

European Intelligence.

(From Papers by the Asia.)

GREAT BRITAIN.

London, Saturday.—An Indian Telegraph was received at the Foreign Office, August 25th at 12 30; Alexandria, 24th, August. The steamer Hindostan arrived at Suez from Alexandria, 22d inst. she left Calcutta on the 10th July—the delay was caused by an accident to her machinery while in the Red Sea. The Steamer Cardia arrived at Suez yesterday from Bombay, with dates to the 4th inst. Nothing of importance has occurred since the last mail. The British troops are chiefly engaged in harassing the rebels in Oude, wherever they can find them, and in reducing their fortifications; many of the chiefs who have not irretrievably compromised themselves in revolt, are surrendering to the authorities; others who have been faithful to the British flag are being honored and rewarded. Reports proceed to have been deeply implicated are being executed. The Punjab is tranquil. Sir Hugh Rose has resigned the command of the Poonah division.

China dates from Tien-sin are to the 18th June. Great progress has been made in negotiations, and it was considered that the allies were on the eve of a treaty, which will ensure everything they can claim, and open China to the enterprise of our merchants. This news, it will be observed is not so late as that received via Russia.

The Daily News (city article), says the reports to day are flattering, owing to bonafide sales, some of which are connected with the payment of the half-yearly dividend, and this day on stock and other securities of the London and North Western railway Company. Decline in consols however did not exceed one eighth per cent. In other departments of stock exchange business remains stagnant. The high range of continental exchange has a most important bearing on the money market—the demand for money in commercial channels was rather more active to-day. General satisfaction is expressed at a verdict given yesterday, at Liverpool in the Borough Bank affair. The Times (city article) says, the English funds opened steadily this morning at firm prices of yesterday, but owing to several realizations and the receipt of less favourable accounts from the Paris Bourse, the market ultimately became dull. Money has been in rather more demand to-day. Final quotations of French three per cent, on Paris Bourse show a reaction of a quarter per cent. About £20,000 in gold of various descriptions was sent into the Bank to-day. It is stated that the arrangements for the contemplated Turkish loan are likely to be completed almost immediately.

INDIA AND CHINA.

The Times publishes the following despatch. We have received the following from our correspondent at Corfu, dated August 27th, Alexandria, August 24th.—The second Oude proclamation published in Bombay had been declared by Government a forgery. Closing rate of exchange a Bombay for first class bills was two shillings and one farthing; documents two pence to two pence half-penny. Calcutta import market active. Money and freight unaltered. Exchange two shillings and one eighth of a penny. China intelligence from Tien-sin was to 19th June. Lord Elgin had received from Imperial Commissioners a written promise of concession to his demands. The American and Russian treaties had been concluded. The Americans were believed to have stipulated for an annual visit to Peking. The Commissioner at Canton was urging the people to war, and ignored negotiations in the North. A proclamation has been issued by Gen. Sirabentee, establishing a partial blockade.

FRANCE.

It is again reported that Marshall Pelissier has asked to be removed from the English Embassy, and his request is shortly to be complied with. It is stated that his marriage is to take place on the 8th of September, the anniversary of the taking of the Malakoff. It is stated that the Emperor will give the bride one million francs as a marriage portion. Lord Palmerston was received by the Emperor at St. Cloud on the 25th. Count Persigny made a speech at the opening of the Council General of the Loire illustrative and defensive of the alliance with England; the speech attracted considerable attention. Count de Motte also made an important speech at the opening of the Council of Clermont. A telegraphic Congress, in which France, Belgium, Holland, Sarinina, Portugal, Baden, Wurtemberg, and Switzerland, are represented has been open at Bern.

The French Government anticipating possibility of more outrages on Christians in consequence of the bombardment of Jeddah, was about augmenting her naval forces in the Mediterranean.

It was rumored in Paris on Friday, that the Imperial Government had demanded from England, explanations relative to the bombardment of Jeddah. The Post's correspondent says M. Turgot is named Ambassador for Switzerland, M. de Feneion minister at Frankfurt, M. Barrot ambassador at Madrid, and M. de Montesevy, minister at Brussels.

The Emperor was about to send Victoria Jeanon upon his own principle, and named "Alliance," in return for that presented to him by her Majesty.

