Guideboard Corner's

Our beauty spots are showing up well since the late sunny days. "The hedges are white with May," the violets peep from grassy nooks and the meek little dandelion is everywhere.

Are we all going to have a plot of Shirley Poppies in memory of those who sleep in Flanders fields? Win-some little Miss Marion Hollingsworth is calling around with seed packets.

Mr. Erastus Livingstone, our model farmer, is adding to his fruit garden a number of choice raspberry bushes. Mr. Livingstone is a very successful gardener, in touch with up-to-date methods.

Mrs. Walter Penlong is a visitor today from Mr. and Mrs. Wallace Darling.

Miss Lillie Dunham spent yesterday afternoon with her friend, Miss Mary Howarth.

We are sorry to know that Mrs. Thomas Howarth is not enjoying as good health as her many friends would wish her.

We are pleased to hear that Miss Dorothea Wight underwent a successful operation at the St. Vincent de Paul Hospital, Brockville. We hope to soon see her back to her home.

Mr. Jas. Sheldon, who has always an eye to improvement, has set out a number of fine young trees on his lot facing the roadside. May he live to see them cast very long shadows.

Every evening at train time for some days past numbers of people pass up to the Eloida Camp Ground, where a Pentecostal Conference is being held.

Does not the sight of these good people call to mind this wonderful, beautiful passage: "So, then, it's to your tents, O Israel, to your knees, to the silence awhile—where God is."

Harlem

Farmers are sowing the high spots and waiting for the rest to dry.

Miss Pearl Gorman is nursing Miss Beatrice Trotter, who is under the care of Dr. Kelly.

Land is moving. One farm has been sold three times in as many months.

Holmes Eyre, sr., attended the funeral at Athens of his uncle, Horace Booth.

Our Smith's Valley cheese factory is promising a bigger output of both cheese and butter than ever before.

Mr. W. Eyre, Plum Hollow, paid his old home here a business visit on Monday.

The Harlem officials of the Methodist Church all turned out to a meeting of the Quarterly Board at Delta on Monday. They report each of the five appointments fully paid as to salary, with an increase of offerings for the other funds of the church.

Glad to know that the patriarch of Wright's Corners, pardon, Guideboard Corner's, suggested the change of name. Thanks to the correspondent for the information and also for the kindly terms in which it was given.

Newbliss Notes

Pte. Jack Dodd has returned home after a year's service overseas.

Mr. and Mrs. Wild motored from Toronto one day last week and are guests of Mrs. Silas Hitchcock.

Miss A. P. Stevens paid a visit to her aunt, Mrs. Hugh Fikerty, of Smiths Falls.

Mrs. Eliza Lowman is making fine progress on the road to recovery and is expected home from the hospital the last of this week.

Mrs. Hannah Read and family have moved from this vicinity to Cheyne's.

Mrs. Delbert Connell and family were recent guests of Mr. C. Connell, Smiths Falls.

Only bona fide Canadian firms will be permitted to compete on foreign orders obtained under Canadian credits. "Mushroom" firms have been ruled out by the Canadian Trade Commission.

Greenbush

Pte. Alex. Moray has returned from service overseas and the occasion was celebrated by a reception in his honor at the home of Mr. and Mrs. Arthur Blanchard. During the evening Mr. Moray was presented with an address of welcome and a signal flag.

Mr. and Mrs. Leonard Keadrick, who have been spending the winter here with relatives, returned to their home at Cana, Sask. last week.

Miss Gertie Ferguson, who spent most of the winter at Watertown, N.Y., is now at the home of her father, Mr. Thomas Ferguson.

Mrs. Byron Loverin returned last week from visiting relatives at London and Toronto.

Captain Stewart Stowell, of the Black Watch Highlanders, Montreal, who has seen service overseas, is a guest at the home of Mr. George Taplin.

At the election of officers in the Greenbush Sunday School, Mr. Wm. Connell was re-elected as superintendent.

Miss Ruby Johnston, of Brockville, was a guest at her father's home for the week-end.

Mrs. Will Tackaberry is a patient in the General Hospital, Brockville.

Eloida

Seeding is slow on account of the increase of moisture.

Meadows and fall grain are very promising.

Local horse dealers are being made happy as business is daily increasing. Caravans of tented travellers are among our latest arrivals. Dogs and horses are much in evidence.

Eloida residents are loud in their praise of the late play, "The Deacon's Second Wife."

The Christian Standard Church of America is holding its Pentecostal Conference on Eloida Camp Ground this week. Bishop R. C. Horner is in charge.

Leeds

Owing to so much wet weather very few farmers have any seeding done.

Mr. Tom Warren is home from Queen's University for the long vacation.

Mr. and Mrs. Charlie Kirkland, of Brier Hill, were Sunday visitors of Mr. Ross Gamble.

Mr. Alfred Gordon spent the week-end with his family in Gananoque.

Little Miss Gertie Gamble, Lyndhurst, spent Sunday at the home of her father, Mr. Robert Gamble.

Recent visitors at Mr. David Gamble's were Mr. Reggie Bracken and family, of Seely's Bay, and Mr. O. Bowell, of Elgin.

Service in St. John's Church next Sunday, the 25th inst., will be in the morning at 10.30, with the administration of the Holy Communion.

Mr. Gerald Somerville, of Kingston, is visiting at the home of Mr. W. F. Somerville.

Mrs. Albert E. Brown received word on Monday of the arrival of her brother, Lieut. Kenneth Rappell, of the R.A.F., at Montreal.

Charleston

The Charleston Red Cross Society met at the home of Mrs. E. Webster on Saturday afternoon for the purpose of winding up the business part of their work. On account of the rain the members were not all present. The society has decided to use the money in the treasury for the purpose of placing in the school photos of Ptes. W. Gerald Botsford and Gordon Kelsey, former pupils, who gave up their lives in the Great War.

In a recent letter received here from Pte. Joliff B. Ward he stated that he had enlisted in a labor battalion and was soon to leave England for France.

On account of so much rain some farmers here have not been able to do any seeding as yet.

LOCAL NEWS ITEMS

Brief Notes of Interest to Town and Rural Readers.

The local stores and places of business will be closed all day Saturday on May 24 Do your week-end shopping on Friday.

Rev. Father Nicholson, R. C. Chaplain, will give a lecture illustrated with slides on the War in the Town Hall, Athens, on Tuesday evening, May 27th.

LADDERS—Extension or step, order now, prices right, F. A. JUDSON, Athens

You will always find the best fruits obtainable at the Bazaar—R. J. Campo, Prop.

Several slightly used Pianos always in stock. Prices range from \$100.00 upwards. Easy terms arranged.—C. W. Lindsay, Limited, Brockville.

Mrs. M. B. Douglass of Calgary, Alta. and Mrs. Mallett of Sharbot Lake, Ont. are visiting for a few days at their aunt's Mrs. H. H. Arnold.

The Women's Institute wish to thank all those who so kindly assisted in the work of their play last Thursday night.

Flight Lieut. Douglas Johnster of the R. A. F. has returned home after being on active service in France. Mr. Johnster was a A.H.S. Student.

A sky rocket set off on Monday night was very nearly the cause of a fire at the home of Rev. R. Hammond.—The rocket broke a window and set fire to the curtains inside, fortunately the inmates were successful in extinguishing it before more damage was done.

We notice that Brockville has decided to hold Saturday, May 24th, as their holiday.

The post office will be open the following hours on May 24th, 9 to 9.30 a.m. and 6 to 7 p.m. for delivery only.

Mr. Charles E. McLean is moving his office and surgery from the Downey Block to his residence on Henry Street.

Mr. and Mrs. Wallace Johnson, of Almonte, are visiting his mother over the week-end.

Mr. Walter Penlong left last week for Elizoy Harbor, Ont., where he will be employed as cheesemaker.

Mr. Vernon Baker was in town over the week-end. Mr. Baker left on Monday to take a position in one of the branches of the Merchants Bank in the Province of Alberta.

Mr. S. B. Code, town engineer of Smiths Falls, was in town Tuesday.

Rev. and Mrs. Usher were renewing old friendships here on Tuesday.

Congratulations to Mr. and Mrs. E. J. Shea on the success of their son Ambrose, who has passed his final examinations at the Law School, Toronto.

The Methodist choir will kindly meet at 8 o'clock Thursday evening on account of the school concert on Friday evening.

Gardening is the order of the day.

Jas. Ronan has leased the Judson lots, Mill street.

Mrs. Davison is building an addition to her Main street residence.

Seth Wescomb and family have moved from the vicinity of Lyndhurst to the Jackson house, Elgin street.

W. Jacob has installed a new gasoline engine to use in his blacksmith shop.

Born, May 16th, to Mr. and Mrs. Roy Algure, a daughter.

H. C. Phillips is quite poorly owing to advanced years, and has been confined to his bed for the past couple of weeks.

Mrs. George Ferguson, Addison road, is quite ill. Her sister has arrived from Montreal to attend her.

Judge Reynolds, Brockville, was here on Thursday to conduct Division Court, but there were no cases on the docket.

Mr. Penwarden, Kingston, was here last week on a business trip.

All Stores Closed Saturday May 24th—Legal Holiday.

Following the play on Thursday evening, light refreshments were dispensed to those contributing to the evening's entertainment.

A. E. Donovan, M.L.A., Toronto, visited the home constituency last week.

Mr. and Mrs. Robert Powell, Elgin, were week-end guests of the latter's parents, Mr. and Mrs. H. S. Robeson.

Mr. and Mrs. Lewis Halladay and little Miss Marjorie, Elgin, were week end guests of Mr. and Mrs. Stephen Knowlton.

Mr. and Mrs. H. R. Knowlton were at Chantry on Saturday attending the funeral of the late Mrs. Knowlton.

Miss Gertrude Young, R.N., is enjoying a few days' rest at the home of her uncle, Walter C. Smith.

On Monday morning Mr. A. W. Johnston, postmaster, received a cable message from his son Hibbert, at Bramshot Camp, England, stating that he was sailing on the 18th of May on the steamship Aquitania.

On Monday morning a horse belonging to Mr. Dolan, Cobden (who is in attendance at the Eloida camp meeting), was left tied near the C. N. R. depot, but on the arrival of the east-bound train the animal became frightened and made a dash for liberty, running down Henry and Victoria streets, where it was captured, none the worse for the exciting experience.

W. C. T. U. meets at 3 p.m. on Thursday at the home of Mrs. G. W. Beach.

Public school teachers and pupils are busily engaged preparing for their patriotic concert on the evening of Empire Day.

Victoria Day is to be observed here as a holiday.

Dr. Annie Bacchus is expected to speak in the town hall here on the evening of June 16th, under Women's Institute auspices.

The following officers of the Ladies Aid Society of the Methodist Church were appointed for the coming year: President, Mrs. Irwin Wiltse; 1st vice-president, Mrs. N. F. Earl; 2nd vice-president, Mrs. C. L. Lamb; treasurer, Mrs. M. C. Arnold; secretary, Mrs. D. L. Johnston; parsonage committee, Mrs. I. C. Algure, Mrs. J. Ackland and Mrs. M. Towriss.

The Women's Institute scored a great success at their entertainment given last Thursday night in the town hall, which was filled to the doors, many motoring and driving in from the surrounding country to enjoy with others the comedy play "The Deacon's Second Wife," which was put on by local talent, all doing their parts in a creditable manner for amateur players. The personnel of the play embraced the following: J. A. Burchell, B.A., Mrs. Crawford, C. Slack, Mrs. C. F. Yates, Mrs. N. G. Scott, Miss Beryl Davis, Miss Gwen Wiltse, Little Miss Marion Robinson, Master Leonard Johnston and Messrs. Sam Hollingsworth, Hilliard Brown, M. Dunham, H. Percival. Preceding the play a short musical program was given, Mrs. S. C. A. Lamb and T. Horsefield being heard with pleasure in a well rendered duet.

