The mischief in all our strong-weak or weak strong churches lies just here in this proxy idea; the disposition, perhaps, with theories sufficiently correct, to regard the minister as, in some sort, a substitute, whose duty it is to make their ecclesiastical affairs prosperous, while they attend to their own secular interest or pleasure, a coachman, as it were, to drive on through smooth places and rough, with horses lean or passengers, paying fare, toll, but after all mere passengers.

ENGLAND'S INTEREST IN THE WAR.

It is quite evident that public sympathy in Britain is largely in favor of Prussia in the contest going on. It could not well be otherwise; for never was war declared on more trivial or on more apparently unjustifiable grounds than the war just declared by France against Prussia. England's final attitude however regarding the conflict progressing will be ruled not by her sympathies but by her substantial interests in the pre sent war. What has she at stake in the

The war now raging has already inflict ed considerable damage on English manu facturing interests. It has disturbed commercial values. It has defeated calculations on which were based large operations in various important branches of British trade. It has consequently driven to bankruptcy a number of British mercantile houses, and, of course inflicted much inconvenience and perhaps positive suffering on many people in Britain. It has raised the price of breadstuffs in England, and made the British workman's loaf more costly. But these and such like mistortunes will be largely the war goes on for any length of time. and Britain's safety and honor permit her to preserve her neutrality in relation to it. There will, on the supposition just named, be an immensely increased demand for British productions of a warlike character. Possibly, too, the production of certain manufactured articles, supplied to commerce heretofore chiefly by French or German skill and taste, but which rendered more costly or uncertain of attainment in France and Germany by the operations of war, may be stimulated in Britain to the advantage of the English artizans. But above all, the demand for British shipping will be vastly increased, and this will benefit large classes connected with shipbuilding, ship owning and ship navigation.

It may be that the course of the war will run in such a direction as to compel Britain to take an active part in the contest. This may happen in either one or other of two ways. If the war is confined to France and Germany, France may make, or attempt Telegraphic system which is rapidly girdto make such conquests as will leave England no choice but to plange into the strife for her own safety or the safety of her Indian Empire. If France subjugates the German Provinces on the West of the Rhine, and seizes Belgium, England must fight, for her eafety will be imperilled if France be allowed to entrench herself in the splendid but to Britain dangerous maritime positions found between Dunkirk and the mouth of the Rhine, and that too while Germany be dismembered and reduced to its former condition of political feebleness.

If France attempts to possess herself of Egypt, England must fight, for the safety rapid flight. of her short road to India will be endangered. That England cannot allow to be done if in her power to prevent it. Now France may attempt both these things. The whole world knows she is determined to push her frontier to the Rhine if possible: and it is matter of history that the first Napoleon subdued and for a time held Egypt, and carried the boundary of the French Empire to the Rhine. What the first Napoleon did, the third Napoleon is likely to try to do, if circumstances appear favorable for the achievement. The early triumph of Germany in defence of its territory would be the surest guarantee of an early peace and of the neutrality of England while the

Should France prove brilliantly successful and Germany be hopelessly humiliated Russia would probably intervene. In such an event Russia might content herself with helping to place Germany on its feet again. Parliamentary News-Telegraphic Exten--Meeting of the Stationing Committee DEAR MR. EDITOR .- The past fortnight has been busily employed by our Legisla-tors and decided progress has been made with many important measures. The Irish Land Bill has passed through the House of Lords, and a few of the amendments it received from the hands of their Lordship's are being disallowed by the sturdy Comcame at the first from Mr. Gladstone, and e generally regarded as a comprehensive and generous measure on behalf of the Irish Tenantry. The Education Bill has passed its most trying stage in the Commons. The Government has been very successful in their management of this important Bill, making at the outset in the Committee sev-eral liberal and urgently pressed concessions, they have secured a measure which will impart a powerful impetus to the existing organizations, and establish in Districts where an Educational deficiency is ascertained, a new class of rate aided schools entirely free from denominational control or the teaching of creed or catechism, yet open for the reading of Holy Scripture.

