The publication of this journal is in response to the imperative demand of the investor and capitalist. The marked advance in the progress of lode mining in the southern interior of British Columbia, is worthy of especial mention. The present indications are that the output of ore in the two districts of Kootenay, east and west, and the separate district of Yale will at the close of the present year amount to HALF A MILLION OF TONS of gold-copper and argentiferous lead ores, the value of which will certainly not be less than TEN MILLIONS OF DOLLARS, which the province will contribute to the wealth of the world. The volume which this industry will reach within five years is not easily foretold, but it will certainly be something of which the friends of British Columbia's mining interests may justly feel gratified, if the past be a criterion.

OUR MINERAL INDUSTRY.

There were produced in East Kootenay generally for the four years from 1896 to 1899 inclusive, 5202 tons of ore 3004 ounces of placer (valued at \$60.076), 295,376 ounces of silver valued at \$177,357, and 397 pounds of copper, value \$69; 7,740,285 pounds of lead, value \$280,623. The entire total of the 5202 tons as above, including the placer gold amounted to \$507,885.

In 1897 the value reached its highest mark when it was \$163,796. In 1899 it was \$66,294.

In West Kootency taking the statistics by the various mining division which comprise this district, for the same period we have Ainsworth with an output of 11,054 tons of ore valued at \$,1,234,902; Nelson, with an outturn of 191,137 tons valued at \$2,908,799 inclusive of 275 ounces of placer valued at \$5500.

Slocan had an outturn of 102,325 tons valued at \$9,494,821.

The production in Trail Creek division Rossland mines was 390,826 tons valued at \$8,950,487.

Revelstoke, Trout Lake and Lardeau for the same period had an output of 2754 tons of ore valued at \$263,240 exclusive of placer.

Next comes Yale which is a separate district and adjoins West Kootenay on the west. Osoyoos mining division of Yale district had an output of 33,952 tons valued at \$871,381. Similkameen mining division shows only an output of one ton of ore, but it produced from its placers 2333 ounces of gold valued at \$48,269, and Yale mining division which is another subdivision of Yale district and includes Kamloops and Ashcroft produced only 533 tons of ore, but it yielded 12,067 ounces of placer gold valued at \$29,719.

The entire total of ore produced from East and West Kootenay and the district of Yale for the four years named amounted to 737,885 tons valued at \$24,177,417.

Retrospectively it may be added to this summary, that East Kootenay's ore during the above named period produced 295,376 ounces of silver valued at \$177,358; 7,740,285 pounds of lead valued at \$280,023, and 397 pounds of copper valued at \$69.

Ainsworth subdivision produced from its ore in the same period 1,328,987 ounces of silver valued at \$808,668: 12,296.703 pounds of lead valued at \$433,632 and 203 pounds of copper valued at \$24.

Nelson's ore contributed 2,769,110 ounces of silver valued at \$1,665,-141; 7291 pounds of lead valued at \$261, and 9,017,161 pounds of copper valued at \$739,614.

Slocan added to the world's wealth in addition to its return of gold 10,555,218 ounces of silver valued at \$6,255,659; 92,607,284 pounds of lead valued at \$3,230,884.

Trail Creek division (Rossland mines) added to the wealth of the world in addition to the value of its gold 555,975 ounces of silver valued at \$325,363 and 14,326,121 pounds of copper valued at \$1,786,851.

Yale district (Grand Forks and Kettle River division) produced 3893 ounces of silver valued at \$2241, and Yale subdivision, Ashcroft and Kamloops, produced 16 ounces of silver valued at \$9.

The gold production of these two districts—West Kootenay and Vale (East Kootenay being already given) by subdivisions during the four years ending 1899 amounted to. Ainsworth 91 ounces valued at \$1888; Nelson 22,704 valued at \$2,769.110; Slocan 419 ounces valued at \$8378; Trail Creek 342,618 ounces valued at \$6,919,273; Revelstoke Trout Lake and Lardeau 508 ounces valued at \$10,239; Vale district 42.145 ounces \$850,208 being a total of 408,485 ounces valued at \$10,-559,087. Vale 2333 ounces valued at \$46,600, and Vale subdivision (Kamloops and Ashcroft 12,067 ounces valued at \$259,348.

The total of placer gold by districts was East Kootenay 3004 ounces valued at \$60,076; West Kootenay 1383 ounces valued at \$27,667; Vale, Grand Forks and Kettle River, 1002 ounces valued at \$20,032; Vale, subdivision of Ashcroft and Kamloops, 12,967 ounces valued at

THE BULLETIN.