Mrs. W. G. Towriss in an enjoyable reading and T. Horsefield singing a solo in fine form. During the evening the village orchestra enlivened the entertainment by several selections. The ladies of the Institute will have about \$125 clear to add to their bank account and have in contemplation the purchase of suitable land for a village playground and small park in the future.

A large trade on our Atlantic coast is stagnant and 2,000 people are idle. There is a glut stock of \$300,000 worth of sardines, and canners will not reopen until this is sold. The amount, the Canadian Trade Commission points out, is almost the exact value of imports of foreign sardines into Canada last year.

Sheldon's Corners

Miss Elva Whitmore spent the week-end in Athens.

Mrs. M. Topping was a recent visitor at J. Topping's.

Raymond Hamblin is home from Brockville Business College.

Miss Beryl Newsome was home for the week-end.

Mr. and Mrs. George Cowles, with Mr. and Mrs. Heber Cowles motored to Delta last week, where they spent a very enjoyable evening with Mr. and Mrs. H. Stewart.

Miss Ruby Whitmore spent the week-end with her parents here.

Tom Topping is helping his brother, John Topping, with the spring's work.

Mrs. O. Jackson and Mrs. M. Kilborn spent Monday with their mother Mrs. Berney, who still continues in very poor health.

A number from here attended the funeral of the late Roy Robinson on Sunday.

The dandelions made their first appearance of the season on Monday.

Mr. C. Moulton and family have taken possession of Mr. Nuisome's factory for the season.

Miss Ruby Whitmore was a recent visitor at Mrs. M. Hamblin's.

"Made in Canada goods should be the best"—that is the distinct injunction of the Canadian Trade Commission to all manufacturers under the credits arranged abroad.

CORRESPONDENCE.

Mr. Editor.—Old Resident in your second last issue is sorry to give up the name of Wright's Corners, but after the explanation in last week's Reporter the change is not so objectionable. Old Resident is right as far as guide boards being suggestive of out-of-the-way places where no one can be found to direct travellers. But the advent of the auto has changed all this and there will be more guide boards than ever.

But as the change was intended to honor an M.P.P. of whom we are all proud, would not either Eddyson or Edson be more appropriate, and we would still have one of the good old names. If, as suggested by the Guide Board correspondent, the object was to honor the son of an old friend, why not call it Donovan through respect to both father and son?

Senator Taylor has given his name to a place and the good old county of Leeds has dozens of places named from pioneer families.

Now the man who kept a hotel at which there was always a free plate for the unfortunate who was not able to pay, deserves to be remembered for his own open hand and big heart as well as for the success of the son so much admired.

When the change of Farmersville was being discussed, A. E. Donovan, M.P.P., preferred the name of Athens because it was so much shorter, and surely the name Donovan is not half as long as the new name for the old place.

When in a few years the Corners and Athens become one town having one name, who can tell which name it will be. Perhaps the children of that time may say our town of Donovan was named after one of our own boys who by his own ambition and ability fills the premier's chair today.

Justica.

GRANTS TO ROADS.

The people of Leeds County and Brockville in particular will be pleased to know that A. E. Donovan, M.P.P., has after persistent efforts secured an appropriation of \$800 for road improvements in this district. Of this sum \$400 will be spent on the Athens-Charleston road and \$400 on the Addison-Frankville highway. Both are very important highways and the money to be expended is something that will greatly assist in the popular and progressive movement of road improvement.

Every order secured under Canadian credits in Europe must be open to a bid from every Canadian manufacturer in the line who desires it. That is a fixed rule made by the Canadian Trade Commission.

TENDERS WANTED.

The Council of the Rear of Yonge and Escott ask for tenders for crushing the stone required for road purposes this year. Tenders to be made on or before the 31st inst.

R. E. CORNELL, Clerk. Athens, Ont.

COURT OF REVISION.

The Assessment Roll of the Municipality of the Rear of Yonge and Escott, for 1919, will be revised on Saturday evening, May 31st, 1919, at 8 o'clock, in the Township Hall, Athens, after which a regular meeting of the Council will be held.

R. E. CORNELL, Clerk.

COURT OF REVISION.

Municipality of Athens.

TAKE NOTICE that the first sitting of the Court for the revision of the Assessment Roll of the Municipality of Athens for the year 1919 will be held in the Council room, Town Hall, Athens, on Friday evening, May the Thirteenth, at the hour of eight o'clock in the evening, to hear any appeals that may have been entered with the Clerk.

G. W. LEE,

Village Clerk.

Athens, May 20th, 1919.

THE SPRAYING OF PLANTS FOR THE PREVENTION OF INJURY BY INSECTS AND DISEASE.

(Experimental Farm Note)

At this season of the year particular attention should be paid to the prevention of ravages by disease and insect pests. It is possible by a timely application of the proper sprays to control effectively many of our worst diseases and pests.

Spray materials may be divided into three classes. First, there are the fungicides, such as Bordeaux mixture of lime sulphur wash, which are used to control or prevent the development of fungous diseases such as apple scab and potato blight. Secondly, there are poison sprays, such as lead arsenate, for the control of biting insects, such as the potato beetle, tent caterpillars, etc., and, thirdly, the contact sprays, such as kerosene emulsion or nicotine sulphate, for the control of sucking insects like plant lice.

By selecting the proper sprays under each of these three headings, a combined spray containing all three can be used and thus in a single application one has a fungicide and a complete insecticide combined. A good combined spray is made up of follows: 4-4-4-Bordeaux, consisting of 4 pounds unslacked lime, 4 pounds copper sulphate and 40 gallons of water, to which is added 3 pounds of arsenate of lead or 2 pounds of arsenate of lime in paste form (if the dry form is used, use one-half this quantity) for controlling biting insects, and if aphids or plant lice are present, one-third of pint of nicotine sulphate should be added or, as an alternative, the lime sulphur could replace the Bordeaux mixture.

Do not delay the application until the disease or pest has become evident by its ravages, but make the application in time to prevent the damage. An application of spray is not a CURE, it is a preventative.

Do not think that one application is sufficient. Remember that at this season of the year foliage grows rapidly and a large amount of new leaf surface is soon exposed after an application is made, and it is this new uncoated surface which is a source of infection. Three to four sprays during the season will be necessary to keep the leaves covered and the plants free from disease and pests.

Make the applications thoroughly, drenching all parts of the plant with a fine, mist-like spray. A coarse spray is not as effective as a finely divided one.

If you have not already done so, make application at once to your nearest Experimental Farm or District Representative for a Spray Calendar, or apply direct to the Central Experimental Farm, Ottawa. These Calendars will give you full instructions as to mixing and applying sprays for the control of all pests and diseases. Don't delay. DO IT NOW.

ZAM-BUK

Purely Herbal—No poisonous coloring
Antiseptic—Stops blood-poison
Soothing—Ends pain and smarting, etc.
Pure—Best for baby's rashes.
Heals all sores.

50c. box. All Drugists and Stores

SUNDAY SCHOOL LESSON

Lesson VIII. May 25, 1919.
Jonah 3: 1-10.

Commentary.—I. Jonah's repentance and work (Jonah 3: 1-4). 1. The word of the Lord came unto Jonah—We know little of this prophet aside from what is given us in his prophecy. He was the son of Amittai and his home was in the northern part of Israel. The second time—God in mercy gave Jonah a second call to carry the message to Nineveh. At the first call, instead of going the 600 miles northeast to Nineveh, he started westward toward Tarshish, in Spain, a distance of 2,000 miles. His disastrous experience on that trip made him willing to obey the second call, although the very conditions that turned him aside the first time still prevailed. 2. Go unto Nineveh.—His mission was to Nineveh, which was the great city of Assyria. This nation was hostile to Israel, and within a few decades carried Israel into captivity. That great city.—The city must have had a population of more than a million, and Jonah was called to go and cry against it (ch. 1: 2). Farrar calls it the London of the ancient world. The preaching that I bid thee.—The reason for the mission to Nineveh is given in the first call that Jonah received, where the Lord said, "Their wickedness is come up before me" (ch. 1: 2). The city was a stronghold for heathenism, and the sins which accompanied their religious observances and resulted from them had come up before the Lord, who knew the kind of truth that the Ninevites needed and the kind that would prove effectual.

3. Of three days' journey—Counting twenty miles as a day's journey, the distance around Nineveh was sixty miles. This was surrounded by a wall one hundred feet high and broad enough at the top for three chariots to be driven abreast. "Within the vast space thus enclosed rose palaces of almost inconceivable size and grandeur, amidst gardens and grounds in which the highest art had created every beauty that could gratify pride or ravish the senses. One palace alone, disclosed in its ruins by the toil of the explorer, revealed twenty-seven huge gates of entrance, guarded by colossal human-headed bulls and gigantic lions, and seventy-one halls and chambers, adorned throughout round all their sides, by great squares of alabaster covered with sculptures of the warlike deeds of the 'king of kings' and varied scenes from civil or military life."—Geikie. 4. Behave to enter... a day's journey.—The thought seems to be that as he entered the city and proceeded on his way, he delivered the message which God had given him for the people. Yet forty days, and Nineveh shall be overthrown.—The cup of Nineveh's iniquity was almost full, and unless the people should repent before there would be but forty days before the city would be destroyed. Taking this proclamation in connection with what took place later, we must conclude that there was an implied condition in the decreed destruction of the city. If the people did not turn away from their wickedness by hearty repentance, they would be destroyed.

II. Nineveh's repentance (Jonah 3: 5-10). 5. The people of Nineveh believed that God—It was a strange sight that met the eyes of the Ninevites, and a strange message that greeted their ears, as the foreign prophet in his peculiar phylaxy, and with his denunciatory words passed through their city, yet with the work of the Holy Spirit the message took effect and the people believed God, proclaimed a fast—A sign of humiliation and repentance, put on sackcloth—They covered themselves with a coarse cloth, made of goat's hair, which was a symbol of sorrow and mourning. The repentance seems to have been immediate and general. 6. The King of Nineveh—He placed himself upon a level with his lowest subject, and all humbled themselves because of their sins, sat in ashes—He

left his costly throne and took the lowest place, expressing his deep sorrow. 7. Neither man nor beast—The case was one of momentous interest and demanded the deepest humiliation. Kell says: "It was the manifestation of the thought, that just as the animals which live with man are drawn into fellowship with his sin, so their sufferings might also help to appease the wrath of God." "Men and women, old and young, high and low, and even the cattle themselves, all kept such a fast as the total abstinence from food implies." 8. Cry mightily unto God—This shows the intensity of feeling that prevailed. There was a marvelous change from their sinful practices and idolatrous worship to prayer to the true God, turn... from his evil way—Prayer, to be effectual must be accompanied by a turning away from all sin. 9. Who can tell, if God will turn—The very fact that Jonah's message, "Yet forty days," showed a few days' delay in the execution of the sentence, gave them hope that if they should repent and turn away from their sins, the Lord would accordingly turn away his anger from them. 10. God saw their works—He saw as a man can not see. Man sees the outward signs of repentance, but God sees the condition of the heart. They brought forth "fruits meet for repentance," turning from their evil ways. God repented—He changed his purpose in keeping with their changed attitude toward him.

III. Repentance and salvation (Luke 13: 1-5; Acts 2: 37-38). Jesus emphasizes the necessity of repentance as a condition of salvation in his reference to the Galileans and to those upon whom the tower of Siloam fell. The persons who told him about the cruel act of Pilate in putting the Galileans to death, may have believed that they were especially wicked, and retribution was visited upon them for their sins. This may have been the fact, but it is also a fact that by no means all the punishment for sin is visited upon the guilty in this life. We know nothing more than is given here about Pilate's crime or the tragic death of the eighteen who were crushed by the falling tower of Siloam. The teaching of Jesus here is not regarding the judgments of God upon the wicked, but regarding the necessity for repentance. Not only should the Galileans and the eighteen who were killed by the falling tower have repented, but the necessity is laid upon all to repent, otherwise destruction is certain. Repentance includes a thorough change of attitude toward sin, with a desire for deliverance from it. Acts 2: 37, 38. The people who heard Peter preach at Pentecost were deeply moved and asked the apostles what they should do. Peter's reply was, "Repent and be baptized every one of you in the name of Jesus Christ for the remission of sins, and ye shall receive the gift of the Holy Ghost." John the Baptist came preaching repentance; Jesus came preaching repentance; and the apostles went forth with the same message.

