A Special Warehouse District

The Globe, Oct. 22: The World proposes with a light heart to devote upper Spadina-avenue and Spadina-road to wholesale warehouses, with an underground freight connection. It is a grand idea. How do the people of that fine residential district like it? As The World says, think what a noble use Spadina-avenue would be put to if it had all the wholesale warehouses on one side of it. There is no doubt that Spadina below College will soon be devoted to manufacturing and wholesale business, but we rather fancy The World will have a heap of fun in promoting a scheme to extend the railway and the warehouses "if required" up north to the C.P.R. tracks.

There is no finer residential district in Canada than the section of Toronto in the vicinity of upper Spadina-avenue and Spadina-road. The proximity of the large open spaces of Queen's Park and the University should make it for all time an extremely valuable area for residence purposes. There are miles and miles of suitable frontage for warehouses south of College-street, with a very poor class of residences and stores upon the land. The World's suggestion of an underground railway freight system such as that of Chicago, connecting the warehouses with the railway and the railway will not be received with enthusiasm by the residents north of College-street.

The above from The Globe of yesterday is, when you read it between the lines, an endorsement of The World's proposition. The World does not quite suggest that warehouses and factories go all the way up to the C.P.R. tracks; but an underground railway could certainly go under Spadina-road up to the northern tracks, connecting with the warehouses on Spadina-avenue south of College-street, without the slightest inconvenience to that fine residential section north of Knox College, of which The Globe professes to be the champion, and probably in which district somebody connected with The Globe happens to have his own special roosting place.

We would also ask The Globe to go and look at our other proposition for a wholesale district, namely, Wilton-avenue, from the Don westerly. Wilton-avenue could have an underground railway connected with the Don lines with no trouble, and the very moment that the underground railway started, at that very moment the warehouses would begin to be erected, and would continue on westerly as far as required. There would not be a lost foot of railway construction. The whole thing turns on getting an underground railway started from the foot of Spadina-avenue northerly into the warehouses and factories, and getting one started from the Don westerly under Wilton-avenue. Probably the owners of the warehouses and factories who would locate on these streets would pay for the underground extensions.

We think this is one of the best ideas that have been proposed in Toronto for some time, even tho it comes from The World.

In the meantime, The World wishes to say to any big firm that is looking for a warehouse or factory site and superior railway facilities to any now enjoyed, to go down and look at Wilton-avenue as above set out, and also set out in our article of Tuesday last.

FOUR DAYS' CELEBRATION WHEN THE DUKE COMES

Civil and Military Authorities to Plan Extensive Program—Half-Holiday Will Be Declared.

Ald. Maguire, chairman of the civic legislation and reception committee, will meet Gen. Cotton, commander of the Toronto military district, in order to draw up a program for the reception of the Duke of Connaught.

It was so decided at a meeting of the committee held yesterday. His royal highness will be here for four days, Nov. 27, 28, 29 and 30. It will be his first official visit to Toronto as governor-general.

Ald. Maguire and Gen. Cotton will take up the matter together and decide on the manner of the reception, the decorations and the amount that should be expended, and they will submit the report to the committee for ratification.

A meeting of the business men of Toronto will probably be called in order to arrange for the decoration of the business houses and stores of the city.

The duke and duchess may change their plans so that they will arrive here about 6 o'clock in the evening, instead of in the morning, so that more people may be free to welcome them. They will probably proceed directly to the city hall, where they will be officially welcomed and given the freedom of the city by the mayor. On the next day a military review will probably be held in Riverside Park when the duke will review the soldiers. A half holiday will probably be declared on that day. The rest of the four days will probably be spent in social events, etc.

MORE ABOUT MORE HOTELS.

"It's all very well," said a New Yorker to The World, "to speak about Toronto having enough hotels, but I wish to say that I come to Toronto at least once a month on important business, and half the time I can't get a room or the accommodation that I require, and time after time I have had to go on what is called the 'waiting list.' You not only need one new hotel, but you want two new hotels, one of them up-town."

The World has received a suggestion from a correspondent that the new big hotel should be in the vicinity of Yonge and Bloor-streets. The writer puts forward the idea that the principal railroad station will eventually be in North Toronto, and therefore this should be the place for the city's new and most up-to-date hostelry.

SERVED VIRTUAL ULTIMATUM ON MANCHUS

Chinese National Assembly Adds to Seriousness of Situation by Impeaching Minister of Posts and Communications—Rumors of Mutinies, Retreats, Desertions.

PEKIN, Oct. 25.—Further defections to the rebels, including Nanchang, capital of the Province of Kiangsi, and Kwelin, capital of Kwangsi, have served to increase the tension here over the revolution. To add to the seriousness of the situation, the Tsachengyan, China's first national assembly, today gave to the Manchus what the legations consider an ultimatum. The assembly impeached Sheng-Hsiuan-Hual, president of the ministry of posts and communications, and demanded his dismissal with severe punishment.

A reply is required from the government by to-morrow, failing which the assembly will dissolve and the members return to their respective provinces. From the temper shown, it is believed that the assembly will carry out the threat. The only course open to the government is either to sacrifice a man who is considered by the foreigners the strongest member of the cabinet, or retaining him, declare war on the assembly, as well as on the vast majority of Chinese.

Advocate of Anti-Provincial Policy.

