The newer members of the confederation have advanced rapidly in industrial life. Prince Edward Island had 5,767 employes in 1881 and 7,906 in 1891-an increase of 37 per cent. in the ten years. Manitoba has reased from 1.921 in 1881 to 4.375 i 1891-an increase of 127 per cent. This, to population, less than the gain in popula tion, owing, no doubt, to the fact that the farm possesses greater attractions in the prairie province than factory and workshop. The Northwest territories returned 83 employes in industrial establishments in 1881 and 1.081 in 1892. British Columbia had 2,871 in 1881 and 11,473 in 1891-an in-