QUESTIONS—Upon what mission was Jonah sent? What course did he take upon the first call? Where was Nineveh and how far from the land of Israel. How large a city was Nineveh? What message did Jesus deliver? What effect did his preaching have upon the people? What did God do with the city? Why? In what does repentance consist? What are the fruits of repentance?

PRactical SURVEY.
Topic—The nature and fruits of repentance.
I. Repentance.
II. Its fruits.
1. Repentance.—Repentance holds its place as a cardinal doctrine of the Christian system and an experience inseparable from a true Christian life. Throughout the scriptures its place and importance are revealed. Under the ceremonial dispensation in which material blessings were the prominent incentive and their withdrawal of punishment, repentance is an indispensable condition of material or moral restoration. In the later spiritual dispensation it is inseparable from Christian experience and privileges. John preached repentance, and Jesus throughout his ministry enforced the same imperative demand and commanded that it be preached in his name. That it might become possible was the purpose of his exaltation (Acts 5: 31). It was the keynote of apostolic preaching, as it must continue of all true evangelism. Any preaching which modifies or minimizes this essential truth is radically and fatally defective. Repentance originates in a "godly sorrow," which breaks the heart for sin and from sin, and regards its character rather than its consequences. The apostle establishes a sharp distinction in moral value when he adds, "The sorrow of the world worketh death." Regret, though deepened to include the moral element of remorse, does not constitute repentance. It means the

STRENGTH FOR THE DAY'S WORK

DEPENDS UPON GOOD BLOOD TO NOURSH THE BODY

Weak People Need a Tonic, One Which Acts Directly Upon the Blood and That Does Not Weaken the Body by Useless Purging.

There are thousands of people throughout Canada who are without ambition or strength to do their day's work, and who are always tired out, have but little appetite and a poor digestion. They cannot get a refreshing night's sleep and are subject to headaches, backaches and nervousness because their blood is impure. To men and women in this condition, Dr. Williams' Pink Pills give quick relief and permanent cure because of their direct action on the blood, which they build up to its normal strength. As the blood becomes rich and red it strengthens the muscles, tones up the nerves, makes the stomach capable of digesting food, and repairs the wastes caused by worry or work. In a word, the use of Dr. Williams' Pink Pills means restoration to perfect health.

BLOOD TURNED TO WATER.

Miss Jessie McLean, Trenton, N.S., says:—"I was as weak as it was possible for any one to be, and yet be able to do about. My blood seemed to have turned almost to water. I was pale, the least exertion would leave me breathless, and when I went up stairs I would have to stop and rest on the way. I often had severe headaches, and at times my heart would palpitate alarmingly. A good friend urged me to try Dr. Williams' Pink Pills and I have reason to be grateful that I took the advice. Soon after beginning the use of the Pills I began to get stronger, and by the time I had taken seven boxes I felt that I was again enjoying good health. I think Dr. Williams' Pink Pills are a blessing to weak girls and I shall always warmly recommend them."

RHEUMATIC PAINS.

The sufferer from rheumatism who experiments with outward applications is only wasting valuable time and good money in depending upon such treatment; the trouble still remains, and in all the time becoming more firmly rooted—harder to cure. Treat this disease through the blood and you will soon be free of the pains and tortures. As a cure for rheumatism Dr. Williams' Pink Pills are unequalled. They act directly on the impure, weak blood; they purify and strengthen it, and so root out the cause of rheumatism. Mr. D. Lewis, postmaster at Escumac, N. B., says: "I was attacked with rheumatism, and knee joints, and at times was unable to get about. The trouble was particularly severe last spring and decided to try Dr. Williams' Pink Pills. After taking the Pills for some time the rheumatic pains and stiffness in the joints disappeared and I have not had any return of the trouble."

A GOOD DIGESTION.

Mrs. William Dale, Midland, Ont., says:—"I suffered for a long time from a severe form of indigestion, and had doctored so much for relief that I had all but given up hope of getting better. Everything

ate caused me intense pain and some days I did not touch a thing but a cup of cold water, and even that distressed me. As a result I was very much run down, and slept so poorly that I dreaded night coming on. I was continually taking medicine, but was actually growing worse instead of better. Having often read the cures made by Dr. Williams' Pink Pills, I finally decided to give them a trial. I have had great cause to bless this decision, for by the time I had used a couple of boxes there was no doubt the pills were helping me, and in less time than I had anticipated the pills had cured me, and I was again enjoying not only good digestion, but better health in every way than before."

ALWAYS FEELS FIT.

The wonderful success of Dr. Williams' Pink Pills is due to the fact that they go right to the root or the disease in the blood, and by making the vital fluid rich and red strengthens the very organ and every nerve, thus driving out disease and pain, and making weak, despondent, people bright, active and strong. Mr. W. P. Johnson, one of the best known and most highly esteemed men in Lunenburg County, N. S., says:—"I am a Provincial Land Surveyor, and am exposed the greater part of the year to very hard work travelling through the forests by day and camping out by night, and find the only thing that will keep me up to the mark is Dr. Williams' Pink Pills. When I leave home for a trip in the woods I am as interested in having my supply of pills as provisions, and on such occasions I take them regularly. The result is I am always fit. I never take cold, and can digest all kinds of food such as we have to put up with hastily cooked in the woods. Having proved the value of Dr. Williams' Pink Pills as a tonic and health builder, I am never without them and I lose no opportunity in recommending them to weak people I meet."

SKIN TROUBLE CURED.

Mrs. W. Ritchie, Parkburg, Sask., says:—"Two years ago I was attacked with eczema on my hands. I tried almost everything that was advised, but as the trouble was growing worse I consulted a doctor, who recommended for some time with no better results. By this time my hands were a mass of sores and I began to despair of finding a cure. A friend strongly advised me to try Dr. Williams' Pink Pills, and I decided to do so. After using two boxes I could see an improvement and I got a further supply. I used altogether eight boxes, by which time every trace of the eczema had disappeared and there has been no single symptom of the trouble since that time. I gladly recommend Dr. Williams' Pink Pills for troubles of this kind." Dr. Williams' Pink Pills should be kept in every home, and their occasional use will keep the blood pure and ward off illness. You can get these pills through any medicine dealers or by mail at 50c a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

FARM GARDEN

PEAS AND OATS
Often times the failure of the regular hay crop or the necessity for an increased amount of forage is the cause for much speculation in determining a practical means of providing for the deficit. As an emergency crop there is none more suitable than a mixture of peas and oats. In fact, it is a valued dual purpose crop, with those who have had experience with it since it is equally suitable for silage, hay silage and grain purposes. The classes of crop, namely peas and oats, making up the mixture are admirably adapted for growing together.

They both have the same seasonal and climatic requirements and mature in about the same number of days. Besides the oats support the pea vines which facilitates the harvesting and curing of the crop.

At the Central Experimental Farm and several of the branch Farms and Stations this crop has been utilized extensively as a silage, silage and hay crop as circumstances demanded. It is usually grown as a catch crop where the hay crop has failed or in a regular rotation of, first year hood crop, second year peas and oats seeded down to clover and, third year, clover hay. Exception may be taken to peas and oats as a nurse crop which is ordinarily justifiable where the crop is allowed to ripen for grain. On the other hand, where the peas and oats are cut in the green state, thus being removed early in the sea-

Dr. Martel's Female Pills

Prescribed and recommended by Physicians, sold for half a century in Patent Tins Box with signature of Dr. Martel's Female Pills Co. at your drugist.

son, the disadvantage as a nurse crop for clover is practically eliminated. In the experience of the Experimental Farms the stands of clover on areas having peas and oats as the nurse crop, are practically equal to other stands of clover grown with nurse crops of wheat, barely and oats.

The cultural treatment of the soil for a crop of peas and oats under regular cropping conditions is similar to that for ordinary grain crops. Fall ploughing, disced thoroughly in the spring until a deep, mellow seed-bed is prepared, proves most satisfactory. Sown as a catch crop where new seedlings of grasses and clovers fail, a fairly satisfactory seed-bed may be prepared by either shallow ploughing or by thorough discing depending on the compactness and nature of the soil. Older meadows or exhausted sod areas can only be prepared for crop by ploughing and discing. In sowing the ordinary seed-drill is used. The peas and oats should be mixed thoroughly before being placed in the seed-box of the drill and from time to time as sowing goes on the mixture should be stirred with the hand. Otherwise the peas will work down through the oats and be sown first leaving the last part of the seedling almost pure oats. The most suitable proportions of the mixture are equal parts by weight, sown at the rate of at least 3 bushels per acre. Suitable varieties include Golden Vine and Prussian Blue pea and Banner and O. C. No. 72 oats.

Cutting firm sowing may take place before pods form on the pea vines and the oats begin to head. Saved as hay, cutting begins as soon as pods are formed and the oats kernels are in the milk stage of growth. This is also the most suitable stage at which to cut for silage. If the crop is not required for any of the foregoing purposes it may be allowed to ripen to be harvested for grain. Both grain and straw make good feed.

The feeding value of pea and oat hay is high, standing very close to alfalfa and equal to red clover. As silage it is excellent, although it yields less and the cost of production is greater than corn ensilage.

This accommodating crop, so suited to varied conditions, is bound to become better known and more highly appreciated on a greater proportion of Canadian Farms.

APPLE BUD-MOTHS CONTROL IN NOVA SCOTIA.

The apple is attacked by a number of different insects. In Nova Scotia the caterpillars of the Bud-moths are probably the cause of more loss than all the other insects combined. The Entomological Branch of the Dominion Department of Agriculture has just issued Bulletin No. 16, entitled "The Apple Bud-moths and their Control in Nova Scotia," by G. E. Sanders and pages gives an account of the life-histories of the four destructive bud-moths which occur in that province. The chapter on the control of these four insects discusses results obtained from spraying experiments, following which definite control measures are recommended. Useful information is also included on parasitic insects and other natural enemies. Fourteen illustrations appear in the bulletin. These show injured blossoms and fruit, various stages of the insects, etc. This publication will be of much value to apple growers in eastern Canada. It can be obtained free of charge on application to the Publications Branch, Department of Agriculture, Ottawa. A technical edition of the bulletin giving scientific descriptions etc., has also been published. This will be of special interest to economic workers. Enquiries regarding insects in general should be addressed to "The Dominion Entomologist, Department of Agriculture, Ottawa, Ont."

ARTIFICIAL.
"A pretty thing, forsooth."
"What have you there?"
"A sonnet addressed by my friend Scribbon to a lady's eyebrow."
"It ought to please the lady."
"I don't know about that. Scribbon treats the subject as a work of art and not a masterpiece of nature."—Birmingham Age-Herald.

Rheumatic Pains

Are relieved in a few days by taking 30 drops of Mother's Extract Syrup after meals and at bedtime. It dissolves the lime and acid accumulation in the muscles and joints so these deposits can be expelled, thus relieving pain and soreness. Seigel's Syrup, also known as "Extract of Koots," contains no dangerous or other strong drugs to kill or mask the pain of rheumatism or lumbago, it removes the cause. 50c a bottle at drug sts.

MAKE A VICTORY GARDEN

The satisfied worker is the one with a victory garden, say the Canadian Trade Commission and the National War Garden Commission of Washington.

