THIS ARTICLE REMOVED

Mrs. Jacob Schmidt is visiting relatives in Detroit.

Miss Helen Sauer of Toronto is home for the week.

Mr. Wm. Connell visited relatives in Carrick this week.

Mr. Will Rupp of St. Thomas spent a few days this week at Mr. Wm. Voigt's.

Listowel defeated Walkerton junior W.F.A. team by one goal on the round.

Deemerton football club defeated Otter Creek last week by a score of 6 to 1.

Mrs. S. Carter of Guelph is the guest of her daughter, Mrs. (Rev.) A. MacGowan.

The Durham grist mill was destroyed by fire on Monday evening of this week.

Harold Sutcliffe of Chesley, formerly of the local bank staff, was in town on Tuesday.

Miss Annette Wyler of Toronto was the guest of Mr. and Mrs. A. J. Keelan during the past week.

Misses Vera and Mary Wyers of Mt. Forest are guests of Mr. and Mrs. J. A. Johnston this week.

Mr. and Mrs. Christian Werner of Sebringville visited their daughter Mrs. Jos. Filsinger, this week.

Messrs. Norman Kutz and Jonas Sprenger wheeled down to Moorefield on Sunday to visit friends.

Help the Stars to get into the Intermediate W.F.A. final by attending the big game here on Thursday evening.

Purity Flour—We have taken the agency for Purity Flour. Shipment coming in next week. Try a bag. Weiler Bros.

Mildmay will observe next Monday, August 3rd, as its Civic Holiday. Reeve Fedy has proclaimed the day a public holiday.

Mr. and Mrs. Jos. Drumm and Mr. Harold Welds of Toronto motored up and spent part of the past week at Mr. Jos. Haezle's.

Mr. and Mrs. Spanton of Toronto are visiting relatives and friends at Belmore. Mrs. Spanton is a daughter of the late Mr. and Mrs. Robt. Curle of Carrick.

Mr. and Mrs. J. E. Litchfield, of Cleveland, Ohio, who are on a two month's tour through Eastern and Western Ontario, visited at the home of their cousin, Mrs. G. H. Eickmeier, this week.

The next meeting of the Jr. Farmers and Jr. Institute will be held on Thursday, August 13, at the home of Mr. and Mrs. Andrew Schmidt, Elora Road, near Mildmay. This will be a joint meeting with the members from Walkerton and an interesting programme is being prepared.

Mr. Patrick Brown, of Clifford, who formerly operated the sawmill in that village, passed away on Thursday morning, aged 79 years. Mr. Brown formerly owned a bush farm on the third concession of Carrick. His funeral on Sunday afternoon was largely attended.

Henry Schnurr had a spring lamb worried by dogs on Sunday.

Mrs. Jos. Kunkel is visiting her daughter in Waterloo this week.

Oranges—Sixty dozen to clear at 29 cts. a doz. at Weiler Bros.

Mrs. Ellen Connors of Walkerton visited her sister, Mrs. Butler, here this week.

Messrs Eugene and Edward Fischer of Detroit are home on a two week's vacation.

The game of the season—Milverton vs. Mildmay in the Mildmay park on Thursday evening.

Owen Sound tied Listowel, 1 all, at Listowel on Monday evening in the senior W.F.A. semi-finals.

Miss Norma Skilling and Mr. Ray Jackson of Toronto visited at Mr. F. W. Harper's last week.

Misses Madeline and Winnifred Schuett, professional nurses, of Detroit, are home on their vacation.

Mrs. E. R. Hogate and daughter, Jean, of Detroit, are guests of her parents, Dr. W. H. and Mrs. Huck.

Dr. and Mrs. M. T. Bechtel and two children of Elmira are visiting relatives and friends here this week.

Berries Wanted—Bring us your tame and wild raspberries. Price: Wild 8c lb.; Tame 12c lb. Weiler Bros.

Miss Hattie Long of Walkerton has been engaged to teach at Otter Creek at a salary of 1100 per annum.

Don't fail to attend the dance in the town hall, Mildmay, on Thursday evening of this week. Auspices of the Football Club.

Mrs. J. G. Hossack and son, Donald, of Toronto, are spending a couple of weeks at the home of Mr. and Mrs. August Weiler.

Miss Agnes Johnston, commercial teacher in the Ottawa Collegiate, spent a few days this week with Mildmay and Carrick relatives.

Mr. F. H. Elliott of Toronto accompanied his sister, Miss Sarah J. Elliott to Mildmay on Tuesday and spent a short time visiting friends here.

Mr. and Mrs. A. F. Scheffer and two daughters and Miss Evelyn Scheffer motored to Kitchener last Friday and spent the week-end with relatives.

The new McCormick-Deering threshers, recently sold by C. J. Koenig to Alphonse Zettel of Culross, arrived at Walkerton station this week.

Mr. and Mrs. E. G. Arens and two daughters of Orillia and Mrs. McIvor and Mr. Wenkel of Port Elgin spent Tuesday at the home of Mr. Henry Ruetz.

Mrs. Davidson and her two children, of Boston, spent part of the past week with her sister, Mrs. Deig, and other relatives on the 2nd concession.

Jacob Palm has purchased Mildmay's steam fire engine from the Bickle Fire Engines Limited of Woodstock for \$60. He will take off the suction hose, gauges and wheels and scrap the balance.

Herrgott Bros. are meeting with very encouraging success in their selling campaign. Contracts were closed last week for five threshing separators, and it is almost certain that this firm's big stock will be almost cleaned out before the threshing season opens.

Mr. Jos. J. Stroeder of Marysburg Sask., writes us under date of July 19, and says that crops in that section are very heavy, but there is a great shortage of help to take the crop off. If the weather remains favorable, the binders will be operating in about two weeks.

County Overseer Kreutzwiser is doing what looks like a good job on Absalom street. This street, which forms the connecting link between the county and provincial highways, has been graded up and gravelled. The two hills west of the railway track will also be cut down.

Representatives of the Clifford and Tara Councils were here last Thursday witnessing the demonstration of the new gasoline pumper. We understand that the Tara men were very favorably impressed, and practically closed a contract for the purchase of a type 12 machine.

Mr. and Mrs. Ed. Esbach and son of Belleville visited relatives and friends in Mildmay and vicinity. Ed. Esbach is a member of the firm of Hanna & Co., hardware dealers, the senior member of which is Mr. Geo. Hanna who won such a noticeable Liberal victory recently in Hastings county.

Sunkist Oranges. Special 29 cts. a doz. Weiler Bros.

Boost the football club by attending the dance in the town hall this (Thursday) evening.

Flour—We are selling Cream of the West, Purity and Hanover Flour. Also Bran, Shorts, Middling Weiler Bros.

DON'T FORGET—There is a large assortment of fancy cakes, tarts, cookies, etc., at Keelan's Bakery for the week-end.

Mrs. N. Essenburg and son James of Holland, Mich., and Mrs. H. Beld and sons, Virgil and Cameron, and Mrs. Kirkton of Grand Rapids, Mich., motored to Carrick and are spending a couple of weeks with relatives on the 14th concession. Messrs. Essenburg and Beld were born in Carrick, being daughters of the late Mr. George Gress.

The marriage of Miss Elizabeth J. Berry, eldest daughter of the late Mr. and Mrs. William Berry, of Mildmay, to Mr. J. H. Lightfoot of Montreal, took place at Vancouver, B. C., on Wednesday July 29th. Miss Berry has been Household Science Supervisor of the Vancouver Public Schools for some years. Mr. and Mrs. Lightfoot will reside in Montreal.

Bees for Sale. Six hives of bees, an extractor and a lot of supplies for sale. Apply to John Diebel.

Tall Oats. Mr. John D. Bell of the 14th concession sent in a few stalks of Banner oats, taken from his field, which measure 6 feet, 4 inches in height. Mr. Bell has a remarkable crop of oats this year, and says the whole field will average nearly six feet in height.

Plowing Match for South Bruce. Mr. T. H. Jasper attended a meeting at Teeswater on Thursday, when the matter of organizing a plowing match for South Bruce was discussed. At present a plowing match is held annually in North Bruce, and it has been definitely decided to hold a similar contest in South Bruce, if sufficient financial support can be secured. Each rural municipal council is asked to donate toward this worthy purpose.

Conservatives Call Convention. The South Bruce Conservatives will hold a convention at Teeswater on Friday afternoon of this week, when a candidate will probably be selected to contest the riding at the next federal election. Two names are prominently mentioned—Dr. Fowler of Teeswater and F. W. Lippert of Walkerton. Teeswater is boosting hard for its man, but it is thought that if Mr. Lippert wants the nomination it will be given to him.

Gravelling Contracts. Carrick Council will let the following contracts on Saturday afternoon, August 1st:—Gravelling 80 rods opposite lot 32, Con. A., (townline north of Formosa) at 2 o'clock; Gravelling 50 rods opposite lots 28 and 29, Con. A. (Formosa) at 3 o'clock; Gravelling 150 rods on 20th sideroad, Con. 10 and 11, at 4 o'clock (This contract will be let at the corner.) Gravelling 100 rods opposite lots 28 and 29 Con. 3, at 5 o'clock.

Mildmay 1; Milverton 0. The Mildmay Stars were fortunate to win their first game in the second round W.F.A. semi-finals at Milverton on Monday evening. Milverton players are nearly all big, husky fellows, and during the first half of the game, when the wind and sun favored them, they looked to be altogether too much for our fellows. Chas. Wendt in goal was called upon to stop some difficult shots, including a penalty kick, but he saved on every occasion. In the second period, however, with this handicap removed, the Stars came to life with a vengeance, and went after their opponents in proper fashion. A nice piece of combination play, in which Filsinger, Buhlman and Schwalm figured, resulted in a goal for Mildmay, the latter passing the Milverton defence and drilling thru the only tally of the evening. Much of the credit for holding Milverton scoreless is due to George Scheffer at centre half. George was exceedingly fast and effective, and had no superiors on the field. The Stars all put up a great game in the second period, and came very close to scoring several times. Jas. Neath of Owen Sound refereed, giving pretty general satisfaction. Twenty-five Mildmay fans accompanied the team to Milverton. Mildmay's line-up—Goal—Wendt; Full Back—Kunkel and Schnurr; Half Back—Schneider, Scheffer and Ellig; Centre—Buhlman; Left Wing—MacGowan and Kaufman; Right Wing—Filsinger and Schwalm.

