Preface

This guide has been produced to serve as an overview of exchanges between German and Canadian universities. It aims at informing the interested public and, above all, stimulating more and new exchange relations.

This guide can only be a preliminary overview, as we were confronted with several problems which could not be solved. The following comments may be helpful in using the guide.

I. INTRODUCTION

(1) The first obstacle for a conclusive inventory of exchange relations is related to the very nature of exchange programs. At the heart of any exchange agreement are personal relations and affinities. Thus many exchanges took their origin in informal relations between individuals, be they faculty members or people with "German experience" or "German connections", i.e. people that once studied at the partner university or have personal links with the other country. In so far as such informal relations are not yet formalized, it is often difficult, if not impossible, to register as incoming exchanges. As a consequence, we have only listed information on programs for the exchange of students or faculty members, be they recognized or only informally established. It goes without saying that there is an equally enormous number of other kinds of exchanges and cooperations below this level, e.g. student visits, common publications and research projects. To list all of these would have been beyond the scope of this guide.

(2) The structure of exchange programs, once they are well established or reach the state of formalization, are usually quite solid. Despite this fact, the implementation is often subject to frequent changes. This is especially the case with contact addresses, number of participants, etc. Thus, the information collected tends to be out of date very quickly. We would kindly ask people concerned to up-to-date or changes in the programs listed.

(3) The information obtained differed considerably in quality and quantity. Thus, the presentation of the individual programs is bound to be more conclusive in one case, while lacking some information in another. Again, we would kindly request those concerned to advise us of errors or omissions wherever possible.

Despite these limitations, we hope this guide will be useful in its present form.

Finally, we would like to thank all the individuals which provided us generously and promptly with the information listed here, without which this guide would not have been possible.

Preface

This guide has been produced to serve as an overview of exchanges between German and Canadian universities. It aims at informing the interested public and, above all, stimulating more and new exchange relations.

This guide can only be a preliminary overview however, as we were confronted with several problems when collecting the data needed. The following comments may be helpful in using this guide.

- (1) The first obstacle for a conclusive inventory of exchange relations is related to the very nature of exchange programs. At the heart of any exchange agreement are personal relations and affinities. Thus many exchanges took their origin in informal relations between individual people, be they faculty members or people with "Canada-experience" or "Germany-experience", i.e. people that once studied at the partner university or have personal links with the other country. In so far as such informal relations are not yet formalized, it is often difficult, if not impossible, to register all existing exchanges. As a consequence, we have only listed information on programs for the exchange of students or faculty members, be they formalised or only informally established. It goes without saying that there is an nearly endless number of other kinds of exchanges and cooperations below this level, e.g. mutual visits, common publications and research projects. To list all of these would have been beyond the scope of this guide.
- (2) The structure of exchange programs, once they are well established or reach the state of formalization, are usually quite solid. Despite this fact, the implementation is often subject to frequent changes. This is especially the case with contact addresses, number of participants, etc. Thus, the information collected tends to be out of date very quickly. We would kindly ask people concerned to up-to-date on changes in the programs listed.
- (3) The information obtained differed considerably in quality and quantity. Thus, the presentation of the individual programs is bound to be more conclusive in one case, while lacking some information in another. Again, we would kindly request those concerned to advise us of errors or propose amendments.

Despite these limitations, we hope this guide will be useful in its present form.

Finally, we would like to thank all the universities which provided us generously and promptly with the information listed here, without which this guide would not have been possible.

How to use this guide

This guide lists all available information on German-Canadian exchange programs for students and faculty members.

The first part of the guide contains a short introduction and a few notes on financial aspects of exchange programs, i.e. grants and tuition waivers.

The second part, which is the main body of the guide, lists the exchange programs at the individual universities in Germany. The universities appear in alphabetical order of the city in which the institution is seated, e.g. the entry of the "Albert-Ludwigs-Universität Freiburg" is listed under "Freiburg".

The third section of the guide, the annex, contains important addresses, i.e. those of the International Offices at the Canadian universities and those of the "Akademische Auslandsämter" in Germany.

The final part is a index of the Canadian universities that are mentioned in this guide.

All addresses and telephone numbers are presented in the customary form of the respective country. Thus you would have to dial 001- and the number given for the Canadian institution when calling from Germany, whereas you would have to omit the first 0 of the German area code when calling from abroad, e.g. 0049 - 821 for Augsburg.

Abbreviations:

AUPELF	Association des universités pour l'enseignement en langue française
BAFÖG	Förderung nach dem Bundesausbildungsförderungsgesetz (explained below)
B.B.A.	Bachelor of Business Administration / Baccalaureat en administration des affaires (similar academic standing as "Vordiplom" or "Zwischenprüfung")
CREPUQ	Conférence des recteurs et des principaux des universités du Québec
DAAD	Deutscher Akademischer Austauschdienst; federal office for international academic exchange programs which is usually represented at the universities by the "Akademische Auslandsämter", the International Offices at the universities
DFG	Deutsche Forschungsgemeinschaft (Federal Research Council – foundation for research)

GMAT	Graduate Management Admission Test; this test is usually required to get a degree at the host university. As with the TOEFL Test, the applicants must pay to take the test. Thorough preparation is recommended as the level demanded is quite high. These costs are not covered by any grant.
IAESTE	International Association for the Exchange of Students for Technical Experience (explained below)
IAS	Integriertes Auslandsstudium (explained below)
M.A.	Master of Arts
MBA	Master of Business Administration
MIPB	Multiregional International Business Program; program for the exchange of students of Business and Administration to which Ontario and Baden-Württemberg and other European regions belong (see Universität Mannheim)
NATO	North Atlantic Treaty Organization
NSERC	Natural Sciences and Engineering Research Council of Canada
PIM/CEMS	Programm für Internationales Management/Program for International Management/Community of European Management Schools (see Universität Köln)
PNDS	Prüfung zum Nachweis Deutscher Sprachkenntnisse; test of German as a foreign language
TH	Technische Hochschule
TOEFL	Test of English as a Foreign Language; as with the GMAT for Management students, this test is centrally organized and usually testing takes place twice a year. Again, students have to carry the cost of travelling to the testing university and of the registration fee themselves. Here too, thorough preparation is recommended. Usually 575 to 600 of a maximum of 677 points are needed for admission at a Canadian university.
TU	Technische Universität

Types of grants for exchange agreements

One of the main obstacles for students participating in exchange activities is usually the lack of financial resources available. The following list gives a short overview of funds as they are integrated into the exchange programs listed in the second part of the guide.

1. Tuition Waiver:

This is the most common form of financial support. The partner universities waive tuition fees for exchange students under the specific program. Visiting students usually get admitted as “non-degree students”.

2. “DAAD-Teilstipendium”:

This form of financial support is quite comprehensive and includes a flat rate for travel costs (usually about DM 2000), health insurance and a monthly allowance of about DM 600 to DM 800, all of which is paid in Germany. Students receiving this grant are expected to contribute about DM 600 per month themselves. Unless the partner universities agree on a tuition waiver, the grant covers the tuition fees as well, be they the usual fees for foreigners, reduced fees for out-of-province students or the regular fee for a student from that particular province.

3. “DAAD-Vollstipendium”:

This type of grant is for graduate students only and includes a monthly allowance of about DM 1400 plus a special grant for the individual country.

4. “IAS-Stipendium”:

The “IAS-Stipendium” usually includes a “DAAD-Teilstipendium”, but access is normally restricted to a particular department or faculty that has taken the initiative to establish the exchange. Usually, these grants are unilateral, i.e. only students from German universities can apply for this grant, but sometimes, the “IAS-Stipendium” is connected with a “DAAD-Kontaktstipendium” which offers financial support for foreigners wishing to study in Germany.

5. “DAAD-Kontaktstipendium” for Foreign Students:

This grant is for foreign students and aims at facilitating their stay in Germany. Foreign students are invited by a German university and receive DM 400 to 940 (including support for accommodation) per month within the framework of this program. The grant, however, does not cover travel costs.

6. “Auslands-BAFöG” for German Students

Provided that the courses at the partner university can be integrated into the student’s course work, and are accepted by the home university, the student may receive “Auslands-BAFöG” which includes the usual monthly allowance

received in Germany plus an additional DM 120 per month, travel costs and any tuition fees (up to DM 9000). If the host institution requires separate health insurance, the "Auslands-BAFöG" covers this as well. Because the "Auslands-BAFöG" pays for tuition fees, students on a BAFöG scheme are usually only entitled to reduced grants from the "IAS-Stipendium" and the "DAAD-Teilstipendium". As the courses attended at the host university are part of the course work and are accepted by the home university, leave from the home university will not be granted for the time of exchange.

7. IAESTE:

This program is the Exchange of Students for Technical Experience. As the participants are usually paid by the respective company for the period of practical training, only supportive grants for the travel costs are available.

Préface

Ce recueil est destiné à donner une vue d'ensemble sur les relations d'échanges existant entre les universités allemandes et canadiennes. Il vise à informer le public qui s'y intéresse et, de plus, est susceptible de stimuler de plus nombreuses et de nouvelles relations d'échange. Ce recueil ne peut cependant donner qu'une vue d'ensemble provisoire, car nous nous sommes heurtés à plusieurs problèmes en rassemblant les données dont nous avons besoin. Il nous faut faire trois réserves:

(1) Le premier obstacle à un inventaire exhaustif des relations d'échange est lié à la nature même des relations d'échange. Des relations et des affinités personnelles sont au centre de tout accord d'échanges. C'est ainsi que de nombreux échanges sont issus de relations informelles entre des individus, qu'il s'agisse de membres du corps enseignant ou de personnes ayant fait «l'expérience du Canada» ou «l'expérience de l'Allemagne», c'est-à-dire des personnes qui ont déjà fait des études à l'université partenaire ou entretiennent des liens personnels avec l'autre pays. C'est pourquoi, ces relations informelles n'ayant pas encore été officialisées, il est souvent difficile, voire impossible, d'enregistrer tous les échanges existants.

Par conséquent nous ne donnons que des informations sur les programmes pour l'échange d'étudiants ou de membres du corps enseignant, qu'ils soient officiels ou seulement établis sur une base informelle. Il va sans dire qu'il existe un nombre presque infini d'autres sortes d'échanges et de coopérations en dessous de ce niveau, par exemple des visites réciproques, des publications communes et des projets de recherche. Une énumération de toutes ces possibilités serait allée au-delà de nos compétences.

(2) Les cadres des programmes d'échanges, une fois bien établis ou ayant atteint le stade de l'officialisation, sont habituellement plutôt stables. Malgré cela, la procédure elle-même est souvent soumise à des changements fréquents. C'est le cas en particulier en ce qui concerne les personnes à contacter, le nombre de participants, etc. C'est pourquoi les informations accumulées ont souvent tendance à être périmées avant même d'avoir été imprimées. Nous prions les personnes concernées de bien vouloir nous faire part des changements survenus pour les programmes contenus dans ce recueil.

(3) Les informations obtenues diffèrent considérablement tant du point de vue de la qualité que de la quantité. C'est pourquoi la présentation des divers programmes sera plus exhaustive pour certains alors que des informations manqueront pour d'autres. Ici à nouveau, nous prions toutes les per-

sonnes concernées de nous faire part des erreurs ou des changements.

Conscients de ces réserves et de ces insuffisances, nous avons cependant trouvé que ce recueil pourrait être intéressant sous cette forme, car il est susceptible de donner jour à une seconde édition révisée plus digne de confiance.

Enfin, nous désirons remercier toutes les universités qui nous ont souvent si généreusement et si rapidement fourni les informations contenues dans ce recueil; sans elles, ce recueil n'aurait pas été possible.

Comment utiliser ce recueil

Ce recueil donne toutes les informations disponibles sur les programmes d'échanges germano-canadiens pour étudiants et membres du corps enseignant.

La première partie contient une brève introduction et quelques notes sur les aspects financiers des programmes d'échanges, par exemple sur les bourses et les exemptions de droits d'inscription.

La seconde partie, qui est l'essentiel de ce recueil, énumère les programmes d'échangess existant dans les diverses universités d'Allemagne. Les universités sont indiquées dans l'ordre alphabétique des villes dans lesquelles elles se trouvent, vous trouverez par exemple la «Albert-Ludwigs-Universität Freiburg» sous «Freiburg» (Fribourg).