Picking Oats Hotel

When I chose a hotel, I wanted a traveler's rest, a bed on the top of a bay window, a table for the breakfast, a bath room, a telephone, a radio, a book, a pen, a glass, a tray, a light, a key, a card, a chair, a table, a bed, a room, a hotel, a picking oats hotel.

The WALKER HOUSE in Toronto is an institution. I always pick the hotel that has the advantages of the picking oats hotel.

The Walker House (The House of Picking Oats) is the finest of its kind in the West. It is in the heart of the city, on the corner of the main street and the bank street. It is a model for hotel cleaning.

Reserve a room here from the Union Depot and a sleep-out. Bookings in advance are appreciated.

THE WALKER HOUSE
TORONTO, CANADA

Black, Green or Mixed... } Sealed Packets Only

PARTED BY GOLD

"I call it a beautiful one," he trusted himself to say.

"Ah, you men are so easily deceived," said her ladyship. "The paint is an inch thick, and there is belladonna under her eyes."

Jack could not help smiling even in his bitterness of heart, for had he not seen that self-same face under its present circumstances, too, within a yard of his own nose?

And what a voice, so deceitful and affected; And yet there are some men who would call that poor, painted creature pretty. Jack, an idea has just struck me."

"What is it, Maud?" he asked, with noble gentleness.

"That is the creature that has bewitched Beaumont."

Jack started, although he had expected it.

He turned pale and clutched the door.

Lady Maud, who had entered the carriage, caught his arm.

"Look, Jack!" she said, in a whisper, "where she is, the impudent thing."

The whisper was not so low but it reached Mary's ears.

She looked up and saw the pair, turned pale at the sight of them, and naturally fell back, and fled down the narrow passage.

This was enough for Jack, but not for Lady Maud.

She stopped him from getting into the carriage, and called to a man who had just emerged from the entrance.

He approached and lifted his hat; he was Anderson, the actor.

"My man," said Lady Maud, "can you tell me who that young person was who stood here just now?"

"With the baby?" said Anderson.

Lady Maud nodded.

"Miss Montague," said Anderson, without looking at Jack.

"And the—er—man?"

"Father of the child," said Anderson.

"Mrs. Montague, then?" said Lady Maud.

"No, ma'am," said the man, with a significant shrug.

Jack turned faint, and grasped the door.

Before he could speak, however, Lady Maud drew him in and the carriage rolled away.

The crush was over, and Jack took his Queen of Sheba downstairs.

"Where is the brougham?" said he.

"I do not see it."

"Oh, do not let us wait. It is around the corner," said Lady Maud, who of course had given her instructions. "It is a beautiful night! We will go around to it, please."

Jack, without a word, took her around and was opening the door of the carriage, which was very nearly opposite the stage entrance, when a sight met his eyes that made him start.

There in the doorway stood Mary Montague, the woman who had stolen all his heart, pressing a child to her bosom, and a man, he remembered him standing proudly by.

He turned pale and clutched the door.

Lady Maud, who had entered the carriage, caught his arm.

"Look, Jack!" she said, in a whisper, "where she is, the impudent thing."

The whisper was not so low but it reached Mary's ears.

She looked up and saw the pair, turned pale at the sight of them, and naturally fell back, and fled down the narrow passage.

This was enough for Jack, but not for Lady Maud.

She stopped him from getting into the carriage, and called to a man who had just emerged from the entrance.

He approached and lifted his hat; he was Anderson, the actor.

"My man," said Lady Maud, "can you tell me who that young person was who stood here just now?"

"With the baby?" said Anderson.

Lady Maud nodded.

"Miss Montague," said Anderson, without looking at Jack.

"And the—er—man?"

"Father of the child," said Anderson.

"Mrs. Montague, then?" said Lady Maud.

"No, ma'am," said the man, with a significant shrug.

Jack turned faint, and grasped the door.

Before he could speak, however, Lady Maud drew him in and the carriage rolled away.

CHAPTER IX.

A more miserable man than Jack Hamilton, as he sat in his elegant sitting-room on the morning after his and Lady Maud's visit to the Signet, could not be found.

He had not closed his eyes all night, three bottles of soda water standing at his elbow testified to that; he felt ill and weary from disappointment and grief. Now that he felt he ought to dismiss Mary Montague from his heart, he found, for the first time, how firmly she was rooted there. To pick her from him was like tugging at the roots of his own happiness.

"Poor girl! poor girl!" he muttered, tapping another bottle of soda water, and stirring the fire between the draughts. "It is poverty or something of that sort that has driven her to it. I'll never believe that she is a hardened, wicked woman. By Jove, I can scarcely believe anything wrong of her, but seeing he felt he ought to discontinue her from his heart, there is nothing to be said to ocular demonstration. I have been deceived, self-deceived, and there's an end of it."

But unfortunately for his peace of mind that was not the end of it.

He had a duty to go through.

He must go to Lady Maud and confess his wrong-doing, explain that it was not Beau but he who had been making himself ridiculous, and altogether make the amende honorable for his harsh speeches and general condemnation of her the night before.

It was a better task, but Jack was not one to shrink from duty, however unpleasant it might be, and accordingly

still more tender. "I pity you, Jack, but I am so glad. It would have broken my heart if you—you had been ruined—lost and ruined. It would have broken my heart."

He looked up and met the gentle, impassioned regard of her beautiful eyes, and a sudden inspiration seized him.

"You would have been as sorry as that for me, Maud," he said, earnestly—"a stupid, worthless specimen?" You would have been as sorry as that? Ah, Maud, you are too good to me; you are too good and beautiful. Maud—"His earnestness grew eager, for she had laid her hand upon his and the warmth of it was forcing him.

"Maud," he continued, "do you care enough for me to warrant me asking you to be my wife? We have always been together, we know each other by heart; you know how stupid and weak-minded I am, and I know how good, how true, how beautiful you are. Maud, be my wife! I have loved you ever since we were children. Be my wife!"

With a little sob, that if not real was most splendidly feigned, her ladyship deposited her head upon his broad chest, and poor Jack, who had never deceived himself more than he was doing at this moment, pressed a kiss upon the elegantly braided topknot, and believed he was truly, happily at last.

Then they sat down and talked. Lady Maud with a sweet conscious air

Wash The Kidneys!

After Bad Colds or Influenza. Look to Kidneys and Bladder!

Owing to bad colds, over-eating or interperence, or to the after effects of influenza—uric acid and toxins (poisons) are stored up in the body and cause backache, lumbago, rheumatic pains and stiff joints.

It is most essential that treatment be directed towards prompt casting out of the poisons from the body which cause these pains and aches. (The bowels, skin and kidneys) should be excited to their best efforts. Every one should clean house—internally—and thus protect one's self from many germ diseases, by taking castor oil or a pleasant laxative such as Dr. Pierce's Pleasant Pellets, which are made of May-apple, aloes and jalap. Take these every other day. This will excite efficient bowels action. If you suffer from backache, irritation of the bladder and the kidneys, shown by the frequent calls to get out of bed at night, considerable sediment in the water, brick-dust deposit, perhaps headache in the morning, you should obtain at the drug store "Anurio" (anti-uric acid), first put up by Dr. Pierce.

To build up the strength and improve the blood, take an iron tonic such as Dr. Pierce's Food, which is made of May-apple, aloes and jalap. Take these every other day. This will excite efficient bowels action. If you suffer from backache, irritation of the bladder and the kidneys, shown by the frequent calls to get out of bed at night, considerable sediment in the water, brick-dust deposit, perhaps headache in the morning, you should obtain at the drug store "Anurio" (anti-uric acid), first put up by Dr. Pierce.

Strength Will Return To Weak People Using This Treatment

Mr. Shallop's cigar and then with...

You are discouraged. You feel old and worn. You are sick, but not aware of the fact. You can drag yourself around—but work is impossible. With your stomach crying out for assistance and the nerves all on edge why not try Ferrozone?—it will surely do you good.

Ferrozone is a wonderful combination of vegetable extracts, fortified by excellent tonics for the nerves and stomach. When you feel despondent, Ferrozone cheers you up. When languor and oppression weigh you down, Ferrozone braces you up. When sleep is impossible Ferrozone calms the nerves and gives you rest. For bounding health, good looks, good spirits, nothing equals Ferrozone; makes the weak strong and the sick well. Good for men, women and children; try Ferrozone, it can work wonders, as it did for Mrs. Mary Melong, of Harbor Bouche, N. S., who writes: "Ferrozone built me up. Before using it I scarcely knew what good health meant. I was just as miserable and weak as any woman could be. Tired from morning to night, bothered by trifles, unceasingly nervous. The first box of Ferrozone improved my blood, gave me appetite. In a short time I was like a new person. Now I rejoice in abundant good health."

Try Ferrozone. It will make an unexpected improvement in your looks, your feeling, your health. Whether anaemic, nervous or suffering from secret disorders,—if you want cure, use Ferrozone. Price 50¢ per box, or six boxes for \$2.50, at all dealers or direct from The Catarrhone Co., Kingston, Ont.

Almost a Miracle But Very Simple

Was the Cure of John New by Dodd's Kidney Pills.

His Troubles All Came from Sick Kidneys and He Treated Them With the Old Reliable Canadian Remedy, Dodd's Kidney Pills.

Hillsdale, Battledorf, Sask., May 19—(Special).—With a speed that was almost miraculous, Mr. John New, a well-known farmer here, has been cured of kidney trouble from which he suffered for several years.

"Dodd's Kidney Pills cured me," he says. "I wish to give them all the thanks."

Speaking further of his troubles and their sudden cure, Mr. New says: "I think I inherited my kidney disease from my parents, and I suffered off and on for several years. I had stiffness in the joints, cramps in the muscles, backache and neuralgia. "I perspired freely on the slightest exertion, and my perspiration had an unpleasant odor. I was irritable, often dizzy and was depressed and low spirited. My skin was dry and had a harsh feeling, and I was often nervous. "I took just one box of Dodd's Kidney Pills. They cured me."

If your troubles come from the kidneys you will have some of the symptoms that Dodd's Kidney Pills cured in Mr. New's case. Ask your neighbor about Dodd's Kidney Pills.

Stops Bronchitis Quickly Without Any Medicine

This Problem Solved When Catarrhose was Discovered.

Thousands Have Been Cured

You are nothing but a plain simple boob to suffer a day longer from Bronchitis. It's real easy to cure—this has been proved time and again. Relief comes at once when you breathe in the soothing vapor of Catarrhose. Once its healing, piney essences strike the bronchial tubes, you realize that a powerful treatment is at work.

Irritation can't live in the throat of a person inhaling Catarrhose. It is so soothing, so warming, so full of concentrated healing power that you get results at once.

Catarrhose strengthens the weak throat, stops the cough, removes that hacking irritating necessity to clear the throat, makes even the chronic sufferer realize that at last he has discovered a real cure. For coughs, colds, catarrh, and winter flu, nothing in the family could be better than the complete dollar outfit. Small size 50¢; trial size 25¢, all dealers, or The Catarrhose Co., Kingston, Ont.

AVOID COUGHS and COUGHERS!

COUGHING SPEEDS DISEASE SINCE 1870

SHILOH 30 DROP-DROPS COUGHS HALF TINY FOR CHILDREN

Ark was nothing to these; there's a man, too, but I think the ark could carry off the palm there."

She laughed her well-bred laugh. "You are incorrigible," she said. "There, I won't paint any more, you have made me dissatisfied with it. And what made you so dreadfully pale-looking? Did you drink too much claret last night after you got home, or was it a bad cigar?"

"Maud," he said, walking to the fire, which she was poking, and leaning his strong arm upon the broad mantel. I have come here this morning to tell you—"

She looked up at his sad eyes with a sympathetic glance. He caught it and looked down.

"I have had a bitter lesson, Maud," he said, "a very bitter one, and I am feeling—how should you forget, though?—telling me of Beaumont's infatuation for the girl we saw last night at the Signet."

She nodded and drew the slightest shade nearer to him.