The charges against Sheng-Hsiuan-Hual are those formulated by the people of Szechuen, Hupah and Hunan. Sheng negotiated the loans for the nationalization of the railways, and has been a leading advocate of the anti-provincial policy, which is regarded as largely responsible for the revolution. The inhabitants of these provinces have shown strong opposition to the proposed railway construction. At the meeting of the assembly to-day the members urged that they were not against foreign loans, but against the methods employed and the results, which were tantamount to robbing the pockets of Chinese, who had already borne the railways, and selling them out to foreigners.

When the assembly rose to vote, even the front row Manchu princes, evidently intimidated by the radicals, stood up, demanding the noted mandarin's degradation.

Gen. Yin-Tehang's silence has given rise to innumerable speculations. The war minister in the field seems to consider it unnecessary to communicate anything but his needs to the presidents of the other government boards. Only the palace seems to know his intentions.

Army Seriously Disorganized.

The imperialist commander has not been followed by any foreigners, even the foreign controllers of the railway having withdrawn, whether voluntarily or by request. Therefore it is impossible to ascertain whether or not the reports regarding the imperial army are true. Some of the reports are to the effect that the army, upon which the dynasty's hope depends, is seriously disorganized. The troops have been pushed forward without having been safeguarded in any manner, which would already have meant disaster had the enemy been more capable.

The trains go down to the south laden with soldiers and equipment, but they do not return. The troops set forth without sufficient ammunition; then quantities of ammunition follow, but no commissariat supplies. There are rumors of mutinies, retreats, and desertions.

It is now said that the engine drivers who previously were reported as having been shot for refusing to take the trains forward, were really shot because they proceeded, the soldiers not desiring to meet the enemy. The foreign engineer, Bouillard, with his staff, will go south to-morrow and endeavor to reorganize the railway traffic for Yin-Tehang.

Forces Face Each Other.

Nevertheless, in spite of disorganization, inability and disaffection, the army evidently has moved steadily forward. A wireless report from Hankow to-night indicates that the imperialist and revolutionary forces are already closely in touch.

The government authorities have succeeded in arresting a large number of students who attempted a manifestation favoring rebellion in Tientsin.

MYSTERY SURROUNDS DEATH

How Richard Bray Received Injuries Not Yet Disclosed.

Coroner Lynd last night opened an enquiry into the death of Richard Bray of Beeton, Ont., who was found by W. Hind, conductor on the T. H. & B. express, on the C.P.R. tracks in an unconscious condition with his neck broken last Thursday. He was taken to the hospital, where he died during the night.

Two witnesses were examined, but no evidence bearing on the manner of death was brought to light. It is supposed that Bray had boarded a train for Beeton, in company with two friends, who are at present in that town. They missed him soon after leaving Toronto.

The inquest was adjourned until Tuesday, Oct. 31, so that their evidence might be secured.

TO AID ST. ALBAN'S.

A public meeting in the interest of the building fund of St. Alban's Cathedral will be held to-night at 8.15, in All Saints' Church Schoolhouse, corner of Sherbourne-street and Wilton-crescent. Mayor Geary will be chairman, and the speakers will be Bishop Sweeney, N. F. Davidson, K.C., and L. H. Baldwin.

Has China Placed Loan?

WASHINGTON, Oct. 25.—The Chinese Government has withdrawn its request of the United States for permission to postpone payment of the current installment of the Boxer indemnity. This action is interpreted as indicating China's success in obtaining a large loan from some secret source, or its effecting of an arrangement with the revolutionists for the restoration of the throne.

The views of officials here is that the securing of a loan from a secret source would be a matter of deep concern to all the powers interested in China, unless it should be clearly developed that the nation which has advanced the money is not to receive as a recognition of such action some part of Chinese territory or some special privileges which will work to the detriment of other nations.

WANT COLONIAL CONSULS.

MONTREAL, Oct. 25.—At to-day's meeting of the Chamber of Commerce a report was submitted and approved to the effect that the Canadian Government should make representation to the imperial government so as to gain consent to the recognition of the right of colonial governments to appoint consuls abroad, or so to enlarge their own consular system as to admit colonial representatives, who should be empowered to watch exclusively over colonial interests.

NO OPPOSITION

By Liberals to Newly-Appointed Ministers From Quebec.

MONTREAL, Oct. 25.—Friday will be nomination day for the by-elections necessitated by the cabinet appointments. To-day it was stated by Liberal leaders in Montreal that there will be no opposition offered to any of the newly appointed ministers in this province. There has been some agitation along these lines of late, especially with regard to Hon. Mr. Monk in Jacques Cartier, and Hon. Bruno Nantel in Terrebonne, but a caucus of the party leaders was held this afternoon, at which it was decided that nothing was to be gained by further opposition just now.

There has, however, been discussion going on regarding protests by both sides. As matters now stand it was stated to-day that only three protests were being considered, in Montclair, Bagot and Three Rivers. Whether these protests will be forced is not yet decided, but it is thought not unlikely that the close election of Hon. Jacques Bureau in Three Rivers will be contested.

Waterloo Bylaw Carries.

BERLIN, Ont., Oct. 25.—Waterloo Town to-day carried a \$4000 bylaw to grant aid to the Berlin and Waterloo Hospital Trust. Berlin passed a \$15,000 bylaw, the county granted \$5000, and they will now build a new wing to the General Hospital.

MAGEE ADMITS ILL-TREATING HIS WIFE

Constable Uren Declares McRae Cried Out: "You Damned Protestant Hound," and Aimed at Magee—Constable Admits His Presence Was Irregular.

