DISTRICT AND GENERAL

Sugar retailers in Kansas City at 32
cents a pound.

Customs returns for April will total
over six million dollars more than a
year ago.

There is every prospect of an im-
mense apple crop throughout Ontario
this year.

The tax rate for Amherstburg for
the year will be 50 mills, the highest
of any municipality in Ontario.

An increase in the auto license grad-
ing system for different types and
sizes of cars may be expected next
year.

Voting hours in provincial elections
hereafter are to be from 8 o'clock in
the morning until 6 o'clock in the
evening.

At a meeting of the tobacco growers
at Blenheim it was pointed out that
there was 5,000,000 pounds of the 1919
crop of tobacco still unsold.

At a meeting of the public and high
school boards at Wardsville it was de-
cided, owing to lack of interest shown,
to discontinue the school fair.

One of the oldest residents of Tyr-
connel died last week in the person of
Mrs. Amanda Keillor, wife of Joshua
Keillor, at the age of 86 years.

All overdue principal payments pro-
tected now by the Ontario moratorium
must be paid by January 1, the Legis-
lature having extended the time until
that date.

A bill to provide for the standardi-
zation of parts of agricultural machin-
ery was introduced in the House
Thursday afternoon by A. B. McCoig
of Kent county.

Seventy to eighty barrels of oil a
day is being pumped from a well on
the John Boothroyd farm, near
Thamesville, as a result of a strike
made on Friday.

Rev. J. McIlroy of Wallaceburg re-
signed his commission to the grand
assembly, and Rev. H. D. McCulloch
of Appin was appointed by the Pres-
bytery in his place.

The doctors of Strathroy are join-
ing the merchants and others in a
weekly half-holiday, and will close
their offices every Wednesday after-
noon during the summer months.

As a result of activity on the part of
Leo Wilson, an old gas well near
Blenheim has been opened, with a
flow that is estimated to be near 500,
000 cubic feet in twenty-four hours.

The fee for registration of letters
and parcels passing through the mails
is likely to be increased from five
cents to ten cents. It is also proposed
to increase the postage on news-
papers.

An editor in Michigan has had \$500
damages awarded him from a man
who took a pot shot at him. There
is money in the newspaper business
if you only know the right way to go
about it.

Rev. Mr. Farquharson was inducted
minister of Wardsville and Newbury
Presbyterian churches at the church
in Wardsville yesterday. After the
services a supper was served in the
town hall.

Near Leamington Samuel Blanford,
aged 45, employed by Ernest Wigle as
a farm hand, was killed while engaged
disking on the farm. The supposition
is that he was in some manner thrown
under the machine.

While driving a tractor from
Thamesville to the McEay homestead,
Wm. McEay was instantly killed by
being pinned underneath it when in
some unaccountable manner the
machine left the road.

An Iowa farmer got tired of seeing
an old gunnysack by the roadside, ev-
ery time he drove to town, and got out
to remove it. It contained \$100,000 in
Liberty bonds, lost by bandits after
they had looted a bank.

The funeral of William Cobban was
held Friday afternoon from his resi-
dence on the Muncey road to Cook's
cemetery, Caradoc. Mr. Cobban was
88 years of age, and had resided on
the Muncey road for the past 70 years.

There was a pretty home wedding
at Bothwell last Thursday when Miss
Madolin Jerome, eldest daughter of
H. J. Jerome, editor of the Times, was
united in marriage by Albert Ritchie,
a prominent young farmer of the dis-
trict.

Two bootleggers at Washington, D.
C., rented a garage, filled six barrels
almost full of water, put in false tops,
poured in an inch of whiskey and re-
placed the barrel heads. Two men
sampled the whiskey through a straw,
paid \$5,000 and discovered the water
later.

MAINTAINING HIGHWAYS

The old time theory of road main-
tenance was to go over the road with
some kind of a scraper or drag in the
spring and push the dirt, mud and
dust from the gutter into the centre
of the road. The next time it rained
all the loose material went back into
the gutter.

Then came a period when large
sums were spent in substantial con-
struction along leading highways, but
there was no sufficient plan for main-
tenance. As soon as a little hollow
got started it would keep growing, and
in one or two seasons became a very
bad hole.

In many localities the system of
road patrolling is now established.
The patrol arrangement may be sim-
ply one man who carries a spade, pick
and scraper. He is perhaps made res-
ponsible for a 20-mile stretch. When
he sees a hole starting, he fills it up
before it gets worse. Persistent work
of this kind at a very moderate expense
will save a very costly construction
job later on.

CO-OPERATION THE KEYNOTE

The community spirit should expe-
rience a new impetus in Glencoe and
vicinity after the rousing meeting held
at the Opera House on Monday even-
ing, at which J. H. Laughton of the
London Chamber of Commerce gave a
spirited address on the benefits of co-
operation in town and community
building. Mr. Laughton is an optimist
of the first water and has the happy
faculty of radiating an influence that
tells for public spirit and uplift.

He told of splendid work being done
in London and Middlesex by the com-
munity movement, in which co-opera-
tion was the keynote. The spirit of
co-operation, the great need of the
world today, was beginning to make
itself felt in all branches of business
and social life. In France it was the
spirit of co-operation among the mili-
tary divisions that made our soldiers
invincible. The churches were re-
organizing and, seeing the need of co-
operation, were getting away from the
old things and with Christ as their
standard were pressing forward with
more of the love one toward another
spirit. The church is what you your-
self make of it; the town and com-
munity are what you yourself make of
them. If you think the church is cold,
the chances are that you yourself are
the icicle; so in the town and com-
munity, the selfish habit must be done
away with and more interest taken in
the welfare of all. If you think a
thing is good for all the community,
push it along; if otherwise, leave it
alone, even though it would probably
enhance your own interests.

Chambers of Commerce and Boards
of Trade, he said, had better things in
view than the mere establishing of
business enterprises and building tall
chimneys. Tasty surroundings, do-
mestic conveniences and moral tone
were more of an asset to a community
than its commercial interests. People
were nowadays looking for the com-
munities where these things exist in
which to make their homes.

At the conclusion of his address Mr.
Laughton was tendered a hearty vote
of thanks. During the evening sev-
eral musical numbers were given.
These consisted of songs by H. K.
Charlton and Stanley Humphries, vi-
olin selections by Master Donald Mc-
Master and choruses of popular songs,
improvised with a local application, in
which the audience joined heartily.
A Salvation Army officer gave a brief
address on some features of the Ar-
my's self-sacrificing work. Mr. Cur-
rie, president of the Board of Trade,
presided.

STEWART-McTAGGART

The Moose Jaw, Sask., Evening
Times of May 1st says:—A very quiet
but interesting wedding was solemn-
ized in St. Andrew's church at ten o'-
clock this morning when Miss Isabel
Victoria McTaggart, daughter of Mr.
and Mrs. L. L. McTaggart of Appin,
Ont., became the bride of Mr. Van
Horne Stewart of this city. Rev. Wm.
Gilmour officiated.

The bride, who was attractively
dressed in a travelling suit of navy
blue tricot with hat to match, and
who carried a beautiful bouquet of
pale pink roses, was given away by
her brother, Mr. Lester McTaggart.
Miss Margaret Brown, who wore a
suit of navy blue tricot with black
hat, acted as bridesmaid.

The bride is well known in the city,
having been a member of the staff of
the King George school for several
years, while Mr. Stewart has also lived
in the city for a number of years.
Mr. and Mrs. Stewart left for a few
days' trip to Winnipeg and Regina,
and on their return will reside in Ce-
cilia Court.

OUR INTERESTS ARE MUTUAL

To the Editor of The Transcript:
I am sure the citizens of the town
and country who heard the excellent
address on co-operation and com-
munity spirit given by Mr. Laughton
all realize the importance to the dis-
trict to have such a feeling existing
between us, and I take this oppor-
tunity to advise the public that it is
along these lines the Glencoe Board
of Trade is endeavoring to carry on
its work. We all know that to accom-
plish anything while it requires
the united efforts of all interested in
the community—by community I mean
town and country both—and to accom-
plish this we require the advice and
support of the citizens of the country
as well as of the town. We should
all realize that what is good for our
town is good for the country surround-
ing us, and what is good for the sur-
rounding country is good for the town.
I am satisfied our farmers are inter-
ested in seeing Glencoe improved, and
for this reason we require their advice
and experience, and why should we
not be interested in seeing farm
life improved and give our best assist-
ance to that end. Let us all work to-
gether for things of mutual benefit
and to obtain our objects. We invite
the country people to join the Board
of Trade so we can help one another.

Yours truly,
GORDON DICKSON,
Sec.-treas. Glencoe Board of Trade.

FIELD CROP COMPETITION

The Mosa and Ekfrid Agricultural
Society will hold a field crop competi-
tion in White Oaks and Fall Wheat.
An entry fee of \$50 will be charged
on each entry. All prize winners
must exhibit a sheaf of grain at the
local fair. All persons wishing to
compete will send their entries to
R. W. McKellar, Glencoe, not later
than May 15th.

A little ad. will sell it.

RACES ON JUNE 23

It has been decided to have the an-
nual races in connection with the
Mosa and Ekfrid Agricultural Society,
usually held on the King's birthday,
held this year on Wednesday, the 23rd
of June. Purse to the amount of \$700
will be offered for competition and a
good day's sport is being arranged.
for, followed by the usual evening's
entertainment. The Marconi (Italian)
Band of London will be engaged for
the occasion. Posters giving full par-
ticulars will be issued shortly.

INDUCTION AT WARDVILLE

The induction of Rev. C. D. Far-
quharson, B. A., late of St. George, into
the pastoral charge of the Newbury
and Wardsville Presbyterian congre-
gations took place yesterday afternoon
at two o'clock at the church in Wards-
ville and was largely attended, with
the Newbury congregation well repre-
sented. Rev. D. Robertson of Kilmar-
tin, moderator of Presbytery, presid-
ed; Rev. A. L. Carr of West Lorne
preached the sermon; Rev. G. S. Lloyd
of Glencoe, interim moderator, recited
the steps leading up to the induction,
and Rev. James McKay of London ad-
dressed the cluster and the congre-
gation. A reception was then held
and the minister was formally intro-
duced to his congregation. After-
wards supper was served at the town
hall.

PREDICTS \$3 WHEAT

Winnipeg, May 9.—In the course of
an interview yesterday, Hon. Edward
Brown, Provincial Treasurer, express-
ed the belief that wheat would sell
this fall at \$3 a bushel, and that the
Federal Government would fix the
price again, as was done last year.
He intimated that such a decision
might result from pressure brought on
the Federal authorities by the banks.

PUNCTUALITY AS A VIRTUE

The decadent manners of the time,
in Canada, at least—might not one
even say decadent morals?—are in
nothing more evident than in the com-
mon lack of punctuality. If railway
or other people of quality or high sta-
tion from the Old Country happen to
be touring the Dominion, they invari-
ably set an example of right adherence
to the arrangement, but the lesson
appears to be quite lost on others.
The moral, as well as the ethical, ob-
ligation, not to break faith, and in
breaking faith rob others of time
which may be valuable, and in any
case is their own, ought to be as self-
evident as the obligation to keep one's
hands out of one's neighbor's pocket
or one's neighbor's till.

FORTY YEARS AGO

Rye heading out May 13.
Eli Griffith builds woolen factory in
Glencoe.

Crothers & Kingston open a law of-
fice in Glencoe.

Mr. Rankin buys hotel in Appin
from Mr. Holmes.

Cameron's flouring mill in course
of erection in Glencoe.

Metcalfe township hall at Napier in
course of construction.

George Clark, keeper of Commercial
Hotel, Glencoe, dies.

Several Wardsville business places
destroyed by fire April 12.

Thomas Archer of The Bend, Mosa,
dies at the age of 102 years.

Senator George Brown, editor of the
Globe, shot by a drunken employee.

Baptist congregation organized in
Glencoe, with services in town hall.

J. C. Lawrence sells his dry goods
store in Glencoe to S. J. McCreary of
Wardsville.

F. F. Quinn sells tinware and hard-
ware business in Glencoe to Clannahan
& Ferguson.

Some three thousand acres of land
at Wallaceburg leased by prospectors
for mineral ores.

Diphtheria takes several children in
north part of Ekfrid township, one
family losing five and another four.

Glencoe council buys 30,000 feet of
pine plank for sidewalks at \$4.75 per
thousand, and a cord of 4-ft. wood for
the town hall for \$2.25.

House of James Gage, ex-councillor,
in Euphemia, destroyed by fire, May 5.
Mr. Gage's two daughters, aged 10
and 14, and George Wade's daughter,
aged 19, perish in the flames.

A record of the blossoming of a
wild plum tree in Ontario for a num-
ber of years shows the earliest date to
have been April 21, in 1878, and the
latest, May 19, in 1873. In 1880 the
tree blossomed on May 3rd.

Too often when a man's good deeds
speak for themselves he spoils the ef-
fect by going around with his mouth
open.

TOWNSHIP OF EKFRID

Court of Revision
Notice is hereby given that the first
sitting of the Court of Revision for
the hearing of complaints or appeals
against the assessment roll of the
Township of Ekfrid in the County of
Middlesex for the year 1920 will be
held in the Town Hall, Appin, at the
hour of ten o'clock forenoon of Thurs-
day, the 27th day of May, A. D. 1920.
Dated at Ekfrid, May 10, 1920.
A. F. McDOUGALL, Township Clerk.

Little Folks' Playthings.

A worried play, if kept clean, makes a good plaything for a little baby. If it is suspended from his carriage or crib it will help him to learn to focus his eyes, and he will be amused by it for a long time. When the child is a little older, let him sit on a quilt on the floor and play with several balls in the six colors, red, orange, yellow, green, blue and violet. Each ball should have a worsted string of the same color attached to it. When the child is a little older still, play simple little games with him, such as rock-a-baby, pendulum of a clock, swinging the ball back and forth and up and down, and in other ways that will occur to every mother. Unconsciously the child will acquire a sense of form, color, motion and position by such games. Say to him, "See the pretty round ball." "See the pretty red paper," and the child will delight to find and bring to you other things that are round like a ball, and red like the paper. A set of worsted balls in the six colors can be obtained from kindergarten supply houses.

Long, slim clothespins make excellent playthings for babies. They can be used as babies or soldiers, or to make fences, trees, log houses and many other interesting things. Playthings that can be taken apart and put together again are good to have; also blocks with which the child can build all kinds of objects—buildings that he can push along the floor, balls to bounce and throw, doll carriages, rashing sets, etc. Dolls with clothes, that button and unbutton and come off, may be used to teach the children how to dress and undress themselves.

For older children kindergarten beads are very useful and helpful. They are in the form of half-inch wooden balls, cubes and cylinders, in the six colors, and also in the natural unstained wood. A shellcase or bodkin and cord is used for stringing them. I would suggest, to begin with, that the child string beads only, and all in one color. After he has made a long string of these ask if he would like to use two colors. He will probably string them in irregular order at first, and if so it will be necessary to suggest alternating the colors, putting on two of one color and one of another, and so on. In this way he will soon learn colors and numbers.

