No 57

VOL III.

## MAPLE HILL.

THESE subscribers beg to announce to his friends and the public generally that he has moved and fixed up for a HOUSE OF RESIDENCE on the above delightful property on the MAPLE HILL ROAD. This place is admirably situated about five miles from the city, and the drive presents a great variety of scenery.

**CHARLES WATTS,**  
February 27, 1874.  
**CARD.**  
**D. E. DUNHAM**  
ARCHITECT.  
Rooms, 1 and 2 Bayard's Building,  
106 PRINCE WILLIAM STREET,  
(OP STAIRS).  
Persons intending to build or remodel their buildings would do well to call at the above office before commencing operations, as the architect can be obtained from the most practical standpoint, the design being simple, reasonable and strong, so combined as to make economy and strength, what it cost.

## BUTTER!

Just Received:  
**20 TUBS**

## Choice Dairy Butter!

from Sussex.  
Will be sold low for Cash. **B. P. PRICE**  
dec 16  
King Square.

## Victoria Dining Saloon,

No. 8 Germain Street,  
(OPPOSITE THE CITY MARKET).

## JUST RECEIVED, and now serving up to

all the tastes of Customers.

## A FINE LOT OF

**P. E. Island and Eucalyptus Bar**

## OYSTERS!

LARGES C AND WELL WEAPORED  
may 27  
C. SPARROW, Proprietor.

## OAKUM.

**200 Bbls. Very Good Quality**

**Hand-Packed; OAKUM.**

For sale by **JAMES L. DUNN & CO.**  
North West.

## NEW

**Tailoring Establishment!**

**JAMES REID,**  
CUSTOM TAILOR, & C.

76 Germain Street,  
(Nearly opposite Trinity Church).

## SPECIAL ATTENTION TO CUSTOM WORK.

Garments made in the most approved  
Fashion, and work warranted to give every satisfaction.

## American Refined Iron

Just received and in Store, ex bite British  
Queen.

**300 Bundles 1/2 in. and 3/4 in.**

## ROUND IRON.

**2,000 BARS 1/2, 3/4, and 1 inch.**

**NORRIS BEST,**  
and 9/16 water street.

## Carrage Stock.

**C. O. BERRYMAN** has just received 1 Case  
of **Dunlop's** Light Nails, Shaft Sockets, Floor  
Plates, Shaft Shackles, and Traps, &c., &c.  
Jan 13

## JOHN McARTHUR & CO.

Dispensing Chemists,

compounded, at all hours, day and night.

## BEST SYDNEY COAL.

We are now selling from Yard:

**Best Old Mines Sydney**

**40 PER CHALDRON.**

**T. MCCARTHY & SON,**  
Water street.

## Eggs. Eggs.

JUST RECEIVED:  
**3 cases FRESH EGGS.**

**J. S. TURNER**

**APPLES,** extra quality—Hudson Pippins and  
Russets, extra quality, for sale by  
**MASTERS & PATTERSON,**  
15 South W. Water.

## THE LAST HOUR.

They came to bear his corpse away—  
Before her arm and stark it lay.  
With blood bespattered from his crest,  
And fire wounds open in the breast.

They said to her, "The grave is made  
Wherein your lover must be laid.  
And you now we have time to spare,  
Unless you seek his fate to share."

She answered, "Ye a little space  
Give me to look upon his face:  
Until this final hour be sped,  
Leave me alone here with my dead."

They turned away, these stern-faced men,  
And left her to her watch and woe,  
Nor stilled sob, nor whispered word,  
Henceforth the wail-silence reined.

Outside the window, droning bees  
Hummed drowsily about the trees;  
The hot sun blazed along the sky,  
The wandering wind crept idly by.

It shook the sweetest and the bloom  
From trailing vines across the room;  
One white bird fluttered down to rest,  
And tramped to crimson on his breast.

She, kneeling by the awful bier,  
Made no lament and shed no tear;  
But the dumb anguish in her eye  
Might have compelled the dead to rise.

Could any yearning look or speech  
Aval, alas! the dead to reach—  
And the still lips that made no sound  
Were pale as lips are, out in stone.

His head within her arms' embrace,  
Her cheek laid close against his face,  
And all the while her lips unceasing  
Her dark hair stretching to the ground—

So clung she silently and fast,  
As one by one the moments pass,  
And with the passing hour once more,  
Her brother entered at the door.

For marching downward through the land,  
There came apace a hostile band,  
And he who met his brothers' sword,  
Might choose his death by fire or sword.

