Ayer's Cathartic Pills,
For all the purposes of a Family Physic, and for curing Constiveness, Jaundice, Indigestion, Flatulency, Stomachic, Headache, Erysipelas, Rheumatism, Eruptions and Skin Diseases, Biliousness, Dropsy, Tumors, Worms, Neuralgia, as a Dinner Pill, or for Purging the Bowels.

Are the most effective and congenial purgatives ever discovered. They are mild and effectual in their operation, moving the bowels surely and without pain. Although gentle in their operation, they are still the most thorough and searching cathartic, cleansing the stomach and bowels, and even the blood. In small doses of one pill a day, they stimulate the digestive organs and promote vigorous health.

AYER'S PILLS have been known for more than a quarter of a century, and have obtained a world-wide reputation for their virtues. They correct diseased action in the several assimilating organs of the body, and are so composed that obstructions within their range can rarely stand or evade them. Not only do they cure the every-day complaints of everybody, but also formidable and dangerous diseases that have baffled the best of human skill. While they produce powerful effects, they are, at the same time, the safest and best physic for children. By their aperient action they grip much less than the common purgatives, and never give pain when the bowels are not inflamed. They reach the vital fountains of the blood, and strengthen the system by freeing it from the elements of weakness.

Adapted to all ages and conditions in all climates, containing neither calomel nor any deleterious drug, these Pills may be taken with safety by anybody. Their sugar-coating preserves them ever fresh, and makes them pleasant to take; while being purely vegetable, no harm can arise from their use in any quantity.

Prepared by Dr. J. C. AYER & CO., Lowell, Mass.,
Practical and Analytical Chemists.
SOLD BY ALL DRUGGISTS AND VEEGETARIAN STORES.

Ayer's Hair Vigor,
For restoring Gray Hair to its natural Vitality and Color.

A dressing which is at once a greauble, healthy, and effective preparation for preserving the hair. Faded or gray hair is soon restored to its original color, with the gloss and freshness of youth. Thin hair is thickened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such a result can be secured for usefulness by this application. Instead of making the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous, and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a

HAIR DRESSING,
nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich, glossy lustre and a grateful perfume.

HALL'S
VEGETABLE SICILIAN
HAIR
RENEWER

Every year increases the popularity of this valuable Hair Preparation; which is due to merit alone. We can assure our old patrons that it is kept fully up to its high standard; and it is the only reliable and perfect preparation for restoring GRAY or FADED HAIR to its youthful color, making it soft, lustrous, and silken. The scalp, by its use, becomes white and clean. It removes all eruptions and dandruff, and, by its tonic properties, prevents the hair from falling out, as it stimulates and nourishes the hair-glands. By its use, the hair grows thicker and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most economical Hair Dressing ever used, as it requires fewer applications, and gives the hair a splendid, glossy appearance. A. J. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality; and I consider it the BEST PREPARATION for its intended purposes." Sold by all Druggists and Dealers in Medicines at the Price One Dollar.

Buckingham's Dye.
FOR THE WHISKERS.
As our Renover in many cases requires too long a time, and too much care, to restore gray or faded Whiskers, we have prepared this dye, in one preparation; which will quickly and effectually accomplish this result. It is easily applied, and produces a color which will neither rub nor wash off. Sold by all Druggists. Price Fifty Cents.

The Star.
DAILY PUBLISHED BY J. E. COLLINS.
VOLUME II. CHATHAM, N. B., OCTOBER 2, 1880. NO. 192.

North Star.
J. E. COLLINS, Editor.
CHATHAM, N. B., OCTOBER 2, 1880.
PROSPECTUS.
This is the STAR. We have no apology for it. It must speak for itself.

And now our mission. There is an ideal press before whose shrine we bow: what that ideal is, we would have our readers know. It is that press which knows no private interest or party zeal that stands in the way of the public good. It is that press which marches on in advance of the people, thinking for the masses and moulding public opinion. It is not a press which lags in the rear, till the strongest protest in any land is an intelligent, moral and free press, that sets up for its motto that written by Judge Story—a press
"Unawed by influence and unbribed by gain."
We say we worship at that shrine—and we do so; and it shall be our constant aim to make a paper a counterpart of the model we have set up, caring less for the gains than the name, and finding a better reward in the praise of posterity than in the gold of the hour.

The duties and the responsibilities of the press are great and grave. Questions often arise suddenly that the public mind does not take the trouble to consider, but the newspaper editor must always be prepared to show some clue to the mystery or to put some interpretation upon the most involved circumstances. He must think more hastily than other men, and reach conclusions faster—then if his judgment be faulty, the public, which in the end is always right, will detect his shortcomings. The duty of thinking for one's self is important enough, and the man who is able to do so is generally above the common; but how much more important is the duty of him who thinks for the thousands and fashions their opinions after his own. If the sun be eclipsed the earth will be darkened; if he whose doctrines may become the rule of the state should spread abroad insidious teachings through the press, many of the thousands who look upon him as a teacher will catch the infection.

The press is the first and greatest born of a free people. Before the days of the press superstition and ignorance held sway over men's minds, tyranny lorded it over the land and bad kings sent innocent men to the block for a miserable whim. But when the press once began to breathe the spirit of the people through its columns, tyranny faltered and autocrats and evil combinations trembled before it. In Russia to-day there is no free press, but there is a rule of knout and iron—a galling tyranny that we free people cannot conceive of.

In countries blessed with the glorious boon of liberty, the press is to-day the greatest power upon the face of the earth, and there is no man, no matter how high his station that does not bend his knee before it. With such a conception of the press, and of the duties of those who control the press, we give this paper to our readers. And if we have faithfully portrayed our ideal newspaper, and the duties of a proper editor we have stolen a march on our readers and given them our prospects.

Next to the harvest of the land that of our fertile waters is most important to our people here. The question therefore of our fishery and how that industry may best be perpetuated if not fostered, is one for grave consideration. It seems to us that in the past our dealings with this question have been more or less speculative and every process for the repopulation of our waters a mere trial one. We shall not only approve further expenditures in the search for success, but we shall ask a much larger appropriation for our Maritime sea and rivers than they have received in the past, believing that at the present they receive far short of their share. Upon our fisheries here thousands of people are dependent for support, while in other quarters where the fisheries never can be to our people, lavish sums are expended with the most ridiculous results. There is a batch of useless officers in the Fishery Department that ought to be sent on "long holidays" and better men be put in their places.

Upon this history question we shall be on the side where lie the interests of Miramichi and the North, and we shall insist on the laws relating to the protection of our fisheries being rigidly enforced. If to the farmer or the lumberman what we could say might ever be useful, let him depend upon our assistance; and much within newspaper scope can be said in the interest of both.