\$259.348, being an entire total of placer gold of 18,356 ounces valued at \$373,123. The output of the present year 1900 has not been included in this summary. The figures for the first ten months of the present vear are available and an estimate quite conservative in character. places the output for ten months ending October 31, at 347,000 valued at seven and one-half million dollars for East and West Kootenay and Vale districts.

Cassiar, Cariboo, Lillooet and the ing 6611 ounces of gold valued at coast for 1900 is added to that of \$136,581; 27,929 ounces of silver the southern interior (Kootenav valued at \$15,827 and 791,303 and Yale) for the same period, the pounds of copper valued at \$127,increase in the tonnage may be un- 000. important. but the increase in the total valuation is found to be ma- pitulated as to value, Cariboo terial. data to present even an approximate looet \$157,212. The Coast and for this year but the investing public other districts \$279,475, being a can be assured that the figures when total of \$2,617,152. If the tonnage The placer returns from the outly- be added to that of the Kootenays ing districts from time to time seem and Yale, already given, the total to justify this anticipation.

Cariboo's contribution to the wealth of the world for the four vears from 1895 to 1899 amounted to 74,016 ounces valued at \$,475,-200.

Cassiar produced 49,237 ounces valued at 984,740. The yield in both cases was from placers.

ore which produced 1678 ounces of mation bearing on this phase of our gold valued at \$34,418. There were also produced from the placers 6139 ounces of gold valued at \$122,794, making a total valuation this in the next number of this of \$157,212 for this district.

The coast and other districts. Nanaimo, Alberni, West Coast of Vancouver Island and Victoria, next number of the BULLETIN.

When the mineral production of produced 16,350 tons of ore yield-

These figures may thus be reca-At present we have not the \$,475,000, Cassiar \$884,740, Lilpresented, will be very gratifying. 19,562 tons and value \$2,617,152 for the province will be found to be 757,447 tons of ore valued at \$26,-794,569, the value being from all mineral products-and the tonnage being exclusive of placer ounces.

We present in this issue all the statistical information with regard to production which we have been able to obtain in time for the present number. We have endeavored Lillooet contributed 3212 tons of to obtain much interesting informineral indusiry, but we could not obtain it in time for publication in this first number of the BULLETIN. We hope to be in a position to do journal.

> PUBLISHERS' NOTICE.

After January 1 the BULLETIN will be issued regularly every Saturday. In the meantime it will appear as often as the importance of the mining news it has to communicate justifies.

The BULLETIN is published in response to a demand made by the investor and capitalist and it recognizes the great necessity of giving

full and accurate information re-Devoted to the Minoral Industry of British specting the phenomenal growth of the mineral industry of this resourceful province.

> The relation of contract to personal freedom is an important economic question which has its advocates and opponents.

> > -----

Contracts are agreements of economic significance which are enforceable by public authority, and a man cannot make a contract with himself. ----

In recent years there has been a strong effort on the part of organized labor to pass from individual contract to group control, otherwise known as collective bargaining.

Vested interests are defined by Richard T. Ely a pecuniary interests which are legally required to be such hat they cannot be enforced by public action without indemnification. Vested interests generally arise through property and contract. In addition to these there are others which will hereafter be defined.

Workingmen, have often claimed that they have a vested interest in advantages which their acquired skill gives them, and if through industrial changes their skill ceases to be of value they ought to be indemnified. This claim so far has not been allowed.

PRODUCTION IN 1900.

Ore 347,000 Tons Valued at \$7,-500,000.

production of gold-copper and argentiferous lead ores for the first ten months of the present year in the districts of East and West Kootenay and Yale. This is a very conservative estimate, and there are good reasons for now believing that the output for the whole of the presant year in the same districts will amount to one half a million tons, valued at ten million of dollars. This too is a conservative estimate, and it shows that while our gold-copper ores have declined production has increased very much That for the year 1900 will amount ore from Rossland mines for the to 40 per cent of what it was dur- 10 months and 24 days ending Noing the four years from 1896 to vember 24, amounted to 195,425 1899, while the total valuation for tons valued at \$3,126,800 gross. 1900 is about 5-12 of what the total Theshipments of ore from Rossland valuation amounted to in the four for the whole of 1899 amounted to years already named.