"Well," he said, "you were right on every point save one. She is unworthy of any man's love, least of all a gentleman's! There, I cannot talk of her, for, Maud, it was not Beaumont who was caught by her pettiness and mock modesty, but I."

"You!" she said, with admirably feigned astonishment.

"Ay," he said, bitterly. "And, Maud, let me tell you, I thought I really loved her, I—but do more of that, let it pass. As I said, she is unworthy of any man's love, and I, like other idiots, must suffer for my folly."

Lady Maud drew nearer, and as his voice dropped with the last words, she put out her white, soft hand and touched his arm.

"Poor Jack!" she breathed, in a thrilling voice of pity and something

What COMFORT LYE

Comfort Lye is a very powerful cleanser. It is used for cleaning up the oldest and hardest dirt, grease, etc. Comfort Lye is fine for making sinks, drains and closets sweet and clean. Comfort Lye kills rats, mice, roaches and insect pests. Comfort Lye will do the hardest spring cleaning you've got. Comfort Lye is good for making soap. It's powdered, perfumed and 100% pure.

is splendid for —

Tree Planting.

An exchange gives the following set of rules for tree planting that may be of use to amateurs, etc.:

1. Do not allow roots to be exposed to drying winds, sun or frost.
 2. Prune, with a sharp knife, any bruised or broken roots.
 3. Have the holes large enough to admit all the roots without cramming.
 4. Plant in good loam, enriching with thoroughly decomposed manure.
 5. Do not allow any fresh manure to come in contact with the roots.
 6. Spread the roots in their natural position, and work fine loam among them, making it firm and compact.
 7. Do not plant deep. Let the upper roots be about an inch lower than they were before.
 8. Remove all broken branches and cut back at least one-half the previous year's growth of wood.
 9. If the season is a dry one, water thoroughly twice a week.
 10. Keep the soil in a good degree of fertility. Mulching in the fall is beneficial.
- The amateur is recommended to follow the above rules. Well-cared for trees add much to the beauty of a lawn and home, as any citizen of good tastes will admit. The tree-planting movement inaugurated this spring is in line with the best designs for civic improvement. It should bear excellent fruit before the summer is upon us in Ontario.

Sponge Industry.

The best sponges come from the Levant, in the eastern Mediterranean and are obtained by diving. The Levantine sponge divers often cut pieces, and tie them to stakes to keep them from being swept away by the current. They soon grow at an enormous rate.

When two egotists meet it's a case of an I for an I.

CLARK'S PORK AND BEANS BEAR THIS GOVERNMENT LEGEND WHICH GUARANTEES PURITY

Origin of "Algernon."

The name Algernon was originally "als Gernon," and was first applied to one of the crusading Percys. His name was William, but his fellow knights called him William als Gernon or Gernon, meaning William with the Whiskers, or just Whiskers for short. As Algernon the name has persisted in the family to the present time, and the tenth Duke of Northumberland, who died recently, was Algernon Percy.

A Floating Church.

The most interesting floating church in the United Kingdom is the church on the fens at Holme, near Peterboro, England. The interior of this church-boat is fifty feet long, nine wide and seven high. It was impossible to build it higher on account of the bridges that cross the canal. The boat is fitted exactly like a church, with miniature font, prayer desks and the finest of American organs.

Be Courteous to All.

Frequently the girl who is scrupulously about interrupting an older person, thinks nothing at all of breaking in on the story her small brother is trying to tell, and talking on without paying the least attention to him. There are not two standards of courtesy, one for older people, and another for children.

LEARN TO SAVE.— Every man, woman and child can save. Every one should save. Every ambitious person does save.

Home Garden Contest

A contest open to all Boys and Girls under eighteen years of age will be carried on if a sufficient number of entries are received.

WALTER H. SMITH, Agricultural Representative, Athens, Ont.

BEEES.

Control of Swarming. (Experimental Farm Note) The measures that are required to control swarming depend upon the intensity and duration of the dominance of the swarming impulse.

In many places in Southern Ontario, there is usually one well marked and rather short honey flow during this period, and it is generally comparatively easy to prevent swarming by simply expanding the brood chamber in advance of requirements, and giving good ventilation.

In a small apiary that can be watched all day from the house, it is often satisfactory to limit swarming to the prime swarm, and to prevent the swarm from flying away by the following simple method.

PRIVATE SALE OF FURNITURE.

Sewing Machine, 3-piece Parlor Suite, new, Perfection Coal Oil Stove and Oven, and other articles.

YOUNG PIGS FOR SALE—Six weeks old; \$6 each at Morrie Cole's, Redan Post Office.

FARM PRODUCTS NEEDED.

Day of Intensive Farming Has Arrived.

The day for more intensive agriculture in Canada has long been a dream of recent years. The events of the past two centuries in injecting Canada into world politics and world business.

First, the commerce of this country has increased enormously within the period of the war. There is a constantly enlarging call for Canadian products both on this continent and in Europe.

The whole matter resolves itself into a business proposition. Canada is essentially an agricultural country. What more natural line can we follow at the close of the war than in producing the greatest quantity of crops and live stock of highest quality?

Considering the trend of the times, soil fertility and proper fertilization becomes a problem of national importance. It should receive closest attention from Canadian farmers so that they may benefit by present high prices for farm products.

Had Many Potatoes.

In view of the importance attached to the Queen Mountain type of potato as a result of that particular variety having been recommended to growers in Ontario as the best suited for the main crop in most districts.

At a conference of the Potato Council of Ontario, held in Toronto on Sept. 6, the following varieties of potatoes were decided to be identical and are classed as Green Mountain:

Carmen No. 1, Clyde, Gold Coin (Vermont), Delaware, Dreer Standard (not Dreer Early Standard), Green Mountain, Green Mountain, Jr., Norcross, Snow, State of Maine, Uncle Sam, Wee MacGregor.

Why No More Cheap Food.

Cheap food has been obtained in the past by the exploitation of new lands, by robbing the soil, and by paying low wages. A continuation of such methods would result eventually in the depopulation of the country districts and the abandonment of farming.

Story of One Sugar Bush.

Several years ago a cyclone swept over the Gilbert farm in a Michigan county and a clean swath was cut through the woodlot.

Record Harvests.

Both barley and rye harvests in the United States this year are next to the largest ever known.

NO SEED SHORTAGE

Supply in North America Sufficient for Allies.

As an outcome of a joint meeting of the Seed of the War Trade Board, Food Administration, vegetable growers and wholesale seed merchants of the United States, held in Washington recently, at which a representative of the Canadian Seed Department was present.

As regards the seed supply for the principal grain crops in Canada, the supplies of barley and oats are well above normal, while spring wheat is expected to be sufficient for the country's requirements.

Corn grown for seed in Southwestern Ontario is proving a most satisfactory crop, and will assure a great proportion of the yield being well preserved for next spring's use.

To Reduce Distribution Costs. Municipal authorities in Vancouver are trying to bring about an amalgamation of the milk distributors.

To Expropriate Idle Land. In British Columbia a Provincial Land Settlement Board has been appointed, which has authority to take drastic measures for the making available for settlement land held in idleness by speculators.

GIRL WANTED—Apply to Mrs. Glenn Earl, Athens.

\$100 Reward \$100

The readers of this paper will be pleased to
learn that there is at least one dreaded disease
that science has been able to cure in all its
stages, and that is Catarrh. Hall's Catarrh
Medicine is the positive cure now known to the
medical fraternity. Catarrh being a constitu-
tional disease, requires a constitutional treat-
ment. Hall's Catarrh Medicine is taken intern-
ally acting directly upon the blood and mucous
surfaces of the system, thereby destroying the
foundation of the disease, and giving the
patient strength by building up the constitu-
tion and assisting nature in doing its work.
The proprietors have so much faith in its
curative powers that they offer One Hundred
Dollars for any case it fails to cure. Sent for
list of testimonials.

IN CAESAR'S STEPS

Allies Fight Germans on Ground
He Made Famous.

Campaigns Today Have Many Strik-
ing Points of Similarity to Those
Fought by the Great Roman
Conqueror.

Over the same ground where Caesar
fought nearly 2,000 years ago, and
with many implements of war remark-
ably like those used by his army, the
allies are fighting the Germans today,
says a writer in Pittsburgh Dis-
patch. The foe is the same in cruelty
and in overbearing nature, as any
school boy or girl who has read the
commentaries of the great Roman gen-
eral can tell you. How history repeats
itself and how important as well
as interesting is the study of the
Latin language become since the war
is illustrated in telling fashion by a
classical exhibit in the University of
Pittsburgh.

In the exhibit, which was arranged
under the direction of B. L. Ullman of
the State Classical association, is a
model of a bridge built over the Rhine
by Caesar. It was made from the de-
scription given by Caesar.

The bridge is almost exactly like the
temporary bridge the soldiers at
Plattsburg are now being taught to
make and on which they expect to
cross the Rhine as they go into the do-
main of the kaiser.

The Roman ballista, used to throw
stones at the enemy, is made exactly
on the same principle as the machine
used today to throw trench bombs.
Modern springs now take the place of
the twisted rawhide with which mo-
mentum was obtained by the Roman
machine. A model of the Roman ball-
ista is in the exhibit.

On the same principle is the cata-
pult, used by the Romans to shoot ar-
rows. Several of the weapons used by
the Roman soldiers, including sword
and spear, forerunners of the bayonet,
are much like those used in the present
war. Models of all these are in this
exhibit. There are also models
of the Roman soldier and of the sol-
dier of today, both wearing headpieces
of metal much alike.

The boy who is reading Caesar can
tell you that Reims, whose wonderful
cathedral has been destroyed by the
Germans, was named from the Rami
tribe mentioned by Caesar and that
Soissons takes its name from the Sus-
stones tribe, conquered by Caesar. The
Commentaries are full of names made
familiar by the war going on today
and the schoolboy reads with added
interest how Caesar defeated Ariovis-
tus, king of the Germans, and won
other triumphs on the same battle
front as that of the allies today. The
wolf holes he describes are much like
the traps used to ensnare and bewilder
the enemy now.

Other articles in the exhibit made by
students show what a wealth of Ro-
man tradition has been handed down
to us. The Roman fasces, shown on
the new United States dime, is the
original of the mace, the symbol of
power, used by the speaker of the
house of representatives. The fasces,
in turn, had its origin in the sticks
used by the Romans to flog offenders
and the ax used by them to cut off
the heads of the worst of them.

The Halt, the Blind and the Maimed.

The large number of men, women,
girls, and boys in Great Britain who
are receiving wages they never dreamt
of before the war, are not always un-
fulfilling of the wants of others. In
fact, many of the "world's sad cere-
lets" are benefiting substantially by
the good things of their more fortunate
brethren. Instances of this are very
noticeable in the Black country. One
day, in the particular region, may be
seen wandering to a convenient "pitch"
the maim, the halt, and the blind. Some
have musical instruments which they
perform upon. Others sing, some are
blind, and others are minus a limb.
They all have caps or other receptacles
for coppers. When the works gates
are open, and the workers come forth
with pockets full of money, there is
a variation in the music which can
be described as wailing. But is is a
great time for the musicians. There
is a continual "clink, clink" into the
caps of the poor folk until the last
worker has passed their line.

Put Both on Their Feet.

It was in the far corner of the Spot-
wood Inn, the road-end, that the man
who had the job of 1919, and the man
who had the job of 1918, had their
last ever meeting.

"It was in the far corner of the Spot-
wood Inn, the road-end, that the man
who had the job of 1919, and the man
who had the job of 1918, had their
last ever meeting."

"Well," said the landlord, "come to
think of it, it's put me on my feet,
now-for some time this one about tax
has come into operation. I've had to sell
my 'orse and trap"—British Farm and
Home.

To Do Away With "Tuck Hour."