Brief time remained for funeral rites  
When like this time for funeral flight,  
So they approached, fell save at heart,  
To break that last embrace apart.

And one—the tenderest—at her ear,  
Spoke soothing words of love and cheer;  
But none so answer. Mute as clay  
And motionless at his voice she lay.

Then, with a sudden, vague alarm,  
He touched her cheek, he raised her arm—  
The arm drooped lifeless from his hold,  
The cheek already had turned cold!

The grave they followed out for one,  
Head in her arms, the day was done,  
Around it rang the battle din,  
The lovers slept at peace within.

## NOTES AND NEWS.

**UNITED STATES.**  
There isn't much in a name in Missouri.  
The colored people have been killing each  
other at Pacific in that State.

A Western paper, dwelling on the dead-  
liness of nicotine, said that a single drop  
on a dog's nose will kill a man in three  
minutes.

John Smith, who it will be remembered  
was mixed up with that Pochontas affair  
in Virginia, has been elected city weigher  
at Trenton, Tennessee.

"Naphtha," a(n) "naphtha" roared a  
Green Bay landlady, "no, sir, we haven't  
got any; but if you want to wipe your  
nose I'll lend you my handkerchief."

Luckily the report of an Indian war in  
Utah proves to be false. It is horrible to  
think what a number of widows and orphans  
a very small Mormon loss in battle  
would create.

The Chicago *Inter-Ocean* lately asked,  
"What is a dollar?" The Kearney Jun-  
ior, *Inter-Ocean* responds, "Six  
square drinks and ten cents in change,"  
and Chicago comprehends perfectly.

Kansas hotels grade the thing now to  
suit customers. A bed without bugs can  
be had for three dollars, but if you insist  
upon having the bugs thrown in it comes  
a dollar less.

James Armstrong, Esq., a lawyer and  
gentleman of Gatesville, Texas, was  
brutally murdered at that place during the  
first week in February. Five men did the  
deed, then ran away, after five shots were  
fired into him.

The Hornellville *Tribune*, telling how  
Smith, a jitter at Hornell, shot and wound-  
ed a prisoner who was escaping, says that  
Smith was on the roof about 25 feet  
above the prisoner and had two men out-  
side the wall, leading to the murder.  
"Wonder if these two men, so heavily  
loaded," kicked when they went off?

The editor of the Humboldt (Tenn.)  
*Journal* has been presented a voluminous  
bank of wedding-cake, and prays that the  
generous sender may have his "rose-  
colored anticipations of life realized in  
the sterner conflicts of the coming year."  
But suppose the man should not sit down  
on a horse's nest? What then?

There is a possibility that Biddy will, by  
and by, learn to beware of kerosene as  
regular fire-lighter. But it won't do to  
be careless in selecting a substitute.  
The assistant cook at the Mount City  
Hotel in St. Louis, the other morning,  
reticulated at raising the crop of rats and  
went for them in Western fashion, he had  
to fight the cat harder than he did the  
rats, so determined was she to do her  
full duty by them. The worst part of  
this story is that it is, it is, to be  
substantive.

A few summers since Mr. Evans, the  
great New York lawyer, at the urgent  
request of one of his younger daughters,  
sent up to his country place in Vermont  
a donkey for her use. She had read  
about donkeys, but was not familiar with

their peculiar vocalism. The animal's  
strange noises inspired her with the pro-  
foundest pity for his evident distress. So  
she wrote to her father, "Dear papa,  
I do wish you would come up here soon,  
my donkey is so lonesome. As Mr.  
Evans renders this pathetic appeal, it is  
irresistible.

**PASTOR.**  
"Valent pockets on the outside of street  
dresses are very fashionable, stylish and  
unique.

They are wearing the buckles that used  
to be worn at the back as a fastening for  
the necktie now.

Granite cloth is a new material in  
brown and gray; it has an armor figure  
on a lighter ground.

A new cloth for spring reticules is  
woven in narrow horizontal stripes of  
two shades of wool color.

Spring goods appear in the soft yield-  
ing textures that drap so gracefully; and  
are in varieties of light woollen, and silk  
and woolen mixtures.

**Cross cloth** is a fine twilled goods in  
natural unbleached shades. It is all wool  
and intended for redingotes for street  
wear, over a silk dress-train of darker  
hue.

New-a-days all the trimming on street  
dresses appears to be concentrated on the  
front breadths. Black silk, velvet, and  
beads is the handsomest and most  
graceful combination.

