## FROM THE STATES.

**Oct. 15.**  
Skirmishing took place yesterday along the lines from Harrodsburg to Sandford, the Confederates trying to get out of Kentucky.

The Philadelphia Bulletin of today states that information has been received that the Confederates were crossing the Potomac at Hancock in great force.

A despatch from Chambersburg last night says heavy firing heard all day in the direction of Hancock.

Gen. Stahl made reconnaissance in force on Sunday from Centerville, as far as Aldie beyond which he encountered several bodies of Confederate Cavalry.

A Confederate General, writing to Memphis Appeal, says it is upon Mississippi, and urges the State no longer to rely upon Confederate Government for protection, but throw its whole available force into the field.

The Petersburg Express reports the Federal force at Suffolk 35,000.

The Granada Appeal says stragglers of Lee's army number 40,000.

**Oct. 16.**  
Gov. Curtin complains that Generals at Hagerstown were advised of late Confederate raid across Potomac, and might have prevented incursion into Pennsylvania. He asks a thorough investigation. One is ordered.

Another reported raid via Hancock, not credited at Harrisburg.

Reported capture of Kirby Smith and command is discredited; also that 3000 Confederates entered Lexington yesterday morning.

Guerrillas active in Owen Co., Ky. Memphis Bulletin says that Guerrillas beyond Raleigh were burning all cotton within reach.

Confederate Gen. Glanville reported killed at Perryville battle.

Federal advance occupied Paris, Ky., yesterday.

Large portion of Gen. Curtis' army left Helena some days since and disembarked at Cape Girardeau, Mo.

Ohio election shows large democratic gains.

Superfine flour \$6 25 a \$6 40. Extra \$5 50 a \$5 90.

**Highly Important from Bermuda.**

(From Halifax Recorder.)  
The R. M. S. "Merlin" arrived on Saturday last from Bermuda. We are indebted to A. Forsyth, Esq., for a file of papers from there.

Capt. Sampson reports that whilst entering the harbor of St. George, on Monday last, from St. Thomas, his vessel was brought to by a blank shot from a Federal gunboat, cruising off the harbor. It afterwards turned out that this vessel was the "Serena," belonging to the fleet of Admiral Wilkes, which had been in the harbor for some days, and which had just left.

The following is a letter from the Bermuda correspondent of the "Acadian Recorder," written immediately previous to the departure of the Merlin:

We have been daily insulted by three ships of the Federal navy, under command of the notorious Wilkes. These ships arrived here direct from New York, in four days, on the 25th ult., and to be in want of coal. The Admiral, with one of his fleet, after being presented with a copy of the Queen's proclamation relative to the twenty-four hours limit, entered the port of St. George for coal, with the understanding that she was to leave at the latest on Monday morning. Monday came—the diver represented that the Admiral's ship required some repairs to her bottom, no repairs were attempted.

On Tuesday the ships were still in port. Our Governor and the Commandant of the Troops went on board to expostulate with Admiral Wilkes, and he promised to leave on Wednesday. Wednesday came—still the vessels were in the limited waters of the port, and no symptom of their intention was exhibited to move. On Thursday morning, however, the Admiral and the gunboat he brought in with him, and the one that was blocking the port was moved in to take coal and undergo repairs.

Admiral Wilkes was induced to leave at length, it seems, by a communication from the Governor, telling him that if he did not he would compel him. After he got to sea he wrote a very offensive letter to the Governor, accusing him of many things—things, indeed, as such men only as Wilkes could and were guilty of in the port of St. George. It would seem that Wilkes had a double object in coming to Bermuda—first, to insult the authorities, for he must have known in what a defenceless state we were in, and secondly to capture or destroy the vessel, in that port—six steamers—that are engaged

either directly or indirectly in the trade with the Confederate ports, and to destroy the powder, of which there is said to be a large quantity stored on one of the small islands in Castle harbor. The Admiral and one of his steamers had gone out of sight from the land, but the other one, having repaired, is cruising outside of St. George.

A Regatta for sail boats and every description of row boats, is to be held at Bermuda on the 8th and 9th of October.

H. M. Ship "Barrocoona," from this port, (Halifax,) arrived at Bermuda on the 14th ult.; the "Desperate" on the 26th ult., and "Steady" on the 3rd inst.

(To the Editor of the "Standard.")  
UNIVERSITY OF N. B.,  
Oct. 9th, 1862.

Sir,—Believing that you will agree with me in thinking that the accompanying remarks, drawn up by Professor Bailey, on the present state of our knowledge of the mineral resources of our Province, will prove generally interesting to the public, I take the liberty of asking you to give them a place in the columns of your widely circulated journal.

I am, Sir, yours truly,  
W. BAYFORD JACK.

