NO. 25

Destruction By Flood and Fire

Business Section of Pennsylvania Town of Three Thousand People Devastated by Breaking of Mill Dam.—Three Hundred Dead.—Two Million Dollars Worth of Lumber Destroyed.

Austin, Penn., October 1.—Three hundred or more persons met their death through the bursting of a dam above this town yesterday. Fire followed and completed the work of destruction. The curtain of night, which was rung down on the flood, scarcely before its victims had all been claimed and its surviving spectators fully realized how great a tragedy the elements of water and fire had enacted in the natural amphitheatre of the Alleghany mountains here, was lifted by dawn today, revealing a ghastly scene of death and devastation.

Austin itself, yesterday a busy mill town of three thousand people, many of whom were enjoying a fine autumn afternoon as a Saturday half holiday, is only a ghost town today. Torn to pieces by water and eaten by fire, the wet and charred remnants of its buildings, believed to hold the remains of three hundred or more persons, were strewn along the valley's edges, piled in winnows where the Main Street business section was, or swept in scattered masses far down the ravine.

SPECTATORS LOOKED ON NOTHING BUT RUINS.

Spectators, many of whom barely escaped being victims of the disaster and hundreds of people from surrounding towns, looked down from the steep hillsides of Austin and Costello through a veil of fog this morning to see the wreckage here of some four hundred houses, a score of business blocks, three churches and several large lumber mills, and three miles further down the river at Costello, the ruins of more than fifty buildings. The flood did not spend its force until it raced for more than ten miles from the reservoir.

Wharton, still further on, suffered somewhat, but is practically intact. The loss of life at Costello, where the residents had more warning, is believed to be but three.

The property loss in the valley is estimated at upwards of \$6,000,000.

In Austin, out of the hundreds directly enveloped in the deluge, hardly a dozen survived.

ONLY SIX INJURED AMONG ALL THE DEAD.

The furious flood let loose when the Bayless Paper and Pulp company's dam crumbled yesterday afternoon, picked up a huge battery of heavy timbers in the mill yards at the foot of the dam and with these thousands of planks and logs jammed its path with terrible havoc. At the hospital today there were but six injured, for the care of the small army of physicians and nurses who poured into the devastated town all day and night. The medical supplies remained unused in the cars rushed here by the Buffalo and Susquehanna and the Pennsylvania railroads, and the only use found for blankets and bedding was in the care

of the few recovered dead which, up to a late hour this afternoon numbered but fifteen.

STATE CONSTABULARY HAVE TAKEN CHARGE OF SITUATION.

The state constabulary arrived this afternoon and took charge of the situation, which seemed too appalling for the local committee which had worked all night.

During the night searching parties with engine head lights, auto lamps, pine torches, and improvised lanterns of every sort, poked their way into every pile of wreckage that was accessible seeking any who might be alive, but scarcely a body was found in which life has not expired.

THE BUSINESS SECTION WAS COMPLETELY OBLITERATED.

The immediate scene of the obliteration of Austin covers an area three-eighths of a mile wide, and one and three-quarter miles long. This comprised the business section and the valley residence portion. Nearly a mile above stood the mammoth concrete dam of the Bayless Paper and Pulp company, six hundred feet long, fifty-two feet high and thirty feet thick at the bottom, tapering to a thickness of three feet at the top. Back of this dam yesterday lay a reservoir of water a mile and a half long, and an average of thirty-five feet deep. Directly in front of the dam stood the plant of the Bayless company with four main buildings. Stacked high nearby was 700,000 cords of fifty-inch wood and slabs and also a portion of the company's immense timber stock, totalling in Austin 15,000,000 feet of hard wood and 25,000,000 of hemlock. This was a five year supply, practically the last large cut of the region valued at \$2,000,000.

GIRL KILLED BY LIVE WIRE IN SYDNEY.

Sydney, October 1.—The severe wind and rain storm which passed over this city last night caused much damage to shipping and property. During the gale the wires of the telegraph and electric companies were blown down and the city was in almost complete darkness for hours. One death occurred as the result of a person coming in contact with a live wire. The victim was a young lady named Mable McKay, who, while crossing Beacon street, was struck by an electric wire which had fallen during the storm, and was instantly killed. Her body was found terribly burned this morning. She was a native of Guysboro, and was in her twenty-third year.

THANKSGIVING DAY OCTOBER 30th.

Ottawa, Sept. 29.—An Order-in-Council has been passed proclaiming Monday, October 30th as a day of general thanksgiving throughout Canada for the providential blessings of the past year.

Wilson, The Digby Murderer, to be Hanged Nov. 15th

George Wilson, Jr., a Gloucester fisherman, was murdered in cold blood at Digby on Thursday last. The killing is made all the more horrible from the fact that it was committed in the presence of a third party by the victim's own brother, Harry. The murdered man was one of the three hundred fishermen who came last week to southwest Nova Scotia to vote in the election. Wilson was stopping at his brother's house, it being there that the deed was committed. Wilson's trial took place in Little Brook on Tuesday, he was found guilty and sentenced to be hanged in Digby, Nov. 15th.

It appears there had been much drinking and the mind of the prisoner was a blank during most of the time.

The jury after being out a little more than half an hour, returned with the verdict of guilty. The judge thanked the jury and agreed with their verdict. The prisoner when asked if he had anything to say, replied, "Nothing."

The judge said: "I have very little to say at this time, but I hope that during the little time that I am going to give you, you will make preparation for the salvation of your soul and your peace with God. You are to be taken from here to Digby, where you will, according to the rules and regulations, on Wednesday morning, November 15th, between the hours of four and eleven o'clock, be hanged by the neck until you are dead, and may God have mercy on your soul." Judge Meagher showed great emotion when he pronounced the sentence.

The prisoner is thirty-one years of age and has a wife and two children. The murdered man was twenty-five years old the eleventh of this month.

THE RASH LOVER.

Reggie, you're a fine young fellow, but you're bound to have your way, and you'll marry Arabella spite of all that I can say. Though advice from me is futile, since you're firm as any rock, though the things I say seem brutal, yet I've simply got to talk. Arabella is a daisy, smoothest girl I ever saw; but the neighbors say she's lazy, and she will not help her ma. She is stylish, she is classy, and her eyes are simply grand; but the people say she's saucy to her mother, understand? I have lived and loved and suffered, and I've found it is the law that no sane well-balanced duffer'd wed a girl who will sass her ma. She may have a thousand graces to adorn her fair young life, but you'll find she'll bust the traces when you get her for a wife. You had better hunt some other damsel in this country wide, for a girl who'll sass her ma will gold brick you as a bride.

ROYAL BANK OF CANADA ABSORBS THE COLONIAL.

Takes Over Old Institution With Branches in the West Indies.

London, Sept. 24.—Negotiations have been completed for the absorption of the Colonial Bank by the Royal Bank of Canada, C.E. Neill, assistant general manager of the Royal Bank, is here in connection with the amalgamation which is very important not only to the Royal but to the West Indies and to Canada, for it will bring the Dominion and the Islands more closely into touch.

YARMOUTH EXPRESS STRUCK TEAM AT LIVERPOOL.

A. W. Hendry and the Driver Injured and the Team Demolished.

Liverpool, N.S., Oct. 2.—The express from Yarmouth this afternoon struck a team belonging to J. L. Baird, on the Bristol crossing, containing A. W. Hendry, of Hendry, Ltd., and the driver, Sandy McInnes, who were bound to Milton. The horse was hurled up by the cow-catcher to the boiler and then thrown on the opposite side, receiving fatal injuries. The carriage was caught by the engine and was completely demolished. Mr. Hendry was taken from the wreck with a severe scalp wound and his back injured. He is now resting comfortably.

Turkish Admiral A Nova Scotian

"Rancy" Buckman, is a native of Hall's Harbor, Cornwallis—Has Seen Much Experience.

A former Nova Scotian will direct the naval campaigns for the Turks. This is Ransford D. Buckman, who a few years ago was known to all the workers of Cramps' shipyards at Philadelphia as "Rancy." "Rancy" Buckman, as he is still commonly known among shipbuilders and sailors, is now the rear-admiral of the Turkish navy, with the title of Pasha. In 1887 he left his home, after saying to his grandmother, "I am going away from home now to make a mark for myself in this world."

The greater part of his early training he got under his father, who was employed as a shipyard at Hall's Harbor, Cornwallis. His father was also a sailor and was lost at sea, leaving the now rear-admiral an orphan. He went to live with Mrs. John Buckman, his grandmother, at Emerson, Mass. When he was ten years of age he was forced to live on a farm with his grandmother.

He was the first captain of a Rockefeller whaling boat to navigate a boat from the great lakes to the seaboard. He was captain of a number of boats, on the Atlantic and the South Seas between that time and the time he became superintendent of Cramps' shipyard. Among the positions were those with the Atlantic Mail steamship company, plying between Australia and China, the American Eagle company, and several Australian companies.

While he still held the position of superintendent at Cramps, the Majda, the largest battleship in the Turkish navy, was built, and he was commissioned to take her to Constantinople. On arriving there he was asked to remain for a short time to train the Ottoman's seamen in the use of the new guns, and before he knew it he was appointed captain of the Turkish navy.

A little later he was introduced to the Sultan "the sick man," and the Sultan was so taken with him that he offered him the vice admiralty. Before accepting this he asked time to think it over and came to the United States. While here he married Miss Rose Thaylor, of San Francisco. After his acceptance of the vice-admiralty it was but a short time before he was promoted to the position of rear-admiral, and now he is the commander of the Turkish navy.

SUBJECT TO BIG FINE.

New York Woman Had Advertised Aigrettes for Sale.

New York, Sept. 7.—As the possessor of four luxuriant bunches of aigrettes, eighty feathers in all, a handsomely gowned woman, who said she was Mrs. H.B. McCulloch, of this city, was brought into special sessions court today at the instance of an agent of the bureau of marine, fisheries and conservation commission. Mrs. McCulloch was summoned to explain an advertisement offering the aigrettes for sale at nine dollars a bunch, in violation, the agent said, of the new law prohibiting the sale of feathers from certain birds. Mrs. McCulloch waived examination and was held in \$500 bond for the grand jury. To reporters she explained that a friend in South America had sent her the feathers asking that they be sold. A fine of \$25 for each separate feather, or a total of \$2,000 is the maximum punishment which could be meted out to her if she were proved guilty of the charge. Her arrest is one of the first made in this city under the new law.

CORRECT ELECTION RETURNS FOR KINGS COUNTY.

The earlier election statistics for this county were widely incorrect. The official returns on Declaration Day gave Mr. Foster a majority of 151 instead of 239 as at first stated, and shows a wide difference from the figures (350) sent from Kentville to the Halifax Herald, the night of the election.—Western Chronicle.

War Strength of the Two Nations

Italy Has the Best Navy While Turkey Has the Largest Army.