La troisième section du recueil, l'annexe, contient des adresses importantes, à savoir celles des bureaux internationaux dans les universités canadiennes et celles des «Akademische Auslandsämter» en Allemagne.

La dernière partie du recueil contient un index des universités canadiennes qui sont mentionnées dans ce recueil et vous indique où vous les trouverez.

Toutes les adresses sont données sous leur forme habituelle, soit pour l'Allemagne, soit pour le Canada. Ainsi, il vous faudra composer le 00 1 - puis le nombre indiqué pour le Canada si vous appelez d'Allemagne, alors que vous devrez omettre le premier 0 du préfixe allemand si vous appelez de l'étranger, par exemple 0049 - 821 pour Augsburg (Augsbourg).

Abréviations:

AUPELF	Association des universités pour l'enseignement en langue française
BAFÖG	Förderung nach dem Bundesausbildungsförderungsgesetz (expliqué ci-dessous) BBA Bachelor of Business Administration/ Baccalauréat en administration des affaires (titre académique comparable au «Vordiplom» ou «Zwischenprüfung»)
CREPUQ	Conférence des recteurs et des principaux des universités du Québec
DAAD	Deutscher Akademischer Austauschdienst; bureau fédéral pour les programmes internationaux d'échanges académiques qui est habituellement représenté dans les universités par les «Akademische Auslandsämter», les bureaux internationaux des universités.
DFG	Deutsche Forschungsgemeinschaft (Association allemande pour la recherche - Fondation pour la recherche)
GMAT	Graduate Management Admission Test; ce test est normalement exigé si vous voulez obtenir un diplôme à l'université hôte. Comme pour le test TOEFL, les candidats doivent payer pour être testés. Une préparation approfondie est recommandée car le niveau exigé est relativement élevé. Ces frais ne sont couverts par aucune bourse.
IAESTE	International Association for the Exchange of Students for Technical Experience – Association internationale pour l'échange d'étudiants pour l'expérience technique (expliqué ci-dessous)
IAS	Integriertes Auslandsstudium (expliqué ci-dessous)
MA	Master of Arts/maître ès arts (licencié de lettres)
MBA	Master of Business Administration/maître ès administration d'affaires
MIPB	Multiregional International Business Program, programme pour l'échange d'étudiants en affaires et administration dont font partie l'Ontario et l'état de Bade-Wurtemberg ainsi que d'autres régions européennes (cf. Université de Mannheim)
NATO	North Atlantic Treaty Organisation/Organisation du Traité de l'Atlantique Nord (OTAN)
NSERC	Natural Sciences and Engineering Research Council of Canada - Conseil de sciences naturelles et de recherche en génie du Canada

PIM/CEMS	Programm für Internationales Management/Programme pour la gestion internationale/Community of European Management Schools/Communauté des écoles européennes de gestion (cf. Université de Cologne)
PNDS	Prüfung zum Nachweis Deutscher Sprachkenntnisse; test de l'Allemand en tant que langue étrangère
TH	Technische Hochschule
TOEFL	Test of English as a foreign language - test de l'Anglais en tant que langue étrangère; comme le GMAT pour les étudiants en gestion, ce test est organisé centralement et les tests ont habituellement lieu deux fois par an. Là aussi les étudiants doivent subvenir eux-mêmes à leurs frais de voyage pour se rendre à l'université qui organise le test ainsi qu'à leurs droits d'admission. Normalement, sur un maximum de 677 points, 575 à 600 sont requis pour être admis dans une université canadienne.
TU	Technische Universität

Les aspects financiers des programmes d'échanges

L'un des principaux obstacles auquel les étudiants sont confrontés pour participer aux activités d'échange est habituellement le manque de ressources financières. La liste ci-dessous donne une brève vue d'ensemble des fonds existants; l'information détaillée se trouve dans les programmes d'échanges contenus dans la seconde partie du recueil.

1. Exemption des droits d'inscription:

C'est la forme la plus répandue de soutien financier. Les universités partenaires renoncent aux droits d'inscription de la part des étudiants hôtes faisant partie du programme en question. Les étudiants en visite sont habituellement admis en tant qu' «étudiants sans diplôme» (non-degree- students).

2. «DAAD-Teilstipendium»

Cette forme de soutien financier est très exhaustive et comprend une somme uniforme pour les frais de voyage (en règle générale 2000 DM), l'assurance maladie et une allocation mensuelle de 600 à 800 DM qui est payée en Allemagne. Les étudiants bénéficiaires de cette bourse sont appelés à apporter une contribution personnelle d'environ 600 DM par mois. À moins que les universités partenaires aient accepté d'exempter les droits d'inscription, la bourse couvre aussi les droits d'inscription, qu'il s'agisse des droits habituels pour étrangers, de droits ancillaires réduits ou de droits provinciaux.

3. «DAAD-Vollstipendium»

Ce type de bourse est réservé aux étudiants diplômés et comprend une allocation mensuelle d'environ 1400 DM plus une bourse spéciale pour le pays concerné.

4. «IAS-Stipendium»

La «IAS-Stipendium» comprend généralement une «DAAD-Teilstipendium», mais son accès est habituellement limité à un département particulier ou une faculté particulière ayant pris l'initiative d'organiser l'échange. En général, ces bourses sont unilatérales, c'est-à-dire que seuls les étudiants d'universités allemandes peuvent faire la demande de cette bourse, mais parfois la «IAS-Stipendium» est liée à une «DAAD-Kontaktstipendium» qui est un soutien financier destiné aux étrangers désirant faire leurs études en Allemagne.

5. «DAAD-Kontaktstipendium» pour étudiants étrangers

Cette bourse est destinée aux étudiants étrangers et vise à faciliter leur séjour en Allemagne. Les étudiants étrangers sont invités par une université allemande et reçoivent de 400 à 940 DM (allocation de logement y comprise) par mois dans le cadre de ce programme. Cette bourse toutefois ne couvre pas les frais de voyage.

6. «Auslands-BAFöG» pour étudiants allemands

Dans la mesure où les cours de l'université partenaire peuvent être intégrés dans vos études et sont acceptés par l'université de votre pays, vous pouvez recevoir la «AuslandsBAFöG» qui comprend l'allocation mensuelle normale que vous recevez en Allemagne avec en plus 120 DM par mois, les frais de voyage et tous les droits d'inscription (maximum 9000 DM). Si l'institution hôte exige une assurance maladie à part, la «Auslands-BAFöG» la prend aussi en charge. Etant donné que la «Auslands-BAFöG» paye pour tous les droits d'inscription, les étudiants bénéficiant de la BAFöG n'ont droit qu'à des bourses réduites de la «IAS-Stipendium» et de la «DAAD-Teilstipendium». Vu que les cours auxquels vous participez à l'université hôte font partie de vos études et sont acceptés par l'université de votre pays, vous ne pouvez pas obtenir un statut vacancier pour la durée de l'échange.

7. IAESTE:

Ce programme est pour l'échange d'étudiants pour une expérience technique. Etant donné que les participants sont normalement rémunérés par la compagnie pour laquelle ils travaillent pendant une certaine période, vous ne pouvez recevoir qu'une bourse de soutien pour les frais de voyage.

The U & BC university-to-university exchange program is subject to both a 2004-2005 and a 2005-2006 agreement.

II. UNIVERSITY-TO-UNIVERSITY EXCHANGE AGREEMENTS ACCORDS D'ÉCHANGES INTER-UNIVERSITAIRES

The program involves a tuition waiver for students at the partner university. Students may be listed as "exchange" students. Canadian students may apply for a "COOP-Work-Study" if they are eligible - i.e. a grant which starts with a tuition waiver, includes a monthly stipend and a 20% COOP/CAW wage, including the costs of accommodation. Travel costs are paid by the student. Students remain enrolled at their home university, but are usually given special leave status.

This is a university-to-university exchange for students as well as faculty. The exchange is open to members of all university departments. In 1994, three Augsburg students studied at UBC and three UBC students came to Augsburg.

At Augsburg, students are selected by the Institute for Canadian Studies; at UBC by a committee of representatives of the university.

The program includes a tuition waiver for students at the partner university. Students pay for travel and accommodation. Canadian students may apply for a "DAAD-Kontaktstipendium", if they are eligible – i.e. a grant which, apart from a tuition waiver, includes a monthly allowance of DM 400 to DM 940, including the costs of accommodation. Travel costs are paid by the students. Students remain enrolled at their home university, but are usually given special leave status.

A University-to-university exchange for students as well as faculty. The exchange is open to members of all university departments. In 1994, three Augsburg students studied at Carleton and three Carleton students came to Augsburg.

At Augsburg, students are selected by the Institute for Canadian Studies, at Carleton by a committee of representatives of the university.

For Canadian students, there is a "DAAD-Kontaktstipendium", i.e. a grant which, apart from a tuition waiver, includes a monthly allowance of DM 400 to DM 940. Travel costs are paid by the students. German students benefit from a tuition waiver but have to pay travel costs and accommodation. German students may be offered a teaching assistantship if this is in accordance with Canadian labour regulations.

Students remain enrolled at their home university but usually apply for leave status.

Universität Augsburg

Romanistik

Université Laval

Faculté de Philosophie II
(Linguistique et Didactique) / Centre
International de recherche et aména-
gement linguistique (CIRAL)

Il s'agit là d'un accord officiel d'échanges pour le corps enseignant. Etant donné que ce programme vise essentiellement à une coopération en matière de recherche, le programme se limite aux départements partenaires, c'est-à-dire à la Linguistique. Il peut cependant occasionnellement y avoir la possibilité d'échanges d'étudiants en sus des visites mutuelles régulières. Tant les visites que les projets de recherche sont financés individuellement car il n'existe là aucun budget permanent.

e-mail: denise.deshaies@LLI.ulaval.ca

A university-to-university agreement for both students and faculty of all departments. The exchange allows for up to three exchange students from either university. In 1994, two students from Bamberg studied in Winnipeg but no students from Winnipeg came to Bamberg. The students from Bamberg are selected by the "Akademisches Auslandsamt". In Winnipeg, the Office of the Dean of Arts is responsible for the selection of students.

Travel and accommodation is paid for by the participants. There is a tuition waiver for students at the partner university. Students from Winnipeg do not have to provide the regular PNDs test for foreign students and are assisted in finding accommodation in a student residence in Bamberg. In general, students remain enrolled at their home university (but with leave status), unless they decide to do otherwise. Duration of the exchange is one year. Currently, the program is not fully used due to changes in the administration of the program in Winnipeg.

Freie Universität Berlin

Université Laval

Programme d'université à université pour étudiants. Ce programme d'échanges couvre toutes les disciplines sauf la médecine et le droit. La durée du séjour à l'université partenaire est d'une année.

En 1994, un étudiant de chaque université a étudié à l'université partenaire. Les étudiants de Berlin sont sélectionnés à leur université par un comité dirigé par le «Akademisches Auslandsamt». Au Canada, les départements sont responsables de la sélection pour l'échange des étudiants.

Le programme couvre les frais de voyage, de logement et de droits d'inscription à l'université partenaire et est financé par l'université.

Les étudiants restent inscrits à l'université de leur pays pendant la durée du programme. Les étudiants allemands reçoivent un statut vacancier.

Freie Universität Berlin
Geographisches Institut

**McMaster and
Wilfrid L. University**
Geography Department

This IAS exchange program is a unilateral exchange program for up to six German students who must belong to the Geography Department of the Freie Universität Berlin. In order to qualify for the exchange program, students have to have a good to excellent academic record including the "Diplomvorprüfung" or "Zwischenprüfung" and are expected to reach a specific TOEFL score. Students also have to present their qualifications to a selection committee. The selection of the applicants is then made by the academic advisor who submits a shortlist to a committee of representatives of the Geography Department and the "Akademisches Auslandsamt". The students' applications are also sent to the partner universities where a separate selection is made. Both selection schemes are coordinated by the academic advisor.

Last year, four German students studied in Waterloo and Hamilton, but as the program is a unilateral program, no Canadian students studied at the FU Berlin within this scheme. Nevertheless, the FU Berlin is trying to facilitate the exchange with Canadian students by supporting their stay at the FU Berlin financially, whenever possible, or by offering excursions to Canadian students.