PROCLAMATION

In compliance with a resolution of the Town Council at the request of a number of citizens, I hereby proclaim Monday, the 3rd day of August, a Civic Holiday, and ask all loyal citizens to observe the same.

Alex. Fady, Reeve

Mildmay Council

The Mildmay Council will meet on Friday evening, July 31st, at 7.30 in the Forester's Hall, for the transaction of general business.

Public School Meeting

A meeting of the ratepayers of Mildmay Public School will be held in the school on Wednesday, August 5th, at 10 o'clock, to elect a trustee to complete the unexpired term of office of Mr. W. J. Lewis, who has resigned. E. V. Kalbfleisch, Sec.

Standing Crop Winners

The following are the winners in the Carrick Agricultural Society's standing crop competition in wheat: J. A. Tolton 91½ points; J. Holm 81; Jos. Goetz 90; W. A. Tolton 88½; And. Schmidt 88; Nick Darrer 87½; Alex. Fischer 86½. Jas. H. McKee of Shelburne was the judge.

Prizes for Patrolmen

A former Carrick man has donated \$5, and asks that the Council put up another like amount, to be used in prizes for patrolmen in this municipality. He suggests that there be three prizes, \$5, \$3 and \$2, to be awarded to Carrick patrolmen whose work is of the first rank. The idea is a good one.

Milverton Here on Thursday

Local football fans will have an opportunity on Thursday evening of this week to see the fast Milverton team in action against the Stars in the second round W.F.A. semi-finals. Milverton defeated the strong Holstein team decisively in the first semi-final round, and will make a determined effort to defeat the Stars to-night. The game should attract an immense crowd, owing to the fact that the winners will go into the intermediate finals with the winners of the Kitchener-Tavistock game. Game, called at 6.15 sharp.

Mildmay's Fire Protection

The installation of a Bickle Gasoline pumping engine by the Mildmay Fire Department has given the village a greatly increased measure of protection. The new machine was given a thorough test last Thursday afternoon, and its performance was even greater than the manufacturers claimed for it. The pumper is propelled by an eighty-five dual ignition engine, which is easy to start, and develops wonderful power. By an actual test, the machine pumped 626 gallons per minute, with a pump pressure of 120 lbs. Throwing the stream over the cross on the R. C. church was the most spectacular test made. The water was brought from Witter's pond, a distance of 1350 feet, with a lift of thirty feet, and thrown clear over the high tower, a height of 125 feet. This was done with the engine in second gear, and a pump pressure of 300 lbs. Mildmay has now an up-to-date and efficient fire protection at a moderate cost. Ten year debentures, providing for an annual payment of \$453.26 of both principal and interest, have been issued. The Mildmay Council is to be commended upon its action in providing the village with such an effective fire fighting appliance.

Formosa Won

In an interesting softball game here last Thursday evening Formosa defeated Mildmay by a score of 16 to 7. The locals led all the way until the seventh inning, when they blew up, allowing the visitors to bring in a dozen runs. Mildmay is developing a number of fast players who will give a good account of themselves soon.

FOOTBALL TO-NIGHT (Thursday)

MILVERTON vs. MILDMAY

In The Mildmay Park
Game called at 6.15 sharp
Everybody come and cheer the Stars to victory

MOLTKE.

The farmers are all busy cutting wheat these days.

"Fire! Fire!" was the call that came to our ears on Sunday night about 10.30 p.m. Fire, of a mysterious origin, completely destroyed the barn of Con. Rahn, farmer, near Moltke. It seems the Rahn family had already gone to bed when a noise like a thunderbolt was heard. On arising, some parts were already in flames. However, the horses were saved and also the cows, which were out. The calves and some pigs were burned. Although help came almost instantly, very little could be done except to save the driving shed. This was saved with much carrying of water. It is a sad loss of most of the implements were also burned as the driving shed was being repaired, and the insurance is not great. In all Moltke's years, never were there so many cars and people present. The barn was insured for \$1000 and the contents for \$800 in the Germania of Normanby.

Some of those who attended the Waterloo Tattoo on Friday night were: Mr. and Mrs. Fred Baetz, Mr. and Mrs. Wm. Weigel, Mr. Con. Schaus, Mr. and Mrs. Reuben Kuhl, Mr. and Mrs. Wm. Baetz, Mr. Harry Baetz and Mrs. Ed. Holm, Misses Selma Schenk, Frieda Baetz and Lovine Fischer and Messrs. Alvin Schenk, Dave Hill and Hy. Fischer. They all report a good time.

We are sorry to report the illness and operation of Mrs. Ed. Peter who is at present in Hanover Hospital. Her many friends wish her good health again.

St. Paul's Lutheran Church will celebrate their Missionary Festival on Sunday, August 2nd. Special speakers have been arranged for and also special music. Everyone is cordially invited.

Miss Carrie Koch, of Toronto, spent the week-end at Mrs. Hy. Fischer's and Wm. Kuhl's.

Mr. and Mrs. Jno. Kuhl of Elmira spent Sunday at Con. Kuhl's.

Mrs. Anna Otterbein of Hamilton is visiting at Mr. Jno. Goessel's. Mr. and Mrs. Wm. Zinter of Niagara Falls called at the Goessel home one day last week.

Mr. and Mrs. Ed. Baetz and Mrs. Otto Baetz motored to Sullivan on Sunday and called on friends there. For many years the homeless Gottlieb Huether walked this part of the county. Last week he was removed to the Markdale House of Refuge.

Mrs. Hoffman of Rochester is spending several weeks with her mother Mrs. F. Goessel.

NALCO GRANULAR EFFEVESCENT LIVER SALTS

A Pleasant, Effective and Effervescent Hepatic Salt. It forms a sparkling drink when mixed with cold water, cooling the blood in hot weather. It gives relief in Constipation, Biliouness, Torpidity of the Liver, Indigestion and Headache. It is also valuable in treatment of Rheumatism and Gout, also recommended for overcoming indiscretions in eating and drinking.

"Oh! What a Difference in the Morning"

No wonder he feels fresh and happy after sleeping on a LEGGETT & PLATT

GUARANTEE

We will replace this spring free of charge if at any time within 10 years it is found to sag or break in any part.

LEGGETT & PLATT SPRING BED CO. LIMITED Windsor, Ont., Can.

This is the spring with the hinge top that conforms so readily to every movement of the body insuring absolute comfort—and healthy sleep. Each coil works separately, thus insuring that every part of the body will receive support in proportion to its weight. To every spring is attached our guarantee which insures the purchaser for ten years, against all defects. Call and see these springs for yourself—you will then be in a good position to judge them on their merits.

J. F. SCHUETT

The Automobile

PROPER LIGHTS ON CAR ARE SAFETY AID.
A lot has been heard about the headlight problem in the automotive field and someone has suggested that the only way to solve this problem is to pass a law prohibiting night driving. Of course nobody is likely to seriously propose such a regulation, consequently we are liable to continue with this perplexing situation.

From thirty minutes after sunset until thirty minutes before sunrise represent the hours when driving is most difficult and dangerous. While driving at night headlights should enable the driver to see clearly objects at least two hundred feet ahead. The car should have two lusty headlights when in motion—white and of equal strength. Also a tall light, red and visible for five hundred feet.

The belief that the motor headlight glare problem is one of considerable mystery and extremely difficult to solve is held by many leaders in the automotive industry. Some of the best illuminating engineers in the country have been devoting their skill and energy to the general proposition of creating headlights which will not glare and yet at the same time will give sufficient brightness to light the road ahead.

LIGHT EFFECTS ANALYSED.
In the daytimes when the sun is shining automobile headlights may be turned on and yet no inconvenience will be caused to motorists who happen to meet such a car. Under such circumstances it is easily possible to read the license plate on the front of the car. This is due to the fact that the light reflected from the license plate to the eyes is about sixty times as powerful as the headlight. Of course, as evening approaches the headlights appear to become stronger and this process goes on until daylight has entirely disappeared and nighttime has brought on its usual darkness, when the headlights are at their brightest. During this process the eye has been automatically adapting

Making Canada's Inventory.
Much is heard of Canada's natural resources—her minerals, water powers, forests, fisheries and lands, and we have learned to value them highly, says the Natural Resources Intelligence Service. They mean everything to this young country.

Very few, however, appreciate the difficulties, the hardships, and, many times, the privations under which the pioneers in discoveries, labor in making known our wealth in natural resources.

The Interior Department has just sent an expedition to the northern islands of the Arctic. The vessel carries a number of scientists, who will report on the resources of that country. Another party is being sent along the northern limits of the mainland, from the Mackenzie to Hudson Bay, exploring the territory wherein it is already generally known valuable resources in minerals exist. These men will spend the winter in the North.

Even in more southerly latitudes Canada has areas in which the work is not easy. In the mountains of British Columbia geologists are making surveys that are making untold millions in mineral wealth to Canada but they are doing so sometimes at great risk and often under difficult conditions.

A recent report from one of the parties states that the work had been delayed until late in the season by bad weather, including belated snowstorms. In order to overcome the lost time the party was now working from 4.30 in the morning till 8 o'clock in the evening, and Sundays have been entirely removed from the calendar.

In 1923 a geological party in northwestern Quebec lost two members of its party by drowning. There are no bridges in the wilds, and turbulent streams frequently have to be crossed or navigated often at great risk.

This spring, at a watering station on a river on which much potential water-power exists, while the engineers were taking measurements of the volume and rapidity of flow, they were thrown into the water owing to floating logs being carried under their boat.

The records of many cases are buried in the official government reports, and little is ever heard by the public of the work being done by the Civil Servants of Canada on the frontiers of civilization and beyond.

When one goes out into the evening the headlights show their whole intensity and give the light necessary for seeing the road ahead. As dawn appears, of course, the process is reversed. It is generally considered that the dangerous glare of auto headlights can be considerably modified by placing them under certain tests, as, for instance, when a headlight is placed on front of a white screen or wall about twenty-five feet distant and the light turned on, the bright light can then be adjusted to a certain position which will give the driver a fairly satisfactory view of the road and the flow of the rays of light will be sufficiently low to reduce the glare in the face of drivers of autos coming in the opposite direction. In some localities there are certain laws which require all motorists to have some such adjustment made to their lights and carry a certificate to show that such tests have been made.