As the subject of the Mineral resources of this Province is at the present time absorbing a large proportion of public attention, and as a very general interest seems to be manifested in almost all parts of the Province, in searching for and developing our metallic wealth, I have thought that a brief list of the ores already known and their localities, together with a few simple directions for the discrimination of future specimens, might possibly prove interesting to those engaged in such pursuits, and perhaps to the public generally. I have therefore prepared and given below a short list of the principle ores known to exist in the Province, with a few observations appended, so far as has been hitherto ascertained. My authority for the greater part of the facts mentioned below, are the labors of the late Dr. Robb, the metallurgical collection of the University, and statements published or otherwise, of the late M. H. Perley, Esq., Gassner, and other gentlemen in various parts of the Province:

NAME OF METAL.	NAME OF ORE.	LOCALITY.
Iron.	Red Hematite.	Woodstock, Kings County, Queens.
	" "	Bathurst.
	" "	Richibucto.
	Micaceous Ore.	Morrison's West Beach.
	Specular Iron.	Black River.
	Specular Iron.	Campo Bello.
	Iron Pyrites.	" "
	Cubic Pyrites.	" "
	Micaceous Iron.	Vicinity of St. John.
	Red Hematite.	Dorchester.
	" "	Bathurst.
	Iron Pyrites.	Woolbrook.
	" "	Wash Hill.
	" "	Queen's Sunbury.
	" "	Campo Bello.
	" "	Charlottetown.
	Blue Phosphate.	Madawaska.
	Manganese.	Tattagouche River.
	" "	Delbouche.
	Gray Oxide.	Woodstock.
	Wad. Black Oxide.	Quaco.
	" "	Dorchester.
	" "	Fredericton.
	" "	Westmoreland.
	" "	Qu'Appelle.
	" "	Sheepdyke.
	" "	Quaco.
	Lead.	Galea.
	" "	Campo Bello.
	" "	Norton Kings.
	" "	Tobique.
	" "	Restigouche.
	" "	McLeod's.
	" "	Long Island.
	" "	Dieppe.
	" "	Petersen's.
	" "	Exile Falls.
	" "	Woodstock.
	" "	L'Ange.
	" "	Charlottetown.
	" "	Campo Bello.
	" "	St. David's.
	" "	Charlottetown.
	" "	Campo Bello.
	" "	St. Stephen's.
	" "	Bathurst.
	" "	Tattagouche River.
	" "	Shim's Pt.
	" "	Charlottetown.

**Copper.**  
Chalcopryte, Bull's Creek, Macadavie Salmon Riv. Alb. St. Stephens.  
Copper Pyrites, Campo Bello, Lubec, Nepisquit, Retigouche.

**ANTIMONY.** Stibnite, Prince William York, Molybdenum, Molbdenite, Nepisquit.

These are by no means "all" the localities in which the above-named metals occur, especially as regards the Sulphurets of Iron and Copper. These are very generally diffused ores, and occur in almost all parts of the Province. Only the purer and more extensive deposits are above given. It is impossible, however, from small cabinet specimens to judge accurately in regard to the quantity or quality of an ore "average" specimens being necessary to decide this point.

The above list may therefore contain many which from their peculiar position or other causes may be in reality worthless, while some really valuable ones may be omitted. This source of error it was impossible to avoid.

It will be seen from an inspection of the table that some two or three localities contain good ores of several of the metals. Among these Woodstock, Campo Bello, and the vicinity of Bathurst on the Tattagouche River are the most prominent.

Campo Bello Island, especially, is rich in Iron, Lead and Copper, while Natives (i. e. pure) Copper occurs at St. David's, Charlottetown, and Zinc Blende at Lubec, Maine.

Gold having also been discovered near Calais, by Mr. Goodale, this section of the Province may be regarded as one of the most promising for future exploration. Moreover no position could be more advantageous for transportation than these Southern Shores and Islands of the Bay of Fundy.

It is to be hoped that the immense resources here stored away for use may soon be made a source of revenue and profit.

In regard to the ores, I may say generally, that the best ore for the purpose of smelting are the Specular Ore and Red Hematite (the first easily recognized by its steel-like metallic lustre, and bright reflecting surface, resembling mirrors, the 2nd by its dull red earthy or rusty character) while the Sulphurets (generally called Pyrites, from the fact that they strike fire like steel), are seldom used except when existing in large quantities and of great purity. Slates however, impregnated with decomposing Pyrites is valuable as the chief source of the manufacture of Copper or Green Vitriol. It may be of great value as some future day, exists also where in so great quantities as to be at present worthless. The same is partly true of Copper Pyrites, which closely resembles the above, but which is of a deeper yellow color, and unlike the former will yield to the point of a knife. These two ores, Iron and Copper Pyrites, to be gathered with an entirely valueless mineral called Mica, are those frequently mistaken for metallic Gold, and are hence frequently called Fool's Gold. The three may always be easily distinguished by the following means:—

1. Gold can always be cut in slices like lead with a common pen-knife, is unchanged by the hottest fire, and is beaten out without breaking by the blow of a hammer.

2. Iron Pyrites is of a much lighter color than Gold, cannot be cut, is very brittle, when heated gives off strong fumes of Sulphur, and flies into atoms by the blow of a hammer.

3. Copper Pyrites looks more like Brass than the preceding, yields to the point of a knife, but crumbles instead of cutting into slices like Gold, and also gives off strong of Sulphur when heated.

The two latter are very frequently intimately combined, and the resulting mineral is then called chalcopryte. Mica is so wholly unlike any metal, that it has always been a matter of surprise that any one should mistake the two. As however, the mistake is of frequently occurrence, I may say that Mica may be easily recognised by the fact of its splitting readily by the point of a knife into thin laminae or leaves. I may here state, in regard to Gold, that I am unaware of any authentic specimens having been as yet discovered in the Province, notwithstanding the numerous reports circulated to that effect.

The report which was current in several of the papers last winter that specimens had been sent to the University, and found to contain the precious metal, was entirely without foundation, no such specimens having even been sent to the University during the past 12 months. It is highly probable, however, that such discoveries may yet be made.