A novelty in dress material is raised  
silk designs on woollen grounds—  
diagonal lines, armor figures or polka  
dots—these figures are in self color or  
very slightly contrasting shades.

**GENERAL.**  
On the Anchor Line the cabin sky-  
lights are ornamented with fresh flowers  
and vines. It gives a charming appear-  
ance to the cabin.

That was a jovial husband who told his  
wife she should have a stone monument  
when she died, then smiled as he added  
—"obituary."

A candidate for the position of hang-  
man in England recently offered to hang  
his own murderer free of charge to  
show his proficiency.

Nearly all the chief engineers on the  
Atlantic steamers are Scotchmen. What  
they don't know about engines is scarcely  
worth knowing. That's what they say in  
Glasgow.

It is a somewhat significant fact that  
the only two countries in which the stop-  
ping and forcible robbery by armed men  
of railway trains prevails are Spain and  
the United States.

It is estimated that, during the impend-  
ing famine in India, the government will  
be called upon to supply half a pound of  
grain per day, for eight months, to 25-  
000,000 people.

Gleomy and dissipated youth (who has  
discovered life is not worth having)—"I  
hope I shall be alive after thirty!" Un-  
sympathetic elderly party—"You should live  
off this!"

It is stated that Captain Williams, who  
led the White Star steamer *Atlantic*, is  
now in command of a sailing vessel en-  
gaged in the China trade. It is not pre-  
sented to him to have command another  
passenger steamer on the Atlantic.

It only by way of contrast, it is re-  
freshing to know that in St. Louis the  
Superior of Street Cleaning is com-  
plained of for over doing the matter,  
and papers say that he takes so much  
dirt from some of the streets that he  
leaves very little of the pavement behind  
and a few more scrapings will lay bare  
the original clay. In St. John we will  
be satisfied with even a sight of the  
street crossings now and then.

**PARISIAN SENSATION.**  
In Paris, within the last few months,  
it appears that in the very heart of the  
capital young men, chiefly of the clerk  
or small trader class, have suddenly dis-  
appeared, and no trace of them has since  
been discovered. It is an odd circum-  
stance that some of the kind occurred  
in Paris towards the end of the reign  
of Louis XIV. In a space of about  
four months not less than twenty-six  
young men in seventeen and twenty-six years  
of age. The intelligent multitude immor-  
tally got up a story that an illustrious  
Prince, then of mature years, and suf-  
fering from a painful complaint, resorted,  
as a desperate remedy, to baths of human  
blood. Riots were the consequence; but  
the disappearances continued, and the  
"deutenant de police," the celebrated La  
Bégnie, was finally threatened with a  
*lettre de cachet* and the Bastille if the mys-  
tery were not forthwith cleared up.

Amongst his detectives he had a very  
sharp fellow whose name has been im-  
mortalized by Emile Gaborian—one  
Lecco. This Lecco was promised a high  
position if he cleared the matter up, and  
under the double stimulus of gain and  
professional *amour propre*, he set to work  
in right earnest. Lecco had a boy of  
about sixteen, whom he had brought up  
to the same business as himself—a tall,  
broad shouldered handsome youth, look-  
ing older than his years. He dressed  
him up in fashionable clothes, supplied  
him plentifully with money and di-  
rected him to mix freely with what is  
now called the *haute*, or *bon ton*, and  
the whole detective staff was set to watch  
his movements. One day after the  
decoy, lounging along the terrace of the  
Tuilleries, he was engaged in conversation  
by a young person of surprising beauty,  
with a large body of well-armed police-  
men, and followed his man and his guide  
to a house of splendid appearance in the

Quartier St. Antoine. It had been pre-  
viously arranged with the youth that he  
should take an early opportunity of slip-  
ping handcuffs on the "Polish princess,"  
and then give admission to his father  
and his band. However, the youth,  
with characteristic foolishness, did not  
carry out the plan. Either he was  
not insensible to the influence of  
beauty and wine, and thought possibly  
that it would be much nicer to be a  
Polish prince than tipstaff at the Chateau.  
In short, he supposed very nicely, and  
forgot all about Lecco senior and his  
followers waiting outside. Presently,  
however, the princess rose from the  
table and withdrew a few moments. The  
youth's suspicions revived; he tried the  
princess (he found it locked); then tried  
another, but he was forced to open, and  
then staggered back, perfectly pained  
with terror. The door was that of a cup-  
board, and there neatly arranged on  
silver platters, were 20 human heads, em-  
balmed by some mysterious process that  
enabled them to retain their life-like  
appearance. It is probable that young Le-  
cco would have speedily formed an addi-  
tion to this grim collection, had not the  
youth's suspicions revived; he tried the  
princess (he found it locked); then tried  
another, but he was forced to open, and  
then staggered back, perfectly pained  
with terror. The door was that of a cup-