MODIFY DANGEROUS GLARE.
It is very desirable to carry at least one spare bulb for your headlights. This is just as important as having a spare tire. The surface of the reflector on a light should be frequently cleaned so as to produce the best lighting results. For this purpose a soft cloth is desirable and in using such a cloth be sure to wipe from the centre outward toward the rim rather than round and round. In addition to all this, it is in keeping with good motoring tactics to inspect the general wiring through which the electric current is provided for the lights to see that it is in good shape and also to inspect the storage battery to insure its doing the work required in the whole lighting arrangement.

It is very desirable to carry at least one spare bulb for your headlights. This is just as important as having a spare tire. The surface of the reflector on a light should be frequently cleaned so as to produce the best lighting results. For this purpose a soft cloth is desirable and in using such a cloth be sure to wipe from the centre outward toward the rim rather than round and round. In addition to all this, it is in keeping with good motoring tactics to inspect the general wiring through which the electric current is provided for the lights to see that it is in good shape and also to inspect the storage battery to insure its doing the work required in the whole lighting arrangement.

Natural Resources Bulletin.
The Natural Resources Intelligence Service of the Dept. of the Interior at Ottawa says:

The fruit season is now upon us, and berries, cherries, peaches, plums, early apples, etc., are coming on to the market in tremendous quantities, and in a variety of containers, boxes, baskets, crates and barrels, with many shapes and sizes of each.

Some conception of the quantities required for a season's fruit handling is given in a report by the Dominion Bureau of Statistics for 1922. In that year there were 14,906,892 berry boxes made, together with 13,830,021 baskets and 1,025,175 crates.

Between seasons practically all this enormous number of containers has disappeared, and a new supply is required. True, they are very frail, being made for temporary use only, and in order to produce the most attractive and saleable fruit new containers are necessary.

The interdependence of industries is very clearly shown in the relation of the fruit grower to the forest. Practically all the containers used are the product of the forest, whether they be of wood or paper. In the manufacture of boxes, baskets and crates in 1922 there were used 95,550,000 board feet of softwood, 14,162,000 board feet of hardwood, and 7,000,000 feet of veneer.

Villains.
A Frenchman was travelling in Ireland when he overheard the following conversation:

"Sure, Pat, it's down to Kilmory I've been and now I'm going to Kilmory." "Ye don't say so," said Pat. "Why it's myself that's been to Kilmory, and soon I shall go to Kilmory." "Villains," muttered the Frenchman.

In Norway a girl must possess a certificate of her ability as a cook before she is allowed to marry.

A party of intrepid Alpine climb as resting on the tank Stone, Mount Edith Cavell Glacier, Jasper Park.

Functions of the Sunday School Orchestra.

Not so many years ago an orchestra in a Sunday School was an almost unheard-of thing. That is not the case to-day. With the remarkable growth of music in all phases of life during the past few years has come a corresponding growth in orchestral playing.

The Way You Take It.

Two women were talking together "It's a mystery to me why I don't break down. I have so much to contend with," said the first woman.

"Don't worry," said her companion "Life is worth living, if you take it that way."

"I am the Master of my Fate, I am the Captain of my Soul!" But more probably she had not. Nevertheless, from her own experience, she had worked out a wise and practical philosophy of life. She would not let misfortune sour her or worry her. She forgot her own troubles in living courageously and cheerfully. She took life in the right way and made it worth living.

Old Sarum.

Two miles north of the town of Salisbury, England, is an enormous heap of ruins which once composed the ancient town of Sarum, now known as "Old Sarum, a rotten borough." Sarum was founded by the Romans, became a considerable city and had a great bishop's castle. War came along and reduced the city to ruins, and everybody departed. In 1825 Lord Caledon paid sixty thousand pounds for the whole thing, and from that time the "rotten borough" regularly returned two members to Parliament, the elections taking place on the field where the city hall once stood.

She Moved Along.

She had been standing in front of the receiving teller for over a quarter of an hour and he seemed quite unaware of her presence—at any rate, he took no notice of her at all.

At last she became too irritated to keep quiet another moment, and, rapping on the window to attract the teller's attention, she caustically remarked: "Why don't you pay attention to me?"

"I'm very sorry, madam, we don't pay anything here," was the polite reply. "Next window on the left, please."

Jeff Figured His Time Was Worth a Dollar and Ten Cents at Least

MUTT AND JEFF—By Bud Fisher.

WORRIES IN THE HOME

It is These That Cause Many a Breakdown in Health.

Almost every woman at the head of a home meets daily with little worries in her household affairs. They may be too small to notice an hour afterwards, but it is the same little worries that break down the health of so many women. Their effect may be noticed in nervous headaches, feeble appetite, indigestion, pains in the side or back, and a sallow complexion. To those afflicted in this way Dr. Williams' Pink Pills, by improving and purifying the blood, bring speedy relief. Among thousands of weak women who have tested and proved the merits of this medicine is Mrs. Gustave Hutt, Bruxelles, Man., who says:—"It is with profound thanks that I write to tell you what Dr. Williams' Pink Pills have done for me. Before I began taking these pills I was weak, and my blood thin and watery. I was so thin that I looked like a skeleton. I was troubled with headaches and indigestion, did not sleep well, and was terribly constipated. I decided to try Dr. Williams' Pink Pills and I soon found that they were just what I needed. Under their use my appetite returned, my food digested properly, and I slept better at night, and gained in flesh as well as strength. The result is that now I am a perfectly healthy woman, and there is no doubt that it is due to the use of Dr. Williams' Pink Pills, a supply of which I now always keep in the house, and I would advise other women to do the same."

Canada's Asbestos Comes from Quebec.

From small beginnings about 1880 Canada's asbestos industry has grown steadily until at the present time, extensive fields of asbestos are being mined. It is in point of value the most important of her non-metallic mineral products. The value of the shipments of asbestos of all grades in Canada in 1924 amounted to nearly six and three-quarter millions of dollars.

Canadian asbestos, which is the serpentine, or chrysotile variety, all comes from the Eastern Townships, in Quebec, the principal mines being in the townships of Broughton, Thetford, Ireland, and Coleraine. Quite recently a little asbestos has been produced from development work on a deposit in Deloro township, close to the Percipine gold-fields of northern Ontario.

The asbestos is marketed as hand-cobbed, long-fibre crude, and milled fibre. The proportion of crude fibre to milled asbestos that can be produced from the Canadian mineral is small, but the crude is by far the more valuable product. Most of the output is exported in the unmanufactured condition, chiefly to the United States, but there are now several plants for the manufacture of asbestos goods in Canada and there will probably be a gradual diminution in the proportion of the output for manufacture abroad.

The long fibre is spun into thread or yarn that can be woven or braided into cloth, rope, tape, and other forms and used for fire-resisting and heat-insulation purposes generally. The shorter grades of fibre are used for the manufacture of fireproof mill-board, building paper, roofing felt, and shingles; and for pipe-covering compounds, cements, and paints.

From its earliest days up to a few years ago the growth of the Canadian asbestos industry had been remarkably steady and at a normal, healthy rate. But, between 1917 and 1920, prices advanced so rapidly that Crude No. 1 sold as high as \$3,000 per short ton. In 1920, the output of all grades reached 200,000 short tons valued at nearly \$15,000,000. A slump in prices in 1921 caused production to fall off more than 100,000 short tons in quantity and nearly \$10,000,000 in value. In 1923, 231,482 short tons of all grades were produced but the value was only a little over half that of the 1920 output; in 1924 the production was some 225,744 short tons valued at \$6,710,830. The average price of Crude No. 1 is now about \$412 per ton, or twice its pre-war value.

The sharp decline in prices, aggravated by price cutting, and severe competition from South Africa in the most profitable market, that for long-fibre spinning grades, has caused serious dislocation in the Canadian asbestos industry. At the present time a merger of the most important operating companies is being negotiated, in order that the Canadian operators may be better able to successfully meet increasing foreign competition.

WE WANT CHURNING CREAM

We supply cans and pay express charges. We pay daily by express money orders, which can be cashed anywhere without any charge.

To obtain the top price, Cream must be free from bad flavors and contain not less than 30 per cent. Butter Fat.

Bowes Company Limited, Toronto

THE THUNDER-CLOUD

By Willis Edwin Hurd

If the surface of a pitcher "sweats" when newly filled with cold water on a hot, sticky, summer day, a thunderstorm is quite likely to occur. The sweating process is due to the warm air giving up moisture on contact with the cold surface of the pitcher. The drops do not come from the water itself. The more humid the air, the more profuse is the sweating, and also the more likely are the cumulo-nimbus clouds to occur.

Often on such a day the cumulus clouds can be found rising to great heights, increasing in breadth, or combining with other clouds into dark, ragged, threatening masses, the tops of which may rise from one to four miles above their bases.

In these clouds the moisture in the warm ascending air currents is rapidly condensed into visible form, and rain soon follows. The winds in the clouds increase in violence and break up the rain-drops, causing them to peck back and forth against each other. This active friction, together with the vigorous uprush of the air, creates great electrical tension, and so lightning, with the consequent thundering, is the natural result.

Sometimes, when the turmoil in the cloud is greatest, the strong currents carry rain-drops into the upper air,

where the temperature is much below the freezing point. There hail is formed, and there by repeated fallings, and hurtings upward with additional coverings of rain, the stones may attain to considerable size. True hail is produced only in a thunderstorm. Thunder and lightning also seldom occur except in the cumulo-nimbus cloud. The rainbow, too, is rarely seen except against a retreating storm of this kind.

A fully developed thunder-storm coming up from the far horizon is an awesome spectacle. Above and in advance of it may be seen a sheet of the thin cirro-stratus cloud. At the very edge of the cumulo-nimbus (piled-up rain-cloud) a gray roll of wind-cloud frequently occurs. Back of it the air ascends into the lanky mass against which plays the lightning, and from which comes the downpour. At the front of the roll, chilled descending gusts replace the torrid heat for the moment with delicious coolness. Sometimes a "deluge of rain" follows upon a terrific peal of thunder. It is the excessive formation of rain in the cloud which causes stronger electrical tension, and therefore sharper lightning and louder thunder. As sound travels faster than the rain, we hear that in advance of the downpour which soon follows.