London, Sept. 29.—Italy's standing army in 1910-1911 numbered approximately 225,000 men and 14,000 officers but a far greater number could be put in the field in case of necessity. The Italian navy consists in vessels commissioned, built or building, 15 battleships, 4 armored cruisers, 17 unarmored cruisers and gun vessels, 36 destroyers an equal number of first-class torpedo boats and 22 submarines. In the naval force there are approximately 31,000 men. Seamen for the fleet are recruited by conscription and all men following the sea-faring life of twenty years old must serve at sea for eighteen months or more. There are also naval training schools for boys. As a whole the Italian navy is generally ranked fifth among nations.

TURKEY'S FIGHTING STRENGTH. Navy lists show that Turkey has a fighting strength of nine coast defence ironclads, five protected cruisers, six torpedo vessels, one ganboat, twenty-two torpedo boat destroyers, twenty-seven torpedo boats and two submarines.

As compared with the greater nations this is a negligible quantity. There are 31,000 officers and men and 9,000 marines. English and American officers play an important part in Turkish naval affairs. The Ottoman army, as a result of the revolution, which resulted in victory for the Young Turks is now in process of re-organization. A military council has been called into existence and a great deal of modern equipment has been purchased.

The Empire is divided into seven army corps districts and there are two independent divisions at Medina and Tripoli respectively. The total fighting strength is close to a million men and by the existing recruiting laws all Mussulmen are liable to military service. Christians and certain sects have paid the exemption tax. The Hermand Arabs, although liable to service by law furnish few or no recruits, and many Kurds evade service. Much the best of the army is in European Turkey.

THE BRITISH NAVY HAS GREAT TORPEDO.

WASHINGTON, Sept. 29.—The British navy is equipped with a torpedo said to be effective at 10,000 yards or nearly three times the range of the most powerful projectiles now used in the United States navy, according to information brought back to Washington by a United States naval expert, who recently discussed developments in gunnery, torpedo craft and the relative methods of target practice in the British and American navies with some naval experts. The existence of this torpedo has been kept a secret and it was only by a mere "slip" by the British experts that it became known.

During the discussion with the British experts it is said that one of them inadvertently told the American naval expert that "our newest torpedo has a range of 10,000 yards."

ONE VOTER 106 YEARS OLD; ANOTHER 102.

Halifax Herald:—Among those who voted for Borden and Crosby were Thomas Parker and Thomas Palmer, of Owl's Head. The former is probably the oldest voter in Canada and the latter comes in a good second. Mr. Parker was a centenarian when he voted in the previous federal election. Mr. Palmer attained that distinction since. Halifax County has doubtless the honor of having the two oldest voters in Canada, and John A. Gillis had the honor and pleasure of driving them to the polls to record their votes against reciprocity and for the new premier. Both Messrs. Parker and Palmer enjoy good health, as good as could be expected at their great age and retain their faculties to a marked degree.

To clean soiled wall paper, dip a whitewash brush into hot vinegar and brush all over it quickly. When the paper is dry it will appear as fresh as when first hung.

Italy at War With Turkey.

Claims That Her Subjects at Tripoli Have Been Mis-treated by Turkish Authorities.—Italian Navy Patrolling Coast of Tripoli, Ready for Action.

Rome, Sept. 29.—Italy has declared war on Turkey. The official announcement was made late this afternoon. It declared that the two countries were in a state of war beginning at half-past two o'clock on the afternoon of Friday, Sept. 29.

It is understood that the Ottoman government completely conceded Italy's economic claims but evaded a direct answer demanded by this government, which had set forth in its ultimatum that Turkey must say that she would not resist the proposed occupation of Tripoli and Cyrene.

Instead the Porte sent a conciliatory note, suggesting further delay. It was known that at the same time Turkey transmitted a note to the Powers, in which it is assumed that she represented herself as the injured party, and, by inference at least, sought their interference.

Malta, Oct. 2.—Word just received from Tripoli says that the Turks and Arabs are entrenching behind the city. Sixty thousand Arabs, said to be armed with Mausers, hold a strong position fifty miles behind the town in a country

which is an excellent natural strong hold. An advance guard is stationed twenty miles from Tripoli. The Turkish Garrison have left the forts.

It is concluded that no mediation will be accepted by Italy until she has accomplished the military occupation of Tripoli. After that negotiations will be much easier, and are not unlikely to be successful, if Turkey will accept a money indemnity for allowing Italy to establish herself in Tripoli, as Great Britain did in Egypt.

Evidently Tripoli has not been bombarded, and is not likely to be, if the Turks do not oppose the Italian landing. The warlike operations are confined to a blockade and the capture on either side of a few small vessels. It is now admitted from the Turkish side that Previsa, in European Turkey is not occupied. Italy's announcement that she has no intention to carry the war into European Turkey will do much to allay apprehension over the Balkan or other complications. Turkey's ministerial difficulties have not been solved but generally the situation looks more hopeful.

FOX BREEDING IN P. E. ISLAND.

Robert Horne and wife, of Bloomfield, P. E. Island, who have been visiting the latter's brother, C. Edgar Smallman, at his home in Dartmouth, returned to their home on the island recently, after a pleasant visit here.

Mr. Horne is engaging in fox breeding, an industry which is assuming large proportions in Prince Edward Island. The expansion of the business is only limited by the supply of foxes. It is more profitable as a business than gold mining if conducted successfully.

If anybody has any spare black foxes to dispose of Prince Edward Island is the place to take them.

A fox breeder recently sold seven foxes for \$3,000. Mr. Horne himself paid \$3,000, the price of two automobiles, for one little black fox. If anybody went his way with a mate for this fox it is likely a sale could soon be arranged.

The foxes are kept in big enclosures with high wire fences surrounding them. Guards at the top keep the foxes from getting over the fences. The foxes would burrow their way out if ordinary fences were built, so the wire has to be run down about five feet beneath the surface.

To remove rust from steel articles rub them with kerosene oil and let them soak 24 hours. Make a paste of emery dust and kerosene and rub on to give a polish.

THE MISSIONARY'S ENGLISH.

A sightseeing visitor recently went aboard a tramp steamer in the harbor. Noting that the deckhands were Chinese, she approached one of them and said: "You no speak English." The Chinaman looked bored and answered nothing. The woman continued: "Me go your country soon. Me learn speak Chinese, teach little Chinese boy and girl. You savvy 'missionary'?"

The Chinaman looked at her a minute and answered: "Madam, if you are not more successful in mastering our language than you appear to have been with your own I fear that your attempt to enlighten our race will prove anything but satisfactory. Good afternoon."

The Chinaman sought the other side of the ship and the woman sought oblivion. She had been addressing a Yale graduate who was working his passage back to China.

THREE HUNDRED KILLED BY EXPLOSION.

Toulon, France, Sept. 25.—The battleship *Liberte* was torn apart and totally destroyed in an explosion of her magazines today. Three hundred officers and men were killed. The battleship *Republique* was badly damaged, and the battleships *Democrat* and *Verite* also suffered severely from the masses of twisted iron and armor plate that were hurled upon their decks.

BE WISE; STICK TO FARM.

It stands for Everything Attractive, Wholesome and Profitable. For the restless boy or girl who wants to go away from the farm and get out into the big world to do something, no better bit of earnest reading can be found than this extract from the New York Independent.

"The new farm children," it says, "live a third dispensation. The sciences began to take hold of the land at least fifty years ago, but there was an off-putting necessary. The transition period was protracted, mainly because the land was already in possession of a race of farmers that must die off."

"The agricultural college applied the sciences to tillage and to crops and to animal life on the farm twenty-five years ago. It was slow work, not only to awake the farmer, but to investigate, discover, and then to apply. The age is now rapidly falling into the hands of men who are alive to the great fact that production has never yet approached its maximum. The orchards and all this while, thanks to moths and caterpillars, become more and more an entomological laboratory. Gradually it has come about that not a thing can be grown on the land without a fight. This has not by any means been a permanent loss, but has awakened a spirit of scientific examination and determination to master conditions. The microscope and the crucible are the necessary today as the plow and the hoe. The farm boy is not without stimulants, nor is he without interesting conditions; rather it will now take the brighter boys to do the farming."

"The development of farm machinery and the application of new forces on the land have gone on at the same time. In every department of the home, in the house as well as in the barn, machinery takes the place of men, and the help problem is now driving us to a still more complete age of mechanism."

"There is no lot on earth so enviable today as that of an American farm boy or girl. They have room, fresh air, beautiful surroundings, while the arts and sciences are involved in their work, and isolation is absolutely abolished."

"Nothing can be gained any longer by quitting the farm. It stands for everything that is attractive, wholesome and profitable; but at the same time it stands for the new and the stimulating. Country life cannot be made dull, unless it wilfully severs itself from advantages that are freely offered."

WILD MUSTARD GREAT PEST.

Not Useful Like its Estable Cousins, but an Indefatigable Race. About as troublesome a weed as the farmer the world over has to deal with is the charcoal or wild mustard. It is prolific in the extreme and, unlike its black and white cousins, is not only worthless, but harmful. About the only way to control it is to use a spray made up of either a 2 per cent solution of copper sulphate or a 15 per cent solution of iron sulphate. The quantity needed is from fifteen to twenty gallons to the acre, and American grain growers go after it with a sort of warlike care.

It is particularly obnoxious in wheat-fields, not only choking growth, but making the harvesting of the crop a matter of great difficulty.

Creek an Ideal Farm Hand. A wide-awake farmer noticed that his creek, if dammed at a certain place, would produce a six foot waterfall. He built a dam and put in a water wheel—a \$300 turbine that yielded twenty-five horsepower. Over the water wheel he built a powerhouse in which he placed a dynamo for the water wheel to run. The electricity was wired 1,700 feet to the farm buildings.

Then he put his electricity to work in every possible place about the premises. He heated and lighted the house, did the cooking and the washing and ironing, did the sweeping and dusting, beat eggs—and at three different speeds too—turned the ice cream freezer and in summer ventilated the house with fans.

Now with a vacuum milking machine he milks twenty cows, two at a time; drives the cream separator, churns, pumps water into every room in the house and into the stall of each horse and cow, drives lathes and drills in a workshop, drives a circular saw to cut cordwood and drives an ensilage cutter. It pays to be up to date.

THE MONEY-MAKING MULE.

The mule is a slave animal. At two years he is ready to do considerable work and will from that age on make a profit over and above his feed and expense bill in the value of his labor and at the same time he is growing more valuable until four or five years old, at which age he will command the top of the market in his age class.

Canada's Crops

Ottawa, Sept. 14—A bulletin on the field crops of Canada issued today gives their average condition by provinces at the end of August, together with estimates of the production of spring wheat, oats and barley at that time. The per cent. condition of wheat is given as 86.86, of oats 84.44 and of barley 84.75, which is about five to seven per cent. higher than last year and nearly the same as two years ago. The other crops range in condition from 80 to 86 per cent., and are generally somewhat lower than in 1909 and 1910. The rains of August hindered the ripening of grain and some injury was caused by hail storms, low temperature and rust. Towards the end of the month frost prevailed in many sections of the Northwest provinces, the full extent of which could not be determined at the date of the reports, but in the case of wheat, oats and barley production was lowered by probably twelve per cent., which has been followed in the table. In the older provinces the grains ripened earlier and little damage was sustained excepting from drought in some localities, and the reported condition was seventy-five or over.