Paris, Friday.—Three per cents, slightly receded to day, closing at seventy.

NAPLES. It was rumored in Paris that Naples had accepted the conditions of England and France.

RUSSIA. A Russian squadron, consisting of two 14 gun screw corvettes and screw propelled gun vessel, sailed at Spithhead from Spithead, on route to Pacific ports, were not allowed to enter Portsmouth harbor, but commanders met courteous treatment.

TURKEY. Some ministerial changes are taking place at Constantinople, and the retirement of the Vizier is expected.

The Paris correspondent of Times understands, that Turkish Government has complained to English Ambassador at Constantinople, of bombardment of Jeddah at moment when it was known Ismail Pasha was on his way thither, with full power to punish the guilty.

The Divan had issued circular, contradicting the rumor of the approaching destruction of Mexico by the Western Powers which was occasioning great excitement.

More riots reported in Andria, 10 Christians killed. The Porte demanded the recall of the Greek Consul in Andria.

CHINA.

It is stated that amount of indemnity to be paid by China to England and France, as stipulated in treaty of Tien-sin, is 30,000,000 francs.

MARKETS.

Consols 96 1/2. Cotton advanced 1/2. Breadstuffs quiet. No material changes in prices. Provisions unaltered.

Visiting, Invitations, and other Cards struck off at 1000 copies.

The Standard.

ST. ANDREWS, SEP. 15, 1858.

THE NEW EMIGRATION SCHEME, or to use the words of the official notice, "Regulations regarding the sale of Crown Lands in New Brunswick, and to encourage the occupation thereof by actual settlers," have been published in the Royal Gazette. Having read them we can see nothing but a re-hash of the old system with some slight changes,—for the worse. Neither the old nor the new regulations are what the country requires; but from what was stated in the Government prints, it was expected that some enlarged and comprehensive system had been devised by the Executive for the encouragement of emigration—that the price of land had been reduced, and facilities afforded to emigrants. The fact is, however, that the new regulations are worse than those of the late Cabinet. No emigrants will come to this Province in preference to Canada, or the United States, while there is such a want of management—such barriers to their obtaining land which they can reach by a highway. Why, the old regulations of 1826 were even preferable to the patched up rehash system (if system it can be called) of the present day. The party who wanted so loudly of progress, are sadly deficient of necessary element to a country's prosperity. If indeed, we except their creation of new offices and salaries, and increased burdens of taxation. Why cannot the Government hold out inducements and facilities to emigrants by laying out tracts of land into settlements of 50 or 100 acre lots—of the good roads to them and then offer the land on reasonable terms, say 2 1/2 per acre, one quarter down, and the remainder in yearly instalments—furnish seed if required for the first year, to be paid for the following year—aye, and supply them with provisions too, if required, to be paid for in a similar manner. This would bear a resemblance, at least, of a desire to promote emigration and settlement, and be some inducement to persons to cross the sea to find a home in a new country.

The Potato Disease—its cause and cure.

On our first page we have copied from the Scientific American a most interesting and able article on the Potatoe rot, its cause and cure—which will be worth an attentive perusal from our agriculturalists and others interested in the cultivation of this esculent. The cause of the disease appears to be a little insect so small as to be scarcely discernible to the naked eye, which deposits its eggs upon the potatoe—the cure is simple, namely, sprinkling quick lime on the seeds, deep planting, and being up well round the vines. This remedy is within the reach of every one interested in raising this vegetable, and who is not?

NEW PACKET.—Capt. McMaster, anxious to keep pace with the times, has replaced his old packet on the route to Eastport, by a new and well appointed Schooner named the "Pilot," which is much larger, and better adapted as a coaster. The captain is so

well and favorably known that we need only add, that he is as punctual and obliging as ever, and ready to attend to any business entrusted to him.

A piece of the ATLANTIC CABLE has been kindly forwarded to us from the United States. It is hung up in our Office where all who are desirous of seeing it can do so.

A New Town Hall.

