In response to the protest lodged by President Galt of the Toronto Baseball Club against the grossly wrong tactics indulged in by Manager Buckenberger and players of the Rochester Baseball Club during their recent visit to the Island, President Powers has called a meeting of the Eastern League, to be held at Worcester this week, when the offending individuals will likely receive their final warnings. Protests against Umpires Sandy Griffin and Jack Egan will also come under consideration. Mr. Galt will attend Saturday's game against Worcester, and will also attend the meeting of the Eastern League.

C.W.A. TAKE A STAND.

The Committee Decides to Withhold All Interferences.

A meeting of the Executive Committee of the Canadian Wheelmen's Association was held on Saturday afternoon in the parlors of the Queen's Hotel, Toronto. G. G. Galt was in the chair. All the members were present, with the exception of Vice-President John W. Wilson of Kingston. H. B. Howson of Toronto acted as secretary.

It was resolved that Secretary H. B. Howson prepare a copy of the report, and forward same to the Montreal papers for publication.

What was done, seconded by H. B. Howson, that a vote of thanks be tendered to Mr. G. Galt for his report.

The principal object in calling the Executive Committee was to discuss the situation at Ottawa regarding the Dominion team on July 1, when they were to have left for Montreal.

It was resolved that Secretary H. B. Howson prepare a copy of the report, and forward same to the Montreal papers for publication.

What was done, seconded by H. B. Howson, that a vote of thanks be tendered to Mr. G. Galt for his report.

The principal object in calling the Executive Committee was to discuss the situation at Ottawa regarding the Dominion team on July 1, when they were to have left for Montreal.

It was resolved that Secretary H. B. Howson prepare a copy of the report, and forward same to the Montreal papers for publication.

Bankers—THE CANADIAN BANK OF COMMERCE.

HEAD OFFICE: TORONTO, ONT.

The City Dairy Co., Limited, has been formed for the purpose of establishing a milk supply for citizens of Toronto and vicinity under thoroughly sanitary conditions. It is firmly believed that the Company will not only do a profitable business for its shareholders, but will, in addition, perform a distinct service to the city by placing the milk supply upon, perhaps, a better basis than the milk supply of any other city on the continent. During the past ten years sanitary science has made much progress in regulating some of the important supplies for human life, but it is well known that little general improvement has been made in the production and supply of milk. Milk, which, having regard to the health of children and invalids particularly, should be produced and delivered under the best conditions possible, is still, unfortunately, quite commonly a vehicle for the transmission of disease.

PRESENT CONDITIONS IN TORONTO.

The milk supply of Toronto is in all probability not behind that of most other cities, but the conditions surrounding milk production, collection, storage and distribution in any city where special organizations with modern sanitary appliances have not been introduced are such as could not be approved by those taking the trouble to investigate for themselves the general conditions surrounding the industry. The conditions of barns, milk houses, transportation of milk and its handling and delivery in the city are practically unregulated. It is safe to say that only a portion of the farms supplying to the city have ever been visited by the Board of Health inspectors. This is no reflection on the Medical Health Officer, who is thoroughly alive to the importance of the subject, but is due to limitations of authority and of appropriations of the Board, and especially to the fact that betterment is next to impossible upon the present commercial basis.

There are at present something over 300 milk dealers in Toronto, delivering an average of about 5 cans a day each, requiring about 750 wagons for the purpose, whereas less than one-fourth the number of wagons would accomplish the delivery under a proper system. The milk, for the most part, is delivered from the cans by dipping it into various utensils in the streets. Where the bottle system is used, the bottles are filled in the rooms of stores and private homes not at all suited for the purpose, and sometimes in the wagons on the streets. The bottles are not always properly cleaned, as there are only two or three dealers in the city having sterilizing apparatus. No article of food is more susceptible to injury from its surroundings than milk, and none so quickly absorbs and develops bacteria on exposure, and instead of milk being left to careless handling, of all commodities, its distribution should be attended with the greatest care.

A NEW SYSTEM NECESSARY.

It has been repeatedly stated by leading physicians of the city that no greater benefit could be conferred upon Toronto than the placing of its milk supply upon a really proper basis. This can only be accomplished by a company with sufficient capital to expend the necessary sum for thorough inspection of the cattle producing the milk and of its surroundings, and the equipment of a large central plant with efficient scientific apparatus for aerating, cooling, bottling and caring for the milk as received and sent out. This involves a large investment and an extensive sanitary building, with cold storage plant and with all facilities for washing, sterilizing and filling bottles expeditiously under most rigid rules as to cleanliness. These premises should be under the constant supervision of the Health Officer's department, and open to public inspection at all times. The company undertaking this work must, of necessity, buy its milk direct from farms, and every producer must be required to sign a strict contract setting out in detail the requisites of the company in regard to sanitary surroundings, feeding, watering, general care of the cattle, and mode of caring for milk until delivered to the company, all of which will be subject to regular inspection by veterinarians and special officers of the company.