A nation's wealth consists in her natural agents, her resources and her factories. The two former this favored country has; it shall be our constant task to show our people they should have more of the latter. For this we have a National Policy.

We think in the matter of postal telegraphic service, the important fishing settlements along the Miramichi and other parts of the North Shore have been left out in the cold. If Dr. Fortin's scheme be as advantageous as it is claimed, then we do not want to have our fishermen denied these advantages. And with the powerful friends this county has "at court," we feel assured that the privileges of the telegraphic postal service will soon be extended to us. To this end the Star's efforts shall also be directed.

Upon the principle that under responsible government, the country is ruled by the party, and that without party responsible government is impossible, we shall be the advocate of such party politics as seem to us best for the interests of the country—of our Province and the Dominion.

We shall always deal with their public record, save where private dealings crop out in public digest, or where the one is inseparable from the other. Then we know no man as we know no money. We believe there is no greater poltroon than the coward who sits at the editorial desk and is afraid to speak his mind. If we are only to get bill heads and dodgers to print by another ing our convictions, then we shall be pleased to starve. Yet we also know of some men presiding over newspapers who are nothing if not abusive; and who unfortunately often please and carry the crowd as does the clever ruffian on the street corner, who is overflowing with words and fertile in low smart retort. These vulgar persons scrag the press to the level of those to whom they cater. Our fact shall always be set against such characters.

JOB WORK executed with Neatness and Despatch at this Office.

Local Matters.

Sheep Purchase.
Messrs. Morrison and Vanstone, have purchased some very fine sheep from the Island schooners now in port.

Improvements.
We are glad to see that the Commissioner is fast setting the sidewalks in order. His duty in this respect ends simultaneously with ours.

Caribou.
Mr. Morman of Caribou came into town yesterday with a carcass of caribou. He sold the venison for 7 cents a pound, and was offered \$3 for the head which he refused.

Fire.
The house of Mr. Jude Robicheau of Kouchibouguac with all its contents was destroyed by fire on Wednesday last during Mr. Robicheau's absence. No Insurance. We sympathize with Mr. Robicheau.

A Beaver.
Mr. Connell of Bartibouque was exhibiting a live beaver through the streets the most of Thursday last. In the evening Capt. Barry of the ship *Brookville* bought the animal from him for \$20. He took it across the Atlantic with him.

Personal.
Hon. Senator Muirhead has returned from the upper provinces. He says Montreal might be compared to a large hive; and that the prospects for a still livelier state of commerce are visible on every hand. The Senator is largely interested in several enterprises in the upper provinces, and during his late trip was looking after some of his affairs.

The Surveyor General went up to Fredericton Tuesday last. He will be in St. John the most of next week.

The Chief Commissioner went up the line to Bathurst, Thursday morning, looking after the great roads and bridges. A more watchful and pains-taking Commissioner than Mr. Landry, it would be hard to find, yet those who are paid to grubble not a hundred miles away find fault with him.

A Million and a half in Hand!
We learn that M. Alexander Gibson yesterday received from the hands of the new N. B. Road Company, the sum of a million and a half of dollars. The purchase price of the line, rolling stock, station houses, etc., and the 2,000,000 acres of land was \$2,000,000, but Mr. Gibson and the Burpees retain 25 per cent of the new Company's stock, or \$500,000. Two millions is a large sum, but without the Company gets a dead bargain. The two million acres of land at a dollar an acre is worth the money; then the line and its equipments are "thrown in."

We understand the new Company takes charge the first of this month; and at an early day they will push the line through to the Intercolonial at a point on the St. Lawrence. The gauge will be widened and the St. John River at Fredericton will probably be bridged.

Correspondence.
"A. L. B." of Newcastle, sends us a letter which while strongly approving we would hardly care to publish in its present form. The gist of it, is a denunciation of "gossips" of every form. The gossips who take heed of the hole in their neighbors' stockings while the entire heel may be out of their own. The gossips who are perpetually washing the outside of the cup and never taking care about the inside. The gossips who take special delight in slandering the school-teacher because little Johnnie or little Katie has been "unjustly punished poor child" by the teacher. It is stated that the character of certain teachers have been assailed in a public way; but in giving us this information of a matter in which we do not wish to meddle, our correspondent mentions no names. We believe however our Newcastle special correspondent refers to the same matter in today's budget. If we might be permitted to give a word of advice to all parties we should say to them to settle the matter, and not give occasion for still more gossip over their mutual foolishness.

The "Expus."
Within the last few days a good many persons have taken the train from here for Boston. The larger number of the emigrants are young women who go to seek employment in the New England factories. The balance of those who have left are young men who when the mills close down find themselves out of employment the winter round, till the wheel begins to go in the spring. This season in consequence of the scanty rains the mills must close four or five weeks before the average time; so the loss of this time on the millmen comes unexceptionably hard. It must be borne in mind however that for this many a year on the closing of the mills numbers of young men have gone off to Boston and other parts, most of them returning with the spring. Next season, like the past spring, the same will unquestionably be the case. It seems to us a great pity to have so many young women going away to give their valuable toil to New England factories, when we might have well-paying factories of our own here, if our men of capital and enterprise would only here and there divert their eyes from the great staple of the Miramichi river. It is impossible for us to think that we can live by one thing alone.

RATES OF ADVERTISING

CHATHAM, N. B., OCTOBER 2, 1880.

HOLDING FAST.

The autumn leaves are falling, yet Judge Weldon sticks fast to his resolution to remain upon the Bench. It may be as well to inform our readers that Judge Weldon is one of our Supreme Court Judges, a very, very feeble old man whose term expires this autumn, and who may if he choose live the rest of his life in retirement upon a pension to which his services have entitled him. Judge Weldon has lived to a ripe old age, and at the present is not much fitted for any employment, unless it be to pray; yet he has we are told no notion of retiring, though he has received a hundred hints that he ought to make way for a younger and more vigorous man. He has no excuse in the world for staying where he is; and there are scores of nice quiet places he could get where he might live the rest of his days. Judge Weldon's stubbornness in this matter is rather notable, and plainly it would be an act of charity for his nearest friends to point out to him that those who thought him upright and learned in his day as Portia, now feel that he would be much better in private life than torturing his age and feebleness with the intricacies of law.

But where one should look for friends of the poor Judge, he finds enemies; and among these enemies is His Honor's own son Charlie. Now Charlie is a Grit member who is representing St. John for the last time in the Commons, and being a Grit, and a firm believer in prophecies, he regards it as a dead sure thing that at next election the Conservatives will be routed, and on Mr. Blake assuming power, he will be made Judge in the vacancy represented now by his father. He consequently advises the Judge to remain where he is, assuring him that they (the Government), cannot put him out.