Manganese of good quality, occurs in various parts of the Province, and resembles the ore of iron in many respects. The

means of distinguishing the two, however, although simple, are not generally available to the public at large. This metal is used in the manufacture of glass, both for producing and removing colors. It is also extensively used for glazing and bleaching.

The ore of Lead (Galena) is easily recognized by its lead gray color and sharp angles easily breaking into cubical blocks. It melts very readily when heated, and generally contains a small percentage of Silver, varying in amount in different localities.

Antimony has been found in the two localities mentioned in the list. The statement now circulating in the papers to the effect that it is the only locality of Antimony known in North America is incorrect, it having been found (though sparingly) in Maine, New Hampshire and Maryland. Moreover, the discovery is not one of recent date, a specimen of the ore examined by Dr. Robb, and marked with his handwriting, having been in the Museum of the University since before my arrival in the Province. Whether he was the discoverer or not, or whether the locality is the same as that recently announced, I do not know, he having apparently been in some doubt himself in regard to the same. This ore resembles the preceding, but has a darker luster. It may be recognized by holding a little of the ore in strong light (as in Potash) and after solution adding a little common Muriatic Acid. If Antimony is present a dark red powder will appear in the liquid. The metal is used in the manufacture of Type, Britannia Ware, Tartar Emetic and various medicines.

Zinc Blende occurs in the Province, but of no great purity. It is transparent and wax-like with a brilliant surface. Molybdenum is a rare metal, of no importance in the arts.

I have reason to think that the metal Bismuth also occurs in great purity in the Province, but as there is some doubt regarding the only specimen yet shown to me, I omit it from the list. It is used for the manufacture of type metal, plumber's solder, fusible metal, &c.

In conclusion I would say, that it is highly desirable that authentic and representative specimens of the valuable ores and minerals of the Province should be collected and preserved for future reference. Such a collection of minerals, ores and fossils, representing their various localities, would be of inestimable value in the preparation of future agricultural and geological reports, or in the conducting of future geological surveys. As a numerous collection has already been made with this object, by my lamented predecessor, in the Museum of the University, and as this collection is not only valuable for reference, but also directly for the purposes of instruction in the Institution, it is to be hoped that those interested in the collection of such objects, will favor us with authentic and average samples of the different deposits, as they may from time to time be discovered. Such specimens, whether of ores, minerals, or fossils would be most thankfully received and duly acknowledged by the University. I would especially ask those visiting Campobello, Grand Menan, the North shore of the Province, the coal mines of Albert and Grand Lake, and other interesting localities to obtain and preserve any specimens they may meet, or forward them to the University. Any reasonable expenses incurred in such transportation will be cheerfully repaid. The locality where the specimen is found should always be mentioned.

To the farmers generally, throughout the Province, and indeed to all living in the country districts, I would say, that they may render service of great value to the future interests of the Province, by the simple preservation of whatever objects of curiosity may chance to meet their notice, even though they may be unable of themselves to decide upon their value. Such collections cannot fail to be of interest and profit to those who make them, while the assistance they may render to scientific investigators cannot be underestimated. Wherever geological surveys have been conducted, such private collections have invariably been the source of much useful information.

Hoping that these few remarks may be of assistance to those interested in this all important subject, and that they may serve to stimulate inquiry in this valuable direction.

I am, &c.  
L. W. BAYFORD, Esq.,  
Prof. Chemistry, &c., University.

**AN ELEGANT EXTRADITION.**—Oh, I, who in the court of justice have not felt sorry for, without anxiety and without a morrow; when he seems concentrated in one short hour which he would wish to make eternal, and which we feel slipping away, minute by minute, while we listen to the pendulum which counts the seconds, or look at the hand

that seems to gallop o'er the dial, or watch a carriage wheel of which each turn abridges distance, or harken to the splashing of a prow that distances the waves, and brings us nearer to the shore where we must descend from the heaven of our dreams, on the bleak and barren strand of harsh reality?—Lamarctine.

The President's emancipation proclamation is producing great excitement in the South, and from present indications it is believed that the forthcoming campaign in Virginia will be decisive of the war. In the rebel Senate, on the 29th ult., Mr. Semmes, of Louisiana, submitted a joint resolution declaring the proclamation to be "a gross violation of the usages of civilized warfare," as well as an "invitation to a ruinous civil war," and therefore should be counteracted by such severe retaliatory measures as in the judgment of Jeff Davis "may be best calculated to secure its withdrawal or to arrest its execution." A general debate thereupon ensued, in which the opinion was freely expressed that the "black flag" should be raised, and no quarrel given during the remainder of the war. The resolution was then referred to the Judiciary Committee.

The Richmond "Whig" of the 1st inst., commenting upon the proclamation says, that the rebel military operations are henceforth to assume a grave character, and that the "new programme" of the Federal President will necessarily destroy all terms between the contending parties. The rebel authorities are warned to use every possible exertion in preparing for the next campaign, which the "Whig" says, will be a tremendous one, both for the magnitude and character of the operations. "A passenger who came down to Fortress Monroe on Thursday, from Aiken's Landing, reports that the rebel Congress has resolved in all future actions to hold the 'black flag,' and to exterminate the Federals without granting quarter."—[N. Y. Tribune.]