CITY DAIRY COMPANY, LIMITED.

With the express object of carrying out the plan indicated above, the City Dairy Company, Limited, has been organized with ample capital. Its directors, who have carefully looked into the matter, believe that with the latest and most modern facilities and proper system—even though it will, probably, be found expedient to pay somewhat higher prices to the producer, to secure a better quality of milk, without advancing prices to the retail customer—there is a sufficient margin to make a successful business. It is not the purpose of this company to force or even urge a consolidation of all the milk routes. It will undoubtedly, however, do a large proportion of the milk and cream business of Toronto. With the routes already secured and under option there is every reason to expect that when the company's new premises are completed it will start off with a daily business of at least 750 cans of milk; 250 wholesale and 500 cans or 16,000 quarts delivered daily to retail customers. At the dairy, which will be centrally located, the milk as received will be at once inspected and tests made as to its fat content and purity. A chemist and bacteriologist will be retained on the company's staff, whose regular examination of every can received will insure its cleanliness and purity. After inspection the milk will be elevated to filters and clarifiers, whence it will pass into the antiseptic milk room, where, by gravitation, it will fall over aerators and coolers to the bottling tables. After filling, the bottles will be sealed and placed in cold storage rooms until taken out and delivered to customers. The company will also do a large business in definite percentage and table cream. Other dairy products will also be handled, and a thoroughly modern ice cream plant will be installed. The ice cream business of the company will be quite important, as is evidenced by the profitable ice cream businesses in many cities in the United States.

All departments of the Company's business will be on a sufficiently extensive scale to warrant placing each of them in charge of an expert. The stables will be thoroughly equipped for the care of the horses and vehicles in the best and most economical manner. The rolling stock will be the best adapted to the purpose. Cleanly and courteous drivers in uniform will attend to the delivery. The Company will do only a cash business on an approved ticket system. The attention of the citizens of Toronto is cordially invited to the methods to be adopted by the City Dairy Co., Limited, and on the completion of its plant all will be welcome to inspect the operations of the Company from start to finish.

J. L. SPINK, Managing Director. **J. V. Moore, Superintendent.**

A CO-OPERATIVE COMPANY.

The nature of the business is such that the founders of the Company consider it should be largely co-operative. Accordingly, in the organization, instead of large blocks of common stock being appropriated for a few promoters, it has been arranged that there shall be a wide partnership, with all shareholders on more nearly equal terms. With this in view the undersigned have been placed in a position by which they are able to provide a bonus of one share common stock with each share of preference stock. In this way the \$350,000 of preference stock will carry \$350,000 common stock as bonus. Of the \$350,000 of preference stock, \$80,000 has been subscribed by the directors; \$70,000 is being applied in part payment of purchase price to milk dealers selling out to the company; \$100,000 remains in the treasury, and the public are now given the opportunity to subscribe for \$100,000 (1,000 shares of \$100.00 each) in small amounts, carrying a bonus of one share common stock (fully paid and non-assessable) for each share of preference stock.

NET PROFITS.

A very careful and exhaustive estimate made by the President, Managing Director and Superintendent, with other directors, assisted by Mr. S. M. Heulings of Philadelphia, widely known as an expert in this direction, indicates that net profits for the first full year of operation, after providing for every possible expense, may be expected to reach, at best, \$51,300, a sum sufficient to pay 7% on the \$250,000 preferred stock outstanding and 5% on the \$500,000 of outstanding common stock and leave a reasonable balance at credit of profit and loss account. This sum should be capable of steady increase as the Company's field of operation enlarges.

All of the money realized under subscriptions for preference stock will be devoted absolutely, without deduction, to the actual business of the Company. There will be no costs whatever for advertising, flotation or preliminary expenses payable out of money realized from preference stock.

SUBSCRIPTION BOOKS will be opened at the offices of the undersigned on **Tuesday Morning, the 12th inst.**, at ten o'clock, and close not later than 4 o'clock on Monday, the 18th inst. Subscriptions will be received for one share and upwards, and in allotment preference will be given to small subscribers who are bona fide residents of Toronto or suburbs of Toronto and farmers in this vicinity. The right is reserved to close the subscription books at any time before 4 o'clock on the 18th inst., to allot in whole or in part of application and to reject any application.

