## OFFICIAL NOTICES.

### SUMMER VACATION.

Attention is directed to the following revised Regulations of the Council of Public Instruction respecting Summer Vacation in the Public Schools.

1. The vacation for the present year will begin on Saturday, July 13th, and, except as hereinafter provided, the schools will re-open on Monday, August 12th.

2. Except in the case of schools closed from July 8th—12th, in order to enable teachers to attend the annual session of the Provincial Educational Association, trustees may at their discretion add to the vacation above provided, another week, re-opening their schools on Monday, August 19th; but to obtain credit for such extension due notice thereof must be given in writing to the Inspector of Schools.

3. In all incorporated and county towns, the schools will not re-open until Monday, August 26th, and the same extension of vacation will be granted to all other towns with schools embracing at least four departments, and whose Trustees shall signify to the Inspector of Schools in writing their intention to claim it. Provided, however, that in reference to such of the schools referred to in this section as have been closed from July 8th—12th, to enable teachers to attend the Provincial Educational Association, Monday, August 19th, shall be substituted for Monday, August 26th, as the date of re-opening after vacation.

**ADDITIONAL HOLIDAYS.**—To enable teachers more conveniently to aid Trustees in preparing returns for transmission to the Inspector, the Council of Public Instruction has been pleased to order

that hereafter "the 30th of April and the 31st of October shall be holidays in the Public Schools, and when either of these days shall fall on Saturday or Sunday, the preceding Friday shall be a holiday." At the request of the Board of School Commissioners, the Public Schools of the City of Halifax are excepted from the operation of this Regulation.

**SATURDAY AS A TEACHING DAY.**—The Council of Public Instruction has ordered that to existing regulations defining the limits within which school may be kept on Saturdays (see Manual page 70), there shall be added the following: "Provided that nothing contained in these Regulations shall prevent a teacher from teaching on Saturdays in order to make up for *not more than two teaching days* necessarily lost at the beginning of the term in travelling from a distant section in which he (or she) had been previously engaged."

**TEACHING DAYS.**—The number of Teaching days for the current term, closing April 30th, is 116.

The number of Teaching Days for the ensuing term, beginning May 1st, is 110.

### EXAMINATION FOR TEACHERS' LICENSES.

These examinations will begin at 9 a. m. on Tuesday, July 16th. They will be held at the usual Stations throughout the Province. Candidates will particularly observe that their applications for admission for examination are to be forwarded to the Inspector of the District in which the Station at which they wish to be examined is situated, and not to the Deputy Examiner of the Station, if he be not the Inspector. Printed forms of examinations (though not required) may be obtained from the Inspectors after May 1st. The place entered in the form of application should be that to which the candidate wishes his certificate of admission to examination to be mailed. The revised Regulations of Council (re-published in this number of the JOURNAL) should be carefully read by intending applicants. Candidates will take notice that in all cases the questions on Professional subjects will be set in accordance with the provisions of the Syllabus of Examination as published.

**COUNTY ACADEMY RETURNS**—In addition to the special returns to Education Office, Trustees will send the usual returns to Inspectors. In no case should drafts for County Academy grants be drawn on the Superintendent of Education without previous authorization.

**SPECIAL GRANT TO GRADUATE TEACHERS**—By a recent minute the Council of Public Instruction has ordered that "any Grade A teacher proposing to claim special grant referred to in Section 10, of 'Act to encourage Academic Education,' and No. 16 of 'Regulations relating to County Academies and Graded Schools,' shall, within three weeks of the opening of the Term, notify the Inspector of the District in writing of his intention to qualify for such claim, and to present at the terminal inspection the required number of High School pupils."

**TRUSTEES' RETURNS.**

As the Act passed at the Session of 1887 for the further regulation of teachers' grants has come into operation, trustees and teachers will find it to their interest to have their returns placed in the hands of the Inspectors at the earliest possible moment.

The Department of Education will not be in a position to take a single step towards the distribution of grants, until complete sheets from every County or District have been received. To prevent general inconvenience and loss from the negligence of individuals, the Inspectors are instructed to report on such returns as shall have come to hand on the 7th of May (or November.) Delayed returns run the risk of postponement until the next terminal distribution. In reply to inquiries, it may be stated that it is impossible to predict the exact date at which teachers may expect to receive their grants under the new arrangement. A general assurance is given that no unnecessary delay will take place. As a careful collation of the returns from the entire Province is now necessary, involving calculations both minute and extended, payments need not be expected at dates as early as these at which grants have heretofore been paid in some Counties sending in prompt returns. Still it is hoped that with due promptitude on the part of all officials concerned, the grants will be ready for distribution about the average time of previous payments.