Well, they are not likely to dismiss him, though they can if they wish for sufficient cause, and old age must be a sufficient cause, impeach him. But impeachment is a delicate matter and the Government will hardly resort to it; though glancing through the personnel of our Dominion benches a few impeachments would not earn for our Government the name of being over particular.

We understand Dr. Tuck is very anxious to get Judge Weldon off the Bench that he may get the place. He is a great friend of Sir L. Tilly's and he has gone so far as to demand the appointment. Hon. George E. King also thinks the time has come when Judge Weldon should leave the Bench; probably taking this view from the belief that he is so well qualified himself to take a Judgeship. We know of no one we would recommend for the position before Mr. King, but that he knows very little law; and a judge on legal matters ought to be fairly posted. We think our local Government could spare an ornament to our provincial Bench.

IRISH MATTERS

Mr. PARNELL has left New Ross for Dublin to hold a special meeting of the Executive Committee of the Land League, at which a scheme for obtaining more detailed information in regard to the management of estates will be discussed. Mr. Parnell stated that he did not fear prosecution against the speakers of the Land League, as they doubtless, would be abortive. Illegal drilling continues at Arragh.

We are glad to put the Charlotte-town Presbyterian upon our exchange list.

RETURNED.

SENATOR MUIRHEAD has returned from a fortnight's trip to the Upper Provinces. Part of his mission was in his own interest, for the worthy Senator conjointly with others is largely connected in business enterprises in Upper Canada as well as here. The other part of his mission was in the interest of the people of Northumberland. To this end he appointed an interview with the worthy veteran of Northumberland Conservatives, Hon. Peter Mitchell, on the matter of an extension of Dr. Fortin's coastal telegraphic system to Chatham, and other topics bearing on matters of much interest to the North Shore, and Northumberland in particular. Our two worthy representatives,—for we may say that though Hon. Peter Mitchell resides in Montreal, he is as active in our interests as if he lived among us—concluded to press the matter of telegraphic extension upon the attention of the Government and Dr. Fortin: and we may inform our readers that when the Coastal System is established, our fishermen on the coast will not be found in the cold. Senator Muirhead has brought home assurances that the materials for the lines and cable connections are on the way, and though the line between here and the coast had for the time slipped Dr. Fortin's memory, it will be established simultaneously with the balance of the system.

DASTARDLY ASSAULT.

On Thursday evening about ten, Capt. Barry and two or three gentlemen belonging to town were walking down the main street on their way home. Presently they heard a noise and great shouting, nothing uncommon any night in Chatham, though we have two policemen. The captain made some remark like, that they should be on board their ship; but the gang was of the stabling class, and turned with fists and stones to make attack upon the party. Quarrel was fustured from the minds of the party with the Captain, so they had to fly to escape the missiles hurled at them by the sailors. Mr. Daniel Crammins saw the attack and endeavored to ascertain who the parties were, but was followed by two, one of whom as he went up his own back stairs stabbed him several times in the back. He is now confined to his house. The sailors were arrested and arraigned today before Mr. Magistrate Blair. Two were retained for examination on Monday, the rest are on bail to serve as witnesses. Those dastardly ruffians who use knives upon persons after night should be taught a lesson they will never forget.

THE PARLIAMENT BUILDINGS.

The progress which Mr. Lawlor, contractor for the New Parliament Building has made with his work is little short of surprising. We well remember before a sod was turned the predictions that many made. Some thought there was not money enough granted, that any contractor would "burst up" by taking it; and that Mr. Lawlor could not escape the inevitable. Then some who were of interested rings tried to prove that Mr. Lawlor had no experience in heavy building, and that the Government were open to grave censure for giving to a novice such a heavy contract. Indeed we received private letters ourselves, that time conducting the Fredericton Star, assuring us that Mr. Lawlor could not get bondsmen, and asking us to urge the Government to set aside his tender. But the bonds were, nevertheless, signed, and the contract secured to Mr. Lawlor in the face of the rings.

And under one of Chatham's most energetic men, see the results. Already the walls of the building are well nigh completed, the library is entirely finished and plasterers are at work through covered portions. Instead of finishing next autumn as the contract provides, next June or July at furthest will, we believe, see the building completed, Mr. Lawlor with a handsome margin in his pocket, and with a reputation for push and management established for the rest of his life.

According to the original specification the roof was to have been gravelled, but we learn the Government have decided to use zinc, which properly soldered will be more durable and make the building as tight as a bottle.

A TREMENDOUS EXCOMMUNICATION.

THE Independent Catholics celebrated their third anniversary in New York on Monday evening last. It is our painful duty to inform our readers that at that meeting a document was read by Father O'Connor excommunicating the Pope! Father Chinequy very strongly approved of the excommunication.

GONE.

SEPTEMBER has fled away, and now we have what poets call the melancholy days upon us. 'Tis true October gives forests of living gold, but these are but the flushes which precede the death of nature. With September we have lost autumn's spicy breath and sober green and the lovely harvest moon which shed its mellow light upon the late workers in the field. The perihellion of Jupiter has passed, and heaven gazers think that that big bright star which lately rose at eve over the eastern hill, pursued its stately course across the heavens through the night, and in the morning dropped down to sleep in the west.

Instead of for roses now, fair maidens go out into the forest and gather autumn leaves, which they wax and put upon their hats and ball room dresses. In England this winter the belles will use autumn leaves as the chief ornament and already the beauties for which Fredericton is famed have begun to appear trimmed in gold leaf. We may remind Chatham fair ones that there is a wealth of trimming in the forest which can be had for the gathering.

UNTRUTHS.

It is untrue and damaging for those papers who state that the business of the country is not increasing. Some papers are hired to state that the deal markets are sensitive and weak; knowing that if these statements are believed, men who would otherwise invest capital in the woods will lose courage and keep their money in their pockets. Is this the way the press of this country is beginning to turn traitor to the people maintaining it? and this is the kind of press the people continue to maintain! Why more damaging statements than the above at this season were never set afloat on the Miramichi. It is simply an outrage.

It is not true the markets show weakness or that the prospects point to a poor market next spring, for during the winter a hundred matters may arise to override the present tendencies. Our foreman tells us he has room for no more timber, so we must defer this crying subject for another issue.

CORRECTION

In our last issue we published the following advertisement:

Any person using the name of the N. York Singer Co. by the name of Cass. G. Paul is to be treated as a fraud. He has no connection with the Company. H. G. FARNHAM, Manager Singer Co.

In reference to this we gladly publish the following:
To the Editor of the Star.
Dear Sir,—Having noticed in your last issue an advertisement signed by H. G. Farnham, I beg to call the attention of the public to the facts. Said H. G. Farnham is in no way connected with the Singer Manufacturing Company. I do not find it necessary to refute the imputation against my own character, but I think it desirable to make the facts public in the interest of the Singer Company whose only legal agent in this County I am.
I remain yours,
CHARLES G. PAUL.