The Daily Tribune.  
J. L. STEWART, Editor.  
FRIDAY EVENING, FEB. 27, 1874.  
Reciprocity.  
The Dominion Board of Trade could do no less than pass the Reciprocity resolution contained in our telegraphic columns, considering the expression of opinion given by the National Board of Trade of the United States. At the same time we hope that the Executive Committee will not consider the resolution as calling for any extraordinary efforts for the accomplishment of the object desired. Any such attempt on our part for reciprocal trade will prejudice United States legislators against it. We must not run the risk of being considered to be asking for a favor at the hands of Congress. No action whatever should be taken except in conjunction with the Executive Committee of the National Board of Trade of the United States, and we hope the resolution of the Dominion Board may be interpreted in that way by its Executive Committee. When both Boards—the business parliaments of America—simultaneously ask the legislators of the two countries to improve international trade relations, their appeal will have great weight. We may be sure, however, that if we propose any specific scheme of reciprocity that the Washington authorities will propose another less favorable to us, if they entertain the idea at all. The greatest care should be taken, therefore, not to commit ourselves too quickly to any direct proposals for reciprocal trade. The Reciprocity Treaty used to be considered a great service to us, and many were the lamentations dire that arose when it was abrogated. Yet we still live! Trade springing up in new channels; prices advanced so much in the States, under the inspiration of a protective tariff, that we could sell our products there at a profit, after paying the duty; and we are not sure that the abrogation of the Treaty injured us as much as it did the United States. But, believing that restrictions should be removed from all trade as far as possible, especially from trade between contiguous countries, we should like to see the more unrestricted intercourse between the two chief divisions of North America.

We must not flatter ourselves, however, that a reciprocity treaty can be easily negotiated on terms to which our Government can consent. The United States require every dollar of present revenue for the ordinary expenses of government, and Congress will hardly take duties off our productions and increase the duties on the productions of other countries. It is only when the Secretary of the Treasury reports a handsome surplus on hand, and a cry arises for a reduction of the import duties, that we can hope to see anything in the nature of a proposal for reciprocity listened to. When Congress and the Government feel that some duties may be abolished, and the only question is which ones, then our proposals may be made with a reasonable expectation of being carefully considered. We see many difficulties, however, in the path of the reciprocity seekers. We want reciprocity in cereals, potatoes, fruits, lumber and coal, and the Washington Government may reasonably be expected to prefer reciprocity in manufactures in which the United States have an advantage. The Ottawa articles can be effected in the existing tariffs at present. When the United States Government can afford it they will lower all duties to a strictly revenue basis, as the policy of protection for protection's sake is fast giving in bad odor, and the duties on coal, potatoes, etc., will probably be the first to be reduced or abolished. In the meantime we must maintain the manly, self-sustaining attitude indicated in the speech of Mr. Fairweather, and not display an unseemly eagerness to grasp the shadow of a good thing expressed in the word reciprocity that has passed away.

Men are jealous of women, and no mistake. Boston furnishes proof. Two or three ladies were elected to the School Board by handsome majorities over their male competitors, and the School Board voted to deprive these ladies of their seats. The excuse was that their legal right to the seats was not clear. So the ladies appealed to the Supreme Court, and that body decided that there was nothing in the Constitution, statutes, or common law disqualifying women from holding such an office. Did the many representatives of the cultivated and liberal half of the universe welcome the women then? Not a welcome! They instructed the City Solicitor to devote a few weeks to the work of searching for some other excuse for shutting out the ladies from the office for which the people chose them. Miss Stanton should look after those Boston women haters.

Miss Kate Stanton studied for the bar, and the Barristers' Society refused to admit her to practice on the ground that she would fascinate the jurists and render them insensible to the weight of evidence or the force of others' arguments. They were more wise than gallant or just. THE DAILY TRIBUNE and all the most popular Canadian, English and American newspapers and magazines can always be obtained at the bookstore of Mr. W. K. Crawford, King street.