The exchange program is funded by the DAAD as a "Teilstipendium". Thus, students are expected to contribute to the cost of living in Canada. Within the program, students get a flat rate of DM 2000 for travel costs and an additional monthly grant of DM 600. The money is paid in Germany. Students only have to pay the German health insurance and tuition fees. Consequently, students remain enrolled at their home university, but usually with leave status.

Freie Universität Berlin

Geistes-Natur-und
Sozialwissenschaften

Université de Montréal

Faculté des arts et sciences

Programme d'université à université pour étudiants. Ce programme d'échange couvre toutes les disciplines sauf la médecine et le droit. La durée du séjour à l'université partenaire est d'une année.

En 1994, un étudiant de chaque université a étudié à l'université partenaire. Les étudiants de Berlin sont sélectionnés à leur université par un comité dirigé par le «Akademisches Auslandsamt». Les étudiants canadiens sont sélectionnés par la Faculté des Arts et Sciences.

Le programme couvre les frais de voyage, de logement et de droits d'inscription à l'université partenaire et est financé par l'université. Les étudiants restent inscrits à l'université de leur pays pendant la durée du programme, mais les étudiants allemands reçoivent un statut vacancier.

Humboldt-Universität zu Berlin

Carleton University

All disciplines

This exchange program is mainly for short-time exchanges of faculty members, especially of the Departments of Computer Science and the Department of Music. Within the exchange, however, there is an opportunity for students in the Department of Computer Science at the Humboldt Universität to stay at Carleton University for three months. The agreement also allows for one student from the Humboldt Universität, Department of Music and one from the Department of Computer Science to stay at Carleton for one month. In addition, two students from the latter department may stay at Carleton for three months. Last year, two students studied Computer Science for three months at Carleton.

The applicants are screened by the departments and if possible by one Canadian faculty member who is a guest lecturer at the respective department in Berlin.

Students remain enrolled at their own university.

For faculty members, travel expenses are usually paid for by the home institution, whereas accommodation and living costs are usually assumed by the host university.

Humboldt-Universität zu Berlin

University of Toronto

Drama, German Language and
Literature

Originally designed as an exchange program for faculty members, in 1994, an additional agreement was signed for the exchange of up to ten students a year from either university. Last year, eight students from Toronto studied one academic year at Humboldt Universität and seven students from the Humboldt Universität went to the University of Toronto.

Applicants are screened and selected by their department in Canada, whereas at the Humboldt Universität, there is a committee of representatives from the "Akademisches Auslandsamt" and the respective departments which is in charge of the selection of students. The program includes a tuition waiver. For Humboldt students, their university may also give them supportive grants for travel expenses and health insurance. Canadian students pay their usual tuition fees in Toronto and have to pay a comparatively small fee for enrolling at the Humboldt Universität. For faculty members, the home university usually covers travel expenses, whereas the host institution assumes cost-of-living and accommodation expenses.

For the time of the exchange, students remain enrolled at their home university, with German students receiving special leave status.

Apart from the exchange scheme, there are close links between the two universities in nearly all departments (with emphasis on Languages, Mathematics, Sociology and, above all, Drama). Thus, for example, the Geography Department in Toronto planned excursions to Ontario and Quebec for the Geography Department of the Humboldt Universität. There are plans for this to be repeated in 1996. In turn, the Humboldt Universität has organized an excursion for the University of Toronto in the Berlin region.

Technische Universität Berlin (TUB)
Institut f. Bergbauwissenschaften

University of Alberta
Faculty of Engineering

This exchange program is based on a university-to-university agreement which concerns only the Institut für Bergbauwissenschaften (Mining Engineering) in Berlin and the Faculty of Engineering in Alberta.

In 1994, one student from the TUB studied at the University of Alberta. Students from the TUB are selected by a committee of representatives from their department and the DAAD. Canadian students are selected by their university, but in 1994 no Canadians studied at the TUB. The program is funded by the Deminex (company) and the TUB for German students, and by the Deminex and the University of Alberta for the Canadian participants. The latter must finance part of the exchange program themselves.

The future of this exchange is quite uncertain as the financing company has stopped its funding. Thus, in 1996, no applications will be accepted. Moreover, there are plans to shut down the Berlin Department of Mining Engineering in future.

Technische Universität Berlin
FB Wirtschaft und Management

University of British Columbia
Dept. of Commerce and Business

A university-to-university agreement for students of a specific department (Fachbereich Wirtschaft und Management/Department of Commerce and Business) for up to six students each year. Last year, six students from Berlin studied in Vancouver, but up to date, no Canadian students have participated in the exchange program.

Applicants are expected to have at least second year standing (i.e. with "Vordiplom") and a good academic record. The German participants are selected by a committee to which representatives of the department and of the "Akademisches Auslandsamt" belong, the Canadian participants are selected by their department.

German students enjoy the benefits of an IAS-exchange. The costs of (reduced) tuition fees, health insurance in Vancouver, travel expenses and a supportive grant for the cost of living are therefore covered by the DAAD. German participants remain enrolled at their home university, but usually they receive leave status.

It is strongly recommended that all applications are directed to the "Akademisches Auslandsamt".

Technische Universität Berlin (TUB)

FB Architecture/Alle Fachrichtungen

Carleton University

School of Architecture/All disciplines

This university-to-university agreement will begin operating in the fall of 1995. According to the agreement, the exchange is mainly designed for students from the Departments of Architecture, although other faculties and academic units may participate in the exchange by mutual consent. The program aims at the exchange of faculty members and graduate students for short term, long term and group visits.

The number of students and faculty members that can participate in this exchange program is not limited, although an annual number of 20 to 30 is the target. In its first year, 17 German students and three Canadian students will participate in the exchange.

Applicants are screened by their departments and should be graduate students with a good academic record.

Students will register and pay the normal tuition fees at their home institution (tuition waiver). Carleton University and the TUB will suggest suitable accommodation for faculty members and graduate students visiting Ottawa and Berlin respectively, but the visitors will be responsible for travel and accommodation costs. At time of publication, no financial support for exchange students was planned.

For the time of the exchange, German students remain enrolled at their home university with special leave status.

**Rheinische Friedrich-Wilhelms-
Universität Bonn**

All disciplines

University of British Columbia

All disciplines

This exchange program is based on a university-to-university agreement and is designed for three to five students from all departments. There were three students from Bonn at UBC last year, with the same number of UBC students studying in Bonn.

Participants from Bonn are selected by a committee of representatives from the "Akademisches Auslandsamt" and the respective departments. Canadian students are selected by their university.

Apart from a tuition waiver, participants may apply for special grants which cover the cost of living and accommodation. These costs are usually paid for by the participants.

The students generally remain enrolled at their home university (with special leave status for German students) for the time of the exchange, which lasts for one academic year.

Note: The Rheinische Friedrich-Wilhelms-Universität plans to establish an exchange program with the University of Victoria in 1996, specifically for European and Canadian Studies.

**Technische Hochschule Carola-
Wilhelmina zu Braunschweig**
FB Maschinenbau

University of Waterloo
Dept. of Engineering

This university-to-university agreement originated in 1981 and was especially designed for students of the Fachbereich Maschinenbau at the TH Braunschweig and the Department of Engineering at Waterloo, although access to Waterloo is not restricted. Up to 10 students from Germany usually study at Waterloo, whereas only up to five or six usually come from Waterloo to the TH Braunschweig.

The German students are selected by a committee of representatives of the Engineering Department and of the "Akademisches Auslandsamt". About six of the ten students receive financial support within the framework of an IAS program, i.e. the DAAD funds travel costs and tuition is free. These students receive up to DM 700 per month on condition that they provide DM 500 for their upkeep themselves. German students that are supported by the BAFöG scheme cannot be supported by the IAS/DAAD grant but they are eligible for Auslands-BAFöG. The Canadian students must cover their costs individually.

Usually students remain enrolled at their university (German students receive special leave status), unless they decide to do otherwise.

Plans are being made to extend the exchange program to faculty members in the very near future.

Technische Universität Chemnitz- Zwickau

Trent University / Brock University/ McMaster University

Within the framework of the Ontario-Baden-Württemberg Agreement, two students from Chemnitz (in general from the Departments of Economics or Humanities) can study in Canada at either Trent University, Brock University or McMaster University. This exchange program is coordinated in Freiburg. The TU Chemnitz-Zwickau only participates in this program on the basis of a cooperation agreement between Sachsen and Baden-Württemberg. As a consequence, no Canadian students come to Chemnitz within this program. Canadian students are sent to universities in Baden-Württemberg instead.

The participants are selected by their respective departments. Unless German students receive Auslands-BAFöG, the participants have to finance the exchange themselves. Nevertheless, there is a reduction of tuition fees of CDN \$ 2500. The exchange lasts a year, during which the students remain enrolled at their home university. German students receive special leave status for the time of the exchange.

Program administration:

Frau Lorenz

Fax: (0371) 531 1300 oder 531 1684

**Heinrich-Heine-Universität
Düsseldorf**
Germanistisches Seminar

University of Western Ontario
Modern Languages
Department of Literature

This exchange program for up to three students is based on an agreement between the two departments. Students from other departments in the humanities may participate by mutual consent, but in general only students from the two departments take part. The number of exchange students should level out over the next couple of years. Last year, four students from Canada stayed at the Heinrich-Heine-Universität Düsseldorf and two German students went to Ontario.

Applicants have to be enrolled for studies at one department of the humanities at either university. Students with higher academic standing (i.e. third year or fourth year students) are usually preferred.

The departments of either university are responsible for the selection of participants. The exchange agreement covers a tuition waiver. Students assume transportation costs and living expenses.

Students remain enrolled at their home university (German students with special leave status) for the time of the exchange which lasts for one academic year.

**Gerhard-Mercator Universität-
Gesamthochschule Duisburg**

Fachbereich Chemie

McMaster University
Department of Chemistry

University-to-university agreement but restricted to the Departments of Chemistry. Up to four students go to Hamilton and four to Duisburg.

The students are selected by a committee of representatives from the department and the "Akademisches Auslandsamt". In Canada, it is the department that selects the participants.

Within the exchange program, there is a DAAD-funded IAS program. Apart from a tuition waiver, students are advised with regard to the choice of courses they will take, especially those which will be accepted by their home university upon their return. A good senior thesis is, for instance, equivalent to two "Praktika" of the "Hauptstudium".

Moreover, students are assisted in finding accommodation. Accommodation and "Sozialgebühren" are paid by the students.

Students remain enrolled at their home university but German students usually receive special leave status.

**Technische Universität
Bergakademie
Freiberg**

Brock University

Within the framework of the exchange program between the Albert-Ludwigs-Universität in Freiburg with the Universities of Trent, Brock and McMaster, one student from Freiburg can study in Canada at Brock University. This exchange program is coordinated in Freiburg. The TU Bergakademie Freiberg only participates in this program on the basis of a cooperation agreement between Sachsen and Baden-Württemberg. As a consequence, no Canadian students come to Freiburg within the program. Canadian students are sent to universities in Baden-Württemberg instead.

The participants are selected by a committee from the Technische Universität Bergakademie Freiberg. A shortlist is submitted to their counterparts at the Albert-Ludwigs-Universität Freiburg where a final selection in cooperation with the Canadian Resident Director for the Study Program Trent/Brock/McMaster is made.

Unless German students receive Auslands-BAFöG, the participants have to finance the exchange themselves. Nevertheless, there is a reduction of tuition fees of up to CDN \$ 2500 (i.e. ancillary fee).

The exchange lasts one year, during which time the students remain enrolled at their home university. German students receive special leave status for the time of the exchange.

This exchange program at the Albert-Ludwigs-Universität Freiburg is part of an agreement between the Land of Baden-Württemberg and the province of Ontario. Within the general scheme, there are 18 universities in Ontario and nine in Germany, one of which is the Albert-Ludwigs-Universität in Freiburg. Up to seven students from this latter institution can go to different universities in Ontario for one academic year. Access is limited to undergraduate students. Students from the Departments of Law and Medicine usually cannot participate in the exchange program. The exchange program is open to faculty members as well.