JOB WORK executed with Neatness and Despatch at this Office.

A VOYAGE TO CALCUTTA.

What I Saw There.

While in India I was very anxious to see a Hindoo woman in her native dress, and this I accomplished through our stevedores; what his proper name was I do not know, but he went under the sobriquet of "Yanker Dick." Dick was rather a genius in his way and could talk English very fairly but could not get over the noxious way of sitting, which always seemed to me the most uncomfortable position one can get into: it is simply the children say sitting on their hunkers. The knees are bent until the body almost touches the ground, and the coolies will remain in this position for hours. This was Dick's favorite position, when not at work, and the sailors used to amuse themselves by knocking his feet from under him and asking him why he did not sit like a white man. Hearing that Dick had lost caste I asked him how much of a family he had, he had two girls. I then asked him if he would let me see the inside of his house and his family as I had never seen a Hindoo family. He agreed that if I could come with him on the following evening I could see them. So on the next evening I accompanied him to his home which was not far from Chatterjee's lower part of the city. His house was built of bamboo with a thatched roof and one story high. We entered at once from the street into the room almost immediately moved by chairs, but presenting a goodly show of brass pots on a shelf. I sat on a box which Dick went for the girls. He soon returned, and in a few minutes he was gone. I explained that I had come to see them in their native costumes. They seemed rather disappointed, but we tacked and soon returned, two very pretty girls, about as dark as Melanots, with large black dreamy looking eyes, straight noses and thin lips; their jet black hair was long and done up in heavy coils high on their heads; their dresses were very becoming and consisted of two pieces, the inner one white cotton or linen, and the outer one pink silk. These were wrapped around them so as to cover the body, and the lower part of the neck; and in such a manner as to expose the inside of the arm to the elbow, when the arm was hanging down; but when bent, leaving a long joint depending from the elbow. The lower part of the dress was arranged in like manner, showing the inside of the leg from the knee down, which is long tapering piece hung down as far as the feet, and this strip was fastened by a large silver pin at the bosom. They wore both bangles and bracelets on their wrists, and their feet were adorned by a pair of small shoes, which they seemed pleased to hear clink as they often knocked them together. While they talked about the room, their movements were very graceful, and they were, though slight were beautifully formed, which indeed I found to be the case generally as one of the Bengalees both men and women. They seemed to appreciate admiration quite as much as the sex generally. I afterwards saw a Hindoo woman who wore no clothing but the cow-dung, which she had smeared upon by the lowest class, with a solid gold bangle on one of her ankles, which I should think was nearly two inches wide and half an inch thick. They are very careful of these ornaments, and some of them are very old, having been handed down from generation to generation.

The burning place, where the bodies of the dead are consumed is just above the city near the bank of the river. I did not visit it, but could see the smoke from the funeral pile constantly ascending. The Suttie is no longer allowed, and the widow is not buried with the dead body of the husband. The Hindoos still hold to a practice of throwing the dead into the sacred river, as they consider the Ganges as a deity, and it is necessary to lay it is indulged in away from the city when they get an opportunity, and judging from the number of bodies which floated by the ship, I should have thought the opportunity plentiful. On almost all of these bodies, buzzards sat engaged, in their ghoul like repast, and it was a common saying among the natives as they saw a body float, "There comes a coolie with two or three passengers," according to the number of buzzards upon it. There is a boat and crew employed by the Government in sinking corpses, but great numbers escape them and float past the city, and what the buzzards do not dispose of on the water, the jackals finish, if they come ashore on the river bank. These animals are very numerous along the river banks, and are bold enough to come into the city at night. I had for a day or two to rent on the Barrackpore road not far from the city, and with the assistance of a few Indian laborers, I had myself and our servants in it. It was a small den but quite a story high, with a piazza run up on it, and one entered through a door of which I had a bedroom, one as a dining room and one as a sitting and smoking room. The seats slept about the piazza, and I could see to come and go to know where they did sleep during the night, but during the day they were always to be found asleep on the piazza, so I presume they occupied the same couch at night. The furniture of the bed room and dining room was such as is usual in the apartments, but the smoking room was furnished with a sofa and a few chairs around the walls, one on each side of the room, were four small lounges or divans; and a few bamboo chairs, and some scattered about the room; but the crowning luxury was the hooks, or water-pipe, which stood upon a small round table in the centre of the room. From this table hung four long flexible stems, each of which would reach to the mouth of the person reclining upon the divan on the corresponding side of the room. The stems were particularly charged this pipe was, was named Samia, and very well he performed his office. The windows of the bungalow were hung with mats made of a kind of grass and these were kept continually wet by the Bhutia or water carrier during the day, the evaporation keeping the room cooler than the outer air; in each room he gave a small monkey, or water-cooler, a pot on a carbon vessel, which, as the water sank through it and evaporated, kept that remaining cooler than it would otherwise be, but not cool enough to prevent the use of ice over the bed and the dining table hung punkas or wooden frames covered with cotton, that upon being pulled by the servants at meal time and upon getting into bed, gave one a chance to sleep by keeping the air in motion like a large fan. The cooking was done in the yard, a Gypsy. I remember passing near the fire and accidentally touching my servants were cooking for themselves; my touch had defiled it, and they throw it out. When moving into my bungalow, one of my servants pointed out a cobra de capello [a remarkably poisonous snake] under a shrub in front of the building, and suggested that I should get a snake charmer, to take it away, saying that he knew of one: I sent him off for his friend, who soon appeared having fortunately been close at hand. The charmer sat down in true snake fashion, and taking two snakes from his sash placed them on the ground, and then upon receiving it walked off. I was always thought, and always shall think, that this little snake affair was quietly arranged, and carried out by the servant and charmer.

FALL AND WINTER DRY GOOD?

A. J. LOGGIE & CO.

The Subscribers have just received from Great Britain and elsewhere a very large and well assorted stock which they offer at the very lowest prices for cash.

Bargains may be Expected

LADIES' MANTLES, DOLMANS AND SHAWLS. LADIES' ULSTERS FROM \$3.50 UPWARDS.

Local Matters.

Sheep Purchases.
Messrs. Morrison and Vanstone, have purchased some very fine sheep from the Island schooners now in port.

Improvements.
We are glad to see that the Commissioner is fast setting the sidewalks in order. His duty in this respect ends simultaneously with ours.

Caribou.
Mr. Moran of Caribou came into town yesterday with a carcase of caribou. He sold the venison for 7 cents a pound, and was offered \$3 for the head which he refused.

Fire.
The house of Mr. Jude Robicheau of Kouchibouguac with all its contents was destroyed by fire on Wednesday last during Mr. Robicheau's absence. No insurance. We sympathize with Mr. Robicheau.