What else is there with which little children's hands can be kept occupied? First of all, sand. Just turn the children loose in a pile or box of sand with a spoon, a pail, a cup, or anything with which they can dig or shovel. I personally do not like to have sand in the house, but if you have a suitable place for it, it need not make any trouble. An old kitchen table turned upside down with the legs cut short and put on the other side makes a good table for sand. A piece of burlap or denim placed under the table keeps the sand from being scattered over the house.

With clay, a simple little cradle may be made. The child first rolls a piece into a ball, cuts it in half, with a string. One of these halves forms the lower part of the cradle. The other he cuts in two, using one piece for the top and remodeling the other into a ball for baby.

Birds' nests with eggs can be made with clay; also apples, oranges, cups and saucers and even animals may be attempted. In fact, clay has almost endless possibilities as play material. For little children, before they are old enough to use scissors, tearing paper is an engaging occupation. Tear a piece of old newspaper into an oblong shape—it may be any size, about 2x4 inches we will say. By folding this in the middle, it will make a little tent. Again, fold in thirds, turn both ends down for a table. The child can tear paper into trees, a ball, doll babies and many other simple shapes.

When a child is old enough he can begin to use scissors, but be sure to provide a pair with blunt points that cannot possibly hurt him. These will afford endless hours of amusement and profit. Have you found that the cuts paper all over the floor? Of course he does, but use this occasion to teach him neatness. Let him have his own little waste-basket.

Let him cut pictures from old magazines and paste them into a book made from manilla wrapping paper. To make the book, take any desired size of paper, fold several sheets in half, and sew them together along the crease. A pretty picture might be pasted on the front page, or the child could draw on it. This will take many

days' work, but all the time he will be learning many lessons in patience, concentration, neatness, and accuracy, and will be developing artistic talent if he is apt at drawing. Best of all, he will be gaining power to do things. If, in his cutting, he comes to a picture that has a story, tell it to him. Do not criticize his work, as this may discourage him, but see to it that he does the best he can.

Let the child draw with colored crayons or "crayolas." You will be surprised at how soon and how well, under proper guidance, he will be able to use this very delightful means of expressing himself.

Thrift Hints.

Soak an ink spot in milk, either sweet or sour. It may be necessary to leave it in a day or two, changing the milk if it becomes discolored. Some of the inks now made for school use will come out in clear water.

Expensive Floor Covering.—As a good substitute for linoleum take building paper, paint it dark brown or any good color wanted, as blue or gray. Have it cut into several lengths to fit the kitchen or dining room, where it is wanted, and lay it down. It will give excellent wear, and does not cost as much as linoleum.

When Making Pies.—Conserve on shortening by cutting the top crust of the pie so that it just covers the top without lapping up on the edge of tin, making the edge have only one thickness, instead of two as before, and cut the sides of the pie one-eighth inch left all around, the juice will not boil out, so you also conserve the sugar and juice which sometimes goes on the oven bottom.

Use for Worn-out Stockings.—Do not throw away your old colored and black stockings; cut them in strips about one inch wide; start at the heel and cut them round and round until you get to the bottom, then crochet with a wooden needle. This makes a good rug for bedroom or bathroom.

To renew my old blankets, I turn them end for end and stitch together. I then bind the raw ends with braid. This puts the worn portions at the ends where there is not much wear and they will last a long time.

Turn fruit which has just begun to ferment, into a saucepan, boil for several minutes with half a teaspoonful of soda, then add spices, sugar and a little vinegar, and boil again until it thickens. This makes a nice relish to accompany meat.

SHE THOUGHT DRESS WOULD LOOK DYED

But "Diamond Dyes" Turned
Her Faded, Old, Shabby
Apparel Into New.

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods—dresses, blouses, stockings, skirts, children's coats, feathers, draperies, coverings—everything!

The Direction Book with each package tells how to dye over any color. To match any material, have dealer show you "Diamond Dye" Color Card.

Salmon Shortage on Yukon River.

Officials of the Department of Indian Affairs report that the catch of salmon at Yukon Indian centres last year was much smaller than usual, although, fortunately, the shortage has not been sufficiently acute to create serious conditions. The decrease in the catch of salmon is attributed to the operations of a floating cannery at the mouth of the Yukon river. The most disturbing feature is that the establishment of a large cannery at this point is likely to seriously affect the future fish supply in the upper waters of the Yukon. Last year's scarcity of salmon in the Yukon did not result in extreme hardship to the Indians, but it is pointed out that, had game been scarce at some of the centres, as occasionally happens, the situation would have been a very serious one. The effect was most pronounced at Rampart House, situated 200 miles up the Porcupine river, where there was almost a total lack of salmon last season and the Indians were unable to dry any for winter use. It is essential that the food supply of the Yukon Indian centres, of which salmon is a very important item, be not endangered by cannery operations of such a nature as to imperil this means of subsistence.

Keep Minard's Liniment in the house.

Swanson's Home Sweet Home

By CONRAD RICHTER.

CHAPTER III.

"What's the matter with this engine?" Keens demanded aggressively. "Won't pull the train," answered Swanson simply.

"Have your front end open?" Swanson asked. "Mmm. Open it." Swanson silently complied, although he knew Keens would find neither of the steam pipes leaking.

"Mmm. Close it. Try your cylinder packing?" Mmm. Try it." Swanson knew all the cylinder packing was not bad, but he put his valves on centre and opened his throttle. Sure enough, nothing blew out.

"Mmm," murmured young Keens again. He walked in a horsehoe around the great placid engine and came up on the fireman's side.

"How much steam you got?" "Hundred and fifty."

"Ah!" breathed Keens, with the air of a detective who had found a clue. He opened one of the fire doors. "Ah!" he said again, much louder. "I suspected as much. Your fire is much too high."

"That fire's just right," declared Bill indignantly.

"When we get up here on a siding you can knock the middle out of her," answered Keens shortly.

"I won't do it," asserted Bill righteously.

"If you're looking for suspension, like your engine was the other night, keep right on," said Keens.

"You have an excellent opportunity of being stopped from doing more things than making a noise on an engine whistle."

"Bill's eyes widened. "So it was you, was it?" he asked violently. "You dirty scab! I ask you right now, come off this engine and take your coat off."

"You certainly are looking for suspension," drawled young Keens, but his voice shook nervously.

"Bill," said Swanson sharply, "hold on to yourself and do as he says." Bill gritted his teeth and subsided.

At the next siding he grimly knocked down his fire as requested. Then Swanson started the old seven hundred engine out on the Sheridan grade.

"Now you'll see her pick up," promised young Keens, going confidently to the left side.

Old engine number Seven Hundred and Thirteen managed to groan up a mile and a quarter of the Sheridan grade. Then, with a last trembling gasp, she faltered and died.

"What's the matter now?" called young Keens, coming around the boiler.

"Steam's down to a hundred and ten," answered Swanson resentfully.

"And still going," added Bill. "Damnation!" exclaimed young Keens. "Can't your man fire an engine?"

"Steam's down the flush burning through the black on Bill's face. He got up from his seat grimly.

"Keens, you're road foreman," he said. "But you won't job, just so you could bowl us fellows out. You're supposed to tell us how to get along with an engine when we can't get along with her no more. That's what you get paid for. Now we want to know what's the matter with this engine?"

"There isn't anything the matter with her," asserted Swanson. "I'll see after this that a real engine man gets this engine."

It was Swanson's turn. He fisted his hands once or twice, then went to the firebox and threw open one of the doors.

"You looked in there a minute ago," he said quietly to Keens, "but you didn't see anything. If you'll look again, carefully, you'll see that the flues are leaking badly, and so are the mud rings and so are the stay bolts. Bill's fire stood her off pretty well until you made him knock the middle out of her. You can see what's happened since."

For a long minute young Keens bent down, peering into the sizzling firebox. He got up stiffly.

"Both of you ought to be suspended for insubordination," he muttered. "You can stop her at Penn City."

Next day, as usual, Swanson's hard eyes searched again as they went through Queenston. But he saw no sign of his late passenger. By the night of the sixth day he was discouraged. "I never thought the old crab would be right," he muttered, meaning the conductor of Ninety-two. Then on the seventh day, on their trip down, they stopped to throw off a car, and Jim Mattern, the Queenston station agent, came out and handed Swanson a package.

"Guess this is for you," she said dryly. "She said for the engineer—if he was young and had light eye-brows. She's asked a couple of times about you."

"Much obliged," said Swanson casually. But his eyes were glued to the ribboned package and his heart was jumping under his oil-streaked smock. Hardly out of the Queenston station, he untied the ribbon. It was a book—poetry, "Songs of the Rail." It gave him a quick satisfaction—not that she had judged him a reader of poetry, but that she herself must like it. On the flyleaf he found, daintily written in blue ink: "To the Home, Sweet Home engineer from a very grateful person. Please play it some more."

"She heard my 'Home, Sweet Home,'" he flushed. "I wonder did she really like it?" Exactly a week later Mattern handed him another package, a second book. Again a message on the flyleaf, written in the same blue ink: "Happy Weekiversary." Swanson whisked it softly and figured in his mental calendar that it was just two weeks from the day he had carried her to Queenston. He thoughtfulness of her, he marvelled. Between rare finds he found a card with the words, "Why have you

stopped playing 'Home Sweet Home'?"

"That day Bill caught him at the book, and Swanson had to explain. "Books is all right, Home," agreed Bill gravely. "But you can't eat them when you get married."

Swanson snorted contemptuously. But he was filled with pride the following week when there came a box of the most delicious creation he had ever tasted—New Orleans molasses pull taffy, spun into light gold that melted in his mouth. Each piece was wrapped in the daintiest waxed paper twisted at either end into the most exquisite of flaring ears. Bill tasted it skeptically, then:

"You're going to have a great little home some day, Home," said Jake, with a chuck in his voice. His wife had been dead for two years. "When it comes you don't want to forget us fellows. We got to see that it passes inspection." Swanson blushed like a boy.

Next "weekiversary" morning Swanson was all agog over what it was going to be. To his mingled ecstasy and surprise he found the girl herself at the station.

"I brought it to you myself to-day," she said, up on her tiptoes to reach his outstretched hand. Then to his chagrin she turned gaily and fled.

Inside of the white paper Swanson found a cluster of fresh cinnamon buns, generously sticky brown on the bottom with the purest of thickened syrup. He tasted one breathlessly, was caught in the act and forced to share with Bill and the front trainman, Jake. The two ate their allotment greedily. Bill even asked to lick the paper.

Saturday he invaded the bookstore in Penn City and guardedly asked the advice of the clerk. The clerk was a woman who knew the conventions, and she tried to sell him a volume of travel in Scotland, with a decorated cover and colored illustrations. But Swanson wanted something nearer home. In spite of the clerk's protest he bought a book entitled "Bungalows I Have Known." Sunday and Monday he could hardly wait. On Tuesday he intrusted it, all bound up in birthday paper, to Mattern and asked him to see that it surely got to the right person.

"You ought to put her name on it," Mattern mentioned thoughtfully. Swanson said nothing. He realized in a second that he couldn't tell Mattern that he didn't know her name.

"I'll tell you," said Swanson hastily. "We want to make sure we spell it right. Suppose you ask somebody, confidentially like, you know. Don't tell them what you want it for. Then you get it, all bound up in birthday paper, to Mattern and asked him to see that it surely got to the right person."

"Now, do you know where you're going to send it?" asked Swanson.

"Her? Why, she's a companion to old Mrs. Coleman, at the Coleman mansion up on the hill!"

(To be continued.)

Source of Mosquitoes.

The time to eliminate the mosquito nuisance is right now. It is folly to wait until the hibernating mosquitoes find suitable breeding places to deposit their eggs and to continue their propagation before organizing efforts to combat them.

The whole matter of eliminating the mosquito is to prevent its development. The first wave of warm weather favors the development of the mosquito. It is therefore considered timely that every housekeeper who desires to be free from this disease-breeding and annoying pest make a complete survey of the home in the effort to remove all sources which favor the development of the mosquito.

Clogged rainspouts, which cause the rain water to accumulate on the roof and to become stagnant, should be cleared and mended. Very often a mere depression in the ground may act as a receptacle for water in which mosquito eggs may develop. In fact, any object capable of holding water may, during the spring and summer months, act as breeding places.

The unsuspected flower-pot saucer containing water is a fertile source of mosquitoes in the home. The unused pitcher and bowl containing just enough water may account for the annoying mosquito in the bedroom. Leaky pipes, clogged drainage, sinks and the like are also insanitary conditions which favor the mosquito development.

Minard's Liniment used by Physicians.

For more than 4,000 years Chinese farmers have known of the application of legumes and compost and of their value in treating the soil so as to stimulate production. Think that over.

Trap Fishing Great Sport on the Yukon.

Late in the fall, or soon as the ice is thick enough to walk on, which takes only two or three nights of good frost, the Indians fish through the ice with nets, and later on, when the ice gets too thick, fish-traps are set for catching lusk and white fish. In setting nets under the ice several holes are made in a straight line about ten feet apart.

The holes are about a foot in diameter, or large enough for a man to shove his arm in and take hold of a pole that is pushed from one hole to another with a long piece of rope attached to it. The other end of the rope is attached to the net that is to be drawn underneath the ice for setting. When the net has been drawn under, both ends are tied to long poles planted firmly in the river bed, the upper ends of which are held in place by cross pieces or poles tied to them on top of the ice.

While set, the net must not at any time touch the ice, as in a short time it would freeze to the surface and cause a lot of extra work on the part of the owner. So, to avoid this, the net is tied to poles just far enough under to prevent it from touching the ice, but not too far, or the fish would go over the net and not be caught.

The setting of fish-traps requires more work, because holes have to be made through the ice large enough to receive the traps. If a trap were eight feet long and four feet wide, it would have to be dug. Besides digging holes through the ice for the traps, long trenches have to be made to receive the trap fences.

These trenches are about a foot wide, the length depending upon the depth of the water and the swiftness of the current in that location. Fishing through the ice requires great endurance on the part of the fisherman, as he has to work with bare hands in freezing water, while the thermometer registers many degrees below zero.

Our Natural Resources.

The country which would guard its future must exercise the greatest care in the utilization of natural resources. Frugality has too often been mistaken for development. The fact that capital comes to a country for profitable investment is not an unmixed benefit, and may mean that greedy eyes are seeking new fields to conquer after home industry has been "developed" to a standstill. The supply of some resources cannot, of course, be maintained forever, as in the case of coal, the formation of which is beyond human power. But our forest resources, our fisheries and the fertility of our agricultural areas must be preserved. That such has not been done in the past is indicated by the fact that the older wheat-growing districts of the West must now be used for mixed farming, some of our fisheries have declined greatly in value, and good lumber has increased enormously in price.

The protection of these resources assumes a consideration of the future, too distant to permit of the problem being handled in the ordinary political field. The connection between ordinary government departments and the demands of the public is too close to allow them to handle the problem. It is for this reason that conservation can be best carried on by a body such as the Commission of Conservation in Canada, which was established for the purpose—Monetary Times.

BOB LONG BRANDS
Known from Coast to Coast

The value of the shelter afforded by trees on a farm is not fully appreciated. Too frequently the settlers in a wooded district are not satisfied until all the trees are removed, and only when the country becomes generally cleared and the soil loosened up by cultivation do they realize the ill effects of the wind on their crops, live stock and personal comfort. Many who have made this mistake have later had to resort to planting and to wait several years to replace the shelter which nature had provided.