Sentence Sermons.

The Real Test—Of anything called art is its power to inspire a love for the beautiful.

—Of education is the ability to work supremely well.

—Of religion is the nobility of character it produces.

—Of money is its ability to minister in an emergency.

—Of a joke is the number of people who can join in the laughter.

—Of love is the willingness of the lover to forget himself.

—Of patriotism is the patriot's loyalty in peace time.

Insect Cannibals.

In the struggle for existence many creatures are driven to live at immense heights.

The climbers of Everest saw a herd of wild sheep sitting on a glacier surrounded by pinnacles of ice. They found bees, moths, and butterflies at 21,000 feet, and the last traces of permanent animal existence far above the Himalayan snow-line and 4,000 feet above the last vegetable growth. These were small spiders.

They live in islands of broken rock surrounded by snow and ice. There were no signs of vegetation or living creatures near them, and for food they ate one another.

Winged grasshoppers were found living at a height of 15,000 feet.

The Bad Bargain.

A young Scotsman married an English girl. Some time afterwards he paid a visit to a bachelor uncle in Scotland.

"Weel," said the uncle, "I hear ye hae gotten a wife, Sandy."

"Yes, uncle; ye're right."

"What can she do? Can she knit? Does she mend your clothes?"

"Na," answered Sandy to all these questions; "she does naething like that."

"Humph!" commented the uncle.

"Weel, does she cook fine?" he asked, after a few moments. "And can she mak' parritch?"

"Na, uncle," the young man explained; "but you should hear her sing. She has the most beautiful voice ye ever heard."

"Aye," replied the old man. "But, man, could ye no hae gotten a canary?"

Rules of the Road—Tokio.

This is not a joke; it appears just as it is in Japan's largest police station:—

"Rules of the Road—Tokio, Japan

"1. At the rise of the hand policeman, stop rapidly.

"2. Do not pass policeman or other-wise disrespect him.

"3. When a passenger of the foot have in sight, tootle horn; trumpet at him, melodiously at first; but if he still obstacles your passage, tootle him with vigor, and express by word of mouth the warning, 'Hi, Hi!'

"4. Beware of the wandering horse, that he shall not take fright as you pass him by; do not explode an exhaust blow at him. Go soothingly by.

"5. Give big space to the festive dog that shall sport in the roadway.

"6. Avoid entanglements of the dog with the wheel spokes.

"7. Go soothingly on the grease mud, as there lurks skid demon.

"8. Press the brake of the foot as you roll around the corner, to save collapse and tie-up."

Music as Medicine.

A medical journal has recently announced the results of some experiments made to ascertain the relation of music and medicine.

One curious piece of news obtained is that if a lively air is played on a harp or mandolin, a man's tired muscles regain their original vigor. The music of a violinello, on the other hand, has a precisely opposite effect, in temporarily lessening the usual strength and vitality of the hearer.

In nervous and impressionable people, sad music in a minor key, such as Chopin's "Funeral March," actually weakens the pulse and makes the beating of the heart feeble and more irregular.

An American doctor stated not long ago that almost every mental trouble could be cured by suitable selections of classical music regularly administered. Jealousy, grief, overwork, homicidal mania, nervous breakdown, all had their corresponding air.

Riches usually sober men, and cause them to realize their responsibility; but riches spoil women.—E. W. Howe's Monthly.

Keep Minard's Liniment in the House.

Surnames and Their Origin

GOLDSMITH

Variations—Goldschmidt, Goldschmidt, Silversmith, Silberachmid, Silberschmidt, Nasmyth, Greensmith, and Brownsmith.

Racial Origin—English and German. Source—An occupation.

Here is another group of Smith names, some of which are widespread and some of which are uncommon.

From the fact that the German name of Goldschmidt, or Goldschmid, is exactly the parallel of the English Goldsmith, there are many who assume that the latter is merely a translation of the German name. It is true that in a great many cases, particularly on this continent, where a very large proportion of the population is of German descent, the German form has been changed to the English. But the name has an English origin as well. The same holds true of Silversmith.

Both of these names are to be found in the medieval tax lists and records of England, together with such names as Nasmyth, Greensmith and Brownsmith. In those days they were nearly always spelled with a "y" and bore a final "e."

The goldsmith, of course, was then as he is to-day, an artisan who fashioned gold into various articles of utility or adornment, while the silversmith worked in silver. The origin of the name Nasmyth is a little more obscure, but philology and social history prove that the word from which it was taken was the equivalent of "nail-smith," just as Arsmith, explained in a former article, is another form of "arrow-smith."

A "brownsmith" was a smith who worked in bronze, and a "greensmith" worked in lead.

CHICHESTER.

Racial Origin—English. Source—A locality.

The use of Chichester as a family name is a matter easily and obviously explained. In its first use as such it was descriptive of the locality in which the individual lived. There is a place of this name in England, and naturally persons migrating from Chichester to other sections came to be known in their new neighborhoods as "John of Chichester," or "Robert of Chichester," as the case might be.

Then, in the course of time, neighbors would come to regard the name as merely distinguishing the individual, and its meaning as indicating the place from which he had come several years before would not be foremost in their minds. Hence the "of" or its equivalent in the Norman tongue, would be dropped, and the individual or his sons would bear as their surname simply Chichester.

The place name, however, is a combination of the Saxon given name of "Cissa," and the Latin word "castrum," which means "camp" or military station. The Romans, in the period before the Saxon invasion, built their camps in England, and did elsewhere, as virtual fortifications. They were structures which, and which remained in existence long after the Romans had withdrawn.

"Cissa" was the son of "Aella," who founded the kingdom of the South Saxons.

Canadian Trails.

Follow the trails—Canadian trails—As far as man may go.

Follow the winds blowing over them That only the northlands know.

Follow the streams to their silent heads

Down to the land where no man treads, And the Arctic is your foe.

Follow the trails that the redman trod In moosehairs swift and sure;

Follow them where the lone deer herds Browse by the rivers pure.

Ninook the bear, and the Arctic fox Watch by their dens where danger stalks

And only the strong endure.

Follow the trails through deep pine gloom,

The trails of romance and strife, Where the keen air whets the hunger pangs

Sharp as the hunter's knife: Far to the north of the lonely world Where the banners of dawn have their lights unfurled

In beauty, splendor and life.

—Lerline Ballantyne.

SAVE THE CHILDREN

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather.

Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly.

Baby's Own Tablets relieve these troubles, or if given occasionally to the well child they will prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless even to the newborn babe.

They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The experiment is one of great moment, both as regards the conservation of buffalo and as to economic and food conditions in the north country.

RED ROSE TEA "is good tea"

The ORANGE PEKOE is extra good. Try it!

Begin Movement of Buffalo Northward.

The success of Canada's experiment in conservation of buffalo is shown by the steady increase in the herd in the Buffalo park at Wainwright. In 1909 the herd numbered 709, over two thousand have since been slaughtered for commercial purposes, and this spring there were about eight thousand in the park. The herd has now reached a point where there is a substantial surplus over and above the average forage capacity of the park. That surplus this year is to be disposed of by sending the animals to the Wood Buffalo park near Fort Smith, on the borders of Alberta and the Northwest Territories. The first weekly shipments have begun and will continue at the rate of two hundred animals per week until a total of about two thousand animals have been transported. The buffalo are loaded on railway cars at Wainwright and shipped to Waterways, Alberta. Here they are transferred to scows, which are towed down the Athabasca and Slave rivers to the Wood Buffalo park, where the herd will be under the care of the North West Territories and Yukon Branch. The Wood Buffalo park or reserve is an unfenced area of ten thousand five hundred square miles, in which a herd of wild buffalo has ranged and thriven for many years.

The experiment is one of great moment, both as regards the conservation of buffalo and as to economic and food conditions in the north country.

For Every Ill—Minard's Liniment.

Sixteen Million Storms a Year.

Our planet has forty-four thousand thunderstorms a day—three hundred and sixty thousand lightning flashes an hour!

A single lightning flash is believed to represent an energy equal to half a million horse-power, and an electrical pressure of three billion volts.

In the world there are three thousand stations where daily observations are made of thunderstorms. You might suppose that the heaviest and most frequent thunderstorms occur around the Equator, but they do not. The worst are in what is called the "rain belts," that lie at some distance on either side of that line.

Java is said to be the most thundery place on earth, but even as far north as Florida and as far south as the Transvaal thunderstorms are frequent and of tremendous force.

In a large part of Central America thunderstorms occur almost daily—during half the year. In Ethiopia the average number of thunderstorms is 250 a year; on the Gold Coast, about one hundred.

Italy holds the European record with between forty and fifty yearly; Paris has only twenty-seven. The English record varies, there being three times as many thunderstorms in the Fen district as in the South of England.

We shall get a new definition for progress. It ought to mean not more machinery, more bustle, more manufacturers, but more durable satisfaction for the average human being.

The most perfect vacuum possible still contains about eight billion gas molecules to the cubic inch.

For Every Ill—Minard's Liniment.

First Railway Signal.

Railway signals were the invention of a railway policeman. At one time the police had to stand on point duty, directing traffic by hand. One who found the job very monotonous invented a crossed stick arrangement controlled by a string. When he pulled the string the crossed sticks fell to a horizontal position, which was an intimation that the engine driver might proceed. The idea caught on and led to the establishment of the present signalling arrangements.

The idea of printed tickets came from the resourceful brain of an overworked booking clerk in England. Like hundreds of his colleagues, he sat all day at the head of a long queue of intending passengers, each of whom spelled out name, address, and destination, to be written on a slip of paper. Such a waste of time and energy disgusted him, and one day he took to pieces an old boot-repairing machine, making from it a primitive ticket-printing apparatus, which was patented and let out to various railway companies on a commission basis.

Have a Clear Field.

The reason people who attend to their own business are successful is because they have such meagre competition.

Dragon Fly's Antiquity.

The dragon fly is the most ancient insect known to scientists and has the least complex anatomy.

Russia Keeps Its Ban.