CORNWALL, Oct. 25.—(Special).—The McRae murder case occupied the sittings before Justice Sutherland all day to-day and will last until some time on Saturday. About an hour of the morning session was taken up with the selection of the jurors.

The first witness called was Dr. Magee of Carp, who made two expeditions to Gengarry, to recover possession of, or, as the defence claims, kidnap Dr. Magee's child, with which the mother fled to her father's home at Bridge End, Gengarry after several disagreements with her husband. He told of the two attempts to recover his child, his quarrels with his wife and finally, under cross-examination, admitted having used her in a manner unbecoming a gentleman. He had seized her by the hair on one occasion, on another he had shoved her and she fell down. Letters were produced to show that he had written to her as a "Papist bitch."

D. C. McRae, called by the crown, told briefly of the visit of Dr. Magee and his friends on July 4, and their search of the house.

Contradicted Magee.

When it came down to cross-examination there was another squabble between Messrs. Pringle and Blackstock as to the admission of certain evidence in contradiction of Dr. Magee. Part of this was ruled out, but McRae was permitted to contradict Dr. Magee most emphatically on the point of interfering between the doctor and his wife. He had never said that unless she had liberty of conscience, he would have to take her home. Mrs. Magee could no longer stand the treatment meted out to her by her lord and master and took advantage of her husband's absence to leave home with her child for the last time.

Because he was hearing the hiding place of Mrs. Magee and her child, D. C. McRae secured an old gun and threatened to shoot Dr. Magee. The doctor turned and made a detour to the roadway, joining the others, who had been compelled to move up 100 yards or so to save their lives.

Would Blow Their Heads Off.

After a brief confab and seeing another woman with a child at McRae's door, the party started back about, when they were confronted by the hired man, an Englishman named Rosser, who had picked up the shotgun and, dropping one knee, threatened to "blow their bloody heads off."

Under re-examination by Mr. Blackstock, McRae said that he was not willing that Dr. Magee should get possession of the child unless the doctor produced authority. He wished Dr. Magee to believe that the old useless gun was a good one, and would be used unless the doctor left the premises. He had his hand on the ax which was on the road and had told Farquhar to cut the tire of the motor unless the party moved away.

He did not know he got the rifle for Farquhar, nor where Rosser got his gun. He heard the report of a rifle shot but could not swear that it was fired by Farquhar. He did not suspect that anyone was injured by the shot. Next morning he heard for the first time, while at church, that a man had been shot and killed. He knew that Farquhar was a good shot, but could not say he was a crack shot.

In reply to his lordship, McRae said that he was between where the shot was fired and the motor.

Constable Denies Having Revolver. John Uren, the Bainville constable, denied having a revolver and said that what had been mistaken for a revolver was a pair of hand-cuffs. Up to the time the party left the house to search the orchard, witness had not seen anything of F. D. McRae.

When the party got into the motor Dr. Magee, James Magee, Shaw and the witness were looking backwards. F. D. McRae came down the road to the rest of the McRae party, where, after speaking to them, he cried out, "You damned Protestant hound." He then dropped on his knees and seemed to be aiming at Dr. Magee.

When arrested by the witness next morning McRae had said that if anyone had been shot they had shot themselves.

Under cross-examination Uren admitted. Continued on Page 7, Column 2.

HAMILTON HAPPENINGS

RAILWAY NOT BLAMED FOR MAN KILLED ON TRACK

Inquest Threw No Light on Man in Wilson Abraham Lee Met His Death.

HAMILTON, Oct. 25.—(Special.)—Coroner Anderson's jury to-day found that Abraham Lee, whose lifeless body was found on the A.C. & C. tracks last Friday night, was accidentally killed on the railway, and that no one was to blame in the matter. The jury could not determine the cause nor manner of the man's death.

A shanty occupied by Italians near the graveyard in the west end of the city was burned to the ground late this afternoon. The damage was about \$100. The fireman entered in the afternoon were called by 48 Dundas-street, and about 7 o'clock to the corner of Wilson and Chestnut-streets. A small blaze at either place was quickly extinguished.

Roy Stuart, West King-street, was arrested by Constables Breakley and Moore on a charge of non-support preferred by his wife.

Angry Dear Goes Citizen.

An angry deer, which had escaped from its quarters in the local zoo at Dundas Park, attacked James Beavis, 12 Lechmere-street, as he was on his way to work about 7 o'clock this morning, and before the animal could be driven off Beavis was painfully gored. The deer was killed with an ax, after having been thrown to the ground by James Vollick, 241 North Lock-street, who was also on his way to work when the escaped deer charged Beavis. Beavis received two painful gashes about the thighs, and suffered a broken wrist as the result of his encounter with the infuriated beast. He was removed to his home in the police ambulance. His condition is not considered very serious.

City Engineer McCallum and Consulting Engineer Chipman, in their report on the present and future needs of Hamilton's waterworks system, estimate that \$85,000 is needed for immediate improvements, including a new intake and crib at high level station, additions to the beach station, a conduit, force main and sub-mains. The report on the present and future needs of the sum mentioned, less \$3000 already voted, be submitted to the ratepayers to provide for the suggested improvements.

The board of control has passed the report on the city council, by whom it will be dealt with next Monday night. No definite action is expected on the report, however, until it has been discussed by the members of the council at an informal meeting to be called later for that purpose.

Visit of the Duke: Dec. 1 is the date set for the visit of the Duke and Duchess of Connaught to Hamilton, according to a telegram received this morning by Mayor Lees from Col. Lowther, the governor-general's secretary.