If any attempt was required to show the necessity for building a new Town Hall, it was furnished to the satisfaction of the townspeople on Thursday Evening last, upon the occasion of the concert by the Peak family. The old hall was literally crammed to overflowing, the major part of the audience was obliged to stand, and crowded even then; and many were compelled to go away; the atmosphere of the room was not only uncomfortably warm but unhealthy, owing to want of proper ventilation; and the low ceiling operated injuriously to any musical performance. Owing to want of proper accommodation, many lecturers, and exhibitions pass by St. Andrews, whereas, if there was a commodious Hall, they would perform here. It is high time some movement was made to warrant the erection of a suitable building for public meetings, &c. We heard some weeks ago, that it was contemplated to purchase one of the vacant lots in Town, and erect a suitable building for a Mechanics' Institute and we were shown a plan of the building; it was provided that the large room should be properly fitted up, lighted, and ventilated. The gentleman who had the matter in hand lacks neither energy nor ability, and we can not conceive why he has let the subject drop. The requisite stock for the purpose could surely be subscribed in the town, and the Legislature would, it is believed, grant a liberal sum towards finishing the proposed Institute. There cannot be a more favorable time than the present to commence so desirable and much required Public Building.

THE FRENCHISE.—We observe that a list of persons qualified to vote in this Parish has been posted up for some days. Any person qualified to vote, whose name is not on the list, must make application to the Revisioners prior to the 1st October, and any desiring to have a name erased, must also apply previous to that day. We hope that the voters will see to these matters ere it is too late. There is no knowing how soon an election may take place, and without the freeholder's name is registered, he cannot vote. It should also be remembered that the next election will be held under the new law—by ballot.

THE NEW EMIGRATION OFFICER.—Some of our contemporaries will find themselves much mistaken with respect to Mr. Shives, the newly appointed Emigration Officer. We know him well, and whether Liberal or Conservative, we care not—he is capable to discharge the duties of the situation, or any other the Government can give him, and what is of some moment, he can write or speak as occasion may require. We rejoice to learn, that even at this late moment a person of his information, talents and integrity, has received some small acknowledgment. His antecedents qualify him for the office he now holds, and we are much mistaken, if there was a change of government—that Mr. Shives would be removed.

North British Review.

From the American Publishers, Messrs. Leonard Scott & Co., we have received the August number of this periodical. The following are its contents:—Chateaubriand, by M. Villemain. Gladstone's Homer. State Papers—Pre-Reformation Period. Biblical Interpretation—Epistles to the Corinthians. British Art—Painting and Sculpture: The Modern British Drama. Egypt and Syria—Western Influence. Researches on Light—Sanatory, Scientific, and Aesthetic. Our Army in India. The Literary Fund. Political Parties. Recent Publications.

The "Investigator" establishment has been removed from Inghintown to the city of St. John; and the paper is now published three times a week, viz: on the mornings of Monday, Wednesday, and Friday. The "Investigator" contains a large amount of reading matter, original and selected, and is a two-edged sword; its motto appears to be "the noblest motive is the public good."

During the last week Professor Andria's Great Work was exhibited on two occasions. This Panorama as a work of art is not excelled by any of the travelling exhibitions of Paintings we have seen, and not equalled by more than one or two. The miseries of in-

temperance have been truthfully depicted—in fact the artist could not have more truthfully illustrated the various stages of intemperance, from the first glass of sparkling wine in the richly furnished dining room of the millionaire, to the miserable cellar where the liquid poison y'clept Yankee rum or gin is dispensed at three cents per glass. This exhibition has been largely patronized in the afternoon by children from the various schools, and in the evenings by large audiences. Mr. Gunn, the delineator is a person who, by his clear and pleasing description interspersed with rich joke, makes the paintings to the youthful mind almost life-like.

We copy the following paragraph from the St. Croix Herald. It is surprising that the authorities at St. Stephen should allow such violations of the law to go unpunished; there are active and energetic Magistrates in that Town, and the residents of the place are honest and law abiding; it must therefore be some struggling vagrants who have committed these petty thefts; the culprit in the last case will no doubt receive his deserts. The Herald says:—

"Several thefts in and about town have recently been committed in a mysterious manner without finding any trace of the delinquents. On Saturday, a lad named E. J. Bedeck was caught while making an attempt to enter the store of Mr. George N. Cole. He endeavored to effect an entrance by the way of the back door, but his prospects were somewhat dampened by an unexpected meeting with Mr. C., and a rather ungracious reception at his hands. He was taken care of, and his guilt being well established on examination next morning, he was bound over to take his trial at the next sitting of the Supreme Judicial Court."