Students are expected to have at least second year standing (i.e. "Vordiplom" or "Zwischenprüfung") when leaving for Canada. Applicants in Germany are screened and selected by a committee of representatives from the "Akademisches Auslandsamt", the English Department and the Canadian Resident Director. Their shortlist is sent to the central managing committee at the Universität Konstanz where the final decision is made. In Canada, the central managing board at Queen's University is responsible for the selection of the Canadian students.

The program includes a tuition waiver. German students who are not on the BAFöG scheme may apply for a supportive grant for their travel costs from the Land of Baden-Württemberg. Canadian students are offered a free one-month intensive language course in Heidelberg before they start their studies.

Students are admitted as non-degree students at the host institution, i.e. they can attend courses and acquire credits ("Scheine") at the partner university, which may be accepted by their home university, but they cannot receive an academic degree at the host university.

Students remain enrolled at their home university, German students usually receive special leave status.

**Albert-Ludwigs-Universität
Freiburg**

All departments

Trent/Brock/McMaster

All departments

This exchange program with three Ontario universities is separate from the Baden-Württemberg - Ontario exchange program. Up to 30 students from either country can participate in the exchange program, as did in 1994.

Access is limited to undergraduate students. Students from the Departments of Medicine and Law are usually excluded. The program is also open to faculty members. Students are expected to have at least second year standing (i.e. "Vordiplom" or "Zwischenprüfung"). Applicants in Germany are screened and selected by a committee of representatives from the "Akademisches Auslandsamt", the English Department and the Canadian Resident Director for the exchange program at Freiburg.

The program includes a reduced tuition waiver (ancillary fee of CDN \$ 2500). German students that are not on the BAFÖG scheme may apply for a supportive grant for their travel costs from the Land of Baden-Württemberg.

Students are admitted as non-degree students at the host institution, i.e. they can attend courses and acquire credits ("Scheine") at the partner university, which may be accepted by their home university, but they cannot receive an academic degree at the host university.

Students remain enrolled at their home university, German students usually receive special leave status.

Justus-Liebig-Universität Giessen
English Department

Simon Fraser University
Faculty of Arts

University-to-university agreement, mainly for students but also for faculty, though the latter is not yet in operation. Up to ten students from either university can stay for one semester at the host institution. Last year, ten German students studied at SFU and seven Canadian students studied in Giessen. The German students are mainly from the English Department, whereas up to 10 Canadian students are from all departments.

German students are selected by the English Department. Canadian students are selected by the Registrar for International Programs.

There is a tuition waiver for Canadian students at Giessen, but they continue to pay their usual tuition fees at their home university. German students only have to pay the in-province tuition fees of about CDN \$ 740 per semester.

Students usually remain enrolled at their home university. The German students receive special leave status.

University-to-university agreement covering all disciplines for the exchange of students as well as faculty members, covering all disciplines. Program due to begin operating in the fall of 1995. The exchange program is designed for the exchange of two students from each university.

The students from Greifswald are selected by a committee of representatives from the departments concerned (for the time being mainly the Department of English) and of the "Akademisches Auslandsamt". German students should have proficient knowledge of English, but the TOEFL Test is not required.

Applications from German students should be submitted to the "Akademisches Auslandsamt" by July, 15. There is a tuition waiver for German students, but a "Sozialbeitrag" of CDN \$ 200 must be paid.

Canadian students are selected by a similar committee and have to have a certificate of competence in German (but no PNDS test is required.). They have to pay their normal tuition fee in Canada, but they receive a monthly grant of DM 500 in Germany. The Canadian students must pay the "Sozialbeitrag" at the German university as well (about DM 50).

German students remain enrolled at their university but the "Sozialbeitrag" is reduced and they receive leave status. Qualifications achieved at the exchange university are usually accepted by the home institution.

University-to-university agreement for all disciplines. Within this exchange program up to four students from either university may participate. Applicants are expected to have second year standing and to achieve at least 580 points in the TOEFL Test.

The students from Germany are screened and selected by a committee of representatives from the "Akademisches Auslandsamt", the English Department and the department involved. Canadian students are selected by a similar committee.

The exchange program covers a tuition waiver and Canadian students may get a monthly accommodation support of DM 100 (N.B. rent levels in Eastern Germany are considerably lower than in Western Germany). Credits achieved at the partner university are accepted by the home university.

Students remain enrolled at their home university. Canadian students pay their usual home fees for the time of the exchange. German students usually receive leave status with a reduced fee. The exchange is normally for one year, but a shorter duration (half a year) is also possible.

This exchange program will begin operating in 1996.

Technische Universität Hamburg-Harburg

University of Waterloo

University-to-university agreement for students and faculty, although for the time being it is a student exchange only. Up to eight students can participate each year. Application requirements for German students are the "Vordiplom" or "Zwischenprüfung", grades above average and a successful interview by the selecting committee. The program manager (Prof. Dr. Mahrenholtz), a junior lecturer (Herr Skiera) and a representative of the "Akademisches Auslandsamt" (Dr. Wilberg) are the members of the selecting committee in Germany. In Canada, selection is made by the university, which is represented by the program manager, Prof. H.C. Ratz, Director of Engineering.

The first three to five students on the German shortlist obtain a DAAD grant within the framework of the IAS scheme. This covers travel expenses, reduced tuition fees and a contribution to living costs of about DM 600. Students who do not qualify for the IAS grant nevertheless enjoy reduced tuition fees and pay only the domestic Canadian fees.

Canadian students have not received any grants so far, but they are given a reduction on tuition fees at their home university for the time they are abroad. Students who stay for practical training receive a remuneration of about DM 1000 per month.

The students remain enrolled at their home university for the time of the exchange, which lasts a year for German students and one term for Canadian students.

In 1994/95 five Canadian students came to the TU Hamburg-Harburg, seven German students studied at Waterloo.

Universität Hannover
Institut für Anorganische Chemie

Department of Chemistry
University of British Columbia

This exchange scheme is an example of an informal but nevertheless successful exchange program. Originating in 1989, this exchange program is based on personal contacts of two professors from the departments involved. It is for post-graduate and postdoc students and faculty members of the Departments of Chemistry. Last year, two doctorates and two post-doctorates from UBC stayed in Hanover for one month and two doctorates and the managing professor from Hanover stayed in turn for one month at UBC.

The exchange puts special emphasis on cooperation in the field of metallic ions in acid environments and has been quite successful in this field. The Canadian managing professor, who recently won the "Alexander von Humboldt Forschungspreis", will be host professor for six months in 1996.

The exchange has been financed by the DFG, NSERC and NATO. As NATO has stopped financing travel expenses there may be some problems in financing the exchange in the future.

Universität Hannover
Bauingenieur- u. Vermessungswesen

University of New Brunswick
Dept. of Surveying Engineering

This exchange program is an IAS program and is based on close cooperation between the Institut für Photogrammetrie und Ingenieurvermessung and the Department of Surveying Engineering (which recently has been renamed as the Department of Geodesy and Geomatics). Thus, the exchange is restricted to students from these departments only. As an IAS program, the exchange is basically a unilateral one, only a few Canadian students have come to Hanover and not on a regular basis. Within the program, up to three German students go to New Brunswick for the duration of one academic year.

The participants are expected to have a good to excellent academic record and to have second year standing ("Vordiplom"). Although the TOEFL Test is not required, students interested in the exchange should have a decent knowledge of English (which would equal a score of at least 550 points in the TOEFL Test).

The students are screened and selected by the department.

The program covers a tuition waiver, a contribution to travel expenses and a monthly allowance of about DM 600 for the duration of eight months.

Students remain enrolled at their home university but usually receive leave status.

This exchange program at the University of Heidelberg is part of the cooperation agreement between the Land of Baden-Württemberg and the province of Ontario. Nine German universities and 18 from Ontario participate in this scheme. One of the German universities, the University of Heidelberg sends up to eight German students to the partner universities in Ontario. There were six students from Ontario who studied at Heidelberg University last year. The exchange program is open to all departments except for Medicine and part of the Department of Law. It is for both students and faculty, though an exchange of the latter has not yet taken place.

German students are expected to have passed their "Vordiplom" or "Zwischenprüfung" when leaving for Canada. Students are selected by a university committee. The shortlist of the committee is sent to a central exchange managing board at the University of Konstanz, which in turn makes a selection for the whole of Baden-Württemberg. The new shortlist of about 45 to 50 students is sent to the Canadian program managing board, which in turn selects the Canadian students for the exchange program.

The students are admitted to the partner university as non-degree students, i.e. they can attend the courses at the partner university and acquire credits ("Scheine") but they are not eligible to receive an academic degree (e.g. M.A., B.A., etc.). These credits may be accepted by the home university.

The program includes a tuition waiver and for German students who do not receive Bafög, the Land of Baden-Württemberg pays part of the travel expenses. Canadian students should attend a language course at their university (not the PNDS). A free one-month preparatory German course in Heidelberg is offered. Students remain enrolled at their home university for the time of the exchange. Students should apply by January.

Ruprecht-Karls-Universität Heidelberg

Dalhousie University

This exchange program has not been institutionalized but is based on an informal agreement between personal contacts which go back about ten years. Within this exchange program, about two to three students regularly attend courses at the partner university.

The participants are selected by the program coordinators.

As the program lacks official funding, neither tuition fees nor travel expenses are covered.

However, German students may accept a teaching assistantship in Halifax or may apply for a "Teilstipendium". Canadian students from Halifax may receive a "DAAD-Kontaktstipendium" or finance their stay at the University of Heidelberg privately.

The exchange lasts one academic year. Students remain enrolled at their home university.

Tel.: (902) 494 2161
Fax: (902) 494 2719

University-to-university agreement for up to 20 students. This exchange program of the IAS-type is restricted to students who belong to the Department of Commerce and Economics, specifically "Wirtschaftsingenieurwesen" in Kaiserslautern and to students of Commerce at Queen's School of Business. German students are expected to have passed their "Vordiplom" and Canadian students should be in their third or fourth year. The participants are selected by their departments and faculties.

Each year, an orientation program is offered for interested students at the home university. At the partner university, students are looked after by a club of students who are interested in the exchange program. These clubs help the exchange students with finding accommodation, preferably together with other students from the host university.

There is a tuition waiver. The students, who keep enrolled at their home university, only have to pay the usual fees at their home university. The cost of living and travel expenses have to be paid by the students themselves unless they qualify for one of six DAAD grants ("Teilstipendium") that cover part of the costs. This opportunity is only available to German students.

Last year, 18 students from Kingston came to Kaiserslautern and six German students studied at Queen's University. This year, there are 16 German students going to Kingston, but there are not any students from Kingston in Kaiserslautern.

The exchange lasts one term. Canadian students have to choose the summer term, whereas German students have the choice between summer or winter term.

**Technische Hochschule
Friedericiana
Karlsruhe**

18 Universities in Ontario

This exchange program at the Technische Hochschule Friedericiana Karlsruhe is part of the cooperation agreement between the Land Baden-Württemberg and the Province of Ontario. Within this cooperation scheme, there are nine German universities and 18 in Ontario. One of the German universities participating in this program is the Technische Hochschule Friedericiana Karlsruhe from where up to five German students go to the partner universities in Ontario. The exchange program is open to all departments except for Medicine and part of the Department of Law. It is for both students and faculty, though the latter has not yet come into operation.

German students are expected to have second year standing, i.e. to have passed their "Vordiplom" or "Zwischenprüfung" when leaving for Canada. Students are selected by a university committee. The shortlist of this committee is sent to a central exchange managing board at the University of Konstanz which in turn makes a selection for the whole of Baden-Württemberg. This new short list of about 45 to 50 students is sent to the Canadian program managing board which in turn selects the Canadian students for the exchange program.

The students are admitted to the partner university as non-degree students, i.e. they can attend the courses at the partner university and acquire credits ("Scheine") but they are not allowed to do an academic degree (e.g. M.A., B.A. etc.). These credits may be accepted by the home university.

The program includes a tuition waiver and for German students who do not receive Bafög, the Land Baden-Württemberg pays part of the travel expenses. Canadian students should attend a language course at their university (not the PNDS) and a free one-month preparatory German course in Heidelberg is offered.