1000 Preference Shares at Par, - \$100,000

Carrying as bonus, share for share,

1000 Common Shares of \$100 Each.

The 7% preference stock carries quarterly cumulative dividends, has priority over the common stock as to both dividends and assets, and is payable 10% on allotment, 10% on the first day of each of July, August, September and October, 1900, and 50% on June 1st, 1901, with the privilege of making prepayment of any or all instalments at any instalment date. Subscription forms may be had on application.

A. E. AMES & CO., 10 King Street W., Toronto

Criticism Invited.

When you want to examine "Semi-ready" bring a critical friend with you. "Semi-ready" can stand criticism—invisits it. Throws out a broad challenge—"equal to best 'custom-made' and costs one-third less." Sold at the trying-on stage—quick delivery. Money back if wanted. \$20, \$18, \$15 and \$12 per suit.

MINES AND MINING STOCKS

Miner's Review of Chief Movements in Rossland Camp for Week Ended June 10.

SUCCESS OF CONTRACT LABOR.

Le Roi to Ship for the Time Being Some Ore to the Trail Smelter.

In its weekly review of Rossland camp, published June 10, The Miner says:

The feature of the week in mining circles was the calling by the B.A.C. for proposals for an additional 40-drum compressor plant. The corporation already has a 40 and a 12-drum compressor in use and is erecting a 40-drum plant, all of which has not arrived from the factory. When, however, the one which the company is about to order is installed, the compressor plants will have a rated capacity of 122 drums. This will give the B.A.C. the largest compressor capacity of any quartz mining company in Canada. With a plant like this it is certain that mining can be carried on to a large scale by the British American Corporation.

The capacity of the Northport smelter is understood to be doubled, so that it will be able to handle 1500 tons per day. The smelter is scarcely able to handle the present output of the Le Roi, and as the Josie, No. 1 Nickel Plate and Columbia will, it is thought, before a great while, join the list of shippers, there will be need for the increased smelter capacity. As the Northport smelter is crowded, the intention of the B.A.C. is to ship some of the second class ore to Trail to be treated there. This will relieve the congestion at Northport until such time as the new shaft to be added to the smelter plant is brought into use.

The residents of Northport and the Velvet Midea, Limited, have formed a combination, and the result is that a wagon road is to be immediately constructed from Northport to the Velvet mine on Sophie Mountain. This step was decided at a recent meeting of dynamite in the town of Trail, and a Mr. Ogilvie has been appointed to take charge of the construction of the highway. The following is the plan: The government will soon get into working order at Victoria, so that a wagon road may be constructed from this city to the Sophie Mountain section, as the diversion of this trade to the other side of the line means a considerable loss to the merchants of this city.

Contract System of Labor.

Mining under the contract labor system seems to be accompanied by great success in Rossland. The Miner of that city has the following interesting article:

There are two ways in which contract work is usually undertaken in a mine: the one is the method of paying by each foot of advance and the other per ton extracted. The first is open to the objection that untrained men will not break up such much rock at each lift as men who are better skilled. Sometimes an excessive quantity of dynamite is used, and sometimes the holes are not broken out to their full extent. The loss partly falls upon the miner, as he gets paid only by results, but also upon the mine owner, who loses much important time in getting his work forward. The loss falling on the men will too often occasion them to form the opinion that the remuneration received for their work done is not commensurate with the exertion applied. Moreover, the waste of dynamite is frequently considerable. Again, this kind of contract is readily applicable to straight driving or sinking, cannot easily be used in stoping. For in this latter case the excavation, instead of being regular, follows the shape of the deposit, which lying often in curves, convexities and concavities, has a breadth extremely variable. Hence it cannot readily be calculated.

FREE! FREE!

Every Sufferer from Heart- and Nerve Troubles may have, Free, a Full Box of Mitchell's Heart and Nerve Pills.

Here are some of the diseases and symptoms of disease for which these pills are indicated: Fainting, Weakness, and Fracturing of the Heart, Skip Beats, Weak and Irregular Pulse, Smothering and Shaking Spells, Dizziness and Faintness, Rush of Blood to the Head, Cold, Clammy Hands and Feet, Swelling of "Pins and Needles," Nervousness and Sleeplessness, Weakness, and Thinness, Brain Fog and Loss of Memory, Anemia, Chlorosis, or Green Sickness, Female Weakness, Debility of Growing Boys and Girls, Trembling of the Hands, Tobacco Heart, Partial Paralysis and lack of vital force.