A Beaver.
Mr. Connell of Bartibogue was exhibiting a live beaver through the streets the most of Thursday last. In the evening Capt. Barry of the ship Brookville bought the animal from him for \$20. He took it across the Atlantic with him.

Personal.
Hon Senator Muirhead has returned from the upper provinces. He says Montreal might be compared to a large hive; and that the prospects for a still livelier state of commerce are visible on every hand. The Senator is largely interested in several enterprises in the upper provinces, and during his late trip was looking after some of his affairs.

The Surrey General went up to Fredericton Tuesday last. He will be in St. John the most of next week.

The Chief Commissioner went up the line to Bathurst, Thursday morning, looking after the great roads and bridges. A more watchful and painstaking Commissioner than Mr. Landry, it would be hard to find, yet those who are paid to grumble not a hundred miles away find fault with him.

A Million and a half in Hand!
We learn that Mr. Alexander Gibson yesterday received from the hands of the new N. B. R. Road Company, the sum of a million and a half of dollars. The purchase price of the line, rolling stock, station house, etc., and the 2,000,000 acres of land was \$2,000,000, but Mr. Gibson and the Burpees retain 25 per cent. of the new Company's stock or \$500,000. Two millions is a large sum, but withal the Company gets a dead bargain. The two million acres of land at a dollar an acre is worth the money; then the line and its equipments are "thrown in."

We understand the new Company takes charge the first of this month; and at an early day they will push the line through to the Intercolonial at a point on the St. Lawrence. The gauge will be widened and the St. John River at Fredericton will probably be bridged.

Correspondence.
"A. L. B." of Newcastle, sends us a letter which while strongly approving we would hardly care to publish in its present form. The gist of it, a denunciation of "gossips" of every form. The gossips who take heed of the hole in their neighbors stocking while the entire heel may be out of their own. The gossips who are perpetually washing the outside of the cup and never caring about the inside. The gossips who take especial delight in slandering the school-teacher because little Johnnie or little Katie has been "unjustly punished poor child" by the teacher. It is stated that the character of certain teachers have been assailed in a public way; but in giving us this information of a matter in which we do not wish to meddle, our correspondent mentions no names. We believe however our Newcastle special correspondent refers to the same matter in today's budget. If we might be permitted to give a word of advice to all parties we should say to them to settle the matter, and not give occasion for still more gossip over their mutual foolishness.

The "Expans."
Within the last few days a good many persons have taken the train from here for Boston. The larger number of the emigrants are young women who go to seek employment in the New England factories. The balance of those who have left are young men when the mills close down find themselves out of employment the winter round, till the wheel begins to go in the spring. This season in consequence of the scanty rains the mills must close four or five weeks before the time on the millmen looks for an exceptionally hard. It must come in mind however that for this many a year on the closing of the mills numbers of young men have gone off to Boston and other parts, most of them returning with the spring. Next season, like the past spring, the same will unquestionably be the case. It seems to us a great pity to have so many young women going away to give their valuable toil to New England factories, when we might have well-paying factories of our own here, if our men of capital and enterprise would only here and there divert their eyes from the great staple of the Miramichi river. It is impossible for us to think that we can live by one thing alone.

Newcastle Local Items.

By the way what is to become of the iron chain? The Dr. has the floor.

EXHIBITION.—A great many of our citizens leave here on Monday to attend the Exhibition at St. John.

LUMBER.—Reports from stream drivers are not encouraging and shippers are looking anxiously for rain.

Gossip.—If the reports current here to day be true it is high time Inspector Cox's report on our schools was published. I forbear any extended remarks for the present, but I will turn my attention shortly to the persons who are supposed to fill the positions of Trustees of schools.

The committee in charge of the co-pasture are about to remove the old fence preparatory to the erection of the new one placed at their disposal by Mr. Davidson of St. John. The new structure will be of pine erected in such a manner as to afford every facility for practice to those who indulge in the art of whitling.

It is understood our local minister's troupe intend in a short time to give an entertainment in the Masonic Hall. They have been practicing some months and will doubtless give patrons good value for their money. It is not true that Policeman Cassidy is to act as Treasurer or ticket seller. He cost the troupe too much already and took too long to tune the banjo. What's that?

Mr. JOHN JARDINE for the last few years proprietor of the Union Hotel in this town is now removing to Chatham. He intends starting a hotel there in the building adjoining the Montreal Bank, lately occupied by the Hon. Wm. M. Kelly as a residence. John is a thorough and good judge of a horse and his wants; while Mrs. Jardine possesses many excellent qualities which eminently fit her for her position as hostess.

LEGAL.—Hogan, Overseer of Fisheries vs Hill for alleged violation of the Fisheries Act, before Justice Lawlor did not go to trial today. The Justice sustained an objection taken by defendants counsel to the effect that this cause should not be tried until another already pending against Hill was personally disposed of. S. Thompson, Esq., Q. C. for plaintiff. L. J. Tweedie, Esq., for defendant.

To-morrow I'll send you another item about Inspector Cox, who I understand was thrown from his wagon upriver today. Dr. Smith was sent for and has not yet returned.

[The particulars are: Mr. Cox's horse took fright passing another horse in a field. It bounded and threw Mr. Cox out on a pile of stones, hurting his side badly and spraining his hand. We are very glad to know Dr. Smith says his injuries are not very serious.—Ed.]

NOTES FROM RIVER DES CACHES.

The spirit of enterprise is not yet dead among our people of this section. I have been informed that Messrs. J. W. and J. Anderson of Burnt Church, and John U. Loggie and Wm. Loggie are preparing to build and start a large lobster factory on Tabusintac Beach next season. The news has cheered our people, as it will give employment to a goodly number about here.

I also learn that our Bye-Road Commissioner Mr. John L. Robicheau has been authorized to expend \$95 on our Bye Road, that is to say such bye roads as were not provided for. That he has also been authorized to sell the building of Indian Brook R. A. Bridge and the Beggs Bridge at Lower St. John.

The potato crop is the best for the past three years and oats are not quite up to last years crops; buckwheat is an average yield.

There is not much talk as yet about the Municipal elections, though it is thought Mr. Romain Savoy who has proved himself so efficient at the Council Board already, will offer. If he does he is quite sure to be elected, as our people want in their councillors, integrity and intelligence, both of which Mr. Savoy possesses. I don't know whether our other worthy councillor will offer again or not. Ramor has it John Johnstone, Esq., is coming.

As far as we are from business centres we feel the effect of the better times. Yours, etc., A.

NOTES FROM THE CAPITAL.

The Surveyor General is at the Barker.

Mr. CHAS. P. WELMORRE is very ill.