Summons for violation of the city's health regulations were issued this morning against the occupants of 90 North Hughson-street, and 117 Yonge-street. It is alleged that houses are in a filthy condition, and that the tenants ignored the board of health's notice to vacate the premises.

The first concern in Canada to manufacture gas mantles, it is said, is the Hamilton Gas Mantle Co., which has just been incorporated here by local capitalists and which will start operations in this city within the next week. A chemical self-lighting mantle, which will practically eliminate the danger of asphyxiation from the gas, on which it is used, is to be the company's leading product. The factory will be located on North Wentworth-street.

Player-Piano Bargains: This opportunity will only come to the one who acts promptly. The old firm of Heintzman & Co., Ltd., 123-125-127 Yonge-street, have in their warehouses a large number of player-pianos about as good as new that they are prepared to offer at a generous reduction from the manufacturers' prices, and on easy terms of payment. It will be worth while writing the house or calling and seeing them personally.

Technical School League. In the Technical High School Inter-Form Rugby League yesterday, the Sophomores won a close and exciting game from the Freshmen by the score of 11 to 6. Freshies made two brilliant runs and gained a touch-down. Aiso the Freshies had only one senior man on their line-up. The Sophomores five, yet they played better as a team. The back division of the winners, composed of James, Lane, Kellogg and Watson, worked well together, Jameson twice running half the length of the field for a touch-down. The line-up of the winners: Full, Watson; halves, Jameson, Lane, Kellogg; quarter, Keely; scrumming, Eldon, Gray, Alexander; inside, Webb; middle, Blythe, McCormick; outside, MacDonald, Budd. Seaford Junior Hockey Club. SEAFORTH, Oct. 25.—At the annual meeting to-night of the Seaford Junior Hockey Club the following officers were elected for the coming season: Hon. president, Frank Kline; hon. vice-president, J. P. Bell; president, James E. Willis; vice-president, W. McDougall; secretary, H. Smith; treasurer, Mr. Watts; managing committee, A. Broadfoot, Frank Sills, James F. Reid, Wat. Smith.

ONTARIO IMMIGRATION.

Hon. Frank Cochrane having helped to dispose of the Laurier government and gone to Ottawa, it seems safe to assume that in his absence, the point of attack being his alleged neglect to fill Northern Ontario full of the settlers which the railways and the Dominion Government carried out west.

BRITISH CABINET SHUFFLE.

Interest in the British cabinet shuffle chiefly attaches to the exchange of office between Mr. McKenna and Mr. Winston Churchill. In some quarters this is assumed to presage a reduction in naval expenditure, to the latter being attributed support of a policy of retrenchment. This, however, is scarcely warranted in the circumstances except to the extent recently indicated by Mr. McKenna, who held out hopes of a reduction next year if present international naval conditions were not further disturbed.

AUSTRALIAN LAND SETTLEMENT.

One reason, not without weight, for expediting the colonization of Northern Ontario is the growing activity of the Australian states in the promotion of immigration. They want, too, the same class of settlers that Ontario requires, and they are all engaged in formulating plans embodying features that cannot but prove attractive to British agriculturists. Canadian governments ought not to be too sure that they can afford to ignore the competition of Australia and New Zealand in the British immigration movement. Canada has the advantage in distance from the motherland, but against that there is the disadvantage of a long and rigorous winter. Nor can the immense increase in the Australian and New Zealand shipments of agricultural and dairy products to Britain be overlooked. Their presence on the British market is itself an education.

NEW LISKEARD'S VIEW.

The attention of the Timiskaming Board of Trade has been drawn to a series of articles appearing in your paper recently, and particularly to an editorial in your issue of Oct. 16, in which you advocate the establishment of a new judicial district in Timiskaming. Speaking of the natural centre of a new district you advocate the claims of Halleybury, and state that "Cobalt favors Halleybury, and there is no objection from any other section of the district."

A BRITISH JUDGE ON POLICE METHODS.

In a recent trial at the central criminal court of the City of London, England, the common sergeant who presided sharply commented, during his summing up, on the methods employed by the police. He expressed the opinion that there had been "an unusual anxiety on the part of the police to secure a conviction. Police officers," he continued, "when they are dealing with accused persons should never take advantage of them." This is a rule which is not always observed in Canada and the tendency to depart from it becomes more marked as the practices prevalent in the United States are permitted to cross the line. It has been affirmed that "the third degree" has not been absent from Canadian police methods.

taking one step or another to prevent a person he honestly believes to be a criminal from having every information, every chance of affording evidence and calling evidence, he might be a very zealous officer but he is a very one-sided one."

In the case in question the London Jury acquitted the accused, and an order was made that the cost of the defence should be paid by the St. Pancras Borough Council, which had initiated the prosecution. The proceedings afford an excellent example of the care which British judges exercise in the dispensation of criminal justice. Absolute fairness to the accused from the moment of his arrest until the verdict of the jury is delivered is not only expected but enforced. Yet, comparing the methods sanctioned in the United States with those of the United Kingdom, the results are wholly in favor of the latter. Much is heard just now in the republic about reform of criminal procedure. An essential part of any reform should be a return to the British system of fair play to the accused at every stage of the prosecution.

THE "FORT GARRY" HOTEL, WINNIPEG.