The average yield of spring wheat is estimated at 19.14 bushels per acre for the Dominion, which is seven bushels more than last year, and the total yield at 186,928,000 bushels. The fall wheat was reported last month at 17,706,000 bushels, being grown almost wholly in Ontario and Alberta. The total wheat yield of the country is therefore estimated to be 204,634,000 bushels or 81,849,000 bushels more than last year at the same date. The average per acre is 19.50 bushels, or 6.30 bushels per acre more than last year.

For the Dominion the yield of oats is given as 368,153,000 bushels, which is 84,906,000 bushels more than last year's estimate at the same date, and the average at 35.81 bushels per acre, being more than last year by 7.10 bushels. The average for barley is also higher than last year by 7.31 bushels, and the total yield is estimated at 51,559,000 bushels as against 39,388,000 bushels for last year.

The estimated yield of spring wheat for Manitoba, Saskatchewan and Alberta this year is 181,535,000 bushels, of fall wheat 3,193,000 bushels, of oats 204,758,000 bushels and of barley 30,205,000 bushels, as compared with 98,808,000 bushels spring wheat, 1,082,900 bushels fall wheat, 92,201,000 bushels oats and 14,723,000 bushels barley in the previous year.

In Prince Edward Island, Nova Scotia and New Brunswick the estimated yield of spring wheat is 1,453,000 bushels, of oats 16,699,000 bushels and of barley 437,000 bushels; in Quebec 1,777,000 bushels spring wheat 44,619,000 bushels oats and 2,389,000 bushels spring wheat, 14,513,000 bushels fall wheat, 102,077,000 bushels oats and 18,528,000 bushels barley.

The final estimates of last year printed in the December Monthly gave the production for the whole country as 16,610,000 bushels fall wheat, 133,379,000 bushels spring wheat, 323,449,000 bushels oats, and 45,147,600 bushels barley.

The October number of the Census Monthly will give the statistics of the areas of field crops of the Dominion this year as taken by the census of the first of June.

Warren Has a Preparation That Will Grow Hair Abundantly

This is an age of new discoveries. To grow hair after it has fallen out today is a reality.

SALVIA, the great Hair Tonic and Dressing, will positively create a new growth of hair.

If you want to have a beautiful head of hair, free from dandruff, use SALVIA once a day and watch the results.

SALVIA is guaranteed to stop falling hair and restore the hair to its natural color. The greatest Hair Vigor known.

SALVIA is compounded by expert chemists.

Watch your hair if it is falling out. If you don't, you will sooner or later be bald.

SALVIA prevents baldness by fastening the hair to the roots.

Ladies will find SALVIA just the hair dressing they are looking for. It makes the hair soft and fluffy and is not sticky. A large bottle, 50c.

Ottawa, Sept. 25—It is possible that the departure of Earl Grey, who planned to leave here next week may be delayed and possibly also the coming of the Duke of Connaught. The reason given is that the new government will not be installed before the arrival of the duke, who is inexperienced in the position of governor-general. The Laurier administration will not likely resign within a week and possibly not within two weeks.

Lame back is one of the most common forms of muscular rheumatism. A few applications of Chamberlain's Liniment will give relief. Sold by all dealers.

2 in 1
SHOE POLISH

No labor. Shines easily. No dirt. Does not rub off or soil clothing. Preserves the leather, containing neither Turpentine, Acid or other injurious ingredients. Brilliant and Lasting. It is good for your shoes.

 HAMILTON, Ont., BUFFALO, N. Y. and LONDON, Eng.

Selecting Seed Potatoes

Breeding plants is becoming as great and important a science as ever the consistent breeding and improvement of live stock has been. A few years ago, the popular mind troubled itself little about such things. Not that it was by any means a new thing, for there were always men who realized this, and practised it too. Many years ago, old Aberdeenshire farmers, as well as others of a progressive type used to select their seed with care, and progress in the acquisition of new varieties were constant. But the public never really grasped its true importance. Today work along these lines is developing on every hand and farmers are beginning to realize the possibilities there are in it. A few years ago, the practice of saving only the smaller potatoes for seed was a common one. Then the importance of using good, healthy, plump specimens only was advocated. Recent investigations indicate the wisdom of going still further in this work, and using only good potatoes from the most prolific and healthy looking hills. Here is how to do it:

When digging the potatoes, dig up a large number of hills, and leave the potatoes lie for the time right where they were dug up. Then fix a certain number of hills in your mind, which will be selected as the ones from which to choose seed for the following year. Go all over the plot, and pick out the number which look the best in all respects. Select from these the best specimens and keep them as seed for the following year. This is a simple matter. It is only following the system by which a progressive and careful breeder of high-class pure-bred stock endeavors to select his breeding animals from each successive crop of youngsters, but it is a plan which can be followed by any farmer, and it will give such results as will encourage him to extend the same system to every department on the farm.

Fight to Finish For Social Reform

The Battle Against Race Track Gambling and the Social Evil in Canada to be Bitter.

TORONTO, Sept. 27—A fight to the finish is what the Social Reform Council of Canada, at its annual meeting yesterday afternoon, designated its warfare against various forms of vice throughout the Dominion. Through resolutions unanimously adopted the announcement was made that the battle against race track gambling and the social evil, especially, will be waged with redoubled energy. The militant spirit was strongly in evidence, and various reports indicated what spirited action the council is taking.

The struggle over reciprocity in the House of Commons is blamed for the fact that comparatively little progress has been made during the past year in the securing of legislation bearing upon morals.

The following officers were elected: Hon. President, Archbishop Mathison, of Winnipeg; President, Rev. Dr. Carman; vice-president, Allan Studholme, M. L. A.; secretaries, Rev. Dr. Shearer and Rev. T. Albert Moore; treasurer, Rev. W. T. Graham.

Before marriage there is the life preserver of love clinging to, but afterward it is a case of sink or swim.

Nova Scotian Dies in Boston

Boston, Sept. 23—Alfred S. Woodworth, a tea merchant who resided at 204 Commonwealth Avenue, and a native of Nova Scotia, left \$2,000 each to the home for Aged Women and the Y.M.C.A. by his will, filed in the probate office yesterday. The will was executed April 20, 1899.

He left \$100,000 in trust to his wife, Sam E. Woodworth, who with his son, Herbert G. Woodworth, are made trustees. On her death the principal will go to the four children, Herbert G. Woodworth, Gertrude James, wife of Frank H. James, of Brookline; Arthur V. and Stewart C. Woodworth, equally. Each also gets \$20,000. His son, Arthur V., the testator says, already has received a gift for that amount. The residuary estate is given to all the children in equal shares.

Alfred S. Woodworth, a grandson, gets \$5,000, with a request that it be allowed to accumulate until he is of age.

THE DOCTOR'S QUESTION

Much Sickness Due to Bowel Disorders.

A doctor's first question when consulted by a patient is, "are your bowels regular?" He knows that ninety-eight per cent. of illness is attended with inactive bowels and torpid liver, and that this condition must be removed gently and thoroughly before health can be restored.

RECALL Orderlies are a positive, pleasant and safe remedy for constipation and bowel disorders in general. We are so certain of their great curative value that we promise to return the purchaser's money in every case when they fail to produce entire satisfaction.

RECALL Orderlies are eaten like candy, they act quietly, and have a soothing, strengthening, healing influence on the entire intestinal tract. They do not purge, gripe, cause nausea, flatulence, excessive looseness, diarrhoea or other annoying effects. They are especially good for children, weak persons or old folks. Two sizes, 25c. and 10c. Sold only at our store—The Rexall Store, Royal Pharmacy, W. A. Warren.

Matrimony—Cupid's fire protection. Alimony—his life insurance.

THE FAVORITE LAXATIVE

One at Night Makes the Next Day Bright; No Charge if It Doesn't.

Because of its extremely gentle and effective action, RECALL Orderlies have become the most popular Remedy for Constipation.

We are so positive that RECALL Orderlies will do all that is claimed for them that we positively guarantee to hand back the money you paid us them upon your mere request, if you are not entirely satisfied.

RECALL Orderlies are eaten like candy, are very pleasant to the taste, do not gripe, cause nausea, or any other annoyance usually experienced when ordinary cathartics are used.

RECALL Orderlies have a positive regulative effect upon the bowels and tend to provide permanent relief from Constipation and the myriad of associate ailments. Besides, they help to overcome the necessity of the constant use of laxatives to keep the bowels in normal condition.

We honestly believe there is no similar medicine so good as RECALL Orderlies, especially for children, aged, or delicate people. They are prepared in convenient tablet form in three sizes of packages. Prices, 10c., 25c., and 50c. Why not try them at our risk or our guarantee?

Remember, RECALL Remedies can be obtained in this community only at our store—The Rexall Store, Royal Pharmacy, W. A. Warren, Bridgetown.

Joker's Corner

NAMED ALL BUT ONE.

A freckle-faced girl stopped at the post office and yelled out: "Anything for the Murphys?"

A maiden lady, Miss Corker by name, and her niece, who bears the same name, went one evening to a reception at the house of a friend.

Whereupon the man of plush and furbons opened the drawing room door, and with all the dignity of his profession, ushered them into the midst of the company with the convulsing announcement:

We were discussing a fellow-traveler and I said she was "clever at repartee." "Is that so?" asked Mrs. M.

"It is true," said a woman lecturer, "that some girls, marrying men to reform them, succeed. Some girls, too, fail."

"This little boy, seeing an elephant for the first time on Easter Monday, shouted:

Mamma—"So you want to give your dear teacher a present?"

DOCTORS HAD GIVEN UP ALL HOPE

"Fruit-a-lives" saved my Life

RIVERBANK A PIERRE, Q., May 9, 1910. "I look upon my recovery as nothing short of a miracle. I was for eleven years, constantly suffering from Chronic Dyspepsia and Indigestion."

The doctors gave me up to die as the stomach trouble produced heart weakness and I was frequently unconscious. I received the Last Rites of The Church.

The True Test of Friendship

There was, there could be little question of his old friend's guilt. Eric Clarke frowned as that fact was borne in upon him. If it had been anything else, he thought to himself bitterly.

"I was thinking of what this will mean to Mary. And of an old verse."

"Well, you women certainly beat me. Thinking of poetry when your best friend—one who was your best friend—is openly disgraced. Couldn't be that callous myself."

Breakfast was a silent, uncomfortable meal. Towards its close Mr. Clarke found his wife furtively wiping her eyes and his own were open.

"Sarah," he said, "you do care. What was the poetry that you were thinking of?"

"I said a verse—a verse from the Bible. But you wouldn't care to hear it. It has no bearing on this case."

He insisted, and after a moment she repeated it softly.