**THE INTERCOLONIAL RAILWAY.**—It appears to be now pretty generally understood that the Hon. S. L. Tilley is to proceed to England per next mail steamer from Halifax to meet the Delegates from Canada and Nova Scotia, and with them to confer with the Duke of Newcastle on the arrangements necessary to perfect the negotiations for the imperial guarantee, &c. The numerous friends of Mr. Tilley in every part of the Province will be glad that this important matter, which he has hitherto managed with consummate skill, is still to be continued in his hands. There are rumours of Cabinet discussions on the subject both here and in Canada; and some rabid politicians are making feeble efforts to turn it to party account, but we have full confidence that the project is destined to speedy accomplishment. Let it be remembered, that we have now the prospect of having two hundred and fifty miles of railway constructed within our Province, for the comparatively paltry outlay of \$235,000 per annum. [Philanthropist.]

The regular army of the United States consists now of nearly 30,000 men. Out of thirty-two barbers in Portland, Me. thirteen have enlisted and gone to the war.

On Thursday of last week upwards of a quarter of a cent. of gold was brought to Halifax from the Diggings at Sherbrooke.

The American Government is paying \$50,000 a month to feed the starving poor at New Orleans.

Some German gentlemen have arrived in Canada and are negotiating for a tract of land for the settlement of 3,000 of their countrymen.

The drought in the West has destroyed the corn crop near Cincinnati, and throughout a considerable part of Indiana.

A large and very valuable lead of gold—the richest yet found—has been discovered at Ballarat Australia. One machine and a half of wash dirt gave 335 ounces of gold.

The Barbados Globe says, that within the last three months, three women in the parish of Christ Church, in this island, were delivered of nine children—three at a birth to each and they are all doing well.

Mrs. Nancy Root, of Winsted, U. S., a lady nearly 80 years of age, was burned to death by her clothes taking fire from a lamp she held in her hand, on Wednesday evening of last week. She lived alone.

Major Cooper and Mr. Boughton, two persons in Her Majesty's service in New Zealand, have been cashiered, with the Duke of Newcastle's approval, for demoralizing the natives by the seduction of a young girl.

The wages of the printers of Paris have just been raised, a circumstance which is regarded as indicative of a speedy advance in the wages of other workmen. Strikes in France are forbidden by law, and the printers got their advance by strong representations to the Government.

The wages of the printers of Paris have just been raised, a circumstance which is regarded as indicative of a speedy advance in the wages of other workmen. Strikes in France are forbidden by law, and the printers got their advance by strong representations to the Government.

## FROM THE STATES.

**BANNOCK, Oct. 17.**  
Confederate Steamer Alabama, formerly 290, received her armament and crew near Western Island, from an English Bark.  
She has destroyed ships Brilliant, Ocmulgee, Benjamin Tucker and one unknown; barks Virginia, Eliza Dunbar, Ocean River; brig Attanah; schooners Courser, Weather Gauge and Starlight. It is supposed she would cruise some time about Grand Bank for larger American ships.  
McClellan has commenced to advance. Hancock's division left Harper's Ferry yesterday morning and occupied Charleston after an Artillery skirmish.  
Main body of Confederates occupy position extending from Bunker Hill to the Shenandoah.  
Buell pressing the rear of Bragg's army. Another heavy fight reported on Wednesday between Lexington and Richmond, Ky. Confederates beaten.

**Oct. 17.**  
Herald's Washington despatch says information has been received from Nashville that Confederates were in large force near that city on 11th, who demanded its surrender. Federal force ample for defence.

Irish residents of Luzerne Co., Penn., made resistance to the draft. Military were called out in town of Blakeley, and fired on the insurgents, killing four or five. Forceful opposition was put down.

Lee is at Winchester with a large force. Jackson is at Bunker Hill, and Stuart's Cavalry is on the Shenandoah.

Federal pickets were driven in from the direction of Leesburg.

Reported that Gen. Fremont expects an important command Southward.

Vera Cruz advances report no fighting except guerrilla skirmishes. Gen. Forey arrived there with superior diplomatic powers to Salguero, in addition to Military Command.

**Oct. 18.**  
Gen. Schofield with an advance guard has left Cassville, moving Southward to Arkansas line.

Seven thousand Confederates concentrated at Pochontas, East Arkansas, under Gen. McBride.

Gen. Holmes and Hindman, with considerable force, threatened Gen. Carr, Helena.

Bragg, with forty thousand at Camp Orchard, on Tuesday, was retreating rapidly towards Mount Vernon.

Kirby Smith is getting out of Kentucky in haste to prevent their escape.

Mountaineers reported felling trees in the roads to prevent their escape.

New York Underwriters have advanced war rates for sailing vessels in track of the Steamer Alabama, five cents.

McClellan's army cautiously advancing and feeling of enemy.

Washington despatch says Antietam battle exerted decidedly beneficial influence in Europe in favor of Federals. Gold 135.

**FERNANDO WOOD OF THE REPUBLIC.**  
Fernando Wood, ex-Mayor of New York, who has the reputation of being a very able man (says the Halifax Express) and as such is said to have impressed the Duke of New castle, thus speaks of the once Great Republican of the Western World: "If it be said, as it may with truth, that the present Congress is utterly unfit to represent the American people, and that it has been successful in but one thing, viz. in uniting the South and dividing the North, the declaration of such sentiments is regarded as treason. If the conduct of the war is the theme discussed, and the wickedness and weakness of some of our military and executive rulers be held up to proper examination and reprobation, it is deemed as giving aid and comfort to the enemy, and as a crime against the state. It is dangerous, therefore, to speak the truth. We must prevaricate and extenuate of falsity to secure safety and exemption from misrepresentation or personal wrong. In short in speaking of the political questions of the day a man must lie to keep out of jail. And it has come to this in our favored land of liberty. Our boasted republicans have dwindled into a disposition more despicable than exists elsewhere upon the face of the globe. All the free expressions and honest independence of thought and action incident to the genius of our institutions are lost to us, and the American people, as if it were in a night, have sunk into the depths of the darkest bondage and the meanest cowardice."