In order to prevent the rush of
workers the British board of trade
tramways committee suggests that in-
dustrial concerns should "stagger"
their times of opening and closing. By
taking on and discharging work peo-
ple at intervals of ten minutes or so
the cars could be worked more eco-
nomically and there would be a con-
tinuous stream of passengers, instead
of the present rush at certain hours.

New Uses of Cotton.

The people as yet little understand the wonderful variety of uses to which cotton is no wbat. One industry has established at Columbus, Ga., at a cost of \$3,000,000 a mill whose machinery is capable of producing 53 different. The government has recently placed orders for many million yards, it having been found possible to substitute a cotton weave for the rubber gaskets and rubber coats which require the purchase of 110,000,000 pounds of cotton for new uses and 200,000,000 yards of cotton gauze for surgical purposes. Chemists making researches believe that within a short time additional uses of cotton will be found; and yet only a few years ago about the only use of American cotton was in the manufacture of sheeting, etc.

How Cloves Are Cured.

In the Spice Islands the cloves are sometimes cured by being smoked over a wood fire until they assume a deep brown color, when the further drying is accomplished by the sun. Occasionally the buds are scalded before being dried. If bright sunny days prevail artificial heat may be dispensed with and the buds sun-dried from first to last. The crop loses about sixty per cent. in drying.

**Miss Flora Boyko
Tells How Cuticura
Healed Her Pimples**

"My face was very itchy at first, and after that it was covered with pimples that disfigured it badly. The pimples were hard and red and they were scattered all over my face and were so itchy I had to scratch and I could not sleep. These bothered me nearly a year before I used Cuticura Soap and Ointment and when I had used five boxes of Cuticura Soap and five boxes of Cuticura Ointment I was healed." (Signed) Miss Flora M. Boyko, Gardenton, Minn., Dec. 25, 1918.

Having obtained a clear healthy skin by the use of Cuticura, keep it clear by using the Soap for all toilet purposes, washed by means of Ointment as needed. Do not fail to include the exquisitely scented Cuticura Toiletum in your toilet preparations. Splendid hair dressing.

For free sample each of Cuticura Soap, Ointment and Toiletum, write to: Cuticura, Dept. A, Boston, U. S. A. List everywhere.

Here is the remedy in one or all of the following four stipulations: First: Don't eat so much; cut down on concentrated food, like meat, eggs and the like, and eat more vegetables, like cabbage, greens and celery, of character. Second: Drink at least six glasses of water a day and more in summer. Third: Sleep with the windows up and without the head covered with the bed clothes. Fourth: Walk at least part way to and from work. Walk fast and breathe deeply.

The greatest mistake that most of us make is in believing that the more we eat the more strength we give to our bodies and minds. Excess food of certain type goes to make excess fat, which is the worst kind of excess baggage. It takes strength to carry this excess baggage around that might be better used in productive effort—working. Some of us become fatigued in carrying this excess baggage around, and the result is that we don't feel like working. Certain other foods, particularly meat in excess quantities, go to make waste. And if this waste is not eliminated it accumulates in the low or intestine and forms poisons that penetrate the system and produce that don't-feel-like-work feeling, or fatigue after work.

GALL-KLENZ
ABSOLUTELY REMOVES GALL STONES
WITHOUT OPERATION

anges, grapefruit; vigorous vegetables, like carrots, greens, celery, parsnips, and turnips, not only provide the mineral elements of elimination but form a sweep, or swab, for the lower intestines. Most of the indisposition towards work, and that tired feeling, are a result of confusing stomach emptiness with hunger—most of us eat it would take about ten days of fasting to really get hungry. Fill up the emptiness with bulk of fruits and vegetables and go without a meal or two now and then by filling up on water.

If any of us don't feel like working it is a good plan to keep on working and quit eating. As to what we eat, it is well to follow our own instincts; that is, eat what we want, or what agrees with us, but not so much. The don't-feel-like-work feeling, or just plain laziness, or fatigue after a normal amount of effort, simply means that we have been using energy, that might have been productive and profitable in digesting needless amounts of food and in resisting poisons that are generated by its accumulated waste.

Plant Something.

Have you planted anything. Don't miss it if you haven't. The seed you plant yourself means more to you.

Plant something high, like nasturtium or sininia.

Morning glory rewards you, and so do marigold and gypsophila (baby's breath).

If you want vines, try flowering beans (they grow fast), sweet peas, ornamental guerdon Japanese hop vines.

The cypress, with its red and white flowers, and the cobaea, or cup and saucer, are good vines to plant, and if 'twere done, 'twere well 'twere done quickly! Go to it!

Your Blood.

Have you ever thought what it is? It is the nutritive fluid of the tissues.

All sorts of valuable elements are in your blood.

Among these are water, fibrine, albumen, chlorides of sodium and of potassium, phosphates of soda, lime and magnesia, and other things.

In your blood are floated minute solid bodies (called "corpuscles") of two kinds, white and red, the latter giving the color to the blood.

The size of the red corpuscles are only 1-3200 of an inch (the white corpuscles are much larger and less numerous). The red corpuscles have great power to absorb oxygen which they get from the lungs and carry all over the body to form new combinations and changes in the tissues, the results of which are poured into the blood.

Women Can Fortify Their Health

With constantly aching backs, weary, dragging-down pains, dizzy and nervous headaches, women have a hard burden to carry. It is wise for every woman to fortify herself against those derangements which are present when extra demands are made upon the system by Nature's laws. No better remedy exists for women's peculiar ailments than DR. HAMILTON'S PILLS, which possess tonic properties that act upon the proper organs at the proper time. To prevent headache, to overcome dragging weariness, backache, nervousness and pallor—to look well, sleep well, eat well and enjoy the manifold blessings of sound, regular health, every girl and woman should regulate her system by Dr. Hamilton's Pills, 25c. per box.

Expert Speaks of This Common Cause of Death.

A cramp in the water is probably brought about as a result of too much muscular exertion together with a low temperature of the water. When the water is fairly warm, one is not likely to have trouble of this kind. The stomach cramps, I believe, is usually the result of entering the water too soon after eating. When a cramp appears, it is simply a vigorous contracted condition of the muscles, whether of the leg, body or arm, a sort of spasm, and the contraction of the muscle quickly draws up or flexes the affected part. To secure relief, you should try to straighten the cramped limb, first inhaling a long, deep breath to carry you over the time consumed in the effort. If the arm is affected, grasp it by the wrist with the opposite hand and try to force it up. If in the leg, reach down with both hands and in a like manner force it out. Always bear in mind the principle of taking a long, deep breath before starting to straighten out the part of the body affected. Excitement only makes matters worse, inasmuch as a cramp is probably due largely to a nervous impulse or a nervous reaction. The self assured state of mind, therefore, is helpful, and by simply keeping calm the chances are that the cramp will relax in a few moments.

The stomach cramp is by far the most dangerous. It causes the knees to be brought up toward the chin and tends to force the air from the lungs, which naturally causes the body to sink. In most cases it is possible to straighten the body by forcing the knees out and to put into practice one's knowledge of proper breathing. In case the knees cannot be forced out one should simply swim the breast stroke, the arms being free striving also to get what air you can in your lungs and at every opportunity vigor-

THE YUKON.

Some Interesting Points for Canadians.

(George Brimston, in Dawson Daily News.)

Yukon Territory contains 192,000 square miles.

More than half of the great area of Yukon is habitable.

Yukon is the last great area for grazing and agriculture.

Yukon is a paradise when compared with other parts of the world where millions of people have lived and prospered.

Yukon Territory and Northern Alberta and Northern British Columbia are practically without a railway.

Yukon has transportation for only about four months in the year.

Yukon can raise turnips weighing from 25 to 44 pounds each.

Canada opened up the Hun in Europe.

Canada will open up the Yukon with an electric railway.

Such action on their part will open up a market for Canadian goods.

This is Canada's market with no tariff wall to climb over to sell her goods.

Canadian people will see that this is done for their own benefit.

Wood's Peppermint Cure.
The Great English Remedy. Tones and invigorates the whole nervous system, makes new blood in old veins. Cures Nervous Debility, Mental and Brain Worries, Dependence, Loss of Energy, Fatigue of the Heart, Fading Memory. Price \$1 per box, six for \$5. One will please, six will cure. Sold by all druggists or mailed in plain pkg. on receipt of price. New preparation, bottled free. THE WOOD MEDICINE CO., TORONTO, ONT. (Formerly Widener.)

Mineral resources of the territory have not been scratched.

The foregoing are facts for you to study and take advantage of now.

For further information regarding Yukon, apply to the Yukon Development of Interior, Ottawa, and the Gold Commissioner, Dawson.

Yukon Territory sent over 600 men to the Great War, the largest per capita in Canada.

Yukon's patriotic cash contribution is greater than any portion of the British Empire, per capita.

Yukon's subscriptions to the Victory Loan are an example for the remainder of Canada. Dawson last November subscribed \$318,000 in cash and got twenty-one crowns on her Victory flag. Dawson and Klondike did not get a dollar back in munitions orders and other war purchases—such as flooded the rest of Canada. Now Yukon asks for a railway that she may send more wealth direct, and for immediate and direct aid to roads, mining, and other industries. Is she not entitled to it?

Minard's Liniment used by Physicians DESCRIBED.

"Boishevik!"
"That's Russian, for 'agin the government," my boy!"

It is a man's own push that usually get him a pull.

**THAT CHANGE IN
WOMAN'S LIFE**

**Mrs. Godden Tells How It
May be Passed in Safety
and Comfort.**

Fremont, O.—"I was passing through the critical period of life, being forty-six years of age and had all the symptoms incident to that change—heat flashes, nervousness, and was in a general run down condition, so it was hard for me to do my work. Lydia E. Pinkham's Vegetable Compound was recommended to me as the best remedy for my troubles, which it surely proved to be. I feel better and stronger in every way since taking it, and the annoying symptoms have disappeared."—Mrs. M. GODDEN, 925 Napoleon St., Fremont, Ohio.

Such annoying symptoms as heat flashes, nervousness, backache, headache, irritability and "the blues," may be speedily overcome and the system restored to normal conditions by this famous root and herb remedy Lydia E. Pinkham's Vegetable Compound.

If any complications present themselves write the Pinkham Medicine Co., Lynn, Mass., for suggestions how to overcome them. The result of forty years experience is at your service and your letter held in strict confidence.

**THE BEST MEDICINE
FOR LITTLE ONES**

Thousands of mothers state positively that Baby's Own Tablets are the best medicine they know of for little ones. Their experience has taught them that the Tablets always do just what is claimed for them and that they can be given with perfect safety to children of all ages. Concerning them Mrs. Joseph Therrien, St. Gabriel de Brandon, Que., writes: "Baby's Own Tablets are the best medicine I know of for little ones. I thought I would lose my baby before trying the Tablets, but they soon made him healthy and happy and now I would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Wit and Humor.

"Bertie," said his mother, sorrowfully, "every time you are naughty I get another grey hair." "My word!" replied Bertie; "you must have been a terror. Look at grandpa!"

Magistrate—"How did you manage to extract the man's watch from his pocket when it was provided with a safety catch?" Prisoner—"Excuse me, sir, that is a professional secret. I am willing to teach you, however, for two guineas."

A party of "Vaacs" were being shown over a repair factory at one of the bases in France. "This," said the obliging soldier, as they entered a shed, "is the engine boiler." One fair charmer, with a quizzical smile, asked: "But why do they boil the engines?" And her guide softly replied: "To make the engine tender."

A soldier was waiting for the Mud-dleton train, the only one of the day. After he had waited for an unreasonable time the porter hove in sight. "How long will I have to wait," the soldier asked, "for that gally train?" "How long have you got?" asked the porter, with apparent irrelevance. "Forteen days," "Well," said the porter, "you'd better walk."