On Fourth Page: Yesterday's Second Edition.  
Personal.  
T. B. Huntington, Esq., will be a candidate for the Aldermanship of Hyacinth Ward.  
Col. Mansell, D. A. G., and Col. Jago, started this morning for a day's trout fishing at Beaver Lake.  
Mr. R. Barry Smith lectures this evening in the Mechanics' Institute on Monday evening, is enthusiastically praised by the Fredericton papers.  
Miss Kate Stanton remains quiet Saturday morning, the guest of Dr. Ring. She lectures in Halifax on Monday evening, and in Amherst on Tuesday evening.  
Duncan Campbell, Esq., author of the "History of Nova Scotia," is at the Warrenton. Mr. Campbell has definitely determined to write the history of New Brunswick, and will devote the ensuing two years to the work of gathering materials and writing them up. He has discovered a mine of historic lore in the archives at Halifax, and will soon systematically begin the work of collecting facts from various sources in New Brunswick.  
New Designs of Walnut Frames at Notman's.  
The Young Ladies' Journal has just been reprinted by Mr. W. K. Crawford, King st. It contains the latest improvements in Berlin wool-work designs, the latest Paris fashions, useful and ornamental needlework, stories, poetry, etc.  
A Gloucester correspondent wants to know if we believe Mr. Napier really was drunk at the meeting of the Home on Thursday, as stated by the *Intelligencer*. The question is a delicate one to answer. Perhaps he was not; perhaps there was no liquor to be obtained in Fredericton that day.  
The Danbury News says that a youth, who bought a quart of peanuts to be eaten at Miss Kate Stanton's lecture on "The Loves of Great Men," was so enraptured by the lecture that, instead of eating the peanuts, he returned them to the dealer and demanded his money back. St. John doesn't eat peanuts.  
The Dissolving Views will be exhibited in the Y. M. C. Hall this evening.  
A couple of men had a lively fight in Paradise Row last evening, a large crowd witnessed the exhibition.  
John McCoy, the head porter of the Barker House, Fredericton, had \$60 stolen from him on Monday.  
Fredericton will have a skating carnival next Monday.  
There was a large attendance at the Victoria rink last evening. Everybody asked everybody else if Miss Stanton was there, and many were disappointed at not seeing her.  
A fresh supply of Henry's Instruction Book at E. Peiler & Bro's.  
Hay and Cornwood for sale wholesale and retail by J. M. Smith, opposite Railway Station, St. John.  
Accidents.  
Mr. Crowler, of Pond street, was knocked down and had two of his ribs broken yesterday afternoon. As he was passing the entrance of the railway grounds at Portland Bridge, the team of Mr. Peters, driven by a man in Mr. Peters' employment, turned in and the shaft struck the man, causing the accident. He was carried home and Drs. Andrews and DeVeber fixed up his broken bones. He is doing well.  
A short time afterwards James Brogan and another man were turned out of a slight at the foot of Main street. Mr. Brogan was thrown on the ice and stunned. He was carried into a store and, after a little while, came to all right.  
To Advertisers.  
The circulation of the *Tribune* is at the present time very large, doubtless exceeding the circulation of any other St. John daily. Advertisers will consult their own interests by patronizing the *Tribune*. Yearly contracts made at favorable rates.  
Shipping Notes.  
The bark *Eliza Young*, Perret, master, from Dartmouth, N. S., for Barrow, E. before reports, was driven ashore at Crookhaven on the 10th inst., during a southeast gale. Her spars had to be cut away, and the vessel was reported as liable to become a total loss.  
The bark *Edith Prince*, Parker, master, from Havana with gear, before reports wrecked at Crookhaven, sunk on the 11th inst.  
The ship *Dyerson* (Pr.), Deming, master, from Antwerp via Tybee for New Orleans, before reports taken into Key West after being ashore near Cape Florida, was got off by wrecking schooner *Ariels* under a bargain for \$8,500, and was towed by the Coast Wrecking Co's steamer *A. Winans* for \$7,500. A submarine diver has been under her and reports her to be in good order. The vessel is being taken to New Orleans on the 20th, where she will be compelled to go in a dock for repairs. The vessel is being getting her off, etc., has been heretofore incorrectly stated.