A COMET of unusual brilliancy has been visible here for the last week. It can be seen any evening, after 7 o'clock in a north easterly direction.

Latest from Europe.

ARRIVAL OF THE VANDERBILT.

New York, Sept. 18th.

The steamer Vanderbilt has arrived. The Queen has returned to England. Twelve vessels were wrecked on the English coast last week. Crews saved, with one exception. Ten steamers are to be employed on the Galway and New York route, and eight others to English and continental ports, as feeders. Great hopes are entertained from the Chinese treaty.

MARKETS.

Breadstuffs firm; Flour advanced 6d. Wheat 1d to 2d; Red Western 5s 6d to 6s. Sugar quiet. Coffee firm.

At London, Money was unchanged. Consols 96 1/2 to 96 3/4.

On Tuesday night, the 7th inst., the store of Mr. Boyd, surreptitiously entered, it can hardly be said broken into, as no violence was used more than picking the lock, or using a false key. Only a few dollars worth were missing, considering the great variety of portable articles on hand, it is to be presumed, the thief, helped himself only to what he stood in present need of, which showed some consideration.—Provincialist.

LIGHTING ON SHEPHERD.—The brig Daniel, Capt. Elbridge on the passage from Palermo to this port when off Cape Cod during the rain storm of Saturday, was struck by lightning, which splintered the main royal mast, and the head of the main topmast passed down the topside sheets, and tore some chips from the decks. All hands were at the main topside half rids at the time, and were not injured.—Boston paper.

FATAL RAILROAD ACCIDENTS.—New York, Sept. 7.—A collision between two cattle trains, occurred at Fishkill on the Hudson River Railroad, this morning. Two cars of the freight train were demolished. An engineer and one driver were killed, and another man is under the ruins. Some others were injured, and a great many cattle killed.

A case of conscience occurred in Worcester Mass., the other day. During the trial of Hiram Powers for setting fire to a church in that vicinity, the evidence being all concluded, and while the counsel for the Government was making a very warm speech on the combination of circumstances which established the prisoner's guilt, an Irishman named Harrington, came into court, and whispered to the sheriff that he set the church on fire himself, being hired to do it by three of his neighbors, and Powers was innocent. He was of course discharged, and the other party committed for trial.

LEUCORRHEA.

This weakening disease is one of the most obstinate in resisting ordinary medical treatment, simply because it is regarded too much as a local affection. By attacking the constitutional cause, by improving the general tone and vigor of the system, the PERUVIAN SYRUP is of itself able to remove speedily this exhausting form of female disease.

Guarried.

On the 7th inst., at Trinity church, St. John, by the Rev. J. W. D. Gray, Rector, George Hayward Parley, Esq. Surveyor to the British Fishery Commission, to Charlotte Ellen, youngest daughter of Colonel Ormond, late of H. M. 30th Regiment.

DIED.

At St. John, on the 6th inst., after a short illness, Fenwick W. Arnold, Esq.—M. D. aged 28 years.

TENDERS.

The Subscriber will receive Tenders for BUILDING A SCHOOL HOUSE, near the Protestant Road Station, Dunbarston, up to the 20th inst. A Plan and Specification may be seen at the station, where information respecting the building, will be given.

D. B. BARNETT, Fresh 104 Station, Dunbarston, Sept. 1, 1858.

Lumber, Lumber, Lumber.

DIMENSIONED Timber, Scantling, Studding, Plank, Boards, Laths, and Pickets, furnished to order, and at short notice, in this town. Apply to JAMES BOLTON, Sept. 6, 1858.

Amherst Female Seminary.

PRINCIPALS Mrs. C. E. BATHFORD and Miss YATES.

TERMS.

Board and Washing, (board) does not include, with instruction in Accounting, Writing, Arithmetic, Use of the Globes, Ancient and Modern Geography, Ancient and Modern History, Grammar and Rhetoric, Natural and Mental Philosophy, Astronomy, Botany, and English Composition—£30 per Academic Year.

EXTRA CHARGES.

MUSIC.—Piano or Spanish Guitar, three Lessons per Week, £2 per Quarter, or half term. Singing, five Lessons per Week, 10s.