Belts of trees, judiciously placed, protect the soil from drifting and drying, afford desirable shade for stock, especially for young animals, and make it possible to grow many fruit trees and ornamental plants which cannot otherwise be grown in the open. This is especially true in the Prairie Provinces. The production of fuel can be made an important function of a shelter belt without reducing its value as a wind-break.

Settlers, especially in the wooded portion of the Prairie Provinces and Northern Ontario, should be strongly advised to leave strips of bush at least along the western sides of their farms, unless other locations are more suitable to the topography. Shelter belts should also be left around the buildings and gardens. A space of at least 200 feet should be left between the shelter belt and the buildings, to prevent the drifting of snow under the buildings.

When flour is genuine or of the best kind it holds together in a mass when squeezed by the hand and shows the impression of the finger-marks and even marks of the skin much longer than when it is bad or adulterated; the dough made with it is very glossy and elastic, easily kneaded, and may be elongated, flattened, and drawn in every direction without breaking.

SHAKESPEARE'S GARDEN REPLANTED

GIFTS OF PLANTS FROM ROYAL FAMILY.

Gardeners Are on Lookout For Relics of Elizabethan Period.

In the trenching operations necessary to the laying out of an old-fashioned Elizabethan "Knot-Garden" at New Place, Stratford-on-Avon, the walls of a chamber or receptacle, 10 feet long by six feet broad, have lately been discovered about two and one-half feet below the present level of the ground. The walls are, perhaps, partly of stone, and partly of brickwork, and the character of the masonry is that of the sixteenth century. The garden, it is said, was laid out by Shakespeare himself, and the plants which were growing in it were of the Elizabethan type. The garden is now being replanted with plants of the same type, and the gardeners are on the lookout for any relics of the Elizabethan period.

Shakespeare's irrigation plant. As to what purpose this receptacle served it is difficult to arrive at any certain conclusion, though it was probably originally connected with the work of the garden—perhaps a garden-ditch. Not far off is a brick well, twenty-four feet deep and about two and a half feet across, in which fresh spring water rises to a height of eight feet. This, which was discovered some few years ago, is certainly of Shakespeare's time, and doubtless served for watering his garden. To this purpose it is now to be devoted once more.

Apart from this receptacle, not so much of interest as might have been expected has been brought to light by the excavations—probably owing to the fact that the soil, for a depth of two or three feet, is all made ground, dating from a not very remote period. Neither the oyster shells nor the broken bones which have been unearthed can reasonably be ascribed to the Elizabethan period, nor the curious shaped clay tobacco pipes. Indeed, Shakespeare's tobacco pipe, which was probably not a smoker of it.

There was discovered, however, a few days ago, the complete skeleton of a medium-sized animal, which some imaginative Shakespeareans, when it was first discovered, were disposed to identify as that of the deer said to have been poached by Shakespeare, when a youth, from the neighboring park of Sir Thomas Lucy of Charlcoate. The skeleton, however, when brought forth and carefully examined, turned out to be nothing more romantic or interesting than the bones of a pig, and a late eighteenth century pig at that! Archaeologists, however, are on the alert, and strict orders have been given to the gardeners carefully to examine every bit of soil turned up for the smallest fragments of anything unusual. Shakespeare, we know from inscriptions in his plays, had a thorough knowledge and experience of the practical side of gardening—of pruning especially. Should, therefore, any old pruning knife or other gardening tool of the Elizabethan period be unearthed we may rest assured it will be treasured.

Contributions From Many Sources.

In the men with the stocking of the garden, with old English plants and flowers proceeds apace. Besides the gifts from the King, Queen Mary, Queen Alexandra, and the Prince of Wales, consignments from every part of the country have been and are being received from the owners of every sort of garden, historic and modern, great and small. From Kew Gardens, also, where Shakespeare's garden is regarded as a matter of national concern, both valuable counsel and large contributions of plants have been received. There have also been subscriptions in money. Miss Marie Correll heading the list with a gift of £50.

How Maoris Greeted the Prince.

The picturesque celebration arranged by the Maori tribesmen, enemies of the British in the Maori war, in honor of the Prince of Wales on the shores of the Rotomah lake on April 29, furnished one of the striking features of the prince's tour. A thousand native warriors, clad only in loinclothes and armed with spears, performed war dances while a thousand graceful maidens in brilliant costumes did languorous dances to the accompaniment of soft native music. The address of welcome to the prince in the quaint Maori language began: "Ye who lie in the dark chambers of death, come forth and hearken; ye who sleep the long, last sleep, arise and stand forth to give welcome; for to the first-born son of the royal line draws near. The son of our lord is welcome."

Regularity in feeding and milking is not the only part of efficiency in handling your work, it helps the cow to do her best.

Building By-laws Should be Enforced.

In most of our cities and towns a building code exists. The ostensible purpose is the regulation of building, prevention of fire danger to life and property, and the conservation of health.

It is interesting to note, from the report of the last annual meeting of the Dominion Association of Fire Chiefs, the efforts which are made to enforce the provisions of the building code and the success which attends these efforts. Many of these fire chiefs, experts in fire prevention, gave their experiences.

One fire chief said: "Your municipal council will sit for hours and draw up building by-laws, and, in the next 24 hours, when they meet again the by-laws are all cast aside that some building may be erected in contravention of the by-laws. There are lots of aldermen who do not want to break these by-laws, but simply because Mr. Smith or Mr. Jones is a friend of theirs, they do it." Another ex-chief said: "There was a rooming house that I did not approve of. The aldermen even said they would not sleep in the building, but, before my time, a license had been granted, and they said if I did not approve of it, it would bankrupt the man who built it. I pointed out that they were putting dollars ahead of lives. I was then dismissed from the city for not approving of that."

In interpreting the amendment to the Criminal Code passed at the last session of Parliament, Mr. G. D. Flindley, Superintendent of Insurance, speaking at the meeting of the Dominion Fire Prevention Committee, said: "Under the first clause, any person upon whose premises fire occurs, is deemed to have caused the fire by negligence if he has failed to comply with regulations designed to prevent fire. Non-compliance is the proof of negligence, and this is a question of fact to be determined by a jury. Notification of a breach of the law is not provided for, as every person is presumed to be familiar with the law." In view of the experience of the fire chiefs above noted, well may it be said, as expressed by Mr. W. H. Shapley, Chairman of the Fire Prevention Committee, that "the change that has been made in the Criminal Code has been made in the Criminal Code because it has a good effect if we can find anyone loyal enough to the interests of the Dominion to enforce the law."

Minard's Liniment for sale everywhere

The orthodox Mennonites in Manitoba and Saskatchewan plan to leave Canada this summer and establish a colony in the Mississippi Valley.

Let's Make a Song of Happiness.

Let's make a song of happiness. A simple little thing. With words that artlessly confess The love from which they spring. Let's make a song of happiness And sing it on our way. Each word a lingering caress And kind as flowers in May. There are so many in distress. With hearts cast down and sad; Let's sing a song of happiness And make them well and glad. —Ernest H. A. Home.

DELICATE GIRLS MADE STRONG

Rich, Red Blood Needed to Keep Up Their Vitality.

If growing girls are to become well developed, healthy women their blood supply must be carefully watched. Mothers should not ignore their unsettled moods or the various troubles that tell of approaching womanhood. It should be constantly borne in mind that pale, bloodless girls need plenty of nourishment, plenty of sleep and regular open-air exercise. But a lack of appetite, and tired, aching limbs tend to hinder progress. To save the weak, thin-blooded sufferer she must have new, rich, red blood and nothing meets a case of this kind so well as Dr. Williams' Pink Pills. These pills not only enrich and increase the blood supply, they help the appetite and aid digestion, relieve the weary back and limbs, thus promptly restoring health and strength and transforming anemic girls and women into cheerful, happy people. Among the thousands who have obtained new health and strength through the use of Dr. Williams' Pink Pills is Miss Violet Booth, Gleason, Ont., who says: "For a long time I was in a badly run-down condition. I was pale, breathless at the least exertion, and could hardly do any household work without stopping to rest. I often had severe headaches, and my appetite was poor and feeble, and I would get up in the morning without feeling the least bit rested. I had tried several medicines, but did not get benefit from anything until I began the use of Dr. Williams' Pink Pills. When I had taken two boxes I could see an improvement, and after using six boxes I found my health fully restored. I feel altogether different since I used the pills that I strongly advise them for all weak, run-down people." If you are weak or ailing in any way, avail yourself at once of the splendid home-treatment which Dr. Williams' Pink Pills so easily afford, and you will be among those who rejoice in regained health. These pills are sold by all dealers in medicine, or may be had by mail at 50 cents a box or six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville.

Testing your cows enables you to know your herd.

In the Spring.

I'd like to know what gets inside a feller in the spring! There's something breaks away in him an' tugs like everything! When first I spied the crocuses a-strugglin' toward the light. The way that somethin' pushed 'em up reminded me a night Of those queer things inside o' me a-tryin' to get out; It kinder feels like gladness, an' you think you want to shout. But when you think it over, it's sad things you're glad about! It's great to see the flowers bud, an' leaves come on the trees. But you know you can't ever be no do such things as these! It's lots of fun to count the robins comin' one by one, An' watch the time grow longer for the settin' of the sun; But it sorter makes you solemn when you wonder 'bout it all. The flowers that died and bloom again, and die again next fall! An' to know you're most important, though you're weak, an' poor an' small.

Raising Mink.

At the recent fur auctions in Montreal, the price of mink skins averaged \$20. The better skins sold for \$30 upwards to \$75 for one very choice lot. Mink is a handsome, durable fur. It has been demonstrated that mink can be kept in captivity. They require little space and can be cheaply fed, provided one can obtain fresh fish or fresh meat practically all the time. Persons who live near the sea-coast would appear to be in an advantageous position for the raising of this animal. Once the difficulty of obtaining stock, which, for purposes of domestication, must be taken young, has been overcome, the prospective raiser of minks ought to be in a fair way to success.

The principal diet of minks should always be meat or fish. English sparrows, mice, frogs, rabbits, scraps of butcher's meat, small or coarse fish and fish heads, may be mentioned as examples of the sort of food for minks. They will also learn to eat cereals readily and they may be given wheat, corn, or barley mixed with milk, together with ground meat or meat broth. In feeding cereals, however, care should be taken not to cause diarrhoea. In winter the food is best served warm. As to quantity, about 4 ounces of meat daily is sufficient for an adult. Cages may be about 4 feet by 8 feet and 16 inches high. They can be made of 1-inch mesh, No. 18 gauge, poultry netting. These cages are to serve as a runway. The dens should be quite warm. A good den can be made by putting a box about 12 in. x 12 in. x 12 in. of the cross baby happy. When baby is cross and fretful the mother may be sure something is the matter for it is not baby's nature to be cross unless he is ailing. Mothers, if your baby is cross; if he cries a great deal and needs your constant attention day and night, give him a dose of Baby's Own Tablets. They are mild but thorough laxative which will quickly regulate the bowels and stomach and thus relieve constipation and indigestion, colds and simple fevers and make baby happy—there surely is a smile in every dose of the Tablets. Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A SMILE IN EVERY DOSE OF BABY'S OWN TABLETS

Baby's Own Tablets are a regular joy giver to the little ones—they never fail to make the cross baby happy. When baby is cross and fretful the mother may be sure something is the matter for it is not baby's nature to be cross unless he is ailing. Mothers, if your baby is cross; if he cries a great deal and needs your constant attention day and night, give him a dose of Baby's Own Tablets. They are mild but thorough laxative which will quickly regulate the bowels and stomach and thus relieve constipation and indigestion, colds and simple fevers and make baby happy—there surely is a smile in every dose of the Tablets. Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Curious Pottery.

The use of dried fruits of trees, such as the gourd and the cocoonut, for holding water and liquid substances, is familiar, but it is not so generally known that cups, saucers and jars to take the place of ordinary earthenware are made in the Orient of a gummy and plastic material entirely of vegetable origin, which is easily moulded and dried. There is more than one instance in history of vegetable matter being confused with earth and clay. The pulpy parts of various astringent fruits have the peculiar plastic property of clay, and by hardening in the air, after being moulded into pots, they are impervious to water, and have the additional advantage that they can fall to the ground without being broken.

There is a peculiar ware that is made by the Bengalis in the Central Province of India from the fruit of the acacia. The fruit is collected and dried. It is then boiled in water until quite soft and pounded, the stones removed and the pulp beaten up and worked with the hands into a thick, brown, sticky mass. When this is quite ready the manufacturer takes a rather vessel—any shape the vessel is and covers it all over with a thick layer of pulp. This is then put aside to set a bit, and when hard rude devices are stamped round the neck and shoulders of the

HAVE YOU ASTHMA?

Do you endure the misery of Asthma with sleepless nights, difficult breathing and loss of strength? How ever bad your case, quick relief is guaranteed by the use of TEMPLETON'S RAZ-MAH CAPSULES. This preparation is the result of years of experiment and study. Thousands have derived the greatest benefit through its use. Write for free sample to Templeton, 143 King St. W., Toronto. Sold by reliable druggists everywhere for \$1.04 a box.

TEMPLETON'S RHEUMATIC CAPSULES

For fifteen years the standard specific for Rheumatism, Neuritis, Gout, Sciatica, Lumbago, Neuralgia. Many doctors prescribe them. Write to Templeton, 143 King St. W., Toronto, for free sample. Sold by reliable druggists everywhere for \$1.04 per box.

article, which is then set aside to dry. When entirely hard, the ghara inside is broken and the pieces removed. These vegetable pots are sold according to size from four to eight annas each, and are much sought after by the people. The acacia tree is abundant throughout the forests of tropical India and Burma, and the fruits are frequently employed in medicine and for tanning. Another material used in making jars is the root of the great asphodel. The fleshy root of this plant, by drying in a sand oven and grinding, is prepared into a flour, which, when mixed with water, yields a most tenacious vegetable glue with which the Persians make great vessels for holding oil and clarified butter. The native cobblers employ it in preference to animal glue in their work.

Spanish Flu

Claims Many Victims in Canada and should be guarded against.

Minard's Liniment

Is a Great Preventative, being one of the oldest remedies used. Minard's Liniment is a liniment of the highest quality, and is used for all kinds of rheumatism, neuralgia, sciatica, lumbago, and all other pains of the back, neck, and limbs. It is also used for all kinds of skin diseases, such as eczema, psoriasis, and all other eruptions of the skin. It is sold by all druggists and is a household necessity.

When I Have Time.

When I have time, and all my little time is gone, Are grown, and no longer need my care, When crowded hours no longer pass me by, And childish voices cease to thrill the air, What books I'll read—my garden-plot I'll tend, What works of charity and love be mine— I'll do the things I've always longed to do— When I have time. With you, my life-companion, ever dear, We will forget the turmoil and the strife. We will renew our love, our hope, our youth, In the bliss of peacefulness of middle life. And side by side through other lands we'll stray— Will see the vision that we dreamed before, We'll wind our way to long-thought distant lands And stand upon some far-off foreign shore. Thus shall we gather flowers for memory's shrine, Old age and loneliness need have no fears, When all the fragrance of past thought and deed Makes beautiful the passing of the years.