Students remain enrolled at their home university for the time of the exchange.

University-to-university agreement since 1985 which was renewed in 1995. It offers exchange opportunities for up to two students from all departments each year. The exchange agreement includes both students and faculty. Last year, one student from either university visited the partner university.

Applicants are screened and selected by the program management at their home university. The program includes a tuition waiver and apart from travel expenses, participants only have to pay for living costs and accommodation.

Students remain enrolled at their home university. The exchange lasts one year or six months, although it is generally preferred that students stay for a whole academic year.

This program is to come into operation in 1996.

This exchange program is based on an agreement between the Universität Koblenz-Landau and the CREPUQ (Conférence des recteurs et des principaux des universités du Québec) and will come into operation by autumn 1996. According to this agreement, the Universität Koblenz-Landau has the opportunity to send students to any of the nineteen universities in the province of Quebec. In practice, the aim is to establish close links between the English Department of the Universität Koblenz-Landau and two English-speaking universities (Concordia and McGill), whereas the French Department in Koblenz-Landau will aim for two French-speaking universities in Montreal. The exchange program is for students only. As no number of exchange students has been specified, four students are to participate from each side to begin with.

Canadian applicants are expected to be in good standing and have an adequate command of the German language. In Koblenz-Landau, students should have a good academic record and should be studying English or French, respectively.

Students are selected by their own universities. Usually the departments involved are responsible for the selection.

The exchange program includes a tuition waiver, students only have to pay their usual fees at their home institution. Students have to pay for their flights, accommodation and living expenses.

For the time of the exchange, which lasts either one semester or one year, students remain enrolled at their home university.

19 universités au Québec

Ce programme d'échanges est basé sur un accord entre l'Universität Koblenz-Landau et la CREPUQ (Conférence des recteurs et des principaux des universités du Québec) et entrera en vigueur en automne 1996. Conformément à cet accord, l'Universität Koblenz-Landau a la possibilité d'envoyer des étudiants à n'importe laquelle des 19 universités de la province du Québec. En pratique, il est prévu d'établir des liens étroits entre le département d'Anglais de l'Universität Koblenz-Landau et deux universités anglophones (Concordia et McGill), tandis que le département de Français de Koblenz-Landau établira des liens avec deux universités francophones de Montréal. Ce programme d'échange est réservé uniquement aux étudiants. Étant donné que le nombre d'étudiants pour l'échange n'a pas été spécifié, il est prévu pour le début d'envoyer quatre étudiants des deux côtés.

Il est demandé aux candidats canadiens d'avoir un bon niveau et une maîtrise appropriée de la langue allemande. Koblenz-Landau demande à ses étudiants d'avoir un bon bulletin d'études et d'étudier soit l'Anglais soit le Français.

Les étudiants sont sélectionnés par leurs propres universités, habituellement les départements concernés sont responsables de leur sélection.

Le programme d'échange comprend l'exemption des droits d'inscription, les étudiants doivent seulement payer les droits normaux à l'institution de leur pays. Les étudiants doivent subvenir à leurs frais de voyage (vols), de logement ainsi qu'à leurs frais de subsistance.

Les étudiants restent inscrits à l'université de leur pays pendant la durée de l'échange qui est soit d'un semestre soit d'une année.

de Montréal**

Ce programme d'échanges est destiné aux étudiants, de deux à quatre par an, qui veulent passer le BAA (Baccalauréat en administration des affaires). L'année dernière, trois étudiants allemands sont allés à Montréal et un étudiant canadien est venu à Coblenz.

Les étudiants allemands doivent avoir passé leur «Vordiplom» avec succès. De même, les étudiants canadiens doivent avoir un niveau de deuxième année. Les participants sont sélectionnés par le «Akademisches Auslandsamt» à Coblenz et par la direction du programme à Montréal.

Le programme comprend une exemption de droits d'inscription, les étudiants payent des droits d'inscription seulement à l'université de leur pays où ils restent inscrits. Les examens qu'ils passent à l'université partenaire sont reconnus à l'université de leur pays.

L'échange dure un an.

Il existe aussi un programme IAS pour les étudiants allemands. Ce programme IAS comprend une somme uniforme pour les frais de voyage et une aide financière mensuelle pour les étudiants. Le «Vordiplom» est supposé être au-dessus de la moyenne.

En outre, l'échange de membres du corps enseignant est aussi possible dans le cadre du programme d'échange entre WHU et HEC.

**Queen's University
(Business School)**

This exchange program is designed for up to three students who wish to obtain the degree of a Masters of Business and Administration (MBA). German students are expected to have a second-year standing. The results of the "Vordiplom" should be above average. The German students are expected to have scored at least 560 points with the TOEFL Test and at least 530 points with the GMAT (Graduate Management Admission Test). Canadian students have to have second-year standing, but no language tests are required.

The participants are selected by the Program Manager of the international exchange programs in Canada and by the "Akademisches Auslandsamt" in Germany.

The program has a tuition waiver, students only pay their domestic tuition fees at their home university and remain enrolled there. Credits obtained at the partner university are accepted by the home university.

The exchange lasts one year.

This exchange program is designed for up to three students who wish to obtain the MBA degree. German students are expected to have a second-year standing. The results of the "Vordiplom" should be above average. The German students are expected to have scored at least 560 points with the TOEFL Test and at least 530 points with the GMAT (Graduate Management Admission Test). Canadian students have to have second-year standing, but no language tests are required.

The participants are selected by the Program Manager of the international exchange programs in Canada and by the "Akademisches Auslandsamt" in Germany.

The program has a tuition waiver, students only pay their domestic tuition fees at their home university and remain enrolled there. Credits obtained at the partner university are accepted by the home university.

The exchange lasts one year.

Universität zu Köln

Wirtschafts- und Sozialwissen-
schaftliche Fakultät

This exchange program runs under a special agreement, the Program of International Management (PIM) and is for students and faculty members of the Departments of Business only. All four universities take part in this program, to which 21 universities from 16 countries (1995) belong. The aim of the program is to establish multilateral student exchange programs. The Universität zu Köln has first established an exchange with McGill for two students from either university each year. In 1995, there are two students who went to study at the Western Business School in Ontario and from 1996 onwards, there will be an exchange with UBC, beginning with one student for a start. Until now, no Canadian students have come to Cologne within the framework of this program as no suitable students with sufficient knowledge of German could be found.

The exchange is for one semester (three to five months respectively) and it is recommended that 10 weeks practical training be done subsequently. Applicants are expected to have at least second year standing and a good command of the language of teaching.

Applicants are selected by a committee that consists of the coordinator of the PIM at the university, one member of the Department of Business and a representative of a company.

The program includes a tuition waiver and usually students try to receive additional grants. German students may receive Auslands-BAFöG. Students are helped with finding suitable accommodation and a company to stay with for the practical training. Credits acquired at the host institution may be accepted by the home university.

For the duration of the exchange, students remain enrolled at their home university.

Universität zu Köln
Dept. of Geography

Simon Fraser University
All departments, Geography

This exchange program runs under the DAAD-IAS scheme and is designed for up to four German students and one Canadian student respectively (there is a special agreement here, according to which one of the four German students may come from the Geography Department of the University of Saarbrücken). In Cologne, admission is restricted to students of the Geography Department whereas the Canadian students can come from all departments. The exchange program is for students only.

Requirements include, apart from a "Vordiplom" or "Zwischenprüfung" above average, a score of at least 600 points at the TOEFL Test and an interview in English, in which the students are expected to prove they have sufficient knowledge about Canada (history, geography and politics).

The German participants are selected by a committee of one representative of the "Akademisches Auslandsamt", one lecturer from a separate department and the lecturer who manages the program.

The Canadian participants are selected by the program coordinator at the SFU.

For students from Cologne, the program covers the tuition fees (reduced to domestic level) at the partner university, a flat rate for travel expenses, health insurance and a monthly allowance ("Teilstipendium") for upkeep (about DM 800 currently). German students have to pay for the admission fees to the TOEFL Test and for their visa.

For students from Vancouver, there is a supportive grant, which covers part of the living costs in Cologne. The program is financed by the two universities and the DAAD.

There were three students from Cologne in Vancouver last year and one Canadian in Cologne under this program. There are four German students at the Simon-Fraser University and one Canadian student studying in Cologne this year.

For the time of the exchange (two trimesters/one semester), students remain enrolled at their home university but receive leave status.

Students are recommended to apply for the exchange soon after the "Vordiplom" or "Zwischenprüfung".

The Universität Konstanz in Germany and Queen's University in Canada organize and coordinate the exchange program that is based on a cooperation agreement between the Land of Baden-Württemberg and the Province of Ontario. Within this cooperation scheme, there are 18 universities in Ontario and nine German universities from Baden-Württemberg which annually offer exchange opportunities for up to 50 students from either region. About 7 students come directly from the Universität Konstanz each year.

Access is limited to undergraduate students and students from the Departments of Law and Medicine usually cannot participate in the exchange program. The exchange program is open to faculty members as well.

Students are expected to have at least second year standing (i.e. "Vordiplom" or "Zwischenprüfung") when leaving for Canada. Applicants in Germany are screened and selected by a committee of representatives from the "Akademisches Auslandsamt", the English Department and the Canadian Resident Director. In Canada, the central managing board at Queen's University is responsible for the selection of the Canadian students.

The program includes a tuition waiver and German students who are not on the BAFöG scheme can apply for a supportive grant for their travel expenses from the Land of Baden-Württemberg. Canadian students are offered a free one-month intensive language course in Heidelberg before they start their studies.

Students are admitted as non-degree students at the host institution, i.e. they can attend courses and acquire credits ("Scheine") at the partner university, which may be accepted by their home university, but they cannot do an academic degree at the host university.

Students remain enrolled at their home university, German students usually receive special leave status.

This exchange agreement operates within the framework of the Baden-Württemberg-Ontario exchange program and is a direct exchange program for up to five students from either university. At Konstanz, two of these five places are reserved for students from the Department of Biology within an IAS-exchange program.

As the program runs under the Baden-Württemberg-Ontario exchange scheme, the conditions are fairly similar to the overall program:

Students are expected to have at least second year standing (i.e. "Vordiplom" or "Zwischenprüfung") when leaving for Canada. Applicants in Germany are screened and selected by a committee of representatives from the "Akademisches Auslandsamt", the English Department and the Canadian Resident Director. A similar committee is responsible for the selection of Canadian participants from Guelph.

The program includes a tuition waiver and German students who are not on the BAFöG scheme can apply for a supportive grant for their travel expenses from the Land of Baden-Württemberg. Canadian students are offered a free one-month intensive language course in Heidelberg before they start their studies. In addition to the tuition waiver, the two German biology students can apply for a "Teilstipendium" under the IAS program, provided that they reach at least 550 points in the TOEFL Test. They receive a flat rate of DM 2000 for travel expenses and receive a monthly allowance of about DM 600.

Students are admitted as non-degree students at the host institution, i.e. they can attend courses and acquire credits ("Scheine") at the partner university, which may be accepted by their home university, but they cannot do an academic degree at the host university.

Students remain enrolled at their home university, German students usually receive special leave status.

Universität Konstanz
Wirtschaftswissenschaft

Université du Québec à Montréal
(UQM) Dépt. des sciences économiques / Toutes disciplines

Ce programme d'échange est basé sur un accord entre les deux départements. L'accès est donc limité aux étudiants du Fachbereich Wirtschaftswissenschaften à Konstanz (Constance), alors que cette limitation n'existe pas pour les étudiants de l'UQM où les étudiants de tous les départements sont acceptés. Le programme d'échange est prévu pour un maximum de cinq étudiants de chaque université et fournit des possibilités d'échange pour un maximum de deux membres du corps enseignant.

Les candidats sont choisis et sélectionnés par un comité de représentants de leur département et par le «Akademisches Auslandsamt» de Constance. Un comité semblable est responsable de la sélection des étudiants canadiens.

Le programme prévoit l'exemption des droits d'inscription. Pour les membres du corps enseignant, tous les frais sont payés par l'institution qui a envoyé l'invitation.

Les étudiants restent inscrits à l'université de leur pays pendant la durée de l'échange. Les étudiants allemands reçoivent un statut vacancier spécial. L'échange dure une année.