Private Jibson's wife coaxed Jibson to send word of his whereabouts in France from time to time, despite the censor. Jibson proceeded to do so by placing dots under certain letters in his epistle, which, when spelt out, formed a word. Once he made his dots too large and the censor rubbed them out and put some of his own. When Mrs. Jibson deciphered her message this is what it spelt: C-e-n-s-o-r-e-d.

HOW'S THIS?

We offer \$100.00 for any case of Catarrh that cannot be cured by HALL'S CATARRH MEDICINE.

HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the system.

Sold by druggists for over forty years. Price 50c. Testimonials free. F. J. Cheney & Co., Toledo, Ohio.

Glucose in Fruit.

The presence of glucose in fruit preserves as an adulterant may be discovered by the following method given by Popular Science Monthly: In the case of jam or marmalade it is necessary to filter off the solid matter by running the mixture through a piece of muslin. Allow the solution to become perfectly cool, and then add an equal volume, or a little more, of strong alcohol. If glucose is present a dense white precipitate slowly settles down. Where no glucose has been employed, there is no precipitate, save, in some cases, a very trifling sediment of proteid matter, which, however, is so small that it could not possibly be mistaken for the sediment which glucose produces. The last named is not particularly harmful in itself, but is very frequently used as an adulterant in supposedly pure preserves for extra profit.

Keep Minard's Liniment in the house

WHEN WE ARE RICH.

(Spanish River News.)

If any of us don't feel like working—why, we are sick. And we don't have to be at home and in bed in order to be sick.

It is not normal not to feel like working.

We are sick if we are short of normal.

The remedy is easy and cheap—cheaper to apply than not to apply—not only in the cost but in the final economy of doing more with less effort and in eventually earning more.

The salesman, for instance, who feels more like going to a picture show than calling upon prospective purchasers, and thus selling more and earning more, is sick—in the sense that he does not feel normal.

Parker's Will Do It---

By cleaning or dyeing—restore any articles to their former appearance and return them to you, good as new.

Send anything from household draperies down to the finest of delicate fabrics. We pay postage or express charges one way.

ously to rub the stomach. A cramp, even of the stomach variety, should not result in a person drowning, if he follows the method of breathing which I have described.—Henry Ellonsky, in Physical Culture.

"Harvester Industrial Plan."
(Chicago Daily News.)

Progressive corporations and enlightened individual employers of labor are evincing a gratifying disposition to meet reasonable demands of labor for a greater stake and a direct voice in industry. The way to lessen and gradually remove the danger of serious unrest and strife in the economic sphere is to "peopleize" or democratize industry more and more, and make the wage-worker feel that he is actually a co-partner in industry and that his interest is fundamentally identical with that of the employer and the directorate.

The Daily News has recorded with sincere satisfaction many signs of this growing sense among employers of the wisdom of taking labor into their full confidence and discussing at round-table conferences the various common problems arising out of the industry that pays wages and dividends. The latest "sign of the times" is the "Harvester Industrial Plan" of employee representation on works councils at the plants, these councils being charged with the important duty of considering and recommending to the management suggestions relative to working hours, wage scales, recreation, safety, education, Americanization, and so on.

"Details of the scheme show that it is as genuinely democratic and elastic as it was possible to make it at the start. The hundreds of employees have the opportunity freely to elect their own representatives, while the latter have the right to carry an appeal in any dispute over participation in the works councils to the president of the company. The design is start. The thousands of employees to speak frankly and fearlessly at all times on questions that are vital to them. The decision is reserved for the management, but even here there is, of course, unlimited possibility of development of the idea of friendly co-operation and representation on the directorate through stock ownership and profit sharing.

How infinitely more constructive and hopeful are such experiments than the destructive, hate-inspired attacks on the present social system and the propaganda of class warfare.

Minard's Liniment Co., Limited.
I was very sick with Quinsy and thought I would strangle. I used MINARD'S LINIMENT and it cured me at once. I am never without it now.
Yours gratefully,
MRS. C. D. PRINCE,
Nauwigewauk, Ont. Zlat.

Protection.

The "things our grandmothers did" are so often ridiculed that it is pleasant to read this in the American Agriculturist in an article about protection from lightning: "Our grandmothers used to ensorce themselves (as a refuge from lightning) in the midst of a large, thick, feather bed—and this was a wise thing to do, for feathers are a non-conductor." The article goes on: "Rubber being a non-conductor, it is well to slip on a pair of overshoes during a storm, so that if the house happens to be struck, the shock cannot prove injurious. It affords the greatest relief for the nerves if the curtains are drawn down, and the lights turned on, for then one cannot see the lightning."

The Lute.

The lute has vanished. It was one of the oldest of instruments and had a beautiful vibrant tone somewhat like that of the harp. But its size and complexity were against it. It had a long tail, and many strings, and while its size increased its power and range, it also increased its weight and made it cumbersome. The minstrel of to-day plays on the mandolin, the guitar or the banjo, and the lute is forgotten.

Minard's Liniment Lumberman's Friend.

HELP WANTED—FEMALE.

GIRLS AND WOMEN AS WEAVERS
Winders' etc. Apprentices paid while learning, and every assistance given in teaching beginners this work. Only short experience required to develop efficient workers. Pleasant work, satisfactory remuneration. For full particulars, apply Slingsby Mfg. Co., Brantford, Ont.

HELP WANTED—MALE.

WANTED—AT ONCE FOR THE SUMMER, young man for country Grocery, inside and on wagon. Apply giving references to F. C. Brown, Ridgeway, Ontario.

Read to the Children.

When children read a book to themselves the words do not leave the same impression upon their minds as when they hear them read aloud. When someone reads a book to them they learn how to pronounce those words which puzzled them; and if they do not know the meaning, it is easy to ask.

BARGAINS IN STOCK.

Won't interest the man who is nursing a bunch of sore corns. Give him a bottle of Putnam's Corn Extractor. It is painless, takes out the corn, cures in one day. Beware of substitutes for "Putnam's." It is the best 55c at all dealers.

The Edibles.

A small grocery store was being sold off under the hammer, and included in a somewhat eager assemblage was a man who had journeyed full of hope from the far end of the city. Impatiently he waited while odd lots in pipeclay, candies, blacking, and washing soda were sold, he hurried out. "Hey, auctioneer, when are you gonna pit up the edibles?" "Ay, ay," responded that gentleman cheerily, "we'll jist has something in that line. John, hand's up these packets o' canary seed."

On the Road to Success.

That young man is wise who makes a plan, organizes his ambition, and makes each day contribute something toward its fulfillment. Success often seems delayed, but it is surely on the way for those who are getting ready for it. Over the desk of the boy or girl struggling with hard lessons that may seem at the present quite useless, let it be written in letters of gold: "I will study and get ready, and maybe my chance will come."

NO NEED SUFFERING FROM PILES NOW

Golden Pile Remedy will cure your Piles. Try it! The trial is absolutely FREE. Simply send us your name and address, and we will send a liberal free treatment by return mail.

It is a mistake to dose yourself with so-called Pile cures. They will do you more harm than good. Why don't you begin right to-day to overcome your piles? You can do it by using Golden Pile Remedy.

The results from the full treatment, which sells for \$1.00, are amazing; the itching, burning and swelling, along with the other well-known symptoms, soon disappear and leave you completely cured.

Write to-day for a free trial treatment and be convinced.

Sold by leading druggists everywhere or direct by mail, price \$1.00.

GOLDEN PILE REMEDY CO.
Box 191 Windsor, Ont.

NO PROTEST ON REPARATIONS

Hun Willing to Make Good in France and Belgium.

Gist of Other Replies Also Given.

Paris cable: The answer of the Council of Four to the German notes on prisoners of war and labor subjects were delivered this afternoon.

One of the later German notes, dealing with economic clauses of the treaty, declares that they mean the ruin of Germany if they are enforced.

A note on territorial questions protests particularly against the Saar Valley arrangement and the transfer of the Malmédy, Moresnet and Eupen districts to Belgium, as well as the forced evacuation of a part of Schleswig.

A note on reparation does not protest against the payment by Germany for the devastation wrought in Belgium and northern France, which, it says, Germany is ready to do willingly.

"Direct oral discussions between the commission and nearly all the belligerents concerning prisoners of war have been considered, even during hostilities, as the surest means of solving the difficulties. It ought today to be all the easier to reconcile the different viewpoints and clear up certain obscurities still existing on certain details of the problem."

"For instance, as a result of the diversity of the viewpoint of the law in the different countries interested, the German delegation considers it indispensable that prisoners of war and the civilians undergoing penalties for other infractions than those of discipline, should be in a group that ought to be repatriated unconditionally. Germany has recognized this principle regarding prisoners of war and civilians of the allied and associated powers in its custody."

"The German delegation deems it necessary for reasons of equity to accord certain improvements in the treatment of prisoners, military and civilian, pending the time when they may return to their own country."

A Pill for Brain Workers.—The man who works with his brains is more liable to derangement of the digestive system than the man who works with his hands, because the one calls upon his nervous energy while the other applies only his muscular strength.

A HAPPY COMMUNITY Scenes like this are being enacted all over the Continent and the Canadian Trade Commission and the National War Garden Commission urge more home food raising.

Miller's Worm Powders not only make the infantile system untenable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create.

Bugs in France.

In the reign of Louis-Phillippe, a Monsieur Terrat had been charged with the duty of fighting bugs in the barracks of Paris. It must be believed that the result was satisfactory, since by virtue of an order of the general inspector contracts were made in 1848 with Monsieur Terrat for the destruction of these frightful insects.

"How are you planning to entertain your guests this evening?" "I am leaving that entirely to them. You see the women will get together and discuss various things, while the men will go into the den and talk golf."

THE GARDEN CALL Millions are awake to the value of home food production, say the Canadian Trade Commission and the National War Garden Commission of Washington.

TEUTO' ENVOYS REACHED PARIS

Made Sharp Contrast to German Delegates.

Courteous Reception, but No Handshakes.

Paris cable says: Karl Renner, the Austrian Chancellor, brought his peace delegation and their attendants to St. Germain, near Paris, to-day, and at a later date will appear before the representative of the allied and associated powers to receive the conditions which will spell peace for the former empire.

The delegates then proceeded under military escort to the villas set aside for them overlooking the valley of the Seine and Paris, and lacking the high fences and sentries so much in evidence at Versailles.

Chancellor Renner was apparently in excellent spirits. He smiled engagingly, and his eyes shone as he greeted the representatives of the allied countries. In the course of his remarks, he said, among other things: "I hope I may go away with as joyful a heart as I bring."

It was a cosmopolitan crowd which awaited the delegation, French, English, Italian, Japanese, and American journalists and officers. Some of the Austrians gazed inquiringly from the windows as the train entered the station, uncertain of their reception, but Chancellor Renner was sure of his ground, and welcomed the friendly spirit displayed with heartiness, which was reciprocated in a measure by those assembled.

Professor Lammach was accompanied by his wife and daughter, and there were several women secretaries, who were shown the greatest courtesy. The Austrian newspaper men and subordinates were quartered in one of the requisitioned hotels.

After their arrival at the villas the Austrian delegates again thanked the escorting officers for their courteous reception, and chatted for a time, contrasting the sunshine and warmth of France with the snows and bleakness of Austria and Switzerland on the journey thither.

The Oil for the Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

LIVE STOCK FOR EUROPE

Big Conference at Ottawa On Important Subject.

Canada Has Reputation and a Fine Chance.

Ottawa Report — At what Dr. J. G. Rutherford called the most representative gathering ever held in Canada of men who are engaged in and know the live stock industry of Canada, proposals are being made and discussed for getting and holding European markets for Canadian live stock, and for developing the industry in Canada.

At the morning meeting Mr. Arkell assured his hearers that Canadian bacon, poultry and eggs have won an enviable reputation during the war. Commission houses or buyers in London or other British cities had all their stocks of Canadian bacon taken during the war for the use of the army, while the American dry salt heavy fat bacon was sold to the public under a controlled price.