DRAWING.—Pencil, or Gouache, five Lessons per Week, £1 0 0 per Quarter, or half term. Colored Drawing, three Lessons per Week, £1 10 0.

FRISONS.—Five Lessons per Week, £1 10s. per Quarter or half term.

ITALIAN.—Three Lessons per Week, £1 10s. per Quarter or Half Term.

Instruction is also given in the following branches, viz.—Oriental Painting, Wax Flowers, Feather Flowers, Fancy Wood Work, Chinese Flowers, Ornamental Hair Work, &c.

Bills payable quarterly in advance.

There are two terms per year. The Winter Term commences 1st January, and ends 31st of May. The Summer Term begins 1st August, and ends 31st December. The intersession Quarter or Half Term commences 15th October, and 20th March. Pupils will also be received at any time, and charged only from date of entrance.

The French department is under the care of Madame Eugenie Jeannot, recently from Paris, who teaches on the Ollendorf system, and also gives lessons in Music. Daily conversation in French is insisted on.

Five other ladies are employed in the English Department, Music, Drawing, Painting, Italian, &c. &c. No pains will be spared to procure the health of the Boarders, by proper exercise, and those young ladies whose parents wish them to be able to read, are allowed the use of a quiet study house. Each young lady is supplied with bedding, two pairs of sheets, one pair of pillow slips, towels, and four table napkins, marked with her name; and pupils remaining in the Seminary during the vacations will be twenty shillings, and six pence per week for Board and Washing.

There are six Pianos in the Establishment, and Pupils boarding in the Seminary will be charged Five Shillings per quarter for the use of an instrument to practice. Any Books or Stationery which may be required, can be supplied by Mr. Bathford, of Halifax street. The Seminary is situated within a few minutes walk of four different places of public worship, and near to the Trinity Church and Post Office. Three pupils only are required, and ordinary circumstances, will be the removal of a pupil.

C. E. BATHFORD, Amherst, 24th May 1858.

Scientific Ame

PROSPECTUS. VOLUME FOURTH BEGINS SEPTEMBER.

MECHANICS, INVEN

Manufacturers and Po

The Scientific American has in its Fourteenth Year, and will enter upon the 15th of September, weekly publication of the kind in this country, and it has a very extensive circulation in all the States of the Union. It might suppose from its title, a dry technical science, on the one hand, with the great events going on in mechanical and industrial worlds, on the other, to be a dull and uninteresting matter to read. It is not so. It is a most valuable and interesting work, adapted to the wants of the mechanic, the inventor, the manufacturer, the farmer, the sailor, the telegraphist, the steamship, the engineer, the astronomer, the geologist, the chemist, the physicist, the naturalist, the philosopher, the artist, the student, the general reader, the man of science, and the man of letters.

TERMS.—One Copy, One Year, Six Months, \$1; Five Copies, Ten Months, \$3; Fifteen Copies, \$2; Twenty Copies, \$3.85, in advance.

Specimen copies sent gratis to Seaboard and Western writers, on taken for subscriptions.

Orders should be directed to MUNN & Co., 128 N. 2d Street, New York.

NOTICE.

All Persons having any claim on the Estate of John Higgins, Grand Manan, in the County of Grand Manan, are requested to present the same within three months from the date hereinafter specified, to said Estate, to wit: the 1st day of October, 1858.

Grand Manan, July 6, 1858.

ECONOMY IN PRINTING.
EVERY MAN HIS OWN Printer.

Lowe's Patent
PORTABLE PRINTING AND COPYING PRESS.

THIS Press will print from any kind of Type, Dies, Wood Cuts, Electro-types, giving as perfect an impression as any other press now in use, and may be used by any kind of ordinary capacity. All kinds of Fancy Ornamental Printing may be executed with this Press in the most possible manner. Any kind of paper, of whatever quality or color may be used damp or dry, and all kinds of card-board.