Apart from many unofficial contacts and exchanges that are related to specific research projects (especially with the Departments of Physics), the Universität Leipzig currently has no official partnership contract with a Canadian university, but efforts are being made to facilitate cooperation with the Carleton University and the Université Laval, both of which will be sending one student for one semester to the Universität Leipzig on a DAAD "Kontaktstipendium". Participants are chosen by the Canadian university in question and receive a monthly grant of DM 800.

As these agreements are still in the making, no more information could be furnished at the time of printing.

À part de nombreux contacts et échanges inofficiels en relation avec des projets de recherche spécifiques (en particulier avec le département de physique), l'Universität Leipzig n'a actuellement aucun contrat officiel de partenariat avec une université canadienne, mais des efforts sont déployés pour faciliter la coopération avec la Carleton University et l'Université Laval. Toutes deux vont envoyer un étudiant pour un semestre à l'Universität Leipzig grâce à une «DAAD- Kontaktstipendium».

Les participants sont choisis par l'université canadienne en question et reçoivent une bourse mensuelle de DM 800.

Etant donné que ces accords ne sont pas encore définitifs, il n'a pas été possible d'obtenir plus d'informations avant de livrer ce recueil à l'impression.

Within the framework of the exchange program between the Albert-Ludwigs-Universität in Freiburg with the universities of Trent, Brock and McMaster, two students from Leipzig can study in Canada at either Trent University, Brock University or McMaster University. This exchange program is coordinated in Freiburg and the Universität Leipzig only participates in this program on the basis of a cooperation agreement between Sachsen and Baden-Württemberg. As a consequence, no Canadian students come to Leipzig within this program, Canadian students are sent to Baden-Württemberg instead.

Applicants are expected to have second year standing (i.e. "Vordiplom" or "Zwischenprüfung") and a reasonable knowledge of English (the TOEFL Test is not required). The participants are selected by a committee of the Universität Leipzig that submits the shortlist to their counterparts at the Albrecht-Ludwigs-Universität Freiburg who carry out the final selection in cooperation with the Canadian Resident Director for the Study Program Trent/Brock/McMaster.

The program includes a reduction of tuition fees to CDN \$ 2500 (i.e. ancillary fee) which the participants have to pay themselves unless they receive Auslands-BAFÖG.

The exchange lasts a year, for the time of which students remain enrolled at their home university. German students receive special leave status for the time of the exchange.

Within the framework of the exchange agreement between TH Braunschweig and the University of Waterloo, two students from Magdeburg can study in Canada at the University of Waterloo. This exchange program is coordinated in Braunschweig and the Otto von Guericke Universität Magdeburg only participates in this program on the basis of a cooperation agreement between Magdeburg and Braunschweig. As a consequence, no Canadian students come to Magdeburg within this program, Canadian students are sent to Braunschweig instead.

The participants are selected by their department.

Unless German students receive Auslands-BAFöG or qualify for participation under the IAS program, the participants have to finance the exchange themselves. Nevertheless, there is a reduction in tuition fees to CDN \$ 2500. The exchange lasts a year, for the time of which students remain enrolled at their home university, German students receive special leave status for the time of the exchange.

Fachbereich Chemie

University of Toronto
Department of Chemistry

This exchange agreement runs under the IAS program of the DAAD and is a unilateral program for up to 6 students from Mainz. This year, three students from Mainz went to Toronto, as in the past year.

In order to qualify for the exchange program, students are expected to have second year standing (i.e. "Vordiplom" or "Zwischenprüfung") when leaving for Canada and to have a good academic record. In addition, they should reach a certain level at the TOEFL Test.

Applicants are screened and selected by a committee of representatives from the Department of Chemistry and the DAAD (represented by the "Akademisches Auslandsamt"). The IAS program as a "Teilstipendium" includes a tuition waiver, the costs for health insurance at the host institution, a flat rate for travel expenses (DM 2000) and a monthly allowance of about DM 800. Students are expected to contribute to the cost of living and accommodation themselves.

The exchange is for one semester and students remain enrolled at their home university for the time of the exchange.

Englisches Seminar

University of York
English Department

This exchange program is based on a department to department agreement for one graduate student from either university.

In order to qualify for the exchange program, students are expected to have at least an M.A. degree when leaving for Canada and to have a good academic record. Applicants are screened and selected by a committee of representatives from their departments.

The student from Mainz at York receives an out-of-state tuition waiver and a research assistantship (CDN \$ 8500) to finance in-state tuition and living expenses. The York student at Mainz receives a 10 month scholarship (DM 8000) plus a research assistantship and a teaching assistantship for one course.

The exchange is for one academic year.

This university-to-university agreement dates back to 1972 and is based on a bilateral cultural agreement between the then Chancellor of Germany, Helmut Schmidt and the then Prime Minister of Canada, Pierre Elliot Trudeau. Since then, about 180 German students have participated in this exchange program who mainly study Germanic and Slavic languages, Mathematics or Computer Sciences. This agreement has been joined by other universities from Canada (see below) and about 340 Canadian students have studied at the Universität Mannheim since the program started. The program is designed for students as well as faculty members.

Language students who want to participate in the exchange program should have at least third year standing (i.e. "Vordiplom" or "Zwischenprüfung" + two semesters) and are expected to have a good to excellent academic record. Students of Mathematics and Computer Sciences should have second year standing and achieve a reasonable result in the TOEFL Test. Applicants are screened and selected by their departments, the "Akademisches Auslandsamt" and the International Office respectively.

Two of the up to 25 Canadian students can apply for a DAAD grant and another student receives his accommodation financed by a foundation. All credits acquired are accepted by the home university. Up to ten German students enjoy a tuition waiver. In addition, language students may receive a grant (CDN \$ 2000) and may prolong their stay for another year to do a M.A. degree. The Department of Germanic and Slavic Languages offers a teaching assistantship (CDN \$ 2500) to graduate language students.

The exchange lasts one year and German students usually receive special leave status for that time.

Universität Mannheim
Volkswirtschaftslehre

University of Western Ontario
Dept. of Economics

This exchange program is for faculty members only and was established in 1978. Access is restricted to the Departments of Economics and "Volkswirtschaftslehre" respectively. Participants are expected to give two lectures each semester on their specialised subjects. The exchange is for one year. It is planned to include more departments in the exchange program in near future.

Universität Mannheim
All Departments

University of Winnipeg
Germanic Studies

This exchange program is based on an informal agreement which is to be formalized in the near future. The program allows for up to eight students from either university to stay at the partner institution for one year. Usually three to four take the opportunity to study at Mannheim and Winnipeg respectively. The program is open to all departments in Mannheim, whereas access is limited to students of Germanic studies in Winnipeg.

Applicants are expected to have at least second year standing (i.e. "Vordiplom" or "Zwischenprüfung") and to have a good academic record. German participants have to reach a certain level at the TOEFL Test, Canadian students should have a good knowledge of German, but the PNDSTest is not required. German applicants are selected by the committee of representatives from the "Akademisches Auslandsamt" and their department in Mannheim. Students from Winnipeg are screened and selected by their department.

The program includes a tuition waiver. Travel expenses, accommodation and living expenses are covered by the participants, although German students may apply for a grant for travel expenses from the Land of Baden-Württemberg. Canadian students get a free one-month intensive language course in Heidelberg before starting their studies in Mannheim.

For the time of the exchange, students remain enrolled at their home university. German students usually receive leave status.

Universität Mannheim
Betriebswirtschaftslehre

York University
Administrative Studies

This is a direct exchange program integrated in the framework of the Baden-Württemberg-Ontario exchange agreement. This direct agreement between the Universität Mannheim and the University of York allows for up to eight students from either university to study at the partner university for one year.

Applicants are expected to have a B.A. or the "Vordiplom" respectively and should have third year standing when leaving for Canada. German students should have reached 580 points in the TOEFL Test.

Applicants are screened and selected by a committee of representatives from the "Akademisches Auslandsamt" and the departments in Mannheim and a similar committee in York.

The agreement includes a tuition waiver and German participants may apply for a supportive grant for travel expenses from the Land of Baden-Württemberg.

Students remain enrolled at their home university for the time of the exchange.

Graduate students can do an MBA degree provided that they reach at least 580 points in the TOEFL-Test and 550 points in the GMAT, but as there is no tuition waiver for this part of the exchange program, participants will have to pay about CDN \$ 8000 themselves.

This specified bilateral program between the Universität Mannheim and York University has been extended recently and more universities from other regions joined this particular agreement (e.g. Wales, Catalunya or Regione Lombardia - Multiregional International Business Program/MIBP).

University-to-university agreement, both for students and faculty. In 1994, six students from Marburg studied at the University of Alberta and six students from the University of Alberta studied at Marburg.

Marburg students are selected by a committee of representatives of the "Akademisches Auslandsamt", Marburg scholars and a native speaker of English at Marburg University. Canadian students are selected by a similar committee including representatives of the International Office of the University of Alberta.

Students remain enrolled at their home university and pay their home fees only. Up to three of the German students who take part in the exchange are students of Geography who are paid by the DAAD under its IAS program. IAS students receive up to DM 700 per month and a sum of DM 2000 to cover travel expenses. German students who are entitled to Bafög may receive up to the full Auslands-Bafög.

Philipps-Universität Marburg

All departments

University of Saskatchewan

All departments

University to university agreement for student exchange for up to four students. Currently, the program is prepared to be open to faculty as well. In 1994, two students from each university studied at the partner university. Although the agreement is open to students from all areas of Arts and Sciences, Marburg students primarily take Canadian Studies courses at the University of Saskatchewan and students from the University of Saskatchewan take European Studies courses.

Students are selected by an ad-hoc committee of the home university and remain enrolled at their home university. Travel and accommodation costs are paid by the participants, as are the costs of living as well. Students only pay a small "student-related fee" at the partner university. The exchange lasts one academic year (September to May).

Universität Münster

University of Calgary

University-to-university agreement for students and faculty of all departments. Established in the 1985, this exchange program has been out of operation for the past few years. For 1996 it is planned to revive this exchange. In 1996, one student from Münster will study in Calgary and one student from Calgary will come to Münster.

Participants are selected in Münster by the "Akademisches Auslandsamt" and in Calgary by the coordinator at the International Students Center.

The program has a tuition waiver and students are helped with finding accommodation in a student residence. Participants have to pay for accommodation and health insurance fees (in Germany: about DM 450 for six months).

Credits achieved at the partner university are generally accepted by the home university.

Canadian students have to enroll at the university in Münster in order to be accepted in residence. German students remain enrolled at their home university. The exchange lasts one year.

This exchange program is based on an university-to-university agreement and is designed for students as well as faculty members. The program usually offers exchange opportunities for up to four students, but a greater number is possible on mutual consent. There should be parity of the number of exchange students within a time of five years. Last year, five students went to Calgary and four students came from Calgary to Oldenburg.

Applicants are expected to have at least second year standing at the time of application, i.e. five semesters when leaving for Canada. In addition, German students should have at least 580 points at the TOEFL Test and demonstrate their interest and knowledge in an interview. The students are screened and selected by the program administrator in Germany and by a university committee in Calgary.

The program includes a tuition waiver on a one-to-one basis, but German students who are on the BAFÖG-scheme do not receive this tuition waiver as tuition fees are covered by the scheme. Credits acquired at the host institution may be accepted by the home university. The exchange is for one year, and German students can receive leave status if they wish.

University-to-university agreement for the exchange of students and faculty members. Last year, two students from Oldenburg studied at Saskatoon, but due to language problems no Canadian students participated in the exchange. There should be parity in the number of exchange students within a period of five years.

Applicants are expected to have more than second year standing, i.e. five semesters. In addition, German students should have at least 575 points at the TOEFL Test and demonstrate their interest and knowledge in an interview. The students are screened and selected by the program administrator in Germany and the respective counterpart in Saskatoon.

The program includes a tuition waiver on a one-to-one basis. Credits acquired at the host institution may be accepted by the home university.

The exchange is for one year, and German students can receive leave status if they wish.

Universität Osnabrück

All Departments

University of Victoria

All Departments

University-to-university agreement for up to two students from all departments. Students interested in the exchange program are expected to have at least second year standing (in Germany this equals a successful "Vordiplom" or "Zwischenprüfung"). German exchange students are expected to score at least 575 points in the TOEFL Test.