Alliance to the ruins of that historic monument, "Old Fort Garry," memorable in the early history of Canada's now western metropolis, is being effected. The "Fort Garry," truly representative of greater Winnipeg's magnificent edifice—to rank with the world's finest hotels, embodying in its construction the most advanced scientific and architectural art of the day, is the very heart of the city, to which all lines of traffic converge, it is readily accessible to the railroad and electric car lines, and is the centre of the blocks of most of the leading theatres, while one minute's walk will place one among the largest and most pretentious of the great hotels of the world.

MARK HAMBURG TO-NIGHT. Special interest attaches to Mark Hamburg's recital at Massey Hall tonight as this week the centenary of the great composer, Franz Liszt is being celebrated in musical centres all over the world. Liszt, whom Wagner styled "the greatest musician of all the ages" is represented in the Hamburg program by the Hungarian Rhapsody No. 2, his transcription of the Bach Prelude and Fugue in A Minor, and two other numbers. In Montreal on Monday night which was the date of the great master's centenary, Mark Hamburg played a special program of Liszt works and was repeatedly called amid great enthusiasm. Tonight his program is as follows: Prelude and Fugue A Minor, Bach; Liszt; Fantasia C Major, Op. 15; Schumann; Ballade; Grieg; Nocturne G Major, Chopin; and the Etudes in G minor, F major and G flat; Etudes "Les Sources," D flat, with of the Wisp and Rhapsodie No. 2, Liszt.

RUSH FOR HARRY LAUDER. The sale of seats for Harry Lauder opened at Massey Hall on Tuesday morning and judging by the sale for the past two days there is no doubt whatever that there will be packed houses for each performance. Whoever one may travel Harry Lauder is known as the greatest comedian of the day. Mail orders have been filled from many points east and west, some nearly two hundred miles away. Owing to the great demand for seats the manager of Massey Hall requests that all telephone orders be taken up promptly. The dates of Lauder's appearance are Friday and Saturday, November 3 and 4, afternoon and evening.

CITY TRIES TO NON-SUIT BULK OF LENNOX CLAIM

Claims Six Years Before Issuance of Writ Outlawed, Thinks Mr. Drayton—Architects on Stand.

A new feature has changed the complexion of the Lennox case. After the conclusion of the case for the plaintiff yesterday noon, Corporation Counsel Drayton attempted to dismiss the action almost entirely by asking Judge Latchford to non-suit the claim, or at least that part of it that was accumulated earlier than six years previous to the issuing of the writ for the present suit.

Based on his claim on the statute of limitations, Mr. Drayton argued to prove that only a small amount of Mr. Lennox's claim was earned within the six years previous to the issuing of the writ. Only two claims, that for furniture and furnishings, and that for adjusting accounts, were valid. All the others, he claimed, were outlawed.

Mr. Cowan in reply stated: "It is to be borne in mind, no matter what entry was made, or what money paid to Mr. Lennox, it was always entered under the general designation of 'arbitrator.' It should not be read into this thing, that if the city is liable to Mr. Lennox, it might use the statute of limitations to evade payment of a debt due to the creditor."

"Do you maintain that the city should make payment on a claim that the city has no accounting of, or that Mr. Lennox has not an entry in his books for?" asked Judge Latchford.

Had Childlike Faith. "As regards that, Mr. Lennox did start to keep books, but he soon became lax in that business, but I maintain that the very fact that he did not have all this entered in his books as a plain circumstance that he relied on the city to treat him fairly in the work he has done."

Mr. Drayton cited a case tried in the English courts where a claim of \$5,000 against a corporation was dismissed on the decision that a running account could not be collected after six years elapsed.

Judge Latchford, after listening to the argument, decided to reserve judgment on the question.

Alexander C. Hutchison, architect, of Montreal, was then called by the corporation counsels. Mr. Maclean examining him, he thought that six per cent. on the cost over \$400,000 would be good pay for Mr. Lennox. It did not necessitate any special architectural knowledge to carry on the work. Any good builder could have done it.

MORE GIRLS THAN ROOM PROBLEM FOR MR. HANNA

Alexandra School Thinks \$15,000 Would Help Materially—Deputation For Queen's Park.

Many troubles were made known by the officials of the Alexandra School for Girls at the meeting of the Industrial Schools Board yesterday.

Good Work, Says Hubbard.

Mr. Hubbard declared that the committee was acting under legal advice as to going on record. He admitted that making involving increased expenditures would go thru the usual routine and would therefore not be recorded in the minutes.

Edmund Burke, architect, spoke of the schedule of fees compiled by the Ontario Association of Architects, and Mr. Cowan wished to put in the schedule.

Pamphlet Charge Fair.

He stated that it was outside the province of an architect to set out data for pamphlets. He would make extra charges for that. The usual charges for preparing plans and specifications and for supervision was 5 per cent., and additional charges were customary for new plans of alterations.

The carrying out of the Elliott & Nelson contract by day labor would not be part of an architect's duty, the witness testified. Under the existing conditions he did not think that 15 per cent. was too great a charge. The witness stated that \$10 an hour might be a fair wage, considering Mr. Lennox's position as an architect.

Eustace G. Bird of the firm of Carrère & Hastings, New York, testified that 8 per cent. was the present charge on plans and specifications. Ten per cent. would be the charge for work similar to the completion of the Elliott & Nelson contract.

Mr. Bird thought that with good organization, an architect need not bill the work more than once or twice a week.

As to the closing up of accounts, he did not think that a charge should be made.

ANIMAL LOVE.