NO QUESTION AS TO DEMAND. With respect to the demand for Canadian live stock generally from overseas, Mr. Arkell said: "I don't think there need be any question as to the demand for all our products provided we can maintain the quality and organize the business in a thoroughly business-like, systematic way."

Mr. Arkell stated that if Canadians properly organized themselves there

IT GOES AND GROWS What is true of a snowball is true of a garden. Start one, is the urgent advice of the Canadian Trade Commission and the National War Garden Commission.

was a market for all available Canadian livestock. They could find a profitable outlet for heavy horses in the British Isles and for lighter horses on the continent.

Canada's opportunity in England is to take the place formerly taken by Denmark in supplying bacon to England and by Russia in supplying eggs. Her pre-war trade in cattle is also capable of further developments.

NO CURE, NO PAY. FREE I want every Man, Woman and Child who is suffering with BRONCHITIS, COUGHS, COLDS, BRONCHIAL ASTHMA, HOARSENESS, to test the marvelous HEALING POWER OF BUCKLEY'S WHITE BRONCHITIS MIXTURE, by getting one bottle from your Druggist, and use it for five days.

PROGRAMME OF COSSACK CHIEF

Denikine Communicates It to the Allies.

Fight Bolshevism and Restore Order.

Paris Cable — General Denikine, the head of the Cossack anti-Bolshevik Government in Southeastern Russia, has communicated his programme to representatives of the Allied powers. The principal points of the programme follow:

- 1. To continue the struggle against Bolshevism.
2. Restoration of law and order.
3. Reconstruction of a unified and indivisible Russia.
4. Convocation of a constituent assembly based upon universal suffrage.
5. Larger regional autonomy and the establishment of self-governing districts.
6. Civil and religious liberty.
7. Immediate agrarian reforms.
8. Adoption of measures tending to protect workers against exploitation by the capitalists and against Government abuses.

Could Hardly Live for Asthma. Writes one man who after years of suffering has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless has been his sufferings. This matchless remedy gives sure help to all afflicted with asthma. Inhaled as smoke or vapor it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler.

Fabric Faddery. Bronze tricolette. Jay blue tricolette. La 'ers for sports skirts. Richly satin-striped Georgette. Indestructible voile, made up in pleatings.

For Tea-Time. Old bleach muslin in damask design. Bound in green handkerchief linen. Embroidered in basket cross-stitch design. Pretty for a tea cloth and napkins.

As a vermicide there is no preparation that equals Mother Graves' Worm Extirminator. It has saved the lives of countless children.

TRAVEL BY FLOWERY WAYS

There are many who believe that all big corporations and industrial concerns only look to the material side of things and work machine-like for the production of wealth, regardless of the winter's snow and un-budding of the summer's bloom. This is often an erroneous idea, for it is generally realized that man does not altogether live by offices and pens and papers and engines and other accoutrements of labor—he requires trees and shrubs and flowers and the loveliness of nature.

Along the line at Moose Jaw, Sask. (2) Woodstock, Ont. (3) Vaudreuil, Que.

The Canadian Pacific Railway has always paid considerable attention to the development of garden plots along its lines. It is just thirty years ago since a C.P.R. employee raised a few varieties of flower seeds in his own garden, and distributed them amongst his friends in the service of the company, with the object of promoting flower gardening at the various station plots of the railway. A vast advance has been made since then; and now the company possesses a Floral Department with headquarters at Windsor street, Station, Montreal, and a Floral Committee which embraces members from the Eastern and Western lines. It is under the guidance of this department that the various station plots and other properties of the company are cleared up and beautified. Thousands of packages of flower seeds, bulbs, trees, and shrubs and large quantities of grass seeds and fertilizers have been distributed during the last few years to station agents, section foremen, caretakers of round houses, and all employees living on the property of the com-

PRESERVING SCENES OF WAR

Future Generations Will Realize How Much They Owe to Courage and Skill of Photographers.

When the history of the great war comes to be written in the days after the tumult and the shouting have died away, the fortunate chroniclers of the momentous events now in progress will have access to enormously valuable and enormously numerous "documents" of a kind with which their predecessors of the nineteenth century were but scantily supplied, and those of earlier times next to not at all.

Photography can hardly be called new, and as long ago as our war between the states we had photographers, notably the never to be sufficiently thanked Brady, who immortalized the leading figures and some of the events in that conflict. But what was done with the clumsy cameras of that era can hardly be mentioned in comparison with the achievements of the men who today follow every army, often to the very front of battle. The products of their courage and skill will constitute a priceless treasure in the future, and the students of this war, even in remote ages, will be able actually to see its every phase and operation.

The reproduction of photographs by printing processes is equally far advanced beyond the old standards of excellence, and reproductions have become wonderfully cheap. Indeed, so cheap are they and so abundant that few of us realize the need of their preservation, and the result is that already foresighted collectors of carelessly treated magazines and supplements are storing away the foundations of fortunes not to be scorned, even in these days of multimillionaires. With the war less than four years old, copies of periodicals that cost only a few pennies now fetch as many dollars, and "complete sets" are becoming hard to get at any price.—From Topics of the Times, in New York Times.

Gas Made From Straw.

The production of fuel and lighting gas from straw is now made possible by a Canadian invention. This producer, which is designed for individual farm use, offers a practical means for utilizing the vast quantities of straw that now go to waste on the Western plains.

The gas is made in a retort equipped with three cylinders, each of which molds a bale of straw seven feet long, two feet wide, and six inches thick.

After filling and closing these chambers, a straw or gas fire is lighted under them and allowed to burn 30 or 40 minutes. One firing with wheat, oat, barley, or flax straw in this manner produces 1,200 cubic feet of gas, having fuel value of 400 B. t. u. About 12,000 cubic feet of gas can usually be generated from one ton of straw, and in addition six to eight gallons of tar and 640 pounds of carbon, from which lampblack can be obtained.—Popular Mechanics Magazine.

Origin of "Doughboy."

A phrase, strictly American in its modern usage, is that of "doughboy" as applied to an American soldier. An American infantry soldier recently explained the origin of the term to the correspondent in Paris of the London Times after this fashion: "In the Civil war a great number of federal troops were waiting for uniforms, which were made but lacked buttons. So great was the hurry that eventually the men went round the houses in the town and collected buttons off the women's clothing. These were for the most part large buttons from overcoats. Naturally the infantry looked funny with their uniforms fastened by great overcoat buttons. Those resembled hard tack (large, round, dry biscuits made of dough) and hence sprang the word 'doughboy,' which has been kept in the United States army as a slang phrase for an infantry soldier."

Conquered at Last.

An unknown genius at Camp Kearney is entitled to a monument "everywhere in America." He'd been a naughty boy or something and was assigned to cut onions for camp mess as a punishment. Imagine the surprise of the corporal of the guard when he discovered the offender blithely dissecting the Bermudas under the protection of his gas mask. "Youse ain't sufferin' no punishment," scoffed the officer, adding, "but 'tis a grand idea and 'tis the wimmen o' the country will bless ye, me lad!"

History Repeats Itself.

Not for the first time have German invaders been checked at Chateau-Thierry. It was there, in February, 1814, that Napoleon, by one of those extraordinary forced marches of his, fell upon Blucher, who was confidently marching upon Paris. By swift blows on succeeding days he shattered the second and third divisions of the Prussian army, capturing almost all their artillery, and then fell upon Blucher's main force in the vicinity of Chateau-Thierry, and compelled him to fall back, with heavy losses.

First Tennis in America.

Forty-four years ago the game of lawn tennis was introduced by a Bostonian, according to records in the possession of George Wright, father of the former national title holder, Beals Wright. After a visit to England the Massachusetts man brought home nets, rackets and balls, as well as a book of rules then governing the game, and set up a court at Nahant. A little later courts were laid out at Newport, R. I., and also on the grounds of the Staten Island Cricket club, Livingston, Staten Island.

ONCE ORIENT PRIDE

Old Merv is Now but a Desolate Place of Ruin.

Practically Obliterated by the Great Conqueror, Jhenghiz Khan, Whose Son Had Fallen in the Assaults on the City.

We passed by New Merv and went on to Balam Ali, named after one of the sons of Timur, which is the station for Old Merv and the demesne of the Murghab, formerly the property of the royal family, Maynard Owen Williams writes in the Christian Herald. Balam Ali resembles the great pyramids in that it stands between the desert and the town. Accompanied by the twenty-year-old commissar, a remarkably intelligent young Russian upon whom devolves the task of governing the district with a decreasing police force, we visited the various ruins which mark the spots where the successive editions of Merv stood. Merv is mentioned in the Zoroastrian books of wisdom and, like every other old city, owed its existence to a river—the Murghab. Seleucus Nikator once founded a colony here and for a considerable period it was the home of a large band of Nestorians. But it was not until the Arabs, to whom modern civilization owes so much, took charge, soon after the death of Mohamet, that Merv became a true metropolis. Huge dams were erected on the Murghab and the entire oasis was well watered from the irrigating ditches. Merv then rivaled Bagdad as the greatest city in the orient.

Five centuries later, Jhenghiz Khan, enraged by the death of his son before the ramparts of the queen city of the world, utterly destroyed it. The Arabic writers assert that nearly a million persons were killed at this time. Arabic writers estimated figures in a typically freehanded way.

For 200 years Merv was a ruin, but in the fifteenth century it was rebuilt and continued to exist until 1795, when the emir of Bokhara destroyed the wonderful dam at Sultan Bent and thus turned the lovely oasis into a desert. Massive as they are, the ruins of Old Merv are devoid of interest. The young commissar, in speaking of the ruins, said, "What sighs and tears these crumbling walls have cost!"

Three beautiful horses, furnished by the government and driven by a picturesque old coachman in a red shirt and sash, black vest and white coachman's hat, whirled us back through the various sites of ruined cities to the small town of Balam Ali, where a new system of irrigation is building up a new city. Old Merv is an interesting proof of the "sic transit gloria mundi" phrase, but it was built in "sic transit" style, of sunbaked bricks. Only a battered mosque, a great convent and several huge beehive ice-houses remain above the scarred plain where great cities stood.

Shortening Crackers With Corn Oil.

For years cracker bakers have thought that only animal fat could be successfully used as shortening in their products, it being believed that vegetable fats, such as lard compound, corn oil and peanut oil would not make crackers which would keep in hot weather. For ten months, however, a cracker baking concern in Terre Haute, Ind., has been making commercial goods with 13 pounds of corn oil to the barrel of flour instead of an equal weight of lard, and also using 25 per cent rye flour to 75 per cent wheat.

These goods went through the hot season last summer without trouble, thus destroying what was practically a myth of the cracker-baking trade. The rye mixture produces a soda cracker and saltine in no respect darker than a straight wheat article, according to a bulletin of the United States food administration. Barley flour is also suitable for cracker baking.

Women Also Serve.

While in the larger cities their work is not so noticeable, in the smaller centers of population our women are slowly but surely taking over the work of the men who are now in the army, navy and other government service. So far, our women workers have not taken over the heavier classes of work found in manufacturing plants, because there are still ample numbers of men available. However, in plants where there is much light manufacturing women are to be found in profusion. In stores, hotels and even in street cars, American women are taking the places of men with the colors. Women soda-water dispensers and elevator runners are now quite common in most cities.—Scientific American.

Chain Armor to Protect the Eyes.

An ingenious improvement has recently been made to the already familiar steel shrapnel helmet in use "over there," says the Popular Science Monthly. It is designed to protect the eyes and the upper part of the face from splinters of wood, stone, sand and metal thrown up by exploding shells. The new device is merely an adaptation of the chain doors which have been introduced into metal, chemical and glass works in recent years to protect the workers from the heat of the furnaces and the splashes of molten material. It consists of a fringe of separate short lengths of fairly heavy chain, which effectively arrests the flying particles. On account of its looseness, it does not seriously interfere with the vision.