**CANADIAN ITEMS.**  
The receipts on the Great Western Railway of Canada for the week ending 10th Oct were \$62,716.04, being an increase of \$9,583.65 on the receipts at the corresponding week of last year.

The Ottawa branch of the Bank of Montreal was recently entered by burglars, and large amount of specie and paper money taken therefrom.

The Orangemen of Hamilton have presented the Rev. Mr. Goddes with a Bible, as a mark of their appreciation of the stand taken by that gentleman in the affair resulting out of the death of Sir Allan McNabb.

Eight young men lately arrived in Toronto from Kentucky, for the purpose of attending College, and it is said that many others will avail themselves of the peaceful condition of the Provinces to pursue their studies.

Gen. Napier presented the prizes to the successful competitors at the Queenstown Heights celebration, and in a very neat address assured the Volunteers of the interest he took in everything that concerned their welfare, stating that they were the right

arm of the service in the Colonies. England having so many dependencies to look after, it could not be expected that she could at any time furnish more men for defence than were at present in the Provinces, and felt confident that the Militia of today would act as promptly and as bravely in defence of their country as their forefathers who successfully repelled the invaders of 1812.

**Bangor, Oct. 20.**  
The Charleston Mercury mentions the capture of four steamboats laden with munitions for Buell's army, in Cumberland River, on the 14th Sept., by a regiment of Partisan Rangers. The cargoes were secured, and the boats burnt.

The Grenada Appeal attributes the Corinth defeat to the drunkenness of Van Dorn.

400 Confederates attacked the Federals opposite Island N. 10, firing into each other and retreating.

**Oct. 21.**  
Guerrilla Morgan captured two Federal trains in Kentucky.

All Confederate bands appear making their way out of Missouri rapidly.

Richmond Examiner puts Federal loss at Perryville battle twenty thousand. Confederate five thousand.

Two thousand Confederates reported in rear of Caseyville on Ohio River, but prevented from taking possession of town by two gunboats.

**ST. ANDREWS, OCT. 22, 1862.**

The Attorney General's reasons for resigning have been made public; there are a diversity of opinions with reference to the stand he has taken. It should not be disguised, that he will be supported in his views, by men of all shades of politics. Even those who do not agree with him upon the subject respect him for his independence.

His resignation does not imply that he will oppose the Government upon any other measure.

**Substance of communication giving reasons for retirement of Attorney General:—**

The Delegates representing the Government of this Province at the convention recently held in Canada, to consider the subject of the Intercolonial Railway from Halifax to Quebec, have undertaken, on behalf of this Province, to build the Railway conjointly with Canada and Nova Scotia; and to bear seven twenty-fourths of the cost of the work, and the Council have affirmed their action and are preparing to take steps to give effect to the arrangement so made.

This scheme, in my opinion, is fraught with consequences most injurious to the best interests and welfare of this Province. It involves a heavy charge upon the Revenue, which, added to our present indebtedness, will impose a financial burden, which, I think, our population and resources will not justify upon any sound principles of political economy.

A very important element in the consideration of this subject, in my judgement, is the fact that these works are to be constructed with borrowed foreign capital, the payment of the interest of which will be a never-ending drain upon our financial resources, which ultimately must have a most withering effect upon the prosperity, and seriously retard the advancement of the Province.

It should not be forgotten that the interest on the debt already contracted for our present Railway is about two hundred pounds per day. The earnings of the road, it may be said, are not more than sufficient to pay the running expenses, including wear and tear. The interest is paid abroad, and I am much mistaken if the effect of this has not already been highly prejudicial to the business of the country.

Our present financial condition is by no means flattering and will require the most careful and prudent management in order to meet local requirements and preserve public faith.

The proposed enterprise, if accomplished, must largely increase taxation, which, in my estimation, the people are unable and unwilling to bear. The present tariff is as high as circumstances will warrant. My views on this subject may be erroneous, but I have given it the most careful and deliberate consideration, with a full appreciation of its magnitude and the importance of the step I am about to take.

Under these circumstances, I feel myself constrained by a sense of public duty, to separate from my colleagues and retire from the Government, and now beg to tender to your Excellency my resignation of the office of Attorney General as well as my seat in the Executive Council.

I would beg respectfully to ask Your Excellency's permission to make public the reasons for my resignation.

**A. J. SMITH.**

**BOAT RACE AND FISH FAIR.**—The Campo Bello Boat Race and Fish Fair will be held at Welchpool, on the 30th Oct. inst.

The opportunity thus offered to our upcountry friends to select and purchase their winter supply of dry and pickled fish, should be improved; besides they will enjoy the sport of witnessing the Boat Race, and enjoying the "good time" which always takes place at Campo Bello on such occasions.

The St. Croix Agricultural Society's Exhibition took place on the 15th inst. Owing to unavoidable absence at St. John, we were prevented from attending, but hoped to have been in a position this week to give a list of premiums &c. We were informed that the display in grain, vegetables, dairy produce, and domestic manufactures was large and very good; and the show of horses and Stock was of a superior description, evincing decided improvement in the breeds. Would it not be a move in the right direction to appoint semi-annual meetings of the Directors of the various Agricultural Societies in the County; it would form a nucleus for farmers clubs in the different parishes, where subjects connected with Agriculture could be freely discussed, and an interchange of views upon cropping, feeding, &c., would take place, of great benefit to our agriculturists. We trust the suggestion will be acted on.