The importation of copies of the Bible into Soviet Russia is still prohibited.

After Shaving

PIMPLES OVER FACE AND NECK

Itched and Burned Badly. Healed by Cuticura.

"My face started to itch and burn and then broke out with pimples that were hard, large and red. After a few days they festered and scabbed over and were very sore. They itched and burned so badly that I used to scratch which caused them to spread all over my face and neck. My face was badly disfigured."

I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. After using it I purchased more and in about two weeks I was healed." (Signed) Miss Bertha Wilson, R. R. 2, Forest Falls, Ont., Oct. 3, 1924.

Daily use of Cuticura Soap, Ointment and Talcum helps to prevent skin troubles.

Sample Each Free by Mail. Address Canadian Dept., "Cuticura, Ltd., Montreal," P.O. Box 250, Montreal 25, Que., Canada.

"THANK YOU!" TWO WORDS THAT MEAN MUCH

The Montreal Herald says: "Two little words that make the world run more smoothly, that ease the hard places of life and absorb many of its shocks are 'Thank you.' They bespeak a gracious attitude that would not withhold praise from those that deserve it—a commodity with which too many of us are stingy. The majority of us take too much for granted. In a land of plenty and among a people of infinite resources we expect much and accept everything as a matter of course. Get one's best friend likes to hear an appreciative word. While a compliment deserved by an outsider and extended frankly and generously will often convert an enemy into an ally.

Wit and Humor

Blobs—Don't be discouraged, my boy. All things come to those who wait.

Slobbs—Yes, but by that time they are pretty well shopworn.

"You simply cannot find a maid who is honest. That one you recommended just left suddenly and took with her nine of my towels."

"What kind were they?"
"They were those Pullman car towels which I brought back from my trip."

When the colored couple were being married and the clergyman read the words "love, honor and obey," the bridegroom interrupted:
"Read dat ag'in, pahson; read de onct mo', so's de lady kin ketch de full solemnity of de meanin'. Ise been married befo'."

They were having their usual argument in regard to money. "Yes," snorted the husband, "I'm absolutely sick of it. You're always asking me for something. You seem to think I'm made of money. I wonder what you'd do if I were to die. You would have to beg for it then."

"Well," responded the wife bitterly, "I should be a great deal better off than the women who have never had any practice."

A Splendid Party

A lady who had given a dinner party met her doctor in the street the following day, and stopped to speak to him.

"I am so sorry, doctor," she said, "that you were not able to come to my dinner party last night; it would have done you good to be there."

"It has already done me good," he replied tersely. "I have just prescribed for three of the guests."

Couldn't Have Been a Ford
With a jolt the car came to a sudden stop in the middle of a busy street. The self-starter refused to act, and the driver was forced to dismount and endeavor to crank up the engine with the aid of the starting-handle. For five minutes he whirled the handle furiously, while a small crowd collected, and then at length an old lady stepped forward and pressed a penny into the perspiring motorist's hand. "My good man," she said gently, "I wish all barrel organs were as quiet as yours."

From Bad to Worse
The fisherman was sitting on a seat in front of his door mending nets, when a friend came up and said:
"That's a bad thing that's happened you."
"What's that?" queried the fisherman.
"Your wife running away and leaving you."
"A worse thing's happened since then" was the reply.
"What's that?" asked the friend.
"She's come back!"

It Cut Both Ways
A newly appointed minister was attracting worshippers from other congregations by his eloquence, and Willie, the Aul Kirk beadle, looked with dismay at the empty pews in his own church.
"At last he said to the minister, "Ye man improve yer sermons, sir, if ye want to retain yer hearers."
"Oh, you knock, new scissers always cut clean, William," said the minister, haughtily.
"Ay, ay," was the beadle's retort, "and auld anes are a' the better for a sherp up."

She Pitied the Lion
Uncle had just returned home from an expedition into Africa after big game and he was delighting all the family with stirring tales of adventure in the jungle.
"One of my beaters was so savagely bitten by a lion once," he announced, "that he had to have his arm amputated."
There was a short silence while the information sank in, and then the small daughter of the house said in a sympathetic voice:
"What a pity, uncle; the poor lion might just as well have had it."

It is unusual to find a man standing on a public highway holding a goat by the horns, and the passer-by was interested.
"Will you kindly hold on to this beast while I climb the fence and open the gate?" asked the man, politely.
"Certainly," said the stranger, and did so.
"Thanks" said the man from the other side of the fence; "the brute attacked me an hour ago and we've been struggling ever since. But, so long as you hold his horns, he can't hurt you. And I wish you the same luck in getting away as I've had."

ATTEMPTED HOLD-UP AT KINTAIL STORE

At 2.30 o'clock Friday afternoon of last week, a car stopped in front of Neil MacDonald's store in the village of Kintail. A young man got out of the car, and went into the store, where Alice, the 15-year-old daughter of Mr. MacDonald, was in charge.

There was something about the customer which made the girl think him a tough character, and she began making observations. The stranger asked for gasoline, and the girl filled his tank, at the same time noting that his car license number was 190-630. The traveller then went into the store and ordered "eats" and other articles to the value of about \$8.00. He then took one of the parcels out to the car, and before returning, started the engine of the car, evidently for a quick getaway. While he was out, Miss MacDonald took all the bank notes from the till (amounting to about \$80.00) and hid them among the goods. The stranger returned and was presented with his bill for the goods he had bought. Instead of paying he drew a gun on Miss MacDonald and demanded all the money in the till. It was too sudden, and the girl giving one yell, made a dash for the door leading into the house. The robber seeing the game was up, grabbed a few of his parcels, and jumping into his car, made off at top speed.

For a minute the terrified girl could not tell what had happened. This gave the robber a chance to get away, but Mr. MacDonald soon got in touch with Provincial Constable Woodsides at Goderich, to whom he reported the incident, and gave the car license number. Woodsides at once said that the fellow was Charles Erb of Tavistock, that the car had been stolen at Baden, that Erb was charged with a number of thefts at Tavistock, and that he had stolen a car at Mildmay, which, however, he had abandoned later stealing the one at Baden.

On Sunday afternoon, Charles Erb was arrested on the St. Mary's Road by Detective Faulkner of the Provincial force. It was a chance meeting. Faulkner had been trailing Erb thro' Tara, Mildmay and to Baden, near Kitchener.—Lucknow Sentinel.

POMMELLED HOTEL PORTER

About 6.30 o'clock on Saturday evening last a Southampton gent by the name of George Gray displayed the rough side of his character in no small measure by brutally beating up Albert Abel, porter at the Queen's Hotel, and then jumped into a waiting automobile of some of his friends and cowardly raced out of town. As we understand it Gray was one of a party who dropped into the Queen's one night last spring when a suit of underwear belonging to Albert was stolen and it was during a discussion of the theft that Gray is alleged to have struck Albert and then pulled him outside the hostelry where he badly pommelled him, cutting his lip, bruising his face and otherwise upsetting him to such an extent that Albert had to be put to bed for a time. Happening as it did when Albert, who is a quiet, inoffensive gent, was alone, others in the hotel being at supper, the Southamptonite met with little on no opposition in his "rough-house" demonstration. Constable George journeyed to Southampton on Monday to arrest Gray only to find that he had left by motor on Sunday for Detroit.—Port Elgin Times.

CLIFFORD

On Tuesday morning, Mr. Chas. Murray of Minto, near Fulton's Mills, sighted 3 deer running across the back of his farm.

The fiftieth annual statement of the Methodist Church was issued last week. The Clifford congregation raised a total of \$1974.70, and Lakel-et congregation \$304.20. The treasurers of the church and Ladies Aid, have a balance on hand, to be used for any expense for repairs to church or parsonage during the present year.

Miss Ethelwyn Scott, who has been in the Toronto General Hospital for two weeks having skin grafted on her hands, and operation on the elbow, is expected to be home Thursday evening. Ethelwyn's friends will be pleased to learn that the wounds on her hands are almost completely healed, and that she will have the use of the elbow.

During the electric storm Tuesday afternoon, the home of Mr. G. Buhrow, Maple Ave., was struck by lightning on the very peak of the house, from there it ran along the cornice, which is badly shattered, and then down the conductor pipe to the ground. The Ziegler Bros. who live on the farm adjoining, were the first to notice sparks and smoke coming from the woodshed roof, and ran over to assist in extinguishing the fire. But for the prompt action of the neighbors and the road men, who were working on the highway,

Experience is what you get when it is too late to use it.
After trying all sorts of schemes for making money, working seems to beat them all.

The storm Thursday night almost ruined little Willie's party. Refreshments were provided for twenty-six guests, and only seven came. The doctor says that all Willie needs is a little castor oil.

READ THESE STATEMENTS FROM McCORMICK-DEERING OWNERS

THESE MEN ARE SEASOED TRACTOR OWNERS. MOST OF THEM HAVE OWNED AND USED SEVERAL MAKES—THEY DO NOT HESITATE TO RECOMMEND THE McCORMICK-DEERING IN PREFERENCE TO OTHERS.

"I know from practical experience that it the McCormick-Deering) is the one practical tractor for general all round farming. I have owned and used quite a few styles and makes and I have yet to find one to beat the McCormick-Deering."

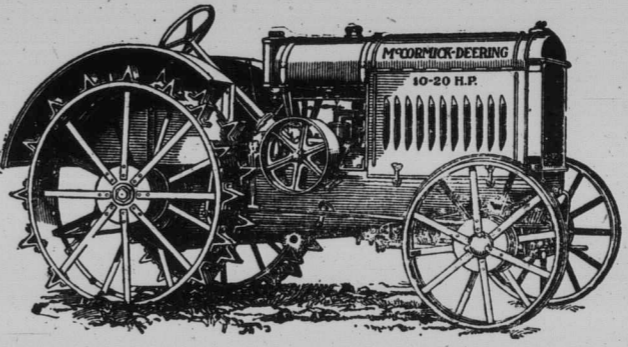

"I'm going on the second season with my McCormick-Deering 10-20 tractor now and I like it fine. I wouldn't think of going back to horses."

"One of the best features of McCormick-Deering is the accessibility of all working parts. It is so easy to make minor adjustments without tearing the whole thing apart."