The next day he did not go down to his office. He wandered forlornly around the house all day. But when night fell his feet turned irresistible to the silent house. He saw a slight figure just ahead of him. Something oddly familiar about it made him pause and wait till an

Bitten by 2000 Dogs. Still He Laughs

(New York Herald.)

Two thousand dogs have now had luncheons off Herman Carn, the official dog catcher of this city, the last to take advantage of his generous girth being a hungry Newfoundland dog which embroiled his initials on Carn's back recently.

Carn has been in charge of the bow wow bureau for years and picks up an average of ten thousand stray dogs every year. If there is a dog in Denver that has not used him for a meal ticket it is the animal's own fault.

Small dogs have been known to nibble at his trousers for hours without being discovered. At first he tried to keep track of his bites by making an entry in a book, but they came so fast he had to buy an adding machine.

"Do I worry about them?" he repeated with a laugh. "I should say not. Dog bites are nothing. Hydrophobia never enters my mind. I would sooner be bitten by a dog than by a flea."

MINARD'S LINIMENT CO., Ltd.

Gents.—A customer of ours cured a very bad case of distemper in a valuable horse by the use of MINARD'S LINIMENT.

electric light fell upon it. And he saw it was his wife. So she went there, he thought to himself, bitterly, putting others before his spoken wish.

"I've been to see a Mary. I've been away for the day. I don't think I'd stay had it been a murder, I'd have gone 'at the same."

He did not answer but reproved her, but he thought of it next day as he went to his office. The very machine pounded the words into his brain as he drove slowly along—"at all times," it is said, "at all times."

Presently he found that his hand had guided the motor into unaccustomed ways. He sprang out. It was not the hour for visitors, but his card gained him admission. A key turned in a lock, and he and his old friend stood face to face.

"Will," he said, "old man, brace up! Sink or swim, right or wrong, we'll light it out to the end. Every shilling of mine is at the back of you. We'll win yet."

The voice had a quaver in it, yet it rang with love and good cheer.

More Than 55,000 Japanese Died in War With Russia

Wounded Numbered More Than 133,000—Figures Just Given Out Officially Tell of Awful Cost of Victory.

Berlin, Sept. 15.—Details of Japanese casualties in the war with Russia which have hitherto been withheld from public knowledge, are furnished to the "Militar Wochenblatt" by Surgeon-General Dr. Akiyama, a professor at the Army Medical Academy in Tokyo, who is now in Berlin.

The first tables gives the numbers of killed and wounded in the seven important engagements and battles of the war. In the battle of Kintschuk which lasted two days, there were killed thirty-five officers and six hundred and sixty-three men, and wounded one hundred and eleven officers and three thousand, five hundred and fifty men.

In the battle of Vafanku, which lasted two days, there were killed eight officers and two hundred and two men, and wounded forty-four officers and eight hundred and ninety-two men.

The names of the remaining four battles are not given, so they must be distinguished by numbers. In battle No. 4, which lasted twelve days, there were killed two hundred and twenty-two officers and five thousand, three hundred and fifty-five men, and wounded six hundred and eight officers and seventeen thousand, five hundred and twenty-nine men.

In battle No. 5, which lasted thirteen days, there were killed one hundred and seventy-nine officers and three thousand, nine hundred and seventeen men, and wounded six hundred and eighty-eight officers and twenty-nine men.

In battle No. 6, which lasted five days, there were killed eighty officers and one thousand, seven hundred and fifty-four men, and wounded two hundred and forty-nine officers and seven thousand, and twenty-eight men.

In battle No. 7 there were killed five hundred and fifty-four officers and fifteen thousand, eight hundred and fifty men, and wounded one thousand seven hundred and ninety-nine officers and fifty-one thousand, eight hundred and fifty-six men.

A second table gives the number of killed and wounded in the most important engagements before Port Arthur. In the engagements of July 26th, to July 31st there were killed twenty-four officers and six hundred and sixty-seven men, and wounded one hundred and nineteen officers and three thousand, two hundred and seventy-eight men.

In the engagement of August 19th to Aug. 24th, there were killed one hundred and sixty-six officers and five thousand, eight hundred and five men, and wounded three hundred and eighty-six officers and ten thousand, four hundred and four men.

In the engagement of September 10th to September 22nd, there were killed forty-nine officers and eight hundred and seventy-four men, and wounded one hundred and thirty officers and five thousand, seven hundred and eight men.

In the engagement of October 26th to Oct. 31st there were killed thirty-four officers and seven hundred and eighty-three men, and wounded eighty-seven officers and two thousand, seven hundred men.

In the engagement of November 26th to December 6th there were killed two hundred and four officers and four thousand, eight hundred and thirty-four men, and wounded four hundred and thirty officers and eleven thousand, two hundred and ninety-nine men.

These figures total 1568 officers and 40,881 killed and 4,619 officers and one hundred and twenty-nine thousand, one hundred and four men wounded.

Farm and Garden

GROW SWEET POTATOES.

That They Thrive Only in the South is Now an Exploded Fallacy.

While the sweet potato is of a tropical nature and is generally considered a vegetable to be grown only in the south, experiments by the department of agriculture show that it will grow, and grow well, as far north as Michigan.

The ridges for planting sweet potatoes should be three to five feet apart and the plants about fourteen inches apart in the row. Cultivate sufficiently to keep the surface soil loose and free from weeds, and the vines will soon cover the ground, after which no cultivation will be necessary.

The ridges for planting sweet potatoes should be three to five feet apart and the plants about fourteen inches apart in the row.

HOW SWEET POTATOES GROW

selected for making and planting the cuttings very few will fail to grow and an excellent crop may be produced.

In the north sweet potatoes are dug as soon as the vines are nipped by frost. In the south the potatoes are allowed to remain in the ground until a convenient time for handling them, and in Florida or Texas they are frequently left until required for use.

On a small scale they may be dug with a spading fork, and great care should be taken that the roots do not become bruised or injured in the process of handling.

A large number of farmers are engaged extensively in honey production. Some of them ship over a car of honey each season.

Hum of the Hive.

Remember that bees crawl up instead of down.

Send your honey to the market in as attractive a form as possible.

By sirs that your bees have a good prolific Italian queen, and the ants will not bother them.

Zealotry was formerly not worth considering as a honey plant because of its scarcity, but of late years it has become plentier, and now it is worth many dollars; same with dandelion.

The present improved system of management requires that hives should not stand too near each other. There should be at least six feet between them, and ten would be a preferable distance.

A bee expert gives away this little secret: If bees are kept in a shed the crossness of them can be handled without fear of being stung.

Cleaning and casing honey must be done in a well lighted place and a large bench or table provided for it.

Electric Beans Are a Natural Remedy for Nerve, Stomach and Liver Disorders.

Once upon a time disease was thought to be due to direct influence of evil spirit and magic was invoked to cast it out.

Science has taught us wisdom. The evil spirits still exist we call them "Disease Germs," and they must also be cast out.

Electric Beans are the approved remedy for driving out disease germs. Their action is quick and thorough.

See our booklet of remarkable, true testimonials. Test this remedy at our risk, if it is not satisfactory we will cheerfully refund the money paid for it.

Electric Beans can be had from the Royal Pharmacy, W.A. Warren, prop., or direct from us at 50c. a box.

WEDNESDAY, October 4, 1911.

Italy is in a state of actual hos-
tility with Turkey, and her navy is
now patrolling the coast of Tripoli,
an African Province under Ottoman
rule.

The causes which have led up to
the hostility date back to the
close of the Russo-Turkish war in
1878, when a treaty was concluded in
which it was agreed that the Pow-
ers should permit Italy "a pacific
penetration of Tripoli." Turkey
claims that this agreement has not
been violated. Italy, however, claims
that her subjects have been mis-
treated by the Ottoman authorities
and frequent disputes have arisen.

A few days ago Italy sent her
navy to the coast of Tripoli and
has her army ready to proceed to
the point of hostility.

It is hoped that pacific means may
be adopted to prevent actual war-
fare between the two nations, which
would thus disturb the state of in-
ternational peace and amity which
the great powers of the world are
apparently now ready to embrace.

**DIVINE SERVICE IN
THE DAILY TASK.**

It is a mistake to assume that
work for one's fellow men is neces-
sarily some work of religion or
philanthropy outside of one's daily
task. This is a blunder that often in-
troduces confusion into a man's
sense of duty, and discord into the
harmony of his life. Every man has
a calling, and it is primarily in
that that he is looked to to serve
God and his generation. He may
have his by-products, but his steady
divine service is that of his daily
task. And here is where many a man
who finds himself enlisted in the
noble order of labor makes his fatal
mistake. He takes no glory in the
labor itself! He thinks that the
less he can do for the pay he gets
the better he serves his fellow men.

In the erection of an important
building, not very far away, it be-
came a matter of emulation among
the bricklayers, how few bricks each
could lay in a day. This is an ex-
treme case, but the idea of restrict-
ing service as a matter of mutual
loyalty has burned deeply into many
minds. Tin plate workers in the
South of Wales had a mutual agree-
ment not to produce more than a
certain amount a day, the amount
being about one-third of what the
most capable could have turned out.
It is a doctrine of damnation to
the person who allows it to rule
his life, and it brings its own be-
littlement upon his character and
blight upon his happiness. It is sor-
did in making the pay more im-
portant than the service, whereas
the law of the higher kingdom is
to put the service first, and count
that He who clothes the lilies will
reward abundantly. Those who can-
not walk by faith in such a divine
order have only to look at the facts
about them, and see that it is ev-
erywhere the man who does his best
and not he who does his worst who
gets on.—Selected.

A LINK WITH THE HOME LAND.

A valued subscriber in Lynn, Mass.,
remitting her subscription writes as
follows—
"I am eager to get a glance at the
contents of the Monitor when it ar-
rives on Friday. Even when I am
very busy I cannot resist tearing off
the wrapper, and I read it with a
great deal of interest. It is one of
the best links in the chain that
binds me to the dear old home
land."

How a man without sufficient Life Insur-
ance can look his children in the face, or say
his prayers expecting them to be answered,
is a mystery. "Procrastination is Hell's de-
ception."

COLD WINTER PROPHESED.
Middle Haddan, Conn., Sept. 19—
Horace Johnson Connecticut's aged
weather forecaster, who achieved
some prominence foretelling the bliz-
zard of 1888, promises a long and
severe winter this year. He says—
"There will be a snowfall as early
as October 18th, and ice will form
on the streams by November 12th."
Incidentally he also forecasts a
drought for 1912.

Here is a real tea-treat that will surpass your fond re-
collection of "the nicest cup of tea I ever tasted!"
King Cole tea will truly make an even nicer cup of
tea an everyday reality. Such richness, such vigorous
fullness of flavor, such pleasant smoothness—never
concentrated so deliciously in your tea-cup before.

And the cup, you enjoy a month hence will be as
nice as your very first sip. Its delicious flavor never
varies. You will love it more and more.

YOU'LL LIKE THE FLAVOUR.

Cordial Words and Church Union

At General Synod of Anglican Church
in Canada.

