

IF your suit is not looked on with favor come in and get another. We've got 50 summer suits left—mixed suits—stripes, checks and plaids that we're selling like this: 7.50 suits for 6.00, 7.00 suits for 5.00 and a few odd sizes of bicycle suits that we're clearing out at exactly half the regular marked price—6.00 suits for 3.00, 5.00 suits for 2.50 and 4.50 suits for 2.25.

The New Fall Goods and styles are receiving the most favorable comment from early buyers. It's none too early to look after the boys' suits and odd pants. Exhibition is here and school opens in a few days. We're ready to show the most exclusive styles in the city.

For Boys of 10 and Under the styles are the best shown for many seasons, and are sure to delight both the boys and their mothers. There is ample choosing between 1.50 and 7.50 in all the sizes.

CATARACT COMPANY CAME DOWN
And the Locked-Out Employees Go Back to Work—General News

Stables Burned. The stables belonging to George Koch, Barton-street West, were badly damaged by fire last night. The fire started in the upper part and gutted the roof and destroyed the lower part. The loss was estimated at \$10,000. The fire was caused by a gas lamp which had been overturned.

Separate School Plein. The annual meeting of the separate school children of the city took place at Grant House Park last afternoon. The principal, Mr. J. H. Hadden, presided. The meeting was a success and the children were very well behaved.

Renovating the Y.M.C.A. Contracts were awarded this afternoon for the renovation of the Y.M.C.A. building. The successful contractor is J. H. Gumbo, masonry; F. Patterson, carpenter; W. H. Hadden, metal work; G. H. Hadden, plumbing; W. H. Hadden, electrical work; and W. H. Hadden, painting. The alterations will cost \$200,000.

Yacht Myrtle Sailed. The fast yacht Myrtle, which was built by a Cup defender, is in possession of Bruce Buchanan's officers. It was seized at the residence of the late John Buchanan, the Walker-Chilman syndicate, who had trouble with William Buchanan, a minor stockholder. Commodore Walker accepted Buchanan's offer to retire from the company, but when the money was offered, Mr. Buchanan refused to accept the syndicate's offer to buy out his own shares and to give up his right to the yacht.

Is Fox an Absconder? The Magee-Walton Ice Company announced this afternoon that its collector, George Fox, who has been missing for over a week, is short in his accounts. No one has been heard from since he was last seen. It is expected the company will apply for a warrant for Fox's arrest to-morrow. Fox was formerly a well-known member of a job-street and the company will apply for a warrant for Fox's arrest to-morrow.

Men Employed in the City. The men employed in the city who got busy this morning because a man who had been missing for some time was found and went out on strike. That was the view of the situation, from the office of Engineer Wingate, however, the men were not on strike.

HIGH CHIEF RANGER'S ADDRESS
The Order Known to Be Preparing—A Welcome to the President.

High Chief Ranger's Report. To the officers and members of the High Court: Brethren, in the good providence of God, to whom we gladly render the ascribing ever to his power to be and to do, and to suffer, for man made in His image, we are permitted to meet together in this, the 23rd annual communication of our High Court. I am glad to greet you as work-fellows in the good and great cause, great because good, of independent Forestry, and cooperate with you personally, in that you have been deemed worthy to represent your respective courts on the floor of this house. Foresters of foresters are you, the very elect of the worthy foresters of the world, and you are here to-day, at the end of our year, to give an account of the work you have done in the name of God and of the Father who is in Heaven.

It is with peculiar pleasure that I bid you welcome to this place. As a result of the work you have done in the name of God and of the Father who is in Heaven, you are here to-day to give an account of the work you have done in the name of God and of the Father who is in Heaven.

One of the members of the High Court, Mr. J. H. Hadden, presided. The meeting was a success and the children were very well behaved.

IRON PRODUCTION IN CANADA. Canada in many respects is a duplicate of the United States. The natural products of the two countries are very much the same. With the exception of such products as are indigenous to the semi-tropical south, there are few articles produced by the United States which Canada does not also produce. The two countries find in agriculture the chief employment for their people. Each country is an exporter of agricultural products, and each forms the great bulk of the total exports of the two countries respectively. In regard to minerals, the two countries are about equally resourceful, the only difference being that Canada has less than one dollar of capital, butter, cheese and pork. We have twenty spent for similar purposes in the United States. Climate may be against us in some respects in agriculture, but climate cuts no figure in mining. Canada has as large an area as the United States, and there is every reason to believe that this country is just as rich in mineral products as is the United States. But while we are competitors of the United States in the sale of agricultural products in the markets of Great Britain and Europe, we have done generally nothing in the way of competing with our neighbor in the manufacture and sale of the leading products of the mine. While the United States is shipping rails to Europe and Asia, while its exports of iron and steel and their products are increasing by leaps and bounds, Canada has hardly begun to make iron for her own needs. There is no more reason why Canada should not compete with the United States in iron and steel than in wheat, butter, cheese and pork. We have all the requisites for the economic production of iron and steel, not only in the Maritime Provinces but right here in the heart of Ontario. What we want in Canada, and especially in Ontario, is a vigorous policy looking towards the development of our iron mines and the manufacture of pig iron, steel rails and all kinds of structural iron. There is a world-wide market for such articles. Canada is not limited to her own markets. She has the world for her field. While it is becoming more and more expensive to manufacture iron in Great Britain and Europe it ought to be the very reverse in Canada. It is not improbable that Sydney, C.B., will surpass even Alabama in the cheap production of pig iron, and there is no reason why Ontario should not have furnaces working as economically as those at Pittsburg. It is satisfactory to notice that we have, at least, made a beginning. Pig iron is now being produced in increasing quantities at Hamilton and Deseronto, while an iron plant is being completed at Midland. The aluminum industry seems to be more in the production of ore than in the manufacture of iron. The company at Hamilton finds it necessary to import considerable quantities of ore from the United States. This, we feel certain, will only be temporary. The aluminum industry in Canada has got well advanced in the opening up of its iron properties in Michigan. It is said the company is shipping 4000 tons a week, since the mine only made its first shipment on July last. The opening up of iron mines will undoubtedly reduce the imports of ore from the United States, and may stop them altogether. It will be a year or two before shipments of ore can be made from the Algonquin ranges, where the supply of iron ore is said to be unlimited. The development of the mines in this district and the completion of the Bathy River Railway the owners of iron mines at other points in Ontario that are accessible to the boats and cars ought to make an effort to open up their properties and produce ore for shipment. Iron ore is a merchantable commodity to-day, and anyone who has the right article can find a market for it. The great desideratum in the development of Ontario's iron mines seems to be capital. A number of promising mines have been opened up, but in most of them the development work has been done to ascertain the quantity of ore they contain. Ontario is by no means a purely agricultural province. We hope before long to see her have a world reputation as an iron producer. Their own interests they would abandon the unfavorable conditions under which iron is produced in Great Britain in favor of the superior conditions that prevail in Canada.