"I think the McCormick-Deering Tractor is much more economical than horses or mules."

"After a thorough investigation I decided the McCormick-Deering 18-30 would best fill my requirements. I have never regretted my decision." "You'd have to go a long ways before you could sell me any other tractor but a McCormick-Deering."

LET US POINT OUT TO YOU HOW EASY YOU CAN ENTER INTO OWNERSHIP OF A McCORMICK-DEERING 10-20 OR 15-30 TRACTOR. THESE GOOD TRACTORS ARE ECONOMICAL AND EASY TO PAY FOR. ASK US FOR COMPLETE DETAILS.

CHARLES J. KOENIG - Agent - Mildmay

Used auto tires are in great demand in Kona, Hawaii. Three car loads were recently shipped there from Seattle. Japanese make soles for shoes from these old auto tires and sell them for \$1 per pair. Another large shipment is accumulating for the next steamer. Soles are cut from the casings and canvas tops are stitched on. This footwear is said to last from four to six months and generally sells to fishermen and laborers in the sugar and pineapple plantations. The soles are cut symmetrical so that both shoes fit either foot. By changing them about from day to day the wear is equalized.

and had taken shelter in Mr. Buhrow's barn during the storm, the house would probably have been consumed, as it had gained a fair headway before being noticed.

HOWICK

Work was commenced last week on the new addition to the Fordwich Public School to provide accommodation for the Continuation School. It is expected that the building will be ready for occupation by October 15th next.

A severe electric storm passed over this section on Tuesday evening accompanied by a heavy downpour of rain. Mr. H. Zimmerman's residence east of Gorrie was struck by lightning but did not take fire. The barn of Mr. August Keil on the 5th concession of Howick, was struck and burned to the ground together with this season's hay an dall his implements except those used in haying, some hens were also burned. Mr. Kiedl's loss will be a heavy one.

Another of Howick's pioneers passed away on Saturday, July 18th, in the person of Jane McDermott, relict of the late C. Jacques, who predeceased her 17 years ago. She was born at Bond Head, Tecumseh in 1841, and came with her parents to the 'Queen's bush' in 1855. In 1859 she was married to her late husband adn unto this marriage was born 7 sons and 2 daughters.

On Sunday morning last death claimed another of the pioneer residents of this community, in the person of Ann Jane Walker, relict of the late Christopher Walker, About a week and a half previous she suffered a stroke from which she never rallied. Deceased was born in Fordwich seventy-five years ago, a daughter of the late James and Jane Mosure, and with the exception of several years spent near Wroxeter she was a life-long resident of this community. Her husband died October 25th, 1919. She leaves to mourn their loss a family of five daughters and five sons.

WALKERTON.
Mr. enry Spitzig, who has been installing the machinery at Mr. Ed. O'Connor's new sawmill in the South Ward, had the misfortune to over-balance and fall from a scaffolding on Saturday, coming down hard after a drop of about ten feet. He escaped with a rather bad shaking which will confine him to his bed for a few days.

The Provincial auditors who recently spent some weeks on the Town books have been invited to come up and spend an evening with the town council going over and explaining their report which has been received but not yet formally presented to the council. The auditors, Messrs. Wernicke and Dean, will be asked to go into the details of the town's overdraft of \$14,000 which incidentally lines up pretty close to the estimate made by the Town Fathers at New Years that they were about fifteen thousand on the debit side of the ledger. After paying the cost of the audit amounting to about thirteen hundred dollars the deficit will be close to the estimate. The total deficit will be met by debentures extending over a period of years and will not materially affect the taxes of any one particular year. It is expected that the conference of the auditors and the Town Council will be held before the next regular meeting.

Two local cars figured in an auto crash south of the town last Thursday evening. Morris McCarter was returning from the garden party at T. H. Jasper's, con. 12, Carrick, and had just turned onto the Overland at the side of the road to adjust some tire trouble. A few minutes later Mr. Francis Frank with a bunch of band boys homeward bound from the party happened along just at the same time that another car was passing in the opposite direction. The lights of the southbound bus dazzled Mr. Frank and he did not see the stalled car and crashed into it. McCarter's bus was jolted down a steep drop of twelve to fifteen feet and into a wire fence at the side of the road. There were seven young people in it but fortunately all escaped without injury. The car was only slightly hurt but Frank's car received injuries to the radiator and radius rods which needed a lot of fixing. A couple of hand instruments will also carry dints as mementos of the bang.

Bitten by Dog
Miss Ruby Cowie was badly bitten by a dog while in bathing at the Bend on Monday afternoon. She and some other girls were coming down the sand slides when one of her companions jokingly pushed her against the dog. The animal turned and snapped at her, his sharp teeth tearing away her upper lip from the gums and inflicting a nasty wound which required several stitches to close.

STACKING STRAW SO IT WILL KEEP

BY WALTER L. PRITCHARD.

There was once a rather small, important-looking man who had his crew all assembled ready to begin threshing.

"Ahem! Joe, you may stack the straw!" said he to one of the young men standing near.

The other men laughed, for it wasn't Joe's place to stack the straw. Joe looked serious and began to grumble.

"Ahem!" (this was a favorite expression), "Joe, you may go home if you don't want to do what I bid ye."

Joe went home. There were those who said he should have stayed and others who said he did just right. Anyway, it is a well-established custom in this halliwick that every farmer must stack his own straw. It takes a rather good excuse for a man to get out of stacking his straw when threshing time comes. Some hired men (these are the ones looking for an excuse to quit work) will even refuse to go into their employers' strawstacks—that is going too far.

Out on the prairies nobody gets in the straw. Straw is plentiful and land is rather cheap, so that a stack can be blown over a half-acre without any great loss. These stacks with the standing sides are really nothing more than piles of straw, the kind a rooster will have no difficulty in scaling in order to crow from the top.

But with us straw is valuable. We never have any too much, so the straw is stacked as carefully as possible. However, on account of the established custom of every man on his own strawstack, we find many stacks built better than others.

THE CAVED-IN TOP.

Some folks just don't know how to build a good strawstack, so I shall give a few rules that I have followed. First of all, never leave a dent in the top of the stack, or there will be some cuss words when you step up on that stack in the middle of the winter to open it up.

A depression in the top of a stack always means a cake of ice, and it's mighty hard to get that loose.

To make a stack that will shed water, the start must be made at the bottom when we build it. A rather small bottom for a stack that will stand in the open without stock around it is desirable, but if the stack is placed in a barnyard (and most of them are placed there) the bottom should be fairly large, because with cows taking a scurry round the bot-

tom of it when the stack is just finished, and with cattle nibbling at it all winter long, a high stack on a small foundation is going to get rather shaky before spring comes, and it may tip over and bury some stock.

When you are in the straw at the bottom of the stack, the separator humming and the dust and straw and roar coming from the end of the blower over your head, there's a temptation to get out of the dirt—to go and linger on the grain-wagons; but to get a good stack you must start right in at the bottom to build it.

If the straw is allowed to pile up pyramid fashion, it is hard to get the corners of the stack to hold when you do straighten it out. Build the edge next the separator at least twelve feet away from it.

TRAMP THE CENTRE.

And as you feel the straw pile growing higher beneath you, you are liable to be starting the stack with the caved-in top unless you keep sharp watch. It is not very easy to walk in the loose straw, and consequently you find yourself going from one end of the stack to the other in one path, pushing the straw out to the edge as you go. As our stack is wide at the bottom, this going around the outside of the stack makes a place down through the centre where we are apt not to walk at all. That is just where we commit the blunder.

Straw that is not tramped settles more than that which is tramped, something to keep constantly in mind. As a general thing the outside of a strawstack settles down well enough for the simple reason that we do not dare go too close to the edge or the side will push out. The centre may appear just as high as the balance of the stack, but if we neglect to walk up and down it as much as we do around nearer the edge, it is going to settle in time.

When you get near the top, fill in the centre just as much as you can, for a stack centre never can get too much. If there is a high wind blowing, it is impossible to put on a very sharp top to the stack. The best that you can do then is to tramp; when you get tired of going to one end of the stack, go to the other, for to pack the straw is the only way to hold it up on the top at all.

On farms where small threshers are used, and the straw is to be sold, the straw can be baled right at the threshing.

sweat, the shattering of leaves is largely prevented and very little loss of color by sun-bleaching occurs.

Further, hay hauled from the windrow should be stored with the least possible delay once it is sufficiently cured.

Summer Egg Yields.

This is the season of the year when a decline in egg production may be expected with almost any flock. The feeder's problem is one of how to delay this inevitable drop to the latest possible date. There are certain things which can be done to help materially in the solution of this problem.

First, and perhaps most important, is to reduce the daily allowance of scratch feed gradually but steadily from now until about the first of November, keeping dry mash constantly available. Of course there must be a proper quantity of protein in this mash or there will be little advantage in the reduction of grain feeding.

The hen is just about as hungry in summer as in winter and when her daily allowance of scratch grain is reduced she makes up for it by eating more mash. This is exactly what we want her to do, for the reason that the mash is more quickly assimilated, and because of the further fact that the daily intake of protein is gradually increased.

Protein, particularly of animal origin, stimulates egg production, and by adding just a little more stimulus from week to week and month to month we virtually keep the hens laying whether they want to lay or not. The result is a greater total egg yield per hen per year and, more important in many cases, a higher average price per dozen, owing to the fact that the late summer and fall eggs are produced on a rising market.

O.A.C. No. 104 Wheat.

Of the wheat varieties produced at the College through hybridization the O.A.C. No. 104 is the most interesting. In the average results at the College it has surpassed the Dawson's Golden Chaff variety by a yield of 5.3 bushels per acre per annum.

The O.A.C. No. 104 variety is a cross between Dawson's Golden Chaff and the Bulgarian. It is a white wheat with a white chaff similar to the Bulgarian and has a beardless head similar to the Dawson's Golden Chaff.

It is a vigorous grower, has been more hardy even than the Dawson's Golden Chaff, almost as stiff in the straw, and it seems to be less susceptible to smut. In the last five years it has been injured by the Hessian fly to a less extent than the average of the forty varieties.

Shade and water—two prime essentials for growing chicks in hot weather.

The Preservation of Eggs.

In 1923 and 1924 a series of experiments were conducted by the Poultry Division of the Dominion Experimental Farms in storing eggs for winter use.