This Press is most admirably adapted for printing Shop Bills, Labels, Visiting Business Cards, Bill Heads, Envelopes, Railroad Receipts, Tea, Coffee, or Salt Bags, and as a Copying Press, is superior to any thing now in use. The larger sizes will be found very useful for taking Proof-sheet Impressions and doing Job Work. It may be used by mechanics, professional men, or any one who may wish a card of any kind. This Press is very simple, strong, durable, and easy kept in order. The smallest size occupies a space of 5 by 5 inches, and will be furnished for the

LOW PRICE OF FIVE DOLLARS.
There are three sizes—the \$5 size prints a sheet of paper 5 by 6 inches; the \$10 size prints a sheet of paper 8 by 12 inches; the \$15 size prints a sheet of paper 13 by 15 inches, and on the receipt of the above named prices, the press will be sent in any part of the country.

WILLARD & M'KUM, Manufacturing Jewellers, 80 Washington Street, BOSTON.

Almost speedily, and most successfully cured of treating Spermatorrhoea, Nervous Debility, and all Urinary Disorders.

THE MEDICAL ADVISER on decay of both mental and physical, arising from excess of the Microscope, and the devices of certain quacks to alarm the unwary, is a valuable observation on Marriage, the prevention and removal of certain disqualifications, rules for self-treatment, &c. By WALTER DE ROOS, M.D., of the Ecole de Medecine, Paris. Member of the Royal College of Surgeons, London; Lecturer in Midwifery, &c. &c. 10, Berners-street, Oxford-street, London. Hours for personal consultation daily from 1 till 4, Sunday excepted.

Sold in Dublin by Berry, 162, Great Britain street; Edinburgh, Robinson, 11, Green-street; Glasgow, 10, Book-street, and by all the Agents.

From long practical observation of the treatment pursued in the various institutions of London and Paris for the diseases referred to in the above work, the Author has had some valuable facilities for acquiring that accuracy of diagnosis and uniform success, which have characterized his practice for so many years in this country, in which the lamentable neglect of these diseases by medical men generally, and their futile attempts to cure by mercury, opium, arsenic, &c., have produced most distressing results. Lasting benefit in such cases can only be reasonably expected at the hands of the legally qualified medical man who devotes his chief attention to their removal; and to him only who can show his possession of the necessary qualifications, can confidence be safely extended. Dr. De R. refers with pride to the numbers he has been instrumental in restoring to health and happiness; and to those who may be in need of such aid, he offers every assurance of speedy restoration.

Persons residing abroad can be successfully treated by correspondence, on sending a full detail of their case, with a Bank note, or Bill on a London house for 25s. in order to have a packet of medicines sufficient to meet the exigencies of the case, sent out by next mail; thus avoiding unnecessary loss of valuable time, and much suffering which might otherwise occur.

The Great European Remedy for Nervousness, Relaxation and Exhaustion.
Prescribed by Royal Letters Patent of England, and sanctioned by all the Great Continental Colleges of Medicine.

DR. DE ROOS' GUTLE YIELD, or LIFE PILLS, are the great remedy for Spermatorrhoea, Exhaustion, Nervousness, Debility, Aversion to and Inactivity for Society, Study or Business, Shaking of the Hands and Tremor, Indigestion, Flatulence, Shortness of Breath, Asthma, Consumptive Habits, Dimness of Sight, Dizziness, Pain in the Head, Frigidity of the Neck, Pains in the Bones, and all those diseases for which mercury, arsenic, &c., are so often employed, to the utter destruction of health. Their almost marvellous powers may be felt to be believed. Hundreds of apparently hopeless cases have been cured, and thousands almost miraculously relieved, when every thing else had failed; and they must sooner or later supersede all these questionable remedies which have hitherto been the sole reliance of English medical men.

Price 11s., and four times the quantity at 33s. per bottle, of the Agents below. The 15s. packages containing twelve 11s. quantities, (by which 21 12s. are saved) will be sent from the Establishment, on receipt of the amount payable on a London house, or otherwise.

CAUTION.—Sufferers must guard against the recommendation of spurious or other medicines by unprincipled vendors, who thereby obtain a larger profit. The words "WALTER DE ROOS, Proprietor," are printed in White letters on the Stamp affixed to the above, by order of Her Majesty's Honorable Commissioners, to protect the public against fraud, as without this none can be genuine, and to imitate which is a felony.

Pains in the Back, Gravel, Lumbago, Rheumatism, Gout, Discharge of the Kidneys and Bladder, Stricture, &c.

