitted that he had two wives alive. He took his arrest coolly and is said to have remarked that his second wife is a fine woman. **SATEEN UNDERSKIRTS.** It is an unusual thing in these days of high prices for everything, to find goods being sold at less than the usual price. F. A. Dykeman & Co. have secured fifty dozen ladies' undershirts, made from a fine quality of English sateen, of a soft silky finish. They are made with a very attractive fluted flounce. The firm purpose selling these at 89 cts. each; the regular price is \$1.25. They come in a very large assortment of colors and in all sizes.

POLICE LAND BOY THIEVES

Three lads arrested for stealing from vessels and other captures expected to follow.

Some time between Saturday evening and Sunday morning last, some persons broke into the steamer Hampstead, the tugboat Latona, the schooner Ravola, and James S. Gregory's blacksmith shop near the Hill yard wharf, North End. The windows and doors on the vessels were smashed, articles in the cabins were thrown about and considerable damage was done. The breaks were reported to police headquarters. Detectives Barrett and Briggs were sent out on the case, and last night, between 11:30 o'clock and midnight, were successful in arresting three youths on suspicion of being the culprits. The prisoners, who are about 16 years old, are Thomas Bark, Arthur Kennedy and Fred Gallagher, all residing on Sherif street. They were taken in custody and locked up in cells at police headquarters. It is anticipated that the other boys are implicated in the breaks and other arrests are expected this morning.

We fill orders for lodge, church and sleighing parties. Save your wife the trouble and get your dinner with us.
Band at the Victoria rink tonight.

DENIED APPLICATION FOR HABEAS CORPUS

Chief Justice McLeod refuses attempt to remove Mason girl from Evangelical Home.

Urban J. Sweeney, counsel for Mrs. Mason, who charged C. B. Howard, agent of the Children's Aid Society, with abducting her daughter, yesterday made an appeal to Chief Justice McLeod for a writ of habeas corpus for the purpose of having the Mason girl removed from the Evangelical Home, where she was placed by Mr. Howard. The Chief Justice refused to hear any argument by Mr. Sweeney. Judge Armstrong, it is expected, will complete his investigation into the Mason case today.