In his report for last year Mr. F. C. Elford, Poultry Husbandman, gives the result of these experiments. They covered the new process for preserving eggs known as "Guarantize."

The eggs were all stored in June and kept under ordinary cold storage conditions until December. Both before being put in and when taken out of storage, the eggs were graded by a government egg inspector. The "guarantize" process consists of dipping the eggs in a boiling solution of wax and oil. For the experiment two thirty-dozen cases of new laid eggs were used.

The contents of one case were treated before being stored and the others were left in their natural state. Tables given in the report, which can be had free on application to the Publications Branch, Ottawa, indicate that there is an advantage in processing eggs for storage purposes. Of the processed eggs graded as specials and extras last year 93 per cent. were graded as extras when taken out of storage. Of the non-processed 81 per cent. so graded. In 1923 the difference was not the same, but still a summary of the two years shows in favor of the processed.

Cleaning Up the Orchard.

How much time and money is the fruit grower justified in spending to clean out the grass and weeds around the trunks of his orchard trees?

Well, that depends. In sections where apple borers are very troublesome it may be a very important thing to do, since these pests are fond of just such retreats.

From the standpoint of soil conditions for the tree it probably does not make very much difference whether the grass is there or not, since the bulk of feeding roots are much farther from the tree. We can do all the cultivation necessary for the good of the root systems of our trees with any good cultivation implement.

A very practical and important reason for cleaning up about the trunks is to remove fire danger, and where there is any likelihood that fires will occur the job of cleaning up ought to be undertaken no matter what the cost.

As a matter of fact, the most common reason which leads us to polish up the orchard in this way is to make it look "slick," in deference to what the neighbors may think of us, just as we clean up the back yard or polish our shoes. And it isn't a bad reason either on the whole, though we ought not to invest too heavily on this account.

To get bees out of the supers, put bee-escape on each hive late in the afternoon. The supers will be clear of bees in from twelve to twenty-four hours. To place the escape, tip the stock of supers to be removed and slide the escape board underneath. Be sure the springs in the escape are just right—just far enough apart to let the bees pass through. After placing the escape, look closely to see that there are no openings through which robber bees can enter the supers to be removed.

Girls, here is a good hint: A blush may be given to canned pears by a little red vegetable coloring. With a clove for a stem and a lettuce leaf for garnish pears make an attractive salad.

Never keep sheep on low marshy land. Hilly land is best. Avoid pastures by changing pastures frequently.

Organic heart disease kills more than twice as many people as does tuberculosis.

ECLIPSE FASHIONS

Exclusive Patterns
by *Abigail Cuyler*

CHARMING PANTIE DRESS.

Every child needs many frocks, and what mother will not want to make one, or even several, with this charming frock as a model. The design is so simple and the dainty printed and colored fabrics in the shops so fascinating, that it is real fun to see what delightful frocks can be evolved with little effort.

The front of the printed frock above is cut at the armhole, and the skirt joined to the upper part by several rows of shirring, forming a yoke effect. The collar is one piece and fits comfortably to the neck. The sleeves are long and gathered to a narrow band, and adorable little pockets trim the front. The panties are cut in two pieces only, with elastic run through a casing at the top. Sizes 2, 4 and 6 years. Size 4 years requires 2 1/2 yards of 32-inch, or 2 1/2 yards of 28-inch material. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy. Each copy includes one coupon good for five cents in the purchase of any pattern.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of patterns as you want. Enclose 20c in stamps or coin (coin preferred); wrap it carefully for each number, and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

Attach a chain to the plow-beam and fasten the free end to the end of the doubletree; leave enough slack that the chain will drag in the furrow. This will drag the grass and weeds into the furrow and they will be covered up completely.

Organic heart disease kills more than twice as many people as does tuberculosis.

CATSUPS FLAVORED WITH FRUITS, BERRIES, NUTS AND VEGETABLES

Relishes for the Salad Bowl and Cold Meat Platter; Give Zest When Blended With Sandwich Mixtures.

Catsup may mean to you the pungent, spicy red mixture sold in bottles at the grocers. Or it may recall fragrant mornings when the summer sun beats down on a hot garden, where dead-ripe tomatoes hung heavy to bursting. Later they were destined to glow in the picking basket, then swim coolly in a great tub of water and then begin a spicy mode of living in the catsup kettle, slowly stirred, while a thousand odors of Araby mounted heavenward.

Catsup in England means a relish or sauce of which the juice of salted spiced mushrooms is the chief ingredient. In other parts of the world, notably France, various fruits and vegetables, green walnuts, oysters and other shellfish are pulped and pureed and blended to smoothness. But English, French or American, its varieties have grown and their uses have been extended in many directions—for the cold meat accompaniment, as an ingredient in salad dressing, as a blending sauce for sandwich mixtures, for blending in gelatine salads, for hors d'oeuvres and canapés, for serving with fish, for spicing the bland baked bean and spaghetti and macaroni dishes and other places where a bit of dash is needed. Make them and have them ready on condiment shelf and in the ice box.

Use agate or enamelware kettles. **GOOSEBERRY CATSUP.** Seal, wash and put through a colander nine pounds of ripe fruit. Add five pounds of sugar, three tablespoons of cinnamon and half a tablespoon each of cloves and allspice. Boil twenty minutes and add a quart of cold vinegar, bottle and seal at once.

CURRENT CATSUP. Cook together until thick six quarts of currants and five pounds of sugar; add a quart of vinegar, half an ounce of white pepper, one tablespoon of salt, three tablespoons of cinnamon, two tablespoons of allspice and one tablespoon of nutmeg. Boil twenty minutes, bottle and seal.

APPLE CATSUP. To twelve sour apples—pared, cored and quartered—add water enough to cover and simmer until soft and the water nearly evaporated. Rub through a sieve, and to each quart of pulp add two cups of vinegar, two grated onions, a cup of sugar, a tablespoonful

of salt, two teaspoons of cinnamon and add two cups of vinegar, two and a half pounds of sugar and a teaspoon each of ground cloves, allspice and cinnamon. Cook slowly for two hours and bottle and seal.

GRAPE CATSUP. Boil five pounds of grapes, strain and add two cups of vinegar, two and a half pounds of sugar and a teaspoon each of ground cloves, allspice and cinnamon. Cook slowly for two hours and bottle and seal.

LEMON CATSUP. To the grated rind of four lemons add a tablespoon of grated horseradish, mix well and add the juice of the lemons, two teaspoons each of celery seed and white mustard, a few cloves and blades of mace and a pinch of red pepper. Boil a half hour and bottle.

WALNUT CATSUP. (For next fall.) When walnuts are green and soft grind them or pound in an earthen mortar, then turn into a stone jar, sprinkle with salt and cover with vinegar. Let them stand a week, stirring each day, then strain through a coarse cloth. Add to every gallon of liquid one ounce each of ginger, peppercorns, celery seed, mace, whole cloves and half a nutmeg broken up; also half a tablespoon of cayenne pepper and a clove of garlic or a teaspoon of onion juice. Boil slowly until reduced about one-half, strain and bottle when cold.

CUCUMBER CATSUP. Peel and chop three dozen cucumbers and half as many onions. Add one cup of mustard seed, a quarter of a cup of black pepper and one ounce each of cloves and allspice. Mix well and cover with vinegar, then heat through, but do not boil. Put into wide-mouthed bottles and seal.

MUSHROOM CATSUP. Wipe, but do not wash, fresh mushrooms, put in layers in an earthen dish, sprinkling each layer with salt. Cover with a damp cloth of several thicknesses and let stand in a warm place thirty-six hours, then wash and strain. To each quart of juice add one ounce of peppercorns. Boil thirty minutes, then add one ounce each of whole cloves and allspice, half an ounce of ginger root and one blade of mace. Simmer fifteen minutes. When cold strain and bottle, sealing well.

Are Parents People?

This peculiar question was suggested by a movie billboard. We don't know what the movie was, but the question is a legitimate one; one which exists in many young minds.

To young folks, parents are different. They act differently to them than other people do. Other people would not think for one minute to boss them around, telling them to wash their faces or behind the ears, as parents do. Other folks don't tell young people when to go to bed and when to get up, and all such things.

Perhaps one reason why this question arises in the minds of young folks is that often parents maintain too much the governing attitude of mind toward their children. Unconsciously they impress upon the child the superiority of parenthood instead of showing the palship of parents and children.

It seems to us the parents should be the guides of the children, not their overlords. They should get back of the young folks and say, "now, you go ahead and I will tell you when you are going wrong," instead of being over them and dictating their actions.

We read of one well-known man whose son always called him "John" instead of father or dad. This is unusual, but it showed a good trait in this man, in that he was always on the same level with his boy. As parents people, will cease to be a question when parents and children become pals.

The farm family is a stronger unit than that of the city because there is a common interest and a working-together on the farm. So, we feel that

Rainy Day Pastimes.

When children are confined to the house and their most cherished toy fails to arouse interest and games do not appeal, give them a bag of peanuts and let them make a peanut menagerie. They will also need some pins, toothpicks, a few feathers and bits of paper and paste.

Turn the peanuts out on the table and select the odd shapes. A pig is easy, with the fat little peanut for body. Use four toothpicks or pins for legs, two bits of paper for ears—turned down—and a little piece of string for a tail. Mark the eyes with ink. Another nut with longer ears—standing up—makes a cunning bunny. A larger one with a long toothpick trunk and big ears represents an elephant. Another odd shape may suggest a bird. Add a bit of feathers for tail and wings, a bit of toothpick for bill and make eyes with ink.

Each animal may be mounted so that it will stand better. Cut squares of cardboard and use pins for legs of animals, first running them through the cardboard.

Speed in Handling.

An egg can never be any better in quality than when first laid. On the contrary it will inevitably deteriorate if held for any length of time. Since most of the eggs are produced hundreds of miles from the great centres of consumption the time factor cannot be eliminated.

Hence it is very important that the whole marketing process be of such a nature as to reduce to the very minimum the deterioration that is bound to occur between the time an egg is laid and the time it reaches the consumer's table.

It can safely be said that the conditions under which an egg has been kept are of vastly more importance than its actual age in determining what its quality will be at any given time after being laid.