On the other hand, the method of payment per ton extracted is open to the objection that untrained men will not break up such much rock at each lift as men who are better skilled. Sometimes an excessive quantity of dynamite is used, and sometimes the holes are not broken out to their full extent. The loss partly falls upon the miner, as he gets paid only by results, but also upon the mine owner, who loses much important time in getting his work forward. The loss falling on the men will too often occasion them to form the opinion that the remuneration received for their work done is not commensurate with the exertion applied. Moreover, the waste of dynamite is frequently considerable. Again, this kind of contract is readily applicable to straight driving or sinking, cannot easily be used in stoping. LORD MINTO IS POPULAR.

The People of Aylmer, Que., Turned Out En Masse to Show Their Loyalty to the Queen AND VISITING GRANDDAUGHTER.

Father O'Leary a Hero—The Labor Strike in Ottawa a Setback for Laborers' Union.

Ottawa, June 16.—(Special.)—The loyal citizens of Aylmer gave the viceregal party a rousing reception Friday evening and Saturday morning, on the return from the excursion to the Chats. In the Government House party were Princess Arbert of Anhalt, and when the distinguished members of the party stepped off the steamer the assembled citizens sang the national anthem. Great crowds of people manifested, and repeated cheers were given. Flags were flying from all the public buildings, and many of the private residences were also gay with bunting. The Hull electric railway station was also prettily decorated.

The viceregal party made the trip up Lake Deschambault on the steamer "G. B. Owen." Lord Minto expressed his pleasure and gratitude for the kindness shown by the visitors to the captain and members of his crew, to each of whom he presented \$5. A similar gift was made to Motorman Bell and Conductor Corrie, who were in charge of the electric railway. The viceregal party made the trip to and from Aylmer.

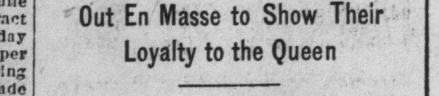

Father O'Leary a Favorite. When the news reached Ottawa that Father O'Leary, the Catholic chaplain with the first Canadian contingent, had been stricken with enteric fever and was likely to die, there was general regret. It was known that he was a favorite of the viceregal party, and his death would be a great loss to the army.

Setback for the Union. The outcome of the miners' strike, which ended during the week, was a decided setback to the Builders' Laborers' Union. A prominent member of the "Laborers' Union" states that certain members of the union, who were of the opinion that they had the contractors in a tight place and were certain that if they only held out, were the cause of the great defeat. He says that if the compromise of \$1.00 a day had been accepted, the strike would have been a success, and now it is left to the good-will of the contractors to raise the wages to their former level, and if not the men are no further advanced than before the strike.

Field Battery Back From Camp. The Toronto Field Battery, with 30 horses and 60 men, arrived in the city on Saturday night by special train from the camp at Deseronto. Major Myers was in command. The men were dismissed after marching to their armories and depositing the equipment.

The Old Reliable Remedy for Diarrhoea and Dysentery.

Grandma Mrs. Thos. Sherlock, Ayr, Ont., writes: "My little girl, three years of age, was taken very bad with diarrhoea, and I was going to lose her, when I remembered that my grandmothers always used Dr. Fowler's Extract of Wild Strawberry, and often said that it saved her life. I got a bottle and gave it to my child, and after the third dose she began to get better and slept well that night. She improved right along and was soon completely cured."

PICNIC HELD AT BLOOMFIELD.

Speeches Were Made Denouncing

Both the Old Parties and Demanding

New Conditions.

Bloomfield, Ont., June 18.—(Special.)—A

large picnic was held on Saturday at the

Sand Bank, under the auspices of the Pa-

trons of Industry, this organization having

still a strong following in Prince Edward

County. About 4000 people were present

and a large audience assembled to hear the

addresses delivered during the afternoon.

John W. Ryhl, West Lake, was chairman.

Rev. Dr. Douglas, M.P., Assiniboia, was

the first speaker, and expressed extreme

parliament. Several lawyers are members

of the House of Commons, and the produc-

ing classes should be better represented.

The Dominion Government is contending

for bribing foreigners to emigrate to Can-

ada, instead of righting conditions here.

Frank Oliver, M.P., Alberta, was the next

speaker. He said that the Government is

not doing anything to improve the condi-

tion of the country. He said that the Gov-

ernment is not doing anything to improve

the condition of the country. He said that

the Government is not doing anything to

improve the condition of the country. He

said that the Government is not doing

Question of Electric Lighting Tenders

Has Been Left Over Till To-Day.

Objected to by Contractor Who

Took Contracts When the Rate

Was 15c-Debateur Bylaws.

