PREFACE

United Nations General Assembly Resolution 45/65 of 4 December 1990 adopted by consensus the Report of the Group of Qualified Governmental Experts on the Role of the United Nations in the Field of Verification. This resolution, *inter alia*, called upon member states to assist the Secretary General in implementing the recommendations contained in the Report of the Group of Experts. Among these recommendations was the development of a "consolidated data bank of published materials and data provided on a voluntary basis by member states on all aspects of verification and compliance".¹

At the 45th Session of the General Assembly, Canada's Secretary of State for External Affairs Joe Clark confirmed Canada's intention to support the United Nations in establishing such a consolidated data bank through voluntary contributions of Canadian compilations and indexes of verification material. This undertaking follows from an on-going policy commitment by Canada to share with others, through the United Nations, the results of its verification research. In the past, Canada has provided compendiums of documentation relating to verification², as well as an extensive series of reports on verification related matters³.

This Bibliography has been prepared as a further Canadian contribution to the development of a United Nations data bank on verification and to assist governmental experts, negotiators and researchers in their work on verification matters.

The Canadian Government wishes to acknowledge the work in the preparation of this Bibliography performed under contract by Mr. René Unger, in collaboration with the Verification Research Unit of External Affairs and International Trade Canada.

ABSTRACT

This Bibliography lists alphabetically by author over 1500 documents related to verification. These documents include the publications and submissions of governments and international organizations as well as the academic literature on the subject.

Each document has been assigned a number of subject keywords describing its contents. A thesaurus of these keywords is included. Subject access to the documents contained in the Bibliography is provided through an index of these keywords.

INTRODUCTION

Purpose

This Bibliography has been developed to facilitate research on arms control and disarmament verification issues. With this aim in mind, a subject index has been provided to help with searches on a wide variety of subjects. In addition, the work of personal and corporate authors can be identified rapidly.

Scope

General verification literature from 1962 to 1991 has been reviewed with the cutoff date established as the summer of 1991. The Bibliography has restricted itself to the literature on verification published in the English language.

A variety of documents are covered in this Bibliography. The focus, however, is on substantive discussions of matters related to verification -- documents which propose, discuss, explain, evaluate or otherwise comment in a detailed fashion upon verification processes, procedures or systems. More transitory materials, such as documents which summarize the current state of negotiations or report on specific events, have been omitted from the Bibliography. In this regard, articles from newspapers, newsletters and similar publications with a "current affairs" focus, generally have not been included.

There are several topics covered by this Bibliography -- confidence building, peacekeeping and compliance -- which are included because of their focus on matters related to arms control verification.

A variety of sources were examined in the search for verification related documents.¹ These are listed below.

- The Conference on Disarmament (CD), 1984-1991; the Committee on Disarmament (CD), 1979-1983 (CD); the Conference of the Committee on Disarmament (CCD), 1969-1978; and the Eighteen Nation Disarmament Committee (ENDC), 1962-1969. The Bibliography has sought to list relevant national submissions to these various forums, which address verification issues. In general, the

¹ This Bibliography incorporates the documents covered by the Compendium of Arms Control Verification Proposals, 3rd Ed., (Ottawa: 1987), 3 vols.

minutes of CD meetings have not been covered. Nor have submissions to ad hoc committees.

- United Nations publications. The United Nations has been active in the field of verification in two ways: as a source of research and as a forum for deliberation. The Bibliography includes UN General Assembly and Security Council resolutions pertaining to verification and submissions on this subject from the Secretary General as well as the national members of the UN. Also covered are relevant UN Secretary General studies and a number of research publications by the United Nations Institute for Disarmament Research (UNIDIR).
- Other international organizations. Several other organizations besides the CD and the UN have dealt with verification issues. Two such organizations are the International Atomic Energy Agency and the Western European Union. The Bibliography has indexed a number of documents from both organizations. Budgetary and other similar annual documents, however, have not been included.
- National governments. English language governmental publications have been included in the bibliography. Canadian publications make up a large proportion of these documents, but there are also a number of American and British documents.
- Academic publications. The Bibliography contains books, reports, articles and papers submitted at various conferences, and individual academic papers appearing in a variety of journals. Where the contents of conference publications are of particular interest, articles have been listed individually.
- International Treaties and Agreements. The texts of international treaties and agreements have not been covered by this Bibliography.

Arrangement

The bibliography is arranged alphabetically in descending order of priority by:

- author,
- corporate author,
- article title, and
- book or document title.

All entries follow a standard bibliographic style.

EG. CONSULTATION SN: Includes consultation and cooperation procedures, complaints procedures, crisis management and prevention procedures

BROADER TERM (BT): A Broader Term refers the reader to related keywords that are larger in scope.

EG. SATELLITE BT: R SENSORS

In this example, the keyword 'Satellite' describes just one method of remote sensing and so represents just one aspect of the concept of remote sensors (R SENSORS).

NARROWER TERM (NT): A Narrower Term refers the reader to related keywords that are more specific.

EG. CONSULTATION NT: SCC

In this example, the keyword 'SCC' represents one particular example of consultation -- in this case, the Standing Consultative Commission used under the ABM Treaty.

RELATED TERM (RT): A Related Term refers the reader to keywords related to the keyword under discussion but not in a more general or more specific sense.

EG. CFE RT: CONVENTIONAL

The keyword 'CFE' (Conventional Forces in Europe Treaty) is related to the keyword 'conventional' in that conventional weapons are a central issue in the CFE Treaty.

USE (USE): The term USE directs the user to search for a topic within the index using the indicated term.

EG. Testing USE: R&D

USED FOR (UF): The term Used For is the reciprocal of USE.

EG. R&D UF: Testing