Another love is universal, and there is no love like the mother love, fond of the high and lofty loving in this way, is done by mothers. Apart from this the work of wooing falls to the male members of the family, whether it be the human family or some one of the other animal tribes. We read how, years ago, a Bulbul of "Oud" Nightingale, wooed a white rose until it blushed red, and that was the beginning of the red rose. The Spanish Cavalier stands out in the rain and wades his "Dulce Mia" until there is a crack in his neck, while she sits aloof in a window above.

The cackle of the loon may be a love song for all we know. Maybe that's what made him loony in the first place, as he is the only bird that loves his mate.

The wild moose follows his passion across the lake, and as Micky as not the answering call is from a bark born in the hands of a hunter, luring him to death.

It seems a stalling shame, but if you take a Grand Trunk train and travel into the "Highlands of Ontario," you will find men doing that very thing: arguing, doubting, that all is fair in love and war.

INVEST NOW IN INDUSTRIAL CENTRE

IN THE CITY OF
EDMONTON
THE HEART OF OPPORTUNITY
**WHEAT, COAL and
TIMBER**

Edmonton is surrounded by many natural resources; each one would make a city great. Edmonton is the portal of Peace River. Edmonton is fast becoming the industrial city of the west, and "Industrial Centre" is on the line of industry's march.

CITY LOTS \$200 to \$350

THE progress of Edmonton has been so consistently phenomenal that it has almost ceased to create wonder in the mind of any person familiar with Western Canada. But to those who do not intimately know Edmonton, the capital of that wonderfully rich province, Alberta, the growth, enterprise and business energy of this rising city of the real Northwest is amazing.

The Plan of Industrial Centre. This Sub-division is just to the north and above the City Park Annex.

FOR years Edmonton was without direct railway connections. Only to-day are the railways coming in. And yet, without that direct railway communication—which is the prosperity basis of many places—Edmonton has grown to a city of 31,000 people, adding 20,000 in five years. Now three great transcontinentals converge at Edmonton. Who can say what the progress of Alberta's premier city will be ten years, or even two years, hence?

THE great Peace River Valley, the last great west, is now opening up. Several charters have been granted to construct railways from Edmonton into Peace River. Edmonton is the natural, is the logical gateway to the Peace River District; the coming home of hundreds of thousands of raisers of the finest wheat in the world. All about Edmonton are thousands of fertile farms, but

IT is not farming alone that has made Edmonton great. It is a city whose richness in natural resources will make it one of the most renowned in the world. It is just coming into its own. Coal fields stretch in a gigantic arch to the northeast and east of Edmonton. Quietly and with no publicity millions have been invested in the coal fields, the wealth of which can scarcely be appreciated. The Edmonton district is rich in timber. The lands of Edmonton district grow the best grain that comes out of the west. Edmonton is the centre of a veritable Empire of Wealth.

AND while the development of these natural resources is causing the city to throb with hot, surging enterprise and energy, the industrial side of Edmonton is just stretching itself into life. Great

industries are establishing plants in Edmonton that will make this city the industrial city of the west. And these factories are locating in the northeast part of the city, are spending millions of dollars, and all this great development is going on within a half-mile of Industrial Centre.

INDUSTRIAL CENTRE—It is shown on the plan herewith—is within the city limits of Edmonton, and adjoins its industrial section, North Edmonton. There one company—the Swift Canadian Company—have a pay-roll of over \$1000 a day. The P. Burns Company are starting to build a million-dollar plant. Other big concerns are preparing to build—and the industrial growth is all toward Industrial Centre.

INDUSTRIAL CENTRE is next in line for advancement. It has everything in its favor. Even now several manufacturers are negotiating for factory sites along the railroad in Industrial Centre.

THE street cars now run within half a mile of Industrial Centre; the tracks will be extended to this sub-division in the very near future. Negotiations are now on with the G.T.P. for a new station in Industrial Centre. At present all G.T.P. trains entering the city stop on this property. The sub-division is within the new city limits of Edmonton, and the trend of improvement and industry is toward it. Vacant lots between the postoffice at North Edmonton and within half a mile of Industrial Centre are selling now at \$800 to \$1000. Read the prices at which we offer our lots. They are marked away below their value, compared with other lots in Edmonton. We must sell them now. Most lots are 25 feet by 123 feet, some are 33 feet by 123 feet to a 20-foot lane.

Mining Market Held Back by Dearth of Public Interest

Porcupines Sag Slightly Lower Under Apathetic Speculation

Mining Markets Moving in a Rut, With Steadiness the Leading Feature—La Rose Lower

World Office, Wednesday Evening, Oct. 25. The mining market moved along in the even tenor of its way to-day, the exchanges evidencing nothing new whatever, and prices underlying comparatively little alteration in consequence, a few small declines being the only notable changes.

Trading was exceedingly dull most of the day, the outside speculative movement turning apathetic, and professional dealings being restricted in view of the rather uncertain disposition of public sentiment.

The only characteristic trend shown by the list was steadiness, prices holding with a dominant firmness despite the occasional outbreaks of speculation which were evolved. In this the market has proved to be surprising, for in that quotations have not undergone some adjustment as a result of the selling in evidence on the strong spot. The big issues, Hollinger, Rea, Northern Ontario Exploration and the like have run into a rut of quiet trading of late, and show no indications of breaking out of this. The demand for the stocks has turned rather flat, but on any lowering of quotations buying orders are usually sufficient to hold on any declines. On the other hand the demand is not sufficient at the moment to induce an upward turn.

Hollinger rose five points above yesterday, to 11.50, but was decidedly quiet on the advance, very little stock coming out. Rea was not dealt in on the Standard Exchange at all, the bid quotations being a full time below what prospective sellers were willing to accept.