Application for oil and gas leases covering upwards of 200,000 acres in northern Alberta were filed during February.

SHILOH 30 DAYS COUGHS

Shiloh is a powerful cough medicine, and is sold by all druggists. It is a household necessity, and is a sure cure for all kinds of coughs, colds, and bronchitis. It is sold by all druggists and is a household necessity.

BITS OF HUMOR FROM HERE & THERE

Birds of Passage. Mistress: "How do you do?" So good of you to come!" The New Cook: "Don't mention it. Sure, I'm as fond as a wake-ind in the country as any one." Expected a Denial. "So you broke the engagement. What's up?" "She's too conceited. I remarked one evening that she was too good for me and she did not deny it."

A Real Surprise. "Where are you going, ma?" asked the youngest of five children. "I'm going to a surprise party, my dear," answered the mother. "Are we all going, too?" "No, dear, you weren't invited." "After a few moments' deep thought: 'Say, ma, then don't you think they'd be lots more surprised if you did take us all?'"

Quite Necessary. "We must have the wedding at 2, not 4, o'clock." "But, Fred, I wished it at 4. Why not?" "Your father is going to give us a check for a wedding present, isn't he?" "Yes—but what has that to do with it?" "Why, darling, don't you know that the banks close at 3?"

MONEY ORDERS. A Dominion-Express Money Order for five dollars costs three cents.

Exports of butter from the Commonwealth of Australia during December amounted to 3,327,300 pounds, being 3,204,284 pounds shipped from Victoria, and 123,016 pounds from South Australia. The quantity of beef exported amounted to 11,542,889 pounds, lamb 17,919,508 pounds, and mutton 26,708,709 pounds.

Ask for Minard's and take no other. "Discouraging thoughts will come. You are not bound to retain them. Force them out with a larger and better thought. Make this declaration (and mean it): 'I will not yield to discouragement.' " —John Darnell White.

Do not think to inherit ease with money; he who keeps money earns it.

"SYRUP OF FIGS"

CHILD'S LAXATIVE

Look at tongue! Remove poisons from little stomach, liver and bowels

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Put directions for child's dose on each bottle. Give it without fear. Mother! You must say "California."

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

A Dyspepsia Cure

M.D. advises: "Persons who suffer from severe indigestion and constipation can cure themselves by taking fifteen to thirty drops of Extract of Roca after each meal and at bedtime. This remedy is known as Mother's Own Tablets. Get the genuine. 50c and \$1.00 bottles."

The name "Bayer" identifies the genuine Aspirin—the Aspirin prescribed by physicians for over nine years and now made in Canada by J. T. Bayer Co., Ltd., Toronto. The boxes of 12 tablets cost but a few cents. Larger "Bayer" packages contain proper directions for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neuritis, Joint Pains, and Pains generally. The boxes of 12 tablets cost but a few cents. Larger "Bayer" packages contain proper directions for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neuritis, Joint Pains, and Pains generally.

There is only one Aspirin—"Bayer"—You must say "Bayer!"

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monopoly of Bayer. While it is well known that Aspirin means Bayer, it is not known that Aspirin means Bayer. The Bayer Company is the only one in the world that has the right to use the name "Bayer" in connection with their general trade mark, the "Bayer Cross."

The Demand For Summer Goods Is Greater Than Usual. World Supply Less

Only the merchants who bought well ahead at former prices can display the necessary stocks of Merchandise of Quality at Reasonable prices.

This store has ample stocks of worthy, wantable merchandise. Ask for prices. We ask the closest comparison and we are satisfied with results.

People are growing weary of hearing about "higher prices" and "scarce goods." Our policy is to tell our own customers and friends of this store the real market conditions as our friends in the wholesale and manufacturing firms keep us posted. When our advice is followed and our customers save money it creates greater confidence and increases trade relations.

To our Customers we say, "Buy now, and keep your supplies bought months in advance, by so doing let the other fellow do the worrying when scarce goods and higher prices stare them in the face."

The store with the stocks. No trouble to sell our **Clothing** because we have the kind the people want. The style is right, the quality and price fits in to attract the most critical eye.

Working Men's Outfits

Best makes of Overalls, Shirts, Smocks, Sweaters, Shoes, Rain Coats sold in many cases at less than today's wholesale prices.

Piles of Anderson's Gingham and Zephyrs, Percales in dandy patterns like silk. These are scarce goods. No chance to repeat orders this year.

Big Demand for Oxfords

We have exceptional values in Vici Kid. Patent Colt on new last for this season. Specially priced \$1.50 to \$7.50.

Linoleums of Quality

At last season's prices, notwithstanding 14 yd. advance, with more to follow. A grand range of patterns.

After Housecleaning Supplies

Marquise Curtains, Curtinettes, Scrims, Brass and Wood Poles, Window Shades, etc.

J. N. Currie & Co.

Always best prices paid for Butter and Eggs, cash or trade

KEITH'S CASH STORE

DRY GOODS MILLINERY GROCERIES

The Motorist's Best Friend

ANYONE can say "the best." It means nothing unless you know who says it. In this case it is the Oldest Service to Automobile Owners in America, and when they say the Prest-O-Lite Storage Battery is "best by test" it means just that.

—"best" because it has more "pep" and power, more endurance for the daily grind.

—"best" because it is backed by the kind of service that keeps troubles away—service that satisfies.

But whether you carry "the best" battery or not, we will keep your battery in better condition if you will let us inspect it from time to time. No charge for this service.

We have competent battery men ready to recharge or repair all makes of batteries.

This is the best place in town at which to unload your battery troubles. Given a chance, we'll prove it to you.

BUY A FARM AND GO OUT AND PRODUCE

"It is time we quit endowing colleges and schools for every other business in the world but farming and then wondering why there is not more production," declared Hon. Duncan Marshall, Minister of Agriculture in Alberta, to the Empire Club at luncheon in the King Edward Hotel, Toronto, in his address on "The Future of Agriculture in Alberta." He went on to speak of the recurring campaigns for greater production which were too frequently instituted by men who knew nothing about farming but still tried to tell the farmers their business. "Let them stop hiring halls to make a speech, and buy a farm and go out and produce something," he said.

METCALFE COUNCIL

Meeting of Metcalfe council May 3. Members all present. Minutes read, approved and signed. Moved by Blain and Hawken that all orders for work be paid. On motion of Hawken and Denning, J. H. Denning was paid \$21.75, damage to tractor on sidewalk 4, con. 13. Moved by Blain and Hawken that \$300 be granted each division for gravel and road repair. On motion of Hawken and Blain the clerk was instructed to write A. S. Code, O. L. S., for return of all drain reports of the township.

The council adjourned to May 31st at 10 a. m., when it will open as a court of revision on the assessment roll. Harry Thompson, Clerk.

CHAUTAUQUA AT PETROLEA

To the Editor of The Transcript: Dear Sir,—My attention has been called to an article you have quoted from the Petrolea Advertiser-Topic, and as this is calculated to do us an injustice, I wish you to insert this letter in your next edition.

There was a misunderstanding in some way with some of the signers of the Petrolea contract for a chautauqua this summer, but this has been amicably and satisfactorily adjusted. They held a meeting to which I sent a representative, and at which they decided to unanimously proceed with the chautauqua, as per contract. One or two of the guarantors were dissatisfied, because they signed the agreement without duly considering it, and the misunderstanding arose from that source. They are going ahead now in good spirit, and there is no question but that chautauqua will be a great success at Petrolea.

The contract they signed was not our 6-day contract, but our new 4-day contract, which provides a 4-day pro-

Ford Plain Facts about Milk Routes

A team of horses costs about \$400, double harness \$100, a wagon \$75, making a total of \$575. A Ford Truck costs \$750 at Ford, Ont.

Government experiments have proved that the cost of feeding a horse is 8.7 cents per working hour, or 17.4 cents per team per hour. One team, if collecting milk, could not cover more than 30 miles a day. The cost for twelve hours would be \$2.09, or about seven cents a mile. The cost for gas and oil for a Ford Truck is only 4½ cents a mile. The Ford Truck soon pays for itself in the reduced cost of operation.

A Ford Truck will cover at least 60 miles a day collecting milk or 250 miles on long hauls. It enables you to operate at a lower cost per mile and to cover twice as much territory as with horses.

Ford One-Ton Truck (Chassis only) \$750 f. o. b. Ford, Ont.

How Canada Smooths Rough Roads

THIS new Overland is built to travel smoothly over rough roads with a comfort never before possible in a light car.

They remove the strain and nervous tension from those who drive this car and those who ride in it.

Its Triplex Springs protect the car from road jolts, preserve mechanical parts for longer wear and more—

Its unusual economy which results from light weight is as remarkable as its riding qualities.

Born

REYCRRAFT—On Monday, May 3, 1920, to Mr. and Mrs. Richard Rey-craft, Mosa, a son—Francis Richard.

TOWN AND VICINITY

Frequent showers of rain on Sunday night and Monday were just what the country needed.

D. McTaggart of the Longwoods Road, near Strathburn, is confined to his bed with a severe cold.

The recent damp chilly days have caused the using of the few pounds of coal left in most of the bins.

Peter Johnson has given up his farm in Ekfrid to accept the position of editor of the Toronto Sunday World.

The death occurred at Sault Ste. Marie last week of Jacob Huston, who for many years was in business in Glencoe.

Chas. Dean, formerly of Glencoe, has moved from St. Thomas to Ayrmer, where he is going into business with a musical merchandise and undertaking firm.

In view of the high cost of living the congregation of Christ Church, Newbury, last week presented their rector, Rev. Mr. Murphy, with a purse of upwards of fifty dollars.

A representative of the Royal North-west Mounted Police has been in Mid-dlesex County for some days buying horses for the service. He has secured quite a number of good "mounts."

Those who purpose participating in the field crop competition in connection with the Mosa and Ekfrid Fair Association are reminded that their entries must be made not later than Saturday of this week.

Mrs. Thomas Mawhinney had the misfortune to fall and strike her forehead on the sharp edge of a cement step while carrying a tray on Friday. A severe cut was made, which required several stitches.

A pleasant evening was spent at the home of Mr. and Mrs. Geo. L. Munro, Mosa Township, on Friday, when a host of friends and neighbors gathered to bid them farewell before their retiring to Glencoe. The couple were made a present of two handsome chairs.

The employees of the foundry have organized a baseball team, with the following officers:—President, F. Aldred; vice-president, A. Aldred; manager, J. McCracken; captain, Ed. Ham-bley; president, Dr. Lloyd W. M. Freele; president, W. Currie; 1st vice-president, Chester E. Bechill; 2nd vice-president, Harold Bechill; secretary-treasurer, J. Tait.

Dan McArthur, son of Peter McArthur, the well-known writer, stood fourth in his class at the recent examinations at the Ontario Agricultural College, Guelph. Mr. McArthur has the distinguished honor of being editor of the monthly magazine published by the students of the college.

Miss Timms has given up her position as saleslady at Mayhew's store and returned to her home at Mitchell, Glencoe. Miss Timms was given a half-dozen silver coffee spoons by the members of St. John's church choir, with which she was connected. Her successor in the store is Mrs. Dunbar of Brussels.

Miss Brown of Tiverton, missionary on furlough from Honan, China, gave an interesting talk on her missionary experiences Sunday evening in the Presbyterian church. During her stay of a few days in Glencoe Miss Brown was the guest of Mr. and Mrs. J. G. Lethbridge, she and Miss Sadie Lethbridge having been together in the missionary work in China.

PERSONAL AND SOCIAL

—Miss McPherson of Kincardine is visiting her brother, R. M. McPherson.

—Miss Fern Graham is home from Toronto waiting on her mother, who is ill.

—W. Gunn and Miss Helen McPar-lane of London spent Sunday at Colin Leitch's.

—Miss Grace Currie has returned from Dallas, Texas, where she spent some six months.

—Mr. and Mrs. J. A. McParlane and Mrs. Philip McCallum of London spent Sunday at Chas. Gould's.

—Rev. T. J. Graham and A. J. Wright are attending a meeting of the Synod of the Church of England at Brantford this week.

—Miss Myllett of Strathroy called on Glencoe friends last week on her way to Ekfrid where she is looking after the interests of her farm.

—Misses Violet and Alf Gould, nurses in training at Victoria Hos-pital, London, have returned after spending three weeks at their home near Strathburn.

—Peter McArthur is in New York at the present time doing a series of articles for a Canadian publisher and a syndicate. He will also visit Bos-ton, Philadelphia and Buffalo and probably a number of other large centres and will be away for several weeks.

NOTICE

I hereby give notice that I will not be responsible for any debts contracted by my wife, Georgiana Morrison.
(Sgd.) SAMUEL MORRISON.

TO WHOM IT MAY CONCERN

A rumor has been circulated that John L. Munroe stole an overcoat belonging to me, and I hasten to correct same. I did not lose an overcoat, and therefore the rumor is absolutely false. I regret that such talk should have gone the rounds, and hope this contradiction will be sufficient to clear Mr. Munroe.

Donald McAllister,
April, 1920. R. R. 1, Newbury.

NOTICE TO CREDITORS

In the Matter of the Estate of Don-ald D. Graham, Late of the Township of Mosa, in the County of Middlesex, Farmer, Deceased.

Notice is hereby given, pursuant to "The Revised Statutes of Ontario, 1914, Chapter 121, Section 56," that all creditors and others having claims against the estate of the said Donald D. Graham, who died on or about the twenty-seventh day of March, A. D. 1920, are required to send by post pre-paid or to deliver to the undersigned, solicitors for Jane Graham, adminis-tratrix of the estate of the said Donald D. Graham, deceased, their names and addresses and full particulars in writ-ing of their claims and statements of their accounts and the nature of the securities, if any, held by them.

And take notice that after the first day of June, A. D. 1920, the said Jane Graham will proceed to distribute the assets of the said deceased among the persons entitled thereto, having regard only to the claims she shall then have had notice and that the said Jane Graham will not be liable for the said assets or any part thereof to any per-son of whose claim she shall not then have received notice.

Dated at Glencoe this twenty-sixth day of April, A. D. 1920.
ELLIOTT & MOSS,
Solicitors for the said Administratrix.

Old papers for sale at The Tran-script office.

SPECIAL NOTICES

Chopping Tuesdays and Saturdays.
—W. R. Stephenson, Appln.

For sale—choice table butter, at 60 cents a pound, at Mayhew's.

Board wanted in Glencoe by one man. Apply Box 154, Glencoe.

Alex. McAlpine & Son, dealers in flour and feed, coal, salt, cement, etc. For sale—three young Durham calves. Apply to Simpson Goff, Gore, Ekfrid.

Jersey cow for sale. Milking now eight weeks. At J. A. McLachlan's, Glencoe.

Residence on Victoria street, north, for sale. Apply to Mrs. D. K. McRae, Jr., Glencoe.

Flour and feed for sale at store cor-ner of Main and McKellar streets.—J. D. McKellar. 231f

One milch cow and one young steer for sale.—R. Hicks, Victoria street south, Glencoe.

House on Main street for rent. May have possession immediately. Apply to Mrs. Jean Keith.