**PLANT TREES.**—There is nothing which gives so picturesque appearance as having trees planted on the side walks, it is not only an evidence of good taste but also gives a lively and rich appearance to the streets.

We are pleased to notice that there is a gradual improvement being made in this respect by several persons who have planted out trees in front of their residences. There is very little trouble or expense attending the operation, trees can be had for the small expense of hauling, and half a days work will plant as many as any one person will require; the only care required after they are set, is to protect them from being destroyed by animals running at large, and mischievous boys breaking the limbs.—Plant the trees at all events.

**MINERAL RESOURCES OF NEW BRUNSWICK.**—On our first page we have published an instructive communication from Prof. Bailey of the New Brunswick University.

To many (and they are by no means unintelligent) the information in the Professor's letter will be quite fresh and of great practical value. The explanations and directions with reference to distinguishing the various minerals and ores are at once plain and easily understood. From the letter it appears that our County—Charlotte—contains good ores of several of the metals—iron, lead, copper, zinc blende—and even gold has been discovered in this County.

We trust the letter will be carefully and extensively read.

**FROST.**—The weather has become decidedly cool requiring great coats in the mornings, and fire in workshops and houses.

On Monday afternoon the cold was felt so keenly as to indicate a heavy frost during the night: all tender plants and vines are withered—ice formed a quarter of an inch in thickness. The weather up to the present week has been unusually fine.

Large amounts have been raised at Quebec in aid of the British operatives in England. Collections have also been made in the Churches at St. John and Halifax for a similar purpose; and a Public meeting held in St. John to devise means to raise money for the same charitable intention.

Since writing the above we learn that the Sheriff of this County has been invited to call Public Meetings, for the purpose of devising means, to relieve the sufferings of the unemployed operatives in England.

The Steamer Arabian on her last trip from Quebec to Shediac, met with an accident at Riviere du Loup—one of the boiler flues collapsed, killing four men and injuring others.

We have much pleasure in stating that Second Master Vernon Jones, (third son of the High Sheriff of this County) late of H. M. S. Euryalus, and now commanding H. M. Steamship "Oberon" at Rio Janeiro is promoted to be First Master. Mr. Jones is a gentleman of fine talents, and for his age, of large experience; and should be spared will attain the highest position in the Navy. We need hardly add that St. Andrews claims the honor of hailing him as one of her sons.

**AMERICAN BANK NOTES.**—Complaints are made daily of the large quantity of American Bank Notes affixed in this County; in fact it is difficult to get any other paper—St. John or St. Stephen notes are like angels visits—few and far between.

Those who pay Western bills, should in justice receive them at the same value. A correspondent "X" is so personal in his remarks on this subject, that we decline publishing his letter.

Two fires took place in St. John yesterday morning, destroying some workshops, and injuring the neighboring dwellings. Fires of late have been so frequent in the City, that the Mayor has offered \$100 Reward as will lead to the conviction of the incendiaries.

**PROVINCIAL APPOINTMENTS.**—John M. Johnson, Esq., to be a Member of the Executive Council in place of the Hon. Albert J. Smith, resigned.

The Honorable John M. Johnson to be Attorney General of the Province, provisionally, in the place of Albert J. Smith, Esquire, resigned.

Albert J. Smith, Esq., to be one of Her Majesty's Counsel for the Province, provisionally.

James Thompson, Esq., to be High Sheriff of the County of Victoria, in place of Francis E. Beckwith, Esq.

William Caldwell to be Commissioner of Buys and Beacons for the Port of Dalhousie, in place of William McGregor deceased.

Mr. J. R. Marshall to be Chief of the Police for the City of St. John in the place of Mr. George Scollair.

We learned last night from gentlemen just arrived from Ottawa, that on Wednesday night the building occupied by the Ottawa branch of the Bank of Montreal was broken into, and that the contents of one of the safes, consisting of a very large sum in specie and paper money were carried away. This is one of the most daring robberies ever committed in Ottawa, and it seems the perpetrators, up to the departure of the cars for Montreal yesterday morning had not been discovered.—[Montreal Gazette.

**THE CELEBRATED HORSE "ETHAN ALLEN" INJURY.**—The Niagara (Suspension Bridge) Herald, of Saturday, says—"On Monday the celebrated stallion, Ethan Allen for whom the owner had but the day before refused \$3,000, while at the stock yards, took flight at the cars, and started down towards the bridge with a sulkey attached to him. At the depot, he was turned aside by a long ladder which was held up, when he came in contact with a dirt train standing there, tearing the sulkey in fragments.

Following the track, he ran on to the bridge, a cross Spring Avenue, which not being plank ed, he fell through between the stringers, bruising him very badly. This the second time that horses have been injured by running upon the same bridge; and we suggest if it would not be well to place the gates at the east end of the structure? As for \$3,000 invested in horseflesh, if we had him, we should want to keep selling him. As an unlucky scratch might cost about \$2,000, which is quite too expensive."

Among the defeated Candidates for Congress at the election in Ohio the other day, is the notorious Vallandigham, who spoke so abusively of England in the House of Representatives at the time of the Trent affair, and who has been suspected all along of being a rebel in sentiment. The fact of his defeat affords the best evidence that the people do not endorse his sentiments toward Great Britain.—[Globe.