In the cheaper issues there was little of interest to be gleaned from an inspection of the transactions. Dome Extension held firm around 7 1/2 all morning, but lost two points late in the day, on the liquidation of a holding. Vipond held between 4 1/4 and 4 1/4, and was in fair demand through Crown Chartered continued strong, and got up a further fraction.

The most active price in the list was Preston East Dome, which was heavily dealt in around its previous figures. In common with some other issues the shares turned heavy during the afternoon, selling off to 25 3/4, and closing below last night's close.

The market was a drab affair throughout, and the slightly easier time which developed late in the day was not to be expected in view of the apathetic speculation. Sentiment was favorable in the main, and it was predicted that a turn for the better would not be long withheld.

In the Cobalts interest was mainly confined to La Rose, which sold off 20 points to 42 1/2 on the announcement that the extra dividend declaration had not been realized. Other price changes were not material.

LIKES LOOK OF LARBER

Dr. Waiters of Berlin Tells What He Saw on Goldfields.

COBALT, Oct. 25.—Dr. J. J. Waiters of Berlin, Ont., who has been recently from Larber Lake, where he spent a couple of days on business looking over the properties of the Goldfields, Ltd.

The doctor is optimistic over the Larber Lake section and prophesies a bright future for the camp. The Goldfields has in its possession a number of claims, and he is of the opinion that the starting of the shaft will in the course of six weeks time, the company will ship out bricks, which will start the work of the showings in the camp.

The company is installing at Raven Falls a power plant, capable of producing 3000 horse power, which will be distributed to the various companies at a nominal charge. This work will be about six weeks before it is ready to deliver "juice." The Harris-Maxwell has enough development done to warrant the erection of this large mill. Its deepest shaft is down 107 feet and in addition it has proven its ore body which is nearly 200 feet in width of quartz and a tunnel, and means of a quarter shaft and test pits. In all the Goldfields company has 49 claims.

The doctor was optimistic over the Reddick and one or two others over the mill at the Reddick should be running before the end of the year, while the underground development of the just month or so has been encouraging.

The starting of the Reddick and the Goldfields mill will mean that Larber Lake will receive notice from an entirely new point of view, and the latter portion of the property will be developed.

BIG FIND AT COBALT.

COBALT, Oct. 25.—(Special.)—An important surface find has been made by William Law and his brother in Buckle Township. The property which the discovery was made adjacent to the Cobalt and the North Timiskaming lot. The strike was made within about 40 feet of the main shaft, and was accidentally discovered. The pay streak is about 14 inches wide, but the wall rock has been thru for eight feet. The vein is shot the length of at least 300 feet. Further interesting developments are promised.

Not Sold Yet.

R. H. Schultz said last night that he had not sold that famous corner of his. The report was not exactly a false alarm, however, for Enoch Thompson, Limited, have an option on the corner, and they expect that a deal will be closed up within a week for \$85,000.

TORONTO BROKER DISCUSSES THE CAMP

Stuart B. Playfair, Back From Porcupine, Highly Impressed With Mining Situation There.

Mr. Stuart B. Playfair, of the firm of Playfair, Martens & Co., returned to the city last night after a week's visit to Porcupine. This is his second trip to the camp, his first having been made last year.

"A great transformation has taken place," said Mr. Playfair, "instead of a few log huts in a wilderness, which was the Porcupine a year ago, you now see towns springing into existence and wonderful activity in building of every hand. Golden City, South Porcupine and the Timiskaming are centres of activity. There are 500 to 700 buildings of one kind and another in South Porcupine. They are substantial and very creditable to the new towns in the making."

"The visitor to Porcupine cannot fail to be impressed with the extensive mining operations which are being carried on day by day on so vast a scale convinces one that the men behind all these operations are investing with confidence as to the outcome."

"On the Big Dome there are 207 men on the payroll. Buildings of various kinds are going up on all sides, and the dome is beginning to assume the appearance of a little town. The large capitalists behind this property are evidently preparing the way for inauguration of an extensive and permanent industry. The buildings are all of cement brick and steel. Foundations are laid on which the great structures of an extensive steel mill is being erected. Structural steel by the train-load has been arriving, and construction work is now being prosecuted vigorously. It is the expectation that this mill will begin to crush ore in about three months."

"Mining operations are going on actively. The shaft is a vast ore-bearing wide lead various shafts are being sunk to keep on blocking out further tonnage."

"The Golden Strayway vein well deserves its name. It is guarded by a sentinel, who will let no one see it without a pass from the office. Having secured a pass I went to the vein where it is opened in different directions. It is five or six feet wide, and is spattered all over with iron scales and knobs of visible gold. Four or five tons of ore were taken from the mill drifts at work along this shaft. The shaft is now being extended to the West Dome and one on Dome Extension."

Progress at Dome Extension.

"The Dome Extension property, lying immediately to the east of the Big Dome, is well equipped and going forward actively with its operations. The original log houses swept away by the fire have been replaced by a new brick ones, and the other buildings, like those on the Dome, are of brick, steel and cement."

"The main shaft is being driven down about 100 feet. It is being sunk alongside of an extensive ore body, the Anchor pit, which is about 80 feet wide. More will be cut at the 200 foot level in about three weeks."

"There is no need to do any further surface work on the Dome Extension, as good values have been shown in the ore in so many places. In fact almost anything picked from the ore picked up numerous pieces of ore as I walked along that showed gold. I saw the Little Dome, and west to the Dome line."