Plants for sale—tomato, cabbage, cauliflower, sweet peppers and asters. V. Watterworth, Glencoe.

The Transcript office sells blank counter check books. Handy for those not using large quantity.

For sale—1 new International side-delivery rake, and 1 new mower, 6-ft. cut, never used. Apply to J. L. Hull.

Frame barn on lot 16, Longwoods Road, Ekfrid, for sale; 28 x 45, 16-ft. posts. Apply to G. A. McAlpine, Glen-coe.

Ford touring car for sale; 1918 model; in first-class shape; with one-man top; a snap. Apply at Geo. Parrot's livery.

Young man wanted for office work. Applicants must be between ages of 16 and 20. Apply by letter to Box 18, Transcript office.

Wanted—general maid for family of 3; no children; good wages; no laundry work.—Apply Miss Blackburn, 652 Talbot St. London.

Car owners, attention! We now have in stock Noble's Standard Polish, for automobiles, phonographs, furni-ture, etc. Try it.—Wright's Hard-ware.

Lost—on Saturday night, in or near Glencoe, a black purse containing some money and pictures. Finder please leave at Transcript or Bell Telephone office. Reward.

Single comb White Leghorns; Bar-on's and Australian strain; wonder-ful layers of good sized eggs. Eggs, after the first of May, \$1.50 per set-ting. No better month for chicks.—R. C. Vause, Glencoe.

Will the party who picked up an auto tire left on the Longwoods Road near Wardsville Monday night please leave the same at Harry Harvey's store, Woodgreen, or notify J. W. Welch, Route 1, Crinan?

NOTICE TO CREDITORS

Notice is hereby given pursuant to "The Revised Statutes of Ontario, 1914, Chapter 121, section 56," that all Creditors and others having claims against the Estate of Daniel D. Mc-Lean, late of the Township of Ekfrid, in the County of Middlesex, Farmer, deceased, who died on or about the Sixth day of February, A. D. 1920, are required to send by post prepaid or to deliver to the undersigned, Solici-tors for Duncan McLean and Archibald McLean, Administrators of the Estate of the said Daniel D. McLean, deceased, their names and addresses and full particulars in writing of their claims and statements of their ac-counts and the nature of the securi-ties, if any, held by them.

And take notice that after the first day of June, A. D. 1920, the said Duncan McLean and Archibald McLean will proceed to distribute the assets of the said deceased among the per-sons entitled thereto, having regard only to the claims of which they shall then have had notice, and that the said Duncan McLean and Archibald McLean will not be liable for the said assets or any part thereof to any per-son of whose claim they shall not then have received notice.

Dated at Glencoe this Tenth day of May, A. D. 1920.

ELLIOTT & MOSS,
Administrators' Solicitors, Glencoe.

Notice to Clean Up

Notice is hereby given to all resi-dents of the Village of Glencoe that they are required to clean up their premises in the village by the fifteenth day of May, and furthermore that if the same is not done by that date it will be done by the Board of Health, and all expenses incurred thereby will be charged against the property. Wagons will be available at a small cost to remove all old tin cans, etc., that have accumulated.

By order of the Board of Health.
Charles George, Secretary.

Perhaps You Need A Bicycle—But Don't Know It

If you are a workingman you need a bicycle. It will save you long waits and tiresome rides in jammed street cars.

If you are a carpenter you can carry your kit from job to job and save valuable time. A collector can collect a very much larger amount of money.

With a bicycle you can make double, often triple, the number of business calls in a day. You can call on out-of-the-way prospects off the car lines.

Hundreds of teachers and thou-sands of pupils ride bicycles to school.

The bicycle solves the emergency de-livery problem of the grocer, butcher, druggist and other merchants. It is the cheapest form of quick transportation.

Bicycling saves time. Saves car fare. Saves expensive shoe leather. Saves money.

Do you need a bicycle?
If you do, you'll want one that you can depend on.

C. C. M. Bicycles are famous for easy-running and long service. They are built to stay out of the repair shop.

And the new *Hercules Positive Drive Brake*—the Coaster Brake without a side arm—is included without extra charge.

The Cow's Udder in Health and Disease

The cow's udder is divided into four quarters, two on each side, with a well marked line of separation between the two sides. Each quarter is separate or independent of the others, but the dividing wall of tissue can scarcely be seen. Fluid containing coloring matter injected into one quarter has been found not to pass to another quarter. A test connects with each quarter. Each test has one opening, contains folds of mucous membrane, has muscular fibres strengthening its walls, and also acting as drawstrings to keep the opening shut.

The upper end of each test enters a milk cistern into which open numerous large tubes. The large tubes lead into many smaller tubes and myriads of tiny ones which enter the true gland tissue of each quarter, each of which ends in a little reservoir or space where milk is manufactured.

Congestion of the Udder.

When the udder becomes engorged with arterial blood at milking time, or just prior to calving, the condition is normal; it is not a symptom of disease. If such a condition should continue, however, and were not relieved by escape of venous blood through the veins to the heart, inflammation would ensue. This is what happens in garget, which means inflammation of the mammary gland.

Considerable enlargement of the udder before calving, especially in heifers, is indicative of milk producing capacity. Usually it is accompanied by escape of blood into the surrounding tissues and this causes a doughy swelling which extends to or beyond the navel and upwards between the hind legs, sometimes as far as the vulva.

Overfeeding and lack of exercise tend to induce an aggravated congestion of the udder. Better management usually will obviate this. Should it occur, the heifer or cow should receive much less feed, have her bowels opened with one or more four to six-ounce doses of Glauber's salts in warm water. She should be well exercised daily and have her udder well massaged several times a day. If the congestion then persists or seems alarming, a little of the milk or serum may be stripped away twice daily and the udder may be given a thorough rubbing with equal quantities of compound soap liniment, alcohol and extract of witch hazel. Blood may be present, but subsides under the treatment advised.

Simple Mammitis or Garget.

When congestion lapses into inflammation, the mucous membrane lining of the large ducts in the teats and quarters, or of one teat and its quarter, swells, reddens and discharges mucus, just as happens when one has a cold in the head evidenced by running of the nose and redness and irritation of the membranes. If the inflammation spreads to the small tubes and tubules, a condition similar to bronchitis is caused. When the reservoirs become involved the trouble is like severe bronchitis; and when all of the tissues surrounding the reservoirs are affected and the numerous tubules fill up and the gland solidifies, the condition approximates that of pneumonia. Fever rarely is present in simple mammitis, while the appetite may be unimpaired and the cow may show little discomfort.

Common causes of simple mammitis are chill, bruising, incomplete, rough or irregular milking, coming in heat, indigestion, excessive feeding of protein-rich feed, injury. Unprotected concrete floors tend to induce slight chronic garget. Running of cows in summer followed by standing in cold water, or bruising of the distended udder between the thighs, when the cow is made to run before milking, are other causes.

Treatment consists in giving one pound of more of Glauber's or Epsom salts, along with one-half cupful each of salt and molasses in three pints of warm water, slowly and carefully from a long-necked bottle. This may be followed once or twice daily, according to severity of attack, with one-half ounce each of powdered pokeroor and saltpeter in soft feed or water. Local treatment consists in milking clean every two or three hours, bathing the udder at such times for fifteen minutes with hot water, and once or twice daily rubbing in a mixture of one part each of turpentine, and fluid extracts of pokeroor and belladonna.

Acute and Contagious Mammitis.

Germ infection is the common cause of severe or acute mammitis which causes a rise in temperature, loss of appetite, lameness, stiffness and pain. The milk curdles, they form, the milk is brown in color and after a time may contain pus. Abscesses may form and discharge. The cow becomes weak and thin and rarely makes a perfect recovery. Usually the quarter of the udder attacked either continues to discharge thin, pus-like or bad-smelling brownish fluid, or all secretion ceases and the quarter hardens and loses its function. The discharge from the udder, or the milk secreted, contains the infective germs and may cause the same disease in another milker's hands or be contracted from contaminated floors.

The causes are those of simple mammitis when infection follows, or infection may be the cause from the start; usually it is. Another diseased cow in the stable may be to blame, but the disease may be brought in by a new milker and be carried by his hands or by the cups of a milking machine not properly cleaned and sterilized.

Milking tubes, not sterilized before insertion in the teats, commonly lead to the worst forms of mammitis. When the disease spreads from cow to cow and remains in a stable month after month, the disease is termed contagious mammitis. In this form the udder may become gangrenous and the affected parts slough off, if the cow does not die of poisoning, shock and exhaustion.

Treatment consists in instantly isolating the affected cow and keeping her separate until perfectly well. This should be made: the invariable rule when anything goes wrong with a cow's udder. Such practice would prevent a host of troubles in the dairy stable. Internal treatment is the same as for simple mammitis, but tincture of acetone is used to abate the fever and belladonna is used to ease the pain and reduce inflammation of mucous membranes. Doses of pokeroor also are larger and more frequently given. The udder may be kept in hot poultices of antiphlogistine, spent hops or oatmeal porridge, or may be covered with clean cotton waste to be kept saturated with hot water. Milking should be done often, accompanied by massage of the udder. Twice daily from the first, the veterinarian—for one should always be employed in such serious cases—rubs in some favorite preparation which he has found effective. We like a mixture of equal quantities of carbolized oil, camphorated oil and compound soap liniment at first; if not effective, use one part of mercurial ointment and three of lard, lanolin or soft soap. Later full strength mercurial ointment may be used, or campho-phenique, while iodine ointment often is helpful. Iodine of potash also is given after the first symptoms pass off, and in all cases of contagious mammitis a trained veterinarian will give hypodermic treatment with serum or bacterins against pus. The stable should be thoroughly cleaned, disinfected and whitewashed, under direction of the veterinarian. Affected cows should be milked last or by one who does not attend to the other cows.

Teat Troubles and Treatment.

Filth and germ infection cause most teat troubles. Cleanse teats and udder each time before milking. Keep floors clean and disinfected. Supply plenty of clean bedding. Milk with clean, dry hands. Keep the finger nails trimmed short. Sterilize milking tubes if they have to be used. Often these instruments are a chief cause of ruinous mammitis. A large, clean clove, on which carbolized vaseline or benzoated oxide of zinc ointment has been applied often serves well as a test plug, between milking; or a lead dibble, or a plug made of the disinfectant. When sores form on the tips of the teats immerse the teats twice daily for five minutes or so in hot water containing all the boric acid of the water will dissolve; then apply iodine ointment to all sores of the teats that are obstinate in healing. Benzoated oxide of zinc ointment is excellent for chaps and slight sores; so is carbolized vaseline.

To sores of more severe character apply glycerine of tannin, after the boric acid solution bath, or use a three per cent. solution of tannin of Peru and alcohol, or carbolized acid and glycerine.

False openings or fistulae of the teats require an operation by a veterinarian when the cow is dry; meanwhile, coat them with flexible collodion or cover with a surgeons' plaster. This treatment sometimes helps; often it fails.

Lesky teats sometimes stop leaking if immersed in strong alum solution twice daily, or if coated with melted wax or paraffin, or collodion. Closes are sometimes used as plugs in such cases.

Put an old horse-collar on the neck of the self-sucking cow.

Poultry

I have found that fresh milk helps to keep down digestive disorders in young turkeys for the first three weeks. After that it pays to keep sour milk before them at all times. Toasted bread and milk is a good starting feed. The poulters are seed eaters, and sloppy cornmeal mash sometimes causes serious losses.

After the first few days I feed cracked wheat and corn, and a little fine dry oatmeal. The poulters must not be stuffed, but fed frequently on light rations, which is the way they eat when following the turkey mother on the range. Green food is essential in their diet. Fine grit and fresh water must be available at all times. Sanitation is very important, and it pays to scald the feed dishes frequently. The turkey is naturally a wild bird, used to a wide range. When raised on the farm every effort must be made to keep the feed dishes and the roosting places clean and free from pests.

Sheep Notes

When docking lambs I hold the four feet together, and tightly against my body. There are two methods of docking—one is by cutting off with a sharp knife, and the other is by burning with a hot iron. The latter is preferable, especially if the lamb has a large tail. The hot iron sears over the wound and prevents bleeding. If the lambs are old, it is well to tie a string around the stump to help stop the flow of blood.

I have practiced shearing sheep early for a number of years, and I believe it the best plan. I figure that I cannot afford to cause the flock a month or six weeks' discomfort for the sake of an ounce or two of wool or an extra one-eighth inch in the length of the wool.

My experience has been that early-shorn sheep are no more subject to cold than if the wool is on. The reason for spring colds is usually exposure to cold rains, and sheep shorn in the spring are not. I always shear my own sheep. Not being able to get the work done when I wanted it, caused me to undertake the job, and now I do not depend on someone else doing it for me. I shear whenever the weather becomes warm enough to cause the sheep discomfort.

To shear, I set the sheep up on its rump on a clean platform or floor. I begin at the head, splitting the wool down the throat, breast, and belly. I shear the entire head and neck first, with the sheep resting against me. In this way, if the sheep does not kick too much, the wool comes off in one unbroken fleece. At no time during the operation must the sheep get its feet on the floor. If it does, trouble is sure to start. As long as all four feet are off the floor the sheep will make no effort to get away.

NO FARM IS COMPLETE WITHOUT A VEGETABLE GARDEN

If the old statement, that a penny saved is a penny earned, holds good anywhere, I find that it holds good on what I get out of a garden. The vegetable crops you grow for your own use can rightly be credited on your books at just what it would cost you to buy the meat or canned goods they take the place of—that is why it pays me handsomely to grow my own vegetables for my own table, even when it might not pay me to grow them for market.

First of all, let me say, I have my garden near the house. That may seem, first off, like a fool sort of thing to do when I have half a dozen spots on other parts of the farm where the soil is as good or better, and which could be prepared for planting more conveniently, but I only have to prepare the garden for planting once in the entire season, and I have to plant and cultivate and keep careful watch of it week in and week out for many months.

Furthermore, as the chief object of the garden is to help out with the table, I want it handy, where the women-folk can call out and get a mess of vegetables without having to upset the whole morning's work, let the fire go out, and run a chance of the baby's falling down the well while the trip is being made over into the field beyond the pasture to pick a basket of peas or string beans or get a couple of squashes.

Incidentally, too, many of the troubles which I would experience with rabbits and other pests which are not likely to be serious unless they get an uninterrupted start, I don't have with a garden that is right near the house.

In the second place, I realize at the start that my garden spot is capable of yielding me more profit in proportion to the space it occupies than any other crop I grow on the farm and fertilizer accordingly.

Fertilize Generously.

I am not stingy with the manure, but pick out the best there is for this purpose—the old, well-rotted, powerful stuff from the heart of the heap, and even after I have given it a good dressing of manure I'm not afraid to use some fertilizer I have got, to a half-acre patch. That, of course, costs a few dollars in real cash money, but it is a good investment. When manure is well rotted and fine enough, I prefer to put it on and harrow it in after plowing, otherwise plow it under. The fertilizer I always harrow in.