LOCALS  
The Volunteer Artillery—Presentation of Prizes.  
Smith's Hall, last night, was occupied by the various batteries of Artillery and their flags. The occasion was the presentation of prizes to the successful competitors at the practice last summer. The four batteries having their headquarters in St. John were well represented. They averaged about forty men to each Company. After being put through a few evolutions by Col. Foster, the men were inspected by Col. Mansell, Foster, Jago, Maeshane, and other officers in connection with the two branches of the Volunteer force. The men certainly presented a very fine appearance formed into a square round the building. Their accoutrements and uniforms showed that care had been taken of them, looking in every way bright and clean.  
The first prize presented was Mrs. Jago's Cup. This Cup is the most highly prized of any that the Batteries compete for, both on account of the honor and respect to Col. Jago. The competition for it was keen, and No. 3, the in doing so, that the officers of the Brigade should use the Bow and Arrow next year at a competition to decide who should pay for the oysters for the Brigade. He thanked Mr. Pine for the interest he took in the force, and the fact that the fourth presentation was the officers' Cup, purchased by the officers of the Brigade. This is the first competition for the prize, and it was won by No. 1 Battery, of Carleton, commanded by Capt. Ring. It is a very handsome silver cup with gold lining, about the same size as Mrs. Jago's cup, and cost fifteen guineas. The workmanship is chaste, and the engraving appropriate. A gun manned ready for firing is engraved on the bowl, also a laurel wreath inside of which the name of the winning Battery is engraved. This was presented by Col. Foster, who related interesting facts in connection with the Artillery in New Brunswick. The first company was formed in 1776, when the city was but ten years old. It was called the Loyal Artillery, and John Caldwell was the commanding officer. This service was discontinued since then, but in 1820 two officers were living at present—Col. Thurgar and Capt. Robertson. He related several other interesting facts, and handed the cup to the Captain of the winning company.  
The last cup presented was another gift from Col. Thurgar. It was for competition by the sergeants of the Brigade. Two years in succession Sergeants Howard and Gregg, of No. 2 Battery, had captured the cup, and it was finally decided by each one firing one shot. The happy bachelor Howard received the cup with \$5, and a recommendation from Col. Foster to look around and find a fair daughter of New Brunswick for a companion, so that the Howard name might be perpetuated, and the cup handed down to his children's children. A money prize of \$10 from the Mayor, and several minor prizes were presented. The drum and fife band in connection with the Brigade played several selections, after which the companies marched through the streets to their homes. The members of the band are all connected with Capt. Ring's Battery, and live in Carleton. Though but a short time organized they have made excellent progress under the tuition of Mr. Wichtendahl, and are a credit to the Brigade. Major Peters has an especial interest in the band. In No. 2 Battery had an entertainment at their drill room in Portland after the close of the inspection. An excellent spread was provided. Charles Turner—who had charge of the mess when the Companies were in camp at the Barrack Square—was caterer for the occasion. The Cup was christened and several bottles of champagne disposed of. Toasts were drunk, songs sung, and speeches made, until 12 o'clock, when with cheers the company broke up. This Battery carried off three of the seven prizes. The other Companies were also entertained by their respective officers.  
Heart Disease—Palpitation, Febrile and Irregular Action of the Heart Cured by Fellers' Compound Syrup of Hypophosphites.  
FREDRICK, Digby Co., N. S., Feb. 10, 1874.  
JAMES I. FELLOWS, Esq.—Dear Sir: Gratitude to you, and sympathy for the afflicted, induces me to send you a written statement of my case and the cure effected by using your Compound Syrup of Hypophosphites.  
In April, 1868, I was attacked with palpitation of the heart, I sent for the doctor, and he said nothing could be done for me, and that I was liable to die very suddenly; being very weak and unable to leave my bed, I became discouraged.  
After my physician gave me up, I was induced to use your Compound of Hypophosphites, and the effect was wonderful. In two days I felt the benefit of it, and after taking half a bottle I was entirely free from the complaint, and to this day have not been troubled with a return of the heart disease. Yours very truly,  
SARAH LINT.  
Point Lepreau Weather and Marine Reporter.  
Feb. 27, 9 A. M.—Wind W. N. W., cloudy, with strong breeze; nothing in sight.