London, Ont., Sept 10—Church uni-
on and the possibilities of its cul-
mination were features of the greet-
ings of the general synod of the Cana-
dian Presbyterian church to the gen-
eral synod of the Anglican church
yesterday.

Greetings were borne by Rev. Jas.
Ross, pastor of St. Andrew's church
Rev. J. G. Inkster, pastor of the
First Presbyterian church, and Thos.
Alexander, superintendent of the
Knox Presbyterian Sunday School,
South London. They were presented
to both houses sitting together. All
expressed the desire of the Presbyter-
ian church for church union—the de-
sire for the re-uniting of the differ-
ent Christian denominations into one
church, united in Christ.

In part Rev. Dr. Ross said, refer-
ing to the problems of the churches:
"In view of the tremendous prob-
lems of the Western immigration,
the day will come when it will be
possible to devise some "via media"
by which the same order and con-
tinuity, for which you have stood,
may be preserved and yet a step
taken forward toward the restora-
tion of unity in Christendom."

Touching on the question of the de-
velopment of Canada and the fore-
ign field, he urged: "Let there be no
unseemly rivalry among us. There is
work for us all. In the West, a thou-
sand new congregations are arriving
every year. It is our duty to stand
shoulder to shoulder to fight our
common battle."

Then came his expression of the
desire for church union, concluding
with the statement that any pro-
nouncement that the present general
synod might make would be studied
with the closest attention by the
ministers and office bearers of the
Presbyterian church.

Archbishop Mathewson, who re-
sponded as primate, referred to the
friendly feelings, the brotherly affec-
tion that existed between the Pres-
byterian church and the Anglican in
the west, and expressed the hope
that the day would not be far dis-
tant when the churches would be re-
united, for the common cause of the
Lord.

Prolocutor Powell, of the lower
house, attributed the drawing to-
gether of the churches to the divine
intervention of God. It was his hand
and the prayers of the countless gen-
erations in the years that were past
that were drawing the units of the
Christian body together. From the
Presbyterians the Anglicans church
could learn much, he said, in educa-
tional matters. Continuing along
these lines he expressed the deepest
regret that the teaching of God's
word in the public schools was not
yet compulsory.

Rev. Pres. Restford, of the Montreal
Diocesan Theological College, and
Rev. Principal Lloyd, of Saskatoon,
suggested a revision of the present
curriculum in theological colleges.
Too much "dead matter" was at
present given a place, and more at-
tention would have to be paid to
the practical theology, declared the
former.

Archdeacon Cody, of Toronto, con-
sidered the present courses too short
for the training of theological stu-
dents and advocated the extension of
the terms. Not only that, but more
attention to actual Sunday school
and actual pastoral duties, even if it
meant the dropping of the more ad-
vanced studies of Greek and Latin
that could be afterwards taken for
degree work if so desired.

Shall We Live Again?

I feel in myself the future life. I
am like a forest, once cut down, the
new shoots are stronger and livelier
than ever. I am rising, I know, to-
ward the sky. The sunshine is on my
head. The earth gives me its gen-
erous sap, but heaven lights me with
the reflections of unknown worlds.

You say the soul is nothing but
the resultant of the bodily powers.
Why, then, is my soul more luminous
when my bodily powers begin to
fail? Winter is on my head, but
eternal spring is in my heart. I
breathe at this hour the fragrance
of the lilacs, the violets and the
roses, as at twenty years. The nearer
I approach the end the plainer I
hear around me, the immortal
symphonies of the worlds which in-
vite me. It is marvelous, yet simple.
It is a fairy tale, and it is history.

For half a century I have been
writing my thoughts in prose and in
verse; history, philosophy, drama,
romance, tradition, satire, ode and
song; I have tried all. But I feel I
have not said the thousandth part
of what is in me. When I go down
to the grave I can say like many
others, "I have finished my day's
work." But I cannot say, "I have
finished my life." My day's work
will begin again the next morning.
The tomb is not a blind alley, it is
a thoroughfare. It closes on the twi-
light, it opens on the dawn.—Victor
Hugo.

NEW FALL & WINTER GOODS

We wish to call your attention to a
new SPECIAL LINES of our NEW FALL
and WINTER GOODS. When you see
them, the styles, quality, and extremely

LOCAL AND SPECIAL.

The nights are cold and frosty.

The fall change in the H. & S.W. time table takes place on the 5th.

Mass will be celebrated at St. Alphonso's church on Sunday next, at 11 o'clock.

About one hundred and forty people took advantage of the excursion from Port Wade to Lunenburg yesterday.

Messrs. L. R. Fair and Fred Fairn landed a fine bull moose at Albany, a week ago, it being shot by the latter.

Mr. G. H. Vroom, of Annapolis Co. has been appointed judge at the New England Fruit Show to be held at Boston, this month.

Mr. and Mrs. A. R. Bishop are occupying the homestead property of the late Enoch Dodge, the former home of Mrs. Bishop.

Our usual fine September weather was missing from last month, and the prospects for milder weather this month are not promising at present.

Six of our young men left yesterday to pursue their studies at Acadia College, Fred Craig, Milledge, Salter, Owp Graves, Lawrence Harlow, Harlan Phinney and Leander Wheelock.

The electric lights were out of commission last evening through an accident at the power house. The difficulty has been overcome and the lights will be furnished this evening.

Mr. Harvey Hearn, while partridge shooting on Monday last, was accidentally shot by his companion, Mr. Elmer Gibson, receiving the full contents of a No. 6 shell in the joint of his knee.

A Liberal-Conservative banquet will be held at St. James' Hotel, tomorrow evening, when the guests of honor will be the new members of Parliament for Annapolis, Digby, Kings, Lunenburg and Hants.

The business property of Miss Lockett on Queen street was purchased by Mrs. William Buckler, by private sale, last week. In twenty-four hours it had again changed hands, and is now the property of Mr. C. L. Piggott.

The Grand Division of the Sons of Temperance of Nova Scotia, celebrated most auspiciously in St. Francis Hall, the sixty-ninth anniversary of organization, the attendance being large, and the addresses full of force and interest.

The millinery openings are being held on Friday and Saturday of this week. This is a semi-annual event which has become very popular with the ladies of Bridgetown and vicinity as they are sure of finding the most modish styles in millinery displayed by Bridgetown's up-to-date milliners.

Mrs. Edward Marshall, having disposed of her property on Washington St. to J. H. Hicks & Sons, has gone to reside for the present with her daughter, Mrs. Byron Chesley, of Clarence, her daughter, Miss Lizzie, accompanying her. Miss Annabel is visiting her sister, Mrs. S.E. Thorne Lower Granville.

Some time next week a new industry will be started in Yarmouth in the shape of a knitting mill, where stockings and underwear will be manufactured. At present this industry is on a small scale but will branch out as conditions warrant. The machinery is now being put in readiness in the Geo. W. Johnson property on Water street. Our enterprising citizen, Mr. R. S. Crawford, is the head of the scheme and we express the hope that this may prove a successful venture.—Yarmouth Light.

PERSONAL.

Miss Gladys VanBuskirk returns to Boston today.

Miss Anna Strong is visiting her brother, Mr. C. H. Strong.

Mr. Frank Willett is attending the exhibition at Yarmouth this week.

The Misses Almada and May Jackson spent a few days recently with their parents at Carleton's Corner.

Mrs. Agnes Murdoch returned on Monday from Tusket, where she has been the guest of Mr. and Mrs. Foster.

Misses Nettie Bishop, Florence Cochrane and Constance Lloyd left last week to attend Normal College at Truro.

The Misses Ethel and Hazel Eagleson, of Waverly, Mass., are visiting their parents, Mr. and Mrs. Robert Eagleson.

Mr. Charles Saunders, of Yarmouth and daughter, Miss Emma, of New York, spent the week end with Mr. and Mrs. Eugene Saunders.

Rev. E. E. Daley, the new pastor of the Tabernacle Baptist church, has arrived in Halifax with his family and occupied his pulpit on Sunday.

Mr. Emil Ganter and Miss Greener, of Boston, have been guests at the home of Mr. L.F.A. Doering for the last fortnight. They returned home on Saturday.

Mr. and Mrs. Fred R. Fay leave today via Yarmouth, for New York. They will be absent about four weeks and during their stay in New York, will be the guests of Mr. Charles H. Fay, 200 West 107th St.

Mrs. Enoch Dodge and niece, Miss Emma Johnson leave today for the West. At Medicine Hat Miss Johnson will become the bride of Mr. Reginald Ruggles, formerly with the Union Bank at Bridgetown, now engaged in a lucrative business at Calgary, where they will make their home. Mrs. Dodge and Miss Johnson will be greatly missed by their large circle of friends and associates whose best wishes go with them to their western home.

Pneumatics
THE MAGIC POULTICE, stops pain anywhere in one night, prepared for physicians' and nurses' use. A germicide and a powerful one. Sells a box at Warren's Drug Store.

Parra-Phenique
A PERFECT OINTMENT. Cures sprains and bruises, pains and aches of all kinds, specific for ulcers and running sores. Sells a box at Warren's Drug Store.

These goods are introduced in Bridgetown by Miss Ermina Burgess, of Kinsman's Corner, Kings County, Oct. 4, 51.

EARTH REMEDIES.
Dr. J. Purney, an Allopathic physician of the United States, tells us that Antiphlogistine is largely used by doctors and that the company who prepare and sell this earth ointment, only advertise in medical journals, and supplies doctors and druggists only. This statement is in harmony with a letter I have from the company. REED'S Earth Ointment called "GOOD LUCK," is much the same as the above. REED'S EARTH OINTMENT is the same class of goods. We advise that you purchase direct from us or our agents instead of from those who want ten times what we ask.

Local Agent, E. P. COLDWELL

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Hampton Spur Line," will be received at this office until sixteen o'clock on Saturday, 7th October, 1911.

Plans, specification and form of contract to be entered into can be seen on and after this date at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, at the office of the Chief Engineer of the Intercolonial Railway, Moncton and at the office of the Intercolonial Terminal Agent, St. John, N.B.

Parties tendering will be required to accept the fair wages schedule prepared or to be prepared by the Department of Labour, which schedule will form part of the contract.

Contractors are requested to bear in mind that tenders will not be considered unless made strictly in accordance with the printed forms, and in the case of firms, unless there are attached the actual signature, the nature of the occupation, and place of residence of each member of the firm.

An accepted bank cheque for the sum of \$5,000.00 made payable to the order of the Minister of Railways and Canals must accompany each tender, which sum will be forfeited if the party tendering declines entering into contract for the work at the rates stated in the offer submitted.

The cheque thus sent in will be returned to the respective contractors whose tenders are not accepted.

The cheque of the successful tenderer will be held as security, or part security, for the due fulfilment of the contract to be entered into.

The lowest or any tender not necessarily accepted.

By order,
L. K. JONES,
Secretary.
Department of Railways and Canals,
Ottawa, 20th September, 1911.

More bread and Better bread —And the Reason for it.