I get the garden patch plowed just as early as I can work the soil—I don't keep putting it off until after I get the farm crops in. I plow it all and harrow it thoroughly, even though I can plant only part of it right off. The part I do not plant will sprout some weeds, but they can be killed with another harrowing, or by raking, in one tenth of the time it would take me to hoe them out of a growing crop. Moreover, by getting the entire patch plowed and harrowed thoroughly the first thing in the season, I am saving all the moisture possible against the dry weather that's pretty sure to come sometime during the summer.

But getting enough plant food into the soil is only half the story. The first two or three years I tried to have a real garden, a good many of the things I planted failed to come up satisfactorily. Of course, I blamed the seedsmen. I got the seed from. I was several years before I came to realize just how important it is to prepare the

To tie the wool I use the old wool board, as it leaves the fleece in better shape than tying by hand. In the absence of this I use a half bushel and, with very large fleeces, a bushel measure. I place three strings of wool (wine across this measure. Working the fleeces into a little ball, flesh side out, I start it into the measure with the back of the fleece down. When it is in the measure the belly will be well worked in toward the centre. The twine is then worked up and tied on top, and when taken out the fleece will be in a neat, compact bundle, flesh side out, and the work will be almost as well done as by the use of the wool boards.

When I do not wish to sell the wool as soon as shorn, I select a large box, as free from holes and cracks as possible, large enough to hold the wool. I line the box with one or more blankets, and start packing the wool in the bottom as tightly as possible. When the wool is all in, I place another blanket over the top and put on a lid tightly.

This box should be placed on blocks at least a foot off the floor, to lessen the chances of mice working in' it. When handled in this way wool will stay in prime condition a long time, and I have never had any loss from rotting the customer, as the goods are delivered at the door, but even then it is good business to promptly acknowledge and inform the buyer concerning the time of shipment.

When hatching eggs are shipped by parcel post it is not necessary to protect the customer, as the goods are delivered at the door, but even then it is good business to promptly acknowledge and inform the buyer concerning the time of shipment.

There are three parties to a farm lease: the tenant, the landlord and the land. But the land usually has to go unrepresented.

Welfare of the Home

Let Us Eat More Intelligently.

By a more intelligent method of eating we can materially decrease our food budget in these days of inflated prices. There can be no doubt that the ever-increasing high cost of living or decreasing purchasing power of the dollar has been the greatest single factor in bringing about industrial, social and labor unrest inasmuch as even with the materially increased revenue of the wage earner, he finds that at the end of the month he is no better off than in pre-war times when he was only receiving about one-half the amount that he receives now. It must be apparent then that we require more accurate knowledge as regards intelligent eating.

By this we mean from 3 to 4 ounces of proteins or muscle-building material, such as meat, eggs, milk, cheese, peas and beans, and approximately the same amount of fats, such as butter, fat meats, etc., and about 1 pound of carbohydrates, such as cereals, bread, vegetables, sugar, and certain fruits. To this must be added, however, the ingredients essential for supplying all the needs of the body in addition to those already mentioned, such as the various salts and so-called vitamins, and these are found plentifully in the various kinds of green vegetables, such as spinach, Swiss chard, beet tops, cabbage, carrots, etc. Hence the great necessity of growing these vegetables abundantly in our back yards and on our vacant lots, where they can be indulged in unsparingly all through the summer months at least.

We no longer look upon fruit and vegetables as luxuries, but as absolute necessities. They are requisite for health, and, consequently, for efficient labor. If we are going to maintain our bodies in a fit condition and with proper development, we must use fruits and vegetables freely and give them to the children in an appetizing and healthful form. If our children are not fond of vegetables, we must put forth every effort to cultivate in them the taste for them.

It is estimated by food experts that we should use at the very least one pound a day of fruit and vegetables for each member of the family. To this end it is advised by these same experts that we do not spend more

It must be apparent then that we require more accurate knowledge as regards intelligent eating.

By this we mean from 3 to 4 ounces of proteins or muscle-building material, such as meat, eggs, milk, cheese, peas and beans, and approximately the same amount of fats, such as butter, fat meats, etc., and about 1 pound of carbohydrates, such as cereals, bread, vegetables, sugar, and certain fruits. To this must be added, however, the ingredients essential for supplying all the needs of the body in addition to those already mentioned, such as the various salts and so-called vitamins, and these are found plentifully in the various kinds of green vegetables, such as spinach, Swiss chard, beet tops, cabbage, carrots, etc. Hence the great necessity of growing these vegetables abundantly in our back yards and on our vacant lots, where they can be indulged in unsparingly all through the summer months at least.

We no longer look upon fruit and vegetables as luxuries, but as absolute necessities. They are requisite for health, and, consequently, for efficient labor. If we are going to maintain our bodies in a fit condition and with proper development, we must use fruits and vegetables freely and give them to the children in an appetizing and healthful form. If our children are not fond of vegetables, we must put forth every effort to cultivate in them the taste for them.

It is estimated by food experts that we should use at the very least one pound a day of fruit and vegetables for each member of the family. To this end it is advised by these same experts that we do not spend more

POSSIBLE PLAY GROUNDS

The readers of these articles do not need to be convinced of the importance and educational value of children's play. Among the intelligent parents of today it is now largely a question of ways and means. Play apparatus such as slides, swings, saws and sand boxes are being purchased and set up in yards and gardens on every side and most schools are now well equipped with such devices. This provision for occupation is good—very good—as far as it goes, but it does not go far enough.

An observer of children at play knows that the usual types of apparatus furnish them many well occupied hours, but it is a common occurrence for these expensive articles to be deserted for the street, the vacant lot, the building in process of construction around the corner, the forbidden pond or the lake. How can we add to the attraction of the home yard so as to increase the number of hours of contented play there and decrease those undesirable wanderings? To meet this need I offer the suggestion which comes to me from my observation of a school in my vicinity. In the ground surrounding the building there is a so-called Construction Zone, a strip of land where any child or group of children may work according to inclination. Garden tools, hammers, nails and boards of various sizes were furnished. Within a few months a variety of houses, huts, tents and other nameless contrivances appeared, each one representing hours of honest effort and moments of great satisfaction to the little carpenter who had constructed it.

Last spring one of my neighbors turned over a tract of land in her yard to the boys, for constructive purposes and their entire vacation was devoted to the excavation of a lake into which flowed a river, having its source under a distant hose connection. It was September before the water could be turned in and the building of rafts began.

If the parents of young children will give them paving blocks, boards, boxes, a ladder, a pair of trestles, a clothes-line and pulleys, hammers, saws, nails and shovels, the children will do the rest. But they should not be given too many tools at once.

In this day of combinations a community play yard of this description could easily be put into operation. It would be necessary to place the tools in the care of some responsible person who could give them out and put them away. Of course ground occupied would look like chaos again, but the result would be worth the price. If the chosen spot could be surrounded by a vine covered fence or a hedge of elder, willow or other quick growing greenery, it would probably be a gratification to the neighborhood, but a community play yard is a co-operative possibility.

What Manure is Worth to You.

If you saw a neighbor throwing five dollar bills around his barnyard, or using them to light his pipe, you would say he was crazy; and probably you would be right.

And yet, whenever a ton of manure is left out in the weather until the spring has all leached out, a five dollar bill is slipping out of your fingers. That is the value determined in a series of trials, or various experiments made, by the University of Missouri College of Agriculture.

To be exact, the average application of eight tons of manure to the acre, once in four years, has increased the yield of corn 10.5 bushels, oats 5.7 bushels, wheat 5.24 bushels, and clover hay 937 pounds. At prices which prevailed early in 1919, this increase would be worth \$182, and at pre-war prices \$224, for each ton of manure applied. This leaves a net profit of \$2.82 at present prices, or \$1.34 at pre-war prices for each ton of manure applied.

The full value of the manure is usually not obtained during the first four years, for the soil is left in better condition, and the effect on later crops is often quite significant.

As about 35 per cent. of the nitrogen and 55 per cent. of the potassium is to be found in the liquid material, it pays to use plenty of absorbent materials, and to get the manure in the fields before this has had a chance to leach away.

Liberality with the use of bedding and the use of concrete-lined manure pits, will do much to conserve this most valuable part of the manure. Furthermore, it should be remembered that nitrogen is lost in ammonia gas when manure is allowed to lie and ferment. Whenever manure gets heated up, you may be sure that ammonia is being lost, and very often it can be detected by its unusually pungent odor.

The total solid and liquid manure produced in a year by a well-fed, mature horse is about eight tons, with a plant-food value of more than \$30. In the case of a well-fed steer weighing from 1,000 to 1,400 pounds the production is nine to eleven tons, with a slightly greater value than the manure from the horse.

The Missouri College points out that from three to five months' exposure to the weather, in any open lot, may cause the loss of approximately one third of a plant food.

A Chicago business firm has a bonus of \$100 to any employee who announces a new baby in his family.

Make Heavy Hauling Safe & Easy

Imperial Eureka Harness Oil
penetrates the pores of the leather—makes it weather proof. Unlike vegetable oils, it will not become rancid. It prevents drying and cracking and keeps straps and traces pliable and strong. Imparts a rich, black, lasting finish and makes harness look like new.

Imperial Mica Axle Grease
—is the most widely used axle lubricant on the market. Its mica flakes work their way into the pores of the axle, making it smooth and frictionless. Imperial Mica Axle Grease lubricates thoroughly under the most strenuous conditions. Makes loads easier to haul. Reduces the strain on harness and horses.

REBELS OCCUPY MEXICO CITY: CARRANZA FORCED TO FLEE

Revolutionary Forces State President Carried Out Wholesale Slaughter of Political Prisoners Before Abandoning City.

Washington, May 9.—Official confirmation of the occupation of Mexico City by rebel forces at noon on Friday, May 7, was received to-day by the State Department from the American Embassy. There was no disorder and no foreigners were interfered with, the message said.

El Paso, Texas, May 9.—General Francisco Murguía, Carranza Military Commander at Mexico City, before leaving the Capital, which now is in complete possession of revolutionary forces, carried out a wholesale slaughter of political prisoners at Santiago, the military prison, according to a bulletin issued at revolutionary headquarters here to-night.

Fifteen Mexican Generals were among those reported slaughtered. "The city was shocked over this bloody episode for the Carranza regime," the bulletin said.

Nogales, Ariz., May 9.—Reports that President Venustiano Carranza

of Mexico had been captured by the forces of Gen. Alvaro Obregón and Gen. Benjamin Hill were received last night from Hermosillo, Sonora, at Obregón headquarters, Nogales, Sonora, opposite here.

Vera Cruz, May 9.—President Carranza, who fled from Mexico City at the approach of Gen. Obregón's army, is a fugitive in the eastern part of the State of Tlaxcala, and is believed to be trying to reach this city.

The railroad train in which the President left the Capital was stopped at the City of Tlaxcala by detachments of Gen. Obregón's army, and the President was forced to leave his car and flee on horseback. Gen. Sánchez, an adherent of Obregón, is attempting to intercept the President in the mountains.

Instructions that the life of President Carranza be spared have been issued by Obregón, who has given guarantees to the residents of cities under control of his forces.

RAIDERS DESTROY IRISH BARRACKS

Explosives Used in Attacks on Police Depots.

Dublin, May 9.—After an attack lasting upwards of two hours, a party of 200 armed men set fire to the R. I. C. barracks at Cloyne, County Cork, on Saturday night, compelled the garrison of six men to surrender and burned the building to the ground. Three houses close to the barracks were also burned down. The assailants were armed with rifles, shotguns and bombs, the police replying with carbines and hand grenades. About 1 o'clock in the morning an explosion occurred which blew in a portion of the gable end of the barracks, and the raiders then inserted explosives which made the opening wider. They tried to enter the building through the breach, but were prevented by the police, who used hand grenades and rifles freely.

Finally the attacking party, finding it impossible to overcome the resistance of the garrison, set the barracks afire, whereupon the police evacuated the place.

In preparation for the attack the roads had been blocked for miles around with trees, and the telephone wires cut.

Another attack was made by a gang of armed men early Sunday morning on the police barracks at Newry Hamilton, County Armagh. The garrison, consisting of a sergeant and four constables, put up a splendid defense. The attackers, after picking the loyalist houses in the locality, attacked the barracks with

RUSSIAN BORDER STATES ARE ALLIES

League Formed to Oppose Red Armies.

Geneva, May 9.—Under the influence of the Polish victory over the Bolsheviks, the long proposed alliance of the Russian border states against Red Russia is assuming definite shape. The negotiations in Warsaw between Poland, Finland, Lithuania and Latvia are progressing favorably. General Rosadowsky has arrived at Bucharest with proposals from the Polish Government to Rumania, which are likely to lead to a satisfactory agreement.

The constitution of a military and economic league, comprising Poland, Rumania, the Ukraine and the Baltic countries, is reported imminent.

WHEAT BOARD ADVANCE PRICES

Ontario Millers Must Pay Increase of 40 Cents.

Winnipeg, May 9.—The Canadian Wheat Board issued new regulations effective at midnight, May 8, advancing the price to mills of all grades of Western wheat 35 cents per bushel, and British Columbia, Ontario and Quebec wheat 40 cents per bushel. Another regulation, effective at the same time, increases the maximum prices of bran and shorts to the extent of 35 per ton.

BATUM IS CRUX OF SITUATION IN NEAR EAST STRUGGLE

Red Armies Are Forcing Sway Over Whole Contiguous Territory—Relief Workers Assembled There.

A despatch from Batum, via Paris, says:—All American women relief workers in the Caucasus have been assembled in Batum.

The bridge at Mobletti, 43 miles north of Batum, and the pipe line which carries oil from Baku have been damaged by explosions.

The military Governor of Batum has received orders from Constantinople to concentrate his forces in the city. The Georgian troops are on the border of the province, but have not crossed it.

The Congress of Labor Unions in Batum have passed a resolution that the city be placed under Bolshevik rule. The Mussulmans in Batum are against government by the Georgians. Three thousand British troops at Batum probably will be ordered to evacuate if necessary.

The British cruiser Aradoc is prepared to bombard Gargari Pass, south of Sautchie, when the Bolsheviks appear.

The British have informed General Wrangel, commander of the volunteer

troops in Crimea, that efforts to make terms for him with the Bolsheviks are not encouraging. They say the Bolshevik Foreign Minister is trying to obtain a political concession they cannot grant. It seems probable they cannot reach an agreement for the volunteers. They assert a continuation of the struggle will have only one result if there are no shipments of material and supplies.

Martial law has been declared throughout Georgia, and the railroads are operating under the Military Council. The situation is critical in Tiflis, where it is expected the local Bolsheviks will take over the Government in a few days. Work of the Near East Relief is greatly reduced and is carried on under difficulties. Col. Haskel, United States of America, Allied High Commissioner for Armenia, orders that no further purchases be made in the United States for relief in Armenia.

The Georgian Government refuses to permit oil export to Armenia, which is stopping the railroads there.

Protesting against civil positions being filled by other than ex-soldiers, representatives of the large Canadian Veteran Clubs paraded before Mayor of Toronto recently. Photo shows J. H. Flynn on left, organizing Secretary G.A.U.V.: J. V. Conroy, G.W.V.A.; and E. A. LeStrange, Army and Navy Veterans.