In other words, the promptness with which an egg reaches the consumer after being laid is by no means a guaranty of its quality unless it has been handled properly during the intervening time.

Mount Amour situated on the International Boundary between British Columbia and Alaska, lat. 60 deg., long. 139 deg., has an elevation of 8,776 feet. It is named after Hon. Mr. Justice John D. Armour, Chief Justice of the High Court of Ontario, who was one of the original Canadian members of the Alaska Boundary Tribunal in 1903.

A POOL FOR THE BIRDS

It is a simple matter to make a concrete pool for the use of the birds of your lawn and garden.

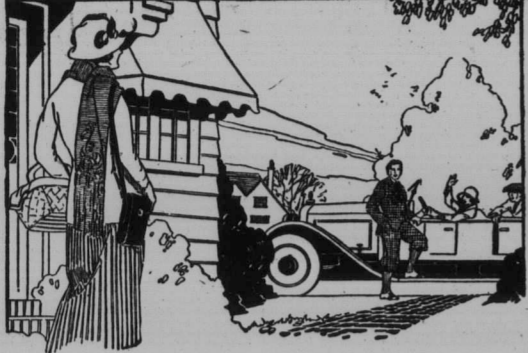

A shady spot is best for the pool; birds do not like to bathe in the glare of the sunlight. Scoop out the soil in an elliptical hollow, four feet by three feet six inches, with the sides sloping down in all directions toward the centre. The proper depth for such a bath is four or five inches at the deepest point.

Then mix Portland cement and coarse sand—one part of cement to four parts of sand. Add enough water to give it the consistency of common mortar. With either your hand or a mason's trowel plaster the surface of the hollow with the mixture, putting in enough to make the depth at the centre about three inches. It is well not to make the sides of the pool too smooth, as the birds are often wary of a slippery footing.

Such a pool does not necessarily require running water. It may be filled once or twice a week with a few pails from the well or cistern. Scrub it once a week with a stiff broom to keep it clean. With a few shrubs and hardy flowers planted about it, it becomes an attractive feature of the garden.—F. H.

The memorial tower of the parliament buildings at Ottawa nears completion. It will house the world's two largest bell carillons in the world, the sister set being recently installed in New York. The bells are now being built in England.

KODAK AS YOU GO

Letter from Dept. of Highway and Agriculture was read urging upon Council to carry out the provisions of the Noxious Weeds Act. Landowners are urged to co-operate with Council by cutting the weeds on the highways opposite properties, and thus assist in preventing the spread of the weed nuisance.

Juergens—Durrer—That the sum of Twenty Dollars be granted to Mildmay School Fair and Ten Dollars to the Belmore School Fair.—Carried.

By-law No. 10 was read a first time.

Jasper—Wagner—That by-law No. 10 be read a second and third time and finally passed.—Carried.

Durrer—Jasper—That this Council do now adjourn to meet again on Monday, Sept. 4th, for the transaction of general business.—Carried

FOR SALE

Good well drilling machine, Sawyer & Massey Traction Engine and Grain Separator. All must be sold to wind up estate. Address
Mrs. S. Strome, Fordwich, Ont.

TENDERS WANTED

Sealed tenders, plainly marked as to contents, will be received by the undersigned, up to Saturday, Aug. 8th, at 6 o'clock, for the construction of a concrete bridge opposite lot 31, Concession 12, Carrick.

Plans and specifications may be seen at the clerk's office at Mildmay. The lowest or any tender not necessarily accepted.

JOHN A. JOHNSTON,
Clerk of Carrick
July 28, 1925

SUGGESTIONS FOR FALL FAIR

Editor Gazette:

Knowing that you are deeply interested in the success of the Fall Fair, I wish to ask for some space in your paper to place before the directorate of the Carrick Agricultural Society some suggestions, the adoption of which might lead to the interest in the Fall Show. These events should contain an educational, as well as a competitive element, and it is this phase of the situation that I want to discuss.

Being a lady, I am naturally interested in the domestic science, and a little education along this line is something that should be acceptable to all the ladies. I was deeply impressed by hearing the judge at a local fair, not many miles from Mildmay, remark, while examining the apple pie exhibit, that there was not one really good pie shown, although there were eight in the class. The lady, however, whose pie was given first prize, marched off happily with the idea that she was a perfect pie baker.

Making bold to ask the judge why she considered these pies unworthy, I was informed that one pie lacked salt; another pie tasted of the shortening; another pie crust was not properly baked; the filling of another pie was too raw, and the others had also some well-defined ailment that didn't escape the notice of the capable judge.

A doctor told me a few years ago that he makes it an invariable rule not to eat pie, because very few pies are safe to eat. That is not much of a compliment to the culinary ability of the ladies, but there is a great deal of truth in the statement. An eminent Denmark chef, who recently presented the Prince of Wales with a cake, and whose pastry creations have appeared on many of the royal tables in Europe, recently visited Canada, and he said that in his country the ladies ate pastry before rising in the morning, and without any ill effects, owing to its purity. But in Canada, said he, the pastry is absolutely unsafe and unfit to eat at any time of the day.

In the face of this condition of affairs, would not a pie-making demonstration be an interesting and educational feature? The secret of making pies is well worth knowing, and the ladies who attend the show would be able to pick up a few points that would be of great benefit to them.

This demonstration would not involve the society in very great outlay of money, as we believe the local merchants would be glad to furnish the ingredients required.

A butter making demonstration would also be a very interesting event, if it could be arranged. But that is another matter, and I do not want to trespass too far on your space.

Miss Interested

CARLSRUHE

A number from here attended the shareholders meeting of Wm. Knechtel & Son in Hanover. The report of same was satisfactory.

Messrs. Herb Helwig and Carl Gebhardt, Misses Hattie and Georgina Witter, Mr. and Mrs. Charles Fischer and Mr. Ed. Dobson spent Sunday at Port Elgin and Southampton Beach.

Mr. and Mrs. John Durst and daughter, Bernice, and Messrs. Dave, Clarence and Norman Lobsinger of Detroit spent Sunday with friends here.

Mrs. Mary Weiss and son of Chesley spent Sunday with Mr. and Mrs. Peter Girodat.

Mrs. B. Oberle of Walkerton spent a few days with relatives here last week.

Mr. and Mrs. John A. Hundt spent Sunday with friends in Formosa.

Mr. Len. Bruder and Joseph Montag spent Sunday in Formosa.

Mr. Carl Halter of Kitchener is visiting at his home here.

Mr. and Mrs. Leo Wilhelm of Waterloo are visiting at the home of Charles Schwan.

Misses Marie and Fanny Weber of Detroit spent a few days with friends here.

AN IMPORTANT DECISION

A high court decision of wide interest was given recently at Belleville, and of which all municipalities should take notice. The city of Belleville gave the contract to lay a sewer across the street and in filling in the contractor left a depression over the sewer. It was not levelled to conform with the roadbed. A lady from Windsor entered a taxi at the railway station to be driven to a friend's home. The taxi driver passed over this sewer and the impact caused the lady to spring off the seat. Her head hit the top of the car and caused injuries from which medical men declared she would not recover. The judge gave a verdict of \$1400 against the city.

STALLION FOR SERVICE

Peter McKillop by Peter the Great Dam, Katy Tod, 2.08½. Fee \$25.00 Murray Grattan by Grattan Royal Will also be available in two weeks.

R. Trench, Teeswater

GENERAL MERCHANTS

IN MEMORIAM

DUFFY—In Loving memory of W. C. Duffy, who entered into rest one year ago to-day, July 28th, 1924. No one knows how much we miss him. None can tell the bitter pain we have suffered since he left us. Life has never been the same. Daily on our minds we see him. As we did in days of yore. But we hope some day to see him On that bright and golden shore. Sadly missed by wife and daughters

In loving memory of Wm. Duffy You're not forgotten, brother, dear Nor shall you be As long as life and memory last I shall remember thee. —Sadly missed by Sister Martha

FORMOSA.

Miss Minnie Schwan of Owen Sound is visiting at A. L. Oberle's.

Misses Annie Kieffer and Edna Bruder and Messrs. Harry Coulter and Austin Lehman of Kitchener, spent the week-end with Mr. and Mrs. F. X. Kieffer.

Miss Clara Heisz, who has been taking a business course at Toronto, is home.

Formosa again succeeded in winning a victory against Mildmay in soft-ball last Thursday evening. The score was 16 to 7.

Mr. Oscar Oberle is spending some time at Sauble Beach.

Mrs. A. Waechter and babe, Clara, and Isabel and Leonard Oberle are spending their vacation at Sauble Beach.

Rev. J. Egan visited friends in Dundalk last week for a few days

YOU WON'T BE SORRY

(By Edgar L. Vincent)

You and I do a great many things we are sorry for. Every night when our day's work is done and we sit down to think things over memory brings up many a place where we wish we had done differently. "If only could go back and do it over again," we say, "how much better I would have done!" And we can't go

back; the way is closed, the bars up and fate with drawn sword stands on guard at the gate.

But you never will be sorry for the good things you do.

For the last few weeks we have been busy getting in the crops. We have made the land just as good as we could; we have picked out the best possible seed, and we have done the work of sowing and planting faithfully and well. And we expect a good harvest. We have been on the farm long enough so that we know as positively as we know anything that the good oats we plant and the fine wheat we sow will not bring us thistles.

Do you recall that old story of the man long ago who went out to look at his field of grain and was dumb-founded to find that somehow it had been sowed chock full of tares. "How in the world did they get there?" he must have asked. "I never sowed them there. I put in the best seed I could. It must be an enemy has done it." But naturally we have a right to expect that if we saw good seed we shall reap a bountiful harvest of golden grain.

When we sow kindness, our crop never fails to be of the same kind. Do a neighbor a good deed and the time will come when we will see our bins all full, our cribs running over with just the same crop we have sowed.

And there is this fine thing about it: No enemy can ever ruin our crop of good deeds! Sometimes in our farm work we do find tares where we have sowed the finest of wheat; but in this realm of the better nature that never is so. For The Master of the Harvest keeps watch over every good thing we do, and no foe can break through the protecting wall with which He hedges in our homestead of the soul.

So let us go on fearlessly sowing are happy in the good we reap.