Participants from Osnabrück are screened and selected by a committee of representatives of the departments (Sciences, Law and Humanities) and from the "Akademisches Auslandsamt". Canadian students participating in the exchange program are selected by a similar committee.

There is a tuition waiver and the participants remain enrolled at their home university and pay their usual tuition fees at their home university. University personnel of the host university will assist exchange students in finding suitable accommodation. German students have to purchase medical insurance at the University of Victoria. Students are responsible for residence and other costs.

The participants enroll at the host university as full-time students for one academic year. Academic credits obtained at the host university may be transferred back to the home university.

**Universität - Gesamthochschule
Paderborn** Chemie u. Chemische
Technik/Elektrotechnik/Maschinenbau

University of Waterloo Chemical
Engineering/Chemistry/Mechanical
Engineering/Electrical Engineering

This exchange program is based on a university-to-university agreement for the departments mentioned above. It offers exchange opportunities for up to 10 students from either university each year. Access is limited to students from the Departments of Chemical Engineering, Chemistry, Mechanical Engineering, and Electrical Engineering in Waterloo and to students from the Fachbereiche Chemie, Elektrotechnik and Maschinenbau in Paderborn. Due to language problems, it is mainly students from Paderborn who benefit from this exchange program.

Applicants are expected to have second year standing and a good academic record. In addition, there is an interview by the commission that is responsible for the selection of participants. The commission is composed of the program coordinator, a representative from the department involved and a representative from the "Akademisches Auslandsamt" in Paderborn. In Canada, a similar committee is in charge of the selection of the students for the exchange.

Students from Germany pay a reduced tuition fee (in-state tuition fee). Canadian students receive free tuition in Germany and are helped with finding suitable accommodation. For three German students who want to study Chemical Engineering or Chemistry, there is an IAS scheme, according to which the in-state tuition fee, health insurance and travel expenses are assumed by the DAAD. In addition, they receive a monthly allowance of about DM 700. German students who do not receive support under this scheme may apply for "Auslands-BAFöG".

The exchange is for one year, during which German students usually receive leave status.

Universität Passau

Romanistik/Sprachen, Wirtschafts- und Kulturraumstudien

Université Laval

Accord d'université à université conclu en 1993 et soumis à renégociation en 1996. Ce programme d'échanges est destiné à un nombre non spécifié d'étudiants ou de membres du corps enseignant d'Allemagne et du Canada. L'accès pour les étudiants allemands est limité au Département de «Sprache, Wirtschafts- und Kulturraum-Studien». Les étudiants canadiens peuvent venir de tous les départements.

Les candidats sont sélectionnés par des comités d'université.

Le programme comprend une exemption de droits d'inscription pour cinq étudiants d'Allemagne. En retour, l'université de Passau défraye les coûts de logement d'un ou deux étudiants canadiens qui font leurs études à Passau. L'année dernière, 18 étudiants d'Allemagne sont allés à Laval, cinq d'entre eux ont été exemptés de droits d'inscription. Les 13 autres étudiants n'ont payé que des droits réduits.

L'échange dure un an et les étudiants restent normalement inscrits à l'université de leur pays. Les étudiants allemands reçoivent un statut vacancier.

Universität Potsdam

University of Guelph

This new program is designed for up to three students and as a first step, one student from Potsdam is currently at Guelph. From 1996 on, Canadian students will in turn stay at the Universität Potsdam. The program is open to all departments.

The program has a tuition waiver and participants are selected by a committee of representatives from the university. Neither TOEFL Test nor PND S Test are required.

Exchange students are helped with finding suitable accommodation.

German students do have to purchase medical insurance at Guelph, Canadian students are responsible for their health insurance in Germany.

For the duration of the exchange, the students remain enrolled at their home university.

This exchange program is based on a university-to-university agreement which is to be signed in late 1995. The program is for up to two students (the number may be increased later) and all departments from both universities can participate in the exchange program. The number of exchange participants should reach parity over a couple of years. Faculty members may also take part in the exchange program.

Students interested should have a good to excellent academic record. Applicants are screened and selected by their university.

The program includes a tuition waiver, but Canadian students will have to pay the "Sozialbeitrag" at Rostock (about DM 50 per semester currently). Costs for travel, accommodation and upkeep are assumed by the participants. German participants may apply for grants from the DAAD or may receive "Auslands-BAFöG". The host institution helps incoming students find suitable accommodation in residence (if possible). Credits achieved at the host university are accepted by the home institution.

In general, the exchange is for one academic year, although it also possible to stay a shorter period at the host university. The students usually remain enrolled at their home university, German students may ask for leave status provided that the credits acquired at the host institution are not part of their studies in Germany.

This exchange program is based on personal contacts of members of the faculty of Humanities at Rostock and the College of Arts and Science at Saskatchewan. A university-to-university agreement is to be signed in late 1995. The program is for up to two students (the number may be increased later) and all departments from both universities can participate in the exchange program. The number of exchange participants should reach parity over a couple of years. Faculty members may also take part in the exchange program.

Interested students should have a good to excellent academic record. Applicants are screened and selected by their university.

The program includes a tuition waiver, but Canadian students will have to pay the "Sozialbeitrag" at Rostock (about DM 50 per semester currently). Costs for travel, accommodation and upkeep are assumed by the participants. German participants may apply for grants from the DAAD or may receive "Auslands-BAFöG". The host institution helps incoming students find suitable accommodation in residence (if possible). Credits achieved at the host university are accepted by the home institution.

In general, the exchange is for one academic year, although it also possible to stay a shorter period at the host university. The students usually remain enrolled at their home university. German students may ask for leave status provided that the credits acquired at the host institution are not part of their studies in Germany.

Universität des Saarlandes
Dept. of North-American Literature

University of Alberta
Department of Modern Languages
and Comparative Studies

This exchange program is a university-to-university agreement which covers the exchange of students, especially as teaching assistants. Students are usually expected to have at least B.A. or M.A. qualifications, although undergraduate students are admitted, provided that their qualification is satisfactory. One student / teaching assistant from either institution can stay at the partner university for one academic year. Canadian students may attend a free preparatory course in German at Saarbrücken before working as teaching assistant. There is a tuition waiver and students are paid for their work as teaching assistants, but have to cover any other costs themselves.

Participants are screened and selected by their Departments.

Currently the program is temporarily in question as responsibilities for the program at the university in Canada are being shifted due to internal restructuring.

Universität des Saarlandes

Dept. of Geography

Université Laval

Section géographie

Ce programme d'échange est un programme d'échange IAS organisé en coopération par l'Universität des Saarlandes et l'Universität Marburg. Un maximum de deux étudiants de Saarbrücken (Sarrebuck) peut participer à cet échange.

Les étudiants désirant participer à cet échange doivent poursuivre leurs études au département de géographie et devraient avoir un niveau de seconde année au moins. Les candidats sont choisis et sélectionnés par leurs universités.

Le programme comprend une exemption des droits d'inscription et une somme uniforme de DM 2000 pour les frais de voyage. Il y a en outre une allocation mensuelle d'environ DM 600 à 700. La somme est versée en Allemagne. L'échange dure un an et les étudiants restent généralement inscrits à l'université de leur pays pendant cette durée.

Universität des Saarlandes

Tous les départements

Université Laval

Tous les départements

Ce programme d'échanges est basé sur un accord d'université à université. Il est destiné aux étudiants et au corps enseignant et comprend toutes les disciplines. Un maximum de trois étudiants de chaque université peut y prendre part.

Les étudiants allemands doivent avoir passé leur «Vordiplom» ou «Zwischenprüfung» avec succès. De même, les étudiants canadiens doivent avoir un niveau de deuxième année. Les étudiants allemands sont choisis et sélectionnés par un comité de représentants de leur département et du «Akademisches Auslandsamt». Les étudiants canadiens sont sélectionnés par leur université. Des tests de langue ne sont pas requis mais les étudiants allemands s'intéressant au programme sont supposés écrire leur demande en langue française.

Le programme comprend une exemption de droits d'inscription et les étudiants sont aidés à trouver un logement approprié. Les étudiants allemands peuvent faire une demande de bourse au DAAD. Etant donné que l'Organisation mondiale des universités francophones (Association des universités pour l'enseignement en langue française / AUPELF) veut bien donner un appui financier aux programmes d'échanges, il est prévu à l'avenir d'amplifier le programme d'échanges et d'introduire de nouvelles possibilités de bourses.

Les étudiants restent inscrits à l'université de leur pays mais les étudiants allemands reçoivent un statut vacancier.

Universität des Saarlandes

Dept. of Geography

Simon Fraser University

All departments, Geography

This program has been recently changed into a trilateral program, transferring the main program elements to Cologne. The IAS program includes now SFU, Cologne and Saarbrücken. Thus, students from Saarbrücken have the opportunity to participate in the program, provided that they achieved outstanding marks in their studies.

This exchange program runs under the DAAD - IAS scheme and is designed for up to four German students, of whom one may come from Saarbrücken. Just as in Cologne, access is restricted to students of the Geography Department whereas the Canadian students can come from all departments. The Canadian students can either go to Saarbrücken or to Cologne. The exchange program is for students only.

Requirements are, apart from an above average result in the "Vordiplom" or "Zwischenprüfung", also a score of at least 600 points at the TOEFL Test and an interview in English, in which the students are expected to prove they have sufficient knowledge about Canada (history, geography and politics).

The German participants are selected by a committee of one representative of the "Akademisches Auslandsamt", one lecturer from a separate department and the lecturer who manages the program.

The Canadian participants are selected by a similar committee at the SFU.

For German students, the program covers the tuition fees (reduced to domestic level) at the partner university, a flat rate for travel expenses, health insurance and a monthly allowance ("Teilstipendium") for living costs (about DM 800 currently). German students have to pay for the admission fees to the TOEFL Test and for their visa.

For students from Vancouver, there is a supportive grant, which covers part of the living costs either in Cologne or Saarbrücken. The program is financed by the universities involved and the DAAD.

There were three students only from Cologne in Vancouver last year and one Canadian in Cologne under this program. But this year, there are four German students at the Simon Fraser University including one student from Saarbrücken and one Canadian student is studying in Cologne this year.

For the time of the exchange (two trimesters/ one semester), students remain enrolled at their home university but receive leave status.

Students are recommended to apply for the exchange soon after the "Vordiplom" or "Zwischenprüfung".

All disciplines

University-to-university agreement which was first established in 1982 and has been renewed in 1992. The exchange program is designed for up to two students or faculty members. Last year, two students from either university participated in the program. Applicants are expected to have second year standing ("Vordiplom" or "Zwischenprüfung"). German students should also submit a short description of their aims at the partner university in English and achieve a certain score in the TOEFL Test. Participants are selected by the "Akademisches Auslandsamt" in Siegen and the Student Exchange Programs Coordinator at Dalhousie. The program covers a tuition waiver and Canadian students may either apply for a "DAAD-Kontaktstipendium" which includes a financial grant of DM 900 per month or they may receive a supportive grant from the "Ministerium für Wissenschaft und Forschung des Landes Nordrhein- Westfalen", the provincial ministry for science and research. Canadian students may also take part in special cultural and recreational events for exchange students. The exchange lasts one academic year and students remain enrolled at their home university. German students receive special leave status.

The Universität Stuttgart takes part in the Baden-Württemberg-Ontario exchange program which organizes the cooperation of nine universities in Baden-Württemberg and 18 universities in the province of Ontario. The overall organization is with Queen's University and with the Universität Konstanz. Within this province to province agreement, up to five students from either university can participate each year. The exchange program is designed for students and faculty.

Applicants should have second year standing (i.e. "Vordiplom" or "Zwischenprüfung") when leaving for Canada and are expected to have a good or excellent academic record and to have scored at least 550 points at the TOEFL Test. The German participants are selected by a committee of representatives of the Universität Stuttgart. Canadian students are selected by a similar committee. Both shortlists are then submitted to the central organizing bodies in Konstanz and Kingston which decide on the final list of participants. The participants receive the status of "visiting students" or "non-degree students", which excludes them from obtaining a degree at the host university. Credits (i.e. "Scheine") acquired at the host institution may be accepted by the home university.