The Capt. is yet running, Mr. Copley and Mr. Lugin look after the editorial side, and Mr. James Sharkie and Mr. Perkins gather up the local items. Both are perpetually annoyed with the double interference of the editors. Thus for example Sharkie gets an item on a partridge. He immediately hunts up a book containing a Latin poem (with its English equivalent opposite) on said bird, and he cuts out the Latin leaf, taking for granted it will touch his case, and pins it to his local. Captain Copley comes in: sees the leaf, fumes, and immediately reduces the lines according to quantity. It is said Mr. Perkins and Sharkie have become so disgusted that they will soon leave the paper. But the worst cut on Mr. Sharkie is the rejection of his poetry by Mr. Copley; who after conferring with Lugin comes to the conclusion that it is "waking." He said that the dose on "waking" must be the first and the last. [We hold over a number of other items till next.—Ed.]

A FEW crews have left here lately for the lumber woods.

Mr. LAWSON's enterprise as an architect is the marvel of our town folk.

Mr. A. A. STERLING is likely to be our coming Mayor. Don't you think he would make an excellent Chief Magistrate? [We do think so; and we wish Mr. Sterling success.—Ed.]

Mr. A. GIBSON has gone to Montreal to confer with the new company.

The hideous whistle of the "Florenceville" is again going.

The new Customs rooms will not be ready this winter; but Mr. McPeake's offices will be ready in a few weeks.

Gloucester County Teachers Institute.

SECOND DAY'S PROCEEDINGS.

3rd Session.—Mr. James McIntosh read a paper on "Method in vulgar fractions and decimals" showing clearly that the right method is more essential in this, than in most rules. He showed how to develop the idea of a fraction from objects, and the necessity of the terms numerator, denominator, etc.; illustrated how to teach that a fraction indicates division, "at to multiply and divide both top and by the same number does not affect the value of the fraction; that to multiply a fraction, either multiply numerator, or divide denominator, that to divide, you use the reverse process, that four-thirds equal eight-thirds of one, or one-third of four. He showed how to find foregoing rules for reduction of fractions, multiplication and division of fractions, and vice versa. Discussions on the above subject were participated in by Misses Burns and Rainey, and Messrs. Landry and Boudreau.

The President then introduced the subject of reading, and dwelt upon the necessity of having it properly taught, and insisted that it would be impossible for him to pass a child deficient in this most necessary branch, even though he were proficient in all the other subjects of the course. J. W. McLean illustrated his method of teaching reading to a primer class. The President explained by examples what is meant by emphasis, its importance, and how to teach it in a way to be easily understood by the youngest pupil. A lively discussion ensued, remarks being made by Misses McLean, Rainey, Burns, McLean and Messrs. Boudreau, McIntosh and Messrs. Landry. The last named gentlemen, at the request of the President, read a selection from Shakespeare and received the well earned plaudits of the assembled teachers for his just interpretation of that most difficult author.

4th Session.—Mr. Jerome Boudreau, entered upon the subject of Book-Keeping and proceeded to give his method of teaching the rudiments.

The President followed demonstrating an easy method of teaching the Day-Book and Ledger, which commended itself to all present. This concluded the business of the Institute. Several visitors addressed the Institute. Among others Mr. Brunson, Catechist of Clifton, who had attended all the Sessions and appeared to take a special interest in the proceedings, addressed the Teachers in the French language. To say that this gentleman's appeal to the discharge of their duties and to use their utmost exertions to elevate their compatriots in the scale of moral and intellectual life, was an eloquent effort, would be to express it very mildly indeed. His address abounded in good advice for their future guidance and confident anticipations for the future well being of the French Academics. Mr. Turgeon also made a very appropriate speech in the same language.

After quite a lively discussion it was unanimously decided to hold the Fourth and Fifth Meetings of this Institute at Clifton on 1st and 2nd Thursday and Friday in June 1881.

STAR BRIEFS.

—We are glad to announce that the steam fire engine has been thoroughly repaired. People need not shudder so now when they hear the fire bells.

—Mr. John Bell is painting No. 1 engine house; and doing it, as he always does his work, well.

—The stringency of the money market has passed away.

—Labor here, and we may give it as our theory that the value of a laboring mans day's work should be the standard of Value.

Communications.
A REMINDER.
To the Editor of the STAR.
Sir,—Your Newcastle correspondent in Wednesday 22nd issue, remarked that Richard's game was "Blocked." Is it? I would remind your correspondent, that there is such an article as a pump, and though you may block the spout, still there is a handle that can be worked. Such is the case now: your spout is blocked, but the handle is still working on the hill. Yours &c., C.

THAT NEWCASTLE POLICEMAN.

To the Editor of the STAR.

DEAR SIR,—Since the appearance of the STAR in our midst there has been heard on all sides such exclamations as: "Just the paper we want! it deals with public matters rightly, eh?" Your correspondent expresses fully the same sentiments.

We are subjected to look upon, daily, an inanimate object—the term is hardly strong enough—who receives from the public the salary of four hundred dollars per annum. They will call it a policeman. This amount might as well be thrown into the river for all the benefit we receive from it. We are nightly, Sunday not excepted—imposed upon by a gang of loafers at two of the principal corners, and often are ladies hats knocked off, and other insults shown, by these loafers. Is there not in our bye laws a fine of two or more dollars for this corner loafing offence? Must our policeman be an inanimate object, while these lads whistle the fence pickets, whistling and jeering passers by? Not long since I saw one of the loafers say: "This is the scene that has taken place in Newcastle for years. Drunkenness and fighting, in abundance, with shocking and profane language. When our worthy \$400 man appeared on the scene, he was told he was 'not quick enough.' The same evening at the opposite end of the street the fighting was continued. Business was stopped in some of the stores, on account of the numbers of men, blocking up the sidewalks, women turned away in fright. Since that evening I have not heard of any arrest having been made, and the names of the loafers we well know to this object we have to guard us. The fact is he is frightened of them, and is only laughed at for his pains. Two days after the above occurred a poor unfortunate was captured and put in the lock-up for shooting whoa shillie. Such as this always takes place after a big bonanza has passed. Remove from your gaze this thing of idleness; there are plenty in our midst, capable of performing the duties of a policeman, and satisfy one and all. See to it while you have time; agitate your grievances!"

THE LATEST Nihilist Plot.

LONDON, Sept. 29.

The excitement over the alleged plot in Glasgow, of three Nihilist emissaries, with nitro-glycerine clocks, to be concealed in the Cza's yacht, is unabated. The police are probing every nook in the city where a man could by any possibility conceal himself; all lodgings are carefully watched, and no stranger can enter one of them without being obliged to identify himself; strict espionage is kept over the movements of all foreigners.

GENERAL NEWS.