It was called the Loyal Artillery, and John Caldwell was the commanding officer. This service was discontinued since then, but in 1820 two officers were living at present—Col. Thurgar and Capt. Robertson. He related several other interesting facts, and handed the cup to the Captain of the winning company.  
The last cup presented was another gift from Col. Thurgar. It was for competition by the sergeants of the Brigade. Two years in succession Sergeants Howard and Gregg, of No. 2 Battery, had captured the cup, and it was finally decided by each one firing one shot. The happy bachelor Howard received the cup with \$5, and a recommendation from Col. Foster to look around and find a fair daughter of New Brunswick for a companion, so that the Howard name might be perpetuated, and the cup handed down to his children's children. A money prize of \$10 from the Mayor, and several minor prizes were presented. The drum and fife band in connection with the Brigade played several selections, after which the companies marched through the streets to their homes. The members of the band are all connected with Capt. Ring's Battery, and live in Carleton. Though but a short time organized they have made excellent progress under the tuition of Mr. Wichtendahl, and are a credit to the Brigade. Major Peters has an especial interest in the band. In No. 2 Battery had an entertainment at their drill room in Portland after the close of the inspection. An excellent spread was provided. Charles Turner—who had charge of the mess when the Companies were in camp at the Barrack Square—was caterer for the occasion. The Cup was christened and several bottles of champagne disposed of. Toasts were drunk, songs sung, and speeches made, until 12 o'clock, when with cheers the company broke up. This Battery carried off three of the seven prizes. The other Companies were also entertained by their respective officers.  
Heart Disease—Palpitation, Febrile and Irregular Action of the Heart Cured by Fellers' Compound Syrup of Hypophosphites.  
FREDRICK, Digby Co., N. S., Feb. 10, 1874.  
JAMES I. FELLOWS, Esq.—Dear Sir: Gratitude to you, and sympathy for the afflicted, induces me to send you a written statement of my case and the cure effected by using your Compound Syrup of Hypophosphites.  
In April, 1868, I was attacked with palpitation of the heart, I sent for the doctor, and he said nothing could be done for me, and that I was liable to die very suddenly; being very weak and unable to leave my bed, I became discouraged.  
After my physician gave me up, I was induced to use your Compound of Hypophosphites, and the effect was wonderful. In two days I felt the benefit of it, and after taking half a bottle I was entirely free from the complaint, and to this day have not been troubled with a return of the heart disease. Yours very truly,

LOCALS  
The Volunteer Artillery—Presentation of Prizes.  
Smith's Hall, last night, was occupied by the various batteries of Artillery and their flags. The occasion was the presentation of prizes to the successful competitors at the practice last summer. The four batteries having their headquarters in St. John were well represented. They averaged about forty men to each Company. After being put through a few evolutions by Col. Foster, the men were inspected by Col. Mansell, Foster, Jago, Maeshane, and other officers in connection with the two branches of the Volunteer force. The men certainly presented a very fine appearance formed into a square round the building. Their accoutrements and uniforms showed that care had been taken of them, looking in every way bright and clean.  
The first prize presented was Mrs. Jago's Cup. This Cup is the most highly prized of any that the Batteries compete for, both on account of the honor and respect to Col. Jago. The competition for it was keen, and No. 3, the in doing so, that the officers of the Brigade should use the Bow and Arrow next year at a competition to decide who should pay for the oysters for the Brigade. He thanked Mr. Pine for the interest he took in the force, and the fact that the fourth presentation was the officers' Cup, purchased by the officers of the Brigade. This is the first competition for the prize, and it was won by No. 1 Battery, of Carleton, commanded by Capt. Ring. It is a very handsome silver cup with gold lining, about the same size as Mrs. Jago's cup, and cost fifteen guineas. The workmanship is chaste, and the engraving appropriate. A gun manned ready for firing is engraved on the bowl, also a laurel wreath inside of which the name of the winning Battery is engraved. This was presented by Col. Foster, who related interesting facts in connection with the Artillery in New Brunswick. The first company was formed in 1776, when the city was but ten years old. It was called the Loyal Artillery, and John Caldwell was the commanding officer. This service was discontinued since then, but in 1820 two officers were living at present—Col. Thurgar and Capt. Robertson. He related several other interesting facts, and handed the cup to the Captain of the winning company.