The program includes a preparatory course at the Canadian university for German students and a free intensive language course in German for Canadian students in Heidelberg. In addition, the program covers a tuition waiver. Students assume transportation costs and living expenses, although German students can receive an allowance from the Land Baden-Württemberg towards their travel expenses.

The exchange program usually lasts one year and students in general remain enrolled at their home university. German students receive leave status for the time of the exchange.

There is an additional unilateral exchange program for students working on their final thesis ("Diplomarbeit" or "Examensarbeiten") or postgraduate students working on their Ph.D. (Dissertation). Within this scheme students can stay at a partner university in Ontario in order to do research in Ontario or at departments at universities in Ontario. The Land Baden-Württemberg financially supports these stays, which may last up to six months with a "Teilstipendium" which usually includes a flat rate for travel expenses and a monthly allowance.

Universität Stuttgart

Bauingenieur/Vermessungswesen

University of Calgary

Faculty of Civil Engineering

This exchange program is an IAS program and is designed for up to five students from the Department "Bauingenieurwesen". Last year, five students from the Universität Stuttgart went to Calgary. As this, like most IAS programs, is a unilateral program, no Canadian students came to Stuttgart.

Applicants are screened by a committee of representatives from the department "Bauingenieurwesen" and the "Akademisches Auslandsamt".

The IAS exchange scheme is a "Teilstipendium" which includes a tuition waiver, a flat rate of DM 2000 for travel expenses and a monthly allowance of DM 600.

The exchange usually lasts one year, during the time of which students remain enrolled at their home university with leave status.

Universität Stuttgart

Fachbereich Konstruktions- und Fertigungstechnik (Institut B für Mechanik)

Queen's University

Department of Mechanical Engineering

This exchange agreement between Queen's University and the Universität Stuttgart, which both participate in the Baden-Württemberg-Ontario exchange program, is based on a partnership between the two departments involved. Consequently, access is limited to students of the departments concerned. According to the agreement between these two departments, up to three students of either department can study at the partner university each year, although up till now, Canadian students have hesitated to take the opportunity to study at Stuttgart because of language difficulties.

Applicants are screened and selected by their departments.

The exchange program covers a tuition waiver and lasts one year. German students remain enrolled at their home university and usually receive leave status.

Universität Stuttgart

University of Toronto

The Universität Stuttgart takes part in the Baden-Württemberg-Ontario exchange program, as described above. But apart from the overall framework of this province to province program, within this program there is also a direct exchange program between the "Fachbereich Ingenieurwissenschaften" of the Universität Stuttgart and the Faculty of Applied Science and Engineering of the University of Toronto. The exchange program between the two departments is for up to three students.

The German participants are selected by a committee of representatives from the university. Canadian students are selected by a similar committee. The participants receive the status of "visiting students" or "non-degree students", which excludes them from obtaining a degree at the host university.

The program includes a preparatory course at the host university and a tuition waiver. Students assume transportation costs and living expenses, although German students can receive an allowance from the Land Baden-Württemberg towards their travel expenses.

The exchange program lasts one year and students in general remain enrolled at their home university. German students usually receive leave status.

This exchange program also covers an exchange for faculty members, although the details have to be arranged individually.

This exchange program is an IAS program for up to three students of the "Fachbereich Bauingenieurwesen", which operates independently from the Baden-Württemberg-Ontario exchange program. In contrast to most IAS schemes, this scheme also provides the opportunity for three Canadian students to study at the University of Stuttgart.

Applicants are screened and selected by a committee of representatives of the "Lehrstuhl für Hydraulik und Grundwasser" and the "Akademisches Auslandsamt". In Canada, students are selected by their department.

The IAS exchange scheme is a "Teilstipendium" which includes a tuition waiver, a flat rate of DM 2000 for travel expenses and a monthly allowance of DM 600 for German participants. Canadian students can participate in an Intensive Language Course in German and are offered a work term with a suitable company.

The exchange usually lasts one year, during the time of which students remain enrolled at their home university. German students usually receive leave status.

The University of Stuttgart-Hohenheim takes part in the Baden-Württemberg-Ontario exchange program which organizes cooperation between nine universities in Baden-Württemberg and 18 universities in the province of Ontario. The overall organization is in the hands of Queen's University and the Universität Konstanz. The exchange program is designed for students and faculty. Within this program there is also a direct exchange program between the Universität Stuttgart-Hohenheim and the University of Guelph. The number of participants is not limited, but it is the general aim to get as close as possible to a one-to-one exchange relation. Apart from this one-to-one exchange with Guelph, there were four students from Hohenheim in Toronto (mainly at Guelph) and five students from Ontario in Hohenheim last year. This year, eight students from Stuttgart-Hohenheim are taking part in the exchange program (six of whom are at Guelph) and only one Canadian student attends courses at Hohenheim.

Applicants are expected to have a good or excellent academic record and to have scored at least 550 points at the TOEFL Test. The German participants are selected by a committee of representatives of the university of Stuttgart-Hohenheim. Canadian students are selected by a similar committee. The participants receive the status of "visiting students" or "non-degree students", which excludes them from obtaining a degree at the host university.

The program includes a preparatory course at the Canadian host university and Heidelberg respectively, and a tuition waiver. Students assume transportation costs and living expenses, although German students can receive an allowance from the Land Baden-Württemberg towards their travel expenses.

The exchange program usually lasts one year and students in general remain enrolled at their home university.

Universität Trier
Faculty of Arts

University of Manitoba
All departments

University-to-university agreement for up to two students from each university. Students from Trier have to study subjects that the Faculty of Arts in Manitoba offers, as e.g. languages, history etc. Canadian exchange students may come from all departments.

As there is no fixed limit to the number of participants, more students can participate, although these additional students will have to pay tuition fees. German students may receive "Auslands-BAFöG", which covers tuition fees up to DM 9000 for students in the "Hauptstudium".

Students from Trier are selected by a committee of representatives from the International Office ("Beirat für Internationale Angelegenheiten"), from the departments at their university and the representative of the president of the University of Trier who is in charge of the exchange program. Canadian students are selected by the coordinator of the program in Winnipeg.

The exchange program covers a tuition waiver. Participants have to cover the costs of their upkeep and travel expenses. The exchange lasts one academic year and there is the opportunity to attend a summer school. Students remain enrolled at their home university.

The Universität Ulm takes part in the Baden-Württemberg-Ontario exchange program which organizes cooperation between nine universities in Baden-Württemberg and 18 universities in the province of Ontario. The overall organization is in the hands of Queen's University and the Universität Konstanz. Within this province-to-province agreement, up to five students from each university can participate each year. The exchange program is designed for students and faculty.

Applicants should have second year standing (i.e. "Vordiplom" or "Zwischenprüfung") on leaving Germany and are expected to have a good or excellent academic record and to have scored at least 550 points at the TOEFL Test. The German participants are selected by a committee of representatives of the Universität Ulm. Canadian students are selected by a similar committee. Both shortlists are then submitted to the central organizing bodies in Konstanz and Kingston which decide on the final list of participants. The participants receive the status of "visiting students" or "non-degree students", which excludes them from obtaining a degree at the host university. Credits (i.e. "Scheine") acquired at the host institution may be accepted by the home university.

The program includes a preparatory course at the Canadian host university and Heidelberg respectively. In addition, there is a tuition waiver. Students assume travel expenses and living expenses, although German students can receive an allowance from the Land Baden-Württemberg for their travel expenses.

The exchange program lasts one year usually and students in general remain enrolled at their home university. German students receive leave status for the time of the exchange.

University-to-university agreement for students and faculty, especially of the Department of Mathematics. The number of participants is subject to negotiation, but the exchange mainly focuses on the exchange of faculty members. Students participating are usually treated as "special students" (which is a sort of part-time student status).

Precondition for participation is a successful TOEFL Test result. The students are screened and selected by a committee of representatives from the department (mainly Mathematics) and from the "Akademisches Auslandsamt". German students can apply for financial support for up to 50% of the travel expenses.

Credits obtained at the partner university are usually accepted by the home university, provided that the exchange students discussed their choice of courses with lecturers from their home university in advance.

The exchange lasts one academic year.

N.B. The Universität Ulm also participates in the Ontario-Baden-Württemberg exchange program. Within the framework of this province-to-province exchange program, about four students from Ulm go to universities in Ontario, e.g. the University of Western Ontario.

EXCHANGE PROGRAMS BETWEEN GERMAN FACHHOCHSCHULEN AND CANADIAN UNIVERSITIES AND COLLEGES

ACCORDS D'ÉCHANGES D'ÉCOLE TECHNIQUE À UNIVERSITÉ

Fachhochschule Bielefeld
Fachbereich Wirtschaft

University of Manitoba
Faculty of Management

This exchange program is based on an agreement between the University of Manitoba and the Fachhochschule Bielefeld. The program allows for up to six students from either university, but access is limited to students who study business and management. Last year, five German students went to Manitoba and one student came to the Fachhochschule in Bielefeld.

Students are expected to have second year standing and to have a good academic record. Applicants in Bielefeld are screened and selected by a committee of representatives from the department and the "Akademisches Auslandsamt". In Canada, a similar committee is responsible for the selection of the Canadian participants.

The program includes a tuition waiver and the six students from Germany enjoy the benefits of an IAS program, according to which they receive a flat rate for travel expenses (about DM 2000) and a monthly allowance of about DM 700.

The exchange lasts one semester and students stay enrolled at their home university. German students may receive leave status.

Fachhochschule Ostfriesland in Emden

Fachbereiche Naturwissenschaftliche Technik und Chemieingenieurwesen und Biotechnologie

University of Calgary
Department of Chemical Engineering

This exchange program dates back to 1979. Originating from personal contacts, it is now formalized and designed for up to two students or faculty members from either university to stay at the partner university.

Applicants are screened and selected by a committee of representatives from the "Akademisches Auslandsamt" and their department in Emden. In Canada, the department concerned is responsible for the selection of students.

The program includes a tuition waiver and, as it is connected with the IAESTE program, there is the opportunity to do a work term in the host country. These work terms are acknowledged by the home institution and may be the basis for the participants final exams. Students remain enrolled for the time of the exchange, which is six months.

Fachhochschule Frankfurt a. M.
Institut für Stadt- und Regionalplanung

Ryerson Polytechnic University
Departments of Architecture and
Urban and Regional Planning

This exchange program is based on a university-to-university agreement and is restricted to the departments mentioned. Up to five students and up to two faculty members of either university can participate in the exchange each year.

Applicants are screened and selected by their departments.

The program includes a tuition waiver, thus students pay tuition fees only at their home university.

The exchange is for one year, during which the students remain enrolled at their home university, but German students may receive leave status.

It is planned to extend this program and allow other departments (e.g. Business and Engineering) to participate in the exchange. In addition, it is to apply for recognition as an IAS-program in the near future which would include a DAAD grant for German students.

Fachhochschule Pforzheim
Hochschule für Gestaltung, Technik
und Wirtschaft

**Nova Scotia College of Art and
Design**

This exchange program is based on a university-to-university agreement and allows for up to 15 students a year from each institution.

Applicants are screened and selected by a committee of representatives from the university. German students enjoy the benefits of an IAS program that is linked to this exchange scheme. Thus, they receive a monthly allowance of about DM 800 and a flat rate for travel expenses (currently about DM 2000). Neither German nor Canadian students have to pay any tuition fees at the host college (tuition waiver).

The exchange usually lasts for six months, but it is also possible to stay a full year. Students usually do not remain enrolled at their home university for the time of the exchange, but German students can receive leave status should they wish.

Nova Scotia College of Art and
Design

This exchange program is based on a university-to-university agreement and allows for dual
residence a year from each institution.

Applicants are considered on a first-come, first-served basis from the university.
German students enjoy the benefits of an 180 program that is listed in the exchange
software. They receive a monthly allowance of about DM 800 and a flat rate for travel
expenses (usually about DM 1000) for the duration of the exchange. Students have to pay
any tuition fees at the host college (study-related).

The exchange usually last for six months, but it is also possible to stay a full year. Students
usually do not remain enrolled at their home university for the time of the exchange. For
German students our representative should they wish.