Five French Capitalists named Dion, all brothers, have decided to invest a million of francs in working the phosphate mines lately discovered near Sherbrooke. The "Journal" which makes this announcement, adds with true Gallic pride: "We henceforth hope that the development of our native wealth and of our industries shall no longer constitute the exclusive privileges of English and American capitalists."

It appears that among coal miners 800 persons every year are killed by explosions or accidents in England alone.

We read in one of the late French Canadian journals: "A lady—excuse us gentlemen! has lately been named Professor of Modern Literature at the University of Worcester, Ohio. Miss Irish a translator of several German works is the person. If this should continue the French Academy will be forced to find feminine terminations for certain adjectives which the language of our ancestors reserved exclusively for the stronger sex as having in some sort a monopoly of bodily and mental labour. Miss Irish whose name appears to be sufficient to indicate her origin formerly, had charge of all the foreign correspondence of Carl Schurz under the administration of President Hayes."

QUEBEC ITEMS.

Mr. L. N. Carrier arrived at Lewis this morning on his return from a journey to Paris, where he had gone to aid in completing arrangements relative to the French Co. an "creditancier."

Some enterprising citizens of the village of Varanoc have formed a syndicate to complete the extent of country to be planted in beets, in order to obtain the establishment of the manufacture of sugar there.

In the course of next week the site for the new manufactory of beet sugar at Farnham will be chosen by the company's engineer, and the work of construction will be immediately commenced.

DULCIGNO.

As the attention of the public has been especially drawn to this heretofore unimportant place, while the European powers have given to Montenegro as its sea port, but which gift Turkey is using all its well known powers of duplicity to defeat, we place before our readers the following descriptions drawn from an authentic source:—Dulcigno is a town of Turkey in Europe, in the Albanian Sanjak of Scutari, occupying a bold promontory on the Adriatic, eighteen miles W. S. W. of the town of Scutari. It has a strong castle, is the seat of a Catholic Bishop, and numbers about 8,000 inhabitants, who are mainly engaged in agriculture, but also carry on a little ship-building and a certain amount of foreign commerce. The Turkish Oluk or Olgun preserves more distinctly the name of Olucium, by which Dulcigno was known to the Romans, who obtained possession of it about 167 B. C., during the war with Gentius, the Illyrian king. In modern history the town is noted for the defeat of the Venetians in 1718; and its inhabitants were long remarkable for their piracies. As our readers know, of late it has been the scene of the greatest farce in modern history: of ships sailing up and down past it every day, showing their port lights. At last the Turks have fired it, and Europe laughs at the foolish aquadrons, while Turkey chuckles. Montenegro has to turn elsewhere for another ally.—Ed. Star.

BY TELEGRAPH.

King and Parliament in Norway.

LONDON, Oct. 2.

The Swedish-Norwegian press are heatedly discussing the agitation of a faction of the Norwegians for the repeal of the Act of Union, and the establishment of a Norwegian republic. The Swedish journals maintain that the honor of Sweden is involved, and that strong measures should be employed if necessary. The relations between the King and the Norwegian Storting are very strained, a large majority having denied the King's right of final veto.

A Private Arctic Explorer.

LONDON, Oct. 2.

Mr. Clements Markham, of London, has received a telegram, dated Hammerfest, Sept. 15th, from Mr. Leigh Smith, a private gentleman who has been making a summer voyage in the Arctic regions in his own steamer. He states that he made Franz Joseph's Land, August 14th, and explored the west coast to 80.30 north latitude and 40 east longitude. He could see land forty miles beyond Mr. Markham says: "This is the best yet done in this direction. Mr. Smith closes his despatch with the statement that that exploration of the Pole is not impossible."

The Latest Nihilist Plot.

LONDON, Sept. 29.

The excitement over the alleged plot in Glasgow, of three Nihilist emissaries, with nitro-glycerine clocks, to be concealed in the Cza's yacht, is unabated. The police are probing every nook in the city where a man could by any possibility conceal himself; all lodgings are carefully watched, and no stranger can enter one of them without being obliged to identify himself; strict espionage is kept over the movements of all foreigners.

There is a story in circulation that Admiral Popoff, who is just recovering from illness, is much concerned over the reported attempt to blow up the yacht, in which he is to take passage for Russia, and that he has expressed a fear that some of the crew may be concerned in the plot, being willing to risk destruction themselves for the sake of destroying the vessel and possibly killing the Grand Duke Constantine and himself.

CABLE BRIEFS.

The Australian military budget shows an increase of 6,000,000 florins.

The ex Empress Eugenie has purchased the Farnborough Hall estate, in Hampshire, paying therefor £50,000.

Admiral Glyn has refused to accept the late Miss Neilson's legacy for his private use, but will send it over to Mr. Compton.

General Todleben has been appointed Inspector General of Engineers and Substitute Commander in Chief of St. Petersburg district.

Three thousands colonial reinforcements have started for Basutoiland. This force is considered as ample to put down the Basutos.

The Persian Grand Vizier has been dismissed because he was suspected of too strong sympathies with Russian schemes in Central Asia. The new Vizier has English proclivities, which fact may be assumed to indicate the Persian policy just now.

A fire broke out on Monday among a large number of barges laden with hay in St. Petersburg. The barges broke loose, and twenty enormous flaming heaps floated down stream, endangering all the shipping in the river. The police guided the burning masses clear of all vessels, and there was no further destruction of shipping.

1880. 1880. Exhibition.

An Exhibition of Live Stock, Farm Produce, Manufactures and Arts, open to the Maritime Provinces, will be held in St. John on **TUESDAY, WEDNESDAY, THURSDAY** and **FRIDAY**, the

5th, 6th, 7th and 8th of OCTOBER NEXT.

The splendid new and permanent Exhibition Building, erected on the Barrack Grounds, in connexion with the extensive Drill Shed and commodious New Sheds and Stalls for Stock, will afford ample accommodation and protection for all exhibits.

The Deep Water Terminus of the Intercolonial Railroad is close to the Exhibition Grounds, and goods and stock will be landed from cars or steamboats and placed on exhibition with very little trouble or expense.

EXHIBITORS

will be required to pay the freight from any part within the Province to St. John, one half of which will be refunded to them upon presentation of the freight bill, and an order will be issued for its return free, provided it has not been sold in the meantime.

A limited number of care takers of Live Stock will be passed free to and from St. John.

INTENDING EXHIBITORS

desiring special allotment of space for the purpose of fitting up or arranging the same, are requested to make written applications to the Secretary for Agriculture before the 15th of September.

The accommodations for holding the Exhibition, and the means of transport to and from it, will be found superior to those of any former Exhibition, and the cordial support of Agriculturists, Manufacturers and of the people generally is earnestly solicited.

An office will be opened on and from the first of September in the City Building, St. John, in the personal charge of the Secretary for Agriculture, and Blank forms and all other information may be obtained on application by letter or otherwise; at that office or to the Secretaries of the different Agricultural Societies, or at the Office for Agriculture in Fredericton.