GERMAN TROOPS MAINTAINED UNDER GENERAL ERHARDT

Hanover, May 9.—General Erhardt, who has mysteriously disappeared from Muenster Camp, had, according to estimates of allied officers, approximately 10,000 troops under his command here. Of these 5,000 belong to the Marine Brigade, while in spite of his denials there are a considerable number of Baltic troops, together with a majority of the State troops who were driven into the British occupied zone by the workmen's army in the Ruhr fighting and have since been returned to Germany.

Then, too, numbers of nondescript soldiers of various regiments of the old regular army have flocked to the

camp, and there, in the heart of the pine forest, they are living in concrete and wooden huts, supplied with good food and money from Berlin, and splendidly equipped, is an excellent fighting force, the most formidable and emphatically reactionary in Germany to-day.

The soldiers I saw at the camp are certainly the smartest I have seen this side of the Rhine. They walk with energetic steps, their appearance is neat and clean, they salute their officers with military precision.

"We are just waiting here for any orders," one of these Pretorians told me to-day; "we want to remain marines, we do not want to be disbanded."

TO BREAK H.C.L. IN GREAT BRITAIN

Labor Leaders to Break Vigor Circle of High Wages and Increased Costs.

A despatch from London says:—The continuous demands for higher wages in one trade after another are beginning to alarm the Labor leaders themselves, and they are realizing that they can only lead to disaster.

The Executive of the "Triple Alliance" of miners and transport workers, which is now in session here, although it has before it several wage demands, has embarked upon a determined effort to break the vicious circle of high wages and the increase in the cost of living.

Another Big Three, the Parliamentary Committee of the Trades Union Congress, the Labor party and the co-operative movement, are to be called upon to join the alliance in an exhaustive inquiry into the reasons for the high cost of living, and to evolve a plan for its reduction.

The members of the alliance discussed this question, which they regard as the "most vital affecting our social life," for the greater part of an afternoon's meeting.

They will meet again at an early date to receive the report of the joint body, and their views will be submitted to the Government with a view to the latter taking "such action as will substantially reduce the present high cost."

Queen Mother Stricken With Influenza

London, May 10.—Queen Alexandra, it is learned, is prostrated with influenza, which swept through her household. She has been confined to bed for several days, but her condition is not regarded as serious. There is anxiety because of her advanced age.

Sir Hamar Greenwood Re-elected

A despatch from Sunderland, Eng., says:—Sir Hamar Greenwood, Chief Secretary for Ireland, was re-elected to Parliament on Friday in the by-election necessitated by his recent appointment to the Irish Secretaryship. Sir Hamar received 22,813 votes, as against 14,379 for V. H. Rutherford, the Labor candidate, and 5,065 for W. Howe, Independent Liberal.

EIGHT HISTORIC FIELDS MARKED

Memorials to Canada's Fighting Dead in France and Belgium.

A despatch from Ottawa says:—Memorials to Canada's fighting dead will be erected at eight historic battlefields in France and Flanders if the recommendations of the Special Committee on War Memorials is adopted as submitted to Parliament.

Representatives of Canada's returned soldiers of Canadian colleges and architects' societies and Government officials have completed their investigations and submitted their proposals for war memorials. With the proposals are the report of Brig. Gen. H. T. Hughes on military sites, and of Professor Percy E. Hobbs, professor of architecture at McGill University, on the proposed competition in which designs will be invited, and from which the prize design will be carried out. The total cost of the work is estimated roughly at \$1,500,000.

The committee has selected eight sites for the memorials. In Belgium sites at St. Julien, Crest Farm, Paschendale and at Hill 62, Observation Ridge have been accepted as gifts from the Belgium Government.

A site at Bourlon Wood has been accepted as a gift from Comte De Franqueville, Mayor of Bourlon, and four other sites, at Hill 145, Vimy, at the cross roads of Dury, at Courcellette and at Hospital Wood between Calx and La Queenel have been acquired by the committee at a total cost of \$1,500.

War-Wrecked French Coal Mine Opens Again

A despatch from Paris says:—The first coal mine, wrecked during the war, to resume operations was opened at Ancier early this month. It has been equipped with the most modern electrical machinery, and it is expected its pre-war production will be eclipsed.

Price of Bread Soars in Britain

A despatch from London says:—The price of the quarter loaf of bread will be raised to 25 cents next Monday. This is the second advance in a month.

Weekly Market Report

Wholesale Grain.

Toronto, May 11.—Manitoba wheat—No. 1 Northern, \$2.80; No. 2 Northern, \$2.77; No. 3 Northern, \$2.73, in store Port William.

Manitoba oats—No. 2 CW, \$1.19 1/4; No. 3 CW, \$1.16 1/4; extra No. 1 feed, \$1.14 1/4; No. 1 feed, \$1.14 1/4; No. 2 feed, \$1.11 1/4, in store Port William.

Manitoba barley—No. 3 CW, \$1.81 1/4; No. 4 CW, \$1.66 1/4; rejected, \$1.62; feed, \$1.62, in store Port William.

American corn—No. 3 yellow, \$2.20; nominal, track, Toronto, prompt shipment.

Ontario oats—No. 3 white, \$1.05 to \$1.07, according to freights outside.

Ontario wheat—No. 1 Winter, per car lot, \$2 to \$2.01; No. 2 do, \$1.98 to \$2.01; No. 3 do, \$1.92 to \$1.93, f.o.b. shipping points, according to freights.

Ontario wheat—No. 1 spring, per car lot, \$2.02 to \$2.03; No. 2 do, \$1.98 to \$2.01; No. 3 do, \$1.95 to \$2.01, f.o.b. shipping points, according to freights.

Peas—No. 2, \$3.00.

Barley—Malt, \$1.85 to \$1.87, according to freights outside.

Buckwheat—No. 2, \$1.75 to \$1.80, according to freights outside.

Rye—No. 3, \$2.15 to \$2.20, according to freights outside.

Millfeed—Car lots, delivered Montreal freight, bags included: Bran, per ton, \$51; shorts, per ton, \$58; good feed flour, \$3.75 to \$4.00.

Hay—No. 1 per ton, \$30 to \$31; mixed, per ton, \$25, track.

Straw—Oats, per ton, \$16 to \$17; track, Toronto.

Country Produce—Wholesale.

Cheese—New, large, 30 1/4 to 31; twins, 31 to 31 1/4; triplets, 31 1/4 to 32; Stilton, 34 to 35; old, large, 32 to 33; do, twins, 33 to 33 1/4.

Butter—Fresh dairy, choice, 57 to 58; creamery, 54 to 56.

Margarine—38 to 38c.

Eggs—New laid, 56c.

Dressed poultry—Spring chickens, 39 to 40; roosters, 25c; fowl, 35c; turkeys, 53 to 60c; ducklings, 38 to 40c; squabs, dozen, \$6.00.

Live poultry—Spring chickens, 30 to 32c; fowls, 35 to 40c; ducks, 35 to 40c.

Beans—Canadian, hand-picked, bus, 35; primes, \$4.50; Japan, 35; Madagascar Lima, 15c; Japan Lima, 15c, lb.

Honey—Extracted.

clover, 5-lb. tins, 27 to 28c; 10-lb. tins, 25 to 26c; 60-lb. tins, 25c; buckwheat, 60-lb. tins, 18 to 20c; comb, 16-oz., \$6 to \$6.50 doz.; 10-oz., \$4.25 to \$4.50 dozen.

Maple products—Syrup, per imperial gal., \$3.50 to \$3.75; per 6 imperial gals., \$3.25 to \$3.50.

Smoked meats—Hams, med., 40 to 42c; heavy, 32 to 34c; cooked, 56 to 59c; rolls, 31 to 32c; breakfast bacon, 45 to 50c; backs, plain, 50 to 52c; boneless, 54 to 57c.

Cured meats—Long clear bacon, 28 to 29c; clear bellies, 27 to 28c.

Lard—Pure, tierces, 28 to 28 1/4c; tubs, 28 1/4 to 29c; pails, 28 1/4 to 29 1/4c; prints, 29 1/4 to 30c; Compound tierces, 27 1/4 to 28c; tubs, 28 to 28 1/4c; pails, 28 1/4 to 28 1/2c; prints, 29 to 29 1/4c.

Montreal Markets.

Montreal, May 11.—Oats, Canadian western No. 2, \$1.23; do, No. 3, \$1.25.

Flour—Man., new standard grade, \$13.40 to \$13.70. Rolled oats, bag 90 lbs., \$5.50 to \$5.60.

Shorts, \$5.25. Hay, No. 2, per ton, \$30 to \$31; mixed, \$25, track.

Straw—Oats, per ton, \$16 to \$17; track, Toronto.

Country Produce—Wholesale.

Cheese—New, large, 30 1/4 to 31; twins, 31 to 31 1/4; triplets, 31 1/4 to 32; Stilton, 34 to 35; old, large, 32 to 33; do, twins, 33 to 33 1/4.

Butter—Fresh dairy, choice, 57 to 58; creamery, 54 to 56.

Margarine—38 to 38c.

Eggs—New laid, 56c.

Dressed poultry—Spring chickens, 39 to 40; roosters, 25c; fowl, 35c; turkeys, 53 to 60c; ducklings, 38 to 40c; squabs, dozen, \$6.00.

Live poultry—Spring chickens, 30 to 32c; fowls, 35 to 40c; ducks, 35 to 40c.

Beans—Canadian, hand-picked, bus, 35; primes, \$4.50; Japan, 35; Madagascar Lima, 15c; Japan Lima, 15c, lb.

Live Stock Markets.

Toronto, May 11.—Choice heavy steers, \$14.50 to \$14.75; do, good, \$13.50 to \$13.75; butchers' cattle, choice, \$13.25 to \$13.75; do, good, \$12.75 to \$13; do, med., \$11.75 to \$12.25; do, com., \$10 to \$10.75; bulls, \$12 to \$12 1/2; do, good, \$10.25 to \$10.75; do, rough, \$8 to \$8.50; butcher cows, choice, \$11.25 to \$12; do, good, \$10.50 to \$11; do, com., \$7.50 to \$8; stockers, \$9.25 to \$11; feeders, \$11 to \$12.50; canners and cutters, \$4.50 to \$6.25; milkers, good to choice, \$100 to \$165; do, com. and med., \$65 to \$75; springers, \$90 to \$165; lambs, yearlings, \$10 to \$19; calves, good to choice, \$15 to \$19; sheep, \$9 to \$18; hogs, fed and watered, \$20.25; do, weighed off cars, \$20.50; do, f.o.b., \$19.25; do, do, country points, \$19.

Montreal, May 11.—Butcher steers, choice, \$11 to \$11.50; butchers' cattle, choice, \$11 to \$11.50; com., \$8 to \$10.50; butchers' cows, med., \$7.50 to \$10; canners, \$6 to \$8.50; cutters, \$6 to \$7; butcher bulls, com., 8 to 10; Good veal, \$14.50 to \$16.50; med., \$10 to \$14. Clipped sheep, \$10 to \$12.50; spring lambs, \$10 to \$14; ewes, \$10 to \$14. Hogs, off car weights, select, \$21; lights, \$20 to \$21; sows, \$17.

Canada's Wheat Will Bring \$2.55

A despatch from Winnipeg says:—James Stewart, Chairman of the Canadian Wheat Board, announces that the value of the participation certificates will not be less than 40 cents per bushel. This, with \$2.15 already guaranteed, will bring the price to \$2.55. United States wheat averaged \$2.14. Many of the farmers believe that the price will indeed be much higher than the most optimistic had hoped for, on account of the abnormal increase in the price of wheat from the time it left the farm until it was sold to European buyers.

New Building for the Bank of England

A despatch from London says:—The Bank of England, known the world over as "The Old Lady of Threadneedle Street," is to be rebuilt. The new structure, according to expectations, will be many stories high and embrace some wonderful architecture.

Franchise for South African Women

A despatch from Cape Town, Union of South Africa, says:—The House of Assembly passed a resolution favoring extension of the Parliamentary franchise to women.

Facts About Canada

A California dredging company is placing a large plant on the Peace River to conduct placer mining operations for gold.

It is reported that a British company is to establish an iron and steel industry in British Columbia to utilize the native ores of the Province.

Investigation of the Dauphin oil field may be undertaken by the Manitoba Government, if the reports of experts on its possibilities are satisfactory.

The Imperial Oil Co. will spend \$2,000,000 for oil explorations in Alberta this year. One well will be drilled south of Pincher Creek and one each at Fort Norman and Great Slave Lake. A well is being put down in the Czar district and the Brazeau region may be examined.

In 1919 Quebec produced 12,353,667 pounds of maple sugar and 1,470,275 gallons of maple syrup, the whole estimated at \$6,396,535, taking as a basis the sugar and the syrup converted into sugar, at an average price of 25 cents per pound.

The Province of Quebec, in 1919, had 518 lakes and 49 rivers leased for fishing purposes, providing a revenue of \$76,248.

The Gouin (La Loutre) dam, on the upper waters of the St. Maurice river, Quebec, has a storage capacity of 160,000,000 cubic feet and a water area of 300 square miles, forming the second largest storage reservoir in the world. It is exceeded in size only by that of Gatun Lake, on the Panama Canal. The storage at Gouin will permit a regulated permanent flow of over 12,000 cubic feet per second at Shawinigan, rendering 1,000,000 horsepower now available on the St. Maurice.

The demand for furs and the slaughter of fur-bearers necessary to meet this demand may be judged from the fact that at the London April fur auction sale 8,780,582 pelts were offered.

In the fiscal year, 1918-19, 12,723,000 pelts were imported into the United States from Canada. These imports included large numbers of rabbit skins from Australia and New Zealand, and also about 250,000 sheep skins from Australia, New Zealand, India and Peru. These figures demonstrate that Canada is exporting more furs than ever before in her history, and that the number of fur-bearers taken in 1918-19 was in excess of the annual increment, thus trenching upon our capital stock.

British Columbia crabs are again being canned and offered on the local market. It is some years since this industry was discontinued, California and Japanese competition rendering the British Columbia industry unprofitable.

ALBERTA SEEDING A MONTH LATE

Feed Situation Improved With Milder Weather.

A despatch from Edmonton, Alta., says:—The first semi-monthly crop and live stock report issued by the Department of Agriculture states that the seeding in Alberta is from twenty to thirty days later by the calendar than it was last year, varying with locality. If quick general seeding were possible, the prospects are the best in a dozen years.

There is a depth of frost over two and a half to four feet of moist soil over the driest parts of the Province, and the report asserts that once the seed is in it has a moisture supply for germination and growth to carry the crop well into June.

Central Alberta has made scattered beginnings on dry spots. Peace River is backward, except along the valley. The late season is going to curtail the wheat acreage, especially in the centre and north, but there are much better prospects for a good total acreage than people entertained at one time. The feed situation has greatly improved since the cattle and horses have got on open ground.

A despatch from Moose Jaw, Sask., says:—Seeding will be general in the Peace River district at the end of the week, according to the Government Bureau Agent, E. M. Hagen, who is receiving many applications for men from the farmers.

EXPECT NO CHANGE IN IRISH POLICY

Sir Hamar Greenwood Sworn in as New Chief Secretary.