A STRONG FLOUR can only be made from strong wheat. Manitoba Hard wheat is acknowledged the strongest in the world—and that is the kind used for Purity Flour.

But that's not all. Every grain of this wheat contains both high-grade and low-grade properties. In separating the high-grade parts from the low-grade the Western Canada Flour Mills put the hard wheat through a process so exacting that not a single low-grade part has the remotest chance of getting in with the high-grade.

Of course this special process is more expensive to operate but it means a lot to Purity flour users—that's why we use it.

It means that Purity Flour is made entirely of the highest-grade flour parts of the strongest wheat in the world.

It means a high-class, strong flour and therefore yields "more bread and better bread."

Purity may cost a little more than some flours, but results prove it the cheapest and most economical after all.

LIME ON THE FARM.

Best Way to Test it is to Try it on a Small Patch.

Lime seems to be needed on parts of most farms. It corrects sourness, mellow heavy soils, helps light soils to retain moisture, favors the growth of clover and alfalfa and checks the increase of some plant diseases. The most certain way, according to Professor Brooks of the Massachusetts experiment station, to find out whether lime will help the soil is to try it on a small plot in a field to be tested. Apply twenty pounds of fresh selected lime to two square rods.

Beets are a good test crop, as they grow better upon a limed plot if the soil needed lime. An average of about one ton of lime to an acre will usually be enough. It can be used at any season when the land is not occupied by crops and when it can be plowed. It may be planted broadcast and worked into the soil with a harrow.

Professor Brooks has been looking up various sources of lime in New England markets, and he finds that it varies considerably in cost and desirability. Quicklime is really the cheapest form, because when buying it the purchaser does not have to pay for water that is taken up when slaking lime.

One hundred pounds of quicklime contains as much essential lime as 132 pounds of slaked lime, thirty-two pounds being moisture from the air, and it contains as much as 178 pounds of raw limestone.

Lime can be slaked in small heaps by applying just water enough to wet the lumps, using about two pailfuls of water to 100 pounds of lime. After a few days it will have crumbled to a powder. Most farmers slake the lime before applying, as the unslaked lime is very disagreeable to use, even with a manure spreader protected with bur-lap.

Finely ground limestone or marl works well on light soils, but ground limestone costs more for the results obtained as compared with quicklime. Sometimes refuse lime from tanneries is a very cheap source of lime, and it can usually be had for the hauling.

MAKE FARMHOUSE FIT.

Don't Build Compact City Dwelling on Your Spreading Green Fields.

In our great cities land is dear and houses must be adapted to small areas. Architects have studied how to get the most house on a limited space because the man of moderate means cannot afford to buy a big lot. City houses are built on these condensed plans and are very well adapted to such conditions. But we are sorry to see that some of these city house plans are being taken into the country. When set into the wide space of a farm they look out of harmony with their surroundings.

The farmhouse should have all the comforts and conveniences of the city house, but it should not look like the city house. It should be so designed

A COMFORTABLE DWELLING.

as to fit into its surroundings. The old fashioned farm home, with its air of comfort and repose, is in better taste than the modern bottled city house on the farm.

Farmhouses can be tasteful and adapted to their location without being expensive, and it pays to see that they are so. A tasteful home has a sale value in the country just as it has anywhere, and farmhouses should be built with this idea in view.

Above all this, however, is the pleasure of living in a tasteful country home, one that is adapted to its purpose and fitted to its location. There is a satisfaction here that is not reckoned in dollars, but is worth trying to get.—National Stockman and Farmer.

A Good Chick Feed.
For a good cake for chicks as well as fowls (and also for dogs) take about a quart of cornmeal, a pint of wheat bran and a pint of oats. Mix with sufficient sour milk to make batter. Add two teaspoonfuls of soda stirred up in a little sour milk and salt to taste. The batter must not be made too thin, nor should the cakes be allowed to scorch. One big cake laid on the floor each day will make the little chicks grow beyond belief.

Farm Philosophy.

Education is our hope for better agriculture. Let us advance every interest that will help the cause of education.

Progress in farming is an individual problem from the solution of which the state, the nation and the world must benefit.

When planting trees about the house set them quite a distance off, say thirty feet. Let the sunshine in and save doctor's bills.

One of the first considerations in improving country life and in reducing the drudgery of farm work is the extensive use of improved farm machinery. Study your conditions and examine the implement catalogues for the tools you need. Efficient implements are the farmer's capital and usually bring profits when properly used.

Always the cookbook says:
"Sift Your Flour."
No lumps, you see. Aerates the flour, making it lighter.
Put FIVE ROSES in your sifter.
Never soft and sticky—never lumpy, musty, woolly.
Never coarse.
Milled superfine from Manitoba's grandest wheat.
Fine, granular, very dry.
Nothing remains in the sifter—FIVE ROSES is free, heavy.
And your bread is more porous, more yielding, more appetizing.
And more Digestible.
Because the particles are finer, easier to get at by the stomach juices.
Use this very fine flour—superfine.)
FIVE ROSES.

Five Roses Flour

Not Bleached Not Blended

LAKE OF THE WOODS MILLING COMPANY, LIMITED MONTREAL

OLD TIME FISHING VESSEL.
Schooner D. A. Wilson, of Beverly, Taken to "Graveyard" in Bass River.

Sailing its last trip, the old-time fishing schooner "D. A. Wilson," once the pride of the Beverly fishing fleet, is now in the graveyard for old vessels up Bass River, where she may be dismantled by wreckers unless something should turn up whereby the old craft could be used again.

The old "D. A. Wilson" was first skippered by Samuel Wilson and was named in honor of his wife, Deborah. For years the craft was a high liner and made big stocks. She was built back in 1869 at Salisbury and has been commanded by Capt. Benjamin Hines, Capt. Frank Foster, Capt. Lovitt Hines, Capt. Frank S. Robinson and many other whose names are well-known in local fishing annals.

When newer and faster schooners pushed the "Wilson" out of its big trips to the Grand Banks she was used for some time in the lumber and freighting coastwise trade and during the coal famine a few years ago made several trips to Baltimore for coal.

The "Wilson" is owned by H. W. Woodberry and many of the old timers will learn of her passing with keen regret, for the old craft was one of the few reminders along the water front of the days when Beverly was in the front rank as a fishing port and when Beverly fishing vessels were many on the popular fishing grounds.

ONE MILLION DOLLARS FOR A GOOD STOMACH
This Offer Should be a Warning to Every Man and Woman.

The newspapers and medical journals recently have had much to say relative to a famous millionaire's offer of a million dollars for a new stomach.

This great multi-millionaire was too busy to worry about the condition of his stomach. He allowed his dyspepsia to run from bad to worse until in the end it became incurable. His misfortune serves as a warning to others.

Every one who suffers with dyspepsia for a few years will give every thing he owns for a new stomach.

Dyspepsia is commonly caused by an abnormal state of the gastric juices, or by lack of tone in the walls of the stomach. The result is that the stomach loses its power to digest food.

We are now able to supply certain missing elements—to help restore to the gastric juices their digestive power, and to aid in making the stomach strong and well.

We know that Rexall Dyspepsia Tablets are a most dependable remedy for disordered stomachs, indigestion, and dyspepsia.

We want you to try them and will return your money if you are not more than satisfied with the result.

Three sizes, 25 cents, 50 cents and \$1.00. Remember, you can obtain Rexall Remedies in this community only at our store—The Rexall Store, Royal Pharmacy, W. A. Warren, Bridgetown.

RAILWAY LABORER'S GRUDGE.
The most expensive act of damage ever committed by a railway worker was that of an Italian navy employed on the construction of a tunnel through one of the mountains in the Flack Forest. Having a grudge against his foreman, he succeeded one night in altering the position of the stakes which marked the course of the work. The excavators were working upon the tunnel in two sections, one from the north and one from the south. Owing to the shifting of the stakes the sections involved, instead of being directed to the same point, were found to be twenty-six feet apart when they reached the middle of the mountain. The northern half of the tunnel had therefore to be entirely reconstructed at a cost of \$175,000.

You are not experimenting on yourself when you take Chamberlain's Cough Remedy for a cold as that preparation has won its great reputation and extensive sale by its remarkable cures of colds, and can always be depended upon. It is equally valuable for adults and children and may be given to young children with implicit confidence as it contains no harmful drug. Sold by all dealers.

DANGER FROM RIFLE SHOOTING.
A young man and a young lady, in Saskatoon last week were practising shooting with a twenty-two rifle. The weapon was accidentally discharged as it was being passed from one to the other. The bullet traveled over a distance of one hundred and sixty yards, and tore its way through no fewer than six sheaves of wheat, entering the heart of a little girl as she sat playing in the wheat field. She did not live five minutes.

Here is a warning to the accidental or careless discharge of rifles. We see mere children going about with rifles, searching for game. If a bird should be flushed, bang would go the rifle without a thought of the direction or the distance the bullet would travel.

You cannot be too careful about putting fire arms in the hands of mere boys, and on no account should they be allowed to go gunning without an elder person with them.

FARM HAND FALLS HEIR TO TITLE.
W. Joseph Eldridge, Who Fought Through Egypt and Boer Campaigns is Earl Myers Now.

Lawton, Okla., Sept. 26.—W. Joseph Eldridge, who is working as a farm hand near here, today received word that he is heir to the title and fortune of the late Earl Myers of Craig Castle, near Glasgow, Scotland.

Eldridge saw service in the Boer War, in Egypt, and the Boer uprising, as a Lieutenant in the Eighteenth Hussars. He came to the United States and enlisted in the American Army, where he rose to the rank of a non-commissioned officer. He was stationed at Fort Sill, Okla. Later he left the army to study farming.

USED SHELL AS HAMMER, IS DYING.
New York, Sept. 26.—Mrs. Anna Halpitt took a loaded one-pound shell from the mantle in her up-town home last night to use as a hammer in driving a bothersome tack out of the heel of her shoe. She struck the percussion cap in the base of the projectile and in the explosion which followed, she received injuries which will probably result in her death.

Mrs. Halpitt is a widow, sixty years old. The shell which she seized for a hammer had lain on the mantle in her apartments for a number of years as a souvenir presented her from a friend.

SOME OTHER DAY.
Some day—in future, fairer days to be—
I'll do the kindly work my heart has planned;
Then every one that asks shall have from me
The quick, sure sympathy of heart and hand.
I shall obey the Father's old command:
To lift the fallen, comfort the oppressed,
To pluck the thorns from out my brother's breast;
To open wide my soul and cast out sin,
And call good deeds, God's tenderest angels, in.
I have no time today, but some time I shall follow where the Master's feet have trod;
Shall face the frowning world with courage high;
Shall learn to kiss, with chastened lips, the rod;
And find in Sorrow's face the eyes of God.
So shall I curb the quick, rebellious will.
Hear in my heart, a low-voiced "Peace, be still!"
Through grief most nobly borne, my soul shall win
A space to call the choiring angels in.