**A ROYAL SQUABBLE.**—A Frankfort letter tells the following story about the Elector of Hesse Cassel: The other day, in his own royal theatre at Cassel, he chose to get up a quarrel with the Electress, and abuse her for something or other, the cause unknown.

The public soon found the rival attractions of the comedy in the electoral box superior to those of the legitimate boards. The louder he waxed in his wrath, the more silent became the malicious public, fearful of losing a syllable proceeding from such exalted lips. No sooner did he perceive the look of quiet gratification settling upon their countenances, than he rushed out of the royal box, dragging his consort after him by the skirts. We must suppose that his highness's modesty prevented him from responding to the thundering applause which greeted his exit."

George Grove, Chief Engineer of the Dispatch, new in New York, says the Captain made a proposition to him when the vessel was on its way from Liverpool to Nassau, to sink the ship if she was likely to be captured, but not to do so until he passed the word, so that he might be able to claim damages at the hands of the United States. The Captain had a bundle of papers rolled up in canvas and spun yarn, supposed to be misgives from Mason and Slidell to the rebel government, which were to be thrown into the sea in case of capture. The steamer went from Nassau to near Charleston, but being afraid of the U. S. fleet the cargo was transferred to two schooners, which are supposed to have succeeded in running the blockade.

**FAST SAILING.**—The Hooyland, a new vessel, (built by Wm. Muirhead, Esq., of Chatham), made the passage from this port to Liverpool, G. B., in the short space of fourteen days. This beats the voyage of the Triumph, owned by John O'Brien Esq., of Bathurst, which vessel had a splendid run of fifteen days to the same port.

The Muscongus, McMillan, belonging to Messrs. D. & J. Ritchie, arrived here on Tuesday last, after a fine run of 20 days from Liverpool. She had a large cargo on board. This is the third voyage this vessel has made to this port from Liverpool this season. This is her second vessel belonging to this firm that has made three voyages to this port the present season.—[Miramichi Gleaser.

day morning, destroying some workshops, and injuring the neighboring dwellings. Fires of late have been so frequent in the City, that the Mayor has offered \$100 Reward as will lead to the conviction of the incendiaries.

**CASE OF THE BRITISH STEAMER DISPATCH.**—New York, Oct. 8.—On Monday afternoon Capt. Buck, of the British steamer Dispatch, was arrested by the United States Marshal on two warrants—one for attempting to steal the vessel from the U. S. Marshal, and the other a warrant of attachment from Judge Betts for the sum of \$30,000.

**DEATH.**  
At Fredericton, on Sunday, the 12th inst, Annie Isabel, third daughter of the late James P. A. Phillips, aged 14 years, and 9 months.

Matanzas, Oct. 15.—arrived Brig Bachelor, Waycott, New York.

New York, Oct. 16, sailed Scher Georgiana, Hays, St. John.

Sheriff's Sales.

To be sold at public auction, on Saturday the 13th

day of December next, at 12 o'clock, noon, at

the Court House in St. Andrews:—

ALL the right, title, interest, property, claim

and demand of Angus Holmes, of, in and to

all that piece of land situated in Pennfield, in

the County of Charlotte, conveyed by Dugald Ma-

theson and Mary his Wife, to Angus Holmes, by

Deed bearing date 27th April, 1846, and granted

to the said Dugald Matheson by Letters Patent

from the Crown; beginning at a marked spruce

tree standing at the inter section of the North

Western boundary line of the grant to John Coch-

ran, with the Eastern shore of Blacks Harbour,

thence running by the magnet North 14 degrees

30 minutes East 22 chains of 4 poles each cross-

ing a reserved road to a marked fir tree on the

Bank or shore of Big Sturgeon Cove, L Tang River

thence following the various courses of the said

Shore westerly to a marked spruce tree standing

at the head of the said Cove and being at the point

of intersection of lots No. 9 & 10 thence south 70

degrees west 6 chains to a marked spruce tree on

the Bank or head of Little Sturgeon Cove, thence a-

long the head of Little Sturgeon Cove westerly to

a marked spruce stake standing on the bank of the

same and in the Eastern Boundary line of lot No. 8

thence south 20 degrees East 27 chains 50 links

crossing the aforesaid reserved road in that dis-

tance to a marked fir tree standing on the northern

shore of Blacks Harbour, and thence following the

various courses of the same easterly to the place

of beginning, containing one hundred acres more

or less, with the buildings and improvements there-

on.

The same having been seized and taken under

and by virtue of an execution, issued out of the

Supreme Court, at the suit of John Billings, en-

dorsed to levy \$162 . 11 . 9, together with Sher-

iffs fees and incidental expenses.

St. Andrews, July 13, 1862

CAUTION.

WE hereby caution all persons from trespassing  
or cutting timber on a lot of land in the  
parish of Pennfield, known by the name of "The  
Coats Farm"—Any person so trespassing will be  
prosecuted according to law,  
JAMES W. STREET & SON,  
St. Andrews, August 20th, 1862.

CHARLES HASLETT,  
CIVIL ENGINEER  
and  
DEPUTY LAND SURVEYOR.  
5th ST. ANDREWS, N. B.

DR. LAMBERT

ON SELF-PRESERVATION.

Price, with Engravings and Cases, 25 cents; by  
post thirty cents.