A despatch from Dublin says:—Sir Hamar Greenwood, the new Chief Secretary for Ireland, was sworn in before the Irish Privy Council with Dublin indifference and cold toward him. The Dublin papers made no comment upon his arrival, except the Irish Times, which said: "We assume that the new Chief Secretary will take immediate steps for the restoration of law and order."

The fact is, however, that Sir Hamar is ignorant of the actual state of affairs in Ireland, however good his intentions may be. Dublin generally believes that, even if matters have not gone too far for any new regime to cope with, Sir Hamar cannot move until he has learned what he is up against, and that tuition, it is evident, will come from the same permanent officials and advisers who directed him Macpherson's course.

Despite Sir Hamar's hopes, nobody in Dublin expects any drastic or enlightened change from the old policies.

Britain Bears Heaviest Direct Burden of War

A despatch from London says:—Chancellor of the Exchequer Austen Chamberlain on Friday gave the per capita direct taxation figures for the great powers during 1919:

United Kingdom \$76

United States \$27

France \$12

Italy \$11

The Chancellor cites these figures in reiterating his assertion that the people of Great Britain are bearing the heaviest burden of the war costs.

All-Red Cable Links British Empire

A despatch from London says:—An important new London link with Canada and the other Dominions has just been inaugurated. The Imperial cable route is now connected between the General Postoffice in London and Halifax direct, via Penzance. The cable, at present used exclusively for business messages for Australia and New Zealand, will pass over the route via Halifax, Vancouver and Norfolk Island.

Denmark Contributes to Rheims Rebuilding

A despatch from Copenhagen says:—More than one million francs, collected in Denmark for the rebuilding of the Cathedral of Rheims, have been delivered to M. Claudel, French Minister in Copenhagen. The Minister thanked the Danish people, expressing his admiration of the fine result reached by Denmark ahead of all other countries.

Discover More German War Supplies

A despatch from Berlin says:—Discoveries of hidden arms continue in northeastern Germany. The Baltic Island of Ruegen has proved a regular arsenal of weapons which had been secreted by Pomeranian monarchist plotters, for, in addition to the 1,000 rifles already reported, another 500 have just been brought to light, together with 50 more machine-guns.

Canada to Receive Nine Airships

A despatch from London says:—Nine non-rigid airships have been promised as gifts to Canada by the British Government, which is disposing of its surplus war equipment. The airships include some used for coast reconnaissance and also of the zero type. South Africa is receiving a number of zeros.

THURSDAY, MAY 13, 1920

NEWBURY

Wm. H. Grant of Windsor spent the week-end with his parents here. Mr. Grant with his wife and mother-in-law, Mrs. Fenby, spent the winter in California. The two ladies are visiting in Duluth before taking up housekeeping in Windsor.

A special Children's Day service will be held in Christ church on Sunday at 11 a. m.

Rev. Mr. Farquarson will take up his duty in Knox church on Sunday. Born—in St. Joseph's Hospital, London, on Saturday, May 8, to Mr. and Mrs. Ed. J. Grant, a son.

The congregation of Christ church presented their rector, Rev. R. J. Murphy, with a substantial purse on Tuesday last.

Ed. J. Grant and son Norman of London motored down Saturday and Master Norman will remain for a short stay with his grandparents, Mr. and Mrs. John Grant.

Mrs. Mary Harris returned on Tuesday from Detroit where she had spent the winter with her daughter, Mrs. Gibb.

Miss Johnston of Shetland visited Miss Jean Archer here this week.

Dr. A. P. Owens bought a new Overland car last week.

The Newbury-Mosa Women's Institute will meet at the town hall Wednesday, May 19th, at 2.30 p. m., for election of officers and yearly report. On or about June 16th the summer speaker is expected to be present and the other Mosa institutes will also be present. All ladies welcome.

WARDSVILLE

Mr. Reynolds of Mt. Brydges preached in the Presbyterian church Sunday. Little Jack Harvey is very ill.

Mrs. Brown and family of Bridgen visited her uncle, W. Dykes, last week. Mr. Hobbs of Birr is spending a few days with his daughter, Mrs. J. Muligan.

Rev. Mr. Farquarson will be inducted on Wednesday in the Presbyterian church here.

George Constant of Windsor spent the week-end at his home here.

Mrs. Branton returned home last week after spending the winter at Delaware and St. Thomas.

Mr. Throver of Watford visited at Mr. Sloan's last week.

Little Jean Love is on the sick-list. Mother's Day was observed in the Methodist church Sunday.

The A. Y. P. A. of the Anglican church held a social evening in the basement last Friday. A good program was rendered and everyone enjoyed themselves.

Miss Rachel Smith spent a few days here last week. She has accepted a position at Woolworth & Co.'s, London.

Miller's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring all worm troubles to an end. They are a strengthening and stimulating medicine, correcting the disorders of digestion that the worms cause and imparting a healthy tone to the system most beneficial to development.

NORTH EKFRID

Wm. Down attended a convention for church union held in London last week.

Mrs. Black of Flint, Mich., spent the week-end at the home of her sister, Mrs. Wm. Butler.

The Swastika Mission Band girls met at the home of Medie Pierce on April 28. A very enjoyable time was spent.

Wedding bells will be ringing in North Ekfrid in the near future, also on the 6th concession of Caradoc. George Pettit of Caradoc and Miss Ethel Wallis of Metcalfe were joined in the holy bonds of matrimony on May 3rd.

Housecleaning and gardening are the order of the day.

Mrs. Foster is visiting her nephew, Lant, Foster of Thorndale.

Miss Ila Roemmele is home with her mother for a couple of weeks.

Most farmers are nearly done seeding and getting ready for hoe crops.

Art. Hardy has gone to Windsor to work at carpenter work for the summer.

Miss Ada Howe spent the week with Mrs. George Chisholm.

The Women's Mission Society met at the home of Mrs. Wm. Down, sr. on Thursday last, with a good attendance.

Born—to Mr. and Mrs. John Kettlewell, a daughter.

Miss Lizzie Pierce spent Sunday with Miss Medie Pierce.

SHIELDS SIDING

The farmers' club met in the school house on Friday night.

Ferguson's Crossing. Needle Club met at the home of Mrs. Neil D. McVicar and spent the afternoon quilting, also making arrangements for a social to be held on the school grounds.

Mr. and Mrs. Bowie and family motored over and spent a day last week with Mr. and Mrs. A. D. Ferguson.

Mrs. Campbell of Strathroy is visiting her aunt, Mrs. Hugh R. McAlpine. Dan and Duncan P. Campbell, Ekfrid, spent a day recently at the bedside of their aunt, Mrs. Nancy Ferguson, who we are sorry to say is no better.

Mr. and Mrs. D. C. McTavish spent Sunday with her sister, Mrs. M. McAlpine. Dutton.

Mrs. Neil A. Leitch of Alvinston spent last week at the home of her brother, Angus A. Campbell.

The Alvinston flax mill company are busy sowing flax on the farm of Donald Campbell. They are sowing 60 acres.

Glad to see Mary B. McLachlin home from London hospital.

KILMARTIN

Mr. and Mrs. John A. McVicar and Miss Graham of Dutton, accompanied by Mr. and Mrs. Donald McGregor of this place, spent a day with friends in Brooks.

Mary Munroe, little daughter of Mac. Munroe of Walkerville, is spending some time with her grandparents, Mr. and Mrs. Neil Munroe.

Rev. Mr. McKillop of Tait's Corners will conduct a Gaelic service in Burns' church, Mosa, on Sunday, June 6, at 11 a. m. There will be a short address in English.

NEWBURY CASH STORE

A few pairs Men's Standard Weight Overalls still left at \$2.90.

Also Men's Heavy Work Shoes at reasonable prices.

Headquarters for Oranges, Lemons, Bananas, Cocoanuts.

W. H. PARNALL NEWBURY

CAIRO

Mrs. Ed. Arnold spent Thursday in Strathroy.

Miss Ethel Hoffman has returned after visiting friends in Detroit and Windsor.

Mr. and Mrs. Alf. Wehlann visited friends in Highgate and Rodney during the week.

Mr. and Mrs. George Arnold visited their uncle Edward on Sunday.

The body of Miss Flo Arnold passed through here on Thursday for Aughrim.

Mrs. G. W. Young and daughter Mamie visited friends in Clachan on Sunday.

CASHMERE

Mrs. J. Willick and daughter Beccie of Bothwell spent Sunday with the former's son, Ross.

Mrs. Watterworth is spending a few days with her parents, Mr. and Mrs. Robert Webster.

James Allen has purchased a Ford car.

Mrs. Charles Tunks spent a few days with her sister, Mrs. McLellan, at Glencoe.

Mrs. David Bobier is in London spending the week-end with her daughter, Miss Hazel.

Miss Muriel Bobier of Toronto is home and on the sick-list.

Nearly all the seeding is done in this vicinity.

League as usual on Wednesday at 8 p.m. Miss Elsie Thompson is leader and Miss Mildred Taylor has the topic: "What our league has done for missions."

Mr. and Mrs. Thomas Dark and their daughter, Miss Clella, have moved to Bothwell.

We are sorry to note that Florence Webster is not improving as well as hoped for.

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and lasting.

APPIN

Angus P. Campbell of Grand Prairie, Alberta, visited his sister, Mrs. J.S. Macraut, on Monday and Tuesday on his way to Ottawa. He also visited his cousin, John Cowan, Glencoe. It is nineteen years since he visited his old home here.

Miss Joe Munroe of Kilmartin and Miss Margaret Leitch of Walkers visited Mr. and Mrs. D. A. Patterson over the week-end.

Mrs. White of Seattle, Wash., and Miss Edna McIntyre of Macksville visited Mrs. J. S. Macraut on Monday afternoon.

There was a very large congregation at the Presbyterian church last Sunday, which was Mother's Day. Rev. H. P. McCulloch preached an excellent sermon and the mothers' choir sang splendidly.

There were sixteen joined the Methodist church on Sunday evening.

Mr. and Mrs. John Macfie visited in Strathroy last week.

The farmers around here are busy with their sugar beets. D. A. McIntyre, jr., is putting in seventy acres.

L. L. McTaggart auctioned seventy-two head of cattle for M. A. McAlpine at the G. T. R. stock yards on Saturday last.

MELBOURNE

The Sunday schools in both the Presbyterian and Methodist churches observed Mother's Day on Sunday morning. Large congregations attended both churches.

The I. O. O. F. will hold their annual services on Sunday afternoon, 18th inst., at 3 o'clock, in the Methodist church. The services will be in charge of C. R. Durrant, a former pastor in this village, now Grand Chaplain of the I. O. O. F. of Ontario. There will be no evening service.

Miss Edna Petch of London spent the week-end at her home here.

Miss G. McIntyre of London is holidaying at her home here.

Some of our citizens attended the funeral of William Cobbin on the Muncy road on Thursday last.

ELMSVILLE

Rev. Mr. McCulloch will hold service in S. S. No. 4, Sunday evening next at 7.30.

A number from here attended the May meeting in Dunwich last Sunday.

Miss Anna Eaton visited her aunt in Dunwich last week.

Lawrence Eaton entertained his Sunday school class last Friday evening.

Don't Submit to Asthma.—If you suffer without hope of breaking the chains which bind you, do not put off another day the purchase of Dr. J. D. Kellogg's Asthma Remedy. A trial will drive away all doubt as to its efficiency. The sure relief that comes will convince you more than anything that can be written. When help is so sure, why suffer? This matchless remedy is sold by dealers everywhere.

MIDDLEMISS

As the busy seeding season has now begun, a lot of the boys have joined that popular society known as the Sons of Rest.

Arthur Joyce has purchased from the Canada Company lot 28, containing 130 acres. The above company have sold several pieces of their land in the vicinity this spring.

A letter from a friend in the West, dated May 1, says: "The spring has been a cold and backward one, with continuous rain or snow, and no seeding done yet."

Housewives and others are viewing with alarm the rise in the price of sugar and other commodities and are unable to discover the cause.

Dear lady, just pick up your daily paper, read the sporting page, and you will realize that we have done that there are too many people playing baseball, etc., and not enough hoeing sugar beets.

The most obstinate corns and warts fail to resist Holloway's Corn Cure. Try it.

There was no Sunday school here last Sunday on account of the absence of the teachers.

Seeding in this section is done and the preparation of the land for corn and flax is in order.

Last Sunday was Mother's Day and was observed in the Methodist church. The church was arrayed with flowers, and the mothers did their part well.

Dan Mullins is driving a new Chevrolet.

At the Young People's meeting at the home of Wm. Carroll on Wednesday, May 5, a most enjoyable evening was spent. The feature of the evening was a debate. "Resolved that the tractor and the automobile are of more use to this country than the horse." The negative, James McNabb and Hugh Carroll, won over the affirmative, Miss M. Richards and Miss M. McDonald.

The continued cold weather is having a very bad effect on the growth of wheat and hay.

Wedding invitations printed in the latest style and with neatness and despatch at The Transcript office.

Internally and Externally it is Good.—The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pain in the chest, colic and a host of other ailments it has curative qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

Notice

Having opened our garage for service on all makes of cars, with Wm. Kirkwood of Simcoe in charge, he having long and successful experience in carburetors and electrical systems, we would invite a share of your automobile repairing.

GALBRAITH BROS. Appin, Ont. Phone 172-30

EKFRID COUNCIL

Pursuant to adjournment the municipal council of the township of Ekfrid met in the town hall, Appin, on Tuesday, the 27th day of April, 1920. All the members were present. The minutes of last meeting were read, approved and signed by the reeve.

A petition of Charles Sutherland and other owners of land in the township of Ekfrid praying for the drainage of the lands set forth and described was presented to and approved by the council, and James M. McGregor, C. E., was instructed to make an examination of the said area of land and prepare a report, plans, specifications and estimates of the work he may propose and an assessment of lands and roads in any way liable to contribute to the cost of the work under "The Municipal Drainage Act."

The report of J. M. McGregor, C.E., for the repair of the McGregor drain was read and approved and a by-law founded thereon was read a first and second time and provisionally adopted on Tuesday, the 27th day of June, 1920, was fixed for the holding of the court of revision.

The council decided to abolish the statute labor system and the clerk was instructed to draft a by-law for such purpose.

Council adjourned to meet again on Thursday, the 27th day of May, at one o'clock afternoon.

A. P. McDougald, Clerk.

THE OVERALL CRAZE

Cotton overalls and silk underalls will not do much towards lowering the high cost of living.

Some men attend church once a year, and call out a brass band to announce the fact that they are going. The men who don overalls and call the world to witness their humility are in the same class.

Major Duncan of Toronto sensibly says: "What we want to lower the cost of living is more production. Let those people who want to wear overalls by all means put them on and get out on the land. But don't wear overalls on Yonge street."

Why should not some of the men who are making a parade of wearing overalls "cut out" expensive cigars, tomatoes at forty cents a pound, and a few other high-priced luxuries? It would not be spectacular, but it would be sensible and consistent.

HAS FLAX MILL ON FARM

In the May reports of the Ontario department of agriculture it is stated that a considerable amount of flax is being grown in Kent county this year.

Bruce Burdley of Dover township is putting in this crop this year and is looking for good results. He is growing 100 acres of flax for fibre and 50 acres for seeding purposes, and is erecting a small flax mill so that the flax may not only be grown, but processed on the place.