"Your newspapers of all political shades talk a great deal about the question of the personal infallibility of the Pope, but none of them has defined the irue point of view from which it ought to be regarded, the majority, probably, because they are badly informed, and some it ought to be regarded, the majority, probably, because they are badly informed, and some because they are not permitted, or do not wish, to show their cards before the proper time is come. For eighteen years the Jesuits have been pursuing a deeply-laid plan, which they of late matured, since the conviction has forced itself upon them that the temporal power of the Pope approaching its end with irresistible rapidity. New pecuniary resources had to be found to supply the place of those which would be closed to the Holy Chair by such an event. Now, all the possessions of the Jesuits belong to the whole Order. Nothing is the peculiar property of a special mission, monastery, &c. The General has an unlimited power over all the pecuniary resources of the Jesuits, which he disposes of according to the wants of the time, and can recall and divide in a different manner, when, by so doing, he hopes to further the purposes of the Order whose head he is. This is not the case with the rest of the property of the Church. It belongs to certain chapters, monasteries, &c., which, as may well be supposed, are not always inclined to renounce their possessions in favour of the whole Church. Very rarely, and only in special cases, do they sacrifice part of it for general purposes, and they are in the increase of wealth of all British America. If the Government would only take the right course; if they would only make their sacrifice part of it for general purposes, and they are in the increase of wealth of all British America. If the Government would only take the right course; if they would ouly make their their possessions in favour of the whole Church. Very rarely, and only in special cases, do they sacrifice part of it for general purposes, and they never do so without reluctance and resistance. This is to be changed. All clerical possessions are to become the common property of the whole Catholic Church. In order to effect this, the right of disposing of them must be placed in the hands of a single person—the Pope. The dogms of infallibility is the only means of securing this end. When it is once proclaimed, the Bishops, Abbots, and Chapters will be placed in a position which will render it impossible for them to assert their claims to the

The following extract from the Roman correspondent of the Augsburg Allgemeine Zeitung shows this very clearly, and gives an outline of a very remark-

able speech of Archbishop Connolly, of Halifax, on the subject. We are told that ;-"A feeling of relief came over the Aula when, after the bombastic declamations of the adherents of the Curia, two men who speak the English language dwelt on the question, and the way it had hitherto been treated, with the clear and healthy common sense peculiar to their race and country. The first of these, Archbishop Ergington who was once Cardinal and the country of the country. The first of these, Archbishop Ergington who was once Cardinal and the country. the clear and healthy common sense peculiar to their race and country. The first of these, Arebbishop Errington, who was once Cardinal Wiseman's coadjutor, but soon fell under the displeasure of the Pope, strikingly characterized the senselessness of the whole method of procedure. Speeches had heen made for and speeches against the dogma; one had affirmed, and the other had denied; but no one could suppose his words had been of any use—that they had had any effect or done anything to further the cause he had at heart. The deputation alene had the privilege of examining the speeches, and that body did not belong to the whole Council, but only to the majority; 'how yard Cameron was deposed from the Grand rhole Council, but only to the majority; 'how yard Cameron was deposed from the Grass twas formed we know.' As a tribunal, the Mastership, and Mr. McKenzie Bowell elected Conneil ought carefully to examine the facts, estimonies and traditions which bear on the uestion, and there was only one way of doing question, and there was only one way of doing this. The example of the great Councils of former times, also that of Trent must be followed. Deputations should be formed of both parties, and conferences held, in which scientific inquiry might take place of rhetorical displays—of both parties, for it was useless to ignore the fact of their existence, as Billo had done. He concluded with the words: 'Modo in hoc consider fit aliter et ideo inepiissime,' and proconcilio fit aliter et ideo inepiissime, and pro-posed the formulo: 'Magisterium universæ ecc-lesiæ est infallibile.' Vitelleschi, the Archbishop of Osimo, who followed, made no impression monument to his memory. At a large and whatever. THE NORTHWEST TERRITORY

The despatches from Ottawa to the Up-

advices have been received from the British cient to make a dozen or more large Provinces, the fertility of its many millions of rivers, embracing thousands of miles of na vigation in a stretch, its pure water and salubrious climate generally, its wealth in forest and in coals and other minerals, its furs and other natural products, all go to about one hundred and thirty miles of rail way, in two unequal sections, will give raright course; if they would only make their fiscal policy, part of which is the most liberal in the world—that relating to ships and shipbuilding—consistent; if they would strike off all taxes on such articles of foo washed by three oceans, and whose prestige is rapidly extending and will soon be world wide. As we take in these prospects, and think of the perils we have escaped through the doctrine. The dogmatic discussions are after all only sham fights. The Jesuits are no idealists; they have always practical ends in view. Men of a similar character are also to be found among the Bishops, though they do not torm the majority of the episcopate, and they are beginning to perceive the threatening danger. When the Pope, by means of his infallibility, has become the absolute master of the entire property of the Church, he will have to decide whether he will go hand in hand with the General of the Jesuits, or venture to comexcite enthusiasm, this can only proceed from lamentable ignorance or unfortunate and unpatriotic political sympathies or pre-dilections.—St. John Telegraph.