DR. DE ROOS' COMPOUND URINARY PILLS are a well known safe and speedy remedy for the above dangerous complaints, Discharges, and Diseases of the Kidneys and Urinary Organs generally. Possessing tonic properties, they agree with the most delicate stomach, improve the humor, and induce a perfect cure when coughs, cures, and all such dangerous medicines have utterly failed. 2s. 6d., 4s. 6d., 11s. and 23s. per box, of the Agents below, or post free on receipt of the amount by Dr. H. H. HIGGINS, 10, Berners Street, Oxford-st., London.

The superiority of these celebrated Pills over every thing of the kind is universally acknowledged, and the extraordinary demand for them without precedent.

Many there are, who from natural diffidence, or fear of discovery, would silently bear their afflictions rather than apply to those for whom they may reasonably expect relief. With the above Pills, the sufferer may without the knowledge of a second person, cure himself speedily, privately, and at the least possible expense.

INK, INK,
A NEW IMPERIAL CHEMICAL WRITING INK.

Warranted not to Injure by Freezing.

THE want of a good description of Black Writing Ink has been long and severely felt in this Province; and the difficulty is, that the ink now in use is completely useless after freezing, and after it thaws, it becomes very poor, and is not fit for any purpose.

The undersigned has the honor to announce that he has manufactured a Chemical Writing Ink, which is warranted not to be injured by freezing, and after thawing, it is as good as new, and is also warranted not to corrode, making a saving of 50 per cent. It is a perfect Ink, and is free from the ammonia of the common Ink, and is also free from the lead of the common Ink, and is also free from the iron of the common Ink, and is also free from the copper of the common Ink, and is also free from the zinc of the common Ink, and is also free from the silver of the common Ink, and is also free from the gold of the common Ink, and is also free from the platinum of the common Ink, and is also free from the palladium of the common Ink, and is also free from the rhodium of the common Ink, and is also free from the iridium of the common Ink, and is also free from the osmium of the common Ink, and is also free from the tellurium of the common Ink, and is also free from the selenium of the common Ink, and is also free from the sulfur of the common Ink, and is also free from the phosphorus of the common Ink, and is also free from the arsenic of the common Ink, and is also free from the antimony of the common Ink, and is also free from the bismuth of the common Ink, and is also free from the mercury of the common Ink, and is also free from the lead of the common Ink, and is also free from the tin of the common Ink, and is also free from the copper of the common Ink, and is also free from the zinc of the common Ink, and is also free from the iron of the common Ink, and is also free from the nickel of the common Ink, and is also free from the cobalt of the common Ink, and is also free from the manganese of the common Ink, and is also free from the chromium of the common Ink, and is also free from the vanadium of the common Ink, and is also free from the niobium of the common Ink, and is also free from the tantalum of the common Ink, and is also free from the tungsten of the common Ink, and is also free from the molybdenum of the common Ink, and is also free from the rhenium of the common Ink, and is also free from the ruthenium of the common Ink, and is also free from the rhodium of the common Ink, and is also free from the palladium of the common Ink, and is also free from the silver of the common Ink, and is also free from the gold of the common Ink, and is also free from the platinum of the common Ink, and is also free from the iridium of the common Ink, and is also free from the osmium of the common Ink, and is also free from the tellurium of the common Ink, and is also free from the selenium of the common Ink, and is also free from the sulfur of the common Ink, and is also free from the phosphorus of the common Ink, and is also free from the arsenic of the common Ink, and is also free from the antimony of the common Ink, and is also free from the bismuth of the common Ink, and is also free from the mercury of the common Ink, and is also free from the lead of the common Ink, and is also free from the tin of the common Ink, and is also free from the copper of the common Ink, and is also free from the zinc of the common Ink, and is also free from the iron of the common Ink, and is also free from the nickel of the common Ink, and is also free from the cobalt of the common Ink, and is also free from the manganese of the common Ink, and is also free from the chromium of the common Ink, and is also free from the vanadium of the common Ink, and is also free from the niobium of the common Ink, and is also free from the tantalum of the common Ink, and is also free from the tungsten of the common Ink, and is also free from the molybdenum of the common Ink, and is also free from the rhenium of the common Ink, and is also free from the ruthenium of the common Ink, and is also free from the rhodium of the common Ink, and is also free from the palladium of the common Ink, and is also