But O, what if, on some fair evening,
When I might watch, as Abram watched of old,
The long-closed-to door of my heart flung wide
To welcome angel guests into my fold
That they should find my dwelling place too cold!
A moldered floor, unknown of wind or sun;
A lamp unlit of kindness never done;
A shrine dust-strewn with selfishness and sin,
And, all too late, I called the angels in!
—Marie Conway Oemler, in the New York Independent.

BODIES RECOVERED FROM THE "MAINE."
Havana, Sept. 17.—Four bodies were found today in the petty officers' room of the "Maine." The workmen also uncovered the four rear boilers, which had not moved from their original position. The recovery of the bodies, which remain unidentified, was made possible by the building of a temporary bulkhead, which cut off the inflow of mud and water from the afterpart of the wreck. The engineers expect to make a rapid search of this part of the "Maine," which is less shattered than the many bodies will be found. Within twenty feet, while behind the bulkhead separating the after part of the wreck from the remainder is thirty feet.

Don't trifle with a cold is good advice for prudent men and women. It may be vital in case of a child. There is nothing better than Chamberlain's Cough Remedy for coughs and colds in children. It is safe and sure. For sale by all dealers.

LORD STRATHCONA ON FLYING VISIT.
He Declines to Discuss Reciprocity or His Plans for the Future.

New York, Sept. 28.—Lord Strathcona arrived tonight on the steamer Mauretania, accompanied by the Hon. Mrs. Robert Howard on a flying trip to Montreal, and possibly to Ottawa. His Lordship had expected to get away on the regular Montreal express tonight but a thick smoke so obscured the lower bay that it was long after eight o'clock before the big Cunarder reached her dock.

Lord Strathcona declined to discuss Reciprocity, explaining that as High Commissioner he could not talk about any matter that was or had been a political issue in Canada.

"Is there any truth in the rumour that you have consented to spend another year in England as High Commissioner?" he was asked.

His Lordship laughed heartily at the question and remarked—"Why I am going right back on Wednesday next. This is only a flying visit. I hope to get off to Montreal tonight, and get through my business in ample time to get this very boat back."

"Will you also visit Ottawa?"

"Why, Ottawa is only at the door of Montreal, I may run up there too."

His Lordship remarked in the course of conversation that he could not recall how many voyages he had made across the ocean.

"It is well upwards of a hundred and I have gone across in all kinds of ships. When I crossed for the first time seventy-three years ago I came over in a sailing vessel. We made the passage to Canada in forty-three days, and the vessel was considered a very fast one at that. Now I have come over and will be back in half that time."

THE HOME

HOW TO PUT UP FRUIT.

(By Pansy Viola Viner.)

It is possible to put up fruit in such a manner that not one jar will spoil, or even mold. All that is required is a little care. The first and most essential thing is thorough cleanliness. Be sure that the jars are absolutely clean. Fill the jars up slowly with hot water, not boiling, then pour this out and gradually fill up again with boiling water. Put the lids in cold water in which has been put some soda, and bring to a boil on the stove. Then put into boiling water in which there is no soda and let stand until ready to use. Dip the rubbers into scalding water before putting them on the jars.

Use only the best firm, ripe fruit obtainable. It is best to bring water and sugar to a boil together before adding the fruit. Use only silver spoons or forks when working with fruit. When the fruit is boiled enough, dip up carefully, so as not to break, in a cup or enamel dipper, and pour into the jars until they are overflowing; this is one point that needs to be emphasized. Put on the rubbers and hot lids immediately; speed, when working with the cooked fruit, is necessary. Screw the lids on as tight as possible and turn the jars upside down to see if they are airtight and will not leak. Wipe off the sides of the jars before putting them away.

Paper bags are excellent to place the jars in before storing them away in pantry or cellar, since they keep the fruit from all exposure to light. After tying up the bag, write on the outside the kind of fruit enclosed.

It pays to use new rubbers each time, and the jars with one-piece glass covers that fasten on with a heavy wire snap are best for general use.

Fruit is at its best just before it ripens, especially for jelly making.

Housekeepers who can any considerable quantity will find it most economical to buy fruit by the crate. It will be found that in each crate there are several grades. These should be sorted and each used for the purpose to which it is best suited.

The overripe, knobby, imperfect fruit should be used for jams, marmalades, and fruit butter.

The ripe, best, and perfect pieces should be used for the table.

The green or partly ripe will need to be boiled in water enough to cover to soften it before putting in into the syrup, for if put into the hot syrup hard it will never boil soft. The water this fruit is cooked in may be used in the preparation of the syrup.

As fast as the fruit is pared it should be dropped into acidulated water to keep it from turning dark. To make the acidulated water add the juice of half a lemon to a quart of water.

Apples, pears, peaches, quinces, etc. should be washed before paring. In paring cut away mercilessly the decayed spots, and do not put these with the parings, for you may want to use the parings later.

CAMPAIGN AGAINST FLIES.

(Free Press Editorial)

Detroit could be without flies in ten days if a fly trap were fixed on every screen door.

This is one sentence from the address of Prof. Clark F. Hodges at the board of commerce rooms recently. The declaration should stimulate every well-informed man and woman to begin his part of the fight.

In a very few years a city with the plague-bearing fly and the plague-bearing rat and mouse will be regarded as a city without vaccination is regarded today. These visible parasites have dwelt with man in all climates, and have slain millions of human beings by invisible weapons. For ages man did not know what was destroying him. In our day he knows and yet is strangely indolent. It is foolish to doubt the practicability of a destructive campaign. Man has been able, too able, to destroy useful and beautiful creatures, whole tribes and species of them. He has wasted the innumerable great bison, and has made havoc among wild bees and birds. The wild pigeons that once clouded the sky over all these northern states have been

destroyed. Moreover man has grappled with invisible germs of illness and repressed them within bounds. Surely he can in a few years make the fly a rare visitor and the rat a curiosity.

Against both there must be precaution and prevention as well as open fighting. A carelessly kept stable, an open can of garbage, will muster millions of flies. Old houses and sheds and barns will domicile many rats. The first snug corner of a declining house tempts the scurrying but always courageous mouse.

It is easy to pass laws, of course. In this case probably education and example will be much more effective. The opportunity is one open to teachers and preachers, to doctors and women's clubs, to all educated and careful people. Flies, and rats, and mice, are dirt. It is filthy and squalid to have them about. They must be washed away. Destroying them from the face of the earth is not an heroic or wonderful act. It is merely cleaning house.

Automobiles on Country Roads.

(Halifax Acadian Recorder.)

The generally accepted principle of British liberty is that a man may do as he pleases so long as what he pleases to do does not interfere with the rights of others. This is the sound and safe principle, to pursue in all matters pertaining to individual liberty, and it is eminently necessary to pursue this principle in connection with the practice of motoring.

The motorist has a right—same when limited by law—to drive where he pleases and as fast as he pleases, just as long as his pleasure does not threaten life and limb of his fellow-citizens. But his liberty stops there, and should stop there. Many, the great majority, indeed, of motorists, are careful, sensible and conscientious in connection with the manipulation of their cars, but there is a minority who seem to take delight in reckless driving either to show an imaginary courage, to court an imaginary admiration and to make real and genuine fools of themselves, or worse. Most of the country roads are narrow. All of them are winding; being made up of a succession of curves. Pedestrians pursuing their course along these public highways are in constant and serious danger from automobiles moving swiftly along these curved and narrow ways.

On holidays and Sundays especially, the Bedford road is a favorite route, taken by these machines which often dash along at a speed perfectly terrific, considering the nature of the course. Children are particularly in danger, but all wayfarers are undergoing great risks, pedestrians as well as those driving horses. It is of course the few who habitually show off speed, either on the road named or elsewhere, but those few are creating and maintaining a prejudice against motorists generally which that body of respectable citizens can not afford to suffer. Complaints are constantly coming in of horses bolted, children narrowly escaping death or serious injury and public highways rendered highly dangerous by the careless, selfish and conscience-lacking pleasure rider. Such abuse of a liberty permitted thus by law, if continued, will undoubtedly work up public antagonism to a point where the law will be changed by public demand. None of the roads near the city are safe or at all suitable for speeding purposes, and motorists should learn this simple and obvious fact without delay. By going slower you may go farther, gentlemen.

FATALITY AT A FAIR.

Boy Killed in Accident During Balloon Ascention.

Windsor, Ont., Sept. 27.—Fred Smith, a seven-year-old colored boy was struck on the head by one of the poles which support the balloon, just as the Sinclair sisters were about to make their first ascent at the Windsor fair yesterday afternoon resulting in his death about one hour later.

In ascending the props and parachute became entangled with one of the poles, the pole was lifted about fifty feet in the air and came down striking young Smith on the head, fracturing his skull.

Crop Rotation

I am going to explain a system of crop rotation which has included for its special crop the potato. The farm is to be divided into seven separate fields making three fields of twelve acres each or a farm of sixty acres under cultivation. In addition to this there may be some meadow or extra pasture land in order that there may be kept a certain number of cattle to consume the surplus grains so that they may be thus returned to the soil in the form of manure thereby reducing the excessive use of commercial fertilizers.

Beginning with the twelve-acre field one is to be in potatoes, the second in clover and the third in wheat or rye. Describing the preparation of the potato field, which is always the clover field from which a crop of clover hay has been taken. This field is well manured and if it seems necessary, commercial fertilizers can be used to produce the special crop, the potato. In the fall after the potato is harvested the field is sown in either wheat or rye, the clover being sown in the spring.

Next year the second field is ready for the special crop, which is treated the same way as the first, and the next year the third field is ready and thus making a three-year rotation with the special crop included each year.

Next come the six-acre fields, which include the corn and oats crops. Corn is put in the clover fields and in the corn legumes should be sown at the last cultivation to add nitrogen and to serve as a covering for the winter. The corn should be followed, then again sown in clover in the spring, after which a crop of hay will be taken off, then to be ready again for corn, hence a four-year rotation which requires four fields. Each field will be put in corn the year after a crop of hay has been taken off.

By this system of rotation it enables the farmer to raise his own feed stuff for his stock, thus avoiding the buying of high-priced feeds, and at the same time not sell the cereals from the farm, but to reform it and thereby increase the fertility of the soil.—W. J. D.

The One Who Resigned

A merchant pointed out to a new stenographer the other day several serious and wholly inexcusable mistakes which he had made. The stenographer colored at the first word of the lecture and waited impatiently—and without listening—until it was ended. Then he resigned.

"Why do you resign?" asked the merchant.

"Because I don't let any man take advantage of his power as an employer and speak harshly to me."

"What did I say?" asked the merchant.

"I don't know just what it was. I only know you were jumping on me about my work."

"Why did you leave the position you had before you came to us?" asked the merchant.

"For the same reason that I'm leaving here. The man thought he could jump on me just because I was an employee," was the reply.

"But didn't you make any mistakes?" asked the merchant.

"Of course I made mistakes. Nobody is perfect."

"Then you don't permit anyone to speak to you of your mistakes?"

"I don't think harshness is the way to help a man to get along."