JULIUS L. INCHE,
Secretary for Agriculture,
Chatham, Sept. 1—td.

LEMON'S VARIETY STORE!

FREDERICTON, N. B.
Established 1844, and has kept up to the times. From a little one it has grown to be a strong one.

We thank our patrons for past favors, and solicit a continuance of their trade. All the people within fifty miles must know where LEMON'S ORIGINAL VARIETY STORE is, and that in it they can find the largest, best selected, and cheapest stock of HOUSE FURNISHING GOODS in the City.

LEMONT'S VARIETY STORE is a household word. We do not have to pay any \$500 Store Rent, as we own our Establishment. Our expenses are small. We buy our Goods for Cash, consequently can sell them CHEAPER than any other storekeeper.

We employ workmen in our CABINET WORKSHOP making
Furniture to Order.
We have more Goods than Money, and for Money will give the best value to all who are in want of the Goods we keep.

LEMONT & SONS.
Fredericton, Sept. 18, 1880.

NOTICE TO CONTRACTORS

SEALED Tenders, addressed to the undersigned and endorsed "Tenders for New Wing, Ac., at Dorchester Penitentiary, N. B." will be received at this office until **WEDNESDAY** 13th day of **OCTOBER** next, for the completion of the above works.

Plans and specifications can be seen at the Penitentiary, Dorchester, N. B. and also at the Department of Public Works, Ottawa, on and after Tuesday, the 27th inst. Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied and signed with their actual signatures.

Each tender must be accompanied by an accepted bank cheque, equal to five per cent. of the amount of the tender, which will be forfeited if the party declines to enter into a contract when called upon to do so, or if he fails to complete the work contracted for. If the tender is not accepted, the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.
By order, S. CHAPLEAU, Secretary.

Department of Public Works, Ottawa, 24th Sept., 1880.

Notice to Contractors

SEALED TENDERS, addressed to the undersigned and endorsed "Tenders for Wood Islands Works," will be received until **SATURDAY**, the 9th October, for the construction of Works at Wood Islands, P. E. I., according to plan and specification to be seen on application to Duncan Crawford, Esq., M. P. P., Wood Islands, and from whom forms and tender can be obtained.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied and signed with their actual signatures.

Each tender must be accompanied by an accepted bank cheque, equal to five per cent. of the amount of the tender, which will be forfeited if the party declines to enter into a contract when called on to do so, or if he fails to complete the work contracted for. If the tender is not accepted, the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.
By order, S. CHAPLEAU, Secretary.

Department of Public Works, Ottawa, Sept. 18, 1880.

MAIL CONTRACT.

TENDERS, addressed to the Postmaster-General, will be received at Ottawa, until **NOON**, on **FRIDAY**, 29th OCTOBER, for the conveyance of Her Majesty's Mails, on a proposed Contract for four years, once per week each way, between

CHATHAM AND ESCUMINAC.
from 1st January next.
Conveyance to be made in a suitable vehicle drawn by one or more horses, subject to the approval of the Postmaster General.

The mails to leave Chatham on Thursday of each week at 8 o'clock a. m., reaching Escuminac in seven hours and fifteen minutes from hour of despatch.
Returning to leave Escuminac on Friday of each week at 7 o'clock a. m., reaching Chatham in seven hours and fifteen minutes from hour of despatch.

Printed notices containing further information as to conditions of proposed Contract may be seen, and blank forms of tender may be obtained, at the Post Offices of Chatham and Escuminac.

Newcastle, Aug. 30 1880.

Ayer's Cathartic Pills,

For all the purposes of a Family Physic, and for curing Constiveness, Jaundice, Indigestion, Foul Stomach, Bloating, Headache, Irritability, Rheumatism, Eruptions and Skin Diseases, Biliousness, Dropsy, Tumors, Worms, Neuralgia, as a Dinner Pill, for Purifying the Blood,

Are the most effective and congenial purgative ever discovered. They are mild, but effectual in their operation, moving the bowels surely and without pain.

Although gentle in their operation, they are still the most thorough and searching cathartic medicine that can be employed; cleansing the stomach and bowels, and even the blood. In small doses of one pill a day, they stimulate the digestive organs and promote vigorous health.

Ayer's PILLS have been known for more than a quarter of a century, and have obtained a world-wide reputation for their virtues. They correct diseased action in the several assimilative organs of the body, and are so composed that obstructions within their range can rarely withstand or evade them. Not only do they cure the every-day complaints of everyday life, but also formidable and dangerous diseases that have baffled the best of human skill. While they produce powerful effects, they are, at the same time, the safest and best physic for children. By their aperient action they relieve much less than the common purgatives, and never give pain when the bowels are not inflamed. They reach the vital fountains of the blood, and strengthen the system by freeing it from the elements of weakness.

Adapted to all ages and conditions in all climates, containing neither calomel nor any deleterious drug, these PILLS may be taken with safety by anybody. Their sugar-coating preserves them ever fresh, and makes them pleasant to take; while being purely vegetable, no harm can arise from their use in any quantity.

Dr. J. C. AYER & CO., Lowell, Mass.,
SOLD BY ALL DRUGGISTS EVERYWHERE.

Ayer's Hair Vigor,

For restoring Gray Hair to its natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. Faded or gray hair is soon restored to its original color, with the gloss and freshness of youth. Thin hair is thickened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for usefulness by this application. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous, and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a

HAIR DRESSING,

nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich, glossy luster and a grateful perfume.

HALL'S VEGETABLE SILK HAIR RENEWER

Every year increases the popularity of this valuable Hair Preparation; which is due to merit alone. We can assure our old patrons that it is kept fully up to its high standard; and it is the only reliable and perfected preparation for restoring GRAY or FADING HAIR to its youthful color, making it soft, lustrous, and silken. The scalp, by its use, becomes white and clean. It removes all eruptions and dandruff, and, by its tonic properties, prevents the hair from falling out, as it stimulates and nourishes the hair-glands. By its use the hair grows thicker and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most economical HAIR DRESSING ever used, as it requires fewer applications, and gives the hair a splendid, glossy appearance. A. J. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality. I consider it the BEST PREPARATION for its intended purposes." Sold by all Druggists, and Dealers in Medicines. Price One Dollar.

Buckingham's Dye.

FOR THE WHISKERS.
As our Renewer in many cases requires too long a time, and too much care, to restore gray or faded Whiskers, we have prepared this dye, in one preparation; which will quickly and effectually accomplish this result. It is easily applied, and produces a color which will neither rub nor wash off. Sold by all Druggists. Price Fifty Cents.
Manufactured by R. P. HALL & CO., N. ASHUA, N. H.