Political Intelligence. The election of Mr. Charles Cameron, the Conservative candidate for North Simcoe, has been hailed as a triumph for the candidates who dropped out of the running so as to make Mr. Cameron's nomination unanimous with the World. "Leighton MacCarthy has killed more than a dozen men, because he has killed at the emergency ration scandal. He deliberately shirked the vote and cannot possibly offer an excuse that will justify his action. A general election is now in the air, and I trump up when his vote on a question does not meet with the approbation of his supporters, but when he deliberately shirks it his name is lost." "Why is it that the electors of Peel County have persistently elected a Liberal to represent them in the Commons?" was a question put to a life-long resident of the riding yesterday by The World. "That is a question that has troubled me for some time," replied the respondent. "The Conservatives have run an outside man who has had comparatively no interest in the county and was almost unknown, personally, to the electors. Now, if we have a man who can carry the riding if anybody can, Richard Blair has lived in Peel all his life and all the forthcoming election will be his. He is a man who is bound to win, I think." Postmaster-General Hon. Wm. Mulock will speak next Monday at a meeting in St. Paul's Church.

The Independence of Canada Party of Windsor is making active preparations for the coming political campaign. Officers have been elected and the leaders of the party state that they will have a strong candidate to contest North Essex. Vice-President La Forge says a convention will be held as soon as the time for a general election is fixed. The members of the party profess to be sanguine of success in North Essex. This is but another of the obstacles that are daily looming up to cut down the Conservative political career.

ENTERING FOR BUSINESS

As a result of the practical business training that is given at the Ontario College of Business, a number of students are entering for business in the following: New term opens September 1st. has elapsed, and not a shovel of earth has been moved by the original company, or by any other concern. Nor is there any indication or prospect of the work of development being undertaken in the near future, or at any time. The situation at Niagara Falls is exactly as the Rankine Company would have it. Everything on the Canadian side is dead up. On the United States side the installation of electric plant is going ahead with remarkable rapidity. The great feature of the Pan-American Exposition is the fact that the grounds and buildings will be lighted with electricity from the Falls, and the machinery will be operated by the same agency. The development of electric energy will be a magnificent advertisement for the United States, but a sad commentary on the enterprise of Canada. Visitors to the Exposition will witness the greatest activity on one side of the river, while on the Canadian side they will observe the greatest inactivity. It is a pity that the Government has sided an American company in their desire to tie up our power, while they proceeded with the development of their own on the United States side of the river. This tie-up has been effective for 10 years, and it is as effective now as it was in 1890. THE CONNIE ACT

How It Stands in the Way of the Establishment of a City Gas Plant.

The following important letter from the City Solicitor was laid before the Board of Control yesterday, but was not dealt with:

"We are of the opinion that the provisions of the Connie bill apply to Toronto, and, under it, the city, before establishing a gas plant, must carry out its provisions.

"First—Fix a price to offer for the land and property of the company.

"Second—Pass a bylaw fixing such price, and authorizing notice to be given to the company to accept the same.

"Third—Wait for the company to either accept the offer or refuse the same, until expiry of time of notice.

"Fourth—If the company refuse to accept the offer, or refuse to give notice, the city may pass the bylaw for raising the money necessary to establish the gas plant.

"Fifth—If the company accept the offer, the city has three months after the date of acceptance of the offer to either pay the money or give notice to the company that it will withdraw the offer.

"Sixth—If the city withdraw the offer, the city must name its own arbitrator, and proceed under the provisions of the city act and bylaw.

For Protection

In ye olden times the tradesman's trade mark was outside his shop.

To-day it is on the goods themselves, distinguishing them from "just as good" and imitations.

On "Slater Shoes" it is a slate frame with the makers' name and price.

This makes them distinctive, it's your protection against substitution; also an assurance that you get full shoe value for your money, whether it be a \$5.00 or \$3.50 shoe.