"And you regard any form of reproach as harshness?"

The stenographer was silent.

"The only talk about your work that you will listen to is praise."

The stenographer was silent.

"You can't see that praise is not of the slightest value to you, that criticism is invaluable?"

The stenographer was silent.

"You can't see that by speaking to you of your mistakes I was showing myself to be your friend; that if I had passed over your mistakes I should have been doing you an injury?"

The stenographer was silent.

"Don't you think you had better give me another trial?" asked the merchant.

At first blush every employee who reads this story will scoff at this stenographer as an unusual example of inordinate vanity. But isn't this story worth thinking about? Is this stenographer so unusual, after all? Is such vanity rare, or is it only his courage of it that is rare?

It was by ambition that the angels fell. It was by self-exaltation that men fell.

A very great man once said that no man had ever lifted his head so much as an inch above the head of his fellows who had not the power of self-criticism—the ability to see his own faults either on his own initiative, or when some friend or foe pointed them out. The smaller kinds of superior men close their ears against their enemies, but learn when their friends are venturesome enough to criticize them. The larger kind of superior men learn much from the frankness of friends, more from the fierce and scorching criticism of their unintentionally friendly foes. And on the day that a man ceases to be capable of self-criticism, ceases to be tolerant, on that day his undoing begins.

Again and again you hear it said of a man, "He has reached his limit." What does that mean? In every case, close study of the man and his career will show that he has reached that stage at which self-exaltation has succeeded in silencing self-criticism.

Study the man who works beside you. Study the man who was promoted the first of the year. Study the man who wasn't—especially if he happens to be yourself. This is not a world of chance, but of causation. There was a "why" for the other man's dismissal or failure to advance.

What the world most needs is not alms or outches, but more friendly criticism.

The place to begin to correct the evils in the social system is with the one member of it who is wholly under your control. Other corrections can wait. That one can't.

The best plaster. A piece of flannel dampened with Chamberlain's Lintment and bound over the affected parts is superior to a plaster and costs only one-tenth as much. For sale by all dealers.

WEIGHED 510 POUNDS.

Unusual Coffin Wagon Needed for Body of Massachusetts Woman.

Wakefield, Mass., Sept. 27.—As a result of her great weight unusual arrangements were necessary at the funeral of Mrs. Lena M. Richards, who died on Friday, 22nd ult. Mrs. Lena M. Richards is believed to be the heaviest woman in New England.

The removal of the body required the doors at the Richards' home to be cut away. A special coffin was constructed for the body, which weighed 510 pounds. The coffin was thirty-six inches wide, twenty-six inches deep and six feet, four inches long. It required the services of ten men to lower the body into the grave.

Three only, formerly \$1.90 now only \$1.50

Cape Breton to Have Fox Farm

Fox farming, which has yielded thousands to P. E. Island men during the past few years, is about to be begun at Whyecoonagh. A few weeks ago, Dr. D. T. McPhail, a son of Mr. and Mrs. James McPhail, of Whyecoonagh, but who enjoys a very extensive practice in New York City, arrived home on a visit to his parents. His visit, however, had a double object, and today he has one of the most modernly equipped and most promising of fox farms in the Maritime Provinces.

For several years Dr. McPhail has had under consideration the starting of a fox farm. He accordingly studied the matter and decided to breed only the very best of animals, confining himself to black and silver greys. As a starter, the Doctor has installed six beautiful black male and female pups, and an equal number of silver greys. Clare Austen, who has had many years' experience in the fox business, is in charge of the fox farm at Whyecoonagh. The new concern will purchase all kind of foxes, preferably those of value, and particularly the silver greys and blacks.—North Sydney Herald.

LONGEST WORD.

"What is the longest word in the English language?" asked Uncle Tom. "Valetudinarianism, I suppose," replied James, who had taken a prize in spelling. "No," spoke up Susie; "it's 'smiles,' because there is a mile between the first and last letters." "I know one," said Jack; "that has over three miles between its first and last letters." "What word is that?" asked Uncle Tom. "Beleaguered," cried Jack, triumphantly. "I know one," said Philip; "that is longer than that. 'Transcontinental' has a whole continent between its beginning and ending." "Interoceanic beats them all," exclaimed Elsie; "for it contains an ocean; and an ocean is larger than any continent."

Paradise

Mr. Roy Balcom was at home over Sunday, returning to his studies at Acadia.

Johnson Starratt and Albert Longley left last week to enter the "B" class at the Normal College.

Mrs. J. H. Balcom leaves on Wednesday for a trip with friends in New York.

Rev. and Mrs. Wallace returned last week from a very enjoyable fortnight spent in driving, visiting the towns along the way to Halifax and along the South Shore, returning by the way of New Germany.

Mr. George Gerald, of Boston spent part of his vacation at the home of his friend, Mr. Guilford Sovert.

Mr. and Mrs. Mills, of Granville Ferry, visited their daughter, Mrs. Fletcher Bent last week.

Mr. Earle Kinley visited Mr. and Mrs. J. S. Longley last week.

Miss Lulu Zwicker, of Acadia College, is visiting her sister, Mrs. W. E. Banks.

Centretia

Mrs. L. Morton returned home from Campbellton last week.

Miss Bertha Brooks of Lynn is visiting her parents, Mr. and Mrs. B. Brooks.

Mr. E. Dickinson of Lynn, who has been a guest at the home of Mr. and Mrs. Weston Messenger, returned home on Monday.

Mr. Ernest Ewing, of New York, spent a few days of last week with friends here.

Miss Blanche Brooks returned to Lynn on Monday.

Mrs. S. Messenger is visiting friends in Digby.

Lawrencetown.

Miss Mary Bagnall, of P. E. Island sister of Rev. H. S. Bagnall, former pastor of the Baptist church, is visiting Miss Myrna Stoddard and other friends in town.

Mr. G. R. Williamson, of Moncton, was the guest of Mr. and Mrs. F. B. Bishop last week.

The Mission Band "Willing Workers" met on Sunday afternoon in the vestry of the Baptist church. Mrs. (Rev.) Bradshaw from China addressed the meeting. Mrs. (Rev.) H. G. Mellick is the president for the ensuing year and plans are being developed to make the meetings of much interest.

Mr. F. Settle, of Dartmouth, has been a guest at the home of Mr. and Mrs. H. Young over Sunday.

Mrs. F. M. Whitman spent last week with her parents, Mr. and Mrs. Osmond Balcom.

Mrs. Enoch Neary of Greenwich, is visiting her niece, Mrs. Elvin Shaffner.

Pastor H. G. Mellick performed a marriage ceremony at the home of Mr. and Mrs. Henry Grant, Williamston, Sept. 27th, when their daughter, Miss Beatrice, was united in marriage to Mr. E. Augustus Rice in the presence of the members of the family.

The Young Peoples' meeting, after being suspended for the summer months, was re-opened on Monday evening with a social and an address by Rev. L. F. Wallace of Paradise.

The W.M.A.S. meets at the home of Mrs. D.M. Balcom on Tuesday afternoon.

The sewing circle meets in the vestry on Friday afternoon at 2 p.m. and supper at 6 o'clock.

Percy Balcom, a successful young merchant of Halifax, visited his parents, Mr. and Mrs. Albert Balcom last week.

Evans Jefferson, son of S.T. Jefferson, left on Wednesday last for Windsor, where he enters his second year in King's College.

Rev. and Mrs. Bradshaw, missionaries from China, are the guests of Mr. and Mrs. P. H. Saunders, and spoke in the Baptist church Sunday evening to a large congregation.

Tupperville.

The Rev. Dr. Jost preached to quite a large congregation at 11 a.m. on Sunday last.

John Brooks is getting pretty well along with the apple house he is building for Mr. Howard Bent.

The farmers are rushing the apples at a great speed, as they find the crop is larger than they anticipated. We need more coopers in this place, as barrels are scarce.

S. D. James has a three-year-old heifer which he has not seen for three or four weeks, and believes it has strayed away with some other herd of cattle. Her color is mostly white. Would be glad of information

Middiection

Mr. W. L. Daniels of New York, accompanied by his sister, Mrs. Wagner, of New Jersey, visited the old home at Port George this week. They were also guests of their cousin, Mr. Frank Elliott.

PRESENTATION TO PASTOR.

Ehediac, Sept. 28.—On Friday evening a number of members of the Baptist congregation assembled at the home of Mr. and Mrs. George Tait, and presented their pastor, Mr. Roy Balcom, with a gold watch and ring. The presentation was made by Mr. Ezra Taylor, who expressed at the same time the deep appreciation of the congregation of Mr. Balcom's services while among them. Mr. Balcom in reply thanked the congregation heartily for all their many kindnesses shown him during his pastorate here. After refreshing the pleasant evening was brought to a close.

REWARD.

WHEREAS five years ago the word Zam-Buk was unknown in Canada, and Zam-Buk is to-day admitted to be the finest cure for skin injuries and diseases;

AND WHEREAS it has been represented to us that there are still some good Canadians, and even some mothers and heads of families who have not yet tried this great balm, we hereby offer a REWARD of one free trial box of Zam-Buk to every person who has not yet tried this wonderful balm;

PROVIDED they send by mail to us this proclamation together with one-cent stamp to pay return postage of such box;

AND FURTHER PROVIDED that they address such application to our offices at Toronto.

Given under our hand this day.

ZAM-BUK.

Outam

Service on Sunday at three o'clock by R. N. Rundle. All are invited to attend.

John Lockett & Son, Bridgetown, N.S.

\$3,600

in Cash Prizes for Farmers

Your Photograph May Win a Prize

AMONG the prizes we are offering in our big Prize Contest is one of \$100.00 (Prize "C") for the farmer in each Province who furnishes us with a photograph showing the best of any particular kind of work done on his farm during 1911 with "CANADA" Cement. For this prize, work of every description is included.

Now just as soon as you finish that new silo, barn, feeding floor or dairy, that you've been thinking of building, why not photograph it and send the picture to us? The photograph doesn't necessarily have to be taken by a professional or an expert. In fact, your son or your daughter's camera will do nicely. Or, failing this, you might use the kodak of your neighbor's son nearby. In any event, don't let the idea of having a photograph made deter you from entering the competition. Particularly as we have requested your local dealer to help in cases where it is not convenient for the farmer to procure a camera in the neighborhood. By this means you are placed on an equal footing with every other contestant. Get the circular, which gives you full particulars of the conditions and of the other three prizes. Every dealer who sells "CANADA" Cement will have on hand a supply of these circulars—and he'll give you one if you just ask for it. Or if you prefer, you can use the attached coupon—or a postcard will do—send it to us and you'll receive the complete details of the contest by return mail.

If you haven't received your copy of "What the Farmer Can Do With Concrete," write for that, too. It's a finely illustrated book of 180 pages full of useful and practical information of the uses of concrete.

Write us to-night, and you'll receive the book and the circular promptly.

Do not delay—sit right down—take your pen or pencil, and fill out the coupon NOW.

Canada Cement Company, Limited, National Bank Building, Montreal