Henry O'Brien executed a rather checky

manoeuvre before the Board of Control

last night. He had been asked to get

down in the chair set apart for the World

representative at the table before The

World had arrived. The presumed error

was called to his attention, but he replied

that he was a reporter himself and repre-

sentative of The Law Journal. The World

representative, the controller, and Mr. O'Brien

thus had the very best facilities for hear-

ing. He busied himself in a pretence of

note-taking till the contracts for street

lighting were mentioned. Then he jumped

up and declared that he represented the

Toronto Electric Light Co. The gentlemen

interested in other tenders had to be con-

tented with back seats, but Mr. O'Brien

was right in his own mind. He had been

asked to get down in the chair set apart

for the World representative at the table

before The World had arrived. The pre-

sumed error was called to his attention,

but he replied that he was a reporter

himself and representative of The Law

Journal. The World representative, the

controller, and Mr. O'Brien thus had

the very best facilities for hearing. He

busied himself in a pretence of note-

taking till the contracts for street light-

ing were mentioned. Then he jumped up

and declared that he represented the

Toronto Electric Light Co. The gentle-

men interested in other tenders had to

be contented with back seats, but Mr.

O'Brien was right in his own mind. He

had been asked to get down in the chair

set apart for the World representative

at the table before The World had ar-

rived. The presumed error was called to

his attention, but he replied that he was

a reporter himself and representative of

The Law Journal. The World representa-

tive, the controller, and Mr. O'Brien

thus had the very best facilities for

hearing. He busied himself in a pre-

tence of note-taking till the contracts

for street lighting were mentioned. Then

he jumped up and declared that he

represented the Toronto Electric Light

Co. The gentlemen interested in other

tenders had to be contented with back

seats, but Mr. O'Brien was right in his

own mind. He had been asked to get

down in the chair set apart for the

World representative at the table be-

fore The World had arrived. The pre-

sumed error was called to his atten-

tion, but he replied that he was a re-

porter himself and representative of

The Law Journal. The World representa-

tive, the controller, and Mr. O'Brien

thus had the very best facilities for

hearing. He busied himself in a pre-

tence of note-taking till the contracts

for street lighting were mentioned. Then

he jumped up and declared that he

represented the Toronto Electric Light

Co. The gentlemen interested in other

tenders had to be contented with back

seats, but Mr. O'Brien was right in his

own mind. He had been asked to get

down in the chair set apart for the

World representative at the table be-

fore The World had arrived. The pre-

sumed error was called to his atten-

tion, but he replied that he was a re-

porter himself and representative of

The Law Journal. The World representa-

tive, the controller, and Mr. O'Brien

thus had the very best facilities for

hearing. He busied himself in a pre-

tence of note-taking till the contracts

for street lighting were mentioned. Then

It looked as if Walsh wants an increase

of salary, but he stands for it unless he

gets something himself.

The Mayor and Aid, Bowman told how

efficiently the two officers are doing their

work, but the salaries were not increased.

Aid Spence would like information, and

nothing can be done but to wait, when

Aid Sheppard will be present.

The Armour Cadets.

Toronto is to have a visit from the

Chicago Armour Cadets. Their

captain, McCreey, was in the city

yesterday and looked up his friends, ex-

cept Stener, who had charge of the civic

arrangements for the cadets last year. The

cadets were on his way back to Chicago

from Kingston, where he was accompa-

nied by Chaplain Henderson, to make ar-

rangements for their month's stay here.

The cadets, to the number of 60, will

arrive in Chicago on June 20, and will

be here for a week. They will be accom-

panied by their officers, and will be

entertained by the city. They will be

entertained by the city. They will be

entertained by the city. They will be

STANDOUT AT THE RANGES.

Splendid Weather and Some Excel-

lent Scores Made by the

City Marksmen.

LIEUT. DAVISON WINS A MEDAL.

Team of Tyros Beat a Regular Team

of the Highlanders—The

Scores.

The music of the rifles was heard again

at the Long Branch ranges on Saturday.

The attendance was good and the weather

pleasant. A light breeze blew from the

west all afternoon, just strong enough to

blow out the flags. It amounted to about

two feet at 800 yards.

Among the visitors was Mr. W. D. Mac-

pherson, who, also not having handed a

rifle for a good many years, proved that

he is still in the ring by knocking out a

good score, including several bulls.

The greatest interest centered in a hand-

icup team match of 10 men a side, be-

tween picked shots and tyros from the 8th

Highlanders. The idea originated with Lieut.

C. C. Harbottle, and caused the keenest

interest before the match was entered.

A second competition is to be held next

Saturday, and the highest total in both

reports to be made by the winning team.

The picked team fire five shots at each