free from the silver of the common Ink, and is also free from the gold of the common Ink, and is also free from the platinum of the common Ink, and is also free from the iridium of the common Ink, and is also free from the osmium of the common Ink, and is also free from the tellurium of the common Ink, and is also free from the selenium of the common Ink, and is also free from the sulfur of the common Ink, and is also free from the phosphorus of the common Ink, and is also free from the arsenic of the common Ink, and is also free from the antimony of the common Ink, and is also free from the bismuth of the common Ink, and is also free from the mercury of the common Ink, and is also free from the lead of the common Ink, and is also free from the tin of the common Ink, and is also free from the copper of the common Ink, and is also free from the zinc of the common Ink, and is also free from the iron of the common Ink, and is also free from the nickel of the common Ink, and is also free from the cobalt of the common Ink, and is also free from the manganese of the common Ink, and is also free from the chromium of the common Ink, and is also free from the vanadium of the common Ink, and is also free from the niobium of the common Ink, and is also free from the tantalum of the common Ink, and is also free from the tungsten of the common Ink, and is also free from the molybdenum of the common Ink, and is also free from the rhenium of the common Ink, and is also free from the ruthenium of the common Ink, and is also free from the rhodium of the common Ink, and is also free from the palladium of the common Ink, and is also free from the silver of the common Ink, and is also free from the gold of the common Ink, and is also free from the platinum of the common Ink, and is also free from the iridium of the common Ink, and is also free from the osmium of the common Ink, and is also free from the tellurium of the common Ink, and is also free from the selenium of the common Ink, and is also free from the sulfur of the common Ink, and is also free from the phosphorus of the common Ink, and is also free from the arsenic of the common Ink, and is also free from the antimony of the common Ink, and is also free from the bismuth of the common Ink, and is also free from the mercury of the common Ink, and is also free from the lead of the common Ink, and is also free from the tin of the common Ink, and is also free from the copper of the common Ink, and is also free from the zinc of the common Ink, and is also free from the iron of the common Ink, and is also free from the nickel of the common Ink, and is also free from the cobalt of the common Ink, and is also free from the manganese of the common Ink, and is also free from the chromium of the common Ink, and is also free from the vanadium of the common Ink, and is also free from the niobium of the common Ink, and is also free from the tantalum of the common Ink, and is also free from the tungsten of the common Ink, and is also free from the molybdenum of the common Ink, and is also free from the rhenium of the common Ink, and is also free from the ruthenium of the common Ink, and is also free from the rhodium of the common Ink, and is also free from the palladium of the common Ink, and is also free from the silver of the common Ink, and is also free from the gold of the common Ink, and is also free from the platinum of the common Ink, and is also free from the iridium of the common Ink, and is also free from the osmium of the common Ink, and is also free from the tellurium of the common Ink, and is also free from the selenium of the common Ink, and is also free from the sulfur of the common Ink, and is also free from the phosphorus of the common Ink, and is also free from the arsenic of the common Ink, and is also free from the antimony of the common Ink, and is also free from the bismuth of the common Ink, and is also free from the mercury of the common Ink, and is also free from the lead of the common Ink, and is also free from the tin of the common Ink, and is also free from the copper of the common Ink, and is also free from the zinc of the common Ink, and is also free from the iron of the common Ink, and is also free from the nickel of the common Ink, and is also free from the cobalt of the common Ink, and is also free from the manganese of the common Ink, and is also free from the chromium of the common Ink, and is also free from the vanadium of the common Ink, and is also free from the niobium of the common Ink, and is also free from the tantalum of the common Ink, and is also free from the tungsten of the common Ink, and is also free from the molybdenum of the common Ink, and is also free from the rhenium of the common Ink, and is also free from the ruthenium of the common Ink, and is also free from the rhodium of the common Ink, and is also free from the palladium of the common Ink, and is also free from the silver of the common Ink, and is also free from the gold of the common Ink, and is also free from the platinum of the common Ink, and is also free from the iridium of the common Ink, and is also free from the osmium of the common Ink, and is also free from the tellurium of the common Ink, and is also free from the selenium of the common Ink, and is also