THE MYSTERY SOLVED .- It is authentically stated that the missing man Hector Munro, the bero of the River John tragedy, on account of whose unaccountable absence, Cameron of River John was arrested but was afterwards set at liberty, is alive and well. At the time of the greatest excitement consequent on his disap-pearance from River John, he was at Pugwash, but afterwards went to Sackville, N. B., where he remained all winter, working this spring on the Eastern extension railway, At Sackville he was known by the name of John Murray. Mr. John Murray of Earltown, who is employed on section 11 of the Intercolonial Railway, and who knew young Munroe, hearing that the young man had been seen at Sackville, went over there last week to enquire for him. He had no difficulty in finding him, and immediately informed his family of the fact of his being in that place. We are informed that the young fellow tells a long and very incomprehensible story to account for his strange conduct.

Time may never tarnish more! Then your pearl that dropped so lately From its fragile setting here, And you laid aside so sadly,

Blinded by the falling tear,

Ye shall find a light encircled, Pure and precious, spotless gem, Through eternal years to glisten In your fadeless diadem! -For. Mag.

# AN IMPORTANT DISTINCTION

The wise man writing by inspiration says, "Train up a child in the way be should go,

Solomon enunciates a law the right apprehension of which would as certainly insure us, from right sowing in childhood, a good crop in age, as seed corn dropped in the Spring furrow insures ripened corn in the Fall. But to understand that law we have need to note its terms. Train up a child in the way he should go, says Solomon. We content ourselves with teaching. Now the difference between teaching and training is recognized in all education. It is commonly though unphilosophically discriminated by the terms theoretical and practical. In the one case the mind simply apprehends the truth; in the other, under the influence of that truth. some organ in the mind or body is put into active exercise. A child is taught botany when she learns the names of classes and genera, and the appelation of the various parts of the plant's anatomy, from her text book. When she goes out into the fields, picks for herself the flowers, analyzes them, examines their parts and assigns them places, she is training herself in botany. In the one case she is simply informed of a fact and quickly forgets it. In the other, she exercises her power of perception and judgment; and, if this is repeated until it becomes a habit to characterize every flower that she sees by its class-name, she never wholly loses the power thus acquired. Knowledge gained is soon lost. Power once acquired is almost never wholly lost.

Now apply this distinction. You may tell your child that it is exceedingly wicked to get swear again during the passage. angry, and accomplish nothing. But, if you can succeed in habituating him to control his temper when a child, you may rest perfectly secure that his temper will not control him when he becomes a man. You may teach him that patience is a virtue, and he be none the better. But, if you can develop within him the power of patiently bearing the burdens of childhood he will never lose that power in his manhood. You may tell him that God is very good, and that he ought to love him, and yet the boy may as chewing the weed, and you will soon get rid grow up an atheist; but, if you have the skill to inspire a childish love for God in his young heart, nothing can efface it. In a word, you may instruct your child in religious truth, and his manhood life reek with vice. But exercise his faculties in a religious life, and he never can lose the power which thus he will have acquired.

For character is the product of habit. We are what we have been accustomed to do What the child does at first with difficulty he comes by repeated experience to do with ease What he habitually does with ease he does at length unconsciously and by the necessity of his nature. This is the meaning of the familiar proverbs: "The child is father to the man" "Habit is second nature." Instruction is like coloring upon the surface of the cloth; it fades with the first washing. Habit is like a dye infused into the thread before the pattern is woven; nothing can extract it. The principles that are learned in childhood are often left behind when the pupil leaves the school-room.

### The Mason & Hamiin CABINET ORGANS. ARE THE BEST.

As proved by the almost universal preferen musicians; the uniform award to them of highest premiums at Industrial Exhibitions, including the Paris Exposition, and a demand for them far exceeding that of any other instrument of the class.

The great demand for these celebrated instruments has enabled their manufacturers to so greatly offer them at prices of inferior work. Five Octave Organs, with Five Stops, Tremulent and Knee Swell, and the Mason & Hamlin Improvements, found in no other Organs, \$125. Other styles in proportion.

A Testimony Circular, with the testimony in full to the superiority of these Organs, from a majority of the most eminent musicians in this country and many in Europe; also an Illustrated and Descriptive Circular, with correct drawings, descriptions and prices, will be sent free of all expense to every applicant. Any one having any idea of buying an intrument of any kind, should at least send for these cultivated taste. ircula rs, which will cost him nothing and contain much useful information. Address THE MASON & HAMLIN ORGAN CO., 154 Tremont Street, Boston, or 500 Broadway, New York. ja 12.