"It looks as if a very large tonnage of millable gold is being made out on the Dome Extension. Mining operations are now going forward with great activity."

Promising Indications.

"The Preston East Dome is sinking two shafts—one on the north and one on the south part of the property, as well as a pit near the line opposite from where the strike has been made by the Bridges. The strike on the north and south shafts is regarded as important. There is no doubt that a very rich ore has been taken out of it, and its development will be watched with interest."

"The southern shaft on the Preston is now down 70 feet, and a cross-cut is being run to connect with the Golden Strayway workings at the north. The cross-cut has run in an ore body 80 feet wide. It is composed of one foot of quartz on each side and heavily mineralized schist in the centre. The quartz shows visible gold. The assay value has yet been ascertained, as the assay plant is not yet ready. It looks as if it will get pretty good in value."

"The Pearl Lake District. The Pearl Lake section presents an animated appearance. There are located the mines of the Hollinger, the McIntyre and the Peniarth."

"The Hollinger and it is no doubt an important mine. The McIntyre is a very large scale. Five shafts are being sunk, and it is understood that a large tonnage of ore is being produced. The foundations are about to be laid for a mill, and it is understood contracts have been let for its construction."

"The Pearl Lake Mine, which adjoins the McIntyre, has been proving up on a large scale. It is being developed on this property, but it is understood that the objective of the management is to get into an ore body 80 feet wide. With this in view a three compartment shaft is now being sunk to tap this ore body. This shaft will be driven down to the 100-foot level, and I was not down in the Jupiter, but from the size of the dump I should say they were down 100 feet or more. The dump is a sight. There is more showing all over it. This is one of the most interesting sights of the camp, many visitors coming to see the wonderful showings."

"Directly to the east the Peniarth is opening up its property in a scientific manner under the supervision of Charles Watson. Three shafts are going down in different parts of the property."

HANDSOME QUARTZ VEIN ON MARTIN PROPERTY

All Porcupine Admirers A Strong Lead South of Dome—Owned by Two Young Brothers.

PORPCUNE, Oct. 25.—(From Our Man Up North.)—Consistent in run, strong in colors, and yielding good values, is the handsome vein of quartz exposed on the Martin lot to the south of the Dome.

All summer mine men, while passing south into the Deloro district, have noticed, examined and admired this lead, which lies about 15 rods to the north of the Preston East Dome line. The vein takes a straight east and west strike across an upheaval of schist and porphyry, the porphyry coming in from the south, while the schist is the formation to the north. A contact is formed at the juncture of the schist and porphyry.

In places it is 12 feet wide near the road, but the average width is not over six feet. The quartz shows for perhaps 150 feet and then dips under the surface of the earth. It is now being exposed in view in quartz outcroppings near Simpson Lake, where the S.P. veteran claim undoubtedly secures it. No reports of the results have been notified. It is said that the values run just as consistently as the lead shows on the surface.

In the outcroppings near Simpson Lake the vein is exposed in a very interesting way. The work was done last winter. No announcement will be made by the owners, C. T. Young of Halliburton and A. J. Young of North Bay, until a body of the ore is blocked out. At the present time no work is being done.

The Martin lies well within the schist belt to the south of the Dome.

THE GENIAL COLONEL

Stuart Weatherly, the Porcupine Gold Mine Finder, Goes North.

Col. Stuart Weatherly, who two weeks ago made a startling find on the "Little Pet," adjoining the Preston claim in Porcupine, passed thru Toronto yesterday on his way to the gold camp.

The colonel has every characteristic of a military man, and at the same time is not wanting in business energy. He was highly indignant that some one had attempted to disparage his views of Porcupine, and particularly his statements of the find on the Bridges property.

In response to a query as to why he is going into Porcupine, he stated that on medical advice he had been forced to leave Alaska, and that his object in going to Porcupine was to concentrate his interest in Porcupine.

"I have been in every important mining camp in the world," he said, "and have seen engineers' opinions frequently disproved. This will assuredly be the case in Porcupine, as it was in Cobalt."

"I have no intention of asking the public to join me in any of my enterprises, having control of ample funds otherwise."

"Flicking the ashes from his cigar the colonel intimated that he might have something more to say after he had made another inspection of the camp."

Pills Killed Pup.

NIAGARA FALLS, Oct. 25.—(Special.)—His fondness for pills to-day caused the death of a pup owned by 6-year-old Edith Smith. The little girl was playing with a box of pills which the puppy swallowed after the child had taken several.

SYNOPSIS OF CANADIAN NORTH WEST LAND REGULATIONS.

ANY person who is the sole holder of a family, or any part, over 10 years old, may homestead a quarter section of valuable Dominion land in Manitoba, Saskatchewan or Alberta.

The applicant must appear in person at the Dominion Land Agency of Sub-Agency for the District, and make a declaration of intent to settle on certain conditions by establishing a residence, or by other means, within six months of the date of the grant. Six months' residence upon and cultivation of the land in each of three years, a homesteader may live within nine miles of his homestead. A farm of at least 20 acres, wholly owned and occupied by him or by his father, mother, son, daughter, brother or sister, in certain districts a homesteader may in good standing make a homestead on a larger area. The homesteader must reside on the homestead or pre-emption land for six months in each of three years. The homesteader must cultivate fifty acres extra. One who has entered into a purchase homestead in certain districts cannot obtain a homestead in certain districts. Must reside on the homestead. Must reside on the homestead. Must reside on the homestead.