**ANNON D. V.**—To encourage the proper adornment of school grounds, and thereby a cultivation of a taste for the beautiful in nature on the part of the pupils, the Council of Public Instruction has ordered the publication of the following Regulation:—

'On such one of the first thirty teaching days of the summer term, as according to season, weather, or other circumstances may be deemed most suitable, Trustees are authorized to have substituted for the regular school exercises of pupils, the planting by the latter of trees, shrubs and flowers on the grounds surrounding the school house. The day devoted to this purpose shall be known and entered in the Register as 'Arbo Day,' and when duly observed full credit will be given for it in the apportionment of public funds, on the basis of the actual attendance of pupils as ascertained by roll call at the beginning of the exercises, or other convenient time during their progress. Additional value and interest should be imparted by mingling with the practical duties of the occasion short addresses from the teacher and other competent persons on the æsthetic and economic importance of arboriculture. During their summer visitation, Inspectors shall take note of all schools in connection with which 'Arbor Day' has been observed."

There will be found subjoined some practical suggestions which will be serviceable to those who wish to make the occasion a really profitable one. A day—(this year Monday, May 6th)—has been fixed by the Maritime Provincial Grange as an "Arbor Day" within the jurisdiction of that body, for the purpose of impressing on the public mind the importance of restoring and preserving our forestal resources. Where the season suits, there might appropriately be a co-operation of the Grangers and the school authorities.

In selecting trees, it is well to avoid those that bear flowers or edible fruits, as such in the showy and fruiting season are apt to meet with injury from ignorant or mischievous passers-by, and to offer temptation to the pupils. Butternuts and Horse Chestnuts are not to be commended as shade trees. The Balsam Fir is objectionable from the liability of its balsam to stain the hands and clothing. Deciduous or broad-leaved trees are easily grown, their fibrous roots rendering transplanting a comparatively simple operation. If care is taken the young saplings of the elm, maple and ash, as found in the under growth of the forest, can be transplanted without difficulty.

No school grounds should be without a suitable number and variety of the standard deciduous trees. However, during the winter season they are bare and unattractive, and afford little or no shelter. On the other hand, evergreens, such as Spruces, Pines, Hemlocks and Cedars, retain their foliage and provide a shelter as useful in winter as it is grateful in summer. Trees should always be planted according to a definite plan, being arranged either in curves or straight lines, according to circumstances, and with an obvious relation to the building and fences. They should never be placed so near the school house as to interfere with the free play of light and air.

Our native trees grow so freely in the woods that we are apt to suppose that they are merely to be taken up by the roots and transplanted, to start at once into as vigorous growth as before. This is a mistake. Great care should be taken in digging up the trees to preserve the fibrous roots; long runners should be cut across with a sharp knife, and not torn. All trees thrive best in well-drained soil, varying from sandy loam to clay. A clay loam suits all descriptions. The holes for the trees should always be made before the trees are brought on to the grounds. They should be too large rather than too small. In filling in, the better soil from near the surface should be returned first, so as to be nearer the roots, but where the soil is at all sterile, and generally, there should be put below and around the roots, some well-rotted compost, mixed with sand and sandy loam, in order to promote the growth of the rootlets. In setting the tree it should be placed a little deeper than it stood before, and the roots should be so spread out that none are doubled. When finally planted the tree should be tied to a stout stake in such a way as to prevent chafing of the bark. Some mulch or stable litter should then be thrown around the stem to protect the roots from drought. Stirring the ground is preferred by some cultivators to mulching. In transplanting evergreens, the roots should not be exposed to air or light—especially to the heat of the sun—more than can be helped.

Several varieties of shrubs planted together in clumps produce a very pleasing effect, while the care of judiciously arranged flower beds will be to the children an important means of education.

## TEXT BOOKS.

*Comment.*—In performing the duty of selecting and prescribing text-books for the Public Schools, the Council of Public Instruction has availed itself as fully as possible of the knowledge and experience of those who are engaged in the practical work of education. The sole aim of recent modifications has been to secure, at reasonable cost, a series of texts, adapted for use in schools. Change in authorized books is in itself a very undesirable thing; and it is hoped and believed that matters may remain where they are now for years to come, without substantial alteration.

The general effect of recent changes has been to largely and permanently reduce the cost of text-books, especially to pupils pursuing an extended course. The Council is engaged in inquiries and efforts with a view to still further diminish expense by securing, wherever practicable, a lowering in price and an improvement in the mechanical quality of the prescribed texts.

Inspectors and teachers are reminded:

1. That the Course of Study for Common Schools encourages an economical expenditure for text-books by providing a system of oral instruction for junior classes. Too many teachers try to satisfy themselves in respect to their more youthful pupils by placing in their hands text-books not needed in any case, and worse than useless when unaccompanied by proper oral exposition. A text-book should not be required for a child until he is prepared to use it intelligently.

2. That the regulation which makes it illegal and improper for a teacher to introduce unauthorized texts, by no means hinders him from giving his pupils the benefit of other treatises to whose explanations he may attach importance. The progressive teacher will always have such aids within reach, and will so use them as to impart variety and interest to his instructions.