SELF-PRESERVATION; a popular Essay on  
Nervous and Physical Debility, resulting  
from injurious habits contracted in youth, or ex-  
cesses in maturity, which, by prematurely ex-  
hausting the functions of Manhood, destroy the hap-  
piness of Married Life, or prevent the fulfilment  
of engagement that constitute the most cherished  
objects of existence.

By Dr. LAMBERT, 37 Bedford square, London,  
Licentiate of the Royal College of Physicians of  
Edinburgh;

Member of the Royal College of Surgeons, Eng-  
land, &c.

The above work contains most useful and in-  
teresting information on the physiological changes  
which occur in the Reproductive System during  
the periods of youth, puberty, and manhood; and  
on the due attainment of that degree of functional  
vigour upon which the hopes of posterity depend.  
It also points out how all the tributes of Man-  
hood can be preserved to advance period of life,  
how they are lost, and how they can be recovered.  
It is free from the gross exaggerations, alarming  
descriptions, and dangerous remedies so generally  
resorted to by persons, who, practising with false  
medical qualifications, inflict most serious injuries,  
and render judicious treatment frequently abortive.

The Author is the only legally-qualified prac-  
titioner whose name stands on the Medical Regis-  
ter (the sole test of medical qualification), who  
has been extensively engaged for a series of years  
in the treatment of the various functional disor-  
ders of the nervous and reproductive system,  
which, owing to the great discoveries of modern  
science, are rendered subservient to a rational,  
simple, and easy mode of treatment.

At home for consultation daily from ten till two,  
and from six till eight, either personally or by  
letter,—37 Bedford Square, London, England.

Patients residing in the colonies can be success-  
fully treated by correspondence, and remedies can  
be forwarded in secrecy and safety to any address.

"SELF-PRESERVATION"  
may be had of the undermentioned Agent—price  
25 cents, free by post, 30 cents:—

HALIFAX, N. S.—Mr. E. G. Fuller, Express  
Agent.

YARMOUTH, N. S.—Messrs. Young and Bak-  
ker, Booksellers.

50 do Extra do " "  
March 29. J. W. STREET & SON.

Blackwood's Magazine  
AND THE  
British Reviews.

L. S. COTT & CO., New York, continue to

publish the following leading British

Periodicals, viz:—

I.—THE LONDON QUARTERLY (Conservative.)

II.—THE EDINBURGH REVIEW (Whig.)

III.—THE NORTH BRITISH REVIEW (Free Church)

IV.—THE WESTMINSTER REVIEW (Liberal).

V.—BLACKWOOD'S EDINBURGH MAGAZINE (Tory).

The present critical state of European Affairs  
will render these publications unusually interest-  
ing during the forthcoming year. They will oc-  
cupy a middle ground between the hastily written  
new-iten, crude speculations, and flying rumors  
of the daily Journal, and the ponderous tomes  
of the future historian, written after the living in-  
terest and excitement of the "great political  
events of the time shall have passed away. It is  
to these Periodicals readers must look for the only  
really intelligible and reliable history of current  
events, and as such, in addition to their well-es-  
tablished literary, scientific, and theological char-  
acter, we urge them upon the consideration of the  
reading public.

EARLY COPIES.

The receipt of ADVANCE SHEETS from the British  
publishers gives additional value to these reprints,  
inasmuch as they can now be placed in the hands  
of subscribers about as soon as the original edi-  
tion.

FEVER AND AGUE,

FEVER AND AGUE,

THE OXYGENATED BITTERS,

THE OXYGENATED BITTERS,

This remedy is just what is required to be,—a "remedy  
for Dyspepsia." Though containing no alcohol, yet it ut-  
ters its virtues in any climate. It is highly commended,  
—a testimonial to its purity, is a number of water certificates  
from the most reliable sources. Among all the remedies ever discovered for these  
prevailing and obstinate complaints, there is none which  
ever wrought such great and permanent cures, or which  
was so pure as to be given to the most delicate of patients,  
and a permanent cure speedily follows.

From a highly respected Physician to the Hon.

SOUTH FARM, Me., Dec. 20, 1860.

Messrs. E. W. FOWLE & Co.,—Gentlemen: For  
several years past I have had a knowledge of the use  
of the OXYGENATED BITTERS in some cases,  
of Dyspepsia and General Debility. They have generally  
given satisfaction, and sometimes have effected a perma-  
nent cure where other remedies had been used without  
benefit. I do not hesitate to recommend them.

Respectfully yours,  
WILLIAM A. RUST, M. D.

THE OXYGENATED BITTERS

THE OXYGENATED BITTERS

Letter from Dr. Wm. Foster, Eng.

STOVEDALE, N. H., Sept. 20, 1860.

Messrs. E. W. FOWLE & Co.,—Gentlemen: I was  
for many years, a great sufferer from DYSPEPSIA of  
WATERBURY, and tried almost everything within my  
reach, but to no benefit, until I was induced by the re-  
commendation of my physician, Dr. Hamilton, to make  
use of the OXYGENATED BITTERS. The first bottle  
produced a slight alteration in the disease, and had  
it not been for the urgent request of my physician I  
should have discontinued their use, thinking them  
to be of no avail; but his confidence inspired me to  
persevere, and after using to the extent of half a doz-  
zen bottles, I had entirely regained my health. I hope all  
dyspeptic persons will be induced to give them a fair  
trial, being confident that this remedy is the most im-  
portant, for the various forms of DYSPEPSIA, that has been  
produced. Yours,  
STEARNS FOSTER