British and Foreign.  
[To the Associated Press.]  
New York, Feb. 26, p. m.  
Gold 112 1/2; sterling exchange 48 1/2; money 4 per cent.  
LOS ANGELES, Feb. 26, p. m.  
The following official despatch from General Wolsley occasions great relief:  
COUMASSIE, Feb. 5.—We reached here yesterday after five days hard fighting. The troops behaved admirably; our casualties are under 800. The King has left the town to-day, but he promises to visit us to-day and sign a treaty of peace. We hope to start on our return to the coast to-morrow. The wounded are recovering and the health of the remainder of the army is good.  
WOLSLEY.  
The weather is very tempestuous to-day in Great Britain and on the coast. Communication by telegraph between London and various places is interrupted, and much damage has been done to shipping.  
COUMASSIE, Feb. 22: the rate of discount is unchanged; bullion in the Bank of England increased £187,000 during the week.  
NEW YORK, Feb. 27.  
ANNOUS—CONGRESSIONAL FRANKING. The indications are now against the confirmation of Simmons as Collector of the Port of Boston.  
The House yesterday defeated the Bill restoring the franking privilege, by two majorities.  
CHOLERA.  
Official advices confirm the reports of the ravages of cholera at Buenos Ayres. BLOODY BATTLE IN CUBA.  
Advices from Cuba state that another battle has been fought near Puerto Principe, in which 3,000 Spanish troops engaged 5,000 Cubans. Over 240 Spaniards were killed and wounded, including Brigadier General Bascombes, the Spanish Commander. There was no evidence that any Cubans were captured or that they were more than barely repulsed. The Spaniards however claim that the Cubans lost heavily.  
(Special to the News.)  
Dominion Board of Trade—Reciprocity.  
OTTAWA, Feb. 26.  
The question of securing an amendment of the Inspection Act has been referred to a special committee.  
Mr. Fairweather extended an invitation to the Board to hold a summer session in St. John. He would show them a little shipbuilding factory down there with the sky for a ceiling and the limits of the Provinces for its walls.  
Mr. Howland desired them to extend their visit to P. E. Island.  
After a general discussion, it was decided to hold the next meeting of the Board at St. John.  
A resolution asking the repeal of the Stamp Act was discussed till the members took place.  
At the afternoon session the President read a message from Col. Wolsley announcing victory in Ashantee, which was received with cheers.  
Mr. White, of the Montreal *Gazette*, in a masterly speech introduced the question of reciprocity, and moved the following resolution:  
That the Board desire to express its gratification at the growing sentiment in the United States in favor of more intimate trade relations with Canada, and in support of the resolutions passed by the National Board of Trade; and that the Executive Council of the Canadian Board be instructed to take the necessary steps to secure the adoption of a treaty for reciprocal trade with the United States upon a broad, comprehensive and liberal basis.  
Mr. Dorr, of Milwaukee, and Mr. Hawley, of Detroit, spoke earnestly advocating the treaty, and testifying to the growing feeling among Americans favorable to reciprocity.  
Mr. Howland, of P. E. I., followed, suggesting the best modes of procedure.  
Mr. Fairweather, of St. John, showed that Maritime trade was stimulated by the abrogation of the treaty, but he advocated a renewal on general commercial principles.  
The resolution was carried unanimously. A debate took place on the resolution advocating a repeal of the Act imposing stamp duty.  
Mr. Jones opposed the repeal, as the law was one of the fairest imposed.  
The resolution was lost—22 to 28.  
The committee on insolvency reported, recommending certain amendments to the existing law. The report was adopted.  
The Board adjourned till to-morrow. In the meantime the members are being banqueted by the Cabinet.  
Downey is re-elected for Yale, P. C. The recent popular demonstrations in British Columbia resulted in a resolution passing the Legislature that no alteration in terms of the Union should be made without an appeal to the people.  
A Brakesman Killed.  
McADAM DISASTROUS, Feb. 26.  
A brakesman named John Brayden, running on train No. 2 of the N. B. & C. Railway, fell from the brake-van this morning, where he was in the discharge of his duty, and the train passed over him, inflicting injuries from which the unfortunate man died in a few minutes after.

A BACHELOR'S CONSOLATION.

A Romance of the Middle.

In a small little room, not a thousand miles off...

With his cat, and his dog, and his little pet mouse...

There go, doubt, were missed and made quite sure...

Now, this lucky old bachelor heard by a friend...

Having fully determined to get a machine...

For some thought the "Wheeler & Wilson" the best...

And a few for the "Fleming" were ready to fight...

So first to the "Wheeler & Wilson" he went...

Then down to the "Fleming" he went...

But our Bachelor friend was dissatisfied still...

Then they told him another advantage they had...

Our hero replied, "What's the use of the first one of the other is best."

The "Fleming" and the "Wheeler & Wilson" both vied...

After trying in vain many other machines...

For less half a dozen machines were ceased...

In the lightness of mind, and in the speed...

Then the stitch was so neat, so elastic, so strong...

And so many advantages in it, and so many...

From Yesterday's Second Edition.

LEGISLATURE OF NEW BRUNSWICK.

'HOUSE OF ASSEMBLY.'

Mr. Crawford committed a bill to the committee...

Mr. Phillips opposed the bill, as he thought...

The Attorney General thought that the Corporation had no school...

Mr. Phillips said the kind of school meant should be defined in the bill.

Mr. Crawford said the grant was given to the church corporation to use for any school they might choose...

The Speaker and Mr. Nowlan were of the same view, and progress was accordingly reported.

Mr. Hamilton committed a bill to the committee...
